1.	State Pollution Control Board/Committee shall be responsible for display of this EC letter at its Regional office, District Industries Centre and Collector's office/ Tehsildar's Office for 30 days.
1.	The Project Proponent shall follow the mitigation measures provided in MoEFCC's Office Memorandum No. Z-11013/57/2014-IA.II (M), dated 29th October, 2014, titled "Impact of mining activities on Habitations-Issues

	related to the mining Projects wherein Habitations and villages are the part of mine lease areas or Habitations and villages are surrounded by the mine lease area.“
1.	A copy of EC letter will be marked to concerned Panchayat / local NGO etc. if any, from whom suggestion / representation has been received while processing the proposal.
1.	The State Government concerned shall ensure that mining operation shall not be commenced till the entire compensation levied, if any, for illegal mining paid by the Project Proponent through their respective Department of Mining & Geology in strict compliance of Judgment of Hon’ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India & Ors.
Air quality monitoring and preservation	
1.	The project proponent use leak proof trucks/dumpers carrying ore and other raw materials and cover them with tarpaulin.
1.	The project proponent shall submit monthly summary report of continuous stack emission and air quality monitoring and results of manual stack monitoring and manual monitoring of air quality /fugitive emissions to Regional Office of MoEF&CC, Zonal office of CPCB and Regional Office of SPCB along with six-monthly monitoring report.
1.	Design the ventilation system for adequate air changes as per ACGIH document for all tunnels, motor houses, Oil Cellars.
Air quality monitoring and preservation	
1.	Appropriate Air Pollution Control (APC) system shall be provided for all the dust generating points including fugitive dust from all vulnerable sources, so as to comply prescribed stack emission and fugitive emission standards.
Air quality monitoring and preservation	
1.	Effective safeguard measures for prevention of dust generation and subsequent suppression (like regular water sprinkling, metalled road construction etc.) shall be carried out in areas prone to air pollution wherein high levels of PM10 and PM2.5 are evident such as haul road, loading and unloading point and transfer points. The Fugitive dust emissions from all sources shall be regularly controlled by installation of required equipments/ machineries and preventive maintenance. Use of suitable water-soluble chemical dust suppressing agents may be explored for better effectiveness of dust control system. It shall be ensured that air pollution level conform to the standards prescribed by the MoEFCC/ Central Pollution Control Board.
Water quality monitoring and preservation	
1.	Project Proponent shall regularly monitor and maintain records w.r.t. ground water level and quality in and around the mine lease by establishing a network of existing wells as well as new piezo-meter installations during the mining operation in consultation with Central Ground Water Authority/ State Ground Water Department. The Report on changes in Ground water level and quality shall be submitted on six-monthly basis to the Regional Office of the Ministry, CGWA and State Groundwater Department / State Pollution Control Board.
Water quality monitoring and preservation	
1.	The Project Proponent shall undertake regular monitoring of natural water course/ water resources/ springs and perennial nallahs existing/ flowing in and around the mine lease including upstream and downstream. Sufficient number of gullies shall be provided at appropriate places within the lease for management of water. The parameters to be monitored shall include their water quality vis-à-vis suitability for usage as per CPCB criteria and flow rate. It shall be ensured that no obstruction and/ or alteration be made to water bodies during mining operations without justification and prior approval of MoEFCC. The monitoring of water courses/ bodies existing in lease area shall be carried out four times in a year viz. pre- monsoon (April May), monsoon (August), post-monsoon (November) and winter (January) and the record of monitored data may be sent regularly to Ministry of

	Environment, Forest and Climate Change and its Regional Office, Central Ground Water Authority and Regional Director, Central Ground Water Board, State Pollution Control Board and Central Pollution Control Board. Clearly showing the trend analysis on six-monthly basis.
1.	In case, immediate mining scheme envisages intersection of ground water table, then Environmental Clearance shall become operational only after receiving formal clearance from CGWA. In case, mining operation involves intersection of ground water table at a later stage, then PP shall ensure that prior approval from CGWA and MoEFCC is in place before such mining operations. The permission for intersection of ground water table shall essentially be based on detailed hydro-geological study of the area.
Noise and vibration monitoring and prevention	
1.	The peak particle velocity at 500m distance or within the nearest habitation, whichever is closer shall be monitored periodically as per applicable DGMS guidelines.
Noise monitoring and prevention	
1.	Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six-monthly compliance report.
Noise and vibration monitoring and prevention	
1.	The Project Proponent shall take measures for control of noise levels below 85 dBA in the work environment. The workers engaged in operations of HEMM, etc. should be provided with ear plugs /muffs. All personnel including laborers working in dusty areas shall be provided with protective respiratory devices along with adequate training, awareness and information on safety and health aspects. The PP shall be held responsible in case it has been found that workers/ personals/ laborers are working without personal protective equipment.
Mining plan	
1.	The Project Proponent shall adhere to approved mining plan, inter alia, including, total excavation (quantum of mineral, waste, over burden, inter burden and top soil etc.); mining technology; lease area; scope of working (method of mining, overburden & dump management, O.B& dump mining, mineral transportation mode, ultimate depth of mining, concurrent reclamation and reclamation at mine closure; land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life; etc.).
Mining plan	
1.	The land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life shall be governed as per the approved Mining Plan. The excavation vis-à-vis backfilling in the mine lease area and corresponding afforestation to be raised in the reclaimed area shall be governed as per approved mining plan. PP shall ensure the monitoring and management of rehabilitated areas until the vegetation becomes self-sustaining. The compliance status shall be submitted half-yearly to the MoEFCC and its concerned Regional Office.
Waste management	
1.	The waste oil, grease and other hazardous waste shall be disposed of as per the Hazardous & Other waste (Management & Transboundary Movement) Rules, 2016.
1.	Kitchen waste shall be composted or converted to biogas for further use.(to be decided on case to case basis depending on type and size of plant)
Land reclamation	
1.	Check dams of appropriate size, gradient and length shall be constructed around mine pit and OB dumps to prevent storm run-off and sediment flow into adjoining water bodies. A safety margin of 50% shall be kept for designing of sump structures over and above peak rainfall (based on 50 years data) and maximum discharge in the

	mine and its adjoining area which shall also help in providing adequate retention time period thereby allowing proper settling of sediments/ silt material. The sedimentation pits/ sumps shall be constructed at the corners of the garland drains.
Land reclamation	
1.	The slope of dumps shall be vegetated in scientific manner with suitable native species to maintain the slope stability, prevent erosion and surface run off. The selection of local species regulates local climatic parameters and help in adaptation of plant species to the microclimate. The gullies formed on slopes should be adequately taken care of as it impacts the overall stability of dumps. The dump mass should be consolidated with the help of dozer/ compactors thereby ensuring proper filling/ leveling of dump mass. In critical areas, use of geo textiles/ geo-membranes / clay liners / Bentonite etc. shall be undertaken for stabilization of the dump.
1.	The Overburden (O.B.), waste and topsoil generated during the mining operations shall be stacked at earmarked OB dump site(s) only and it should not be kept active for a long period of time. The physical parameters of the OB / waste dumps / topsoil dump like height, width and angle of slope shall be governed as per the approved Mining Plan and the guidelines/circulars issued by D.G.M.S. The topsoil shall be used for land reclamation and plantation.
Green Belt and EMP	
1.	The project proponent shall prepare GHG emissions inventory for the plant and shall submit the programme for reduction of the same including carbon sequestration including plantation.
Transportation	
1.	No Transportation of the minerals shall be allowed in case of roads passing through villages/ habitations. In such cases, PP shall construct a ‘bypass’ road for the purpose of transportation of the minerals leaving an adequate gap (say at least 200 meters) so that the adverse impact of sound and dust along with chances of accidents could be mitigated. All costs resulting from widening and strengthening of existing public road network shall be borne by the PP in consultation with nodal State Govt. Department. Transportation of minerals through road movement in case of existing village/ rural roads shall be allowed in consultation with nodal State Govt. Department only after required strengthening such that the carrying capacity of roads is increased to handle the traffic load. The pollution due to transportation load on the environment will be effectively controlled and water sprinkling will also be done regularly. Vehicular emissions shall be kept under control and regularly monitored. Project should obtain Pollution Under Control (PUC) certificate for all the vehicles from authorized pollution testing centers. [If applicable in case of road transport].
Public hearing and Human health issues	
1.	The project proponent shall carry out heat stress analysis for the workmen who work in high temperature work zone and provide Personal Protection Equipment (PPE) as per the norms of Factory Act.
1.	Occupational health surveillance of the workers shall be done on a regular basis and records maintained as per the Factories Act.
Public hearing and Human health issues	
1.	Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, creche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.
Green Belt	
1.	The Project Proponent shall develop greenbelt in 7.5m wide safety zone all along the mine lease boundary as per the guidelines of CPCB in order to arrest pollution emanating from mining operations within the lease. The whole Green belt shall be developed within first 5 years starting from windward side of the active mining area. The development of greenbelt shall be governed as per the EC granted by the Ministry irrespective of the stipulation

	made in approved mine plan.
Corporate Environment Responsibility	
1.	Self-environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Corporate Environment Responsibility	
1.	All the recommendations made in the Charter on Corporate Responsibility for Environment Protection (CREP) for the Mineral Beneficiation plants shall be implemented.
Corporate Environment Responsibility	
1.	Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the Six Monthly Compliance Report.
Miscellaneous	
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	The Project Authorities should inform to the Regional Office regarding date of financial closures and final approval of the project by the concerned authorities and the date of start of land development work.
1.	Concealing factual data failure to comply with any or submission of false/ fabricated data and of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act, 1986.
1.	The Ministry or any other competent authority may alter/modify the above conditions or stipulate any further condition in the interest of environment protection.
Miscellaneous	
1.	The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.
1.	The project proponent shall monitor the criteria pollutants level namely; PM10, S02, NOx (ambient levels as well as stack emissions) or critical sectoral parameters, indicated for the projects and display the same at a convenient location for disclosure to the public and put on the website of the company.
Miscellaneous	
1.	The project proponent shall abide by all the commitments and recommendations made in the EIA/EMP report, commitment made during Public Hearing and also that during their presentation to the Expert Appraisal Committee.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	44) The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.

1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The Project Proponent shall prepare digital map (land use & land cover) of the entire lease area once in five years purpose of monitoring land use pattern and submit a report to concerned Regional Office of the MoEF&CC.
1.	The concerned Regional Office of the MoEF&CC shall randomly monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the MoEF&CC officer(s) by furnishing the requisite data / information / monitoring reports.
1.	In pursuant to Ministrys O.M No 22-34/2018-IA.III dated 16.01.2020 to comply with the direction made by Honble Supreme Court on 8.01.2020 in W.P. (Civil) No 114/2014 in the matter Common Cause vs Union of India, the mining lease holder shall after ceasing mining operations, undertake regrassing the mining area and any other area which may have been disturbed due to other mining activities and restore the land to a condition which is fit for growth of fodder, flora, fauna etc.

3.25. Agenda Item No 25:

3.25.1. Details of the proposal

JOYMAGAON VILLAGE PATTA LAND ORDINARY EARTH MINING PERMIT AREA by **RANENDRA N ATH BRAHMA** located at **KOKRAJHAR,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/519843/2025	SEAC/SEIAA.4057/2025	21/03/2025	Mining of minerals (1(a))

3.25.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :05/04/2025

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. Due deliberations and discussions are held.

The Committee is of the opinion to urge the DFO for taking requisite steps to complete the preparation of the final District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF& CC in 2016 and 2020 {SSMMG'2016 and EMGSM'2020} and place the same for evaluation and appraisal by the SEAC and further approval by the competent authority.

It is pertinent to mention that the *pre appraisal* of the draft DSR for the district has already been done by the SEAC and communicated with its observations for necessary corrections and compliance of the guidelines as stipulated.

It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the development of infrastructure in progress in the whole state which is a *sine qua non* for overall development and economic growth of the state while the impact on environment also require due diligence and consideration with proper safeguards.

It is further appreciated that the important stakeholders like the Registered Qualified Person (RQP), Geologist from the Department of Geology and Mining, the Forest official, the official from the Water Resource Department are actively involved in the process for recommending mining in the area by way of consultation including site inspection before appraisal by the SEAC.

The Committee deem it appropriate to recommend the grant of the EC by the SEIAA allowing extraction of minor mineral for 1(one) year, as recommended in the mining plan, with the quantity measuring 13,400 Cu M ofOrdinaryEarth with an observation that the DFO, Kachugaon Divisionshall submit the approved DSR from the competent authority for further consideration of the balance quantity for the project allowing mining by the Proponent within a period of 3 (three) months and to ensure that the area in question is accordingly reflected in the final DSR.

This is necessitated in view of the process of development works being undertaken by the filling work of project 220 KV AGOMONI GIS located at 132 KV GSS, AGECL,Gossaigaon a Govt of Assam Undertaking as has been communicated by the concerned competent authority.

Decision: Recommended for grant of EC for 6 (six) months only measuring 13,400 Cu M of Ordinary Earth.

3.25.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 2.90Ha with a quantity of 6,500Cu M of Ordinary Clay for 6 (six) months subjected to the terms and conditions laid down by SEAC and that the area in question is to be reflected in the approved final DSR.

3.25.4. Recommendation of SEIAA

Approved

3.25.5. Details of Environment Conditions

3.25.5.1. Specific

General condition by SEAC	
1.	This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates and

	(b) the Proponent shall extract the approved quantity of mineral indicated herein with maximum mining depth of up to 1 (one) meter only from the non-mined surface area.
2.	The quantities of minor mineral allowed for extraction in terms of the approved Mining Plan shall not be exceeded by the Proponent.
3.	The Orders of the Hon'ble Apex Court, the NGT (Eastern Bench), Kolkata; the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF& CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} shall be followed by the Proponent.
4.	This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan and the approved DSR for the district.
Specific condition by SEAC	
1.	The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period.
2.	The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan before allowing mining as bounden on the Proponent.
3.	CER activities shall be carried out / undertaken by the Proponent and a minimum estimated amount of the total project cost Rs 60,000.00 (Sixty thousand) only, shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the nearby village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 3 (three) months of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report (HCR) as mandated to be uploaded by the project Proponent in terms of the OM No IA3-22/1/2022-IA.III Dated 14.06.2024 in pursuance of the EIA Notification 2006.
4.	Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands adjoining the mining area involving local NGOs, School / College students.
5.	Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students.
6.	The DFO shall get the same executed / implemented within 3 (three) months of allowing mining in the area and shall upload the reports in PARIVESH 2.0 portal which shall form part of the Half Yearly Compliance Report (HCR) as mandated to be uploaded by the project Proponent in terms of the OM No IA3-22/1/2022-IA.III Dated 14.06.2024 in pursuance of the EIA Notification 2006.
7.	The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Amlokhi (*Phyllanthus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*), Bael (*Aegle marmelos*), Jamun (*Syzygiumcuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpus integrifolia*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*) etc etc.

8.	Half Yearly Compliance Reports (HCR) are mandatory on the part of project Proponent which need to be uploaded on or before 1st June and 1st December of the calendar year in PARIVESH 2.0 portal and no activity shall be permitted by the DFO without HCR.

3.25.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State Pollution Control Board/ Committee.
1.	This Environmental Clearance (EC) is subject to orders/ judgment of Honble Supreme Court of India, Honble High Court, Honble NGT and any other Court of Law, Common Cause Conditions as may be applicable.
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
Statutory compliance	
1.	State Pollution Control Board/Committee shall be responsible for display of this EC letter at its Regional office, District Industries Centre and Collector's office/ Tehsildar's Office for 30 days.
1.	The Project proponent complies with all the statutory requirements and judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India &Ors before commencing the mining operations.
1.	The Project Proponent shall follow the mitigation measures provided in MoEFCC's Office Memorandum No. Z-11013/57/2014-IA.II (M), dated 29th October, 2014, titled "Impact of mining activities on Habitations-Issues related to the mining Projects wherein Habitations and villages are the part of mine lease areas or Habitations and villages are surrounded by the mine lease area."
1.	The Project Proponent shall inform the MoEF&CC for any change in ownership of the mining lease. In case there is any change in ownership or mining lease is transferred. PP needs to apply for transfer of EC as per provisions of the para 11 of EIA Notification, 2006 as amended from time to time.
1.	A copy of EC letter will be marked to concerned Panchayat / local NGO etc. if any, from whom suggestion / representation has been received while processing the proposal.
1.	The State Government concerned shall ensure that mining operation shall not be commenced till the entire compensation levied, if any, for illegal mining paid by the Project Proponent through their respective Department of Mining & Geology in strict compliance of Judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India & Ors.
Air quality monitoring and preservation	
1.	Design the ventilation system for adequate air changes as per ACGIH document for all tunnels, motor houses, Oil Cellars.
1.	The project proponent shall submit monthly summary report of continuous stack emission and air quality monitoring and results of manual stack monitoring and manual monitoring of air quality /fugitive emissions to

	Regional Office of MoEF&CC, Zonal office of CPCB and Regional Office of SPCB along with six-monthly monitoring report.
1.	The project proponent use leak proof trucks/dumpers carrying ore and other raw materials and cover them with tarpaulin.
Air quality monitoring and preservation	
1.	Appropriate Air Pollution Control (APC) system shall be provided for all the dust generating points including fugitive dust from all vulnerable sources, so as to comply prescribed stack emission and fugitive emission standards.
Air quality monitoring and preservation	
1.	Effective safeguard measures for prevention of dust generation and subsequent suppression (like regular water sprinkling, metalled road construction etc.) shall be carried out in areas prone to air pollution wherein high levels of PM10 and PM2.5 are evident such as haul road, loading and unloading point and transfer points. The Fugitive dust emissions from all sources shall be regularly controlled by installation of required equipments/ machineries and preventive maintenance. Use of suitable water-soluble chemical dust suppressing agents may be explored for better effectiveness of dust control system. It shall be ensured that air pollution level conform to the standards prescribed by the MoEFCC/ Central Pollution Control Board.
Water quality monitoring and preservation	
1.	Project Proponent shall regularly monitor and maintain records w.r.t. ground water level and quality in and around the mine lease by establishing a network of existing wells as well as new piezo-meter installations during the mining operation in consultation with Central Ground Water Authority/ State Ground Water Department. The Report on changes in Ground water level and quality shall be submitted on six-monthly basis to the Regional Office of the Ministry, CGWA and State Groundwater Department / State Pollution Control Board.
Water quality monitoring and preservation	
1.	The Project Proponent shall undertake regular monitoring of natural water course/ water resources/ springs and perennial nallahs existing/ flowing in and around the mine lease including upstream and downstream. Sufficient number of gullies shall be provided at appropriate places within the lease for management of water. The parameters to be monitored shall include their water quality vis-à-vis suitability for usage as per CPCB criteria and flow rate. It shall be ensured that no obstruction and/ or alteration be made to water bodies during mining operations without justification and prior approval of MoEFCC. The monitoring of water courses/ bodies existing in lease area shall be carried out four times in a year viz. pre- monsoon (April May), monsoon (August), post-monsoon (November) and winter (January) and the record of monitored data may be sent regularly to Ministry of Environment, Forest and Climate Change and its Regional Office, Central Ground Water Authority and Regional Director, Central Ground Water Board, State Pollution Control Board and Central Pollution Control Board. Clearly showing the trend analysis on six-monthly basis.
1.	In case, immediate mining scheme envisages intersection of ground water table, then Environmental Clearance shall become operational only after receiving formal clearance from CGWA. In case, mining operation involves intersection of ground water table at a later stage, then PP shall ensure that prior approval from CGWA and MoEFCC is in place before such mining operations. The permission for intersection of ground water table shall essentially be based on detailed hydro-geological study of the area.
Noise and vibration monitoring and prevention	
1.	The peak particle velocity at 500m distance or within the nearest habitation, whichever is closer shall be monitored periodically as per applicable DGMS guidelines.
Noise and vibration monitoring and prevention	
1.	The Project Proponent shall take measures for control of noise levels below 85 dBA in the work environment. The

	workers engaged in operations of HEMM, etc. should be provided with ear plugs /muffs. All personnel including laborers working in dusty areas shall be provided with protective respiratory devices along with adequate training, awareness and information on safety and health aspects. The PP shall be held responsible in case it has been found that workers/ personals/ laborers are working without personal protective equipment.
Mining plan	
1.	The Project Proponent shall adhere to approved mining plan, inter alia, including, total excavation (quantum of mineral, waste, over burden, inter burden and top soil etc.); mining technology; lease area; scope of working (method of mining, overburden & dump management, O.B& dump mining, mineral transportation mode, ultimate depth of mining, concurrent reclamation and reclamation at mine closure; land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life; etc.).
Mining plan	
1.	The land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life shall be governed as per the approved Mining Plan. The excavation vis-à-vis backfilling in the mine lease area and corresponding afforestation to be raised in the reclaimed area shall be governed as per approved mining plan. PP shall ensure the monitoring and management of rehabilitated areas until the vegetation becomes self-sustaining. The compliance status shall be submitted half-yearly to the MoEFCC and its concerned Regional Office.
Land reclamation	
1.	Check dams of appropriate size, gradient and length shall be constructed around mine pit and OB dumps to prevent storm run-off and sediment flow into adjoining water bodies. A safety margin of 50% shall be kept for designing of sump structures over and above peak rainfall (based on 50 years data) and maximum discharge in the mine and its adjoining area which shall also help in providing adequate retention time period thereby allowing proper settling of sediments/ silt material. The sedimentation pits/ sumps shall be constructed at the corners of the garland drains.
Waste management	
1.	Kitchen waste shall be composted or converted to biogas for further use.(to be decided on case to case basis depending on type and size of plant)
1.	The waste oil, grease and other hazardous waste shall be disposed of as per the Hazardous & Other waste (Management & Transboundary Movement) Rules, 2016.
Land reclamation	
1.	The Overburden (O.B.), waste and topsoil generated during the mining operations shall be stacked at earmarked OB dump site(s) only and it should not be kept active for a long period of time. The physical parameters of the OB / waste dumps / topsoil dump like height, width and angle of slope shall be governed as per the approved Mining Plan and the guidelines/circulars issued by D.G.M.S. The topsoil shall be used for land reclamation and plantation.
1.	The slope of dumps shall be vegetated in scientific manner with suitable native species to maintain the slope stability, prevent erosion and surface run off. The selection of local species regulates local climatic parameters and help in adaptation of plant species to the microclimate. The gullies formed on slopes should be adequately taken care of as it impacts the overall stability of dumps. The dump mass should be consolidated with the help of dozer/ compactors thereby ensuring proper filling/ leveling of dump mass. In critical areas, use of geo textiles/ geo-membranes / clay liners / Bentonite etc. shall be undertaken for stabilization of the dump.
Green Belt and EMP	
1.	The project proponent shall prepare GHG emissions inventory for the plant and shall submit the programme for reduction of the same including carbon sequestration including plantation.

Transportation	
1.	No Transportation of the minerals shall be allowed in case of roads passing through villages/ habitations. In such cases, PP shall construct a 'bypass' road for the purpose of transportation of the minerals leaving an adequate gap (say at least 200 meters) so that the adverse impact of sound and dust along with chances of accidents could be mitigated. All costs resulting from widening and strengthening of existing public road network shall be borne by the PP in consultation with nodal State Govt. Department. Transportation of minerals through road movement in case of existing village/ rural roads shall be allowed in consultation with nodal State Govt. Department only after required strengthening such that the carrying capacity of roads is increased to handle the traffic load. The pollution due to transportation load on the environment will be effectively controlled and water sprinkling will also be done regularly. Vehicular emissions shall be kept under control and regularly monitored. Project should obtain Pollution Under Control (PUC) certificate for all the vehicles from authorized pollution testing centers. [If applicable in case of road transport].
Public hearing and Human health issues	
1.	Occupational health surveillance of the workers shall be done on a regular basis and records maintained as per the Factories Act.
1.	The project proponent shall carry out heat stress analysis for the workmen who work in high temperature work zone and provide Personal Protection Equipment (PPE) as per the norms of Factory Act.
Public hearing and Human health issues	
1.	Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, creche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.
Green Belt	
1.	The Project Proponent shall develop greenbelt in 7.5m wide safety zone all along the mine lease boundary as per the guidelines of CPCB in order to arrest pollution emanating from mining operations within the lease. The whole Green belt shall be developed within first 5 years starting from windward side of the active mining area. The development of greenbelt shall be governed as per the EC granted by the Ministry irrespective of the stipulation made in approved mine plan.
Corporate Environment Responsibility	
1.	Self-environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Corporate Environment Responsibility	
1.	All the recommendations made in the Charter on Corporate Responsibility for Environment Protection (CREP) for the Mineral Beneficiation plants shall be implemented.
Corporate Environment Responsibility	
1.	Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the Six Monthly Compliance Report.
1.	The Project Proponent shall submit the time- bound action plan to the concerned regional office of the Ministry within 6 months from the date of issuance of environmental clearance for undertaking the activities committed during public consultation by the project proponent and as discussed by the EAC, in terms of the provisions of the

	MoEF&CC Office Memorandum No.22-65/2017-IA.III dated 30 September, 2020. The action plan shall be implemented within three years of commencement of the project.
Miscellaneous	
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	The Ministry or any other competent authority may alter/modify the above conditions or stipulate any further condition in the interest of environment protection.
1.	The Project Authorities should inform to the Regional Office regarding date of financial closures and final approval of the project by the concerned authorities and the date of start of land development work.
1.	The above conditions will be enforced inter-alia, under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986 and the Public Liability Insurance Act, 1991 along with their amendments and rules made there under and also any other orders passed by the Hon'ble Supreme Court of India/High Court and any other Court of Law relating to the subject matter.
1.	Concealing factual data failure to comply with any or submission of false/ fabricated data and of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act, 1986.
Miscellaneous	
1.	The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.
1.	The project proponent shall monitor the criteria pollutants level namely; PM10, S02, NOx (ambient levels as well as stack emissions) or critical sectoral parameters, indicated for the projects and display the same at a convenient location for disclosure to the public and put on the website of the company.
1.	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponents website permanently.
1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
Miscellaneous	
1.	The project proponent shall abide by all the commitments and recommendations made in the EIA/EMP report, commitment made during Public Hearing and also that during their presentation to the Expert Appraisal Committee.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	44) The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of

	Environment, Forests and Climate Change (MoEF&CC).
1.	The Project Proponent shall prepare digital map (land use & land cover) of the entire lease area once in five years purpose of monitoring land use pattern and submit a report to concerned Regional Office of the MoEF&CC.
1.	The concerned Regional Office of the MoEF&CC shall randomly monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the MoEF&CC officer(s) by furnishing the requisite data / information / monitoring reports.
1.	Any appeal against this environmental clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.
1.	In pursuant to Ministrys O.M No 22-34/2018-IA.III dated 16.01.2020 to comply with the direction made by Honble Supreme Court on 8.01.2020 in W.P. (Civil) No 114/2014 in the matter Common Cause vs Union of India, the mining lease holder shall after ceasing mining operations, undertake regrassing the mining area and any other area which may have been disturbed due to other mining activities and restore the land to a condition which is fit for growth of fodder, flora, fauna etc.

3.26. Agenda Item No 26:

3.26.1. Details of the proposal

MIRAKUCHI VILLAGE ORDINARY EARTH MINING PERMIT AREA by **satyabrat rongpi** located at **KAM RUP METRO,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/520013/2025	SEAC/SEIAA.4060/2025	26/03/2025	Mining of minerals (1(a))

3.26.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :05/04/2025

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. Due deliberations and discussions are held.

The Committee had urged the DFO for taking requisite steps to complete the preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF& CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} and place the same for appraisal and final approval by the competent authority.

It is pertinent to mention that *Evaluation* and *Appraisal* of the final DSR for the district has already been done by the SEAC & the SEIAA, Assam has already approved the recommended DSR.

The Committee deem it appropriate to recommend the grant of EC by the SEIAA allowing extraction of minor mineral for 1(one) year with the quantity of mineral measuring 6,930Cu Mof ordinary earthwith an observation that the DFO, Kamrup East Division shall ask the Proponent to furnish the NOC from the District Commissioner Kamrup (M) before allowing mining in the area.

Decision: Recommended for grant of EC for 1 (one) year only for 6,930 Cu M of ordinary earth mineral.

3.26.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 0.38Ha with a quantity of 3,465Cu M of Ordinary Earth for 1 (one) year subjected to the terms and conditions laid down by SEAC and that the area in question is to be reflected in the approved final DSR.

3.26.4. Recommendation of SEIAA

Approved

3.26.5. Details of Environment Conditions

3.26.5.1. Specific

General condition by SEAC	
1.	This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates and (b) the Proponent shall extract the approved quantity of mineral indicated herein with maximum mining depth of up to 2 (two) meters only from the non-mined surface area.
2.	The quantities of minor mineral allowed for extraction in terms of the approved Mining Plan shall not be exceeded by the Proponent.
3.	In terms of the Order no-E138008/2 dated 05.02.2025 by the District Magistrate, Kamrup (M), the project Proponent shall obtain the NOC from the DC and to submit to the DFO for mining in the area.
4.	This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan and the approved DSR for the district.
Specific condition by SEAC	
1.	The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period.
2.	The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan prior to allowing mining.
3.	CER activities shall be carried out / undertaken by the Proponent with the estimated cost Rs 20,000.00 (Twenty thousand) only shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the nearby village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 3 (three) months of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report (HCR) as mandated to be uploaded by the project Proponent in terms of the OM No IA3-22/1/2022-IA.III Dated 14.06.2024 in pursuance of the EIA Notification 2006.

4.	Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands adjoining the mining area involving local NGOs, School / College students and an amount of Rs 20,000 (Twenty thousand) only, shall be earmarked for the purposes.
5.	Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. The DFO shall get the same executed / implemented within 3 (three) months of allowing mining in the area and shall upload the reports in PARIVESH 2.0 portal which shall form part of the Half Yearly Compliance Report (HCR) as mandated to be uploaded by the project Proponent in terms of the OM No IA3-22/1/2022-IA.III Dated 14.06.2024 in pursuance of the EIA Notification 2006.
6.	The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Amlokhi (*Phyllanthus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*),Bael (*Aegle marmelos*), Jamun (*Syzygiumcuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpus integrifolia*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*) etc etc.
7.	Half Yearly Compliance Reports (HCR) are mandatory on the part of project Proponent which need to be uploaded on or before 1st June and 1st December of the calendar year in PARIVESH 2.0 portal and no activity shall be permitted by the DFO without HCR.
8.	Methods of excavation:
9.	Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH 2.0 portal.

3.26.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State Pollution Control Board/ Committee.
1.	This Environmental Clearance (EC) is subject to orders/ judgment of Honble Supreme Court of India, Honble High Court, Honble NGT and any other Court of Law, Common Cause Conditions as may be applicable.
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
Statutory compliance	
1.	The State Government concerned shall ensure that mining operation shall not be commenced till the entire compensation levied, if any, for illegal mining paid by the Project Proponent through their respective Department of Mining & Geology in strict compliance of Judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India & Ors.
1.	A copy of EC letter will be marked to concerned Panchayat / local NGO etc. if any, from whom suggestion / representation has been received while processing the proposal.

1.	The Project proponent complies with all the statutory requirements and judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India &Ors before commencing the mining operations.
1.	State Pollution Control Board/Committee shall be responsible for display of this EC letter at its Regional office, District Industries Centre and Collector's office/ Tehsildar's Office for 30 days.
1.	The Project Proponent shall inform the MoEF&CC for any change in ownership of the mining lease. In case there is any change in ownership or mining lease is transferred. PP needs to apply for transfer of EC as per provisions of the para 11 of EIA Notification, 2006 as amended from time to time.
1.	The Project Proponent shall follow the mitigation measures provided in MoEFCC's Office Memorandum No. Z-11013/57/2014-IA.II (M), dated 29th October, 2014, titled "Impact of mining activities on Habitations-Issues related to the mining Projects wherein Habitations and villages are the part of mine lease areas or Habitations and villages are surrounded by the mine lease area."
Air quality monitoring and preservation	
1.	The project proponent shall submit monthly summary report of continuous stack emission and air quality monitoring and results of manual stack monitoring and manual monitoring of air quality /fugitive emissions to Regional Office of MoEF&CC, Zonal office of CPCB and Regional Office of SPCB along with six-monthly monitoring report.
1.	The project proponent use leak proof trucks/dumpers carrying ore and other raw materials and cover them with tarpaulin.
1.	Design the ventilation system for adequate air changes as per ACGIH document for all tunnels, motor houses, Oil Cellars.
Air quality monitoring and preservation	
1.	Appropriate Air Pollution Control (APC) system shall be provided for all the dust generating points including fugitive dust from all vulnerable sources, so as to comply prescribed stack emission and fugitive emission standards.
Air quality monitoring and preservation	
1.	Effective safeguard measures for prevention of dust generation and subsequent suppression (like regular water sprinkling, metalled road construction etc.) shall be carried out in areas prone to air pollution wherein high levels of PM10 and PM2.5 are evident such as haul road, loading and unloading point and transfer points. The Fugitive dust emissions from all sources shall be regularly controlled by installation of required equipments/ machineries and preventive maintenance. Use of suitable water-soluble chemical dust suppressing agents may be explored for better effectiveness of dust control system. It shall be ensured that air pollution level conform to the standards prescribed by the MoEFCC/ Central Pollution Control Board.
Water quality monitoring and preservation	
1.	Project Proponent shall regularly monitor and maintain records w.r.t. ground water level and quality in and around the mine lease by establishing a network of existing wells as well as new piezo-meter installations during the mining operation in consultation with Central Ground Water Authority/ State Ground Water Department. The Report on changes in Ground water level and quality shall be submitted on six-monthly basis to the Regional Office of the Ministry, CGWA and State Groundwater Department / State Pollution Control Board.
Water quality monitoring and preservation	
1.	The Project Proponent shall undertake regular monitoring of natural water course/ water resources/ springs and perennial nallahs existing/ flowing in and around the mine lease including upstream and downstream. Sufficient

	number of gullies shall be provided at appropriate places within the lease for management of water. The parameters to be monitored shall include their water quality vis-à-vis suitability for usage as per CPCB criteria and flow rate. It shall be ensured that no obstruction and/ or alteration be made to water bodies during mining operations without justification and prior approval of MoEFCC. The monitoring of water courses/ bodies existing in lease area shall be carried out four times in a year viz. pre- monsoon (April May), monsoon (August), post-monsoon (November) and winter (January) and the record of monitored data may be sent regularly to Ministry of Environment, Forest and Climate Change and its Regional Office, Central Ground Water Authority and Regional Director, Central Ground Water Board, State Pollution Control Board and Central Pollution Control Board. Clearly showing the trend analysis on six-monthly basis.
1.	In case, immediate mining scheme envisages intersection of ground water table, then Environmental Clearance shall become operational only after receiving formal clearance from CGWA. In case, mining operation involves intersection of ground water table at a later stage, then PP shall ensure that prior approval from CGWA and MoEFCC is in place before such mining operations. The permission for intersection of ground water table shall essentially be based on detailed hydro-geological study of the area.
Noise and vibration monitoring and prevention	
1.	The peak particle velocity at 500m distance or within the nearest habitation, whichever is closer shall be monitored periodically as per applicable DGMS guidelines.
Noise monitoring and prevention	
1.	Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six-monthly compliance report.
Noise and vibration monitoring and prevention	
1.	The Project Proponent shall take measures for control of noise levels below 85 dBA in the work environment. The workers engaged in operations of HEMM, etc. should be provided with ear plugs /muffs. All personnel including laborers working in dusty areas shall be provided with protective respiratory devices along with adequate training, awareness and information on safety and health aspects. The PP shall be held responsible in case it has been found that workers/ personals/ laborers are working without personal protective equipment.
Mining plan	
1.	The Project Proponent shall adhere to approved mining plan, inter alia, including, total excavation (quantum of mineral, waste, over burden, inter burden and top soil etc.); mining technology; lease area; scope of working (method of mining, overburden & dump management, O.B& dump mining, mineral transportation mode, ultimate depth of mining, concurrent reclamation and reclamation at mine closure; land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life; etc.).
Mining plan	
1.	The land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life shall be governed as per the approved Mining Plan. The excavation vis-à-vis backfilling in the mine lease area and corresponding afforestation to be raised in the reclaimed area shall be governed as per approved mining plan. PP shall ensure the monitoring and management of rehabilitated areas until the vegetation becomes self-sustaining. The compliance status shall be submitted half-yearly to the MoEFCC and its concerned Regional Office.
Waste management	
1.	Kitchen waste shall be composted or converted to biogas for further use.(to be decided on case to case basis depending on type and size of plant)
1.	The waste oil, grease and other hazardous waste shall be disposed of as per the Hazardous & Other waste (Management & Transboundary Movement) Rules, 2016.

Land reclamation	
1.	Check dams of appropriate size, gradient and length shall be constructed around mine pit and OB dumps to prevent storm run-off and sediment flow into adjoining water bodies. A safety margin of 50% shall be kept for designing of sump structures over and above peak rainfall (based on 50 years data) and maximum discharge in the mine and its adjoining area which shall also help in providing adequate retention time period thereby allowing proper settling of sediments/ silt material. The sedimentation pits/ sumps shall be constructed at the corners of the garland drains.
Land reclamation	
1.	The slope of dumps shall be vegetated in scientific manner with suitable native species to maintain the slope stability, prevent erosion and surface run off. The selection of local species regulates local climatic parameters and help in adaptation of plant species to the microclimate. The gullies formed on slopes should be adequately taken care of as it impacts the overall stability of dumps. The dump mass should be consolidated with the help of dozer/ compactors thereby ensuring proper filling/ leveling of dump mass. In critical areas, use of geo textiles/ geo-membranes / clay liners / Bentonite etc. shall be undertaken for stabilization of the dump.
1.	The Overburden (O.B.), waste and topsoil generated during the mining operations shall be stacked at earmarked OB dump site(s) only and it should not be kept active for a long period of time. The physical parameters of the OB / waste dumps / topsoil dump like height, width and angle of slope shall be governed as per the approved Mining Plan and the guidelines/circulars issued by D.G.M.S. The topsoil shall be used for land reclamation and plantation.
Green Belt and EMP	
1.	The project proponent shall prepare GHG emissions inventory for the plant and shall submit the programme for reduction of the same including carbon sequestration including plantation.
Transportation	
1.	No Transportation of the minerals shall be allowed in case of roads passing through villages/ habitations. In such cases, PP shall construct a ‘bypass’ road for the purpose of transportation of the minerals leaving an adequate gap (say at least 200 meters) so that the adverse impact of sound and dust along with chances of accidents could be mitigated. All costs resulting from widening and strengthening of existing public road network shall be borne by the PP in consultation with nodal State Govt. Department. Transportation of minerals through road movement in case of existing village/ rural roads shall be allowed in consultation with nodal State Govt. Department only after required strengthening such that the carrying capacity of roads is increased to handle the traffic load. The pollution due to transportation load on the environment will be effectively controlled and water sprinkling will also be done regularly. Vehicular emissions shall be kept under control and regularly monitored. Project should obtain Pollution Under Control (PUC) certificate for all the vehicles from authorized pollution testing centers. [If applicable in case of road transport].
Public hearing and Human health issues	
1.	Occupational health surveillance of the workers shall be done on a regular basis and records maintained as per the Factories Act.
1.	The project proponent shall carry out heat stress analysis for the workmen who work in high temperature work zone and provide Personal Protection Equipment (PPE) as per the norms of Factory Act.
Public hearing and Human health issues	
1.	Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, creche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.
Green Belt	

1.	The Project Proponent shall develop greenbelt in 7.5m wide safety zone all along the mine lease boundary as per the guidelines of CPCB in order to arrest pollution emanating from mining operations within the lease. The whole Green belt shall be developed within first 5 years starting from windward side of the active mining area. The development of greenbelt shall be governed as per the EC granted by the Ministry irrespective of the stipulation made in approved mine plan.
Corporate Environment Responsibility	
1.	Self-environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Corporate Environment Responsibility	
1.	All the recommendations made in the Charter on Corporate Responsibility for Environment Protection (CREP) for the Mineral Beneficiation plants shall be implemented.
Corporate Environment Responsibility	
1.	The Project Proponent shall submit the time- bound action plan to the concerned regional office of the Ministry within 6 months from the date of issuance of environmental clearance for undertaking the activities committed during public consultation by the project proponent and as discussed by the EAC, in terms of the provisions of the MoEF&CC Office Memorandum No.22-65/2017-IA.III dated 30 September, 2020. The action plan shall be implemented within three years of commencement of the project.
1.	Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the Six Monthly Compliance Report.
Miscellaneous	
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	The Ministry or any other competent authority may alter/modify the above conditions or stipulate any further condition in the interest of environment protection.
1.	Concealing factual data failure to comply with any or submission of false/ fabricated data and of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act, 1986.
1.	The Project Authorities should inform to the Regional Office regarding date of financial closures and final approval of the project by the concerned authorities and the date of start of land development work.
1.	The above conditions will be enforced inter-alia, under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986 and the Public Liability Insurance Act, 1991 along with their amendments and rules made there under and also any other orders passed by the Hon'ble Supreme Court of India/High Court and any other Court of Law relating to the subject matter.
Miscellaneous	
1.	The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.

1.	The project proponent shall monitor the criteria pollutants level namely; PM10, S02, NOx (ambient levels as well as stack emissions) or critical sectoral parameters, indicated for the projects and display the same at a convenient location for disclosure to the public and put on the website of the company.
Miscellaneous	
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	44) The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall abide by all the commitments and recommendations made in the EIA/EMP report, commitment made during Public Hearing and also that during their presentation to the Expert Appraisal Committee.
1.	The Project Proponent shall prepare digital map (land use & land cover) of the entire lease area once in five years purpose of monitoring land use pattern and submit a report to concerned Regional Office of the MoEF&CC.
1.	The concerned Regional Office of the MoEF&CC shall randomly monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the MoEF&CC officer(s) by furnishing the requisite data / information / monitoring reports.
1.	Any appeal against this environmental clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.
1.	In pursuant to Ministrys O.M No 22-34/2018-IA.III dated 16.01.2020 to comply with the direction made by Honble Supreme Court on 8.01.2020 in W.P. (Civil) No 114/2014 in the matter Common Cause vs Union of India, the mining lease holder shall after ceasing mining operations, undertake regrassing the mining area and any other area which may have been disturbed due to other mining activities and restore the land to a condition which is fit for growth of fodder, flora, fauna etc.

3.27. Agenda Item No 27:

3.27.1. Details of the proposal

Gobardhana Village Patta Land Sand, Sand Gravel and Stone Mining Permit Area by **chinmay pathak** located at **BAKSA,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/517485/2025	SEAC/SEIAA.4068/2025	02/04/2025	Mining of minerals (1(a))

3.27.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :05/04/2025

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. Due deliberations and discussions are held.

The Committee urged the DFO for taking requisite steps to complete the preparation of the final District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF& CC in 2016 and 2020 {SSMMG'2016 and EMGSM'2020} and place the same for evaluation and appraisal by the SEAC and further approval by the competent authority.

It is pertinent to mention that the A*ppraisal* and *Evaluation* of the final DSR for the district has already been done by the SEAC and communicated with its observations for necessary corrections and compliance of the guidelines as stipulated for approval by the SEIAA.

The Committee deem it appropriate to recommend the grant of the EC by the SEIAA allowing extraction of minor mineral for 1(one) year, as recommended in the mining plan, with the quantity measuring @ 9,75 CuM of Sand @ 2,925 CuM of Sand Gravel and @ 4,880 Cu M of Stone with an observation that the DFO, Baksa Divisionshall submit the approved DSR from the competent authority for further consideration of the balance quantity for the project allowing mining by the Proponent within a period of 3 (three) months and to ensure that the area in question is accordingly reflected in the final DSR.

Decision: Recommended for grant of EC for 1 (one) year only measuring@ 9,75 CuM of Sand @ 2,925 CuM of Sand Gravel and @ 4,880 Cu M of Stone.

3.27.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 3.60Ha with a quantity of @975cum of Sand, @2,925cum of Sand Gravel and @4,880cum of Stone for 1 (one) year subjected to the terms and conditions laid down by SEAC and that the area in question is to be reflected in the approved final DSR.

3.27.4. Recommendation of SEIAA

Approved

3.27.5. Details of Environment Conditions

3.27.5.1. Specific

General conditions by SEAC	
1.	This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates recorded in the approved DSR; (b) the active bank of the river is not disturbed / damaged because of mining and transportation of mining materials; (c) the Proponent shall extract the approved quantity of minerals indicated herein with maximum mining depth of up to 1 (one) meter only from the non-mined surface.
2.	The quantities of minor mineral allowed for extraction, annually, in terms of the approved DSR shall not be exceeded by the Proponent.
3.	The Orders of the Hon'ble Apex Court, the NGT (Eastern Bench), Kolkata; the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF& CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} shall be followed by the Proponent.

4.	This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan and the approved DSR for the district.
Specific conditions by SEAC	
1.	Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF& CC for non manual extraction which need to be adhered to by the concerned DFO.
2.	The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period.
3.	The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan/DSR before allowing any mining.
4.	No mechanized machinery shall be allowed to be used for excavation of mineral from river bed and only on exceptional cases the DFO may permit use of JCB for loading and unloading of mineral in vehicles.
5.	CER activities shall be carried out / undertaken by the Proponent and minimum estimated cost of Rs 1.00 Lakh (one Lakh) only, shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the nearby village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st year of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report.
6.	Plantation activities shall be carried out / undertaken in any educational institution or Govt lands along the proposed mining area involving local NGOs, School / College students and an amount of Rs 2.00(two) Lakh shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with due consultation of the DFO and shall make effort to label the plant species for the benefits of the villagers, common people and specially the school/college students.
7.	The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Amlokhi (*Phyllanthus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saracaasoca*), Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*), Jamun (*Syzygiumcuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpus integrifolia*), Ow Tenga (*Dillenia indica*), Khair (*Acacia catechu*),Thekera (*Garcinia spp*) etc etc.
8.	Half Yearly Compliance Reports (HCR) are mandatory on the part of project Proponent which need to be uploaded on or before 1st June and 1st December of the calendar year in PARIVESH 2.0 portal and no activity shall be permitted by the DFO without HCR.
9.	Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.27.5.2. Standard

1(	**Mining of minerals**

a)	
Statutory compliance	
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State Pollution Control Board/ Committee.
1.	This Environmental Clearance (EC) is subject to orders/ judgment of Honble Supreme Court of India, Honble High Court, Honble NGT and any other Court of Law, Common Cause Conditions as may be applicable.
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
Statutory compliance	
1.	A copy of EC letter will be marked to concerned Panchayat / local NGO etc. if any, from whom suggestion / representation has been received while processing the proposal.
1.	The Project proponent complies with all the statutory requirements and judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India &Ors before commencing the mining operations.
1.	State Pollution Control Board/Committee shall be responsible for display of this EC letter at its Regional office, District Industries Centre and Collector's office/ Tehsildar's Office for 30 days.
1.	The Project Proponent shall inform the MoEF&CC for any change in ownership of the mining lease. In case there is any change in ownership or mining lease is transferred. PP needs to apply for transfer of EC as per provisions of the para 11 of EIA Notification, 2006 as amended from time to time.
1.	The Project Proponent shall follow the mitigation measures provided in MoEFCC's Office Memorandum No. Z-11013/57/2014-IA.II (M), dated 29th October, 2014, titled "Impact of mining activities on Habitations-Issues related to the mining Projects wherein Habitations and villages are the part of mine lease areas or Habitations and villages are surrounded by the mine lease area."
1.	The State Government concerned shall ensure that mining operation shall not be commenced till the entire compensation levied, if any, for illegal mining paid by the Project Proponent through their respective Department of Mining & Geology in strict compliance of Judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India & Ors.
Air quality monitoring and preservation	
1.	The project proponent shall submit monthly summary report of continuous stack emission and air quality monitoring and results of manual stack monitoring and manual monitoring of air quality /fugitive emissions to Regional Office of MoEF&CC, Zonal office of CPCB and Regional Office of SPCB along with six-monthly monitoring report.
1.	The project proponent use leak proof trucks/dumpers carrying ore and other raw materials and cover them with tarpaulin.
1.	Design the ventilation system for adequate air changes as per ACGIH document for all tunnels, motor houses, Oil Cellars.
Air quality monitoring and preservation	

1.	Appropriate Air Pollution Control (APC) system shall be provided for all the dust generating points including fugitive dust from all vulnerable sources, so as to comply prescribed stack emission and fugitive emission standards.
Air quality monitoring and preservation	
1.	Effective safeguard measures for prevention of dust generation and subsequent suppression (like regular water sprinkling, metalled road construction etc.) shall be carried out in areas prone to air pollution wherein high levels of PM10 and PM2.5 are evident such as haul road, loading and unloading point and transfer points. The Fugitive dust emissions from all sources shall be regularly controlled by installation of required equipments/ machineries and preventive maintenance. Use of suitable water-soluble chemical dust suppressing agents may be explored for better effectiveness of dust control system. It shall be ensured that air pollution level conform to the standards prescribed by the MoEFCC/ Central Pollution Control Board.
Water quality monitoring and preservation	
1.	Project Proponent shall regularly monitor and maintain records w.r.t. ground water level and quality in and around the mine lease by establishing a network of existing wells as well as new piezo-meter installations during the mining operation in consultation with Central Ground Water Authority/ State Ground Water Department. The Report on changes in Ground water level and quality shall be submitted on six-monthly basis to the Regional Office of the Ministry, CGWA and State Groundwater Department / State Pollution Control Board.
Water quality monitoring and preservation	
1.	The Project Proponent shall undertake regular monitoring of natural water course/ water resources/ springs and perennial nallahs existing/ flowing in and around the mine lease including upstream and downstream. Sufficient number of gullies shall be provided at appropriate places within the lease for management of water. The parameters to be monitored shall include their water quality vis-à-vis suitability for usage as per CPCB criteria and flow rate. It shall be ensured that no obstruction and/ or alteration be made to water bodies during mining operations without justification and prior approval of MoEFCC. The monitoring of water courses/ bodies existing in lease area shall be carried out four times in a year viz. pre- monsoon (April May), monsoon (August), post-monsoon (November) and winter (January) and the record of monitored data may be sent regularly to Ministry of Environment, Forest and Climate Change and its Regional Office, Central Ground Water Authority and Regional Director, Central Ground Water Board, State Pollution Control Board and Central Pollution Control Board. Clearly showing the trend analysis on six-monthly basis.
1.	In case, immediate mining scheme envisages intersection of ground water table, then Environmental Clearance shall become operational only after receiving formal clearance from CGWA. In case, mining operation involves intersection of ground water table at a later stage, then PP shall ensure that prior approval from CGWA and MoEFCC is in place before such mining operations. The permission for intersection of ground water table shall essentially be based on detailed hydro-geological study of the area.
Noise and vibration monitoring and prevention	
1.	The peak particle velocity at 500m distance or within the nearest habitation, whichever is closer shall be monitored periodically as per applicable DGMS guidelines.
Noise monitoring and prevention	
1.	Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six-monthly compliance report.
Noise and vibration monitoring and prevention	
1.	The Project Proponent shall take measures for control of noise levels below 85 dBA in the work environment. The workers engaged in operations of HEMM, etc. should be provided with ear plugs /muffs. All personnel including laborers working in dusty areas shall be provided with protective respiratory devices along with adequate training, awareness and information on safety and health aspects. The PP shall be held responsible in case it has been found

	that workers/ personals/ laborers are working without personal protective equipment.
Mining plan	
1.	The Project Proponent shall adhere to approved mining plan, inter alia, including, total excavation (quantum of mineral, waste, over burden, inter burden and top soil etc.); mining technology; lease area; scope of working (method of mining, overburden & dump management, O.B& dump mining, mineral transportation mode, ultimate depth of mining, concurrent reclamation and reclamation at mine closure; land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life; etc.).
Mining plan	
1.	The land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life shall be governed as per the approved Mining Plan. The excavation vis-à-vis backfilling in the mine lease area and corresponding afforestation to be raised in the reclaimed area shall be governed as per approved mining plan. PP shall ensure the monitoring and management of rehabilitated areas until the vegetation becomes self-sustaining. The compliance status shall be submitted half-yearly to the MoEFCC and its concerned Regional Office.
Waste management	
1.	Kitchen waste shall be composted or converted to biogas for further use.(to be decided on case to case basis depending on type and size of plant)
1.	The waste oil, grease and other hazardous waste shall be disposed of as per the Hazardous & Other waste (Management & Transboundary Movement) Rules, 2016.
Land reclamation	
1.	Check dams of appropriate size, gradient and length shall be constructed around mine pit and OB dumps to prevent storm run-off and sediment flow into adjoining water bodies. A safety margin of 50% shall be kept for designing of sump structures over and above peak rainfall (based on 50 years data) and maximum discharge in the mine and its adjoining area which shall also help in providing adequate retention time period thereby allowing proper settling of sediments/ silt material. The sedimentation pits/ sumps shall be constructed at the corners of the garland drains.
Land reclamation	
1.	The slope of dumps shall be vegetated in scientific manner with suitable native species to maintain the slope stability, prevent erosion and surface run off. The selection of local species regulates local climatic parameters and help in adaptation of plant species to the microclimate. The gullies formed on slopes should be adequately taken care of as it impacts the overall stability of dumps. The dump mass should be consolidated with the help of dozer/ compactors thereby ensuring proper filling/ leveling of dump mass. In critical areas, use of geo textiles/ geo-membranes / clay liners / Bentonite etc. shall be undertaken for stabilization of the dump.
1.	The Overburden (O.B.), waste and topsoil generated during the mining operations shall be stacked at earmarked OB dump site(s) only and it should not be kept active for a long period of time. The physical parameters of the OB / waste dumps / topsoil dump like height, width and angle of slope shall be governed as per the approved Mining Plan and the guidelines/circulars issued by D.G.M.S. The topsoil shall be used for land reclamation and plantation.
Green Belt and EMP	
1.	The project proponent shall prepare GHG emissions inventory for the plant and shall submit the programme for reduction of the same including carbon sequestration including plantation.
Transportation	

1.	No Transportation of the minerals shall be allowed in case of roads passing through villages/ habitations. In such cases, PP shall construct a 'bypass' road for the purpose of transportation of the minerals leaving an adequate gap (say at least 200 meters) so that the adverse impact of sound and dust along with chances of accidents could be mitigated. All costs resulting from widening and strengthening of existing public road network shall be borne by the PP in consultation with nodal State Govt. Department. Transportation of minerals through road movement in case of existing village/ rural roads shall be allowed in consultation with nodal State Govt. Department only after required strengthening such that the carrying capacity of roads is increased to handle the traffic load. The pollution due to transportation load on the environment will be effectively controlled and water sprinkling will also be done regularly. Vehicular emissions shall be kept under control and regularly monitored. Project should obtain Pollution Under Control (PUC) certificate for all the vehicles from authorized pollution testing centers. [If applicable in case of road transport].
Public hearing and Human health issues	
1.	The project proponent shall carry out heat stress analysis for the workmen who work in high temperature work zone and provide Personal Protection Equipment (PPE) as per the norms of Factory Act.
1.	Occupational health surveillance of the workers shall be done on a regular basis and records maintained as per the Factories Act.
Public hearing and Human health issues	
1.	Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, creche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.
Green Belt	
1.	The Project Proponent shall develop greenbelt in 7.5m wide safety zone all along the mine lease boundary as per the guidelines of CPCB in order to arrest pollution emanating from mining operations within the lease. The whole Green belt shall be developed within first 5 years starting from windward side of the active mining area. The development of greenbelt shall be governed as per the EC granted by the Ministry irrespective of the stipulation made in approved mine plan.
Corporate Environment Responsibility	
1.	Self-environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Corporate Environment Responsibility	
1.	All the recommendations made in the Charter on Corporate Responsibility for Environment Protection (CREP) for the Mineral Beneficiation plants shall be implemented.
Corporate Environment Responsibility	
1.	The Project Proponent shall submit the time- bound action plan to the concerned regional office of the Ministry within 6 months from the date of issuance of environmental clearance for undertaking the activities committed during public consultation by the project proponent and as discussed by the EAC, in terms of the provisions of the MoEF&CC Office Memorandum No.22-65/2017-IA.III dated 30 September, 2020. The action plan shall be implemented within three years of commencement of the project.
1.	Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the Six Monthly Compliance Report.

Miscellaneous	
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	Concealing factual data failure to comply with any or submission of false/ fabricated data and of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act, 1986.
1.	The Project Authorities should inform to the Regional Office regarding date of financial closures and final approval of the project by the concerned authorities and the date of start of land development work.
1.	The Ministry or any other competent authority may alter/modify the above conditions or stipulate any further condition in the interest of environment protection.
1.	The above conditions will be enforced inter-alia, under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986 and the Public Liability Insurance Act, 1991 along with their amendments and rules made there under and also any other orders passed by the Hon'ble Supreme Court of India/High Court and any other Court of Law relating to the subject matter.
Miscellaneous	
1.	The project proponent shall monitor the criteria pollutants level namely; PM10, S02, NOx (ambient levels as well as stack emissions) or critical sectoral parameters, indicated for the projects and display the same at a convenient location for disclosure to the public and put on the website of the company.
1.	The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.
Miscellaneous	
1.	44) The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall abide by all the commitments and recommendations made in the EIA/EMP report, commitment made during Public Hearing and also that during their presentation to the Expert Appraisal Committee.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	In pursuant to Ministrys O.M No 22-34/2018-IA.III dated 16.01.2020 to comply with the direction made by Honble Supreme Court on 8.01.2020 in W.P. (Civil) No 114/2014 in the matter Common Cause vs Union of India, the mining lease holder shall after ceasing mining operations, undertake regrassing the mining area and any other area which may have been disturbed due to other mining activities and restore the land to a condition which is fit for growth of fodder, flora, fauna etc.
1.	The concerned Regional Office of the MoEF&CC shall randomly monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the MoEF&CC officer(s) by furnishing the requisite data / information / monitoring reports.
1.	Any appeal against this environmental clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.
1.	The Project Proponent shall prepare digital map (land use & land cover) of the entire lease area once in five years

	purpose of monitoring land use pattern and submit a report to concerned Regional Office of the MoEF&CC.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.

3.28. Agenda Item No 28:

3.28.1. Details of the proposal

Grain Based Distillery (60 KLPD) and Captive Power Plant (2 MW) at Choygaon Industrial Growth Centre, Village 2 No. Jambari, Tehsil Choygaon, District Kamrup, Assam by M/s Brahmaputra Biochem Pvt. Ltd. by **BRAHMAPUTRA BIOCHEM PRIVATE LIMITED** located at **KAMRUP,ASSAM**			
Proposal For		Application for Corrigendum	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/IND2/535735/2025	SEAC/SEIAA.4006/2025	29/04/2025	Distilleries (5(g))

3.28.2. Deliberations by the committee in previous meetings

N/A

3.28.3. Deliberations by the SEIAA in current meetings

Corrigendum of EC is approved.

3.28.4. Recommendation of SEIAA

Approved

3.28.5. Details of Environment Conditions

3.28.5.1. Specific

Corrigendum is sought	
1.	Multicyclone followed by bag filters along with a stack of adequate height will be provided to 8 TPH agri-waste based boilers. Existing 25 TPH boiler will remain the same as it is.
2.	Multicyclone followed by bag filters along with a stack of adequate height shall be provided t o 8 TPH agri-waste based boiler to control particulate emissions within 50 mg/Nm 3 . Existing 25 TPH boiler will remain the same as it is.
3.	Use of Green Energy around the Project area as proposed installing Solar lights, LED bulbs.
4.	The EC letter dated 01/04/2025 mentioned Specific Conditions By SEAC. Sl. No. 1.4 is not applicable.
Specific Condition by SEIAA	

1.	All the other terms and conditions mentioned in the EC letter dated 01/04/2025 shall remains the same.

3.29. Agenda Item No 29:

3.29.1. Details of the proposal

Regularisation of existing manufacturing unit - SHREE TIMBER PRODUCTS PRIVATE LIMITED that produces timber based products of capacity 19830 MTPA and resin of 234 MTPA. by **SHREE TIMBER PRODUCTS PRIVATE LIMITED** located at **TINSUKIA,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/IND3/464515/2024	SEAC/SEIAA.3792/2024	04/06/2024	Synthetic organic chemicals industry (5(f))

3.29.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :09/07/2024

Deliberations of SEAC 1 :

All the papers connected to the proposal are placed before the Committee for due diligence and deliberation. The Proponent has also submitted that the unit is falling under Lakhipather Range of Digboi Forest Division and furnished the copy of **License No.B/G-38(a)/WBI/2024/1849-50 Dated 21.06.2024 valid from 1.01.2023 to 31.12.2027** granted by the Environment and Forest Department, GoA.

It is on record that in pursuance to the EIA Notification, 2006 and as envisaged under Clause 5(d) of the said Notification, 2006 dated 14th September, 2006 by the MoEF & CC in the Govt. of India a sub-committee of the SEAC, Assam was constituted comprising of the Hon'ble Members to conduct physical field inspection of a similarly situated project site for adequate appraisal of the project proposal.

The mandate of the sub-committee was to inspect the proposed site, assess the present status of operation of the plant and also to assess the existing environmental status, appraisal on the probable environmental impact that may generate on the natural environment in the surroundings.

The observation and comments / recommendations of the sub-committee who have assessed the environmental issues for the said Wood Based Industry covering the aspects of emission, effluent and Hazardous waste generation are placed for appraisal of the Committee.

a) The sub-committee observed that the manufacturing processes in a Plywood Factory use Resins, which are of two types in general, viz., Melamine Urea Resin and Phenol Formaldehyde Resin. Melamine, Phenol and Formaldehyde are the major raw materials for production of resins. The resins are produced by blending the raw materials in a batch process and a resin producing unit washes the reactor/vessels intermittently when type of resin production is changed.

b) Effluent is generated in the form of vessel washings. Further, effluent is also generated from spillage of glue or resins, which are applied on the surface of the ply boards. Member Secretary, SEAC heading the sub-committee pointed out that **a resin producing unit can recycle the entire quantity of such effluent** in the next batch of resin production by proper collection of effluent and subsequent recycling.

c) It was also observed that the effluent generated from the glue application section was released into the storm drain. Further, during the course of visit to the resin plant located outside the main factory shed, it came to light that effluent generated was released into the storm drain. The team also observed that a small ETP was installed by the PP at the end of the storm drain and the visiting team was of the opinion that such a small ETP would not function properly in case effluent get mixed with rain water and suggested for a bigger STP in place.

d) The inspection team strongly felt that a Plywood Industry should invariably install Rain Water Harvesting (RWH) system, which shall function as a sedimentation tank for the rain water mixed with saw dust and other solid particles. The unit should use the harvested rain water in dust suppression measures like water sprinklings in haul roads. After proper sedimentation of the rain water in the RWH tank, which may be even in the form of earthen pond, the water may be allowed to discharge to nearby drains as available.

Entire effluent generated in such a plant shall be fully recycled as the effluent generated in a resin unit contain phenolic substances and formaldehyde (carciogenic) and these contaminants are potential contaminants to the environment, especially the soil and water environment.

*There are examples of complete recycling of effluent in such a resin producing or using industry and such environmental best practices which need to be replicated by all other similarly placed industries in the State***.**

e) Since primarily, the Plywood Industries operate boiler to generate steam, the **saw dusts** and **wood rejects** generated in the plant as wastes, are used as boiler fuel in such a plywood industry. The Committee opined that if **biomass briquettes**, which can be converted from the saw dust and other wood rejects, are used effectively as fuel in the boiler instead of saw dust, emission generated from the boiler would contain lesser dust and as such the emission would be reduced. Emissions as released by the instant Unit as of now contain semi charred carbon.

f) Empty chemical drums are generated as hazardous waste in the premises of the **Shree Timber Products Private Limited.** It is required to have proper quantification and subsequent stacking of this type of hazardous waste.

Decision:

After due deliberation the august ***Committee is of the opinion for recommending grant of the EC*** to the project Proponent subject to the to strict adhere and compliance of the special conditions as best environmental practices while according EC to a Plywood Manufacturing Units.

Date of SEIAA 2 :19/09/2024
Deliberations of SEIAA 2 :
The committee suggest for site visit.

Date of SEIAA 3 :N/A
Deliberations of SEIAA 3 :
ADS required-

1. Installation of an ETP with adequate facility for handling peak load in consultation with PCBA with a permanent weather protection shed for the ETP.
2. Storage tanks and pipe lines for 100% recycling of treated effluent.

3.29.3. Deliberations by the SEIAA in current meetings

EC is approved for Shree industries Private Limited is a Plywood Manufacturing Industry that produces timber based products of 13350 MTPA and resins of capacity 234 MTPA and as such it needs prior Environmental Clearance (EC) for setting up of such an industry. As per the order of the MoEF & CC in the GoI contained in F.No. 22-93/2017-IA.III dated 10.04.2019 a resin producing unit of less than 1000 MTPA needs to obtain prior EC under the B-2 Category.

3.29.4. Recommendation of SEIAA

Approved

3.29.5. Details of Environment Conditions

3.29.5.1. Specific

SPECIAL CONDITIONS BY SEAC	
1.	The Unit shall manage the effluent generated in a resin plant in a closed loop without passing the effluent to a storm drain.
2.	The Unit shall have agreement with bio mass briquette producing unit. Saw dust generated by the unit shall be converted into briquette and then be used in the boiler as fuel. This would reduce the emission generation to a significant level.
3.	Storm water drain shall be segregated from the effluent drain.
4.	Rain Water Harvesting system shall be made. A pond shall be constructed within the premises and storm water drain shall be connected to it. The earthen pond shall function as Rain Water Harvesting tank as well as Sedimentation pit.
5.	The HW generated, viz., empty containers of chemicals and resin residues, shall be inventoried and stacked properly for subsequent disposal to TSDFs.
6.	The License from the competent authority in the Forest Department as applicable for the establishment of the Wood Based Industry in terms of the applicable Rules shall be obtained and the copy of the same shall have to be uploaded.
7.	The Committee further made it a point that the premises of the Manufacturing Unit needs to be planted with local species of plants for greenery to ameliorate the environment. It was also urged that the unit shall encourage captive plantation of plywood species in the nearby villages in the vacant areas, roadsides, community lands and also raise private plantations for which adequate fund should be annually earmarked and spent. It is evident that the industry is procuring timbers for the purposes from the nearby areas belonging to private individuals in villages and, therefore, sufficient saplings of the species like Kathal (*Artocarpusintegrifolia*), Jamun (*Syzygium cuminii*), Kadam (*Anthocephalus cadamaba*), Am (*Mangiferaindica*), Boga Siris (*Albizzia procera*) etc should be distributed to the individuals in the villages for plantation in their homestead besides taking up the plantation activities in areas indicated above under due discussions with the DFO, Digboi. An amount of Rs 8 lakh (Rs 3 lakh-nursery raising + Rs 5 Lakh for plantation) as agreed upon by the PP during the course of presentation should be annually spent as a part of the Corporate Environmental Responsibility (CER) activity and shall be uploaded in the PARIVESH Portal.
8.	It shall be bounded on the project Proponent to upload the Half Yearly Compliance Report (HCR) in terms of the guidelines circulated under OM No. IA3-22/1/2022-IA.III Dated 14.06.2024 by the ministry in the MoEF & CC, GoI.

3.29.5.2. Standard

5(f)	**Synthetic organic chemicals industry**
null	
1.	No further expansion or modifications in the plant, other than mentioned in the EIA Notification, 2006 and its amendments, shall be carried out without prior approval of the Ministry of Environment, Forest and Climate

	Change/SEIAA, as applicable. In case of deviations or alterations in the project proposal from those submitted to this Ministry for clearance, a fresh reference shall be made to the Ministry/SEIAA, as applicable, to assess the adequacy of conditions imposed and to add additional environmental protection measures required, if any.
1.	The Project proponent shall strictly comply with the rules and guidelines issued under the Manufacture, Storage and Import of Hazardous Chemicals (MSIHC) Rules, 1989, as amended time to time, the Chemical Accidents (Emergency Planning, Preparedness and Response) Rules, 1996, and Hazardous and Other Wastes (Management and Trans-Boundary Movement) Rules, 2016 and other rules notified under various Acts.
1.	The energy source for lighting purpose shall be preferably LED based, or advanced having preference in energy conservation and environment betterment.
1.	The overall noise levels in and around the plant area shall be kept well within the standards by providing noise control measures including acoustic hoods, silencers, enclosures etc. on all sources of noise generation. The ambient noise levels shall conform to the standards prescribed under the Environment (Protection) Act, 1986 Rules, 1989 viz. 75 dBA (day time) and 70 dBA (night time).
1.	The company shall undertake all relevant measures for improving the socio-economic conditions of the surrounding area. The activities shall be undertaken by involving local villages and administration. The company shall undertake eco-developmental measures including community welfare measures in the project area for the overall improvement of the environment.
1.	The company shall earmark sufficient funds towards capital cost and recurring cost per annum to implement the conditions stipulated by the Ministry of Environment, Forest and Climate Change as well as the State Government along with the implementation schedule for all the conditions stipulated herein. The funds so earmarked for environment management/ pollution control measures shall not be diverted for any other purpose.
1.	A copy of the clearance letter shall be sent by the project proponent to concerned Panchayat, Zilla Parishad/Municipal Corporation, Urban local Body and the local NGO, if any, from whom suggestions/ representations, if any, were received while processing the proposal.
1.	The project proponent shall also upload/submit six monthly reports on Parivesh Portal on the status of compliance of the stipulated Environmental Clearance conditions including results of monitored data to the respective Integrated Regional Office of MoEF&CC, the respective Zonal Office of CPCB and SPCB. A copy of Environmental Clearance and six monthly compliance status report shall be posted on the website of the company.
1.	The environmental statement for each financial year ending 31st March in Form-V as is mandated shall be submitted to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently, shall also be put on the website of the company along with the status of compliance of environmental clearance conditions and shall also be sent to the respective Integrated Regional Office of MoEF&CC by e-mail.
1.	The project proponent shall inform the public that the project has been accorded environmental clearance by the Ministry and copies of the clearance letter are available with the SPCB/Committee and may also be seen at Website of the Ministry and at https://parivesh.nic.in/. This shall be advertised within seven days from the date of issue of the clearance letter, at least in two local newspapers that are widely circulated in the region of which one shall be in the vernacular language of the locality concerned and a copy of the same shall be forwarded to the concerned Regional Office of the Ministry.
1.	The project authorities shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities and the date of start of the project.
1.	This Environmental clearance is granted subject to final outcome of Hon'ble Supreme Court of India, Hon'ble High Court, Hon'ble NGT and any other Court of Law, if any, as may be applicable to this project.
Specific Conditions	
1.	Process effluent/any wastewater shall not be allowed to mix with storm water. Storm water drain shall be passed

	through guard pond.

3.30. Agenda Item No 30:

3.30.1. Details of the proposal

Regularisation of existing manufacturing unit BHISMAK PLY PRIVATE LIMITED that produces timber based products of 33478.62 MTPA and resin of capacity 225 MTPA by **BHISMAK PLY PRIVATE LIMITED** located a t **TINSUKIA,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/IND3/473280/2024	SEAC/SEIAA.3835/2024	23/07/2024	Synthetic organic chemicals industry (5(f))

3.30.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :09/08/2024

Deliberations of SEAC 1 :

All the relevant papers are placed before the Committee and the Proponent was asked to present the case for adequate appraisal of the project proposal. The project Proponent has presented the proposal accordingly explaining the need for obtaining the EC for regularization with the requirement of the CTO on a regular basis. The Proponent has also submitted that the unit is falling within the Makum Industrial Estate-I and furnished the copy of **License No WBI/PRI/UAZ/EAC/DIB/095** valid from **25.01.2024 to 24.01.2029** granted by the Environment and Forest Department, GoA.

A sub-Committee was constituted for inspection of the site in a similarly placed unit at Palashbari requiring the EC which is taken into consideration in the instant matter too. The mandate of the sub-Committee was to inspect the proposed site, assess the present status of operation of the plant and also to assess the existing environmental status, appraisal on the probable environmental impact that may generate on the natural environment in the surroundings.

The observation and comments / recommendations of the sub-committee who have assessed the environmental issues in the said Plywood Industry covering the aspects of emission, effluent and Hazardous waste generation are placed for appraisal of the Committee in the instant case too being of similar nature to dispense with site inspection.

a) The sub-Committee observed that the manufacturing processes in a Plywood Factory use Resins, which are of two types in general, viz., Melamine Urea Resin and Phenol Formaldehyde Resin. Melamine, Phenol and Formaldehyde are the major raw materials for production of resins. The resins are produced by blending the raw materials in a batch process and a resin producing unit washes the reactor/vessels intermittently when type of resin production is changed.

b) Effluent is generated in the form of vessel washings. Further, effluent is also generated from spillage of glue or resins, which are applied on the surface of the ply boards.

c) Member Secretary, SEAC heading the sub-committee pointed out that **a resin producing unit can recycle the entire quantity of such effluent** in the next batch of resin production by proper collection of effluent and subsequent recycling.

d) It was also observed that the effluent generated from the glue application section was released into the storm drain. Further, during the course of visit to the resin plant located outside the main factory shed, it was observed that effluent generated was released into the storm drain.

e) The team also observed that a small ETP was installed by the PP at the end of the storm drain and the visiting team was of the opinion that such a small ETP would not function properly in case effluent get mixed with rain water and suggested for a bigger STP in place.

f) The inspection team strongly felt that a Plywood Industry should invariably install Rain Water Harvesting (RWH) system, which shall function as a sedimentation tank for the rain water mixed with saw dust and other solid particles. The unit should use the harvested rain water in dust suppression measures like water sprinklings in haul roads. After proper sedimentation of the rain water in the RWH tank, which may be even in the form of earthen pond, the water may be allowed to discharge to nearby drains as available.

g) Entire effluent generated in such a plant shall be fully recycled as the effluent generated in a resin unit contain *phenolic* substances and formaldehyde (*carciogenic*) and these are potential contaminants to the environment, especially the soil and water environment.

There are examples of complete recycling of effluent in such a resin producing or using industry and such environmental best practices which need to be replicated by all other similarly placed industries in the State**.**

h) Since primarily, the Plywood Industries operate boiler to generate steam, the **saw dusts** and **wood rejects** generated in the plant as wastes, are used as boiler fuel in such a plywood industry. The Committee opined that if **biomass briquettes**, which can be converted from the saw dust and other wood rejects, are used effectively as

fuel in the boiler instead of saw dust, emission generated from the boiler would contain lesser dust and as such the emission would be reduced.

i) Empty chemical drums as are generated as hazardous waste in the premises, is required to have proper quantification and subsequent stacking of this type of hazardous waste.

After due deliberation the august Committee is of the opinion for recommending grant of the **EC** to the project Proponent subject to the strict adherence and compliance of the special conditions as best environmental practices:

Decision: Recommended for grant of the EC.

Date of SEIAA 2 :19/09/2024
Deliberations of SEIAA 2 :
The committee suggest for site visit.

Date of SEIAA 3 :N/A
Deliberations of SEIAA 3 :
ADS required-

1. Installation of an ETP with adequate facility for handling peak load in consultation with PCBA with a perm
2. Storage tanks and pipe lines for 100% recycling of treated effluent.

Date of SEIAA 4 :04/04/2025
Deliberations of SEIAA 4 :
ADS required-

1. As ADS Replied the ETP is not properly installation, and upload more photos of Installation of an ETP with adequate facility for handling peak load in consultation with PCBA with a permanent weather protection shed for the ETP.
2. Storage tanks and pipe lines for 100% recycling of treated effluent.

3.30.3. Deliberations by the SEIAA in current meetings

EC is approved for Bhismak Ply Private Limited is a Plywood Manufacturing Industry that produces plywood of 33478.62 MTPA and resin of capacity 225 MTPA and as such it needs prior Environmental Clearance (EC) for setting up of such an industry. As per the order of the MoEF & CC, GoI contained in F.No. 22-93/2017-IA.III dated 10.04.2019 a resin producing unit of less than 1000 MTPA needs to obtain prior EC under the B-2 Category.

3.30.4. Recommendation of SEIAA

Approved

3.30.5. Details of Environment Conditions

3.30.5.1. Specific

SPECIAL CONDITIONS BY SEAC

1.	The Unit shall manage the effluent generated in a resin plant in a closed loop without passing the effluent to a storm drain.
2.	The Unit shall have agreement with bio mass briquette producing unit. Saw dust generated by the unit shall be converted into briquette and then be used in the boiler as fuel to reduce the emission generation to a significant level.
3.	Storm water drain shall be segregated from the effluent drain.
4.	Rain Water Harvesting system shall be made. A pond shall be constructed within the premises and storm water drain shall be connected to it. The earthen pond shall function as Rain Water Harvesting tank as well as Sedimentation pit.
5.	The HW generated, viz., empty containers of chemicals and resin residues, shall be inventoried and stacked properly for subsequent disposal to TSDFs.
6.	The Committee further made it a point that the premises of the Manufacturing Unit needs to be planted with local species of plants for greenery to ameliorate the environment. It was also urged that the unit shall encourage captive plantation of plywood species in the nearby villages in the vacant areas, roadsides, community lands and also raise private plantations for which adequate fund should be annually earmarked and spent. It is evident that the industry is procuring timbers for the purposes from the nearby areas belonging to private individuals in villages and, therefore, sufficient saplings of the species like Kathal (*Artocarpus integrifolia*), Jamun (*Syzygium cuminii*), Kadam (*Anthocephalus cadamaba*), Semul (*Bombax ceiba*), Boga Siris (*Albizzia procera*), Selleng (*Sapiumbaccatum*), Hollong (*Dipterocarpus macrocarpus*), Ailanthus (*Ailanthus grandis*) etc etc should be distributed to the individuals in the villages for plantation in their homestead besides taking up the plantation activities in areas indicated above under due discussions with the DFO, Digboi.
7.	An amount of Rs 10 lakh (Rs 4 lakh-nursery raising + Rs 6 Lakh for plantation) as agreed upon by the PP during the course of presentation should be annually spent as a part of the Corporate Environmental Responsibility (CER) activity and shall be uploaded in the PARIVESH Portal.
8.	It shall be bounden duty on the project Proponent to upload the Half Yearly Compliance Report (HCR) in terms of the guidelines circulated under OM No. IA3-22/1/2022-IA.III Dated 14.06.2024 by the ministry in the MoEF & CC, GoI.

3.30.5.2. Standard

5(f)	**Synthetic organic chemicals industry**
null	
1.	No further expansion or modifications in the plant, other than mentioned in the EIA Notification, 2006 and its amendments, shall be carried out without prior approval of the Ministry of Environment, Forest and Climate Change/SEIAA, as applicable. In case of deviations or alterations in the project proposal from those submitted to this Ministry for clearance, a fresh reference shall be made to the Ministry/SEIAA, as applicable, to assess the adequacy of conditions imposed and to add additional environmental protection measures required, if any.
1.	The Project proponent shall strictly comply with the rules and guidelines issued under the Manufacture, Storage and Import of Hazardous Chemicals (MSIHC) Rules, 1989, as amended time to time, the Chemical Accidents

	(Emergency Planning, Preparedness and Response) Rules, 1996, and Hazardous and Other Wastes (Management and Trans-Boundary Movement) Rules, 2016 and other rules notified under various Acts.
1.	The energy source for lighting purpose shall be preferably LED based, or advanced having preference in energy conservation and environment betterment.
1.	The overall noise levels in and around the plant area shall be kept well within the standards by providing noise control measures including acoustic hoods, silencers, enclosures etc. on all sources of noise generation. The ambient noise levels shall conform to the standards prescribed under the Environment (Protection) Act, 1986 Rules, 1989 viz. 75 dBA (day time) and 70 dBA (night time).
1.	The company shall undertake all relevant measures for improving the socio-economic conditions of the surrounding area. The activities shall be undertaken by involving local villages and administration. The company shall undertake eco-developmental measures including community welfare measures in the project area for the overall improvement of the environment.
1.	The company shall earmark sufficient funds towards capital cost and recurring cost per annum to implement the conditions stipulated by the Ministry of Environment, Forest and Climate Change as well as the State Government along with the implementation schedule for all the conditions stipulated herein. The funds so earmarked for environment management/ pollution control measures shall not be diverted for any other purpose.
1.	A copy of the clearance letter shall be sent by the project proponent to concerned Panchayat, Zilla Parishad/Municipal Corporation, Urban local Body and the local NGO, if any, from whom suggestions/ representations, if any, were received while processing the proposal.
1.	The project proponent shall also upload/submit six monthly reports on Parivesh Portal on the status of compliance of the stipulated Environmental Clearance conditions including results of monitored data to the respective Integrated Regional Office of MoEF&CC, the respective Zonal Office of CPCB and SPCB. A copy of Environmental Clearance and six monthly compliance status report shall be posted on the website of the company.
1.	The environmental statement for each financial year ending 31st March in Form-V as is mandated shall be submitted to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently, shall also be put on the website of the company along with the status of compliance of environmental clearance conditions and shall also be sent to the respective Integrated Regional Office of MoEF&CC by e-mail.
1.	The project proponent shall inform the public that the project has been accorded environmental clearance by the Ministry and copies of the clearance letter are available with the SPCB/Committee and may also be seen at Website of the Ministry and at https://parivesh.nic.in/. This shall be advertised within seven days from the date of issue of the clearance letter, at least in two local newspapers that are widely circulated in the region of which one shall be in the vernacular language of the locality concerned and a copy of the same shall be forwarded to the concerned Regional Office of the Ministry.
1.	The project authorities shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities and the date of start of the project.
1.	This Environmental clearance is granted subject to final outcome of Hon'ble Supreme Court of India, Hon'ble High Court, Hon'ble NGT and any other Court of Law, if any, as may be applicable to this project.
Specific Conditions	
1.	Process effluent/any wastewater shall not be allowed to mix with storm water. Storm water drain shall be passed through guard pond.

4. Any Other Item(s)

Government of India

Ministry of Environment, Forest and Climate Change

(Issued by the State Environment Impact Assessment Authority(SEIAA), ASSAM)

****

Dated **03/06/2025**

To,

Chinmay Pathak
Gobardhana, P.O. Gobardhana, BAKSA, ASSAM, 781315
chinmayec24@yahoo.com

Subject: Grant of EC under the provision of the EIA Notification 2006-regarding.

Sir/Madam,

This is in reference to your application for Grant of EC under the provision of the EIA Notification 2006-regarding in respect of project Gobardhana Village Patta Land Sand, Sand Gravel and Stone Mining Permit Area submitted to Ministry vide proposal number SIA/AS/MIN/517485/2025 dated 02/04/2025.

2. The particulars of the proposal are as below :

(i) EC Identification No.	EC25C0108AS5363147N
(ii) File No.	SEAC/SEIAA.4068/2025
(iii) Clearance Type	EC
(iv) Category	B2
(v) Project/Activity Included Schedule No.	1(a) Mining of minerals
(vii) Name of Project	Gobardhana Village Patta Land Sand, Sand Gravel and Stone Mining Permit Area
(viii) Name of Company/Organization	chinmay pathak
(ix) Location of Project (District, State)	BAKSA, ASSAM
(x) Issuing Authority	SEIAA
(xii) Applicability of General Conditions	no
(xiii) Applicability of Specific Conditions	no

In view of the particulars given in the Para 1 above, the project proposal interalia including Form-1(Part A and B) were submitted to the State Expert Appraisal Committee (SEAC), Assam under the provision of EIA notification 2006 and its subsequent amendments.

The above-mentioned proposal has been considered by State Expert Appraisal Committee (SEAC) in the meeting held on 05/04/2025. The minutes of the meeting and all the Application and documents submitted (viz. Form-1 Part A and Part B)

are available on PARIVESH portal which can be accessed by scanning the QR Code above.

The brief about configuration of plant/equipment, products and by products and salient features of the project along with environment settings, as submitted by the Project proponent in Form-1 (Part A and B) /presented during SEIAA are annexed to this EC as Annexure (1).

The SEIAA, in its meeting held on 13/05/2025, based on information & clarifications provided by the project proponent and after detailed deliberations recommended the proposal for grant of EC under the provision of EIA Notification, 2006 and as amended thereof subject to stipulation of specific and general conditions as detailed in Annexure (2).

The SEAC has examined the proposal in accordance with the Environment Impact Assessment (EIA) Notification, 2006 & further amendments thereto and after recommendations of the State Environment Impact Assessment Authority (SEIAA) hereby decided to grant EC for instant proposal of **Chinmay Pathak** under the provisions of EIA Notification, 2006 and as amended thereof.

The SEIAA reserves the right to stipulate additional conditions, if found necessary.

The EC to the aforementioned project is under provisions of EIA Notification, 2006. It does not tantamount to approvals/consent/permissions etc. required to be obtained under any other Act/Rule/regulation. The Project Proponent is under obligation to obtain approvals /clearances under any other Acts/ Regulations or Statutes, as applicable, to the project.

This issues with the approval of the Competent Authority.

The GPS Coordinates are as follows-
1. 26° 35' 52.50" N 90° 58' 38.44" E
2. 26° 35' 55.28" N 90° 58' 35.17" E
3. 26° 35' 54.76" N 90° 58' 35.00" E
4. 26° 35' 55.55" N 90° 58' 32.15" E
5. 26° 35' 54.79" N 90° 58' 31.99" E
6. 26° 35' 55.47" N 90° 58' 25.21" E
7. 26° 35' 50.99" N 90° 58' 25.15" E
8. 26° 35' 50.29" N 90° 58' 29.38" E
9. 26° 35' 51.78" N 90° 58' 29.52" E

EC is approved for project area allotted 3.60Ha with a quantity of @975cum of Sand, @2,925cum of Sand Gravel and @4,880cum of Stone for 1 (one) year subjected to the terms and conditions laid down by SEAC and that the area in question is to be reflected in the approved final DSR.

Copy To

1. The Joint Secretary, Ministry of Environment, Forest and Climate Change, Government of India, MOEF&CC, Indira Paryavaran Bhawan, Jorbagh Rd, New Delhi-110003.
2. The Secretary to the Govt. of Assam, Environment & Forest Department, Dispur, Guwahati-6 Cum Member Secretary, SEIAA, Assam for favour of kind information.
3. The P.C.C.F, HoFF, Govt. of Assam, Panjabari, Guwahati-37 for favour of kind information.
4. The Member Secretary, PCB Assam for favour of kind information.
5. The Divisional Forest Officer, Baksa Forest Division, Mushalpur, Dist. Baksa (BTR), Assam for information & necessary action to ensure that all **Specific Conditions & General Condition** are complied with.
6. The Integrated Regional Office, Ministry of Environment, Forest & Climate Change, 4th Floor, Housefed Building, G.S. Road, Rukminigaon, Guwahati-22 for kind information.
7. Office Copy.

Annexure 1

Specific EC Conditions for (Mining Of Minerals)

1. General Conditions By Seac

S. No	EC Conditions
1.1	This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan and the approved DSR for the district.
1.2	This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates recorded in the approved DSR; (b) the active bank of the river is not disturbed / damaged because of mining and transportation of mining materials; (c) the Proponent shall extract the approved quantity of minerals indicated herein with maximum mining depth of up to 1 (one) meter only from the non-mined surface.
1.3	The quantities of minor mineral allowed for extraction, annually, in terms of the approved DSR shall not be exceeded by the Proponent.
1.4	The Orders of the Hon'ble Apex Court, the NGT (Eastern Bench), Kolkata; the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF& CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} shall be followed by the Proponent.

2. Specific Conditions By Seac

S. No	EC Conditions
2.1	Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF& CC for non manual extraction which need to be adhered to by the concerned DFO.
2.2	The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period.
2.3	The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan/DSR before allowing any mining.
2.4	No mechanized machinery shall be allowed to be used for excavation of mineral from river bed and only on exceptional cases the DFO may permit use of JCB for loading and unloading of mineral in vehicles.
2.5	CER activities shall be carried out / undertaken by the Proponent and minimum estimated cost of Rs 1.00 Lakh (one Lakh) only, shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the nearby village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st year of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly

S. No	EC Conditions
	Compliance Report.
2.6	Plantation activities shall be carried out / undertaken in any educational institution or Govt lands along the proposed mining area involving local NGOs, School / College students and an amount of Rs 2.00(two) Lakh shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with due consultation of the DFO and shall make effort to label the plant species for the benefits of the villagers, common people and specially the school/college students.
2.7	The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Amlokhi (*Phyllanthus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saracaasoca*), Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*), Jamun (*Syzygiumcuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpus integrifolia*), Ow Tenga (*Dillenia indica*), Khair (*Acacia catechu*),Thekera (*Garcinia spp*) etc etc.
2.8	Half Yearly Compliance Reports (HCR) are mandatory on the part of project Proponent which need to be uploaded on or before 1st June and 1st December of the calendar year in PARIVESH 2.0 portal and no activity shall be permitted by the DFO without HCR.
2.9	Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

Standard EC Conditions for (Mining of minerals)

1. Statutory Compliance

S. No	EC Conditions
1.1	A copy of EC letter will be marked to concerned Panchayat / local NGO etc. if any, from whom suggestion / representation has been received while processing the proposal.
1.2	State Pollution Control Board/Committee shall be responsible for display of this EC letter at its Regional office, District Industries Centre and Collector's office/ Tehsildar's Office for 30 days.
1.3	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State Pollution Control Board/ Committee.
1.4	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.5	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.6	This Environmental Clearance (EC) is subject to orders/ judgment of Honble Supreme Court of India, Honble High Court, Honble NGT and any other Court of Law, Common Cause Conditions as may be applicable.
1.7	The Project Proponent shall inform the MoEF&CC for any change in ownership of the mining lease. In case there is any change in ownership or mining lease is transferred. PP needs to apply for transfer of EC as per provisions of the para 11 of EIA Notification, 2006 as amended from time to

S. No	EC Conditions
	time.
1.8	The Project proponent complies with all the statutory requirements and judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India &Ors before commencing the mining operations.
1.9	The State Government concerned shall ensure that mining operation shall not be commenced till the entire compensation levied, if any, for illegal mining paid by the Project Proponent through their respective Department of Mining & Geology in strict compliance of Judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India & Ors.
1.10	The Project Proponent shall follow the mitigation measures provided in MoEFCC's Office Memorandum No. Z-11013/57/2014-IA.II (M), dated 29th October, 2014, titled "Impact of mining activities on Habitations-Issues related to the mining Projects wherein Habitations and villages are the part of mine lease areas or Habitations and villages are surrounded by the mine lease area."

2. Air Quality Monitoring And Preservation

S. No	EC Conditions
2.1	Design the ventilation system for adequate air changes as per ACGIH document for all tunnels, motor houses, Oil Cellars.
2.2	Effective safeguard measures for prevention of dust generation and subsequent suppression (like regular water sprinkling, metalled road construction etc.) shall be carried out in areas prone to air pollution wherein high levels of PM10 and PM2.5 are evident such as haul road, loading and unloading point and transfer points. The Fugitive dust emissions from all sources shall be regularly controlled by installation of required equipments/ machineries and preventive maintenance. Use of suitable water-soluble chemical dust suppressing agents may be explored for better effectiveness of dust control system. It shall be ensured that air pollution level conform to the standards prescribed by the MoEFCC/ Central Pollution Control Board.
2.3	The project proponent shall submit monthly summary report of continuous stack emission and air quality monitoring and results of manual stack monitoring and manual monitoring of air quality /fugitive emissions to Regional Office of MoEF&CC, Zonal office of CPCB and Regional Office of SPCB along with six-monthly monitoring report.
2.4	The project proponent use leak proof trucks/dumpers carrying ore and other raw materials and cover them with tarpaulin.
2.5	Appropriate Air Pollution Control (APC) system shall be provided for all the dust generating points including fugitive dust from all vulnerable sources, so as to comply prescribed stack emission and fugitive emission standards.

3. Water Quality Monitoring And Preservation

S. No	EC Conditions
3.1	In case, immediate mining scheme envisages intersection of ground water table, then Environmental Clearance shall become operational only after receiving formal clearance from CGWA. In case, mining operation involves intersection of ground water table at a later stage, then PP shall ensure that prior approval from CGWA and MoEFCC is in place before such mining operations. The permission for intersection of ground water table shall essentially be based on detailed hydro-geological study of the area.
3.2	Project Proponent shall regularly monitor and maintain records w.r.t. ground water level and quality in and around the mine lease by establishing a network of existing wells as well as new piezo-meter installations during the mining operation in consultation with Central Ground Water Authority/ State Ground Water Department. The Report on changes in Ground water level and quality shall be submitted on six-monthly basis to the Regional Office of the Ministry, CGWA and State Groundwater Department / State Pollution Control Board.
3.3	The Project Proponent shall undertake regular monitoring of natural water course/ water resources/ springs and perennial nallahs existing/ flowing in and around the mine lease including upstream and downstream. Sufficient number of gullies shall be provided at appropriate places within the lease for management of water. The parameters to be monitored shall include their water quality vis-à-vis suitability for usage as per CPCB criteria and flow rate. It shall be ensured that no obstruction and/ or alteration be made to water bodies during mining operations without justification and prior approval of MoEFCC. The monitoring of water courses/ bodies existing in lease area shall be carried out four times in a year viz. pre-monsoon (April May), monsoon (August), post-monsoon (November) and winter (January) and the record of monitored data may be sent regularly to Ministry of Environment, Forest and Climate Change and its Regional Office, Central Ground Water Authority and Regional Director, Central Ground Water Board, State Pollution Control Board and Central Pollution Control Board. Clearly showing the trend analysis on six-monthly basis.

4. Noise Monitoring And Prevention

S. No	EC Conditions
4.1	Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six-monthly compliance report.

5. Noise And Vibration Monitoring And Prevention

S. No	EC Conditions
5.1	The Project Proponent shall take measures for control of noise levels below 85 dBA in the work environment. The workers engaged in operations of HEMM, etc. should be provided with ear plugs /muffs. All personnel including laborers working in dusty areas shall be provided with protective respiratory devices along with adequate training, awareness and information on safety and health aspects. The PP shall be held responsible in case it has been found that workers/ personals/ laborers are working without personal protective equipment.
5.2	The peak particle velocity at 500m distance or within the nearest habitation, whichever is closer shall be monitored periodically as per applicable DGMS guidelines.

6. Mining Plan

S. No	EC Conditions
6.1	The land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life shall be governed as per the approved Mining Plan. The excavation vis-à-vis backfilling in the mine lease area and corresponding afforestation to be raised in the reclaimed area shall be governed as per approved mining plan. PP shall ensure the monitoring and management of rehabilitated areas until the vegetation becomes self-sustaining. The compliance status shall be submitted half-yearly to the MoEFCC and its concerned Regional Office.
6.2	The Project Proponent shall adhere to approved mining plan, inter alia, including, total excavation (quantum of mineral, waste, over burden, inter burden and top soil etc.); mining technology; lease area; scope of working (method of mining, overburden & dump management, O.B& dump mining, mineral transportation mode, ultimate depth of mining, concurrent reclamation and reclamation at mine closure; land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life; etc.).

7. Land Reclamation

S. No	EC Conditions
7.1	The Overburden (O.B.), waste and topsoil generated during the mining operations shall be stacked at earmarked OB dump site(s) only and it should not be kept active for a long period of time. The physical parameters of the OB / waste dumps / topsoil dump like height, width and angle of slope shall be governed as per the approved Mining Plan and the guidelines/circulars issued by D.G.M.S. The topsoil shall be used for land reclamation and plantation.
7.2	The slope of dumps shall be vegetated in scientific manner with suitable native species to maintain the slope stability, prevent erosion and surface run off. The selection of local species regulates local climatic parameters and help in adaptation of plant species to the microclimate. The gullies formed on slopes should be adequately taken care of as it impacts the overall stability of dumps. The dump mass should be consolidated with the help of dozer/ compactors thereby ensuring proper filling/ leveling of dump mass. In critical areas, use of geo textiles/ geo-membranes / clay liners / Bentonite etc. shall be undertaken for stabilization of the dump.
7.3	Check dams of appropriate size, gradient and length shall be constructed around mine pit and OB dumps to prevent storm run-off and sediment flow into adjoining water bodies. A safety margin of 50% shall be kept for designing of sump structures over and above peak rainfall (based on 50 years data) and maximum discharge in the mine and its adjoining area which shall also help in providing adequate retention time period thereby allowing proper settling of sediments/ silt material. The sedimentation pits/ sumps shall be constructed at the corners of the garland drains.

8. Waste Management

S. No	EC Conditions
8.1	Kitchen waste shall be composted or converted to biogas for further use.(to be decided on case to case basis depending on type and size of plant)
8.2	The waste oil, grease and other hazardous waste shall be disposed of as per the Hazardous & Other

S. No	EC Conditions
	waste (Management & Transboundary Movement) Rules, 2016.

9. Green Belt And Emp

S. No	EC Conditions
9.1	The project proponent shall prepare GHG emissions inventory for the plant and shall submit the programme for reduction of the same including carbon sequestration including plantation.

10. Transportation

S. No	EC Conditions
10.1	No Transportation of the minerals shall be allowed in case of roads passing through villages/ habitations. In such cases, PP shall construct a 'bypass' road for the purpose of transportation of the minerals leaving an adequate gap (say at least 200 meters) so that the adverse impact of sound and dust along with chances of accidents could be mitigated. All costs resulting from widening and strengthening of existing public road network shall be borne by the PP in consultation with nodal State Govt. Department. Transportation of minerals through road movement in case of existing village/ rural roads shall be allowed in consultation with nodal State Govt. Department only after required strengthening such that the carrying capacity of roads is increased to handle the traffic load. The pollution due to transportation load on the environment will be effectively controlled and water sprinkling will also be done regularly. Vehicular emissions shall be kept under control and regularly monitored. Project should obtain Pollution Under Control (PUC) certificate for all the vehicles from authorized pollution testing centers. [If applicable in case of road transport].

11. Public Hearing And Human Health Issues

S. No	EC Conditions
11.1	The project proponent shall carry out heat stress analysis for the workmen who work in high temperature work zone and provide Personal Protection Equipment (PPE) as per the norms of Factory Act.
11.2	Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, creche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.
11.3	Occupational health surveillance of the workers shall be done on a regular basis and records maintained as per the Factories Act.

12. Green Belt

S. No	EC Conditions
12.1	The Project Proponent shall develop greenbelt in 7.5m wide safety zone all along the mine lease

S. No	EC Conditions
	boundary as per the guidelines of CPCB in order to arrest pollution emanating from mining operations within the lease. The whole Green belt shall be developed within first 5 years starting from windward side of the active mining area. The development of greenbelt shall be governed as per the EC granted by the Ministry irrespective of the stipulation made in approved mine plan.

13. Corporate Environment Responsibility

S. No	EC Conditions
13.1	Self-environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
13.2	Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the Six Monthly Compliance Report.
13.3	The Project Proponent shall submit the time- bound action plan to the concerned regional office of the Ministry within 6 months from the date of issuance of environmental clearance for undertaking the activities committed during public consultation by the project proponent and as discussed by the EAC, in terms of the provisions of the MoEF&CC Office Memorandum No.22-65/2017-IA.III dated 30 September, 2020. The action plan shall be implemented within three years of commencement of the project.
13.4	All the recommendations made in the Charter on Corporate Responsibility for Environment Protection (CREP) for the Mineral Beneficiation plants shall be implemented.

14. Miscellaneous

S. No	EC Conditions
14.1	The project proponent shall monitor the criteria pollutants level namely; PM10, S02, NOx (ambient levels as well as stack emissions) or critical sectoral parameters, indicated for the projects and display the same at a convenient location for disclosure to the public and put on the website of the company.
14.2	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
14.3	44) The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
14.4	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
14.5	The project proponent shall abide by all the commitments and recommendations made in the EIA/EMP report, commitment made during Public Hearing and also that during their presentation to

S. No	EC Conditions
	the Expert Appraisal Committee.
14.6	The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.
14.7	Concealing factual data failure to comply with any or submission of false/ fabricated data and of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act, 1986.
14.8	The Ministry or any other competent authority may alter/modify the above conditions or stipulate any further condition in the interest of environment protection.
14.9	The Project Proponent shall prepare digital map (land use & land cover) of the entire lease area once in five years purpose of monitoring land use pattern and submit a report to concerned Regional Office of the MoEF&CC.
14.10	The concerned Regional Office of the MoEF&CC shall randomly monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the MoEF&CC officer(s) by furnishing the requisite data / information / monitoring reports.
14.11	The Project Authorities should inform to the Regional Office regarding date of financial closures and final approval of the project by the concerned authorities and the date of start of land development work.
14.12	In pursuant to Ministrys O.M No 22-34/2018-IA.III dated 16.01.2020 to comply with the direction made by Honble Supreme Court on 8.01.2020 in W.P. (Civil) No 114/2014 in the matter Common Cause vs Union of India, the mining lease holder shall after ceasing mining operations, undertake regrassing the mining area and any other area which may have been disturbed due to other mining activities and restore the land to a condition which is fit for growth of fodder, flora, fauna etc.
14.13	The above conditions will be enforced inter-alia, under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986 and the Public Liability Insurance Act, 1991 along with their amendments and rules made there under and also any other orders passed by the Hon'ble Supreme Court of India/High Court and any other Court of Law relating to the subject matter.
14.14	Any appeal against this environmental clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.
14.15	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.

Proposal Details

Proposal No.:

SIA/AS/MIN/468295/2024

Single Window No.:

SW/177152/2024

CAF No.:

CAF/162518/2024

Project Name:

1 No. Suagpur Village Patta Land Sand and Sand Gravel Mining Permit Area

State:

ASSAM

Proposal For:

Fresh EC

Activity:

1(a) Mining of minerals

Sector:

MIN

Application For:

Application for ToR (Category A, B1, and B2 Violation)/EC (Category B2) - Form 1

Date of Submission:

23/08/2024

State File No.:

SEAC/SEIAA 3878/2024

EC Granted	18/10/2024-18/10/2024
Referred to SEIAA	09/10/2024-18/10/2024
Proposal Accepted and Referred to SEAC	07/09/2024-08/10/2024
MS Verification Completed	23/08/2024-07/09/2024
EDS raised	16/05/2024-23/08/2024
MS Verification Completed	04/04/2024-16/05/2024
Submitted	03/04/2024-04/04/2024

Common Application Form

Project Details

1. Details of Project

1.1. Name of the Project	1 No. Suagpur Village Patta Land Sand and Sand Gravel Mining Permit Area
1.2. Project Proposal For	New
1.3. Project ID (Single Window Number)	SW/177152/2024
1.4. Description of Project	1 No. Suagpur Village Patta Land Sand and Sand Gravel Mining Permit Area is located at 1 No. Suagpur Gaon, P.O. Suagpur, Dist. Baksa, BTAD, Assam. The proposed project included mining of 8100 Cum of Sand & Gravel for two years.

2. Details of the Company/Organization/User Agency making application

2.1. Legal Status of the Company/Organization/User Agency	Company
2.2. Name of the Company/ Organization/User agency	SHREE GAUTAM CONSTRUCTION CO. LTD

Registered address

2.3. Address	4TH FLOOR, AMAZE TOWER, A T ROAD, GUWAHATI
2.4. State	ASSAM
2.5. District	KAMRUP METRO
2.6. Pin Code	781001
2.7. Landmarks	ABOVE VISHAL MEGA MART
2.8. E-mail address	sgccpl@gmail.com
2.9. Mobile number	xxxxxx4848

3. Details of the person making application

3.1. Name	Babulal Swami
3.2. Designation	Manager

Correspondence address

3.3. Address	4TH FLOOR, AMAZE TOWER, A.T. ROAD, GUWAHATI.
3.4. State	ASSAM
3.5. District	KAMRUP METRO
3.6. Pin Code	781001
3.7. E-mail address	sgccpl@gmail.com
3.8. Landline Number	xxx0801
3.9. Mobile number	xxxxxx4848

Project Location

4. Location of the Project or Activity

4.1. Upload KML	Mining Permit Area.kml

4.2. Whether the project/activity falling in the state/UT sharing international borders	NO
5. Shape of the Project	Non - Linear

Location Details

Toposheet No	State/UT	District	Sub District	Village	Plot/Survey/Khasra No.
G46H10	ASSAM	Tamulpur	Goreswar (Pt)	SUAGPUR NO.1	

Remarks

N/A

6. Land Requirement (in Ha) of the project or activity

6.1. Nature of Land involved	
6.2. Non-Forest Land [A]	0.95
6.3. Forest Land [B]	0
6.4. Total Land [A+B]	0.95

Project Activity Cost

6. Project/Activity Cost

6.1. Total Cost of the Project at current price level (in Lakhs)	28 Amount in Words : **Twenty Eight Lakh(s) Only**

7. Employment likely to be generated

7.1. During construction phase

Permanent employment

Temporary employment

7.2. During operational phase

Permanent employment

7.2.1. No. of permanent employment (No.s) [A]	5
7.2.2. Period of employment (No. of days) [B]	500
7.2.3. No. of man-days [X]=[A]*[B]	2500

Temporary employment

7.2.4. Temporary / Contractual employment (No. of Man days) [Y]	10
7.2.5. Total [X] +[Y]	2510

Others

8. Whether Rehabilitation and Resettlement (R&R) involved?	NO
9. Whether project area involves shifting of watercourse/road/rail/Transmission line/water pipeline, etc. required?	NO
10. Whether any alternative site(s) examined or part thereof	Not applicable as the project or activity is site specific

for the non-site-specific component?	Not applicable as the project or activity is site specific
11. Whether there is any Government Order or Policy/ Court order relevant or restricting to the site?	NO
12. Whether there is any litigation pending against the project and/or land in which the project is proposed to be set up?	NO
13. Whether the proposal involves violation of Act/Rule/Regulation/Notification of Central/State Government?	NO

Application for ToR (Category A, B1, and B2 Violation)/EC (Category B2) - Form 1

Basic Information

1. Category of the Project/Activity

1.1. Name of the project proposal	1 No. Suagpur Village Patta Land Sand and Sand Gravel Mining Permit Area	
1.2. Type of Proposal	New	
1.3. Whether the Project Activity (Construction/ Operation) has been undertaken without obtaining **prior** Environmental Clearance under the provision of EIA Notification 1994/ 2006?	No	
1.4. Whether multiple items (Components) as per the notification involved in the proposal?	No	
1.4.1. Item No. as per schedule to EIA Notification, 2006	1(a) Mining of minerals	Non-Coal Mining (Minor Minerals-other than river bed mining)
Capacity	0.95	Ha
2. Whether project/activity attracts the General Condition specified in the Schedule of EIA Notification?	No	
3. Whether any Protected Areas Notified Under the Wild Life (Protection) Act, 1972 are located within 10 km of the project site	No	
4. Whether any Severely Polluted Areas as identified by the CPCB from time to time located in proximity to the project site	No	
5. Whether any Critically Polluted Areas as identified by the CPCB from time to time located in proximity to the project site	No	
6. Whether any Notified Eco-Sensitive area notified under Environmental (Protection) Act, 1986 located in proximity to the project site	No	
7. Whether any Inter-State Boundaries and International Boundaries located in proximity to the project site	No	
8. Whether any Eco-sensitive Zone notified/proposed to be notified under Environment (Protection) Act, 1986 located within 10 km of the project site	No	
9. Whether any forest land present within 10 km of the project site	No	
10. Category of the Project as per EIA Notification, 2006	B2	
10.1. Whether proposal is required to be appraised at Central level?	No	
11. Whether Proposal has interlinked / interdependent projects or activities?	No	
11.1. Reason thereof	NA	

12. Whether any Forest Land involved in the project or part thereof	No
13. Whether NBWL recommendation is required?	No

14. Land Acquisition Details

Type of Land	In case of non-forest land, please specify	Type of privately owned land	Type of land in terms of ownership	Supporting documents			Status of Land Acquisition
				Document Name	Remarks	Document	

Project Details

14. Details of CTE

14.1. Whether consent under Air & Water Act has been obtained from SPCB / UTPCC?	No
14.1.1. Reason thereof	NA
15. Whether the project/activity located in Notified Industrial Area?	No
16. Whether the project/activity located in CRZ or ICRZ area?	No
17. Whether the project proposed to be located in Territorial waters (Off-shore)	No
18. Whether project/activity attracts the Specific Condition specified in the Schedule of EIA Notification?	No

Product Details

19. Details of Products & By-products

Name of Product	Product / By Product	Quantity / Capacity	Unit	Mode of Transport / Transmission	Remarks
Sand & Gravel	Product	16.2	Cubic Meter per Day	Road	NA

20. Whether any other Environmental Sensitive area exists within 10 Km from the project/activity boundary?	No

Note : Others, interalia, includes areas protected under international conventions/ Area important or sensitive ecological reasons/ Sensitive species of flora or fauna/ Inland or coastal/Tourist places/ Defence installations / Densely populated areas/ Areas containing important, high quality, or scarce resources/ Areas susceptible to natural Hazards

21. Status of collection of baseline data	Not required as the proposal is under B2 category

Consultant Details

24. Whether QCI/NABET Accredited EIA Consultant engaged?	No
24.1. Reason for not engaging the Consultant	Proposal is under B2 category

Application for ToR (Category A, B1, and B2 Violation)/EC (Category B2) - Form 1

Project Details

1. Introduction of Project or Activity

1.1. Need for the project or activity and its importance to the country/region	Will generate employment and fulfill the demand of minerals in the region
1.2. Demand - Supply Gap and Domestic and export markets, if any	Domestic

2. Social Infrastructure

2.1. Readily available	NA
2.2. Proposed to be developed	NA

3. Connectivity to the project or activity

3.1. Nearest railway station and its distance (in Km)	Khoirabari	14.0
3.2. Nearest Airport and its distance (in Km)	LGB, Guwahati	61.5
3.3. Nearest Town/City/District head quarter and its distance (in Km)	Baksa	32.5
4. Soil classification	P.P. Land	
5. Distance from the HFL of the river in m, if any	0	

6. Benefits of the project

6.1. Social benefits of project or activity	Generate employment
6.2. Financial benefits of project or activity	Economic upliftment

7. Project/ Activity Construction Status	To be Started
7.1. Likely date of start of construction activity (start of mining operations in case of mining proposals)	03/04/2024
7.2. Likely date of completion of construction activity (end of mining operations in case of mining proposals)	30/12/2025

esource Utilization

8. Use of resources for construction or operation of the project

8.1. Whether requirement of water involved in the project?	No
8.2. Whether requirement of Minerals and/or fuels involved in the project?	No
8.3. Construction material	No
8.4. Timber	No

8.5. Electric Power:	No
8.6. Whether any other natural resources / other raw materials required?:	No
8.7. Whether any use of substances or materials, which are hazardous (as per MSIHC rules) to human health or the environment (flora, fauna, and water supplies) required?	No
8.8. Whether any resource efficiency / optimization / recycling and reuse envisaged in the project?	No

Physical Changes

9. Construction, operation or decommissioning of the Project involving actions, which will cause physical changes in the locality:

9.1. Whether any permanent or temporary change in land use, land cover or topography due to project activity?	No
9.2. Whether any clearance of existing vegetation due to project activity?	No
9.3. Whether any loss of native species or genetic diversity?	No
9.4. Whether any demolition works involved in project activity?	No
9.5. Whether any linear structures proposed for diversion or demolition due to project activity? (e.g. roads, transmission lines, rail line, pipeline, conveyor, etc.)	No
9.6. Whether any closure or diversion of existing transport routes or infrastructure due to project leading to changes in traffic movements?	No
9.7. Whether any closure or diversion of water bodies present in project area or realignment of water courses passing through project area?	No
9.8. Whether any dismantling or decommissioning or restoration works or reclamation works (Long-term/ short-term)?	No
9.9. Whether any construction works for temporary use for project activity?	No
9.10. Whether any cut and fill excavations proposed for the project activity?	No
9.11. Whether any underground works including tunnelling?	No
9.12. Whether any dredging involved in project?	No

9.13. Whether any offshore structures involved in project?	No
9.14. Whether any new road, rail, sea, airports, helipad, etc. during construction or operation?	No
9.15. Whether any construction of new linear structures? (e.g. transmission lines, pipelines, etc.)	No
9.16. Whether any Facilities for storage of goods or raw materials?	No
9.17. Whether any Facilities for long term/ permanent housing of operational workers/ staff?	No
9.18. Whether any Impoundment, damming, culverting, realignment or other changes to the hydrology of watercourses or aquifers?	No
9.19. Whether any Stream crossings, temporary and permanent?	No
9.20. Whether any Influx of people to an area in either temporarily or permanently?	No
9.21. Whether any other information would like to submit?	No

Pollution Details

10. Release of pollutants to Air and Mitigation measures

10.1. Whether any probable air pollutants generated?	No
10.2. Other information, if any	NA

10.3. Generation of Noise & Vibration and mitigation measures

10.3.1. Whether any probable generation of Noise and vibration from the proposed project?	No
10.3.2. Whether any probable generation of Light and Heat?	No

10.4. Discharge of pollutants to water and mitigation measures

10.4.1. Whether any probable water pollutants generated?	No
10.5. Probable sources of water pollutant	No

Details of reuse / recycle of wastewater

Details	Qty / Capacity
10.6. Quantity of waste water generation per day (KLD)	0
10.7. Quantity of treated water proposed to use per day (KLD)	0
10.8. Quantity of treated water proposed to discharge outside the premises (KLD)	0

outside the premises (KLD)	0
10.9. Purpose for which treated water is proposed to use	NA
10.10. Whether it is proposed to opt/avail common off-site Sewage Treatment Plant (CSTP)/Effluent Treatment Plant (CETP) facility?	No
10.11. Whether it is proposed to setup on-site Sewage Treatment Plant (STP)/Effluent Treatment Plant (ETP) facility?	No
10.12. Whether the adequacy of the Sewage Treatment Plant (STP) or Effluent Treatment Plant certified by an independent expert?	No
10.12.1. Reasons thereof	NA
10.13. Whether any other mitigation measures proposed?	No
10.14. Whether Dual Plumbing System proposed to be implemented?	No
10.14.1. Reasons thereof	NA
10.15. Whether any discharge of treated effluent involved?	No

Vater Requirements

11. Ground water intersection and water conservation measures:

11.1. Whether ground water table intersection involved in the project activities?	No
11.2. Area category from Groundwater availability perspective?	Safe
11.3. Whether Rainwater harvesting proposed	No
11.4. Whether any other water conservation measures proposed?	No
11.5. Whether the ZLD is proposed?	No

2. Greenbelt

12.1. Area proposed for green belt (in Ha)	0
12.2. Width of green belt (in m) along the boundaryof the project or activity	0
12.3. Percentage of the total area covered under green belt	0
12.4. Details of the species proposed for plantation	Economic and medicinal value plants
12.5. No. of tree saplings to be planted	112
12.6. Funds allocated for plantation in Lakhs.	56000

Vaste Generation

13. Production of wastes during construction or operation or decommissioning

13.1. Whether any generation of Solid waste (domestic wastes)?	No
13.2. Whether any generation of plastic waste?	No
13.3. Whether any generation of e-waste?	No
13.4. Whether any generation of batteries waste?	No
13.5. Whether any generation of Bio-medical waste?	No
13.6. Whether any generation of hazardous wastes (as per Hazardous Waste Management Rules)?	No
13.7. Whether any generation of construction or demolition wastes?	No
13.8. Whether any generation of other wastes?	No
13.9. Whether any generation of surplus products?	No
13.10. Whether measures for waste minimization proposed?	No

Risk Assessment

14. Whether any risks associated with project activities which could affect human health or the environment, -

14.1. From explosions, spillages, fires etc. from storage, handling, use or production of hazardous substances?	No
14.2. From any other causes?	No
14.3. Could the project be affected by natural disasters causing environmental damage (e.g. floods, earthquakes, landslides, cloudburst etc)?	No
14.4. Changes in occurrence of disease or affect disease vectors (e.g. insect or water borne diseases)	No
14.5. Could project adversely affect the wellbeing of people in project area e.g. by changing living conditions?	No
14.6. Vulnerable groups of people who could be adversely affected by the project e.g. hospital patients, children, the elderly etc.	No
14.6.1. Has cumulative risk assessment been performed?	N/A
14.7. Whether any likely impacts of the proposed activity on the existing facilities adjacent to the proposed site due to generation of dust, smoke, odorous fumes or other hazardous gases?	No

15. Factors which should be considered (such as consequential development) which could lead to environmental effects or the potential for cumulative impacts with other existing or planned activities in the locality	
15.1. Whether lead to development of supportive facilities, ancillary development or development stimulated by the project which could have impact on the environment e.g.: Supportive infrastructure (roads, power supply, waste or waste water treatment, etc.); housing development; industries in supply chain and downstream; any other?	No
15.2. Whether lead to after-use of the site, which could have an impact on the environment? (e.g. mine void, dump sites, etc.)	No
15.3. Whether set a precedent for later developments?	No
15.4. Have cumulative effects due to proximity to other existing or planned projects with similar effects?	No
15.5. Whether lead to growth of alien species, if any?	No
15.6. Is there any threat of the project to the biodiversity (including displacement of fauna-both terrestrial and aquatic and avi-fauna or creation of barriers for their movement)?	No
15.7. Will the proposed project in any way result in the obstruction of a view, scenic amenity or landscapes?	No
15.8. Is there any impact on anthropological or archaeological sites or any important site feature in the vicinity of the proposed site have been considered?	No
15.9. Will the proposed project result in any changes to the demographic structure of local population?	No
15.10. Will the project cause adverse effect on local communities, disturbance to sacred sites or other cultural values?	No

16. Mining Proposals

16.1. Details of Letter of Intent (LoI) / Vesting order / Mining Lease

16.1.1. Date of issue of LoI/Vesting order/Minning Lease	30/12/2023
16.1.2. Validity of the LoI/Vesting order	30/12/2025
16.1.3. Lease Period	02/00
16.1.4. Date of expiry of lease	30/12/2025
16.1.5. Lease area (in Ha) as per LoI/Vesting order/Mining Lease	0.95
16.1.6. Production capacity (in MTPA) as per LoI / Vesting Order / Mining lease, if any prescribed	0.0097
16.1.7. Details of Lease renewal(s), if any	NA
16.1.8. Other information, if any	NA

16.1. Status of approval of Mining plan	Approved

17. Minerals to be mined

Name of Mineral	Classification	Production Capacity	Remarks
Sand & Gravel	Minor	0.0097	NA

18. Details of Total excavation (RoM) including Topsoil, Overburden, Mining waste, Rejects, etc.

18.1. Total excavation in MTPA	0.0097
18.2. Total Excavation in M.Cu.m/Annum	0.004
18.3. Enter stripping Ratio	00:00
18.4. Other information, if any	NA

9. Mineral Reserves

Name of Mineral	Proved Reserves	Indicated Reserves	Inferred Reserves	Mineable Reserves	Remarks
Sand & Gravel	0.03	0.03	0.03	0.0195	

20. Life of Mine (Years)

20.1. Life of the mine as per approved mining plan	02/00
20.2. Life of the mine as per total estimated reserves, if any	02/00
20.3. Other information, if any	NA

21. Type and method of Mining Method

21.1. Type of mining	Opencast
21.2. Method of mining	Semi-mechanized
21.3. Other information, if any	NA

22. Type of blasting, if any, to be adopted

22.1. Type of blasting	NA
22.2. Mitigation measures for control of blast induced vibrations	NA
22.3. Other information, if any	NA

23. Whether it is proposed to install beneficiation plant/Coal washery within the mining lease area?	No
24. Whether it is proposed to install crusher within the	No

mining lease area?	No

25. Dumping strategy

Description	Area in Ha	Maximum height in m	Remarks
External dump	0	0	NA
Internal dump	0	0	NA
Topsoil dump/ storage	0	0	NA

26. Topsoil management

26.1. Total Topsoil excavated during the entire life of the mine (in Million Cubic Meter)	0
26.2. Utilization strategy of topsoil	NA
26.3. Other information, if any	NA

27. Details of the Quarry/Mine Pit

Government of India
Ministry of Environment, Forest and Climate Change
(Issued by the State Environment Impact Assessment Authority (SEIAA), ASSAM)
***

Minutes of 22th SEIAA Meeting State Environment Impact Assessment Authority meeting held from 08/10/2024 to 08/10/2024

Date: 15/10/2024

MoM ID: EC/MOM/SEIAA/250686/10/2024

Agenda ID: EC/AGENDA/SEIAA/250686/10/2024

Meeting Venue: Pollution Control Board Assam, 3rd floor, Bamunimaidum - 21

Meeting Mode: Physical

Date & Time:

07/10/2024	11:00 AM	03:00 PM

1. Opening remarks

The Member Secretary, SEIAA welcomed the Chairman, SEIAA and the Member of regulatory body. She briefed the house about the agenda for the meeting for deliberation and to expedite disposal of the recommended proposals by SEAC, Assam.

2. Confirmation of the minutes of previous meeting

As per the agenda, the regulatory body duly reviewed the Minutes of the 18th SEIAA Meetings held on 27/09/2024.

3. Details of proposals considered by the committee

Day 1 -08/10/2024

3.1. Agenda Item No 1:

3.1.1. Details of the proposal

JHANJI PADUMONI MCA by **DIVISIONAL FOREST OFFICE JORHAT DIVISION** located at **JORHAT,ASSAM**			
Proposal For		Mining EC Under 5 Ha	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/458443/2024	SEIAA3663/2024	11/01/2024	Mining of minerals (1(a))

3.1.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :23/02/2024

Deliberations of SEAC 1 :

sary documents submitted in support of the proposal is placed before the Committee for examination and isal. The NOC from the Water Resources' Department concerned is not furnished.

erations:

iscussions and deliberations is held.

Committee after due deliberation and appraisal is of the opinion for allowing extraction of the Minor al for a quantum of **30,000**cum of **Sand** @ **15,000** cu m **annually.** This is subject to the conditions that oponent shall have to strictly follow all terms and conditions laid down in the approved mining plan and ubject to the conditions that: (a) mining shall be confined and limited to the area falling within the d GPS coordinates ; (b) the active bank of the river is not disturbed / damaged because of mining tion and transportation of mining materials and (c)the Proponent shall extract / harvest the approved ity of minerals indicated herein with maximum mining depth of up to 2 (two) meters only from the non-l surface.

Date of SEAC 2 :09/09/2024

Deliberations of SEAC 2 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The NOC from the Water Resources Department dated 15.07.2024 from Executive Engineer, Jorhat Water Resources Division is furnished.

It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the infrastructure development in progress specially to strengthen the road network connectivity which is a *sine qua non* for overall development and economic growth of the state with far reaching ramifications while the impact on environment also require due diligence and consideration with proper safeguards. It is further appreciated that the important stakeholders like the Registered Qualified Person (RQP), Geologist from the Department of Geology and Mining, the Forest official, the official from the the District Revenue Department are actively involved in the process for recommending mining in the area by way of consultation including detailed site inspection of the area by the officials before appraisal by the SEAC.

It is further appreciated that the draft DSR for the Sustainable Sand Mining and Management Guideline as prepared for the district has been placed in the Public domain before finalization and further submission to the SEAC for evaluation and appraisal.

The Committee after due deliberation and appraisal is of the opinion for allowing extraction of the Minor Mineral for a quantum of 10,000 Cu M of Sand in 1 (one) Year. This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan and also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates ; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials and (c) the Proponent shall extract / harvest the approved quantity of minerals indicated herein with maximum mining depth of up to 2 (two) meters only from the non mined surface; (d) the DFO shall place the DSR for evaluation and appraisal by the SEAC for further approval by the SEIAA and on the basis of the approved DSR the proponent may come forward for the balance quantity remaining if found permissible for mining.

3.1.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 04.69Ha and mining area 03.69Ha with quantity of 10,000 cum in 1 (one) year subject to the terms and conditions laid down by SEAC and the DFO shall place the DSR for evaluation and appraisal by the SEAC for further approval by the SEIAA and on the basis of the approved DSR the proponent may come forward for the balance quantity remaining if found permissible for mining.

3.1.4. Recommendation of SEIAA

Approved

3.1.5. Details of Environment Conditions

3.1.5.1. Specific

SPECIFIC CONDITIONS BY SEAC	
1.	i) The DFO shall comply with necessary formalities for transfer of the EC to the lessee with due NOC for filing application to the SEIAA before allowing mining so that the entire accountability in mining is vested on the Lessee / Proponent with the same terms and conditions stipulated in the EC as per the EIA Notification, 2006. ii) Consent to Establish (CTE) and Consent to Operate (CTO) shall be obtained by the Proponent from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which will be adhered to by the concerned DFO. iii) The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. iv) The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan before allowing mining. v) CSR activities shall be carried out / undertaken by the Proponent and minimum 2% of the total project cost (**Rs 2.00 Lakh**) shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the near by existing school 1 and (one) village with due consultation with the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 2 (two) years of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report. vi) Plantation activities shall be carried out / undertaken in any educational institution or Govt lands involving local NGOs, School / College students and an amount of Rs **3 L** (Three Lakh) shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of Aesthetic value, Medicinal value, of Evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Nahar (*Mesua ferrea*), Agor (*Aquillaria malaccensis*), Amlokhi (*Phyllantus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*), Bael (*Aegle marmelo*s), Bokphul (*Sesbania grandiflora*), Mohaneem (*Azedirachta indica*), Jamun (*Syzygium cuminii*), Kordoi (*Averrhoa carambola*), Arjun (Terminalia arjuna), Sewali phul (*Nyctanthes arbor tris tis*), Giloi (*Tinospora cordifolia*),Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*)etc etc vii) Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.1.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.

1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee.
1.	The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC.
1.	Validity of EC is as per life of the mine mentioned in EC letter.
Air quality monitoring and mitigation measure	
1.	Adequate ambient air quality monitoring stations shall be established in the core zone as well as in the buffer zone for monitoring of pollutants, namely particulates, SO2 and NOx. Location of the stations shall be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive receptors in consultation with the State Pollution Control Board. Online ambient air quality monitoring station/stations may also be installed in addition to the regular air monitoring stations as per the requirement and/or in consultation with the SPCB
1.	Major approach roads shall be properly maintained with dust suppression measures and the river bank in any case must not be damaged.
1.	The transportation of materials shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the materials through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.
1.	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
Water quality monitoring and mitigation measures	
1.	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
1.	The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.
1.	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the mine site upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.
Noise and Vibration monitoring and prevention	
1.	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the

	Ministry/RO on six-monthly basis.
Mining Plan	
1.	Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable.
1.	No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
1.	Mining shall be carried out as per the approved mining plan (including Mine Closure Plan) abiding by mining laws.
1.	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.
1.	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.
Land Recalmation	
1.	Native tree species shall be selected and planted over areas affected by subsidence.
Public hearing and Human health issues	
1.	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
1.	PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
1.	PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
1.	PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius
Corporate Environment Responsibility	
1.	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders.
1.	Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Miscellaneous	
1.	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent’s website permanently.
1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local

	bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
1.	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours

3.2. Agenda Item No 2:

3.2.1. Details of the proposal

JHANJI TETELIGURI MCA by **DIVISIONAL FOREST OFFICE JORHAT DIVISION** located at **JORHAT,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/453694/2023	SEIAA 3735/2024	20/03/2024	Mining of minerals (1(a))

3.2.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :30/04/2024

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. It is revealed that the proposed mining area is located at a distance of nearly 500 m away from the boundary of the nearest Protected Area (PA) thereby meaning that the proposed mining area is falling in the Eco Sensitive Zone (ESZ) and mining activity falling in such areas are categorized as prohibited activities. Due deliberations and discussions are held and the Committee is of the considered opinion to have the detailed clarification from the DFO concerned to have a clarification with cogent reasons for accepting such proposal for allowing mining, a prohibited activity otherwise.

Decision: ***The Committee is of the considered opinion to have the detailed clarification from the DFO concerned, with cogent reasons, for accepting such a proposal for allowing mining, a prohibited activity otherwise as falling in the ESZ***.

Date of SEAC 2 :09/09/2024

Deliberations of SEAC 2 :

Current Deliberations:

This is a Govt work-construction of 4 laning- Jorhat to Jhanji NH 37 by the NHIDCL to the effect of which a request has been made by the concerned authority.

Point-wise ADS reply are received at SEAC.

The NOC from the Water Resources Department dated 31.05.2024 from the Executive Engineer, Jorhat Water Resources Division is furnished.

Also clarification from DFO, Jorhat that the proposed Jhanji Teteliguri Mining Concession Area is located at a distance 16 KM from the Eco Sensitive Zone of Hollongapar Gibbon Wildlife Sanctuary which is the nearest Protected Area from the the proposed Jhanji Teteliguri MCA with photographic evidences is received.

It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the development of infrastructure in progress specially to strengthen the road network connectivity which is a *sine qua non* for overall development and economic growth of the state while the impact on environment also require due diligence and consideration with proper safeguards. It is further appreciated that the important stakeholders like the Registered Qualified Person (RQP), Geologist from the Department of Geology and Mining, the Forest official, the official from the Water Resource Department are actively involved in the process for recommending mining in the area by way of consultation including site inspection before appraisal by the SEAC.

It is further appreciated that the draft DSR for the Sustainable Sand Mining and Management Guideline as prepared for the district has been placed in the Public domain before finalization and further submission to the SEAC for evaluation and appraisal.

The Committee after due deliberation and appraisal is of the opinion for allowing extraction of the Minor Mineral for a quantum of 10,000 Cu M of Sand in 1 (one) Year only. This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan and also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates ; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials and (c) the Proponent shall extract / harvest the approved quantity of minerals indicated herein with maximum mining depth of up to 2 (two) meters only from the non mined surface;(d) the DFO shall place the DSR for evaluation and appraisal by the SEAC for further approval by the SEIAA and on the basis of the approved DSR the proponent may come forward for the balance quantity of Sand remaining if found permissible for mining in terms of the approved DSR.

Decision: Recommended for grant of EC for 1 (one) year for extraction of 10,000 Cu M Sand.

3.2.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 3.45Ha and mining area 2.74Ha with quantity of 10,000 cum in 1 (one) year subject to the terms and conditions laid down by SEAC and the DFO shall place the DSR for evaluation and appraisal by the SEAC for further approval by the SEIAA and on the basis of the approved DSR the proponent may come forward for the balance

quantity remaining if found permissible for mining.

3.2.4. Recommendation of SEIAA

Approved

3.2.5. Details of Environment Conditions

3.2.5.1. Specific

SPECIFIC CONDITIONS BY SEAC	
1.	i) The DFO shall comply with necessary formalities for transfer of the EC to the lessee with due NOC for filing application to the SEIAA before allowing mining so that the entire accountability in mining is vested on the Lessee / Proponent with the same terms and conditions stipulated in the EC as per the EIA Notification, 2006. ii) Consent to Establish (CTE) and Consent to Operate (CTO) shall be obtained by the Proponent from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which will be adhered to by the concerned DFO. iii) The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. iv) The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan before allowing mining. v) CSR activities shall be carried out / undertaken by the Proponent and minimum 2% of the total project cost (**Rs 2.00 Lakh**) shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the near by existing school 1 and (one) village with due consultation with the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 2 (two) years of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report. vi) Plantation activities shall be carried out / undertaken in any educational institution or Govt lands involving local NGOs, School / College students and an amount of Rs **3 L** (Three Lakh) shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of Aesthetic value, Medicinal value, of Evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Nahar (*Mesua ferrea*), Agor (*Aquillaria malaccensis*), Amlokhi (*Phyllantus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*), Bael (*Aegle marmelos*), Bokphul (*Sesbania grandiflora*), Mohaneem (*Azedirachta indica*), Jamun (*Syzygium cuminii*), Kordoi (*Averrhoa carambola*), Arjun (Terminalia arjuna), Sewali phul (*Nyctanthes arbor tris tis*), Giloi (*Tinospora cordifolia*),Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*)etc etc vii) Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.2.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The Environmental clearance shall be subject to orders of Hon’ble Supreme Court of India, Hon’ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project

1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee.
1.	The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC.
1.	Validity of EC is as per life of the mine mentioned in EC letter.
Air quality monitoring and mitigation measure	
1.	Adequate ambient air quality monitoring stations shall be established in the core zone as well as in the buffer zone for monitoring of pollutants, namely particulates, SO2 and NOx. Location of the stations shall be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive receptors in consultation with the State Pollution Control Board. Online ambient air quality monitoring station/stations may also be installed in addition to the regular air monitoring stations as per the requirement and/or in consultation with the SPCB
1.	Major approach roads shall be properly maintained with dust suppression measures and the river bank in any case must not be damaged.
1.	The transportation of materials shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the materials through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.
1.	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
Water quality monitoring and mitigation measures	
1.	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
1.	The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.
1.	Garland drains (of suitable size, gradient and length) around the critical areas i.e. mine shaft and low lying areas, shall be designed keeping at least 50% safety margin over and above the peak sudden rainfall and maximum discharge in the area adjoining the mine sites. The sump capacity shall also provide adequate retention period to allow proper settling of silt material of the surface runoff
1.	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the mine site upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.
Noise and Vibration monitoring and prevention	

1.	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.

The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders.
1.	Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.

Miscellaneous	
1.	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently.
1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
1.	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours

3.3. Agenda Item No 3:

3.3.1. Details of the proposal

Jatinga River (Dolaichunga) Sand, Gravel & Boulder Mining Permit Area by **dima hasao forest division(west)** lo cated at **DIMA HASAO,ASSAM**	
Proposal For	Fresh EC

Proposal No	File No	Submission Date	Activity (Schedule Item)
SIA/AS/MIN/483538/2024	SEAC/SEIAA 3862/2024	24/06/2024	Mining of minerals (1(a))

3.3.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :09/09/2024

Deliberations of SEAC 1 :

Due deliberations and discussions are held.

The NOC from the Water Resources' Department dated 11.06.2024 from Executive Engineer, Dima Hasao Water Resources Division is furnished.

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized.

The Committee is of the opinion to urge the DFO for taking requisite steps to complete the preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG'2016 and EMGSM'2020} and place the same for appraisal and final approval by the competent authority.

It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the development of infrastructure in progress specially to strengthen the road network connectivity which is a *sine qua non* for overall development and economic growth of the state while the impact on environment also require due diligence and consideration with proper safeguards. It is further appreciated that the important stakeholders like the Registered Qualified Person (RQP), Geologist from the Department of Geology and Mining, the Forest official, the official from the Water Resource Department are actively involved in the process for recommending mining in the area by way of consultation including site inspection before appraisal by the SEAC.

The Committee deem it appropriate to recommend the grant of EC by the SEIAA allowing extraction and harvesting of minor mineral for 1 (one) year, as recommended in the mining plan, with the quantity of quantity of **32,000 Cu M** of Sand, Gravel & Boulder in 1(one) year @ **Sand 11,000 Cu M**; @ **Gravel 12,000 Cu M** and @ **Boulder 9,000 Cu M** with an observation that the DFO, Dima Hasao shall submit the approved DSR from the competent authority for further consideration of the balance quantity for further consideration of the project allowing mining by the proponent within a period of 1 (one) year and that the area in question is reflected in the DSR. This is necessitated in view of the process of development works being undertaken by the NHAI, a Govt of India undertaking as has been communicated by the concerned competent authority.

Decision: Recommended for grant of EC for **1 (one)** year only for **32,000 Cu M** of Sand, Gravel & Boulder.

3.3.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 4.91Ha and mining area 4.36Ha with quantity of 32,000 Cu M of Sand, Gravel & Boulder in 1(one) year @ Sand 11,000 Cu M; @ Gravel 12,000 Cu M and @ Boulder 9,000 Cu M subject to the terms and conditions laid down by SEAC and the DFO shall place the DSR for evaluation and appraisal by the SEAC for further approval by the SEIAA and on the basis of the approved DSR the proponent may come forward for the balance quantity remaining if found permissible for mining.

3.3.4. Recommendation of SEIAA

Approved

3.3.5. Details of Environment Conditions

3.3.5.1. Specific

GENERAL CONDITIONS BY SEAC	
1.	1. This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan; 2. This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates ; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials and (c) the Proponent shall extract / harvest the approved quantity of minerals indicated herein with maximum mining depth of up to 2 (two) meters only from the non-mined surface (d) the DFO shall place the DSR for evaluation and appraisal by the SEAC for further approval by the SEIAA and on the basis of the approved DSR the proponent may come forward for the balance quantity remaining if found permissible for mining.
SPECIFIC CONDITIONS BY SEAC	
1.	• Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO. • The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. • The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan before allowing mining. • CSR activities shall be carried out / undertaken by the Proponent and 2% of the total project cost Rs **3.00 Lakh (Three Lakh) only** shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the near by village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st year of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report. • Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands involving local NGOs, School / College students and an amount of Rs 2.00 (two) Lakh shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. • The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Agor (*Aquillaria malaccensis*), Amlokhi (*Phyllantus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*), Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*), Mohaneem (*Azedirachta indica*), Jamun (*Syzygium cuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpus integrifolia*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*) etc etc. Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.3.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.

1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee.
1.	The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC.
1.	Validity of EC is as per life of the mine mentioned in EC letter.
Air quality monitoring and mitigation measure	
1.	Adequate ambient air quality monitoring stations shall be established in the core zone as well as in the buffer zone for monitoring of pollutants, namely particulates, SO2 and NOx. Location of the stations shall be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive receptors in consultation with the State Pollution Control Board. Online ambient air quality monitoring station/stations may also be installed in addition to the regular air monitoring stations as per the requirement and/or in consultation with the SPCB
1.	Major approach roads shall be properly maintained with dust suppression measures and the river bank in any case must not be damaged.
1.	The transportation of materials shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the materials through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.
1.	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
Water quality monitoring and mitigation measures	
1.	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
1.	The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.
1.	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the mine site upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.
Noise and Vibration monitoring and prevention	
1.	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.

Mining Plan	
1.	Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable.
1.	No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
1.	Mining shall be carried out as per the approved mining plan (including Mine Closure Plan) abiding by mining laws.
1.	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.
1.	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.
Land Recalmation	
1.	Native tree species shall be selected and planted over areas affected by subsidence.
Public hearing and Human health issues	
1.	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
1.	PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
1.	PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
1.	PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius
Corporate Environment Responsibility	
1.	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders.
1.	Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Miscellaneous	
1.	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently.
1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.

1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
1.	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours

3.5.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :09/09/2024

Deliberations of SEAC 1 :
Due deliberations and discussions are held.
The NOC from the Water Resources' Department dated 11.06.2024 from Executive Engineer, Dima Hasao Water Resources Division is furnished.
Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized.
The Committee is of the opinion to urge the DFO for taking requisite steps to complete the preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} and place the same for appraisal and final approval by the competent authority.
It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the development of infrastructure in progress specially to strengthen the road network connectivity which is a *sine qua non* for overall development and economic growth of the state while the impact on environment also require due diligence and consideration with proper safeguards. It is further appreciated that the important stakeholders like the Registered Qualified Person (RQP), Geologist from the Department of Geology and Mining, the Forest official, the official from the Water Resource Department are actively involved in the process for recommending mining in the area by way of consultation including site inspection before appraisal by the SEAC.
The Committee deem it appropriate to recommend the grant of EC by the SEIAA allowing extraction and harvesting of minor mineral for 1 (one) year, as recommended in the mining plan, with the quantity of **34,000** Cu M of Sand Gravel & Boulder @ **Sand 13,000 Cu M** , @ **Gravel 12,000 Cu M**, @ **Boulder 9,000 Cu M**. with an observation that the DFO, Dima Hasao shall submit the approved DSR from the competent authority for further consideration of the balance quantity for further consideration of the project allowing mining by the proponent within a period of 1 (one) year and that the area in question is reflected in the DSR. This is necessitated in view of the process of development works being undertaken by the NHAI, a Govt of India undertaking as has been communicated by the concerned competent authority.
Decision: Recommended for grant of EC for **1 (one)** year only for **34,000** Cu M of Sand, Gravel & Boulder.

3.5.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 4.32Ha and mining area 3.74Ha with quantity of 34,000 Cu M of Sand Gravel & Boulder in 1 (one) year @ Sand 13,000 Cu M , @ Gravel 12,000 Cu M, @ Boulder 9,000 Cu M subject to the terms and conditions laid down by SEAC and the DFO shall place the DSR for evaluation and appraisal by the SEAC for further approval by the SEIAA and on the basis of the approved DSR the proponent may come forward for the balance quantity remaining if found permissible for mining.

3.5.4. Recommendation of SEIAA

Approved

3.5.5. Details of Environment Conditions

3.5.5.1. Specific

SPECIFIC CONDITIONS BY SEAC	
1.	• Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO. • The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. • The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan before allowing mining. • CSR activities shall be carried out / undertaken by the Proponent and 2% of the total project cost Rs **3.00**

	Lakh (Three Lakh) only shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the near by village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st year of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report. • Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands involving local NGOs, School / College students and an amount of Rs 2.00 (two) Lakh shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. • The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Agor (*Aquillaria malaccensis*), Amlokhi (*Phyllantus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*), Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*), Mohaneem (*Azedirachta indica*), Jamun (*Syzygium cuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpus integrifolia*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*) etc etc. Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.
GENERAL CONDITIONS BY SEAC	
1.	1. This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan; 2. This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates ; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials and (c) the Proponent shall extract / harvest the approved quantity of minerals indicated herein with maximum mining depth of up to 2 (two) meters only from the non-mined surface (d) the DFO shall place the DSR for evaluation and appraisal by the SEAC for further approval by the SEIAA and on the basis of the approved DSR the proponent may come forward for the balance quantity remaining if found permissible for mining.

3.5.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee.
1.	The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC.
1.	Validity of EC is as per life of the mine mentioned in EC letter.
Air quality monitoring and mitigation measure	
1.	Adequate ambient air quality monitoring stations shall be established in the core zone as well as in the buffer zone for monitoring of pollutants, namely particulates, SO2 and NOx. Location of the stations shall be decided based

	on the meteorological data, topographical features and environmentally and ecologically sensitive receptors in consultation with the State Pollution Control Board. Online ambient air quality monitoring station/stations may also be installed in addition to the regular air monitoring stations as per the requirement and/or in consultation with the SPCB
1.	Major approach roads shall be properly maintained with dust suppression measures and the river bank in any case must not be damaged.
1.	The transportation of materials shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the materials through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.
1.	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
Water quality monitoring and mitigation measures	
1.	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
1.	The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.
1.	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the mine site upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.
Noise and Vibration monitoring and prevention	
1.	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.
Mining Plan	
1.	Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable.
1.	No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
1.	Mining shall be carried out as per the approved mining plan (including Mine Closure Plan) abiding by mining laws.
1.	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation)

	Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.
1.	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.
Land Recalmation	
1.	Native tree species shall be selected and planted over areas affected by subsidence.
Public hearing and Human health issues	
1.	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
1.	PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
1.	PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
1.	PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius
Corporate Environment Responsibility	
1.	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders.
1.	Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Miscellaneous	
1.	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently.
1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.

1.	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours

3.6. Agenda Item No 6:

3.6.1. Details of the proposal

Jatinga River (Muyungkro) Sand, Gravel & Boulder Mining Permit Area by **dima hasao forest division(west)** located at **DIMA HASAO,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/483828/2024	SEAC/SEIAA3866/2024	25/06/2024	Mining of minerals (1(a))

3.6.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :09/09/2024

Deliberations of SEAC 1 :

Due deliberations and discussions are held.

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized.

The Committee is of the opinion to urge the DFO for taking requisite steps to complete the preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} and place the same for appraisal and final approval by the competent authority.

It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the development of infrastructure in progress specially to strengthen the road network connectivity which is a *sine qua non* for overall development and economic growth of the state while the impact on environment also require due diligence and consideration with proper safeguards. It is further appreciated that the important stakeholders like the Registered Qualified Person (RQP), Geologist from the Department of Geology and Mining, the Forest official, the official from the Water Resource Department are actively involved in the process for recommending mining in the area by way of consultation including site inspection before appraisal by the SEAC.

The Committee deem it appropriate to recommend the grant of EC by the SEIAA allowing extraction and harvesting of minor mineral for 1 (one) year, as recommended in the mining plan, with the quantity of **31,993** Cu M of Sand, Gravel & Boulder with an observation that the DFO, Dima Hasao shall submit the approved DSR from the competent authority for further consideration of the balance quantity for further consideration of the project allowing mining by the proponent within a period of 1 (one) year and that the area in question is reflected in the DSR. This is necessitated in view of the process of development works being undertaken by the NHAI, a Govt of India undertaking as has been communicated by the concerned competent authority.

Decision: Recommended for grant of EC for **1 (one)** year only for **30,000 Cu M** of Sand, Gravel & Boulder @ **11,000 Cu M Sand**, @ **11,000 Cu M Gravel** and @ **8,000 Cu M** of Boulder.

3.6.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 3.85Ha and mining area 3.46Ha with quantity of 30,000 Cu M of Sand, Gravel & Boulder for 1 (one) year @ 11,000 Cu M Sand, @ 11,000 Cu M Gravel and @ 8,000 Cu M of Boulder subject to the terms and conditions laid down by SEAC and the DFO shall place the DSR for evaluation and appraisal by the SEAC for further approval by the SEIAA and on the basis of the approved DSR the proponent may come forward for the balance quantity remaining if found permissible for mining.

3.6.4. Recommendation of SEIAA

Approved

3.6.5. Details of Environment Conditions

3.6.5.1. Specific

GENERAL CONDITIONS BY SEAC	
1.	1. This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan; 2. This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials and (c) the Proponent shall extract / harvest the approved quantity of minerals indicated herein with maximum mining depth of up to 2 (two) meters only from the non-mined surface. (d) the DFO shall place the DSR for evaluation and appraisal by the SEAC for further approval by the SEIAA and on the basis of the approved DSR the proponent may come forward for the balance quantity remaining if found

	permissible for mining.
SPECIFIC CONDITIONS BY SEAC	
1.	• Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO. • The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. • The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan before allowing mining. • CSR activities shall be carried out / undertaken by the Proponent and 2% of the total project cost **Rs 3.00 Lakh** (Three Lakh) only, shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the near by village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st year of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report. • Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands involving local NGOs, School / College students and an amount of Rs 2.00 (two) Lakh shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. • The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Agor(*Aquillaria malaccensis*), Amlokhi (*Phyllantus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*), Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*), Mohaneem (*Azedirachta indica*), Jamun (*Syzygium cuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpus integrifolia*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*) etc etc. Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.6.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project

3.7. Agenda Item No 7:

3.7.1. Details of the proposal

Jatinga River (Lampu) Sand, Gravel & Boulder Mining Permit Area by **dima hasao forest division(west)** located at **DIMA HASAO,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/485516/2024	SEAC/SEIAA 3867/2024	02/07/2024	Mining of minerals (1(a))

3.7.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :09/09/2024

Deliberations of SEAC 1 :

Due deliberations and discussions are held.

The NOC from the Water Resources' Department dated 11.06.2024 from Executive Engineer, Dima Hasao Water Resources Division is furnished.

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized.

The Committee is of the opinion to urge the DFO for taking requisite steps to complete the preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG'2016 and EMGSM'2020} and place the same for appraisal and final approval by the competent authority.

It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the development of infrastructure in progress specially to strengthen the road network connectivity which is a *sine qua non* for overall development and economic growth of the state while the impact on environment also require due diligence and consideration with proper safeguards. It is further appreciated that the important stakeholders like the Registered Qualified Person (RQP), Geologist from the Department of Geology and Mining, the Forest official, the official from the Water Resource Department are actively involved in the process for recommending mining in the area by way of consultation including site inspection before appraisal by the SEAC.

The Committee deem it appropriate to recommend the grant of EC by the SEIAA allowing extraction and harvesting of minor mineral for 1 (one) year, as recommended in the mining plan, with the quantity of **29,000** Cu M of Sand Gravel & Boulder@ **Sand 12,000 Cu M**, @ **Gravel 10,000 Cu M**, @ **Boulder 7,000 Cu M**. with an observation that the DFO, Dima Hasao shall submit the approved DSR from the competent authority for further consideration of the balance quantity for further consideration of the project allowing mining by the proponent within a period of 1 (one) year and that the area in question is reflected in the DSR. This is necessitated in view of the process of development works being undertaken by the NHAI, a Govt of India undertaking as has been communicated by the concerned competent authority.

Decision: Recommended for grant of EC for **1 (one)** year only for **29,000** Cu M of Sand, Gravel & Boulder.

3.7.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 3.82Ha and mining area 3.21Ha with quantity of 29,000 Cu M of Sand, Gravel & Boulder for 1 (one) year @ Sand 12,000 Cu M, @ Gravel 10,000 Cu M, @ Boulder 7,000 Cu M subject to the terms and conditions laid down by SEAC and the DFO shall place the DSR for evaluation and appraisal by the SEAC for further approval by the SEIAA and on the basis of the approved DSR the proponent may come forward for the balance quantity remaining if found permissible for mining.

3.7.4. Recommendation of SEIAA

Approved

3.7.5. Details of Environment Conditions

3.7.5.1. Specific

SPECIFIC CONDITIONS BY SEAC	
1.	• Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO. • The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. • The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan before allowing mining. • CSR activities shall be carried out / undertaken by the Proponent and 2% of the total project cost Rs 2**.00**

	Lakh (Two Lakh) onlyshall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the near by village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st year of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report. • Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands involving local NGOs, School / College students and an amount of Rs 2.00 (two) Lakh shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. • The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Agor(*Aquillaria malaccensis*), Amlokhi (*Phyllantus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*), Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*), Mohaneem (*Azedirachta indica*), Jamun (*Syzygium cuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpus integrifolia*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*) etc etc. Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.7.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee.
1.	The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC.
1.	Validity of EC is as per life of the mine mentioned in EC letter.
Air quality monitoring and mitigation measure	
1.	Adequate ambient air quality monitoring stations shall be established in the core zone as well as in the buffer zone for monitoring of pollutants, namely particulates, SO2 and NOx. Location of the stations shall be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive receptors in consultation with the State Pollution Control Board. Online ambient air quality monitoring station/stations may also be installed in addition to the regular air monitoring stations as per the requirement and/or in consultation with the SPCB
1.	Major approach roads shall be properly maintained with dust suppression measures and the river bank in any case must not be damaged.
1.	The transportation of materials shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the materials through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.

1.	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
Water quality monitoring and mitigation measures	
1.	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
1.	The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.
1.	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the mine site upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.
Noise and Vibration monitoring and prevention	
1.	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.
Mining Plan	
1.	Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable.
1.	No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
1.	Mining shall be carried out as per the approved mining plan (including Mine Closure Plan) abiding by mining laws.
1.	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.
1.	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.
Land Recalmation	
1.	Native tree species shall be selected and planted over areas affected by subsidence.
Public hearing and Human health issues	
1.	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient

	supply of drinking water for all the persons employed.
1.	PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
1.	PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
1.	PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius
Corporate Environment Responsibility	
1.	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders.
1.	Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Miscellaneous	
1.	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently.
1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
1.	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.

1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours

3.8. Agenda Item No 8:

3.8.1. Details of the proposal

Borjuri No.2 P.P. Land Stone M.C. Area by **anil thakur** located at **KARBI ANGLONG,ASSAM**			
Proposal For		Application for Validity Extension of EC- Form-6	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/489246/2024	SEIAA.1787/2021/EC/17/1502	22/07/2024	Mining of minerals (1(a))

3.8.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :09/09/2024

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized.

Due deliberations and discussions are held.

The Committee is of the opinion to urge for taking requisite steps to conduct preparation of the District Survey Report (DSR) for the District by the DFO in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC. The instant proposal needs to be incorporated in the DSR under preparation after due study.

The Committee after due deliberation and appraisal is of the opinion for allowing extraction of the Minor Mineral for a quantum of **10,500** Cu M of **Stone** in **1 (one)** year. This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan and also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates; (b) the PP shall extract the approved quantity of minerals indicated herein with maximum mining depth of up to 2 (two) meters only from the non-mined surface; (c) no-explosives shall be used without prior permission of the competent authority for extraction of stone from the proposed mining area and (d) the DFO shall place the DSR for evaluation and appraisal by the SEAC for further approval by the SEIAA and on the basis of the approved DSR the proponent may come forward for the balance quantity of mineral remaining if found permissible for mining in terms of the approved DSR.

Decision: Recommended grant of the **EC for 1 (one) Year for 10,500 Cu M**.

3.8.3. Deliberations by the SEIAA in current meetings

Extension of EC is approved for project area allotted 3.6Ha with quantity of 10,500Cu M of stone for 1 (one) year subject to the terms and conditions laid down by SEAC and the DFO shall place the DSR for evaluation and appraisal by the SEAC for further approval by the SEIAA and on the basis of the approved DSR the proponent may come forward for the balance quantity remaining if found permissible for mining in terms of the approved DSR.

3.8.4. Recommendation of SEIAA

Approved

3.8.5. Details of Environment Conditions

3.8.5.1. Specific

SPECIFIC CONDITIONS BY SEAC	
1.	i) Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO. ii) The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. iii) The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan beforehand allowing mining. iv) CSR activities shall be carried out / undertaken by the Proponent and 2% of the total project cost (**Rs 1.80** Lakh) shall be earmarked for the purposes. Necessary drinking water facilities and provision for solar lights shall be made in the near by existing village. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within time of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report. v) Plantation activities shall be carried out / undertaken in nearby educational institutions / public places and an amount **of Rs 2 (two)** Lakh shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen in nature under the guidance of the DFO and label the plant species for the benefits of the school students /public. The recommended species of plants in the locality could be of species like Amlokhi (*Phyllantus emblica*), Hilikha (*Terminalia chebula*), Bael(*Aegle marmelos*), Jalphai (*Elaeocarpus floribundus*),Arjun (*Terminalia arjuna*), Thekera (*Garcinia pedunculata, Garcinia morella*), Leteku (*Baccaurea rammiflora*), Siris (*Albizzia procera*), Jamun (*Syzygium cuminii*), Khair (*Acacia catechu*), Sissoo (*Dalbergia sissoo*), Kathal (*Artocarpus integrifolia*) etc etc. Compliance of the same shall duly be uploaded by the Proponent in the **PARIVESH** portal.

3.8.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee.
1.	The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC.

1.	Validity of EC is as per life of the mine mentioned in EC letter.
Air quality monitoring and mitigation measure	
1.	Adequate ambient air quality monitoring stations shall be established in the core zone as well as in the buffer zone for monitoring of pollutants, namely particulates, SO2 and NOx. Location of the stations shall be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive receptors in consultation with the State Pollution Control Board. Online ambient air quality monitoring station/stations may also be installed in addition to the regular air monitoring stations as per the requirement and/or in consultation with the SPCB
1.	Major approach roads shall be properly maintained with dust suppression measures and the river bank in any case must not be damaged.
1.	The transportation of materials shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the materials through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.
1.	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
Water quality monitoring and mitigation measures	
1.	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
1.	The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.
1.	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the mine site upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.
Noise and Vibration monitoring and prevention	
1.	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.
Mining Plan	
1.	Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable.
1.	No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without

	obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
1.	Mining shall be carried out as per the approved mining plan (including Mine Closure Plan) abiding by mining laws.
1.	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.
1.	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.
Land Recalmation	
1.	Native tree species shall be selected and planted over areas affected by subsidence.
Public hearing and Human health issues	
1.	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
1.	PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
1.	PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
1.	PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius
Corporate Environment Responsibility	
1.	The company shall have a well laid down environmental policy duly approve by the Board of Directors. 1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at

	environment clearance portal.
1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
1.	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours

3.9. Agenda Item No 9:

3.9.1. Details of the proposal

OUJARI SAND PERMIT AREA ON KAPILI RIVER BED by **brahmaputra mk pusphas (jv)** located at **KAMRU P METRO,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/482711/2024	SEAC/SEIAA.3875/2024	24/07/2024	Mining of minerals (1(a))

3.9.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :09/09/2024

Deliberations of SEAC 1 :

Necessary land documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The Joint Verification Report (JVR) with the Revenue and Forest Department is also placed for scrutiny. The KML file of the proposed mining area is scrutinized.

The NOC from the Water Resources Department dated 21.02.2024 from Executive Engineer, Kamrup East Water Resources Division is furnished. NOC from the District Magistrate, Kamrup (Metro) for execution of Railway Project vide letter dated 23.4.2024 is furnished.

Due deliberations and discussions are held.

The Committee is of the opinion to urge the DFO for taking requisite steps to conduct preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020}.

It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the development of infrastructure in progress specially to strengthen the road network connectivity which is a *sine qua non* for overall development and economic growth of the state while the impact on environment also require due diligence and consideration with proper safeguards. It is further appreciated that the important stakeholders like the Registered Qualified Person (RQP), Geologist from the Department of Geology and Mining, the Forest official, the official from the Water Resource Department are actively involved in the process for recommending mining in the area by way of consultation including site inspection before appraisal by the SEAC.

The Committee deem it appropriate to recommend the grant of EC by the SEIAA allowing extraction and harvesting of minor mineral for 6 (Six) months only with the quantity of 5,0**00 Cu M** of **Sand** with an observation that the concerned DFO shall submit the approved DSR from the competent authority for further consideration of additional quantity under the project allowing mining by the proponent within a period of 1 (one) year and that the area in question is reflected in the DSR. This is necessitated in view of the process of development works being undertaken by the NF Railwayin the light of the communication as has been made by the concerned executing body.

Decision: Recommended for grant of EC for **6 (Six)** months only, for **5,000 Cu M** of **Sand.**

3.9.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 2.70Ha with quantity of 5,000Cu M of stone for 6 (six) months subject to the terms and conditions laid down by SEAC and the DFO shall place the DSR for evaluation and appraisal by the SEAC for further approval by the SEIAA and on the basis of the approved DSR the proponent may come forward for the balance quantity remaining if found permissible for mining in terms of the approved DSR.

3.9.4. Recommendation of SEIAA

Approved

3.9.5. Details of Environment Conditions

3.9.5.1. Specific

General conditions by SEAC	
1.	1. This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan; 2. This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates ; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials and (c) the Proponent shall extract / harvest the approved quantity of minerals indicated herein with maximum mining depth of up to 2 (two) meters only from the non-mined surface and (d) the DFO shall place the DSR for evaluation and appraisal by the SEAC for further approval by the SEIAA and on the basis of the approved DSR the proponent may come forward for the additional quantity if found permissible for mining.

SPECIFIC CONDITIONS BY SEAC	
1.	• Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO. • The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. • The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan before allowing mining. • CSR activities shall be carried out / undertaken by the Proponent and 2% of the total project cost **Rs 1.00 (One) Lakh**only,shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the near by village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st year of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report. • Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands involving local NGOs, School / College students and an amount of **Rs 1.00 (one) Lakh** shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. • The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Agor(*Aquillaria malaccensis*), Amlokhi (*Phyllantus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*), Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*), Mohaneem (*Azedirachta indica*), Jamun (*Syzygium cuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpus integrifolia*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*) etc etc. Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.9.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee.
1.	The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC.
1.	Validity of EC is as per life of the mine mentioned in EC lette.
Air quality monitoring and mitigation measure	
1.	Adequate ambient air quality monitoring stations shall be established in the core zone as well as in the buffer zone for monitoring of pollutants, namely particulates, SO2 and NOx. Location of the stations shall be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive receptors in

	consultation with the State Pollution Control Board. Online ambient air quality monitoring station/stations may also be installed in addition to the regular air monitoring stations as per the requirement and/or in consultation with the SPCB
1.	Major approach roads shall be properly maintained with dust suppression measures and the river bank in any case must not be damaged.
1.	The transportation of materials shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the materials through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.
1.	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
Water quality monitoring and mitigation measures	
1.	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
1.	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the mine site upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.
Noise and Vibration monitoring and prevention	
1.	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.
Mining Plan	
1.	Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable.
1.	No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
1.	Mining shall be carried out as per the approved mining plan (including Mine Closure Plan) abiding by mining laws.
1.	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.
1.	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.
Land Recalmation	

1.	Native tree species shall be selected and planted over areas affected by subsidence.
Public hearing and Human health issues	
1.	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
1.	PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
1.	PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
1.	PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius
Corporate Environment Responsibility	
1.	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders.
1.	Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Miscellaneous	
1.	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently.
1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
1.	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).

1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours

3.10. Agenda Item No 10:

3.10.1. Details of the proposal

Kananadi Sand & Gravel Mining Permit Area by **deepak chetry** located at **LAKHIMPUR,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/491278/2024	SEAC/SEIAA.3874/2024	05/08/2024	Mining of minerals (1(a))

3.10.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :09/09/2024

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized.

The NOC from the Water Resources Department dated 28.07.2023 from Executive Engineer, North Lakhimpur Water Resources Division is furnished. NOC from District Commissioner, Lakhimpur dated 14.08.2023 is also furnished. Executive Engineer, PWRD, Dhakuakhana vide letter dated 23.5.2023 has submitted requirement of minor mineral in question for construction of 21 km road.

Due deliberations and discussions are held.

The Committee is of the opinion to urge the DFO for taking requisite steps to conduct preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020}.

It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the development of infrastructure in progress specially to strengthen the road network connectivity which is a *sine qua non* for overall development and economic growth of the state while the impact on environment also require due diligence and consideration with proper safeguards. It is further appreciated that the important stakeholders like the Registered Qualified Person (RQP), Geologist from the Department of Geology and Mining, the Forest official, the official from the Water Resource Department are actively involved in the process for recommending mining in the area by way of consultation including site inspection before appraisal by the SEAC.

The Committee deem it appropriate to recommend the grant of EC by the SEIAA allowing extraction and harvesting of minor mineral for 6 (Six) months only with the quantity of **4,700 Cu M** of **Sand** & **7,000 Cu M** of **Gravel** with an observation that the DFO, Lakhimpur Division shall submit the approved DSR from the competent authority for further consideration of additional quantity under the project allowing mining by the proponent within a period of 1 (one) year and that the area in question is reflected in the DSR. This is necessitated in view of the process of development works being undertaken by the PWDR, Assam in the light of the undertaking as has been communicated by the concerned competent authority.

Decision: Recommended for grant of EC for **6 (Six)** months only, for **4,700 Cu M** of **Sand** & **7,000 Cu M** of **Gravel.**

3.10.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 0.68Ha and mining area 0.53Ha with quantity of 5 4,700 Cu M of Sand & 7,000 Cu M of Gravel for 6 (six) months subject to the terms and conditions laid down by SEAC and the DFO shall place the DSR for evaluation and appraisal by the SEAC for further approval by the SEIAA and on the basis of the approved DSR the proponent may come forward for the balance quantity remaining if found permissible for mining in terms of the approved DSR.

3.10.4. Recommendation of SEIAA

Approved

3.10.5. Details of Environment Conditions

3.10.5.1. Specific

GENERAL CONDITIONS BY SEAC	
1.	1. This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan; 2. This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates ; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials and (c) the Proponent shall extract / harvest the approved quantity of minerals indicated herein with maximum mining depth of up to 2 (two) meters only from the non-mined surface and (d) the DFO shall place the DSR for evaluation and appraisal by the SEAC for further approval by the SEIAA and on the basis of the approved DSR the proponent may come forward for the additional

	quantity if found permissible for mining.
SPECIFIC CONDITIONS BY SEAC	
1.	• Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO. • The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. • The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan before allowing mining. • CSR activities shall be carried out / undertaken by the Proponent and 2% of the total project cost **Rs 1.00 (One) Lakh** only, shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the near by village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st year of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report. • Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands involving local NGOs, School / College students and an amount of Rs 1.00 (one) Lakh shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. • The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Agor(*Aquillaria malaccensis*), Amlokhi (*Phyllantus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*), Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*), Mohaneem (*Azedirachta indica*), Jamun (*Syzygium cuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpus integrifolia*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*) etc etc. Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.10.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee.
1.	The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC.
1.	Validity of EC is as per life of the mine mentioned in EC letter.
Air quality monitoring and mitigation measure	
1.	Adequate ambient air quality monitoring stations shall be established in the core zone as well as in the buffer zone

	for monitoring of pollutants, namely particulates, SO2 and NOx. Location of the stations shall be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive receptors in consultation with the State Pollution Control Board. Online ambient air quality monitoring station/stations may also be installed in addition to the regular air monitoring stations as per the requirement and/or in consultation with the SPCB
1.	Major approach roads shall be properly maintained with dust suppression measures and the river bank in any case must not be damaged.
1.	The transportation of materials hall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the materials through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.
1.	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
Water quality monitoring and mitigation measures	
1.	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
1.	The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.
1.	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the mine site upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.
Noise and Vibration monitoring and prevention	
1.	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.
Mining Plan	
1.	Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable.
1.	No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
1.	Mining shall be carried out as per the approved mining plan (including Mine Closure Plan) abiding by mining laws.

1.	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.
1.	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.
Land Recalmation	
1.	Native tree species shall be selected and planted over areas affected by subsidence.
Public hearing and Human health issues	
1.	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
1.	PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
1.	PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
1.	PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius
Corporate Environment Responsibility	
1.	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders.
1.	Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Miscellaneous	
1.	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently.
1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.

1.	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours

3.11. Agenda Item No 11:

3.11.1. Details of the proposal

NKD-B-2 Safakama Mining Contract Area by **SUJIT SARKAR** located at **BARPETA,ASSAM**			
Proposal For		Application for Validity Extension of EC- Form-6	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/476169/2024	SEIAA.875/2018/EC/29	08/08/2024	Mining of minerals (1(a))

3.11.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :09/09/2024

Deliberations of SEAC 1 :
Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. The same is discussed in the 12th SEAC Meeting held on **09.08.2024** in offline mode. **The Proponent was heard in person and the consequences of grant of the EC was explained to him wherein he became a beneficiary to the entire process of mining *dehors* the EIA Notification, 2006.**
Due deliberations and discussions are held.

On scrutiny of the documents and papers furnished tallying with the original proposal it is apparent on the face of facts that the conditions of the EC as were required mandatorily to be fulfilled by the Proponent were not complied with leading to such irregularities lacking due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. EDS reply were furnished partially, with in-complete information, by the project Proponent as uploaded only on 08.08.2024 that too without adhering to time and compliance of requisite Conditions of the EC as emerged during the course of deliberation. The DFO, NK Division had submitted vide letter No B/MHL/853--54 dated 30**.07.2024 showing** the then current status of the mining area wherein it is clarified that the Mining area is lying idle since **12.10.2023**, since the expiry of the EC thereby apparently indicating that the Proponent has not availed the chance of extraction of mineral even after grant of extension of the EC by another 6 (six) months which was at his risk and cost.

It will not be out of place to put on record that the area for Mining as allotted was 14 ha falling under Category B-1 (above 5 ha area) requiring EIA,EMP study, Public Hearing following due process of law. This was in view of the Order dated 04.09.2018 passed by the Hon'ble NGT in OA No 173 of 2018 (Sudarshan Das -vs- State of West Bengal and Ors) and Order dated 13.09.2018 in OA No 186 of 2016 (Satendra Pandey -vs- MoEF & CC & Anr). But in the instant case the proposal was considered under Category B-2 (below 5 ha area) of the Schedule to the EIA Notification 2006, as amended and granted EC by the SEIAA on 12.10.2018. Apparently, a serious error had crept in while grant of the EC by the SEIAA. Such mistakes can not be allowed to be continued to favour the Proponent who is a beneficiary to this inherent mistake which was *void ab initio*.
During the course of discussions the Proponent pointed out about a similar instance of allowing mining adjacent to the case at hand wherein the extension of EC was granted for 2 years while the Proponent legitimately claims that he has been deprived as fairly not treated although stand in the same footing. The Proponent going one step ahead pointed out the mining in the area covered under the proposal NKD B-3 Dumnighat MCA by Sri Himangshu Nath (Allotted area 13.65 Ha) where in the EC was granted on 30.12.2017 for 5 years with recommended quantity of 1,000 Cu M of Sand & 2,500 Cu M of Gravel per year. Extension of validity of the EC was granted on 14.02.2023 by the SEIAA (Proposal No. SIA/AS/MIN/295904/2022) for extraction of 2,000 Cu M Sand & 5000 Cu M Gravel for a period with its validity up to **29.12.2024** (up to the validity of the approved Mining Plan only).
The claim so asserted by the Proponent is not tenable in as much as the instant case is not covered by the Orders of the Hon'ble NGT as the EC was duly granted much ahead on 30.12.2018.
Further, it is also note worthy to point out that the DFO had recommended for extension of the EC by another period of 2 years up to **30.10.2025** while the validity of the approved Mining Plan is up to **14.05.2025** only.
The Committee after due considerations of all aspects unanimously decided that such a case of extension of the EC for a period of 2 (Two) Years up to **30.10.2025** not covered by the approved mining plan (**valid up to 14.05.2025**) from the competent authority is impermissible in view of the above explanations and observations and, therefore, SEAC is of the considered opinion to reject the plea of the Proponent who is a beneficiary to the EC not permissible under extant law.
Decision: The Proposal is rejected.

3.11.3. Deliberations by the SEIAA in current meetings

Rejected as per terms & conditions laid down by the SEAC.

3.11.4. Recommendation of SEIAA

Reject

3.12. Agenda Item No 12:

3.12.1. Details of the proposal

MAJIRGAON GOVT. LAND RIVER SILT/ORDINARY CLAY MINING PERMIT AREA ON BRAHMAPUT RA RIVER BED (BLOCK B) by **LARSEN & TOUBRO LIMITED** located at **KAMRUP METRO,ASSAM**

Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/492589/2024	SEAC/SEIAA3869/2024	13/08/2024	Mining of minerals (1(a))

3.12.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :09/09/2024

Deliberations of SEAC 1 :

Due deliberations and discussions are held.

The NOC from the Water Resources Department dated 03.08.2024 from Executive Engineer, Kamrup Rural Water Resources Division is furnished.

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized.

The Committee is of the further opinion to urge the DFO for taking requisite steps to complete the preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG'2016 and EMGSM'2020} and place the same for appraisal and final approval by the competent authority.

It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the development of infrastructure in progress specially to strengthen the road network connectivity which is a *sine qua non* for overall development and economic growth of the state while the impact on environment also require due diligence and consideration with proper safeguards. It is further appreciated that the important stakeholders like the Registered Qualified Person (RQP), Geologist from the Department of Geology and Mining, the Forest official, the official from the Water Resource Department are actively involved in the process for recommending mining in the area by way of consultation including site inspection before appraisal by the SEAC.

The Committee deem it appropriate to recommend the grant of EC by the SEIAA allowing extraction and harvesting of minor mineral for 1 (one) year, as recommended in the mining plan, with the quantity of**65,000 Cu M** of Silt/ Ordinary Clay with an observation that the DFO, Kamrup East Division shall submit the approved DSR from the competent authority for further consideration of the balance quantity for further consideration of the project allowing mining by the proponent within a period of 1 (one) year and that the area in question is reflected in the DSR. This is necessitated in view of the process of development works being undertaken by the PWRD, Govt of Assam undertaking as has been communicated by the concerned competent authority.

Decision: Recommended for grant of EC for 1 (one) year only for **65,000** Cu Mof Silt/ Ordinary Clay.

3.12.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 4.95Ha with quantity of 65,000 Cu M of Silt/ Ordinary Clay for 1 (one) year subject to the terms and conditions laid down by SEAC and the DFO shall place the DSR for evaluation and appraisal by the SEAC for further approval by the SEIAA and on the basis of the approved DSR the proponent may come forward for the balance quantity remaining if found permissible for mining in terms of the approved DSR.

3.12.4. Recommendation of SEIAA

Approved

3.12.5. Details of Environment Conditions

3.12.5.1. Specific

GENERAL CONDITIONS BY SEAC	
1.	1. This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan; 2. This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates ; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials and (c) the Proponent shall extract / harvest the approved quantity of minerals indicated herein with maximum mining depth of up to 2 (two) meters only from the non-mined surface. (d) the DFO shall place the DSR for evaluation and appraisal by the SEAC for further approval by the SEIAA and on the basis of the approved DSR the proponent may come forward for the balance quantity remaining if found permissible for mining.
SPECIFIC CONDITIONS BY SEAC	
1.	• Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO. • The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. • The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan before allowing mining. • CSR activities shall be carried out / undertaken by the Proponent and 2% of the total project cost Rs 3.00 (Three) Lakh shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the near by village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st year of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report. • Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands involving local NGOs, School / College students and an amount of Rs 2.00 (two) Lakh shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. • The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Agor(*Aquillaria malaccensis*), Amlokhi (*Phyllantus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*), Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*), Mohaneem (*Azedirachta indica*), Jamun (*Syzygium cuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpus integrifolia*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*) etc etc. Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.12.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned

	State pollution Control Board/ Committee.
1.	The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC.
1.	Validity of EC is as per life of the mine mentioned in EC letter.
Air quality monitoring and mitigation measure	
1.	Adequate ambient air quality monitoring stations shall be established in the core zone as well as in the buffer zone for monitoring of pollutants, namely particulates, SO2 and NOx. Location of the stations shall be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive receptors in consultation with the State Pollution Control Board. Online ambient air quality monitoring station/stations may also be installed in addition to the regular air monitoring stations as per the requirement and/or in consultation with the SPCB
1.	Major approach roads shall be properly maintained with dust suppression measures and the river bank in any case must not be damaged.
1.	The transportation of materials shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the materials through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.
1.	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
Water quality monitoring and mitigation measures	
1.	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
1.	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the mine site upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.
1.	The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.
Noise and Vibration monitoring and prevention	
1.	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.
Mining Plan	

1.	Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable.
1.	No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
1.	Mining shall be carried out as per the approved mining plan (including Mine Closure Plan) abiding by mining laws.
1.	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.
1.	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.
Land Recalmation	
1.	Native tree species shall be selected and planted over areas affected by subsidence.
Public hearing and Human health issues	
1.	The project proponent shall undertake occupational health survey for initial and periodical medical examination of the personnel engaged in the project and maintain records accordingly as per the provisions of the Mines Rules, 1955 and DGMS circulars. Besides regular periodic health check-up, 20% of the personnel identified from workforce engaged in active mining operations shall be subjected to health check-up for occupational diseases and hearing impairment, if any, as amended time to time.
1.	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
1.	PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
1.	PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius
1.	PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
Corporate Environment Responsibility	
1.	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders.
1.	Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Miscellaneous	
1.	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent’s website permanently.

1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
1.	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours

3.13. Agenda Item No 13:

3.13.1. Details of the proposal

MAJIRGAON GOVT. LAND RIVER SILT/ORDINARY CLAY MINING PERMIT AREA ON BRAHMAPUTRA RIVER BED (BLOCK c) by **LARSEN & TOUBRO LIMITED** located at **KAMRUP METRO,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/492597/2024	SEAC/SEIAA.3870/2024	13/08/2024	Mining of minerals (1(a))

3.13.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :09/09/2024

Deliberations of SEAC 1 :

Due deliberations and discussions are held.

The NOC from the Water Resources' Department dated **03.08.2024** from Executive Engineer, Kamrup Rural Water Resources Division is furnished.

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized.

The Committee is of the opinion to urge the DFO for taking requisite steps to complete the preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG'2016 and EMGSM'2020} and place the same for appraisal and final approval by the competent authority.

It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the development of infrastructure in progress specially to strengthen the road network connectivity which is a *sine qua non* for overall development and economic growth of the state while the impact on environment also require due diligence and consideration with proper safeguards. It is further appreciated that the important stakeholders like the Registered Qualified Person (RQP), Geologist from the Department of Geology and Mining, the Forest official, the official from the Water Resource Department are actively involved in the process for recommending mining in the area by way of consultation including site inspection before appraisal by the SEAC.

The Committee deem it appropriate to recommend the grant of EC by the SEIAA allowing extraction and harvesting of minor mineral for 1 (one) year, as recommended in the mining plan, with the quantity of **65,000** Cu M of Silt / Ordinary Clay with an observation that the DFO, Kamrup East Division shall submit the approved DSR from the competent authority for further consideration of the balance quantity for further consideration of the project allowing mining by the proponent within a period of 1 (one) year and that the area in question is reflected in the DSR. This is necessitated in view of the process of development works being undertaken by the PWRD, Govt of Assam undertaking as has been communicated by the concerned competent authority.

Decision: Recommended for grant of EC for 1 (one) year only for **65,000** Cu Mof Silt/ Ordinary Clay.

3.13.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 4.95Ha with quantity of 65,000 Cu M of Silt/ Ordinary Clay for 1 (one) year subject to the terms and conditions laid down by SEAC and the DFO shall place the DSR for evaluation and appraisal by the SEAC for further approval by the SEIAA and on the basis of the approved DSR the proponent may come forward for the balance quantity remaining if found permissible for mining in terms of the approved DSR.

3.13.4. Recommendation of SEIAA

Approved

3.13.5. Details of Environment Conditions

3.13.5.1. Specific

GENERAL CONDITIONS BY SEAC	
1.	1. This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan; 2. This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates ; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials and (c) the Proponent shall extract / harvest the approved quantity of minerals indicated herein with maximum mining depth of up to 2 (two) meters only from the non-mined surface and(d) the DFO shall place the DSR for evaluation and appraisal by the SEAC for further approval by the SEIAA and on the basis of the approved DSR the proponent may come forward for the balance quantity remaining if found permissible for mining.

SPECIFIC CONDITIONS BY SEAC	
1.	• Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO. • The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. • The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan before allowing mining. • CSR activities shall be carried out / undertaken by the Proponent and 2% of the total project cost **Rs 3.00 (Three) Lakh** shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the near by village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st year of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report. • Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands involving local NGOs, School / College students and an amount of Rs **2.00 (two) Lakh** shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. • The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Agor(*Aquillaria malaccensis*), Amlokhi (*Phyllantus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*), Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*), Mohaneem (*Azedirachta indica*), Jamun (*Syzygium cuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpus integrifolia*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*) etc etc. Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.13.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee.
1.	The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC.
1.	Validity of EC is as per life of the mine mentioned in EC letter.
Air quality monitoring and mitigation measure	
1.	Adequate ambient air quality monitoring stations shall be established in the core zone as well as in the buffer zone for monitoring of pollutants, namely particulates, SO2 and NOx. Location of the stations shall be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive receptors in

	consultation with the State Pollution Control Board. Online ambient air quality monitoring station/stations may also be installed in addition to the regular air monitoring stations as per the requirement and/or in consultation with the SPCB
1.	Major approach roads shall be properly maintained with dust suppression measures and the river bank in any case must not be damaged.
1.	The transportation of materials shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the materials through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.
1.	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
Water quality monitoring and mitigation measures	
1.	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
1.	Industrial waste water from coal handling plant and mine water shall be properly collected and treated so as to conform to the standards prescribed under the Environment (Protection) Act, 1986 and the Rules made thereunder, and as amended from time to time. Oil and grease trap shall be installed before discharge of workshop effluent. Sewage treatment plant of adequate capacity shall be installed for treatment of domestic waste water.
1.	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine site upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.
Noise and Vibration monitoring and prevention	
1.	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.
Mining Plan	
1.	Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable.
1.	No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
1.	Mining shall be carried out as per the approved mining plan (including Mine Closure Plan) abiding by mining laws.
1.	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.

1.	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.
Land Recalmation	
1.	Native tree species shall be selected and planted over areas affected by subsidence.
Public hearing and Human health issues	
1.	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
1.	PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
1.	PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
1.	PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius
Corporate Environment Responsibility	
1.	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders.
1.	Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Miscellaneous	
1. SIA/AS/MIN/492613/2024	SEAC/SEIAA3871/2024	13/08/2024	Mining of minerals (1(a))

3.14.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :09/09/2024

Deliberations of SEAC 1 :

Due deliberations and discussions are held.

The NOC from the Water Resources' Department dated 3.08.2024 from Executive Engineer, Kamrup Rural Water Resources Division is furnished.

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized.

The Committee is of the opinion to urge the DFO for taking requisite steps to complete the preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG'2016 and EMGSM'2020} and place the same for appraisal and final approval by the competent authority.

It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the development of infrastructure in progress specially to strengthen the road network connectivity which is a *sine qua non* for overall development and economic growth of the state while the impact on environment also require due diligence and consideration with proper safeguards. It is further appreciated that the important stakeholders like the Registered Qualified Person (RQP), Geologist from the Department of Geology and Mining, the Forest official, the official from the Water Resource Department are actively involved in the process for recommending mining in the area by way of consultation including site inspection before appraisal by the SEAC.

The Committee deem it appropriate to recommend the grant of EC by the SEIAA allowing extraction and harvesting of minor mineral for 1 (one) year, as recommended in the mining plan, with the quantity of **65,000** Cu Mof Silt/ Ordinary Clay with an observation that the DFO, Kamrup East Division shall submit the approved DSR from the competent authority for further consideration of the balance quantity for further consideration of the project allowing mining by the proponent within a period of 1 (one) year and that the area in question is reflected in the DSR. This is necessitated in view of the process of development works being undertaken by the NHIDCL in the light of undertaking as has been communicated by the concerned competent authority.

Decision: Recommended for grant of EC for 1 (one) year only for **65,000** Cu m of Silt/ Ordinary Clay.

3.14.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 4.95Ha with quantity of 65,000 Cu M of Silt/ Ordinary Clay for 1 (one) year subject to the terms and conditions laid down by SEAC and the DFO shall place the DSR for evaluation and appraisal by the SEAC for further approval by the SEIAA and on the basis of the approved DSR the proponent may come forward for the balance quantity remaining if found permissible for mining in terms of the approved DSR.

3.14.4. Recommendation of SEIAA

Approved

3.14.5. Details of Environment Conditions

3.14.5.1. Specific

GENERAL CONDITIONS BY SEAC	
1.	1. This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan; 2. This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates ; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials and (c) the Proponent shall extract / harvest the approved quantity of minerals indicated herein with maximum mining depth of up to 2 (two) meters only from the non-mined surface and (d) the DFO shall place the DSR for evaluation and appraisal by the SEAC for further approval by the SEIAA and on the basis of the approved DSR the proponent may come forward for the balance quantity remaining if found permissible for mining.

SPECIFIC CONDITIONS BY SEAC	
1.	• Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO. • The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. • The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan before allowing mining. • CSR activities shall be carried out / undertaken by the Proponent and 2% of the total project cost **Rs 3.00 (Three) Lakh** shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the near by village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st year of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report. • Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands involving local NGOs, School / College students and an amount of Rs **2.00 (two) Lakh** shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. • The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Agor(*Aquillaria malaccensis*), Amlokhi (*Phyllantus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*), Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*), Mohaneem (*Azedirachta indica*), Jamun (*Syzygium cuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpus integrifolia*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*) etc etc. Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.14.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee.
1.	The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC.
1.	Validity of EC is as per life of the mine mentioned in EC letter.
Air quality monitoring and mitigation measure	
1.	Adequate ambient air quality monitoring stations shall be established in the core zone as well as in the buffer zone for monitoring of pollutants, namely particulates, SO2 and NOx. Location of the stations shall be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive receptors in

	consultation with the State Pollution Control Board. Online ambient air quality monitoring station/stations may also be installed in addition to the regular air monitoring stations as per the requirement and/or in consultation with the SPCB
1.	Major approach roads shall be properly maintained with dust suppression measures and the river bank in any case must not be damaged.
1.	The transportation of materials shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the materials through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.
1.	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
Water quality monitoring and mitigation measures	
1.	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
1.	The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.
1.	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the mine site upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.
Noise and Vibration monitoring and prevention	
1.	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.
Mining Plan	
1.	Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable.
1.	No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
1.	Mining shall be carried out as per the approved mining plan (including Mine Closure Plan) abiding by mining laws.
1.	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of

	Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.
1.	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.
Land Recalmation	
1.	Native tree species shall be selected and planted over areas affected by subsidence.
Public hearing and Human health issues	
1.	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
1.	PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
1.	PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
1.	PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius
Corporate Environment Responsibility	
1.	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders.
1.	Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Miscellaneous	
1.	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently.
1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
1.	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining

	operations.
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours

3.15. Agenda Item No 15:

3.15.1. Details of the proposal

BRAHMAPUTRA RIVER ORDINARY CLAY/SILT MPA - Pt. 2 by **SADGURU ENGINEERS & ALLIED SERVICES PRIVATE LIMITED** located at **JORHAT,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/493267/2024	SEAC/SEIAA.3872/2024	19/08/2024	Mining of minerals (1(a))

3.15.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :09/09/2024

Deliberations of SEAC 1 :

Due deliberations and discussions are held.

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized.

The Committee is of the opinion to urge the DFO for taking requisite steps to complete the preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG'2016 and EMGSM'2020} and place the same for appraisal and final approval by the competent authority.

It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the development of infrastructure in progress specially to strengthen the road network connectivity which is a *sine qua non* for overall development and economic growth of the state while the impact on environment also require due diligence and consideration with proper safeguards. It is further appreciated that the important stakeholders like the Registered Qualified Person (RQP), Geologist from the Department of Geology and Mining, the Forest official are actively involved in the process for recommending mining in the area by way of consultation including site inspection before appraisal by the SEAC.

The Committee deem it appropriate to recommend the grant of EC by the SEIAA allowing extraction and harvesting of minor mineral for 1 (one) year, as recommended in the mining plan, with the quantity of **36,000** Cu Mof Ordinary Clay/ Silt with an observation that the DFO, Jorhat Division shall submit the approved DSR from the competent authority for further consideration of the balance quantity for further consideration of the project allowing mining by the proponent within a period of 1 (one) year and that the area in question is reflected in the DSR. This is necessitated in view of the process of development works being undertaken by the NHIDCL in the light of the undertaking as has been communicated by the concerned competent authority.

Decision: Recommended for grant of EC for 1 (one) year only for **36,000** Cu Mof Ordinary Clay/ Silt

3.15.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 4.88Ha with quantity of 36,000 Cu M of Ordinary Clay/ Silt for 1 (one) year subject to the terms and conditions laid down by SEAC and the DFO shall place the DSR for evaluation and appraisal by the SEAC for further approval by the SEIAA and on the basis of the approved DSR the proponent may come forward for the balance quantity remaining if found permissible for mining in terms of the approved DSR.

3.15.4. Recommendation of SEIAA

Approved

3.15.5. Details of Environment Conditions

3.15.5.1. Specific

GENERAL CONDITIONS BY SEAC	
1.	1. This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan; 2. This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates ; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials and (c) the Proponent shall extract / harvest the approved quantity of minerals indicated herein with maximum mining depth of up to 2 (two) meters only from the non-mined surface and (d) the DFO shall place the DSR for evaluation and appraisal by the SEAC for further approval by the SEIAA and on the basis of the approved DSR the proponent may come forward for the balance quantity remaining if found permissible for mining.
SPECIFIC CONDITIONS BY SEAC	

1.	• Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO. • The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. • The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan before allowing mining. • CSR activities shall be carried out / undertaken by the Proponent and 2% of the total project cost **Rs 2.00 Lakh (Two Lakh)**only**,** shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the nearby village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st year of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report. • Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands involving local NGOs, School / College students and an amount of Rs **2.00 (two) Lakh** shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. • The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Agor(*Aquillaria malaccensis*), Amlokhi (*Phyllanthus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*), Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*), Mohaneem (*Azedirachta indica*), Jamun (*Syzygium cuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpus integrifolia*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*) etc etc. Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.15.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee.
1.	The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC.
1.	Validity of EC is as per life of the mine mentioned in EC letter.
Air quality monitoring and mitigation measure	
1.	Adequate ambient air quality monitoring stations shall be established in the core zone as well as in the buffer zone for monitoring of pollutants, namely particulates, SO2 and NOx. Location of the stations shall be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive receptors in consultation with the State Pollution Control Board. Online ambient air quality monitoring station/stations may also be installed in addition to the regular air monitoring stations as per the requirement and/or in consultation with the SPCB

1.	Major approach roads shall be properly maintained with dust suppression measures and the river bank in any case must not be damaged.
1.	The transportation of materials shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the materials through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.
1.	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
Water quality monitoring and mitigation measures	
1.	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
1.	The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.
1.	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the mine site upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.
Noise and Vibration monitoring and prevention	
1.	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.
Mining Plan	
1.	Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable.
1.	No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
1.	Mining shall be carried out as per the approved mining plan (including Mine Closure Plan) abiding by mining laws.
1.	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.
1.	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.

Land Recalmation	
1.	Native tree species shall be selected and planted over areas affected by subsidence.
Public hearing and Human health issues	
1.	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
1.	PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
1.	PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
1.	PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius
Corporate Environment Responsibility	
1.	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders.
1.	Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Miscellaneous	
1.	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently.
1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
1.	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.

1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours

3.16. Agenda Item No 16:

3.16.1. Details of the proposal

UPPER DEORI GAON ORDINARY EARTH MINING PERMIT AREA by **BHOBEN GOGOI** located at **JORHAT,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/483304/2024	SEAC/SEIAA 3873/2024	19/08/2024	Mining of minerals (1(a))

3.16.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :09/09/2024

Deliberations of SEAC 1 :

Due deliberations and discussions are held.

Necessary land documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The Joint Verification Report (JVR) with the Revenue and Forest Department is also placed for scrutiny.

The Committee is of the opinion to urge the DFO for taking requisite steps to complete the preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} and place the same for appraisal and final approval by the competent authority.

It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the development of infrastructure in progress specially to strengthen the road network connectivity which is a *sine qua non* for overall development and economic growth of the state while the impact on environment also require due diligence and consideration with proper safeguards. It is further appreciated that the important stakeholders like the Registered Qualified Person (RQP), Geologist from the Department of Geology and Mining, the Forest official, the official from the Water Resource Department are actively involved in the process for recommending mining in the area by way of consultation including site inspection before appraisal by the SEAC.

The Committee deem it appropriate to recommend the grant of EC by the SEIAA allowing extraction and harvesting of minor mineral for 3 (three) months only with the quantity of **4,000** Cu M Ordinary earth with an observation that the DFO, Jorhat Division shall submit the approved DSR from the competent authority for further consideration of additional quantity under the project allowing mining by the proponent within a period of 1 (one) year and that the area in question is reflected in the DSR. This is necessitated in view of the process of development works being undertaken by the NHIDCL in the light of the undertaking as has been communicated by the concerned competent authority.

Decision: Recommended for grant of EC for 3 **(three months)** only, for **4,000** Cu M Ordinary earth**.**

3.16.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 0.42Ha with quantity of 4,000 Cu M of Ordinary Earth for 3 (Three) months subject to the terms and conditions laid down by SEAC and that the area in question is reflected in the DSR.

3.16.4. Recommendation of SEIAA

Approved

3.16.5. Details of Environment Conditions

3.16.5.1. Specific

SPECIFIC CONDITIONS BY SEAC	
1.	1. This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan. 2. This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates and (b) the Proponent shall extract the approved quantity of Ordinary Earth indicated herein with maximum mining depth of up to 2 (two) meters. 3. This is also subject to the conditions that the proponent shall (a) demarcate the excavation setting out plan with reference coordinates and levels; (b) to start the excavation from one end and proceed to another end in layers such as one metre depth layers; (c) if the excavation depth exceeds 2.0 m depth, it is necessary to protect the sides of the excavation by driving sheet piles or soldier piles (the vertical members to protect the excavation is to be driven first followed by horizontal members) provided permission is granted; (d) stack the soil away from the excavation edge to prevent soil collapsing to the excavated area; (e) that the excavation shall not be allowed to go below the level of land adjacent to the area in question and (f) proper barrier with green shed nets must have to be erected to prevent Dust pollution, Air pollution in the adjacent area. 4. The Divisional Forest Officer shall ensure due vigilance in the proposed area to avert any kind of

	irregularities / illegalities during the excavation period. 5. The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars/posts, following the GPS coordinates mentioned in the approved mining plan prior to allowing removal of Ordinary Earth. 6. CSR activities shall be carried out / undertaken by the Proponent and 2% of the total project cost **Rs 40 (Forty Thousand) only** shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the near by village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st year of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report. 7. Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands involving local NGOs, School / College students and an amount of **Rs 50.00 (Fifty Thousand)** only, shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. 8. The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Agor(*Aquillaria malaccensis*), Amlokhi (*Phyllantus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*), Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*), Mohaneem (*Azedirachta indica*), Jamun (*Syzygium cuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpus integrifolia*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*) etc etc. Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.16.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee.
1.	The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC.
1.	Validity of EC is as per life of the mine mentioned in EC letter.
Air quality monitoring and mitigation measure	
1.	Adequate ambient air quality monitoring stations shall be established in the core zone as well as in the buffer zone for monitoring of pollutants, namely particulates, SO2 and NOx. 1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
1.	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.

1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.

3.17. Agenda Item No 17:

3.17.1. Details of the proposal

"Na Pani P.P. Land Stone Mining Permit Area" by **BRONSON TERANG** located at **KARBI ANGLONG,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/487809/2024	SEAC/SEIAA. 3877/2024	21/08/2024	Mining of minerals (1(a))

3.17.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :09/09/2024

Deliberations of SEAC 1 :

Due deliberations and discussions are held.

Necessary land documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The Joint Verification Report (JVR) with the Revenue and Forest Department is also placed for scrutiny.

The Committee is of the further opinion to urge the DFO for taking requisite steps to complete the preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} and place the same for appraisal and final approval by the competent authority.

It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the development of infrastructure in progress specially to strengthen the road network connectivity which is a *sine qua non* for overall development and economic growth of the state while the impact on environment also require due diligence and consideration with proper safeguards. It is further appreciated that the important stakeholders like the Registered Qualified Person (RQP), Geologist from the Department of Geology and Mining, the Forest official, the official from the Water Resource Department are actively involved in the process for recommending mining in the area by way of consultation including site inspection before appraisal by the SEAC.

The Committee deem it appropriate to recommend the grant of EC by the SEIAA allowing extraction and harvesting of minor mineral for 1 (one) year, as recommended in the mining plan, with the quantity of **16,000** Cu M Stone with an observation that the DFO, Karbi Anglong East Division shall submit the approved DSR from the competent authority for further consideration of the balance quantity for further consideration of the project allowing mining by the proponent within a period of 1 (one) year and that the area in question is reflected in the DSR. This is necessitated in view of the process of development works being undertaken by the PWRD, Govt of Assam in the light of undertaking as has been communicated by the concerned competent authority.

Decision: Recommended for grant of EC for **1 (one) year** only for **16,000**Cu M of Stone

3.17.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 2.67Ha with quantity of 16,000 Cu M of Stone for 1 (one) year subject to the terms and conditions laid down by SEAC and that the area in question is reflected in the DSR.

3.17.4. Recommendation of SEIAA

Approved

3.17.5. Details of Environment Conditions

3.17.5.1. Specific

Specific condition by SEAC	
1.	This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan. This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates and (b) the Proponent shall extract the approved quantity of Ordinary Earth indicated herein with maximum mining depth of up to 2 (two) meters. This is also subject to the conditions that the proponent shall (a) demarcate the excavation setting out plan with reference coordinates and shall not use explosives without prior approval of the competent authority. The Divisional Forest Officer shall ensure due vigilance in the proposed area to avert any kind of irregularities / illegalities during the excavation period.

	The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars/posts, following the GPS coordinates mentioned in the approved mining plan prior to allowing removal of Ordinary Earth. CSR activities shall be carried out / undertaken by the Proponent and 2% of the total project cost **Rs 2 (Two) Lakh** shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the near by village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st year of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report. Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands involving local NGOs, School / College students. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Agor(*Aquillaria malaccensis*), Amlokhi (*Phyllanthus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*), Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*), Mohaneem (*Azedirachta indica*), Jamun (*Syzygium cuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpus integrifolia*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*) etc etc.

3.17.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee.
1.	The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC.
1.	Validity of EC is as per life of the mine mentioned in EC letter.
Air quality monitoring and mitigation measure	
1.	Adequate ambient air quality monitoring stations shall be established in the core zone as well as in the buffer zone for monitoring of pollutants, namely particulates, SO2 and NOx. Location of the stations shall be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive receptors in consultation with the State Pollution Control Board. Online ambient air quality monitoring station/stations may also be installed in addition to the regular air monitoring stations as per the requirement and/or in consultation with the SPCB
1.	Major approach roads shall be properly maintained with dust suppression measures and the river bank in any case must not be damaged.

1.	The transportation of materials shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the materials through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.
1.	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
Water quality monitoring and mitigation measures	
1.	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
1.	The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.
1.	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the mine site upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.
Noise and Vibration monitoring and prevention	
1.	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.
Mining Plan	
1.	Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable.
1.	No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
1.	Mining shall be carried out as per the approved mining plan (including Mine Closure Plan) abiding by mining laws.
1.	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.
1.	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.
Land Recalmation	

1.	Native tree species shall be selected and planted over areas affected by subsidence.
Public hearing and Human health issues	
1.	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
1.	PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
1.	PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
1.	PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius
Corporate Environment Responsibility	
1.	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders.
1.	Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Miscellaneous	
1.	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently.
1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
1.	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).

1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours

3.18. Agenda Item No 18:

3.18.1. Details of the proposal

1 No. Suagpur Village Patta Land Sand and Sand Gravel Mining Permit Area by **SHREE GAUTAM CONSTRUCTION CO. LTD** located at **BAKSA,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/468295/2024	SEAC/SEIAA 3878/2024	23/08/2024	Mining of minerals (1(a))

3.18.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :09/09/2024

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The Joint Verification Report (JVR) Dag No 30 with the Revenue and Forest Department is also placed for scrutiny. Non agriculture land certificate from Sub Divisional Agricultural Officer, Tamulpur dated 30.08.2024 is furnished. The KML file of the proposed mining area is scrutinized.The NOC from the Water Resources' Department dated 27.12.2023 from Executive Engineer, Tamulpur Water Resources Division is furnished. The letter dated01.12.2023 from M/s Shree Gautam Construction Company Ltd is furnished and it is stated that the extracted Sand Gravel material is to be used in Construction of New Medical College & Hospital" at Kachubari, Tamulpur, Assam (Work Order No CE /TB-II/11/2022/44 Dated 01/10/2022).

Due deliberations and discussions are held.

The Committee is of the further opinion to urge the DFO for taking requisite steps to conduct preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG'2016 and EMGSM'2020}.

It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the development of infrastructure in progress specially to strengthen the health care system in the remote areas of the state while the impact on environment also require due diligence and consideration with proper safeguards. It is further appreciated that the important stakeholders like the Registered Qualified Person (RQP), Geologist from the Department of Geology and Mining, the Forest official, the official from the Water Resource Department are actively involved in the process for recommending mining in the area by way of consultation including site inspection before appraisal by the SEAC.

The Committee deem it appropriate to recommend the grant of EC by the SEIAA allowing extraction and harvesting of minor mineral for 6 (Six) months, as recommended in the mining plan, with the quantity of **8,100** Cu Mof Sand Gravelwith an observation that the DFO, Baksa Division shall submit the approved DSR from the competent authority for further consideration of the additional quantity for the project allowing mining by the proponent within a period of 6 (six) months and that the area in question is reflected in the DSR. This is necessitated in view of the process of development works **for proposed New Medical College & Hospital at Kachubari.**

Decision: Recommended for grant of EC for 6 (Six) months only, for **8,100** Cu M of Sand- Gravel.

3.18.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 0.95Ha with quantity of 8,100 Cu M of Sand Gravel for for 6 (Six) months subject to the terms and conditions laid down by SEAC and that the area in question is reflected in the DSR.

3.18.4. Recommendation of SEIAA

Approved

3.18.5. Details of Environment Conditions

3.18.5.1. Specific

General conditions by SEAC	
1.	1. This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan; 2. This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates ; (b) the Proponent shall extract / harvest the approved quantity of minerals indicated herein with maximum mining depth of up to 2 (two) meters only from the non-mined surface; (c) the river banks are not damaged due to extraction of minor mineral and (d) the DFO shall place the DSR for evaluation and appraisal by the SEAC for further approval by the SEIAA and on the basis of the approved DSR the proponent may come forward for the quantity if found permissible for mining.
Specific Conditions by SEAC	

1.	• Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO. • The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. • The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan before allowing mining. • CSR activities shall be carried out / undertaken by the Proponent and 2% of the total project cost **Rs 50,000 (Fifty Thousand**) only shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the near by village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st year of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report. • Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands involving local NGOs, School / College students and an amount of Rs 50,000 **(fifty thousand)** only, shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. • The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Agor(*Aquillaria malaccensis*), Amlokhi (*Phyllantus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*), Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*), Mohaneem (*Azedirachta indica*), Jamun (*Syzygium cuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpus integrifolia*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*) etc etc. Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.18.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee.
1.	The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC.
1.	Validity of EC is as per life of the mine mentioned in EC letter.
Air quality monitoring and mitigation measure	
1.	Adequate ambient air quality monitoring stations shall be established in the core zone as well as in the buffer zone for monitoring of pollutants, namely particulates, SO2 and NOx. Location of the stations shall be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive receptors in consultation with the State Pollution Control Board. Online ambient air quality monitoring station/stations may also be installed in addition to the regular air monitoring stations as per the requirement and/or in consultation with the SPCB

1.	Major approach roads shall be properly maintained with dust suppression measures and the river bank in any case must not be damaged.
1.	The transportation of materials shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the materials through the existing road passing through any village shall be avoided. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours

3.19. Agenda Item No 19:

3.19.1. Details of the proposal

Naorasisakash Govt. Land Sand & Clay Mining Permit Area by **kulen hazarika** located at **DARRANG,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/494135/2024	SEAC/SEIAA 3879/2024	27/08/2024	Mining of minerals (1(a))

3.19.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :09/09/2024

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal are placed before the Committee for scrutiny and appraisal. The Joint Verification Report (JVR) Dag No .60 (Govt land) with the Revenue and Forest Department is also placed for scrutiny. The KML file of the proposed mining area is examined.

The NOC from the Water Resources Department dated 12.08.2024 from the Executive Engineer, Darrang Water Resources Division is furnished. NOC from the District Commissioner, Darrang dated 17.07.2024 is furnished.

Due deliberations and discussions are held.

The Committee is of the opinion to urge the DFO for taking requisite steps to conduct preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG'2016 and EMGSM'2020}.

It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for Govt. works i,e. "Market Modernization and Improvement Program (MMIP) of Kharupetia PMY, Darrang DRMC in Darrang District while the impact on environment also require due diligence and consideration with proper safeguards. It is further appreciated that the important stakeholders like the Registered Qualified Person (RQP), Geologist from the Department of Geology and Mining, the Forest official, the official from the Water Resource Department are actively involved in the process for recommending mining in the area by way of consultation including site inspection before appraisal by the SEAC.

The Committee deem it appropriate to recommend the grant of EC by the SEIAA allowing extraction and harvesting of minor mineral for 1 (One) year, as recommended in the mining plan, with the quantity of **25,000** Cu M of **Sand & Clay** with an observation that the DFO, NK Division shall submit the approved DSR from the competent authority for further consideration of the balance quantity for the project allowing mining by the proponent within a period of 1 (One) year and that the area in question is reflected in the DSR. This is necessitated in view of the process of Govt. works i,e. "Market Modernization and Improvement Program (MMIP) of Kharupetia PMY, Darrang DRMC in Darrang District.

Decision: Recommended for grant of EC for 1 (One) year, for **25,000** Cu M of Sand & Clay.

3.19.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 4.20Ha and mining area 4.06Ha with quantity of 25,000 cum of Sand & Clay for 1 (One) year subject to the terms and conditions laid down by SEAC and that the area in question is reflected in the DSR.

3.19.4. Recommendation of SEIAA

Approved

3.19.5. Details of Environment Conditions

3.19.5.1. Specific

GENERAL CONDITIONS BY SEAC	
1.	1. This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan; 2. This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates ; (b) the Proponent shall extract / harvest the approved quantity of minerals indicated herein with maximum mining depth of up to 2 (two) meters only from the non-mined surface; (c) the river banks are not damaged due to extraction of minor mineral and (d) the DFO shall place the DSR for evaluation and appraisal by the SEAC for further approval by the SEIAA and on the basis of the approved DSR the proponent may come forward for the quantity if found permissible for mining.
SPECIFIC CONDITIONS BY SEAC	
1.	• Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by

	the concerned DFO. • The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. • The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan before allowing mining. • CSR activities shall be carried out / undertaken by the Proponent and 2% of the total project cost **Rs 20,000 (Twenty Thousand)** only, shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the near by village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st year of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report. • Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands involving local NGOs, School / College students and an amount of Rs **20,000 (Twenty Thousand**) only, shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. • The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Agor (*Aquillaria malaccensis*), Amlokhi (*Phyllanthus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*), Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*), Mohaneem (*Azedirachta indica*), Jamun (*Syzygium cuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpus integrifolia*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*) etc etc. Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.19.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee.
1.	The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC.
1.	Validity of EC is as per life of the mine mentioned in EC letter.
Air quality monitoring and mitigation measure	
1.	Adequate ambient air quality monitoring stations shall be established in the core zone as well as in the buffer zone for monitoring of pollutants, namely particulates, SO2 and NOx. Location of the stations shall be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive receptors in consultation with the State Pollution Control Board. Online ambient air quality monitoring station/stations may also be installed in addition to the regular air monitoring stations as per the requirement and/or in consultation with the SPCB

1.	Major approach roads shall be properly maintained with dust suppression measures and the river bank in any case must not be damaged.
1.	The transportation of materials shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the materials through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.
1.	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
Water quality monitoring and mitigation measures	
1.	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
1.	The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.
1.	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the mine site upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.
Noise and Vibration monitoring and prevention	
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.
1.	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
Mining Plan	
1.	Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable.
1.	No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
1.	Mining shall be carried out as per the approved mining plan (including Mine Closure Plan) abiding by mining laws.
1.	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.
1.	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.

Land Recalmation	
1.	Native tree species shall be selected and planted over areas affected by subsidence.
Public hearing and Human health issues	
1.	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
1.	PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
1.	PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
1.	PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius
Corporate Environment Responsibility	
1.	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders.
1.	Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Miscellaneous	
1.	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently.
1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
1.	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.

1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours

3.20. Agenda Item No 20:

3.20.1. Details of the proposal

"KAKOI EARTH, SAND AND GRAVEL MINING CONTRACT AREA" by **RAJIB SARMAH** located at **LAKH IMPUR,ASSAM**			
Proposal For		Application for Validity Extension of EC- Form-6	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/494715/2024	SEIAA.862/2018/EC/24	30/08/2024	Mining of minerals (1(a))

3.20.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :09/09/2024

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. Due deliberations and discussions are held.

The Half Yearly Compliance Report is uploaded showing the compliance of the conditions under the previous EC, which however, do-not have any bearing at this stage so far a new proposal has been submitted. The DFO, Lakhimpur Division has requested for the extension of the validity of the EC for the proposal allowing extraction vide letter dated **20.07.2024** along with the current status report of the mining area, which appear to be misconceived to the extent that the earlier EC got rejected.

The Committee is of the considered view that since the DFO has taken requisite steps to conduct preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG'2016 and EMGSM'2020}, therefore, the instant proposal need to be incorporated in the DSR based on detail study.

The instant proposal wherein fresh Mining Plan is submitted with enhanced quantities of Minor Minerals for mining, is apparently a fresh case which does not qualify to be a case for extension of the EC granted earlier as stood rejected by the SEIAA.

In view of the above scenario and factual position the SEAC do not find any merit to re-consider this proposal as a case of extension of the EC and not inclined to recommend accordingly.

Decision: Rejected

3.20.3. Deliberations by the SEIAA in current meetings

Rejected as per terms & conditions laid down by the SEAC.

3.20.4. Recommendation of SEIAA

Reject

3.21. Agenda Item No 21:

3.21.1. Details of the proposal

DIYUNG RIVER STONE BOULDER MINING PERMIT AREA by **dima hasao forest division(west)** located at **D IMA HASAO,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/494843/2024	SEAC/SEIAA.3868/2024	31/08/2024	Mining of minerals (1(a))

3.21.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :09/09/2024

Deliberations of SEAC 1 :

Due deliberations and discussions are held.

The NOC from the Water Resources Department dated 16.08.2024 from Executive Engineer, Dima Hasao Water Resources Division is furnished.

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized.

The Committee is of the opinion to urge the DFO for taking requisite steps to complete the preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG'2016 and EMGSM'2020} and place the same for appraisal and final approval by the competent authority.

It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the development of infrastructure in progress specially to strengthen the road network connectivity which is a *sine qua non* for overall development and economic growth of the state while the impact on environment also require due diligence and consideration with proper safeguards. It is further appreciated that the important stakeholders like the Registered Qualified Person (RQP), Geologist from the Department of Geology and Mining, the Forest official, the official from the Water Resource Department are actively involved in the process for recommending mining in the area by way of consultation including site inspection before appraisal by the SEAC.

The Committee deem it appropriate to recommend the grant of EC by the SEIAA allowing extraction and harvesting of minor mineral for 1 (one) year, as recommended in the mining plan, with the quantity of **29,000**Cu M of Sand Gravel & Boulder@ **Sand 12,000 Cu M** ;@ **Gravel 10,000 Cu M** and@ **Boulder7,000 Cu M** with an observation that the DFO, Dima Hasao shall submit the approved DSR from the competent authority for further consideration of the balance quantity for further consideration of the project allowing mining by the proponent within a period of 1 (one) year and that the area in question is reflected in the DSR. This is necessitated in view of the process of development works being undertaken by the NHAI, a Govt of India undertaking as has been communicated by the concerned competent authority.

Decision: Recommended for grant of EC for **1 (one)** year only for **29,000**Cu M of Sand, Gravel & Boulder.

3.21.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 1.70Ha with quantity of 29,000 Cu M of Sand, Gravel & Boulder for 1 (one) year subject to the terms and conditions laid down by SEAC and that the area in question is reflected in the DSR.

3.21.4. Recommendation of SEIAA

Approved

3.21.5. Details of Environment Conditions

3.21.5.1. Specific

GENERAL CONDITIONS BY SEAC	
1.	1. This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan; 2. This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates ; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials and (c) the Proponent shall extract / harvest the approved quantity of minerals indicated herein with maximum mining depth of up to 2 (two) meters only from the non-mined surface (d) the DFO shall place the DSR for evaluation and appraisal by the SEAC for further approval by the SEIAA and on the basis of the approved DSR the proponent may come forward for the balance quantity remaining if found permissible for mining.
SPECIFIC CONDITIONS BY SEAC	
1.	• Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO. • The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. • The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan before allowing mining. • CSR activities shall be carried out / undertaken by the Proponent and 2% of the total project cost Rs 2**.00 Lakh (Two Lakh) only**shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the near by village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st year of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report. • Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands involving local NGOs, School / College students and an amount of Rs 2.00 (two) Lakh shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. • The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Agor(*Aquillaria malaccensis*), Amlokhi (*Phyllantus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*), Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*), Mohaneem (*Azedirachta indica*), Jamun (*Syzygium cuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpus integrifolia*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*) etc etc. Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.21.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee.
1.	The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC.
1.	Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA Notification, 2006 and its amendments therein
Air quality monitoring and mitigation measure	
1.	Adequate ambient air quality monitoring stations shall be established in the core zone as well as in the buffer zone for monitoring of pollutants, namely particulates, SO2 and NOx. Location of the stations shall be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive receptors in consultation with the State Pollution Control Board. Online ambient air quality monitoring station/stations may also be installed in addition to the regular air monitoring stations as per the requirement and/or in consultation with the SPCB
1.	Major approach roads shall be black topped and properly maintained.
1.	The transportation of coal shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the coal through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.
1.	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
Water quality monitoring and mitigation measures	
1.	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
1.	The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.
1.	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.

Noise and Vibration monitoring and prevention	
1.	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.
Mining Plan	
1.	Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable.
1.	No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
1.	Mining shall be carried out as per the approved mining plan (including Mine Closure Plan) abiding by mining laws related to coal mining and the relevant circulars issued by Directorate General Mines Safety (DGMS).
1.	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.
1.	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.
Land Recalmation	
1.	Native tree species shall be selected and planted over areas affected by subsidence.
Public hearing and Human health issues	
1.	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
1.	PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
1.	PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
1.	PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius
Corporate Environment Responsibility	
1.	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders.
1.	Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be

	carried out.
Miscellaneous	
1.	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently.
1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
1.	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	Compensation of the land acquired for the project shall be settled as per the R&R Policy. Adequate facility of drinking water, plantation and other social amenities should be provided to established R&R villages.
1.	Persons of nearby villages shall be given training on livelihood and skill development to make them employable with its proper records.
1.	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours

3.22. Agenda Item No 22:

3.22.1. Details of the proposal

Uttarayan Shreejoni - Extension of Residential Apartment & Commercial Building by **SHREEJONI REAL EST ATE** located at **KAMRUP METRO,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/INFRA2/450710/2023	SEIAA 3748/2024	19/04/2024	Building / Construction (8(a))

3.22.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :30/04/2024

Deliberations of SEAC 1 :

Relevant documents of the statutory bodies are placed before the Committee for scrutiny and deliberation. The consultant Dr K C Panda for **M/s OCEAO-ENVIRO Management Solutions (India) Private Limited** on behalf of the project Proponent (in presence of the applicant Sri Sanjeeb Ghosh) has made a presentation before the Committee. Requisite documents requiring clearances from the statutory bodies are uploaded including the EMP, Form 1A, Conceptual plan, land documents, NOC from the Gram Panchayat, NOC from the Airport Authority of India (AAI), Planning Permit from the GMDA etc etc.

The Committee deliberated upon the matter and also discussed on each of the relevant issues after presentation and under consideration. As the proposed project is falling within the Eco Sensitive Zone area of the Protected Area, the Committee is of the considered opinion for a site inspection of proposed project area for addressing the eminent and likely impact on the existing environment and the remedial measures to be taken in to consideration by the Proponent in view of the emerging forthcoming situations with reference to the critical location of the project in pursuance to the Section 5(d) of the Environment Clearance Regulation, 2006.

***Decision*:**

A sub-Committee so constituted for the purpose shall undertake site inspection of the project area and will have in-depth study of the project area and shall propose the measures to be taken by the Proponent while the construction phase and operational phase as the same may likely to have long term ramifications in maintenance of the environment including the aquatic and avi fauna in the Protected Area.

Date of SEAC 2 :09/07/2024

Deliberations of SEAC 2 :

Relevant documents of the statutory bodies are placed before the Committee for scrutiny and deliberation. The consultant Dr K C Panda for **M/s OCEAO-ENVIRO Management Solutions (India) Private Limited** on behalf of the project Proponent (in presence of the applicant Sri Sanjeeb Ghosh) has made a presentation before the Committee. Requisite documents requiring clearances from the statutory bodies are uploaded including the EMP, Form 1A, Conceptual plan, land documents, NOC from the Gram Panchayat, NOC from the Airport Authority of India (AAI), Planning Permit from the GMDA etc etc.

The Committee deliberated upon the matter and also discussed on each of the relevant issues after presentation and under consideration. As the proposed project is falling within the Eco Sensitive Zone area of the Protected Area, the Committee is of the considered opinion for a site inspection of proposed project area for addressing the eminent and likely impact on the existing environment and the remedial measures to be taken in to consideration by the Proponent in view of the emerging forthcoming situations with reference to the critical location of the project in pursuance to the Section 5(d) of the Environment Clearance Regulation, 2006.

Decision:

A sub-Committee so constituted for the purpose shall undertake site inspection of the project area and will have in-depth study of the project area and shall propose the measures to be taken by the Proponent while the construction phase and operational phase as the same may likely to have long term ramifications in maintenance of the environment including the aquatic and avifauna in the Protected Area.**"**

Field inspection report of the sub-Committee is reproduced as below:

Site Visit Report

Date: 26.06.2024

A. Proposal Information Order:

1. **Name of the Proposal** –Extension of EC for Residential Apartment and Commercial Buildin "Uttarayan Shreejoni" by Shreejoni Real Estate.
2. **Project ID (Online Proposal Number / Green Clearance Number)-** SIA/AS/INFRA2/450710/2023
3. **Name of the Company / Organization / User Agency** – Shreejoni Real Estate

D. Salient Features of the Project-

The proposed project is for Extension of EC for Residential Apartment and Commercial Buildin "Uttarayan Shreejoni".

The present Project proposed by the M/S Shreejoni Real Estate is for extension of the Residenti Apartment and Commercial Building at Village – Garal, Azara, Guwahati. The project is being develope

in phases i.e. Phase -1 and Phase- 2, under Category B-2 of schedule 8(a) to the EIA Notification, 200
Phase -1 : In the phase-1 the approved plan was below 20,000.00 sq m Built-up area i.e. 15257.46 sq n
which do not come within the purview of the requirement of Environment Clearance. The NOC from th
Gram Panchayat vide letter no. GGP/41/NOC/2018-19/04 dated 28.05.2019 was obtained for the purpose
Phase – 2 : Under the proposed extension of the plot area and FAR, total Built-up area of the project
projected at 41,172.88 sq m and the total area accounts for 56,430.34 sq m inclusive of Phase-1. As th
total Built up area of the proposed residential complex is 56,430.34 Sq m while the Plot area is 15,740 S
m, the project falls under Schedule 8(a) in Category-B of the EIA Notification, 2006. The proposed Gree
Belt to be established is earmarked with an area of 0.3153 Ha (33% of the Plot area). The proposed proje
is falling within the default boundary of the Eco Sensitive Zone (ESZ) of the Deepor Beel Wildli
Sanctuary, a Ramsar site as evident from the KML file. Total project cost is estimated at **Rs 123.90 Cror**

E. Composition of the Sub-Committee

Ref.: Order SEAC/3717/2024/69 dtd. 04.05.2024

1. **Name of the official** – Dr Shantanu Kr Dutta, Member Secretary, SEAC
   Dr Bijoy Sankar Goswami, Member, SEAC
   Sh Shantanoo Bhattacharyya, Member SEAC
   Dr. Rahul Mahanta, Member SEAC
   Shri Arup Barpujary, Member, SEAC
2. **Role in the Committee** – To inspect the site and assess the present status of the site and the probable impact on the natural environment in the surroundings during operational phase. The sub-committee is to submit their detail site inspection report with specific suggestion, observation for needful action.
3. **Details of the Site inspected** –
   i. Not any construction activity has been started by the PP [Photographs I & II in Annexure-I].
   ii. Cleaning of the site completed
4. **Duration –** 10.30 – 12.30 Hrs. on 10.04.2024.

F. Whether any violation of provision as per EIA Notification 2006 has been observed / recorded?
NO.

G. Additional Details, (if any)-

H. Comment -

i. The Sub-Committee observed that SEAC could consider for recommending the EC.**"**

The records and reports are placed before the Committee for due diligence and deliberation. The Committee after due discussion and deliberation is of the considered opinion to recommend the SEIAA for grant of the EC under the observance of the stipulated specific conditions.

Recommendation: Recommended for grant of EC. The DFO, Wildlife Division and the Chief Wildlife Warden, Assam be informed of the requirement of approval of the Conservation Plan for the Proponent in respect of the Deepor Beel Wildlife Sanctuary.

Date of SEIAA 3 :19/09/2024

Deliberations of SEIAA 3 :

ADS required-

1. Clarification from DFO, Wildlife will specifically mentioned the distance from the proposed site & Deepor Beel.
2. Ground water (CGW) extraction certificate/application.
3. CTO/CTE certificate/application.

3.22.3. Deliberations by the SEIAA in current meetings

EC is approved as per terms & conditions laid down by SEAC.

3.22.4. Recommendation of SEIAA

Approved

3.22.5. Details of Environment Conditions

3.22.5.1. Specific

SPECIFIC CONDITIONS BY SEAC	
1.	**i)** The Proponent shall develop greenery around the premises wherein the inmates could feel the benefits by raising plants of indigenous species, preferably of evergreen in nature having religious importance, health benefits having medicinal importance as also being of aesthetic value etc. (a) It was suggested by the Committee that the plant species preferably be are of Bael (*Aegle marmelos*), Giloy (*Tinospora cordifolia*), Bakul (*Mimosups elengi*), Nahor (*Mesua ferrea*), Ashoka (S*araca asoca*), Kanchan (*Bauhinia purpurea*), Rudrakhya (*Elaeocarps ganitrus*), Kadamba (*Neolamarckia cadamaba*), Joba (*Hibiscus rosa sinensis*), Sonaru (*Cassia fistula*), Putranjiba (*Putranjivaroxburghii*),Tezpatta (*Cinamomum tamala*), Dalchini (*Cinamomum zeylanicum*), Sewali phul (*Nyctanthes arbor tris tis*), Money plant (*Araceae* member), *Sanseviera zelanica*, indigenous flowering plant species of herbs and shrubs like Kamini Kusum (*Murraya paniculata*), Aparajita (*Clitorea ternatea*), Narasingha (*Murraya koengii*) etc etc. (b) The Committee suggested that the numbers of plants should not be restricted to the stipulations and the same should invariably be increased accordingly comprising of herbs, shrubs, climbers and trees, etc with touch of religious utility of flowering plants and effort to garner support from the inmates for future maintenance with their active support, particularly school going children. Efforts need to be put to get the plants with their scientific names, local names properly labeled showing medicinal value for appreciation by the inmates. ii) The Committee felt it expedient that the proponent shall make provision for a ***YOGA Hall*** (Yoga Centre for the inmates specially for the Children, the Women and as well for the ***elderly*** inmates) wherein a trained personnel in Yoga could be engaged to train the inmates adequately for a healthy living. iii) The Proponent shall comply the of conditions of Indian Green Building Council (IGBC) or *GRIHA* (Green Rating for Integrated Habitat Assessment) / LEEDS (Leadership in Energy and Environmental Development Systems). iv) Further, the STP is to be managed by the project Proponent for the period even after handing over the projects to the stakeholders. The PP shall have AMC with the STP provider for operation and maintenance for a period of at least 10 years at the initial / 1st instance and their maintenance shall be ensured by the PCB, Assam. v) Certificate from the Central Ground Water Authority for use of water in the Operational phase needs to be obtained by the Proponent. vi) The PP shall obtain Consent to establish (CTE) and Consent to operate (CTO) from Pollution Control Board, Assam under the provisions of the Water Act, 1974 and Air Act, 1981, as applicable vii) The cost earmarked for the environmental safeguards contained in the Environment Management Plan (EMP), as approved, amounting to **Rs 150.00** Lakh as Capital Cost and **Rs 20.50** Lakh as recurring cost per year against each of the components shall have to be utilized and shall not be diverted for any other purposes and year wise expenditures both in constructional and operational phases shall be reported to the PCB, Assam & SEIAA, the Regional Office, MoEF & CC, GoI, Guwahati along with the break up of expenditures for record and monitoring.

	viii) The total EMP Budget prepared is **Rs 170.50 Lakh** only which accounts for only **1.37%** of the total project which is around **Rs 124 Crore** only. The project Proponent needs to spend at least **2%** of the project cost which should have been **Rs 248.00 Lakh** and during deliberation it has been highlighted that no fund has been earmarked for the ECR activity so far the existence of the WL Sanctuary is concerned. For undertaking due Wildlife Conservation measures, the proponent shall take up for drawing up a plan (Conservation Plan) in consultation with the DFO, Wildlife, Guwahati and shall require due approval of the Chief Wildlife Warden, Assam for the Budget amounting to **Rs 70.00 Lakh** and shall be spent for the purpose. ix) It shall be bounden on the project Proponent to up load the Half Yearly Compliance Report (HCR) in terms of the guidelines circulated under **OM No. IA3-22/1/2022-IA.III Dated 14.06.2024** by the ministry in the MoEF & CC, GoI.

3.22.5.2. Standard

8(a)	**Building / Construction**
Statutory compliance	
1.	The project proponent shall obtain all necessary clearance/ permission from all relevant agencies including town planning authority before commencement of work. All the construction shall be done in accordance with the local building byelaws.
1.	The approval of the Competent Authority shall be obtained for structural safety of buildings due to earthquakes, adequacy of firefighting equipment etc. as per National Building Code including protection measures from lightening etc.
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1980, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State Pollution Control Board/ Committee.
1.	The project proponent shall obtain the necessary permission for drawl of ground water / surface water required for the project from the competent authority.
1.	A certificate of adequacy of available power from the agency supplying power to the project along with the load allowed for the project should be obtained.
1.	All other statutory clearances such as the approvals for storage of diesel from Chief Controller of Explosives, Fire Department, Civil Aviation Department shall be obtained, as applicable, by project proponents from the respective competent authorities.
1.	The provisions of the Solid Waste Management Rules, 2016, e-Waste (Management) Rules, 2016, and the Plastics Waste Management Rules, 2016, shall be followed.
1.	The project proponent shall follow the ECBC/ECBC-R prescribed by Bureau of Energy Efficiency, Ministry of Power strictly.
Air quality monitoring and preservation	
1.	Notification GSR 94(E) dated 25.01.2018 of MoEF&CC regarding Mandatory Implementation of Dust Mitigation

	Measures for Construction and Demolition Activities for projects requiring Environmental Clearance shall be complied with.
1.	A management plan shall be drawn up and implemented to contain the current exceedance in ambient air quality at the site.
1.	The project proponent shall install system to carryout Ambient Air Quality monitoring for common/criterion parameters relevant to the main pollutants released (e.g. PM10 and PM2.5) covering upwind and downwind directions during the construction period.
1.	Diesel power generating sets proposed as source of backup power should be of enclosed type and conform to rules made under the Environment (Protection) Act, 1986. The height of stack of DG sets should be equal to the height needed for the combined capacity of all proposed DG sets. Use of low sulphur diesel. The location of the DG sets may be decided with in consultation with State Pollution Control Board.
1.	Construction site shall be adequately barricaded before the construction begins. Dust, smoke & other air pollution prevention measures shall be provided for the building as well as the site. These measures shall include screens for the building under construction, continuous dust/ wind breaking walls all around the site (at least 3-meter height). Plastic/tarpaulin sheet covers shall be provided for vehicles bringing in sand, cement, murram and other construction materials prone to causing dust pollution at the site as well as taking out debris from the site.
1.	Sand, murram, loose soil, cement, stored on site shall be covered adequately so as to prevent dust pollution.
1.	Wet jet shall be provided for grinding and stone cutting.
1.	Unpaved surfaces and loose soil shall be adequately sprinkled with water to suppress dust.
1.	All construction and demolition debris shall be stored at the site (and not dumped on the roads or open spaces outside) before they are properly disposed. All demolition and construction waste shall be managed as per the provisions of the Construction and Demolition Waste Management Rules 2016.
1.	The diesel generator sets to be used during construction phase shall be low sulphur diesel type and shall conform to Environmental (Protection) prescribed for air and noise emission standards.
1.	The gaseous emissions from DG set shall be dispersed through adequate stack height as per CPCB standards. Acoustic enclosure shall be provided to the DG sets to mitigate the noise pollution. Low sulphur diesel shall be used. The location of the DG set and exhaust pipe height shall be as per the provisions of the Central Pollution Control Board (CPCB) norms.
1.	For indoor air quality the ventilation provisions as per National Building Code of India.
Water quality monitoring and preservation	
1.	The natural drain system should be maintained for ensuring unrestricted flow of water. No construction shall be allowed to obstruct the natural drainage through the site, on wetland and water bodies. Check dams, bio-swales, landscape, and other sustainable urban drainage systems (SUDS) are allowed for maintaining the drainage pattern and to harvest rain water.
1.	Buildings shall be designed to follow the natural topography as much as possible. Minimum cutting and filling should be done.
1.	Total fresh water use shall not exceed the proposed requirement as provided in the project details.
1.	The quantity of fresh water usage, water recycling and rainwater harvesting shall be measured and recorded to monitor the water balance as projected by the project proponent. The record shall be submitted to the Regional Office, MoEF&CC along with six monthly Monitoring reports.

1.	A certificate shall be obtained from the local body supplying water, specifying the total annual water availability with the local authority, the quantity of water already committed, the quantity of water allotted to the project under consideration and the balance water available. This should be specified separately for ground water and surface water sources, ensuring that there is no impact on other users.
1.	At least 20% of the open spaces as required by the local building bye-laws shall be pervious. Use of Grass pavers, paver blocks with at least 50% opening, landscape etc. would be considered as pervious surface.
1.	Installation of dual pipe plumbing for supplying fresh water for drinking, cooking and bathing etc and other for supply of recycled water for flushing, landscape irrigation, car washing, thermal cooling, conditioning etc. shall be done.
1.	Use of water saving devices/fixtures (viz. low flow flushing systems; use of low flow faucets tap aerators etc) for water conservation shall be incorporated in the building plan.
1.	Separation of grey and black water should be done by the use of dual plumbing system. In case of single stack system separate recirculation lines for flushing by giving dual plumbing system be done.
1.	Water demand during construction should be reduced by use of pre-mixed concrete, curing agents and other best practices referred.
1.	The local bye-law provisions on rain water harvesting should be followed. If local bye-law provision is not available, adequate provision for storage and recharge should be followed as per the Ministry of Urban Development Model Building Byelaws, 2016. Rain water harvesting recharge pits/storage tanks shall be provided for ground water recharging as per the CGWB norms.
1.	A rain water harvesting plan needs to be designed where the recharge bores of minimum one recharge bore per 5,000 square meters of built up area and storage capacity of minimum one day of total fresh water requirement shall be provided. In areas where ground water recharge is not feasible, the rain water should be harvested and stored for reuse. The ground water shall not be withdrawn without approval from the Competent Authority.
1.	All recharge should be limited to shallow aquifer.
1.	No ground water shall be used during construction phase of the project.
1.	Any ground water dewatering should be properly managed and shall conform to the approvals and the guidelines of the CGWA in the matter. Formal approval shall be taken from the CGWA for any ground water abstraction or dewatering.
1.	The quantity of fresh water usage, water recycling and rainwater harvesting shall be measured and recorded to monitor the water balance as projected by the project proponent. The record shall be submitted to the Regional Office, MoEF&CC along with six monthly Monitoring reports.
1.	Sewage shall be treated in the STP with tertiary treatment. The treated effluent from STP shall be recycled/re-used for flushing, AC make up water and gardening. As proposed, no treated water shall be disposed in to municipal drain.
1.	No sewage or untreated effluent water would be discharged through storm water drains.
1.	Onsite sewage treatment of capacity of treating 100% waste water to be installed. The installation of the Sewage Treatment Plant (STP) shall be certified by an independent expert and a report in this regard shall be submitted to the Ministry before the project is commissioned for operation. Treated waste water shall be reused on site for landscape, flushing, cooling tower, and other end-uses. Excess treated water shall be discharged as per statutory norms notified by Ministry of Environment, Forest and Climate Change. Natural treatment systems shall be promoted.
1.	Periodical monitoring of water quality of treated sewage shall be conducted. Necessary measures should be made

	to mitigate the odour problem from STP.
1.	Sludge from the onsite sewage treatment, including septic tanks, shall be collected, conveyed and disposed as per the Ministry of Urban Development, Central Public Health and Environmental Engineering Organization (CPHEEO) Manual on Sewerage and Sewage Treatment Systems, 2013.
Noise monitoring and prevention	
1.	Ambient noise levels shall conform to residential area/commercial area/industrial area/silence zone both during day and night as per Noise Pollution (Control and Regulation) Rules, 2000. Incremental pollution loads on the ambient air and noise quality shall be closely monitored during construction phase. Adequate measures shall be made to reduce ambient air and noise level during construction phase, so as to conform to the stipulated standards by CPCB / SPCB.
1.	Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six-monthly compliance report.
1.	Acoustic enclosures for DG sets, noise barriers for ground-run bays, ear plugs for operating personnel shall be implemented as mitigation measures for noise impact due to ground sources.
Energy Conservation measures	
1.	Compliance with the Energy Conservation Building Code (ECBC) of Bureau of Energy Efficiency shall be ensured. Buildings in the States which have notified their own ECBC, shall comply with the State ECBC.
1.	Outdoor and common area lighting shall be LED.
1.	Concept of passive solar design that minimize energy consumption in buildings by using design elements, such as building orientation, landscaping, efficient building envelope, appropriate fenestration, increased day lighting design and thermal mass etc. shall be incorporated in the building design. Wall, window, and roof u-values shall be as per ECBC specifications.
1.	Energy conservation measures like installation of CFLs/ LED for the lighting the area outside the building should be integral part of the project design and should be in place before project commissioning.
1.	Solar, wind or other Renewable Energy shall be installed to meet electricity generation equivalent to 1% of the demand load or as per the state level/ local building bye-laws requirement, whichever is higher.
1.	Solar power shall be used for lighting in the apartment to reduce the power load on grid. Separate electric meter shall be installed for solar power. Solar water heating shall be provided to meet 20% of the hot water demand of the commercial and institutional building or as per the requirement of the local building bye-laws, whichever is higher. Residential buildings are also recommended to meet its hot water demand from solar water heaters, as far as possible.
Waste Management	
1.	A certificate from the competent authority handling municipal solid wastes, indicating the existing civic capacities of handling and their adequacy to cater to the M.S.W. generated from project shall be obtained.
1.	Disposal of muck during construction phase shall not create any adverse effect on the neighbouring communities and be disposed taking the necessary precautions for general safety and health aspects of people, only in approved sites with the approval of competent authority.
1.	Separate wet and dry bins must be provided in each unit and at the ground level for facilitating segregation of waste. Solid waste shall be segregated into wet garbage and inert materials.
1.	Organic waste compost/Vermiculture pit/Organic Waste Converter within the premises with a minimum capacity

	of 0.3 kg /person/day must be installed.
1.	All non-biodegradable waste shall be handed over to authorized recyclers for which a written tie up must be done with the authorized recyclers.
1.	Any hazardous waste generated during construction phase, shall be disposed off as per applicable rules and norms with necessary approvals of the State Pollution Control Board.
1.	Use of environment friendly materials in bricks, blocks and other construction materials, shall be required for at least 20% of the construction material quantity. These include Fly Ash bricks, hollow bricks, AACs, Fly Ash Lime Gypsum blocks, Compressed earth blocks, and other environment friendly materials.
1.	Fly ash should be used as building material in the construction as per the provision of Fly Ash Notification of September, 1999 and amended as on 27th August, 2003 and 25th January, 2016. Ready mixed concrete must be used in building construction.
1.	Any wastes from construction and demolition activities related thereto shall be managed so as to strictly conform to the Construction and Demolition Waste Management Rules, 2016.
1.	Used CFLs and TFLs should be properly collected and disposed off/sent for recycling as per the prevailing guidelines/ rules of the regulatory authority to avoid mercury contamination.
Green Cover	
1.	No tree can be felled/transplant unless exigencies demand. Where absolutely necessary, tree felling shall be with prior permission from the concerned regulatory authority. Old trees should be retained based on girth and age regulations as may be prescribed by the Forest Department. Plantations to be ensured species (cut) to species (planted).
1.	A minimum of 1 tree for every 80 sqm of land should be planted and maintained. The existing trees will be counted for this purpose. The landscape planning should include plantation of native species. The species with heavy foliage, broad leaves and wide canopy cover are desirable. Water intensive and/or invasive species should not be used for landscaping.
1.	Where the trees need to be cut with prior permission from the concerned local Authority, compensatory plantation in the ratio of 1:10 (i.e. planting of 10 trees for every 1 tree that is cut) shall be done and maintained. Plantations to be ensured species (cut) to species (planted). Area for green belt development shall be provided as per the details provided in the project document.
1.	Topsoil should be stripped to a depth of 20 cm from the areas proposed for buildings, roads, paved areas, and external services. It should be stockpiled appropriately in designated areas and reapplied during plantation of the proposed vegetation on site.
Transport	
1.	A comprehensive mobility plan, as per MoUD best practices guidelines (URDPFI), shall be prepared to include motorized, non-motorized, public, and private networks. Road should be designed with due consideration for environment, and safety of users. The road system can be designed with these basic criteria. a. Hierarchy of roads with proper segregation of vehicular and pedestrian traffic. b. Traffic calming measures. c. Proper design of entry and exit points. d. Parking norms as per local regulation.
1.	Vehicles hired for bringing construction material to the site should be in good condition and should have a pollution check certificate and should conform to applicable air and noise emission standards be operated only during non-peak hours.
null	

1.	A detailed traffic management and traffic decongestion plan shall be drawn up to ensure that the current level of service of the roads within a 05 kms radius of the project is maintained and improved upon after the implementation of the project. This plan should be based on cumulative impact of all development and increased habitation being carried out or proposed to be carried out by the project or other agencies in this 05 Kms radius of the site in different scenarios of space and time and the traffic management plan shall be duly validated and certified by the State Urban Development department and the P.W.D./ competent authority for road augmentation and shall also have their consent to the implementation of components of the plan which involve the participation of these departments.
Human health issues	
1.	All workers working at the construction site and involved in loading, unloading, carriage of construction material and construction debris or working in any area with dust pollution shall be provided with dust mask.
1.	For indoor air quality the ventilation provisions as per National Building Code of India.
1.	Emergency preparedness plan based on the Hazard identification and Risk Assessment (HIRA) and Disaster Management Plan shall be implemented.
1.	Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, crèche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.
1.	Occupational health surveillance of the workers shall be done on a regular basis.
1.	A First Aid Room shall be provided in the project both during construction and operations of the project.
Miscellaneous	
1.	The project proponent shall prominently advertise it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days indicating that the project has been accorded environment clearance and the details of MoEFCC/SEIAA website where it is displayed.
1.	ii. environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The company shall have a well laid down environmental policy duly approved by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders. The copy of the board resolution in this regard shall be submitted to the MoEF&CC as a part of six-monthly report.
1.	A separate Environmental Cell both at the project and company head quarter level, with qualified personnel shall be set up under the control of senior Executive, who will directly report to the head of the organization.
1.	Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose.

	Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the Six Monthly Compliance Report
1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
1.	The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	The project proponent shall abide by all the commitments and recommendations made in the EIA/EMP reportand also that during their presentation to the Expert Appraisal Committee.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forest and Climate Change (MoEF&CC).
1.	Concealing factual data or submission of false/fabricated data may result in revocation of this environmental clearance and attract action under the provisions of Environment (Protection) Act, 1986.
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	The above conditions shall be enforced, inter-alia under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986, Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016, and the Public Liability Insurance Act, 1991 along with their amendments and Rules and any other orders passed by the Hon'ble Supreme Court of India / High Courts and any other Court of Law relating to the subject matter.
1.	Any appeal against this EC shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.
Specific Conditions	
1.	Recommendations of mitigation measures from possible accident shall be implemented based on Risk Assessment studies conducted for worst case scenarios using latest techniques.

4. Any Other Item(s)

Subject: Grant of EC under the provision of the EIA Notification 2006-regarding.

Sir/Madam,

This is in reference to your application for Grant of EC under the provision of the EIA Notification 2006-regarding in respect of project 1 No. Suagpur Village Patta Land Sand and Sand Gravel Mining Permit Area submitted to Parivesh Portal vide proposal number SIA/AS/MIN/468295/2024 dated 23/08/2024.

2. The particulars of the proposal are as below :

(i) EC Identification No.	EC24C0108AS5555926N
(ii) File No.	SEAC/SEIAA 3878/2024
(iii) Clearance Type	EC
(iv) Category	B2
(v) Project/Activity Included Schedule No.	1(a) Mining of minerals
(vii) Name of Project	1 No. Suagpur Village Patta Land Sand and Sand Gravel Mining Permit Area
(viii) Name of Company/Organization	SHREE GAUTAM CONSTRUCTION CO. LTD
(ix) Location of Project (District, State)	BAKSA, ASSAM
(x) Issuing Authority	SEIAA
(xii) Applicability of General Conditions	no
(xiii) Applicability of Specific Conditions	no

In view of the particulars given in the Para 1 above, the project proposal interalia including Form-1(Part A and B) were submitted to the State Expert Appraisal Committee (SEAC), Assam under the provision of EIA notification 2006 and its subsequent amendments.

The above-mentioned proposal has been considered by State Expert Appraisal Committee (SEAC) in the meeting held on 09/09/2024. The minutes of the meeting and all the Application and documents submitted (viz. Form-1 Part A and Part B) are available on PARIVESH portal which can be accessed by scanning the QR Code above.

The brief about configuration of plant/equipment, products and by products and salient features of the project along with environment settings, as submitted by the Project proponent in Form-1 (Part A and B) /presented during SEIAA are annexed to this EC as Annexure (1).

The SEIAA, in its meeting held on 08/10/2024, based on information & clarifications provided by the project proponent and after detailed deliberations recommended the proposal for grant of EC under the provision of EIA Notification, 2006 and as amended thereof subject to stipulation of specific and general conditions as detailed in Annexure (2).

The SEAC has examined the proposal in accordance with the Environment Impact Assessment (EIA) Notification, 2006 & further amendments thereto and after recommendations of the State Environment Impact Assessment Authority (SEIAA) hereby decided to grant EC for instant proposal of **BABULAL SWAMI, SHREE GAUTAM CONSTRUCTION CO. LTD** under the provisions of EIA Notification, 2006 and as amended thereof.

The SEIAA reserves the right to stipulate additional conditions, if found necessary.

The EC to the aforementioned project is under provisions of EIA Notification, 2006. It does not tantamount to approvals/consent/permissions etc. required to be obtained under any other Act/Rule/regulation. The Project Proponent is under obligation to obtain approvals /clearances under any other Acts/ Regulations or Statutes, as applicable, to the project.

This issues with the approval of the Competent Authority.

The GPS Coordinates are as follows-

Latitude	**Longitude**
26.66364	**91.68973**
26.66347	**91.69057**
26.66236	**91.68925**
26.66237	**91.68978**

EC is approved for project area allotted 4.20Ha and mining area 4.06Ha with quantity of 25,000 cum of Sand & Clay for 1 (One) year subject to the terms and conditions laid down by SEAC and that the area in question is reflected in the DSR.

Copy To

1. The Joint Secretary, Ministry of Environment, Forest and Climate Change, Government of India, MOEF&CC, Indira Paryavaran Bhawan, Jorbagh Rd, New Delhi-110003.
2. The Secretary to the Govt. of Assam, Environment & Forest Department, Dispur, Guwahati-6 Cum Member Secretary, SEIAA, Assam for favour of kind information.
3. The P.C.C.F, HoFF, Govt. of Assam, Panjabari, Guwahati-37 for favour of kind information.
4. The Member Secretary, PCB Assam for favour of kind information.
5. The Divisional Forest Officer, Baksa Forest Division, Mushalpur, Dist. Baksa, BTAD, Assam for information & necessary action to ensure that all **Specific Conditions & General Condition** are complied with.
6. The Integrated Regional Office, Ministry of Environment, Forest & Climate Change, 4th Floor, Housefed Building, G.S. Road, Rukminigaon, Guwahati-22 for kind information.
7. Office Copy.

Annexure 1

Specific EC Conditions for (Mining Of Minerals)

1. General Conditions By Seac

S. No	EC Conditions
1.1	1. This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan; 2. This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates ; (b) the Proponent shall extract / harvest the approved quantity of minerals indicated herein with maximum mining depth of up to 2 (two) meters only from the non-mined surface; (c) the river banks are not damaged due to extraction of minor mineral and (d) the DFO shall place the DSR for evaluation and appraisal by the SEAC for further approval by the SEIAA and on the basis of the approved DSR the proponent may come forward for the quantity if found permissible for mining.

2. Specific Conditions By Seac

S. No	EC Conditions
2.1	· Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO. · The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. · The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan before allowing mining. · CSR activities shall be carried out / undertaken by the Proponent and 2% of the total project cost **Rs 50,000 (Fifty Thousand**) only shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the near by village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st year of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report. · Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands involving local NGOs, School / College students and an amount of Rs 50,000 **(fifty thousand)** only, shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. · The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Agor(*Aquillaria malaccensis*), Amlokhi (*Phyllantus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*), Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*), Mohaneem (*Azedirachta indica*), Jamun (*Syzygium cuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpus integrifolia*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*) etc etc. Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

Standard EC Conditions for (Mining of minerals)

1. Statutory Compliance

S. No	EC Conditions
1.1	The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
1.2	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.3	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.4	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee.
1.5	The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC.
1.6	Validity of EC is as per life of the mine mentioned in EC letter.

2. Air Quality Monitoring And Mitigation Measure

S. No	EC Conditions
2.1	Adequate ambient air quality monitoring stations shall be established in the core zone as well as in the buffer zone for monitoring of pollutants, namely particulates, SO2 and NOx. Location of the stations shall be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive receptors in consultation with the State Pollution Control Board. Online ambient air quality monitoring station/stations may also be installed in addition to the regular air monitoring stations as per the requirement and/or in consultation with the SPCB
2.2	Major approach roads shall be properly maintained with dust suppression measures and the river bank in any case must not be damaged.
2.3	The transportation of materials shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the materials through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.
2.4	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.

3. Water Quality Monitoring And Mitigation Measures

S. No	EC Conditions
3.1	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.

S. No	EC Conditions
3.2	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the mine site upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.
3.3	The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.

4. Noise And Vibration Monitoring And Prevention

S. No	EC Conditions
4.1	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
4.2	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.

5. Mining Plan

S. No	EC Conditions
5.1	Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable.
5.2	No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
5.3	Mining shall be carried out as per the approved mining plan (including Mine Closure Plan) abiding by mining laws.
5.4	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.
5.5	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.

6. Land Recalmation

S. No	EC Conditions
6.1	Native tree species shall be selected and planted over areas affected by subsidence.

7. Public Hearing And Human Health Issues

S. No	EC Conditions
7.1	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
7.2	PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
7.3	PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
7.4	PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius

8. Corporate Environment Responsibility

S. No	EC Conditions
8.1	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders.
8.2	Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.

9. Miscellaneous

S. No	EC Conditions
9.1	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent’s website permanently.
9.2	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
9.3	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly

S. No	EC Conditions
	basis.
9.4	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
9.5	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
9.6	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
9.7	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
9.8	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
9.9	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
9.10	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
9.11	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
9.12	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours

ANNEXURE A-18

Item No.01 Court No.1

BEFORE THE NATIONAL GREEN TRIBUNAL
EASTERN ZONE BENCH, KOLKATA
(THROUGH PHYSICAL HEARING WITH HYBRID MODE)

Original Application No.05/2025/EZ

Atanu Borthakur Applicant(s)

Versus

Union of India & Ors. Respondent(s)

Date of hearing: 17.01.2025

CORAM: HON'BLE MR. JUSTICE B. AMIT STHALEKAR, JUDICIAL MEMBER
HON'BLE DR. AFROZ AHMAD, EXPERT MEMBER

For Applicant(s) : Mr. Anand Verma, Adv. a/w
Mr. Ashish Choudhury, Adv. and
Mr. Akash Agarwal, Adv. (in Virtual Mode)

ORDER

1. Heard Mr. Anand Verma assisted by Mr. Ashish Choudhury and Mr. Akash Agarwal, learned Counsel appearing (in Virtual Mode) on behalf of the Applicant.

2. The Applicant in this Original Application has alleged that illegal mining of sand, gravel, stone and other minerals is being carried on in the District Udalguri, State of Assam and there is no District Survey Report ('DSR' for short) for the same till date.

3. It is alleged that there is no District Survey Report in the District Udalguri, State of Assam and no mining activity is permissible in the absence of a valid D.S.R. which is duly considered by the State Level Expert Appraisal Committee (SEAC) and recommended and duly approved by the State Level Environment Impact Assessment Authority ('SEIAA' for short).

4. It is alleged that from the portal of the Government of Assam, Mines and Minerals, Directorate of Geology and Mining, the Applicant has obtained information and details of approved mining plan as on 2021 which shows that the Respondent No.8 has been granted

lease to mine sand gravel from Tarajuli Sand Gravel Mahal (Dhansiri river), District Udalguri, BTAD, Assam for a period of five years commencing from 07.10.2021 for an area of 4.80 hectares. It is also alleged that the Respondent No.9 has been granted mining lease to mine sand from Lower Dhansiri S/S–Mahal–B, Dist. Udalguri, B.T.C. Assam for a period of seven years commencing from 23.02.2018 for an area of 4.00 hectares. It is further alleged that the Respondent No.9 has also been granted mining lease to mine sand from Lower Dhansiri S/S–Mahal–B, Mining Permit Area, District Udalguri, B.T.C. for a period of seven years commencing from 24.05.2018 for an area of 3.68 hectares. It is also alleged that the Respondent No.10 has been granted mining lease to mine sand/gravel from Bhorala Boulder Sand/Gravel Mahal No.2, District Udalguri, BTAD, Assam for a period of seven years commencing from 31.07.2018 for an area of 4.60 hectares.

5. The allegation of the Applicant further is that the Respondent No.11 has been granted mining lease to mine stone and earth from Samrang Newly Gravel & Earth Mahal Mining Permit Area, District Udalguri, BTAD, Assam for a period of seven years commencing from 16.05.2018 for an area of 3.21 hectares.

6. The Applicant has also referred to the directions issued by the Tribunal in Original Application No.86/2024/EZ *(Pradeep Singh Shekhawat -Vs.- Union of India)* wherein the Tribunal has held that District Survey Report is mandatory for mining of minor minerals.

7. The documents on record at page 590 of the paper book at Item No.4, 6, 8 and 10 which pertains to the District Udalguri, State of Assam shows under the heading 'Status (Working/Closed)' as "**Running**".

8. Further, the document at page 1057 of the paper book shows that for the district of Udalguri at Item No.19, 23, 24, 27, 28, 30, 46 and 58, Consent to Operate (CTOs) has already been issued.

9. Mr. Anand Verma, learned Counsel for the Applicant has referred to the document at page 578, 'Annexure A-13' of the paper book to show that the District Survey Report (D.S.R.) of Udalguri District (for sand or riverbed mining) is a draft Report and the same has not been approved by the State Environment Impact Assessment Authority (SEIAA), Assam.

10. This Court in Original Application No.86/2024/EZ *(Pradeep Singh Shekhawat -Vs.- Union of India)* has already stayed mining activities within the State of Assam where District Survey Report (D.S.R.) has not been approved by the State Environment Impact Assessment Authority (SEIAA), Assam.

11. In Original Application No.84/2023/EZ *Abani Kumar Sahu -Vs- State of Odisha,* this Tribunal in para 36 and 37 has held as under :-

> ***36.*** ***"****We, therefore, dispose of this Original Application with a direction that no sand mining shall be carried out in the Rayanramchandrapur Sand Source along the Subarnarekha River in the absence of a District Survey Report in District Balasore duly approved by SEIAA, Odisha.*
>
> ***37.*** *The SEIAA, Odisha, shall take necessary action to pass order for revocation of the Environmental Clearance granted by it illegally in favour of Respondent No.8 forthwith. It is further directed that in case sand mining operation is still being carried out in Rayanramchandrapur sand quarry in question, the SEIAA, Odisha, shall also take steps to ensure that such sand mining operation is ceased forthwith. It is also provided that our order hereinabove shall not come in the way of the Respondents*

*initiating criminal proceedings against the Respondent No.8 if any, as per law.***"**

12. Further, while deciding Appeal No.18/2023/EZ *Haripada Manna -Vs- State of Odisha,* this Tribunal in para 18 and 19, has held as under :-

> ***18.*** *"With regard to Replenishment Study, para 5.0 of the Enforcement and Monitoring Guidelines for Sand Mining, January, 2020, issued by the Ministry of Environment, Forests and Climate Change, enjoins that the need for replenishment study for river bed sand is required in order to nullify the adverse impacts arising due to excessive sand extraction. Para 5.0 of the Guidelines, 2020, reads as under:-*
>
> *"……xxx……xxx……xxx……*
>
> ***5.0 REPLENISHMENT STUDY***
>
> *The need for replenishment study for river bed sand is required in order to nullify the adverse impacts arising due to excessing sand extraction. Mining within or near riverbed has a direct impact on the stream's physical characteristics, such as channel geometry, bed elevation, substratum composition and stability, instream roughness of the bed, flow velocity, discharge capacity, sediment transport capacity, turbidity, temperature etc. Alteration or modification of the above attributes may cause an impact on the ecological equilibrium of the riverine regime, disturbance in channel configuration and flow-paths. This may also cause an adverse impact on instream biota and riparian habitats. It is assumed that the riparian habitat disturbance is minimum if the replenishment is equal to excavation for a given stretch. Therefore, to minimize the adverse impact arising out of sand mining in a given river stretch, it is imperative to have a study of replenishment of material during the defined period."*
>
> ***19.*** *In the present case, in view of the letter of the Collector & District Magistrate, Balasore, dated 30.05.2024, since no Replenishment*

Study has been carried out in the District-Balasore, the impugned order of approval of the District Survey Report vide impugned order dated 26.04.2023 is liable for revocation and cannot be acted upon. In the absence of Replenishment Study in the District Balasore, duly considered by State Expert Appraisal Committee and approved by SEIAA, Odisha, no sand mining can be carried out in the stretch of the Subarnarekha river passing through the District Balasore. We accordingly allow the present Appeal and quash the impugned order dated 26.04.2023."

13. We direct the District Commissioner Udalguri District, Assam to ensure that if District Survey Report (D.S.R.) has not been approved by the SEIAA, Assam for Udalguri District, all mining activities within the district shall remain stayed.

14. Matter requires consideration.

15. Issue notice to the Respondents, returnable within four weeks.

16. Ms. Malabika Roy Dey, learned Counsel who is present in Court, accepts notice on behalf of the Respondent Nos.2, 3, 6 and 7, State Respondents, Government of Assam.

17. Mr. Shayamvar Deb, learned Counsel who is present in Court, states that he has instructions to represent the Assam State Pollution Control Board. Learned Counsel accepts notice on behalf of the Respondent Nos.4, Assam State Pollution Control Board.

18. Ms. Amrita Pandey, learned Counsel who is present (in Virtual Mode), accepts notice on behalf of the Respondent Nos.5, State Environment Impact Assessment Authority (SEIAA), Assam.

19. Issue notice to the Respondent Nos.1, 8, 9, 10 and 11, returnable within four weeks.

20. All the Respondents shall file their counter affidavits within four weeks.

21. Considering the allegations made in the Original Application, we deem it appropriate to constitute a Fact Finding Committee comprising of the following members:-

    i) Senior Scientist, Assam State Pollution Control Board;

    ii) District Commissioner, Udalguri District, Assam or his Representative not below the rank of Additional District Magistrate (A.D.M.); and

    iii) Director of Geology and Mining, Environment and Forest Department, Government of Assam or his Representative Officer.

22. The Committee shall visit the site in question and submit its Report on affidavit within three weeks with regard to the allegations made in the Original Application, particularly with reference to the document filed at page 590 of the paperbook, which, at Item 4, 6, 8 and 10, pertaining to District Udalguri, Assam, shows the status of sand mines under the heading **'Status'** as **'Running'**.

23. The District Commissioner, Udalguri District, Assam shall be the Nodal office for all logistic purposes and for filing the Fact finding Report on affidavit.

24. The Committee shall also examine whether any mining is being carried on in the District Udalguri other than by the Respondent Nos.8, 9, 10 and 11. If any further illegal mining is found, the Committee shall identify the violator, make appropriate recommendations and action to be taken in this regard.

25. All the Respondents shall file their counter affidavits within four weeks.

26. Mr. Anand Verma, learned Counsel for the Applicant shall serve e-copy/soft copy of the Original Application along with all its annexures upon Ms. Malabika Roy Dey, Mr. Shayamvar Deb and Ms. Amrita Pandey, Counsel for the Respondents, within 24 hours.

27. **List on 18.02.2025**.

For Applicant(s) : Mr. Anand Verma, Adv. a/w
(in EA 03/2025/EZ)
For Respondent(s) : Ms. Malabika Roy Dey, Adv. for R-2,3,6&7,
Mr. Shayambar Deb, Adv. for R-4 (in Virtual Mode)
Ms. Rashhmi Singhee, Adv. for SEIAA, Assam (in Virtual Mode),

For Applicant(s) : Mr. Anand Verma, Adv. a/w
(in OA 05/2025/EZ)
For Respondent(s) : Ms. Malabika Roy Dey, Adv. for R-2,3,6&7,
Mr. Shayambar Deb, Adv. for R-4 (in Virtual Mode),
Ms. Amrita Pandey, Adv. for R-5 (in Virtual Mode)

ORDER

1. Mr. Anand Verma, learned Counsel is present (in Virtual Mode) on behalf of the Applicant.

2. Affidavit dated 27.02.2025 has been filed on behalf of the Respondent No.4, Assam State Pollution Control Board; the same is taken on record.

3. Rejoinder affidavit dated 01.04.2025 has been filed by the Applicant; the same is taken on record.

4. In paragraph 4 of the affidavit of State Environment Impact Assessment Authority (SEIAA), Assam dated 13.02.2025, it is

stated that the process for scrutiny of the draft DSR of Udalguri District is presently going on.

5. Ms. Rashhmi Singhee, learned Counsel appearing (in Virtual Mode) on behalf of the SEIAA, Assam states that the process of consideration of DSR is going on and appropriate orders may be passed within ten days. This statement is endorsed by Ms. Malabika Roy Dey, learned Counsel appearing for the State of Assam.

6. Question is when the DSR has not yet been approved for Udalguri District, how was the Environmental Clearance granted by SEIAA, Assam to the Project Proponent on 08.03.2022. Question also arises as to how the Consent to Operate (CTO) and Consent to Establish (CTE) was granted by the Assam State Pollution Control Board on 22.07.2024 when the DSR for Udalguri District has not yet been approved and finalized.

7. Ms. Rashhmi Singhee for SEIAA, Assam, Ms. Malabika Roy Dey for State of Assam and Mr. Shayambar Deb for Assam State Pollution Control Board shall file affidavit to the short question explaining as to how the Environmental Clearance, Consent to Operate and Consent to Establish were granted to the Project Proponent to carry on sand mining.

8. The photographs which have been filed from pages 1166 to 1168 (Colly) clearly show that mining is going on at Railway Station Road, Bajarajhar, Mora Dhansiri, Assam as on 27.02.2025 which dates are mentioned in the photographs itself. The State Respondents, SEIAA, Assam and the Assam State Pollution Control Board shall explain themselves on affidavit and the action taken.

9. All the Respondents shall submit their reply to the rejoinder affidavit and the photographs appended thereto.

10. The Counsel for the parties shall exchange their affidavits among themselves before the next date fixed.

11. **List on 08.07.2025.**

PREFACE

This Report for the years ended 31 March 2021 and 31 March 2022 has been prepared for submission to the Governor of Assam under Article 151 of the Constitution of India.

The Report contains significant results of the performance audit and compliance audit of the Departments of the Government of Assam under Revenue Sector including Departments of Finance (Taxation), Transport, Environment and Forests, Revenue and Disaster Management and Mines and Minerals.

The instances mentioned in this Report are those, which came to notice in the course of test audit for the periods 2020-21 and 2021-22 as well as those which came to notice in earlier years, but could not be reported in the previous Audit Reports, instances relating to the period subsequent to 2021-22 have also been included, wherever necessary.

The Audit has been conducted in conformity with the Auditing Standards issued by the Comptroller and Auditor General of India.

OVERVIEW

Overview

This Report contains twelve paragraphs including one Subject Specific Compliance Audit on "Department's oversight on GST payments and Returns filing" and one Performance Audit on "Implementation of Assam Minor Mineral Concession Rules, 2013". Some of the major findings are mentioned below:

I. GENERAL

- Total Receipts of the State for the year 2020-21 and 2021-22 were ₹ 64,902.19 crore and ₹ 79,815.19 crore respectively. Of this, 31 *per cent* and 29 *per cent* of the total revenue were raised by the State Government through tax revenue and non-tax revenue during 2020-21 and 2021-22 respectively. The balance of total revenue was received from the Government of India in the form of State's share of net proceeds of divisible Union taxes and Grants-in-Aid.

(Paragraph 1.1)

- Arrears in assessments in respect of the Professions, Trades, Callings and Employments Taxation Act and Electricity duty Act increased over the previous year and 18,558 cases and 1,639 cases respectively are pending for assessment at the end of 31 March 2022.

(Paragraph 1.3)

- At the end of June 2022, 6,460 audit observations pertaining to 1,273 Inspection Reports involving ₹ 2,301.49 crore could not be settled due to non-receipt of replies/ proper replies from the Departments concerned.

(Paragraph 1.6)

II. FINANCE (TAXATION) DEPARTMENT

Subject Specific Compliance Audit on "Department's oversight on GST payments and Returns filing".

- The Department lacked an effective risk based standardised system of returns' scrutiny to facilitate proper officers in selecting high risk taxpayers for scrutiny.

(Paragraph 2.4.6.1)

- No action was taken by the proper officer in respect of non-filer/ late filer of returns.

(Paragraph 2.4.6.3)

- Audit notice deviation from the provision of AGST Act in 124 cases involving a short levy of taxes of ₹ 82.88 crore. Department has intimated that action has been initiated against 105 cases involving tax of ₹ 67.27 crore.

(Paragraph 2.4.7.2)

- 25 taxpayers did not pay interest of ₹ 75 lakh for delayed payment of tax.

(Paragraph 2.4.8.1(a) (i))

- There was mismatch of Input Tax Credit of ₹ 27.01 crore in respect of 37 taxpayers.

(Paragraph 2.4.8.1(b) (i))

- There was mismatch of availment of ISD credit of ₹ 34 lakh by three recipients.

(Paragraph 2.4.8.1(b) (ii))

Compliance Audit Paragraphs

- The Assessing Officer failed to detect wrong declaration of opening stock as well as short declaration of stock received from branch offices which resulted in understatement of stock by the dealer involving tax of ₹ 22.81 lakh. Besides, interest of ₹ 27.89 lakh and penalty not exceeding ₹ 45.62 lakh was also payable.

(Paragraph 2.5)

- The Assessing Officer did not verify utilisation of Form 'C'/delivery notes against goods purchased from outside the State which resulted in concealment of purchase turnover valuing ₹ 1.40 crore involving tax of ₹ 20.26 lakh. Besides, interest of ₹ 19.61 lakh and penalty not exceeding ₹ 40.52 lakh was also payable.

(Paragraph 2.6.1)

- The Assessing Officer (AO) did not take cognisance of utilisation details of delivery notes against goods purchased from outside the State of Assam during best judgement assessment, which led to escape of inter-state purchase turnover to the tune of ₹ 2.68 crore from assessment, thereby causing short levy tax of ₹ 38.80 lakh. Besides, interest of ₹ 48.31 lakh and penalty not exceeding ₹ 77.61 lakh was also payable.

(Paragraph 2.6.2)

- The Assessing Officer failed to levy interest of ₹ 22.43 lakh for deferment of advance tax under Section 35 H of the Assam Agricultural Income Tax Act, 1939 while completing re-assessment of the assessee's accounts.

(Paragraph 2.7)

III. TRANSPORT DEPARTMENT

- Five District Transport Officers did not take timely action to realise Motor Vehicle (MV) tax from owners of 26,214 Transport Vehicles resulted in outstanding of Motor Vehicle Tax of ₹ 8.61 crore besides fine of ₹ 2.85 crore.

(Paragraph 3.3)

- Five District Transport Officers failed to levy fitness fee of ₹ 78.18 lakh and penalty of ₹ 12.51 crore on 12,040 transport (commercial) vehicles despite availability of information about the defaulters in *'VAHAN'* database.

(Paragraph 3.4)

- Eight District Transport Officers did not realise one Time Tax (OTT) from owners of 2,231 personalised (non-Transport) four wheeler vehicles, which led to non-realisation of OTT of ₹ 6.36 crore besides fine of ₹ 0.77 crore.

(Paragraph 3.5)

- District Transport Officer, Kamrup (Metro) failed to realise permit fee of ₹ 51.92 lakh from 1,985 transport vehicles which were plying without valid permits.

(Paragraph 3.6)

- Composite and authorisation fees amounting to ₹ 21.41 lakh was not realised from 669 tourist motor cab plying on roads without renewal of authorisation of tourist permit.

(Paragraph 3.7)

IV. ENVIRONMENT AND FOREST DEPARTMENT

Performance Audit on "Implementation of Assam Minor Mineral Concession Rules, 2013"

- In absence of provisions under the AMMC Rules, 2013 for identification of areas bearing minor minerals, the respective forest divisions prepared preliminary information before initiating bidding process for extraction of minor minerals from a particular area without any scientific assessment.

(*Paragraph 4.3.10.1*)

- In 2021, against 312 declared MCAs (excluding MCAs under Sixth Scheduled areas), only 128 MCAs were settled with bidders, settlement of 140 MCAs are in progress and remaining 44 MCAs remained idle due to Court cases.

(*Paragraph 4.3.10.2*)

- The Environment and Forests (E&F) Department, Assam did not take steps to incorporate the recommendations of the Hon'ble Supreme Court (in 2012) and Committee (2011) constituted by the GoI in AMMC Rules, 2013 even though a considerable time has been lapsed since recommendation made.

(*Paragraph 4.3.10.5*)

- During 2014-21, 13 MCAs under two forest divisions were settled through mining permits (period not exceeding two years) for consecutive two to three times instead of Mining Contract or Lease for a period of five years or more, which is eco-friendly, scientific and sustainable mining practices as recommended by the Hon'ble Supreme Court.

(*Paragraph 4.3.11.1*)

- NIT in respect of three MCAs were invited stating reserve price below the price calculated by the divisions based on past trends, which had impact on final bidding price and two MCAs were settled with the lowest tenderer instead of highest tenderer. This resulted in minimum loss of Government revenue of ₹ 42.56 lakh.

(*Paragraph 4.3.11.5 & 4.3.11.6*)

- During e-tendering, the reserve prices were not fixed as per provisions made under the AMMC Rules, 2013 which affected the floor price of e-tenders of respective MCA and resulted in minimum loss of ₹8.89 crore.

(*Paragraph 4.3.11.9*)

- Deficit in compliance of parameters suggested by the Indian Bureau of Mines (IBM) while preparing the Mining Plan affected the allocation of extractable minor minerals vis-à-vis revenue, scientific mining of minor minerals, restoration and reclamation, etc.

(*Paragraph 4.3.12.1*)

- 60 mining contract agreements under eight forest divisions were not registered, which not only made those contracts legally unenforceable in case of any default but also led to loss of Government revenue in the form of Stamp Duty and Registration fee.

(*Paragraph 4.3.13.4*)

- There was an overall short collection of ₹15.38 crore towards MMDRR fund.

(*Paragraph 4.3.14.2*)

- There is mismatch between fund collected and fund accounted for under DMFT.

(*Paragraph 4.3.14.4*)

V. REVENUE & DISASTER MANAGEMENT DEPARTMENT

- Sub-Registrars of Kamrup (Sadar) and Rangia registered 18 deeds of sale considering zonal value of agricultural class of land instead of zonal value of non-agricultural (Industrial) class of land. This resulted in under valuation of land and consequent short levy of stamp duty and registration fee of ₹ 66.58 lakh.

(Paragraph 5.3)

- Sub-Registrars considered lower value of land instead of value of land fixed by the Government during registration of 24 deeds of sale. This resulted in short levy of stamp duty, registration fee and surcharge of ₹ 45.50 lakh.

(Paragraph 5.4)

CHAPTER-I
GENERAL

CHAPTER - I
GENERAL

1.1 Trend of Revenue Receipts

1.1.1 The tax and non-tax revenue raised by Government of Assam (GoA) during the years 2020-21 and 2021-22, State's share of net proceeds of divisible Union taxes and duties assigned to the State, Grants-in-Aid received from Government of India (GoI) during the years and the corresponding figures for the preceding years from 2017-18 onwards are given in **Table 1.1.1**.

Table 1.1.1: Trend of Revenue Receipts

(₹ in crore)

Sl. No.	Particulars	2017-18	2018-19	2019-20	2020-21	2021-22
1.	**Revenue raised by the State Government**					
	Tax revenue	13,215.52	15,924.85	16,528.69	17,133.61	19,533.10
	Non-tax revenue	4,071.97	8,221.29	5,539.34	2,899.61	3,579.75
Total		**17,287.49**	**24,146.14**	**22,068.03**	**20,033.22**	**23,112.85**
Percentage of increase/decrease over previous year		**5.20**	**39.67**	**-8.61**	**-9.22**	**15.37**
2.	**Receipts from Government of India**					
	Share of net proceeds of divisible Union taxes and duties	22,301.54	25,215.85	21,721.44	18,629.32	28,150.55
	Grants-in-Aid	14,541.91	14,117.17	20,705.61	26,239.65	28,551.79
Total		**36,843.45**	**39,333.02**	**42,427.05**	**44,868.97**	**56,702.34**
3.	**Total receipts of the State Government (1 and 2)**	**54,130.94**	**63,479.16**	**64,495.08**	**64,902.19**	**79,815.19**

Source: Finance Accounts of Government of Assam.

Table 1.1.1 indicates that during the years 2020-21 and 2021-22, the revenue raised by the State Government was ₹ 20,033.22 crore and ₹ 23,112.85 crore respectively. During 2020-21 and 2021-22, the State's own revenue (tax revenue and non-tax revenue) constituted 31 *per cent* and 29 *per cent* of total revenue receipts respectively and the remaining 69 *per cent* and 71 *per cent* came from the share of net proceeds of divisible Union taxes and duties and Grants-in-Aid respectively.

During 2020-21, revenue receipts of the State grew by ₹ 407.11 crore (0.63 *per cent*) over the previous year. However, tax revenue increased by ₹ 604.92 crore (3.66 *per cent*) and non-tax revenue decreased by ₹ 2,639.73 crore (47.65 *per cent*) over the previous year. While Grants-in-Aid from GoI increased by ₹ 5,534.04 crore (26.73 *per cent*), the share of net proceeds of divisible Union taxes and duties decreased by ₹ 3,092.12 (14.24 *per cent*) over the previous year.

Similarly, during 2021-22, revenue receipts of the State grew significantly by ₹ 14,913 crore (22.98 *per cent*) over the previous year. Tax revenue increased by ₹ 2,399.49 crore (14 *per cent*) and non-tax revenue increased by ₹ 680.14 crore (23.46 *per cent*) over the previous year. Likewise, Grants-in-Aid and share of net proceeds of divisible Union taxes and duties from GoI also increased by

₹ 2,312.14 crore (8.81 *per cent*) and ₹ 9,521.23 crore (51.11 *per cent*) respectively over the previous year.

1.1.2 Tax Revenue

Details of tax revenue raised during the period 2017-18 to 2021-22 are given in **Table 1.1.2**.

Source: Annual Financial Statement and Finance Accounts of Government of Assam.

The increase of ₹ 604.92 crore (3.66 *per cent*) in tax revenue in 2020-21 as compared to the previous year, was mainly on account of increase in taxes on Sales, Trade, *etc*. by ₹ 590.01 crore and increase in State Excise Duty by ₹ 389.91 crore which was, however, offset by decrease in State Goods and Services Tax (SGST) by ₹ 206.28 crore.

Similarly, the increase of ₹ 2,399.49 crore (14 *per cent*) in tax revenue in 2021-22 over the previous year, was mainly on account of increase in State Goods and Services Tax by ₹ 2,030.54 crore, Stamps and Registration fees by ₹ 158.71 crore, Taxes and Duties on Electricity by ₹ 140.32 crore and Taxes on Vehicles by ₹ 254.23 crore.

The reasons for major variations in respect of tax revenue during 2020-21 over 2019-20 and 2021-22 over 2020-21 as reported by the concerned department(s) were as follows:

Excise Department: Revenue increased in 2020-21 mainly due to increase in collection of taxes under Foreign Liquors and Spirits and other miscellaneous receipts. However, revenue decreased marginally in 2021-22 mainly due to decrease in collection of taxes under Foreign Liquors and Spirits and other miscellaneous receipts.

State Goods and Services Tax (SGST): Revenue decreased in 2020-21 mainly due to decrease in collection of taxes and Input Tax Credit cross utilisation of SGST and IGST. However, revenue increased in 2021-22, mainly due to increase in Input Tax Credit cross utilisation of SGST and IGST, apportionment of IGST component to SGST and collection of revenue under tax, interest and penalty, *etc*.

Taxes on Sales, Trade *etc*. Revenue increased in 2020-21 mainly due to increase in collection of Value Added Tax Receipts under Central Sales Tax Act and Miscellaneous Other Receipts. However, revenue decreased in 2021-22, mainly due to decrease in collection of VAT and CST.

Stamps and Registration Fees: Revenue increased in 2021-22 mainly due to increase in receipts under sale of Judicial and non-Judicial stamps, fees for registering documents and other miscellaneous receipts.

Taxes on Vehicles: Revenue increased in 2021-22 mainly due to increase of receipts under the Indian Motor Vehicles Act and other miscellaneous receipts.

Land Revenue: Revenue increased in 2020-21 and 2021-22 mainly due to increase in collection of taxes under Land Revenue, cesses on land and miscellaneous other receipts.

Other Departments had not intimated (January 2023) the reasons for increase/decrease of their revenue during 2020-22 despite requests.

1.1.2.1 Implementation of Goods and Services Tax

Goods and Services Tax (GST) was implemented with effect from 01 July 2017 on supply of goods or services or both. GST is concurrently administered by the Union (CGST) and the States (SGST) on supply within the State while Integrated Goods and Services Tax (IGST) is levied on inter-state supply of goods or services or both.

The Central Goods and Services Tax Act, 2017, the Assam State Goods and Services Tax Act, 2017 and the Integrated Goods and Services Tax Act, 2017 and allied Rules of all the three Acts are applicable in the State of Assam.

Goods and Services Tax Network (GSTN), a non-government company set up by Government of India provides both front-end and back-end services to the State as Assam is a Model-II[1] State. Front-end services include approval of registration, taxpayer details viewer, refund processing, MIS reports, *etc*.

Implementation of GST necessitated smooth transitional provisions to enable migration of all existing businesses to the new regime. The transitional provisions have been specifically incorporated in all the three GST Acts/Rules.

1.1.2.2 Registration under GST

As per the GST Act, every taxpayer with a turnover of above ₹ 40 lakh (enhanced to ₹ 40 lakh with effect from 01 April 2019 in respect of dealers dealing with sale of goods

[1] The states under Model-II depend on GSTN to manage **back-end services** such as tax settlement, assessment, refund processing, *etc*.

only) has to be registered under GST. During the transition period, the Department had to deal with migration of existing dealers as well as approval of new registrations. The due date for migration of existing dealers was February 2019.

Category-wise registrations under GST have been given in **Table 1.1.3** (as on March 2021 and March 2022):

Table 1.1.3: Registered taxpayers under GST

Types of Taxpayers	Number of dealers	Percentage of total	Number of dealers	Percentage of total
	Position as on March 2021		Position as on March 2022	
Normal Taxpayers	1,57,535	79.82	1,76,504	81.43
Composition Taxpayers	36,485	18.49	36,643	16.90
Tax Deductors at source	3,105	1.57	3,281	1.51
Tax Collectors at source	178	0.09	257	0.12
Input Service Distributors	52	0.02	59	0.03
Others (Casual, NRTP, OIDAR, *etc*.)	14	0.01	21	0.01
Total Registrants	**1,97,369**	**100**	**2,16,765**	**100**

The registrations under GST in Assam increased to 2.16 lakh in March 2022 from 1.97 lakh in March 2021. Of the total taxpayers, normal taxpayers accounted for 79.82 *per cent* and 81.43 *per cent* in March 2021 and March 2022 respectively.

1.1.2.3 Divisions of Dealers between Central and State Government

As per the recommendations[2] of GST Council, administrative control of over 90 *per cent* of the dealers with turnover less than ₹ 1.50 crore shall vest with the State tax administration and 10 *per cent* with the Central tax administration. In respect of dealers with turnover of ₹ 1.50 crore and above, the administrative control shall be divided in the ratio of 50 *per cent* each for the Central and State tax administration. The division of tax payers as notified in Assam up to March 2022 is shown in **Table 1.1.4**.

Table 1.1.4: Division of dealer between Centre and State Government

Jurisdiction	Number of dealers		Total
	Turnover above ₹ 1.5 crore	Turnover below ₹ 1.5 crore	
Centre	15,735	93,295	1,09,030
State	8,261	68,956	77,217
Total	**23,996**	**1,62,251**	**1,86,247**

As per Assam Goods and Services Tax Rules[3], 2017 (AGST Rules, 2017), regular taxpayers were required to file monthly returns[4] in GSTR-1, GSTR-2 and GSTR-3, whereas composition taxpayers were required to file quarterly returns in GSTR-4. However, the provisions of the rules could not be implemented due to issues relating to information technology infrastructure. Accordingly, filing of GSTR-2 and GSTR-3 returns was postponed and regular taxpayers were required to file GSTR-1 and GSTR-3B and composition dealers were to file GSTR-4 quarterly.

---

2 Circular dated 20 September 2017.

3 Rule 59, 60 and 61.

4 GSTR-1: containing outward supply, GSTR 2: Auto populated from GSTR-1 showing inward supply of the dealer and GSTR-3: Summarised details of outward and inward supplies of a dealer during the month along with amount of GST liability.

The trends of filing of GSTR-1 and GSTR-3B returns for the period 2020-21 (position as on April 2021) and 2021-22 (position as on April 2022) in Assam have been depicted in **Table 1.1.5**.

Table 1.1.5: Filing pattern of GSTR-1 and GSTR-3B

Month	2020-21		2021-22	
	GSTR-1	GSTR-3B	GSTR-1	GSTR-3B
April	48,148	1,24,711	92,980	1,00,580
May	48,243	1,24,447	92,658	1,00,375
June	1,06,222	1,25,161	1,31,989	1,43,515
July	48,737	1,26,989	94,700	1,02,249
August	48,947	1,28,166	97,120	1,05,225
September	1,06,116	1,27,874	1,31,404	1,51,312
October	48,847	1,28,746	94,880	1,02,979
November	49,153	1,29,295	95,626	1,03,869
December	1,04,364	1,29,385	1,36,848	1,50,321
January	66,754	73,475	91,053	99,025
February	61,472	66,065	85,241	92,870
March	1,31,373	1,43,658	92,284	86,907

1.1.2.4 Compensation under SGST

As per the Goods and Services Tax (Compensation to States) Act, 2017, States were to be compensated for the shortfall in revenue arising on account of implementation of GST considering an annual growth of 14 *per cent* from the base year 2015-16, for a period of five years ending 31 March 2022. In accordance with Section 6 of the GST (Compensation to States) Act, 2017, the protected revenue of the State for the year 2021-22 was fixed at ₹ 13,138.01 crore by taking into consideration the revenue collection of 2015-16 (₹ 5,985.50 crore) as the base year. Since the SGST receipts in 2021-22 fell short of the protected revenue, the State Government received a compensation of ₹ 2,788.14 crore during the year, on account of loss of revenue arising out of implementation of GST. Out of the compensation of ₹ 2,788.14 crore received during the year, an amount of ₹ 1,773.87 crore was received by the State Government as Back-to-Back loans in lieu of GST compensation shortfall, due to inadequate balance in GST Compensation Fund, under debt receipts of the State. The debt servicing of this loan is to be done by GoI from the collection of cess in GST Compensation Fund, and hence the repayment obligation will not be met from any other resources of the State.

1.1.3: Non-Tax Revenue

Details of non-tax revenue raised during the period 2017-18 to 2021-22 are given in **Table 1.1.6.**

Table 1.1.6:-Details of Non-Tax Revenue raised

(₹ in crore)

Source: Annual Financial Statement and Finance Accounts.

The decrease of ₹ 2,639.73 crore (48 *per cent*) in non-tax revenue in 2020-21 as compared to the previous year was mainly on account of decrease in revenue under the head 'Petroleum' by ₹ 2,336.79 crore and interest receipts by ₹ 430.99 crore which was, however, offset by increase of ₹ 251.38 crore under 'Others'.

The increase of ₹ 680.14 crore (23 *per cent*) in non-tax revenue in 2021-22 over the previous year was mainly due to increase of revenue of ₹ 1,036.75 crore under the head 'Petroleum' which was, however, offset by decrease of ₹ 115.01 crore and ₹ 300.18 crore under 'Interest Receipts' and 'Others' respectively.

The reasons for major variations in respect of non-tax revenue during 2020-21 over 2019-20 and 2021-22 over 2020-21 as reported by the concerned department(s) were as follows:

Interest Receipts: This decreased mainly due to decrease in interest realised on Investment of Cash Balances, interest receipts from Public Sector and Other Undertakings and interest collection on other miscellaneous subjects.

Petroleum: This decreased in 2020-21 mainly due to decline in collection under royalties. However, it increased in 2021-22 due to higher collection of royalties.

Forestry and Wild Life: This decreased in 2020-21 mainly due to decline in collection of revenue under (i) Sale of Timber and Other Forest Produce, (ii) Receipts from Social and Farm Forestries, (iii) Receipts from Environmental Forestry and (iv) Other Miscellaneous receipts, *etc*. However, increase in 2021-22 was due to increase in collection of other miscellaneous receipts.

Other Departments had not intimated the reasons for increase/decrease of their revenue in 2020-21 and 2021-22 despite requests.

1.2 Analysis of arrears of revenue

The arrears of revenue as on 31 March 2022 in respect of the Finance (Taxation), Excise, Mines and Minerals and Transport Departments amounted to ₹ 4,568.38 crore,

[5] Others include 27 major head of accounts.

of which ₹ 3,295.26 crore was outstanding for more than five years, as detailed in **Table 1.2**.

Table 1.2: Arrears of revenue

(₹ in crore)

Sl. No.	Heads of Revenue	Name of Department	Amount outstanding as on 31 March 2022		Replies of the Departments
			Total amount	For more than five years	
1	0022-Taxes on Agricultural Income	Finance (Taxation)	70.00	49.33	Following are the reasons for arrears: i. Some amounts become arrears when the amounts are not paid by dealers within due date. The Assessing Officers (AOs) issue notices to the defaulters for payment of arrears and tries their best to realise the amount. Such arrears are paid by the concerned dealers with interest. Current arrears are also included in the above amount. ii. For the amount which cannot be realised by the assessing officers despite all efforts, arrear certificates are issued by the AOs to the Bakijai Officers for realisation of the amount and these amounts remain as arrear with the Superintendent of Taxes (Recovery) till recovery of the said arrear amount. iii. Cases involving arrears of revenue pending in High Court/Supreme Court/Board of Revenue and with Appellate/Revision Authority is given below: Under H/C,S/C and ABR 2,970.74 Under Revision 254.66 Under Appeal 33.58 **Total 3,258.98** iv. Un-traceability of dealers at the time of realisation of dues, etc.
2	0028-Other Taxes On Income and Expenditure		2.62	1.58	
3	0029-Land Revenue		2,846.85	2,138.43	
4	0040-Tax on Sales, Trade, *etc.*		1,364.69	853.26	
5	0042-Taxes on Goods and Passengers		79.51	52.80	
6	0043-Taxes and Duties on Electricity		30.30	28.09	
7	0045-Other Taxes and Duties on Commodities and Services		5.18	4.76	
8	0039-State Excise	Excise	63.13	63.13	Due to non-payment of levies by the Wholesale Warehouses in due time.
9	0853-Non-ferrous Mining and Metallurgical Industries	Mines and Minerals	0.08	0.08	Non-payment of royalty on limestone by NECEM Cement Limited for 2005-06, 2006-07 and 2011-12 (₹ 8,15,789)
10	0041-Taxes on vehicles	Transport	106.02	103.80	Shortage of Enforcement Personnel/staff and inadequate infrastructure in respect of enforcement drive.
Total			**4,568.38**	**3,295.26**	

Clearance of arrears of such magnitude requires focused efforts by the departments concerned and a push for coordination with other departments such as banks, Police Department and quasi-judicial/judicial bodies involved in the process of recovery.

1.3 Arrears in Assessment

Under Section 39 of the Assam Value Added Tax (AVAT) Act, 2003 (being the mother Act in respect of other taxes), no assessment shall be made after the expiry of five years from the end of the year to which the assessment relates. However, in cases where specific information is available, re-assessment can be made under Section 40 of AVAT Act, 2003 within a period of eight years.

The details of arrears in assessments pending at the beginning of the year, cases becoming due for assessments during the year, cases disposed of during the year and number of cases pending for assessment at the end of the year as furnished by the Finance (Taxation) Department in respect of various taxation Acts are given in **Table 1.3**.

Table 1.3: Arrears in assessments

Nomenclature of the Act	Arrears of assessment due as on 31 March 2021	New cases due for assessments during 2021-22	Total assessment due	Cases disposed during 2021-22	Balance at the end of the year 2021-22	Percentage of disposal (col. 5 to 4)
1	**2**	**3**	**4 (2+3)**	**5**	**6 (4-5)**	**7**
Sales Tax (GST/VAT/CST Acts)	17,067	545	17,612	5,240	12,372	29.75
Entry Tax Act	2,281	0	2,281	15	2,266	0.66
Professions, Trades, Callings and Employments Taxation Act	4,561	27,736	32,297	13,739	18,558	42.54
Taxation (on Specified Lands) Acts	4,507	103	4,610	463	4,147	10.04
Agricultural Income Tax Act	2,709	52	2,761	117	2,644	4.24
Amusement and Betting Taxation Act	192	0	192	0	192	0.00
Luxury (Hotel & Lodging Houses) Act	227	0	227	0	227	0.00
Electricity Duty Act	1,402	309	1,711	72	1,639	4.21
Total	**32,946**	**28,745**	**61,691**	**19,646**	**42,045**	**31.85**

Table 1.3 indicates that the assessments pending at the end of the year increased over the previous year in respect of two heads of revenue (Professions, Trades, Callings and Employments Taxation Act and Electricity Duty Act). Pendency in assessment may result in non-realisation/short realisation/loss of Government revenue and further accumulation in arrears.

1.4 Evasion of tax detected by the Department

The details of cases of tax evasion detected by the Finance (Taxation) Department, cases finalised and the demands for additional tax raised during 2020-22 as reported by the department are given in **Table 1.4**.

Table 1.4: Evasion of Tax

Head of revenue	Year	Cases pending at the beginning of the year	Cases detected during the year	Total	Number of cases in which assessment/investigation completed and additional demand with penalty, *etc.* raised		Number of cases pending for finalisation at the end of the year
					Number of cases	Amount of demand (₹ in crore)	
GST	2020-21	0	306	306	306	1,169.59	0
	2021-22	0	731	731	731	54.14	0
Total		**0**		**1,037**	**1,037**	**1,223.73**	

Thus, Government of Assam had raised demands of ₹ 1,223.73 crore relating to 1,037 cases of evasion of tax during 2020-22.

1.5 Pendency of refund cases

The number of refund cases pending at the beginning of the year, claims received during the year, refunds allowed during the year and the cases pending at the close of year as reported by the Finance (Taxation) Department is given in **Table 1.5**.

Table 1.5: Details of pendency of refund cases

(₹ in crore)

Sl. No.	Particulars	2020-21				2021-22			
		Sales Tax/VAT		GST		Sales Tax/VAT		GST	
		No. of cases	Amount	No. of cases	Amount	No. of cases	Amount	No. of cases	Amount
1	Claims outstanding at the beginning of the year	10	60.10	25	4.16	10	5.84	94	337.96
2	Claims received during the year	88	11.66	772	420.24	92	290.69	746	82.29
3	Refunds allowed during the year	78	55.14	692	54.63	88	284.05	594	64.05
4	Refunds rejected/ withheld during the year	10	10.78	11	31.81	0	0	104	335.14
5	Balance outstanding at the end of the year	10	5.84	94	337.96	14	12.48	142	21.06

In Finance (Taxation) Department, 14 cases of refund involving ₹ 12.48 crore pertaining to pre-GST period and 142 cases involving ₹21.06 crore pertaining to the GST period were pending at the end of March 2022. The reasons for pendency of outstanding cases were not stated by the Department.

The Department may consider early settlement of refund cases for the benefit of claimants.

1.6 Response of Government/Departments towards audit

On completion of the audit of Government/Departments and the offices, audit issues Inspection Reports (IRs) to the concerned Head of the offices, with copies to their superior officers for corrective action and monitoring. Serious financial irregularities are reported to the Heads of the Departments and the Government.

With respect to IRs issued up to December 2021, the position was that 6,460 paragraphs pertaining to 1,273 IRs involving ₹ 2,301.49 crore remained outstanding at the end of June 2022 as shown in **Table 1.6**, along with the corresponding figures for the preceding two years.

Table 1.6: Details of pending IRs

	June 2020	June 2021	June 2022
Number of IRs pending for settlement	1,139	1,228	1,273
Number of outstanding audit paragraphs	5,643	5,580	6,460
Amount of revenue involved (₹ in crore)	3,332.57	2,148.79	2,301.49

1.6.1 Department wise pendency of IRs

The department-wise details of the IRs and paragraphs outstanding as on 30 June 2022 and the amount involved are given in **Table 1.6.1**.

Table 1.6.1: Department-wise details of outstanding IRs

(₹ in crore)

Sl. No.	Name of the Department	Nature of receipts	Number of outstanding		Money value involved
			IRs	Paragraphs	
1	Finance (Taxation)	Taxes on sales, trade *etc*.	297	1,980	1,032.66
		Agricultural Income Tax			
		Other Taxes			
2	Excise	State Excise	131	706	680.19
3	Transport	Taxes on Motor Vehicles	208	987	343.55
4	Revenue and Disaster Management	Stamps and Registration fees	219	844	19.66
5	Mines and Minerals	Non-ferrous mining and metallurgical industries	12	44	151.38
6	Environment and Forests	Forestry and Wild Life	406	1,899	74.05
Total			**1,273**	**6,460**	**2,301.49**

Audit did not receive even the first replies from the Heads of offices within one month from the date of issue of the IRs in respect of 102 IRs issued during 2020-22. Further, the large pendency of IRs/paragraphs was due to non-receipt of replies which indicates that the heads of auditee units had failed to take cognisance of the reported audit findings.

1.6.2 Departmental Audit Committee Meetings

The Government set up audit committees to monitor and expedite the progress of the settlement of the IRs and paragraphs. The details of the Audit Committee Meetings held during 2020-21 and 2021-22 and the paragraphs settled as a consequence thereof is given in **Table 1.6.2**.

Table 1.6.2: Details of Departmental Audit Committee Meetings

(₹ in crore)

Year	Head of revenue	Number of meetings held	Number of paras settled	Amount
2020-21	Finance (Taxation) Department	1	45	0.80
2021-22	Finance (Taxation) Department	1	72	23.47
Total		**2**	**117**	**24.27**

During the years, two Audit Committee Meetings were held in respect of Finance (Taxation) Department in which 204 paras were discussed and 117 paras (57.35 *per cent*) were dropped on the basis of replies furnished by the Department.

1.6.3 Response of the Departments to the draft audit paragraphs

The PAG (Audit) forwards draft audit paragraphs proposed for inclusion in the Report of the Comptroller and Auditor General of India (C&AG) to the Principal Secretaries/ Secretaries of the Departments concerned, drawing their attention to audit findings and requesting them to send their response. In case of non-receipt of the replies from the Government/Department, the same is indicated at the end of such paragraphs included in the Audit Report.

The draft audit paragraphs/Performance Audit on 'Implementation of Assam Minor Mineral Concession Rules, 2013' proposed to be included in the Audit Report on Revenue Sector for the year ended 31 March 2022, Government of Assam, were

forwarded to the Secretaries of the Departments concerned between September 2022 and February 2023. The replies furnished by the Departments have appropriately been incorporated in the respective paragraphs.

1.6.4 Follow up on the Audit Reports

The notifications of Public Accounts Committee (PAC) in August 2001, September 2014 and October 2018 laid down that after presentation of the Report of the C&AG in the Legislative Assembly, the administrative departments were required to submit *suo-moto* Action Taken Notes (ATN) on paragraphs, within three months to the PAC with a copy to the PAG (Audit) without waiting for the PAC's discussion. However, *suo-moto* replies/explanatory notes on audit paragraphs of the Reports were being delayed inordinately. In the Reports of the C&AG on the Revenue Sector of Government of Assam for the years ended 31 March 2016 to 31 March 2020, placed before the State Legislative Assembly between May 2017 and September 2022, 95 compliance audit paragraphs and three Performance Audit on various topics were included. The PAG (Audit) did not receive any *suo-moto* explanatory notes on audit paragraphs.

As of March 2022, PAC discussed 493 out of 1,021 paragraphs, reviews and performance audits (including stand-alone Audit Reports) pertaining to the years 1988-89 to 2018-19, leaving a balance of 528 audit paragraphs yet to be discussed.

1.7 Analysis of the mechanism for dealing with the issues raised by Audit

To analyse the system of addressing the issues highlighted in the IRs/Audit Reports by the Departments/Government, action taken on the paragraphs and PAs included in the Audit Reports of the last five years for one Department is evaluated in detail and included in this Audit Report.

The following paragraphs discuss the performance of **Environment and Forest Department** in respect of the cases detected in the course of local audit during the years 2017-18 to 2021-22 and also the cases included in the Audit Reports for the years 2015-16 to 2019-20.

1.7.1 Position of Inspection Reports

The summarised position of IRs issued during the last five years, paragraphs included in these IRs and their status as on 31 March 2022 in respect of Environment and Forest Department is presented in **Table 1.7.1**.

Table 1.7.1: Position of Inspection Reports in respect of Environment and Forest Department

(₹ in crore)

Year	Opening Balance			Addition during the year			Clearance during the year			Closing Balance		
	IRs	Paras	Money Value	IRs	Paras	Money Value	IRs	Paras	Money Value	IRs	Paras	Money Value
2017-18	412	2,008	42.33	33	178	109.38	7	84	29.64	438	2,102	122.07
2018-19	438	2,102	122.07	16	71	14.70	77	333	56.20	377	1,840	80.57
2019-20	377	1,840	80.57	22	49	5.31	7	60	13.82	392	1,829	72.06
2020-21	392	1,829	72.06	7	36	0.05	0	0	00	399	1,865	72.11
2021-22	399	1,865	72.11	20	187	9.95	7	69	0.32	412	1,983	81.74
Total				**98**	**521**	**139.39**	**98**	**546**	**99.98**			

It is evident from **Table 1.7.1** that 521 paragraphs were added and 546 paragraphs were settled during 2017-18 to 2021-22. Thus, 1,983 paragraphs remained outstanding for settlement at the end of 31 March 2022 due to non-receipt of satisfactory replies/replies from the Department.

1.7.2 Recoveries in respect of accepted audit cases

The position of paragraphs included in the Audit Reports of the last five years, those accepted by Environment and Forest Department and the amount recovered thereagainst are given in **Table 1.7.2**.

Table 1.7.2: Position of recovery of accepted cases

(₹ in crore)

Year of Audit Report	Number of paragraphs included	Money value of the paragraphs	Number of paragraphs accepted	Money value accepted	Amount recovered	Cumulative position of recovery of accepted cases as on 31 March 2022
2015-16	1	48.83	-	-	-	0.24
2016-17	3	1.05	1	0.41	-	
2017-18	4	1.63	4	1.43	0.24	
2018-19	3	14.24	2	0.93	-	
2019-20	1	33.98	1	32.92	-	

1.7.3 Action taken on the recommendations accepted by the Government/ Departments

The Performance Audits (PAs) conducted by the PAG are forwarded to the Departments concerned with a request to furnish their replies. These PAs are further discussed during the exit conference and the Department's views received during the exit conference and at other points of time are included while finalising the PAs for the Audit Reports. Besides, Audit also makes recommendations against some specific issues brought out in the paragraphs wherever felt appropriate.

During 2017-18, a PA on "Collection of arrears of revenue in Finance (Taxation) Department" was carried out wherein 22 recommendations were made to the Government/Department. The Department reported that action was taken in respect of the recommendations featured in the PA (details are given in **Appendix–I**).

1.8 Audit Planning

For the purposes of audit, the offices under various departments are categorised as 'high', 'medium' and 'low' risk auditable units according to their quantum of revenue collection, past nature and trends of audit observations and other parameters. The annual audit plan of the PAG is prepared on the basis of risk analysis which *inter-alia* includes critical issues in government revenue and tax administration *i.e.*, budget speech, White Paper on State finances, Reports of the Finance Commission (State and Central), recommendations of the Taxation Reforms Committee, statistical analysis of revenue earnings during the past five years, factors in tax administration and audit coverage and its impact during the past five years.

The details of auditable units, units planned for audit and units audited during 2020-21 and 2021-22 are given in **Appendix–II**.

1.9 Results of Audit

1.9.1 Position of audit conducted during the year

Audit test-checked records of 62 and 66 offices of Finance (Taxation), State Excise, Transport, Environment and Forests and other departmental offices during 2020-21 and 2021-22 respectively and pointed out deficiencies in 857 cases[6]. During the years, the Departments concerned accepted under-assessment and other deficiencies in 108 cases involving ₹ 153.02 crore[7]. The Departments had also collected ₹ 1.64 crore in 64 cases during the two years.

1.9.2 Coverage of this Report

This Report contains 11 paragraphs with appropriate captions and a Performance Audit (PA) on 'Implementation of Assam Minor Mineral Concession Rules, 2013' having a total financial effect of ₹ 780.07 crore of which the departments accepted audit observations in 21 cases (including PA) involving revenue of ₹ 141.72 crore and recovered revenue of ₹ 4.58 crore.

[6] 315 cases in 2020-21 and 542 cases in 2021-22.
[7] ₹ 152.47 crore involved in 71 cases in 2020-21 and ₹ 0.55 crore involved in 37 cases in 2021-22.

CHAPTER-II
FINANCE (TAXATION) DEPARTMENT

CHAPTER - II

FINANCE (TAXATION) DEPARTMENT

2.1 Tax administration

The Finance (Taxation) Department is responsible for the administration of Commercial Tax in the State. The Commissioner of Taxes (CT), Assam is the Head of the Commissionerate of Taxes, Assam. He is responsible for administration of all taxation measures and for general control and supervision over the zonal and unit offices and the staff engaged in collection of taxes and to guard against evasion of taxes. He is also the authority for disposing of revision petitions under all taxation Acts and laws besides providing clarifications under the Assam Value Added Tax (AVAT) Act, 2003. The Commissioner is assisted by Additional Commissioners of Taxes, Joint Commissioners of Taxes (JCTs), Deputy Commissioners of Taxes (DCTs) in Zones and Appeal Offices, Assistant Commissioners of Taxes (ACTs), Superintendents of Taxes (STs) and Inspectors of Taxes both at the Headquarters and zonal/unit levels. The Officers posted in the unit offices are responsible for collection of taxes under various heads and also to guard against the evasion of taxes. The Commissionerate of Taxes has one Head office/Commissioner's office, 10 Zonal offices, five Appellate offices, 34 unit offices and 23 recovery offices.

The functioning of the Department is governed by the provisions of the AVAT Act, 2003; the Assam Goods and Services Tax Act, 2017 (*w.e.f.* 01 July 2017), the Central Sales Tax (CST) Act, 1956; the Assam Professions, Trades, Callings and Employments Taxation Act, 1947; the Assam Electricity Duty Act, 1964; the Assam Taxation (on Specified Lands) Act, 1990; the Assam Agricultural Income Tax Act, 1939 and various administrative orders issued from time to time.

2.2 Working of Internal Audit Wing

Internal audit is a vital component of the internal control mechanism which functions as an internal oversight mechanism of the Department and is a vital tool which enables the management to assure itself that the prescribed systems are functioning reasonably well. During 2020-22, the Department did not put any internal audit in place.

2.3 Results of Audit

During test-check of records of 16 unit offices and eight unit offices (out of total 75 unit offices) in 2020-21 and 2021-22 respectively relating to VAT/CST/AET/Agricultural Income Tax assessments and other records, Audit noticed deficiencies as categorised in **Table 2.1**.

Table 2.1: Results of Audit

Sl. No.	Category	2020-21		2021-22	
		Number of IRs	Amount (₹ in crore)	Number of IRs	Amount (₹ in crore)
1	Turnover escaping assessment	3	14.18	3	1.58
2	Irregular grant of ITC	5	0.89	3	0.65
3	Concealment of turnover	7	3.51	5	7.89

Sl. No.	Category	2020-21		2021-22	
		Number of IRs	Amount (₹ in crore)	Number of IRs	Amount (₹ in crore)
4	Short levy of tax and interest	6	0.99	8	5.35
5	Irregular allowance of exemption/ concessional rate of tax	10	4.90	11	16.10
6	Short/non-levy of entry tax	3	1.23	2	0.31
7	Short/non-payment of Professional Tax	5	0.26	1	0.03
8	Other irregularities	67	17.97	13	4.92
Total		**106**	**43.93**	**46**	**36.83**

2.4 Subject Specific Compliance Audit on "Department's oversight on GST payments and returns filing"

2.4.1 Introduction

Goods and Services Tax (GST) has replaced multiple taxes levied and collected by the Centre and States. GST, which came into effect from 01 July 2017, is a destination-based consumption tax on supply of goods or services or both levied on every value addition. The Centre and States simultaneously levy GST on a common tax base. Central GST (CGST) and State GST (SGST)/Union Territory GST (UTGST) are levied on intra-state supplies and Integrated GST (IGST) is levied on inter-state supplies.

Section 59 of the Assam Goods and Services Tax Act, 2017 (AGST Act) stipulates GST as a self-assessment-based tax, whereby the responsibility for calculating tax liability, discharging the computed tax liability and filing returns is vested with the taxpayer. The GST returns must be filed online regularly on the common GST portal, failing which penalties will be payable. Even if the business has had no tax liability during a particular tax period, it must file a 'nil' return mandatorily. Further, Section 61 of the Act read with Rule 99 of the Assam Goods and Services Tax Rules, 2017 (AGST Rules) stipulate that the proper officer may scrutinise the return and related particulars furnished by taxpayers, communicate discrepancies to the taxpayers and seek an explanation.

This Subject Specific Compliance Audit (SSCA) was taken up considering the significance of the control mechanism envisaged for tax compliance and the oversight mechanism of the State Taxes Department, Assam, Guwahati in this new tax regime.

2.4.2 Audit objectives

This audit was oriented towards providing assurance on the adequacy and effectiveness of systems and procedures adopted by the Department with respect to tax compliance under the GST regime. The audit was taken up to seek an assurance whether:

i. The rules and procedures were designed to secure an effective check on tax compliance and were being duly observed by taxpayers; and
ii. The scrutiny procedures, internal audit and other compliance functions of the Circles were adequate and effective.

2.4.3 Audit methodology and scope

This SSCA was predominantly conducted based on data analysis, which highlighted risk areas and red flags pertaining to the period from July 2017 to March 2018. Through data analysis, a set of 14 mismatches/deviations were identified across the domains of Input Tax Credit, Discharge of tax liability, Registration and Return filing. Such deviations were followed up through a **centralised audit**[8], whereby these deviations were communicated to the Circles and action taken by the Circles on the identified deviations was ascertained without involving field visits. The centralised audit was supplemented by a **detailed audit** involving field visits for verification of records available with the jurisdictional field formations. Returns and related attachments and information were accessed through the back-end system of the Department/State Taxes Department application as much as feasible to examine data/documents relating to taxpayers (*viz.*, registration, tax payment, returns and other departmental functions). The detailed audit also involved accessing relevant granular records from the taxpayers such as invoices through the respective field formations. This apart, compliance functions of the departmental formation such as scrutiny of returns, conduct of internal audit, action on late filers/non-filers, *etc*. were also reviewed in selected circles.

The review of scrutiny of returns by the Department and verification of taxpayers' records covered the period from July 2017 to March 2018, while audit of the functions of selected Circles covered the period 2017-18 to 2020-21. The SSCA covered only State-administered taxpayers. The field audit was conducted from May 2022 to October 2022.

The entry conference for this SSCA was held on 18 January 2022 with the Principal Commissioner of State Tax, Assam in which the audit objectives, sample selection, audit scope and methodology were discussed. The draft SSCA report was issued to the State Commissionerate on 09 February 2023. Reply of the same is awaited (February 2023).

2.4.4 Audit sample

A data-driven approach was adopted for planning, as also to determine the nature and extent of substantive audit. The sample for this SSCA comprised a set of deviations identified through data analysis during centralised audit that did not involve field visits; a sample of taxpayers for detailed audit that involved field visits and scrutiny of taxpayers' records at departmental premises; and a sample of Circles for evaluating the compliance functions of the circles.

The three distinct parts of this SSCA are as under:

[8] Centralised Audit was conducted from the AG office premises and did not involve seeking taxpayer's granular records such as financial statements, related ledger accounts, invoices, agreements, *etc*.

2.4.4.1 Part I-Audit of Circles

Ten Circles[9] out of total 134 Circles under six Unit offices[10] out of 34 Unit offices with jurisdiction over more than one selected sample of cases for Detailed Audit were considered as the sample of Circles for evaluation of their oversight functions.

2.4.4.2 Part II –Centralised Audit

The sample for Centralised Audit was selected by identification of high-value or high-risk deviations from rules and inconsistencies between returns through data analysis for evaluation of adequacy and effectiveness of the scrutiny procedure of the Department. Accordingly, a sample of 282 taxpayers pertaining to 101 Circles under 31 Unit offices were selected for Centralised Audit under this SSCA.

2.4.4.3 Part III-Detailed Audit

Detailed Audit was conducted by accessing taxpayers' records through Circles for evaluation of the extent of tax compliance by taxpayers. The sample of taxpayers for Detailed Audit was selected on the basis of risk parameters such as excess ITC, tax liability mismatch, disproportionate exempted turnover to total turnover and irregular ITC reversal. The sample of 50 taxpayers (which are not included in Centralised audit) pertaining to 37 Circles under 21 Unit offices selected for audit comprised Large[11], Medium[12] and Small[13] strata taxpayers as well as taxpayers selected randomly.

2.4.5 Audit criteria

The source of audit criteria comprised the provisions contained in the AGST Act, IGST Act, 2017 and Rules made thereunder. In addition, the notifications and circulars issued by the State Tax Department relating to filing of returns, notifying the effective dates of filing of various returns, extending due dates for filing returns, rates of tax on goods and services, payment of tax, availing and utilising ITC, scrutiny of returns and oversight of tax compliance and Standard Operating Procedures (SoP) containing instructions to Departmental officers on various aspects related to filing returns, scrutiny of returns and cancellation of registrations, *etc*. also formed part of the audit criteria.

2.4.6 Oversight on return filing

Audit of 10 Circles involving six unit offices under Principal Commissioner of State Tax, Assam was taken up as part of this SSCA. The role of Circles is to ensure compliance by taxpayers in respect of accuracy of the taxable value declared, calculation and payment of tax liabilities, filing of returns, *etc*. The Circles have a broad set of functions to be exercised in this regard, which were evaluated as a part of this

10 Comprises of 2 to 10 circles.

11 First category comprising large taxpayers – top 2 *per cent* of taxpayers based on turnover.

12 Second category comprising medium taxpayers – next 8 *per cent* of taxpayers based on turnover.

13 Third category comprising the bottom most layer *i.e*. small taxpayers – remaining 90 *per cent* of taxpayers based on turnover.

SSCA. The objective of this audit was to ensure that the oversight functions exercised by the circles in relation to scrutiny, filing of returns by the taxpayers, and cancellation were in alignment with the provisions of the AGST Act and AGST Rules and as stipulated in the Standard Operating Procedures (SOP) devised thereunder. The audit observations are brought under four broad categories: Scrutiny of returns, Internal Audit, late filing/non-filing of returns and Cancellation of registrations.

2.4.6.1 Scrutiny of returns

Section 61 of the AGST Act, 2017 stipulates that the proper officer may scrutinise the returns and related particulars furnished by the taxpayers to verify the correctness of the returns and information. Under Rule 99 of the AGST Rules, discrepancies noticed, if any, are to be communicated to the taxpayer for seeking their explanation by issuing notice in Form GST ASMT-10[14]. The Principal Commissioner of State Tax, Assam vide Paragraph 1 of instruction No. 02/2021-GST, dated 01 March 2021 instructed to complete scrutiny of returns for the years 2017-18 and 2018-19 by 30 April 2021.

The CBIC vide Instruction No. 02/2022-GST dated 22 March 2022 issued Standard Operating Procedure (SOP) for scrutiny of returns for the Financial Year 2017-18 and 2018-19 to ensure uniformity in selection/ identification of returns for scrutiny. Further, in paragraph 3 of the instruction *ibid,* Directorate General of Analytics and Risk Management (DGARM) has been assigned the task of selection of returns for scrutiny based on identified risk parameters.

Audit sought information on scrutiny of returns carried out by the proper officers during the period 2017-18 to 2020-21 from the selected 10 circles. Audit noticed that scrutiny was not carried out in three Circles[15], only one taxpayer's return was scrutinised in one Circle[16] and information was not furnished to Audit by five Circles[17].

In one circle *i.e.*, Circle–99 of Guwahati Unit-D, only two taxpayers' returns were scrutinised by the proper officer. Of these two cases, Audit observed short payment of interest in one case as discussed under:

During examination of returns of Torsa Machines Limited (GSTIN–xxxxxxxxxxQ2ZA) for the year 2018-19, it was noticed that though the taxpayer had discharged monthly tax liabilities belatedly, the proper officer failed to levy interest of ₹ 0.84 lakh (**Appendix-III**) under Section 50 of the AGST Act, 2017 for delay in payment ranging between 29 days and 182 days.

Though the Principal Commissioner of State Tax, Assam instructed to complete scrutiny of returns for the years 2017-18 and 2018-19 by 30 April 2021, no detailed Standard Operating Procedure (SOP) for selection of returns for scrutiny based on specific risk parameters was issued for tax officers. Further, no instructions for

completion of scrutiny of returns for the years 2019-20 and 2020-21 have been issued till date (March 2023).

Further, Audit observed that there was no separate wing operating under the Department for identifying high risk taxpayers for scrutiny/verification like Directorate General of Analytics and Risk Management (DGARM) in respect of CBIC field formations and Tax Research Unit (TRU) in other States. It was stated by the Department that though there was no dedicated wing for selection of high-risk taxpayers, jurisdictional officers take up cases for scrutiny based on some indicative mismatch reports. As such, the Department lacked an effective risk-based standardised system of scrutiny of returns to facilitate proper officers in selecting high-risk taxpayers for scrutiny.

Recommendations No. 1 and 2

- ***The Department may issue detailed SOP/ guidelines for selection of returns for scrutiny based on risk parameters in line with CBIC's instruction dated 22 March 2022 and consider creating a separate dedicated wing to institutionalise an effective risk based system of scrutiny.***
- ***The Department may consider issuing suitable instructions with reference to the scrutiny of returns for 2019-20 and 2020-21 with timelines.***

2.4.6.2 Internal Audit under GST

As per Section 65 of the AGST Act, the Commissioner or any officer authorised by him, by way of a general or a specific order, may undertake audit of any registered person for such period, at such frequency and in such manner as may be prescribed. Section 2 (13) of the AGST Act defines "Audit" as the examination of records, returns and other documents maintained or furnished by the registered person under this Act or the rules made thereunder or under any other law for the time being in force to verify the correctness of turnover declared, taxes paid, refund claimed and Input Tax Credit (ITC) availed, and to assess his compliance with the provisions of this Act or the rules made thereunder.

The Principal Commissioner of State Tax, Assam issued instruction No. 03/2021-GST dated 26 March 2021 for initiation of audit of the selected taxpayers for the year 2017-18 under section 65 of AGST Act. In this connection, detailed procedures for conduct of audit of taxpayers to bring uniformity and universality were also highlighted in the instructions *ibid*.

During audit, information was sought from the Department on coverage of internal audit during the period from 2017-18 to 2020-21. In reply, the Department stated that the Apex Office had selected 1,422 cases for conduct of audit under Section 65 of AGST Act for the year 2017-18 but no information regarding coverage during internal audit was furnished to Audit. Of the 1,422 cases selected for internal audit, 231 cases fell under the jurisdiction of the 10 selected Circles. Information on completion of internal audit has not been furnished to Audit though called for. Further, during conduct

of detailed audit of 50 selected cases under this SSCA, Audit noticed that eight cases[18] fell within the list of 1,422 cases selected by the Department for internal audit. However, as per information furnished to Audit by the respective Circle in-charge, out of the above eight cases, audit of one case was under process and no audit had been conducted by the jurisdictional proper officer against the remaining seven cases till the date of audit (February 2023). This indicated delays in conduct of internal audit by the Department.

Recommendation No. 3

- ***The Department may take prompt steps to undertake the audits under Section 65 of the Act so that timely action can be initiated against the defaulters before the cases get time-barred.***

2.4.6.3 Lack of action on late-filers and non-filers

Section 46 of the AGST Act read with Rule 68 of the AGST Rules provides for issue of notice in Form GSTR-3A requiring filing of return within fifteen days, if the taxpayer had failed to file the return within the due date. In case the taxpayer fails to file returns even after such notice, the proper officers may proceed to assess the tax liability of the said person to the best of their judgement under Section 62 of the AGST Act and issue an assessment order in Form ASMT-13. The Principal Commissioner of State Tax, Assam had issued a detailed SOP[19] to be followed in case of non-filing of returns by registered persons in December 2019.

The position of non-filers/late filers of returns during the period from 2017-18 to 2020-21 was called for from 10 circles; however, only three circles furnished the information but information on action taken against the non-filers was not furnished. The details of non-filers/late filers in respect of the three circles are shown in **Table 2.4.1**.

Table 2.4.1: Statement showing the status of non-filers/late filers

Sl. No.	Name of the Circle	Number of	
		Non-filers	Late filers
1	Barpeta Road -01	11	Nil
2	Guwahati-C-06	Nil	14
3	Guwahati-C-99	Nil	83

From the above, it is seen that 11 cases (10 taxpayers) under Barpeta Road-01 did not file returns for the period 2017-21; however, no best judgement assessment was carried out by the proper officer as required under the provisions of Section 62 of the AGST Act. Further, Audit noticed that 97 taxpayers under Guwahati Unit-C (Circles 06 and 99) had filed returns after the due dates without payment of interest for the period of delay.

[18] (i) xxxxxxxxxxB1ZV (ii) xxxxxxxxxxB1ZV (iii) xxxxxxxxxxG1ZS (iv) xxxxxxxxxxC1ZO (v) xxxxxxxxxxH1Z5 (vi) xxxxxxxxxxK1ZK (Under process) (vii) xxxxxxxxxxL1ZP and (viii) xxxxxxxxxxC1Z6.

[19] Vide Circular No.82/2019-GST dated 26 December 2019.

Further, the proper officer in respect of the remaining seven circles had not furnished information on non-filers to Audit; however, Audit analysed "GSTR 3B non-filer report" and noticed 1,742 non- filers[20] of return during the period 2017-21. Thus, the verification mechanism against non-filers and late filers needs to be strengthened.

2.4.6.4 Lack of action for non-filing of GSTR-10 after cancellation of registration

Section 29 of the AGST Act stipulates conditions for cancellation of registration, including *suo-moto* cancellation of registrations of taxpayers who have not filed returns for six consecutive months (three consecutive tax periods for composition taxpayers). Section 45 of the AGST Act read with Rule 81 of the AGST Rules specifies that any person whose registration was cancelled should file final return in Form GSTR-10 within three months of the date of cancellation or date of order of cancellation, whichever is later. In case GSTR-10 is not filed within the stipulated date, the proper officer should issue notice in Form GSTR-3A and if the taxpayer still fails to file the final return within 15 days of the receipt of notice, an assessment order in Form ASMT-13 under Section 62 of AGST Act read with Rule 100 of AGST rule shall have to be issued to determine the liability of the taxpayer. The proper officer is responsible for *suo-moto* cancellation of registration of non-filers.

The information regarding cancellation of registration was sought from the selected 10 Circles during audit. Against the audit requisition, three circles had furnished information on cancellation of registration and seven circles either did not furnish information or stated that such information was not available with them.

The position of cancellation of registration as per information furnished by three circles and the defaulter list of GSTR-10 generated from the system during the period 2017-18 to 2020-21 are shown in **Table 2.4.2**.

Table 2.4.2: Defaulter list of GSTR-10

Sl. No.	Name of the Circle	No of cancelled cases	No of cases of GSTR-10 defaulters	Remarks
1	Guwahati-B-07	Not furnished	622	Information on best judgement assessment, was not furnished to Audit though called for.
2	Guwahati-B-10	Not furnished	1,056	
3	Guwahati-D-04	Not furnished	452	
4	Guwahati-D-08	Not furnished	940	
5	Guwahati-D-99	Not furnished	86	
6	Barpeta Road-01	304	304

8	Guwahati-C-99	26	30	
9	Tinsukia-07	Not available	183	
10	Sivasagar-04	Not available	257	
Total			**4,440**	

In the absence of information regarding best judgment assessment against the above mentioned 4,440 defaulting cases under Section 62 of the AGST Act, 2017, the

[20] (i) Guwahati-B (Circle -07) -363; (ii) Guwahati-B (Circle -10)-700; (iii) Guwahati-D (Circle -04)-111; (iv) Guwahati-D (Circle -08)-225; (v) Guwahati-D (Circle -99)- 19; (vi) Tinsukia (Circle -07)-108; (vii) Sivasagar (Circle -04)-216.

adequacy and effectiveness of the monitoring mechanism with respect to filing of GSTR-10 returns could not be ascertained in audit.

2.4.7 Centralised Audit

2.4.7.1 Inconsistencies in GST returns

Audit analysed GST returns data pertaining to 2017-18 as made available by GSTN. Rule-based deviations and logical inconsistencies between GST returns filed by taxpayers were identified on a set of 14 parameters, which can be broadly categorised into two domains - ITC and Tax payments.

Out of the 13 prescribed GST returns[21], the following basic returns that apply to normal taxpayers were considered for the purpose of identifying deviations, inconsistencies and mismatches between GST returns/data:

- **GSTR-1:** monthly return furnished by all normal and casual registered taxpayers making outward supplies of goods and services or both, containing details of outward supplies of goods and services.
- **GSTR-3B:** monthly summary return of outward supplies and input tax credit claimed, along with payment of tax by the taxpayer to be filed by all taxpayers except those specified under Section 39(1) of the Act. This is the return that populates the credit and debits in the Electronic Credit Ledger and debits in Electronic Cash Ledger.
- **GSTR-6:** monthly return for Input Service Distributors providing the details of their distributed input tax credit and inward supplies.
- **GSTR 8:** monthly return to be filed by the e-commerce operators who are required to deduct TCS (Tax collected at source) under GST, introduced in October 2018.
- **GSTR-9:** annual return to be filed by all registered persons other than an Input Service Distributor (ISD), Tax Deductor at Source/Tax Collector at Source, Casual Taxable Person and Non-Resident taxpayer. This document contains the details of all supplies made and received under various tax heads (CGST, SGST and IGST) during the entire year along with turnover and audit details for the same.
- **GSTR-9C:** annual audit form for all taxpayers having a turnover above ₹ five crore in a particular financial year. It is basically a reconciliation statement between the annual returns filed in GSTR-9 and the taxpayer's audited annual financial statements.
- **GSTR-2A:** a system-generated statement of inward supplies for a recipient. It contains the details of all B2B transactions of suppliers declared in their Form

[21] GSTR-1, GSTR-3B, GSTR-4 (taxpayers under the Composition scheme), GSTR-5 (non-resident taxable person), GSTR-5A (Non-resident OIDAR service providers), GSTR-6 (Input service distributor), GSTR-7 (taxpayers deducting TDS), GSTR-8 (E-commerce operator), GSTR-9 (Annual Return), GSTR-10 (Final return), GSTR-11 (person having UIN and claiming a refund), CMP-08 (Statement of payment of self-assessed tax by Composition taxpayer) and ITC-04 (Statement to be filed by a principal/ job-worker about details of goods sent to/received from a job-worker).

GSTR-1/5, ISD details from GSTR-6, details from GSTR-7 and GSTR-8 respectively by the counterparty and import of goods from overseas on bill of entry, as received from ICEGATE portal of Indian Customs.

The pan-State data analysis pertaining to State jurisdiction on the 14 identified parameters and extent of deviations/inconsistencies observed are summarised in **Table 2.4.3**:

Table 2.4.3: Summary of sample data analysis (Centralised audit)

Sl. No	Parameter	Algorithm used	Details of deviations/ mismatches	
			Number	Amount (₹ in crore)
Domain: ITC				
D1	ITC mismatch between GSTR-2A and GSTR-3B	ITC available as per GSTR-2A with all its amendments was compared with ITC availed in GSTR-3B in Table 4A(5) (accrued on domestic supplies) excluding the reversals Table 4B(2) but including ITC availed in the subsequent year 2018-19 from Table 8C of GSTR-9	25	34.27
D2	ITC availed under Reverse Charge Mechanism (RCM) without payment of tax in GSTR-3B and GSTR-9	RCM payments in GSTR-3B Table 3.1(d) was compared with ITC availed in GSTR-9 Table 6C, 6D and 6F. In those cases where GSTR-9 was not available, the check was restricted within GSTR-3B - tax discharged in Table 3.1(d) *vis-à-vis* ITC availed Table 4A(2) and 4A(3)	25	10.02
D3	RCM ITC availed without payment	RCM payments in GSTR-9 Table 4G (tax payable) was compared with ITC availed in GSTR-9 Table 6C, 6D and 6F (ITC availed). In those cases where GSTR-9 was not available, RCM payment in GSTR-3B Table 3.1(d) was compared with GSTR-3B 4(A)(2) and 4A(3). Greater of difference in GSTR-9 and GSTR-3B considered where both were available.	10	1.44
D4	Mismatch in availment of ISD credit	ISD transferred in GSTR-9 Table 6G or GSTR-3B Table 4(A)(4) was compared with the sum of Table 5A, Table 8A, and Table 9A of GSTR-6 of recipient GSTINs	25	9.17
D5	ISD credit reversal	GSTR-9 Table 7B/7H of the recipients was compared with sum of Table 8A (negative figures only) and Table 9A (negative figures only) of their GSTR-6s	01	0.01
D6	Reconciliation between ITC availed in annual returns with expenses in financial statements	Positive figure in GSTR-9C Table 14T and examination of reasons provided in Table 15 for mismatch	25	1421.17[22]
D7	Mismatch of ITC availed between annual returns and books of accounts	Positive figure in GSTR-9C Table 12F and examination of reasons provided in Table 13 for mismatch	25	525.03

[22] The amount of ₹ 1,421.17 crore is on account of un-reconciled ITC availed in the Annual returns and corresponding expenses booked in financial statements by the taxpayers.

Sl. No	Parameter	Algorithm used	Details of deviations/ mismatches	
			Number	Amount (₹ in crore)
Domain: Tax payments				
D8	Mismatch in turnover declared in GSTR-9C Table 5R	Negative figure in GSTR-9C Table 5R and examination of reasons provided in Table 6 for mismatch	25	---[23]
D9	Mismatch in taxable turnover declared in GST-9C Table 7G	Negative figure in GSTR-9C Table 7G and examination of reasons provided in Table 8 for mismatch	17	---[24]
D10	Mismatch in tax paid between books of accounts and returns	Negative figure in GSTR-9C Table 9R and examination of reasons provided in Table 10 for mismatch	25	29.61
D11	Undischarged tax liabilities	The greater of tax liability between GSTR-1 (Tables 4 to 11) and GSTR-9 (Tables 4N, 10 and 11) was compared with tax paid details in Table 9 and Table 14 of GSTR-9. In those cases where GSTR-9 was not available, tax paid in Tables 3.1(a) and 3.1(b) of GSTR-3B was compared with GSTR-1 liability. The amendments and advance adjustments declared in GSTR-1 and 9 were duly considered.	25	68.89
D12	Composition taxpayer also availing e-commerce facility	E-commerce GSTR 8 became effective from 01 October 2018 when TCS provisions became effective. GSTINs declared in GSTR 8 who are also filing GSTR 4 under composition scheme.	4	0
D13	GSTR-3B was not filed but GSTR-1 is available	Taxpayers who have not filed GSTR-3B but have filed GSTR-1 or where GSTR-2A is available, indicating taxpayers were carrying on the business without discharging tax.	25	1.22
D14	Short payment of interest	Interest calculated at the rate of 18 *per cent* on cash portion of tax payment on delayed filing of GSTR-3B *vis-à-vis* interest declared in GSTR-3B	25	7.29
	Total		**282**	**2108.12[25]**

Audit selected a sample of 282 cases from amongst the top deviations/inconsistencies in each of the 14 parameters for the year 2017-18. The audit queries were issued to the respective circles between February 2022 and April 2022 without further scrutiny of taxpayers' records. The audit check in these cases was limited to verifying the Department's action on the identified deviations/mismatches.

Initial responses were yet to be received (February 2023) for 42 inconsistencies communicated to the Department which involved deviations/mismatches of an amount of ₹ 663.69 crore. Details of 42 cases are listed in **Appendix-IV** and **Appendix-V**. Dimension-wise highest value cases where no response was received are given in **Table 2.4.4**.

[23] Deviation amount of ₹ 832.73 crore is mismatch of total turnover declared in Table 5R of GSTR-9C.
[24] Deviation amount of ₹ 274.54 crore is mismatch of taxable turnover declared in Table 7G of GSTR-9C.
[25] The amount includes un-reconciled ITC of ₹ 1,421.17 crore.

Table 2.4.4: Dimension-wise highest value cases where no response was received

Sl. No.	Dimension name	GSTIN	Taxpayer Name	Jurisdiction	Deviation Amount (₹ in crore)
1	ITC (3B v/s 2A)	xxxxxxxxxxxR1ZO	Mc Nally Bharat Engineering Co. Ltd.	Guwahati-D/4	1.65

Audit noticed deviations from the provisions of the AGST Act in 124 cases involving short levy of tax of ₹ 82.88 crore, constituting 51.67 *per cent* of the 240 inconsistencies/mismatches in data, for which the Department provided responses. The Department has accepted the audit observations or initiated action in 105 cases with tax effect of ₹ 67.27 crore. Out of these cases, the Department has recovered ₹ 1.48 crore in 15 cases[34], issued Show Cause Notices (SCN) in 16 cases for ₹ 4.39 crore , issued notice conveying discrepancies to the taxpayer in Form ASMT-10 in 69 cases for ₹ 59.10 crore and was in correspondence with the respective taxpayers or issued DRC-01A in nine cases involving tax effect of ₹ 2.30 crore. Relatively higher rates of deviations were noticed under risk parameters such as excess ITC availed, short declaration of taxable value, short payment of interest, *etc*.

In 120 cases, constituting 50 *per cent* of the audit sample, where the Department's reply was acceptable to Audit, data entry errors by taxpayers comprised 34 cases, the

27 Compliance deviation of unreconciled ITC in table 14T of GSTR- 9C of ₹ 7.80 crore.

28 Total unreconciled turnover (TO) in table 5R of GSTR-9C in the 25 cases is ₹ 832.73 crore, out of which mismatched TO of ₹ 101.23 crore in four cases is yet to be examined by the Department, in 18 cases involving mismatched TO of ₹ 606.33 crore was mainly due to disclosure consolidated turnover of multiple GSTIN units in table 5R of GSTR 9C-and the deviations in the remaining three cases involving mismatched TO of ₹ 125.17 crore ASMT-10 had been issued by the Department.

29 Total unreconciled taxable turnover (TO) in table 7G of GSTR-9C in the 17 cases is ₹ 274.54 crore, out of which mismatched TO of ₹ 29.56 crore in three cases is yet to be examined by Department, in 12 cases involving mismatched TO of ₹ 152.34 crore was mainly due to disclosure consolidated turnover of multiple GSTIN units in table 7G of GSTR 9C and deviations in the remaining two cases involving mismatched TO of ₹ 92.64 crore. ASMT-10 had been issued by the Department.

30 This excludes 42 cases yet to be examined by the Department.

31 Out of 118 accepted cases, in 34 cases amounting to ₹ 48.96 crore related to data entry error, 81 cases amounting to ₹ 1302.67 crore accepted by audit based on other valid explanation given by the Department and in four cases amounting to ₹ 1.54 crore where the Department had taken action before query.

32 In four cases where recovery partly made are also included in ASMT-10 (two cases) and SCN cases (two cases).

33 Out of 78 cases, 69 cases related to ASMT-10 involving amount of ₹ 59.10 crore and the remaining nine cases related to DRC 01A/Notices involving amount of ₹ 2.30 crore.

34 15 cases involved such cases which also included in SCN (2 cases) and ASMT-10 cases (2 cases).

Department had proactively taken action in four cases and in 82 cases, there were valid explanations. The details are enclosed in **Appendix-IX**.

In 42 cases constituting 17.5 *per cent* (underlying deviations/mismatch of ₹ 663.69 crore), the Department is yet to examine the observations.

2.4.7.3 A few high value illustrative cases from each dimension are given below:-

(a) ITC mismatch between GSTR-2A and GSTR-3B: GSTR-2A is a purchase related dynamic tax return that is automatically generated for each business by the GST portal, whereas GSTR-3B is a monthly return in which summary of outward supplies along with ITC declared and payment of tax are self-declared by the taxpayer.

To analyse the veracity of ITC utilisation, relevant data was extracted from GSTR-3B and GSTR-2A for the year 2017-18 and the ITC paid as per suppliers' details was matched with the ITC credit availed by the taxpayer.

In case of M/s Global Distributors (GSTIN xxxxxxxxxxE1Z0) under Guwahati Unit-C (Circle-3) for the year 2017-18, it was observed that the taxpayer had availed ITC of ₹ 5.18 crore as per table 4A(5) of GSTR-3B excluding ITC reversal of ₹ 0.31 lakh table 4B(2) of GSTR-3B whereas ITC amount available as per GSTR-2A was only ₹ 1.09 crore, resulting in mismatch of ITC of ₹ 4.08 crore.

On this being pointed out (February 2022), the Department stated (September 2022) that the taxpayer can avail ITC as per books of accounts if he satisfies all other conditions laid down in Section 16 of the AGST Act. However, the Department did not provide any documentary evidence in support of availability of ITC with the taxpayer.

(b) Excess availment of ITC on RCM without payment of tax as per GSTR-3B: Under Reverse Charge Mechanism, the liability to pay tax is fixed on the recipient of supply of goods or services instead of the supplier or provider in respect of certain categories of goods or services or both under Section 9(3) or Section 9(4) of the CGST Act, 2017 and under sub-section (3) or sub-section (4) of Section 5 of the IGST Act, 2017.

To analyse the veracity of ITC availed on tax paid under RCM for the year 2017-18, the datasets pertaining to GSTR-3B and annual return GSTR-9 were compared to check whether the ITC availed on RCM was restricted to the extent of tax paid.

In case of M/s Funshine Getaways Pvt Ltd (GSTIN- xxxxxxxxxxP1ZS) under Sibsagar Unit (Circle-1) for the year 2017-18, it was observed that the taxpayer had availed ITC of ₹ 2.01 crore as per Table 6(C+D+F) of GSTR-9 whereas tax paid under RCM as per Table 3.1(d) of GSTR3B was ₹ 0, which resulted in mismatch of availment of ITC of ₹ 2.01 crore under RCM.

On this being pointed out (February 2022), the Department stated (August 2022) that the matter was being pursued and DRC-01A[35] dated 10 August 2022 for intimation of tax ascertained as being payable under Section 74(5) was issued to the taxpayer.

(c) Excess availment of ITC on RCM without payment of Tax as per GSTR-9: The extent of availing of ITC under RCM for the year 2017-18 without discharging equivalent tax liability or, in other words, short payment of tax under RCM was analysed by comparing RCM payments in GSTR-9 Table 4G with ITC availed in GSTR-9 Tables 6C, 6D and 6F to check whether the tax has been discharged fully on the activities/transactions under RCM.

In case of J K Chemical (GSTIN- xxxxxxxxxxC1ZS), under Guwahati Unit-A (Circle-1), Audit noticed that during 2017-18, as per Table 6 (C, D & F) of GSTR-9, the taxpayer had availed ITC of ₹ 0.42 crore under RCM. However, tax payable under RCM as per Table 4G of GSTR 9 was ₹ 0.50 lakh under RCM. Thus, the taxpayer had availed ITC of ₹ 0.41 crore under RCM without payment of tax.

This was pointed out in February 2022. Response of the Department is awaited (February 2023).

(d) Irregular availing of ITC by recipient on ISD credit: To analyse whether the ITC availed by the taxpayer is in excess of that transferred by the Input Service Distributor (ISD), ITC availed as declared in the returns of the taxpayer was compared with ITC transferred by the ISD in their GSTR-6.

In case of M/s. Hindustan Unilever Limited (GSTIN- xxxxxxxxxxN1ZT) under Guwahati Unit-D (Circle-99) for the year 2017-18, Audit noticed that the taxpayer had availed ITC credit of ₹ 25.43 crore in Table 4(A)(4) of GSTR-3B & Table 6G of GSTR-9 against inward supplies received from ISD and ITC transferred by the ISD of ₹ 18.66 crore as per GSTR-6 of ISD. This resulted in incorrect availment of ITC of ₹ 6.77 crore.

This was pointed out in April 2022. Response of the Department is awaited (February 2023).

(e) Unreconciled ITC in Table 12F of GSTR-9C: Table 12 of GSTR-9C reconciles ITC declared in annual return (GSTR-9) with ITC availed as per audited annual financial statement or books of accounts. Table 12F deals with unreconciled ITC.

The certified reconciliation statement submitted by the taxpayer as required under the rule 80(3) of AGST Rules in form GSTR-9C for the year 2017-18 was analysed at data level to review the extent of identified mismatch in ITC declared in the annual return with financial statements.

In case of Baker Hughes Singapore PTE (GSTIN- xxxxxxxxxxF1ZT), under Naharkatia Unit (Circle-1), Audit noticed that as per Table 12 (E) of GSTR-9C, ITC availed was

[35] Form DRC-01A is intimation of tax ascertained as being payable under Section 73(5)/74(5) under Rule 141(1A) of the AGST Rules.

₹ 9.03 crore whereas as per Table 12 (D) of GSTR-9C ITC availed was ₹ 4.86 crore. As such, there was mismatch in ITC availed amounting to ₹ 4.17 crore between annual return and financial statements (as mentioned in Table 12F of form GSTR-9C) during 2017-18.

This was pointed out in February 2022. Response of the Department is awaited (February 2023).

(f) Unreconciled turnover in Table 5R of GSTR-9C: Table 5 of GSTR-9C is the reconciliation of turnover declared in audited annual financial statement with turnover declared in annual return (GSTR-9). Column 5R of this table captures the unreconciled turnover between the annual return GSTR-9 and that declared in the financial statement for the year after requisite adjustments.

The certified reconciliation statement submitted by the taxpayer, as required under Rule 80(3) of AGST Rules in form GSTR-9C for the year 2017-18, was analysed at data level to review the extent of identified mismatch in turnover reported in the annual return *vis-à-vis* the financial statements. The unreconciled amount in cases where the turnover declared in GSTR-9 is less than the financial statement indicates non-reporting, under-reporting, short-reporting, omission or error in reporting of supplies leading to evasion or short payment of tax. It could also be a case of non-reporting of both taxable and exempted supplies.

In case of M/s United Spirits Limited (GSTIN- xxxxxxxxxxJ1Z9), under Unit-C (Circle-7), Audit noticed that the turnover as per annual return was ₹ 34.15 crore whereas the turnover as per financial statement was ₹ 113.59 crore which resulted in unreconciled turnover of ₹ 79.44 crore as per Table 5R of GSTR-9C.

On this being pointed out (February 2022), the Department stated (September 2022) that notice under Section 61 (in form ASMT-10) was issued to the taxpayer.

(g) Unreconciled tax liability in Table 9R of GSTR-9C: The certified reconciliation statement submitted by the taxpayer as required under rule 80(3) of AGST Rules in Form GSTR-9C for the year 2017-18 was analysed at data level to review the extent of identified mismatch in tax paid between the annual return and the books of account. Table 9 of Form 9C reconciles the tax paid by segregating the turnover rate-wise and comparing it with the tax discharged as per annual return in GSTR-9. The unreconciled amounts could potentially indicate tax levied at incorrect rates, incorrect depiction of taxable turnover as exempt or *vice versa* or incorrect levy of CGST/SGST/IGST. There can also be situations wherein supplies/tax declared are reduced through amendments (net of debit notes/credit notes) in respect of 2017-18 transactions carried out in the subsequent year from April to September 2018. Consequential interest payments – both short payments and payments under incorrect heads - also need to be examined in this regard.

In case of M/s Zillion Infraprojects Private Limited (GSTIN- xxxxxxxxxxF1ZF), under Bongaigaon (Circle-1), Audit observed that as per books of accounts (Table 9P of GSTR-9C), the taxpayer was liable to pay ₹ 4.20 crore. However, as per annual return

(Table 9Q of GSTR-9C), the taxpayer had paid ₹ 3.07 crore. As such, there was short payment of tax amounting to ₹ 1.13 crore due to mismatch between tax liabilities as per books of accounts and annual return (Table 9R of GSTR-9C) submitted by the taxpayer during 2017-18.

This was pointed out in February 2022. Response of the Department is awaited (February 2023).

(h) Undischarged tax liability: GSTR-1 depicts the monthly details of outward supplies of goods or services. Outward supplies are also assessed by the taxpayer and mentioned in annual return in GSTR-9 in the relevant columns. Further, taxable value and tax paid thereof are also shown in monthly GSTR-3B return.

To analyse the undischarged tax liability, relevant data was extracted from GSTR-1 and GSTR-9 for the year 2017-18 and the tax payable in these returns was compared with the tax paid as per GSTR-9. Where GSTR-9 was not available, a comparison of tax payable between GSTR-1 and GSTR-3B was resorted to. The amendments and advance adjustments declared in GSTR-1 and 9 were also considered for this purpose.

In case of M/s. J.S.B. Cement LLP (GSTIN- xxxxxxxxxxD1ZW) under Guwahati Unit-C (Circle-8) for the year 2017-18, Audit observed that the liability as per GSTR-1 was of ₹ 13.96 crore whereas payment as per GSTR-9 was ₹ 8.06 crore, which resulted in mismatch in terms of short discharge of tax of ₹ 5.91 crore.

On this being pointed out (February 2022), the Department stated (July 2022) that notice under Section 61 (in Form ASMT-10) had been issued to taxpayer to explain the reasons for discrepancies.

(i) GSTR-3B not filed but GSTR-1 available: GSTR-3B return under rule 61(5) of AGST Rule is the only instrument through which the tax liability is offset and ITC is availed.

Effort was made through data analysis to identify those taxpayers who had not filed GSTR-3B but had filed GSTR-1 or whose GSTR-2A was available. The very availability of GSTR-1 and 2A coupled with non-filing of GSTR-3B indicates that the taxpayers had undertaken/carried on the business during the period but had not discharged their tax liability. It may also include cases of irregular passing on of ITC.

The datasets pertaining to relevant fields in the GSTR-1, 2A and 3B were analysed. In case of M/s Rockland Media and Communication Pvt Ltd (GSTIN- xxxxxxxxxxM1Z2) under Guwahati Unit-C (Circle-7) for the year 2017-18, Audit noticed that there was tax liability of ₹ 0.39 crore as per GSTR-1 but the taxpayer did not pay tax by filing GSTR-3B. As such there was short discharge of tax liability of ₹ 0.39 crore.

On this being pointed out (February 2022) by Audit, the Department stated (September 2022) that action under section 74 of the Assam GST Act had been initiated

and accordingly DRC-01A[36] had been issued for recovery of ₹ 0.74 crore (tax amount of ₹ 0.40 crore and interest amount of ₹ 0.34 crore).

(j) Short payment of interest: Section 50 of the Act stipulates that every person who is liable to pay tax in accordance with the provisions of this Act or the rules made thereunder but fails to pay the tax or any part thereof to the Government within the period prescribed, shall for the period for which the tax or any part thereof remains unpaid, pay interest at the rate notified.

The extent of short payment of interest on account of delayed remittance of tax during 2017-18 was identified using the tax paid details in GSTR-3B and the date of filing of GSTR-3B. Only the net tax liability (cash component) has been considered to work out the interest payable.

In case of M/s Assam State Transport Corporation (GSTIN- xxxxxxxxxxR1ZU), under Guwahati Unit-C (Circle-2) for the year 2017-18, Audit observed that the taxpayer made payment of monthly tax liability with delay but no interest was paid on such delayed payment of tax. This resulted in non-payment of interest of ₹ 0.83 crore.

On this being pointed out (February 2022) by Audit, the Department stated (September 2022) that notice under Section 61 (in Form ASMT-10) had been issued to taxpayer to explain the reasons for discrepancies.

2.4.7.4 Audit observations accepted by the Department

Out of the 282 deviations summarised in Table 2.4.5, the Department has accepted the audit observations or initiated action in 105 cases with tax effect of ₹ 67.27 crore (details are given in **Appendix-VII**). A few illustrative cases where the Department accepted or intimated action taken are given below:

(a) Undischarged tax liability: In order to analyse the undischarged tax liability, relevant data were extracted from GSTR 1 and GSTR 9 for the year 2017-18 and the tax payable in these returns was compared with the tax paid declared in GSTR 9.

In case of RCC Infraventures Ltd (GSTIN- xxxxxxxxxxE1ZC) under Tezpur Unit (Circle-1) for the year 2017-18, Audit noticed that the tax liability as per GSTR-1 was ₹ 9.61 crore whereas payment as per GSTR 9 was only ₹ 4.45 crore, which resulted in short discharge of tax liability of ₹ 5.16 crore.

On this being pointed out (February 2022), the Department stated (May 2022) that notice under Section 61 (in Form ASMT-10) had been issued to taxpayer to explain the reasons for discrepancies.

(b) Unreconciled ITC in Table 12F of GSTR-9C: Table 12 of GSTR 9C reconciles ITC declared in annual return (GSTR9) with ITC availed as per audited annual financial statement or books of accounts. Column 12F of this table deals with unreconciled ITC.

[36] Dated 23 September 2022.

In case of Air India Limited (GSTIN- xxxxxxxxxxP1ZO), under Unit-C (Circle-7), Audit noticed that as per Table 12 (E) of GSTR 9C, ITC availed was ₹ 2.69 crore whereas as per Table 12 (D) of GSTR 9C, ITC availed was ₹ 0.13 crore. As such, there was mismatch in ITC availed amounting to ₹ 2.56 crore between the annual return and the financial statements (as mentioned in Table 12F of form GSTR 9C) during 2017-18.

On this being pointed out (February 2022), the Department stated (September 2022) that notice under Section 61 (in form ASMT-10) was issued to the taxpayer to explain the reasons for discrepancies.

2.4.7.5 Department response rebutted

Out of the 125 non-compliance cases as per Table 2.4.5, the Department has not accepted 15 audit observations amounting to ₹ 15.61 crore. These cases are featured in **Appendix-VIII**. Two illustrative cases are given below:

(a) Undischarged tax liability: In case of M/s Sri Gopikrishna Infrastructure Pvt. Ltd (GSTIN- xxxxxxxxxxQ2ZO) under Guwahati Unit-C(Circle-4), Audit observed that the liability as per GSTR-1 was of ₹ 2.53 crore whereas payment as per GSTR-3B/GSTR-9 was ₹ 0.11 crore for the year 2017-18, which resulted in short discharge of tax liability of ₹ 2.42 crore.

On this being pointed out (February 2022), the Department stated (July 2022) that the taxpayer had correctly discharged tax liability of ₹ 0.11 crore for 2017-18 through GSTR-3B for the months of February 2018 and March 2018. The reply is not tenable as the taxpayer had amended invoice/credit note/debit note pertaining to the year 2017-18 amounting to ₹ 2.42 crore in GSTR 1 during the year 2018-19 which brought the total tax liability for 2017-18 to ₹ 2.53 crore. This needs further clarification from the Department.

(b) ITC mismatch between GSTR-2A and GSTR-3B: In case of M/s. Mahindra & Mahindra Limited (GSTIN- xxxxxxxxxxE1ZY) under Guwahati Unit-C (Circle-99) for the year 2017-18, it was observed that the taxpayer had availed ITC of ₹ 197.97 crore as per GSTR-3B whereas ITC amount reflected in GSTR-2A was ₹ 195.75 crore which resulted in excess availment of ITC of ₹ 2.22 crore.

On this being pointed out (February 2022), the Department stated (September 2022) that the taxpayer can avail ITC as per books of accounts if he satisfies all other conditions laid down in Section 16 of AGST Act. However, the Department did not provide documentary evidence regarding availability of ITC with the taxpayer.

2.4.7.6 Data entry errors by taxpayers

The data entry errors constituted 14.17 *per cent* (34 cases) of the total responses received. These data entry errors did not have any revenue implication. Most of the data entry errors relate to payment of tax under RCM, distribution of ITC by ISD, *etc*. as detailed in **Appendix-IX.** An illustrative case is brought out below:

Unreconciled tax liability in Table 9R of GSTR-9C: In case of M/s Jain Udyog (GSTIN-xxxxxxxxxxG1ZF), under Silchar Unit (Circle-1), Audit observed that there was unreconciled tax liability of ₹ 18.63 crore as per Table 9R of GSTR 9C.

On this being pointed out (February 2022), the Department stated (September 2022) that unreconciled amount in table 9R of GSTR-9C was due to entering ₹ 0 in Table 9 of GSTR-9 inadvertently. The system allowed for such data entry errors, which could have been avoided with proper validation controls.

The CAG's Report No. 5 of 2022 on Union Government Department of Revenue (Indirect Taxes-Goods and Services Tax)- had also highlighted data quality issues and significant inconsistencies in the GST data due to which Audit could not establish reliability of data for finding audit insights and trends. The Report had recommended that the Union Ministry should consider introducing appropriate validation controls (controls to prevent unreasonable data entries and/or alert the taxpayer to unreasonable data) supplemented by *post-facto* data analytics in respect of important data elements.

Recommendation No. 5

- ***The Department may take up the matter with the GST Council to insert adequate validation controls in the GST portal to curb data entry errors, enhance taxpayer compliance and facilitate better scrutiny.***

2.4.7.7 Department's reply acceptable to audit

Out of 120 cases summarised in Table 2.4.5, in 82 cases (68.34 *per cent*), the Department's response is acceptable to Audit. A few illustrative cases are given below:

(a) Unreconciled ITC in Table 12F of GSTR-9C

In case of North Eastern Electric Power Corporation Ltd (GSTIN- xxxxxxxxxxJ2ZQ), under Haflong Unit (Circle-1), Audit noticed that there was mismatch in ITC availed amounting to ₹ 1.04 crore between the annual return and the financial statements (as mentioned in Table 12F of form GSTR 9C) during 2017-18.

On this being pointed out (February 2022), the Department stated (September 2022) that the unreconciled amount of ₹ 1.04 crore as per GSTR 9C of 2017-18 had been reversed in GSTR 3B for the months of September 2018 and December 2018.

(b) Unreconciled turnover in table 5R of GSTR-9C

In case of Village Financial Services Limited (GSTIN- xxxxxxxxxxB1ZF), under Dhubri Unit (Circle-1), Audit noticed that there was a mismatch of unreconciled turnover of ₹ 112.77 crore as per Table 5R of GSTR-9C.

On this being pointed out (February 2022), the Department stated (June 2022) that the reasons for unreconciled turnover was due to disclosure of consolidated turnover of multi-GSTIN units under the same PAN.

2.4.8 Detailed Audit

In a self-assessment regime, the onus of compliance with law is on the taxpayer. The role of the Department is to establish and maintain an efficient tax administration mechanism to provide oversight. With finite level of resources, for an effective tax administration, to ensure compliance with law and collection of revenue, an efficient governance mechanism is essential. An IT-driven compliance model enables maintaining a non-discretionary regime of governance on scale and facilitates a targeted approach to enforce compliance.

From an external audit perspective, Audit also focused on a data-driven risk-based approach. Thus, apart from identifying inconsistencies/deviations in GST returns through pan-State data analysis, a detailed audit of GST returns was also conducted as part of this SSCA. A risk-based sample of 50 taxpayers was selected for this part of the SSCA. The methodology adopted was to initially conduct a desk review of GST returns and financial statements filed by the taxpayers as part of GSTR-9C and other records available in the back-end system to identify potential risk areas, inconsistencies/ deviations and red flags. Accordingly, desk review was carried out in the audit office. Based on desk review results, detailed audit was conducted at Circles by requisitioning records of taxpayers such as financial ledgers, invoices, *etc*. to identify causative factors of the identified risks and to evaluate compliance by taxpayers.

In reply to audit requisitions relating to granular records for detailed audit, the Department furnished records only in four cases out of 50 selected cases.

In 38 cases, comprising 76 *per cent* of the risk-based sample, records were partially produced as granular taxpayer records such as invoices, trial balance, ledger, *etc*. were not provided. The jurisdiction-wise partial production of records is summarised in **Appendix-X**. Consequently, in these partially produced cases, Audit was restricted to the information available in the returns filed by the taxpayers. In eight cases (16 *per cent*), the jurisdictional circles did not produce any records. The details are in **Appendix-XI**. Thus, Audit could not assess eligibility of ITC claimed and extent of unsettled tax liability, which constituted a significant scope limitation.

Top five cases of non-production and partial production of records are given in **Table 2.4.6** & **Table 2.4.7** respectively.

Table 2.4.6: Top five cases of non-production of records

Sl. No.	GSTIN	Name of the taxpayer	Jurisdictional Circle	Mismatches (ITC and liability) (₹ in crore)
1	xxxxxxxxxxN3ZX	Nayak Infrastructure Private Limited	Hojai-01	3.02

2.4.8.1 Audit findings - Detailed audit

The audit findings have been categorised under three categories *viz*., audit findings relating to (a) Returns (b) Utilisation of ITC and (c) Discharge of tax liability.

(a) Audit findings related to GST Returns

The detailed audit of returns filed by a sample of 50 taxpayers disclosed that interest payments were not discharged by taxpayers and there was non/short levy of late fee and penalty in a significant number of cases, which are brought out below.

(i) Non-payment of interest by taxpayers

As per section 50 of the AGST Act, every person who is liable to pay tax in accordance with the provisions of this Act or the rules made thereunder, but fails to pay the tax or any part thereof to the Government within the period prescribed, shall for the period for which the tax or any part thereof remains unpaid, pay, on his own, interest at such rate, not exceeding eighteen *per cent*, as may be notified by the Government on the recommendations of the Council.

On scrutiny of GSTR-3B returns for the year 2017-18 in respect of selected 50 taxpayers, it was noticed that 25 taxpayers pertaining to 20 Circles (or 12 Unit Offices) did not pay interest of ₹ 0.75 crore for delayed payment of tax. Details are given in **Appendix-XII**.

On these being pointed out (May-September 2022), the Department stated (July-September 2022) that notices were issued to taxpayers in eight cases under Section 61 to explain the reasons for discrepancies and SCNs were issued to taxpayers in eight cases under Section 73 of the AGST Act to ascertain short payment of interest and four taxpayers had deposited ₹ 0.40 lakh. Reply of the Department in respect of five cases is awaited (February 2023). The top five irregularities noticed in this category amounted to ₹ 0.64 crore. Two illustrative cases are given below:

- During scrutiny of monthly returns (GSTR-3B) of Shri Kulen Hazarika (GSTIN-xxxxxxxxxxK1ZJ), under Mangaldoi Unit (Circle-2) for the year 2017-18, it was noticed that there was delay in filing of GSTR-3B return for the months of October 2017, December 2017, February 2018 and March 2018. The delay ranged between 217 and 337 days; however, interest amounting to ₹ 0.26 crore was not paid on delayed payment of tax of ₹ 2.26 crore.

On this being pointed out (September 2022), the Department stated (September 2022) that DRC 01A dated 28 September 2022 had been issued to the taxpayer.

- Scrutiny of GSTR-3B returns of Tapan Changmai (GSTIN- xxxxxxxxxxM2Z9), under Tinsukia (Circle-2) for the year 2017-18 revealed that there was delay in filing of GSTR-3B for the months of December 2017 to March 2018 ranging between 139 and 227 days; however, interest amounting to ₹ 0.15 crore was not paid on delayed payment of tax of ₹ 1.77 crore.

On this being pointed out (July 2022), the Department stated (July 2022) that SCN under section 73 of the AGST Act, 2017 (DRC-01) had been issued to the taxpayer for short payment of interest.

(ii) Non/short levy of late fee for delay in filing of Annual Return

In terms of Section 47 of the AGST Act, any registered person who fails to furnish annual return (GSTR-9) as per Section 44 of the Act *ibid* within the due date shall pay

a late fee of one hundred rupees for every day during which such failure continues subject to a maximum amount of half *per cent*[37] of turnover in the State.

Audit noticed that out of the selected 50 taxpayers, five taxpayers[38] did not file GSTR-9 and seven taxpayers[39] filed GSTR-9 but with delays ranging between 12 days and 865 days from the due date for the period 2017-18. However, the proper officer did not levy late fee amounting to ₹ 0.16 crore. The details of these cases are shown in **Appendix-XIII**.

On being pointed out (between June and September 2022), the Department stated (between July and September 2022) that notices were issued to six taxpayers under Section 61 to explain the reasons for discrepancies and SCN were issued to five taxpayers under Section 73 of the AGST Act, 2017 and one taxpayer had deposited late fees of ₹ 1.46 lakh. Further, action initiated by the Department is awaited (February 2023). The top five irregularities noticed in this category amounted to ₹ 8.88 lakh. Two illustrative cases are given below:

- In case of M/s Nayak Infrastructure Pvt. Ltd (GSTIN- xxxxxxxxxxN3ZX), under Hojai Unit (Circle-1) for the year 2017-18, Audit noticed that the taxpayer did not file his annual return (GSTR-9) till the date of audit (31 August 2022). As such there was a delay of 936 days in filing of annual return with late fee implication of ₹ 1.88 lakh.

On this being pointed out (September 2022), the Department stated (September 2022) that SCN under Section 73 of the AGST Act (DRC-01) had been issued to the taxpayer.

- In case of S K Logitech Pvt Ltd (GSTIN- xxxxxxxxxxK1ZW), under Sivasagar (Circle-4) for the year 2017-18, Audit noticed that the taxpayer did not file his annual return till the date of audit (31 July 2022). There was delay of 905 days in filing of annual return with late fee implication of ₹ 1.82 lakh.

On this being pointed out (August 2022), the Department stated (August 2022) that SCN under Section 73 of the AGST Act, 2017 (DRC-01) had been issued to the taxpayer.

(iii) Non-levy of penalty due to delay in filing of form GSTR-9C

As per Section 44(2) of AGST Act, 2017, every registered person who is required to get his accounts audited shall furnish, electronically, the annual return (GSTR-9) under sub-section (1) along with a copy of the audited annual accounts and a reconciliation statement (GSTR-9C), reconciling the value of supplies declared in the return furnished for the financial year with the audited annual financial statement and such other particulars as may be prescribed. Again, as per sl. no. 2 of Notification No. 06/2020 – Central Tax[40] dated 03 February 2020, the due date for furnishing return under

[37] 0.25 *per cent* under the CGST Law + 0.25 *per cent* under the SGST / UTGST Law.
[38] Pertains to four circles.
[39] Pertaining to seven circles.
[40] No similar notification was found to be issued from state tax authority.

Section 44 of the Act *ibid* and Rule 80 made thereunder was extended to 07 February 2020 for the year 2017-18.

As per Section 125 of AGST Act, 2017, any person, who contravenes any of the provisions of this Act or any rules made thereunder for which no penalty is separately provided for in this Act, shall be liable to a penalty which may extend to twenty-five thousand rupees. Similar provision for levy of penalty has also been laid down under the CGST Act, 2017.

Audit noticed that out of the selected 50 taxpayers, nine taxpayers[41] did not file GSTR-9C. Further, six taxpayers[42] filed GSTR-9C with delays ranging between 13 days and 955 days from the due date for the period 2017-18. However, the proper officers did not levy penalty amounting to ₹ 7.50 lakh for such delayed/non-filing of GSTR-9C. The details of the cases are shown in **Appendix-XIV**.

On being pointed out (between June and September 2022), the Department stated (between July and September2022) that notices were issued to seven taxpayers under Section 61 to explain the reasons for discrepancies and SCNs were issued to another seven taxpayers under Section 73 of the AGST Act, 2017 to determine short/non-levy of penalty. Further, a penalty of ₹ 0.50 lakh (₹ 0.25 lakh under CGST Act and ₹ 0.25 lakh under AGST Act) was recovered from one taxpayer.

(b) Audit findings relating to utilisation of ITC

(i) ITC mismatch between GSTR-3B and GSTR-2A

The Principal Commissioner of State Tax, Assam vide Circular No. 131/2021-GST dated 11 January 2023 prescribed the following procedures for dealing with cases where there was difference in the ITC availed in Form GSTR-3B as compared to that ITC available in Form GSTR-2A for the FY 2017-18 :

(a) If the difference between ITC claimed in Form GSTR-3B and that available in Form GSTR-2A exceeds ₹ five lakh, the proper officer shall ask the registered person to produce a certificate for the concerned supplier from Chartered Accountant (CA) or Cost Accountant (CMA), certifying that supplies in respect of the said invoices of the supplier have actually been made by the supplier to the said registered person and the tax on such supplies has been paid by the said supplier in his return in Form GSTR-3B.

(b) If the difference between ITC claimed in Form GSTR-3B and that available in Form GSTR-2A is up to ₹ five lakh, the proper officer shall ask the claimant to produce a certificate from the concerned supplier to the effect that said supplies have actually been made by him to the said registered person and the tax on said supplies has been paid by the said supplier in his return in Form GSTR-3B.

On verification of records for the year 2017-18 in respect 50 selected taxpayers, Audit noticed ITC mismatch of ₹ 27.01 crore in respect of 37 taxpayers[43]. There was

[41] Pertaining to seven circles.
[42] Pertaining to six circles.
[43] Pertaining to 30 Circles (or 19 Unit Offices).

mismatch of ITC availed as per Table 4A (5) of GSTR-3B and ITC available as per GSTR-2A during 2017-18. (Details are in **Appendix-XV**).

On being pointed out (between May and September 2022), the Department stated (between July and October 2022) that in 24 cases notices had been issued to taxpayers under Section 61 to explain the reasons for discrepancies. However, further reply of the Department is awaited (February 2023).

Further, in four cases, SCNs were issued under Section 73 of the AGST Act, 2017 and in one case, the Department had realised ₹ 9.87 lakh. The reply of the Department in respect of the remaining eight cases is awaited (February 2023). The top five irregularities noticed in this category amounted to ₹ 12.87 crore. An illustrative case is given below:

- During examination of the returns of Hindustan Construction Co. Ltd (GSTIN-xxxxxxxxxxB1ZV) under jurisdiction of Guwahati Unit-D (Circle-99) for the period from July 2017 to March 2018, Audit observed that ITC availed as per GSTR-3B/GSTR-9[44] was ₹ 22.78 crore. However, ITC available as per auto populated GSTR-2A was ₹ 17.85 crore. Thus, there was a mismatch of excess ITC of ₹ 4.93 crore during the year 2017-18.

  On being pointed out (May 2022), the Department stated (October 2022), that notice was issued to the taxpayer under Section 61 to explain the reasons for discrepancy. However, further reply of the Department is awaited (February 2023).

(ii) Mismatch in availment of ISD credit

In order to examine whether the ITC availed by the taxpayer was as per the amount transferred by the ISD, ITC availed in the returns of the taxpayer was compared with ITC transferred by the ISD in their GSTR-6.

On verification of GSTR-3B/GSTR-9 and data of GSTR-6[45] of ISD for the year 2017-18 in respect of 50 selected taxpayers three taxpayers[46] pertaining to three Circle (or two Unit Offices), it was noticed that the recipients had availed ITC of ₹ 3.50 crore against distributed ITC of ₹ 3.16 crore by their respective ISD. This resulted in mismatch in availment of ISD credit of ₹ 0.34 crore by the recipients.

On being pointed out (between June and July 2022), the Department stated (August 2022) that in two cases, notices had been issued to the taxpayers under Section 61 of the AGST Act, 2017 to explain the reasons for discrepancies and the reply of the Department is awaited (February 2023) in one case.

---

44 [Table 4A (5) -Table 4B (2)] of GSTR-3B + Table 8C of GSTR-9.

45 Source: Data from GSTN extracted by the core team of O/o CAG of India.

46 (i) xxxxxxxxxxP1ZW (ii) xxxxxxxxxxE1ZQ (iii) xxxxxxxxxxG1ZS.

(iii) Other cases relating to utilisation of ITC

In addition, Audit observed five cases of mismatch of ITC involving ₹ 15.65 lakh owing to mismatch in ITC under Reverse Charge mechanism and un-reconciled ITC between annual returns and financial statements (**Detailed in Appendix-XVI**).

(c) Audit findings relating to discharge of tax liability

(i) Mismatch in tax liability

Audit observed in case of 28 taxpayers[47] out of 50 selected cases, there was tax liability mismatch ranging from ₹ 0.20 lakh to ₹ 1.86 crore amounting to a total of ₹ 8.76 crore (**Detailed in Appendix-XVII**). The tax liability declared by the taxpayer as per GSTR-1 did not match with the tax liability declared in GSTR-9 (Audit consider GSTR-3B where GSTR-9 was not available).

On being pointed out (between May and September 2022), the Department stated (between June and October 2022) that notices had been issued to taxpayers in 22 cases under Section 61 to explain the reasons for discrepancies and SCNs had been issued to taxpayers in two cases under Section 73 of the AGST Act, 2017. One taxpayer had deposited ₹ 0.46 lakh including interest. The reply of the Department in other four cases is awaited (February 2023). Top five irregularities noticed in this category amounted to ₹ 6.14 crore. An illustrative case is given below:

- Scrutiny of monthly returns (GSTR-1)/Annual return (GSTR-9) of National Insurance Company Ltd (GSTIN-xxxxxxxxxxE1Z2), under Guwahati Unit-D (Circle-2) for the year 2017-18, disclosed that the tax liability as per GSTR-1/ GSTR-9 was ₹ 16.02 crore whereas the tax payment as per table 9 of GSTR-9 was ₹ 14.16 crore. This resulted in tax liability mismatch of ₹ 1.86 crore.

On this being pointed out (June 2022), the Department stated (July 2022) that the matter was pursued with taxpayer by issuing notice in Form ASMT-10 to explain the reasons for discrepancy.

(ii) Other observations on mismatch of tax liability

Audit noticed deviations/mismatch in tax liability in respect of nine taxpayers out of selected 50 taxpayers with reference to 'difference in tax paid between books of accounts and Annual returns' (three cases) 'mismatch of turnover as per GSTR-9C and turnover as per IT return' (one case), 'non-discharge of tax liability of rental income' (two cases), 'interest not paid against delayed payment of un-discharged tax liability' (three cases). The tax liability in these observations ranges from ₹ 0.04 lakh to ₹ 0.61 lakh amounting to ₹ 2.67 lakh (**Detailed in Appendix-XVIII**).

Recommendation No. 6

- ***The Department may initiate remedial action for all the compliance deviations before they get time-barred.***

[47] Pertaining to 22 circles.

2.4.9 Conclusion

The Subject Specific Compliance Audit (SSCA) on 'Department's Oversight on GST Payments and Return Filing' was undertaken with the objective of assessing the adequacy of the system in monitoring returns filing by the taxpayers, extent of compliance by the taxpayers and other departmental oversight functions.

This SSCA was predominantly based on data analysis, which highlighted risk areas, raised red flags and in some cases, pointed out rule-based deviations and logical inconsistencies in GST returns filed by the taxpayers for 2017-18. The SSCA entailed assessing the oversight functions of State tax jurisdictional formations (Circles) at two levels – at the data level through global data queries and at the functional level with a deeper detailed audit both of the circles and of the GST returns, which involved accessing taxpayer records. The audit sample, therefore, comprised 10 Circles of assessing oversight functions of the Circles, 282 high value inconsistencies across 14 risk parameters selected through global queries and 50 taxpayers selected on risk assessment for detailed audit of GST returns.

A review of **10 Circles** disclosed that essential oversight functions of the circles such as monitoring of return filing, scrutiny of selected returns and internal audit of taxpayers needs to be strengthened.

As regards **centralised audit**, deviations were observed in 124 cases involving short levy of tax of ₹ 82.88 crore constituting 51.67 *per cent* of the 240 inconsistencies/ mismatch in data for which the Department provided response. The Department has accepted the audit observations or initiated action in 105 cases with tax effect of ₹ 67.27 crore. Relatively higher rates of deviations were noticed under risk parameters such as excess ITC availed, short declaration of taxable value and short payment of interest, *etc*. In 42 cases, constituting 17.5 *per cent* of the audit sample, (underlying deviations/mismatch of ₹ 663.69 crore), the Department is yet to give replies.

As regards **detailed audit**, out of a sample of 50 taxpayers, essential basic records such as financial statements, trial balance, *etc*. were not produced in eight cases and in another 38 cases, the corresponding other records from the taxpayer were not forthcoming, which constituted a significant scope limitation for detailed audit. Detailed audit of GST returns also pointed towards non-compliance on issues such as non-payment of interest by taxpayers, non-short levy of late fee/penalty and short discharge of tax liability, with a revenue implication of ₹ 37.29 crore.

2.4.10 Summary of recommendations

The Department may:

- ***may issue detailed SOP/ guidelines for selection of returns for scrutiny based on risk parameters in line with CBIC's instruction dated 22 March 2022 and consider creating a separate dedicated wing to institutionalise an effective risk based system of scrutiny.***

- ***consider issuing suitable instructions with reference to the scrutiny of returns for 2019-20 and 2020-21 with timelines.***
- ***take prompt steps to undertake the audits under Section 65 of the Act so that timely action can be initiated against the defaulters before the cases get time-barred.***
- ***examine the 42 mismatches/ deviations pointed out by Audit for which responses have not been provided and issue notices wherever necessary under Section 61 of AGST Act, 2017.***
- ***take up the matter with the GST Council to insert adequate validation controls in the GST portal to curb data entry errors, enhance taxpayer compliance and facilitate better scrutiny.***
- ***initiate remedial action for all the compliance deviations before they get time-barred.***

2.5 Underassessment of turnover

The Assessing Officer failed to detect wrong declaration of opening stock as well as short declaration of stock received from branch offices which resulted in understatement of stock by the dealer involving tax of ₹ 22.81 lakh. Besides, interest of ₹ 27.89 lakh and penalty not exceeding ₹ 45.62 lakh was also payable.

As per Section 40 of the AVAT Act, 2003, if the prescribed authority has reason to believe that any part of the turnover had been under-assessed, he may proceed to assess the amount of tax due from the dealer in respect of such turnover within a period of eight years from the close of the financial year concerned. Further, under Section 90 of the AVAT Act, 2003, if a dealer conceals the particulars of turnover, he shall pay by way of penalty, in addition to tax and interest, a sum not exceeding twice the amount of tax involved or tax evaded or sought to be evaded. During 2013-14 and 2014-15, goods falling under the Second Schedule and Fifth Schedule of AVAT Act were taxable at the rate of five and 14.5 *per cent* respectively.

Out of 62 VAT assessments completed by Assistant Commissioner of Taxes (ACT), Unit A, Guwahati in 2019-20, Audit checked (February-March 2021) 52 cases and observed that in one case, the Assessing Officer failed to detect understatement of stock by a dealer, M/s Gupta, who dealt in processed food, tobacco, milk products, *etc*.

As per the audited accounts for the year 2013-14, closing stock of goods of the dealer under the Second schedule and Fifth schedule were ₹ 16.08 lakh and ₹ 1.05 crore respectively. However, the dealer, in his audited accounts for the year 2014-15, had carried forward opening stock of goods under the Second Schedule and Fifth Schedule as ₹ 1.05 crore and ₹ 16.08 lakh respectively. While completing the assessment (March 2020), the AO failed to notice the understatement and over statement of stocks under the Fifth schedule and Second schedule which involves evasion of tax of ₹ 8.42 lakh as detailed in **Table 2.5.1**.

Table 2.5.1: Details of evasion of tax due to overstatement of stocks

(Amount in ₹)

Particulars	Closing stock of 2013-14 (A)		Opening stock of 2014-15 (B)	
	5%	**14.5%**	**5%**	**14.5%**
Stock position (as per audited accounts)	16,08,149	1,04,69,695	1,04,69,695	16,08,149
Tax involved	80,407	15,18,105	5,23,484	2,33,181
Total tax involved	15,98,512		7,56,665	
Net evasion of tax (difference of **(A)** and **(B)**)	8,41,847			
Interest payable up to February 2022 (79 months)	9,97,588			
Penalty not exceeding twice the amount of tax evaded	16,83,694			

Further, the dealer, in his audited accounts and annual return for the year 2014-15, had declared receipt of consignment stock goods valued at ₹ 2.76 crore and ₹ 1.19 crore under the Second and Fifth schedule respectively. Audit scrutinised utilisation statement of Form 'F[48]' **(Appendix-XIX)** furnished by the dealer which revealed that during 2014-15, the dealer had actually received consignment stock goods (from outside the State) valued at ₹ 4.38 crore and ₹ 1.63 crore under the Second and Fifth schedule respectively. The AO, while completing the assessment (March 2020), accepted the figures as disclosed by the dealer in his audited accounts without verifying the value of Form 'F' utilised by the dealer available in the case records. This resulted in understatement of stock received which involves evasion of tax of ₹ 14.39 lakh as detailed in **Table 2.5.2**.

Table 2.5.2:-Details of evasion of tax due to understatement of stocks

(Amount in ₹)

Rate of goods	5%	14.5%
Consignment stock received turnover as per utilisation of Form 'F' (from outside the state of Assam)	4,37,50,625	1,62,52,000
Consignment stock received turnover brought to assessment	2,75,80,625	1,19,02,000
Concealment of consignment stock received turnover	1,61,70,000	43,50,000
Tax leviable	8,08,500	6,30,750
Interest leviable @1.5% up to March 2022 (83 months)	10,06,583	7,85,284
Penalty not exceeding twice the amount of tax evaded	16,17,000	12,61,500

Thus, due to wrong declaration of opening stocks and consignments received by the dealer and non-detection of suppression of stocks in closing stock during assessment by the AO, the Government had to forgo revenue of ₹ 22.81 lakh.

On this being pointed out (April 2021), the Department stated (February 2023) that the AO has verified the dealer's books and accounts and noticed that actual closing stock at the end of March 2014 stands at ₹ 1.05 crore and ₹ 16.08 lakh under the Second and Fifth Schedule of the Act respectively. The transposition of amount of closing stock under the Second and Fifth Schedule (in both annual return as well as audited accounts of 2013-14) has occurred due to sheer typographical mistake. The reply of the Department is not tenable as audit has observed that while replying, the AO has recast the closing stock of 2013-14 by altering the profit amount certified by the Chartered

[48] F form is used for stock transfer to branches/consignment agents or *vice-versa* from one state to another, without attracting charge of CST.

Accountant. Further, the Department's reply on short declaration of receipt of consignment stock goods is awaited (February 2023).

The case was reported to the Government in September 2022; their reply was awaited (February 2023).

2.6 Non-verification of utilisation of Form 'C'/delivery notes

As per Section 37 (1) of the AVAT Act, 2003, if any dealer has not furnished annual returns within the prescribed date or furnished incomplete/incorrect annual returns or failed to maintain accounts in accordance with the provision of the Act *ibid*, the prescribed authority shall, after issue of a notice to the dealer in the prescribed form and in prescribed manner, so as to give him a reasonable opportunity of being heard, assess him to the best of his judgement.

Section 40 of the AVAT Act, 2003, provides that if the prescribed authority has reason to believe that any part of the turnover had been under-assessed, he may proceed to assess the amount of tax due from the dealer in respect of such turnover within a period of eight years from the close of the financial year concerned.

Section 30 of the AVAT Act, 2003, provides that if any dealer fails to pay the amount of tax due within the time prescribed for its payment (within 21 days of the subsequent month), such dealer shall, in addition to the tax, be liable to pay simple interest at the rate of one and half *per cent* per month on the unpaid tax amount. Further, under Section 90 of the AVAT Act, 2003, if a dealer conceals the particulars of turnover, he shall pay by way of penalty, in addition to tax and interest, a sum not exceeding twice the amount of tax involved or tax evaded or sought to be evaded.

2.6.1 Concealment of purchase turnover of ₹ 1.40 crore

The Assessing Officer did not verify utilisation of Form 'C'/delivery notes against goods purchased from outside the State which resulted in concealment of purchase turnover valuing ₹ 1.40 crore involving tax of ₹ 20.26 lakh. Besides, interest of ₹ 19.61 lakh and penalty not exceeding ₹ 40.52 lakh was also payable.

Audit scrutinised (January-February 2021) the assessment records in the office of the ACT, Unit-C, Guwahati and observed that M/s Electro Sales Corporation (dealing in batteries, torch light and UPS) disclosed its inter-State taxable purchase (Fifth schedule items) as "NIL" during the years 2015-16 and 2016-17. The assessing authority, while assessing the accounts (January 2021), accepted the inter-State purchase value as declared by the dealer. However, scrutiny of utilisation details of delivery notes showed that the dealer had actually purchased Fifth schedule goods valued at ₹ 64.41 lakh and ₹ 75.33 lakh for the years 2015-16 and 2016-17 respectively **(Appendix-XX)**.

Thus, failure of the AO to verify the details of delivery notes enabled the dealer to conceal purchase turnover of ₹ 64.41 lakh and ₹ 75.33 lakh for the years 2015-16 and 2016-17 respectively which resulted in short levy of tax amounting to ₹ 20.26 lakh on which interest of ₹ 19.61 lakh is leviable as detailed in **Table 2.6.1**.

Table 2.6.1: Details of short levy of tax due to concealment of purchase turnover

(Amount in ₹)

Particulars	2015-16	2016-17
Total purchase value as per Delivery Note details	64,40,655	75,33,429
Less: Total inter-State purchase value of goods brought into assessment as per annual return	0	0
Concealment of purchase	64,40,655	75,33,429
Tax leviable @14.5 *per cent*	9,33,895	10,92,347
Interest @ 1.5 *per cent* up to March 2022	9,94,598 (71 months)	9,66,727 (59 months)
Penalty not exceeding twice the amount of tax evaded	18,67,790	21,84,694

On this being pointed out (April 2021), the Department stated (February 2023) that examination of records reflected discrepancies between goods sold and goods purchased involving different tax rates. Accordingly, the Department has initiated re-assessment proceeding under the provision of the AVAT Act, 2003. However, final outcome is awaited (February 2023).

The matter was reported to the Government in September 2022; their reply was awaited (February 2023).

2.6.2 Escapement of Inter-State purchase turnover of ₹ 2.68 crore

The Assessing Officer (AO) did not take cognisance of utilisation details of delivery notes against goods purchased from outside the State of Assam during best judgement assessment, which led to escape of inter-state purchase turnover to the tune of ₹ 2.68 crore from assessment, thereby causing short levy tax of ₹ 38.80 lakh. Besides, interest of ₹ 48.31 lakh and penalty not exceeding ₹ 77.61 lakh was also payable.

Audit scrutinised (January-February 2022) the assessment records in the office of the ACT, Unit-D, Guwahati and observed that a dealer, M/s Baruah Motors, dealing in car, accessories, spare parts, *etc*. had not furnished annual return since its registration (June 2014). The competent authority issued (August 2020) notice under Section 37 of the AVAT Act, 2003 to the dealer to appear (on 07 September 2020) with all the relevant records, registers, *etc*. pertaining to the period 2014-15. The dealer failed to comply with the time and opportunity given and the Assessing Officer (AO) proceeded (September 2020) with best judgement assessment under Section 37 (1) of the AVAT Act, 2003. Accordingly, a demand notice was issued (October 2020) for payment of ₹ 57.15 lakh (VAT-₹ 28.94 lakh and interest-₹ 28.21 lakh) to the dealer.

During scrutiny of the assessment order and case records available with the AO, Audit observed that based on the utilisation of delivery notes, the dealer had made inter-state purchase of goods valued at ₹ 13.83 crore (**Appendix-XXI**) during 2014-15 whereas the AO, while assessing the accounts of the dealer, determined inter-state purchase of goods valued at ₹ 11.15 crore only leading to escapement of inter-state purchase turnover of ₹ 2.68 crore from the assessment.

It was further noticed that apart from issue of demand notice for ₹ 57.15 lakh as a result of best judgement assessment in October 2020, the AO did not take any steps to recover the tax and interest due from the dealer.

Thus, failure of the AO to exercise due diligence and take cognisance of utilisation details of delivery notes already available with the AO while assessing the dealer resulted in short levy of tax of ₹ 38.80 lakh on which interest of ₹ 48.31 lakh and penalty not exceeding ₹ 77.61 lakh was also leviable as detailed in **Table 2.6.2**.

Table 2.6.2: Details of short levy of tax and interest

(Amount in ₹)

Particulars	2014-15
Total purchase value as per delivery notes	13,82,97,457
Less : Total inter-State purchase value of goods brought into assessment	11,15,35,910
Turnover escaped assessment	2,67,61,547
Tax leviable @14.5 *per cent*	38,80,424
Interest @ 1.5 *per cent* up to March 2022 for 83 months	48,31,129
Penalty not exceeding twice the amount of tax evaded	77,60,848

On this being pointed out (March 2022), the Department stated (February 2023) that due to failure to get any response from the dealer, the AO proceeded (September 2022) with re-assessment under Section 40 of the AVAT Act, 2003 and a fresh demand of tax and interest of ₹ 1.72 crore[49] was issued (September 2022) to the dealer. The Department further added that the matter has been forwarded (January 2023) to the Certificate Officer, Kamrup, Guwahati for recovery and Union Bank of India, in which the dealer had a CAGEN bank account, had been requested (January 2023) to freeze the bank account of the dealer.

The case was reported to the Government in January 2023; their reply was awaited (February 2023).

2.7 Non-levy of interest for deferment of advance tax

The Assessing Officer failed to levy interest of ₹ 22.43 lakh for deferment of advance tax while completing re-assessment of the assessee's accounts.

Section 35 and Section 35 A of the Assam Agricultural Income Tax (AAIT) Act, 1939 read with Rule 29 of the AAIT Rules, 1939 provides that an assessee shall pay to the credit of the State Government, as advance tax, an amount equal to the agricultural income tax payable/estimated in four equal instalments and on such dates as may be prescribed.

Section 35 H of the AAIT Act, 1939 provides that if the assessee who is liable to pay advance tax, has failed to pay such tax by the prescribed date, he shall be liable to pay simple interest at the rate of one and half *per cent* per month with effect from the immediate next day of the day prescribed for payment of advance tax for the respective quarter on the unpaid amount till the date of full payment of such amount which falls

[49] Tax:-₹ 69.42 lakh (including amount assessed as per best judgement assessment) and Interest:-₹ 1.03 crore.

short of advance tax due. The prescribed dates for payment of advance tax provided under Rule 29 of the AAIT Rules, 1939 is given below:

Instalment	Percentage of tax to be paid	Last date on which the tax be paid
1st instalment	25 *per cent* of total tax payable	30 June of the financial year
2nd instalment	25 *per cent* of total tax payable	30 September of the financial year
3rd instalment	25 *per cent* of total tax payable	15 December of the financial year
4th instalment	25 *per cent* of total tax payable	15 March of the financial year

Section 35 B of the AAIT Act, 1939 stipulates that where in any financial year, an assessee has paid advance tax and advance tax so paid is less than ninety *per centum* of the tax determined on regular assessment, simple interest at the rate of two *per centum* for each English calendar month from the first day of April of the succeeding financial year in which advance tax was payable up to the month prior to the month of regular assessment shall be payable by the assessee on the amount by which the advance tax paid falls short of the tax determined on regular assessment. However, if tax is deposited prior to regular assessment, interest is to be calculated prior to the month of deposit of tax.

Audit test-checked (March 2021) assessment cases in the office of the Assam Agricultural Income Tax Officer (AITO), Guwahati and noticed that the accounts of M/s Apeejay Tea Limited[50], (formerly known as M/s Apeejay Surendra Corporate Services Limited) relating to assessment year 2010-11 was re-assessed (March 2019) based on audit observations[51] and interest of ₹ two crore levied under Section 35 B of the AAIT Act, 1939. The AITO, while completing the initial assessment (in July 2014), levied tax of ₹ 3.16 crore (of which the assessee had deposited ₹ 17.36 lakh as advance tax) but did not levy interest for delayed payment of tax on the ground that the dealer was not liable to pay advance tax as the assessment was done under Section 8B[52]. Aggrieved with the re-assessment order (March 2019), the assessee filed an appeal before the Appellate Authority[53]; however, the Appellate Authority held (November 2020) that the appellant was liable to pay advance tax for the assessment year 2010-11. As such, the assessee was also liable to pay advance tax in equal instalments of ₹ 78.95 lakh per quarter on the prescribed date as per provisions of Sections 35 and 35 A of the Act *ibid*. However, scrutiny of the re-assessment order revealed that the AITO did not levy interest under Section 35 H of the Act *ibid* for failure to pay advance tax as per the prescribed dates.

Thus, the AITO failed to levy interest of ₹ 22.43 lakh for deferment of advance tax by the assessee for the assessment year 2010-11 as detailed in **Table 2.7.1**.

---

50 Engaged in cultivation, manufacture and sale of tea.

51 Featured in the Report of the CAG of India on Public Sector Undertakings and Revenue Sector for the year ended 31 March 2019 (Report No. 2 of 2021) vide paragraph No. 4.2.7.

52 If the agricultural income tax payable under this Act on the 60 *per cent* portion of agricultural income computed as per provisions of Income Tax Act, 1961 (Central Act 43 of 1961) is less than 10 *per cent* of the 60 *per cent* of the book profit computed in the manner as referred to in Section 115 JB of the Income Tax Act, 1961, 60 *per cent* of such book profit shall be deemed to be agricultural income of such assessee under this Act. Agricultural income so derived under this Section is taxable at the rate of 18 *per cent* (effective from April 2010).

53 Deputy Commissioner of Taxes (Appeal), Guwahati.

Table 2.7.1:-Details of interest not levied

Instal-ment No.	Amount of advance tax payable (in ₹)/Due date	Amount of tax paid (in ₹)/Date	Short payment of advance tax (in ₹)	Delays (in month and Days)	Interest leviable under Section 35 H (in ₹)
1	78,95,464/ 30-06-2009	Nil	78,95,464	8 months 18 days	10,16,223
		17,36,040/ 19-03-2010	61,59,424	13 days	38,745
2	78,95,464/ 30-09-2009	Nil	78,95,464	6 months	7,10,592
3	78,95,464/ 15-12-2009	Nil	78,95,464	3 months 16 days	4,16,422
4	78,95,464/ 15-03-2010	Nil	78,95,464	16 days	61,126
Total					**22,43,108**

On this being pointed out (July 2021), the Department stated that the assessee failed to pay demand of ₹ two crore raised during re-assessment in March 2019, wherein interest under Section 35 B of the AAIT Act, 1939 was levied. The Department further added that arrear certificate had been forwarded to Recovery Officer, Tinsukia by levying 50 *per cent* penalty over the amount due for realisation. However, the Department's reply is silent on non-levy of interest under Section 35 H of the AAIT Act, 1939.

The matter was reported to the Government in September 2022; their reply was awaited (February 2023).

CHAPTER-III
TRANSPORT DEPARTMENT

CHAPTER - III

TRANSPORT DEPARTMENT

3.1 Administration

The Commissioner of Transport, Assam is a wing under the Transport Department, entrusted with the responsibility of providing an efficient public transportation system, registration of vehicles in Assam, issuance of driving licenses and various permits, collection of road tax, *etc*. Besides being one of the major revenue earning Departments, the Commissionerate has been paying more emphasis for effective implementation of road safety measures through enforcement of the Motor Vehicles Act & Rules and promotion of awareness and educational programmes on road safety through the State Road Safety Council, the lead Agency on State Road Safety and District Road Safety Committee under the monitoring of the Supreme Court Committee on Road Safety.

The Secretary to Government of Assam (GoA), Transport Department is the Administrative Head of the Department.

The Commissioner of Transport (CoT), Assam is the Head of the Commissionerate and is assisted by one Additional Commissioner of Transport, two Joint Commissioners of Transport, three Deputy Commissioners of Transport and five Assistant Commissioners of Transport. There are 34 District level offices which are headed by District Transport Officers (DTOs) who are assisted by Motor Vehicle Inspectors, Enforcement Inspectors and other officials in discharging their day-to-day functions. They are empowered to implement provisions under the Acts and Rules *i.e.,* the Motor Vehicles Act, 1988, the Central Motor Vehicles Rules, 1989, the Assam Motor Vehicle Rules, 2003, *etc*.

The Transport Department is also responsible for collection of taxes, fees and fines on motor vehicles registered in Assam. For commercial vehicles, motor vehicle tax is realised every year and the vehicle owner has the option to pay it quarterly or annually; while One Time Tax for 15 years or in two instalments (five years and 10 years) is realised from all private vehicles registered in the State. Besides, composite fee *in lieu of* motor vehicle tax is also collected from the owners of commercial vehicles bearing national permit/tourist permit of other States plying in the State. Further, there is provision for levy and collection of fines for various offences which are imposed under the respective Acts and Rules.

3.2 Results of Audit

During test-check of records of 10 offices and 14 offices (out of total 61 offices) of the Transport Department in 2020-21 and 2021-22 respectively, Audit noticed short/ non-realisation of motor vehicles taxes/fine as detailed in **Table 3.1**.

Table 3.1: Results of Audit

Sl. No.	Category	2020-21		2021-22	
		Number of IRs	Amount (₹ in crore)	Number of IRs	Amount (₹ in crore)
1	Non-realisation of road tax and fine	05	11.47	09	18.38

6	Non-realisation of One Time Tax from personalised vehicles	0	0	03	3.87
7	Others	12	0.10	47	0.99
Total		**36**	**26.88**	**91**	**42.10**

Compliance Audit Observations

3.3 Non-realisation of Motor Vehicle (MV) tax

Five DTOs did not take timely action to realise MV tax from owners of 26,214 Transport Vehicles which resulted in outstanding MV tax of ₹ 8.61 crore, besides fine of ₹ 2.85 crore.

Section 5 of the Assam Motor Vehicle Taxation (AMVT) Act, 1936 provides that MV tax is leviable on vehicles used for commercial purposes in advance each year; however, the vehicle owner has the option to pay the tax quarterly or annually. The rates of MV tax payable by various categories of commercial vehicles were last revised in September 2015. Further, every owner who fails to pay the appropriate road tax in time shall be liable to pay a fine[54] of ₹ 5 per day of such delayed payment.

Maintenance of Combined Register[55] (as required under Section 44 of the AMVT Act, 1936) got discontinued after introduction of *VAHAN 4*[56] software in Assam and all information regarding vehicles are available in the online system. '*VAHAN*' software has the facility to generate various MIS reports *viz*., Tax Deposited Report, Defaulter Report, *etc*. to assist the Transport Authorities in issuing demand notices to defaulters.

Rule 49 (2) of the AMV Rules, 2003 provides that if a vehicle owner decides to withdraw his vehicle off the road for repairs, *etc*. for a period of more than 30 days continuously, he is required to submit an application in Form 'H' in triplicate along with the documents of the vehicle/number plate, *etc*. before the Registering Authority for temporary exemption from payment of taxes.

During December 2020 to March 2021, Audit generated the defaulter report of transport vehicles from '*VAHAN*' software in respect of five DTOs[57] (out of 34 DTOs in Assam) and noticed that of the 2,79,670 registered commercial vehicles in those five districts, the owners of 26,214 vehicles (9.37 *per cent*) did not pay MV tax of ₹ 8.61 crore, which was due between April 2018 to March 2020 (**Appendix-XXII**). Audit further noticed

[54] Inserted Section 5A in AMVT Act, 1936 vide GoA Notification No.LGL.42/99/51 dated 09 May 2002

[55] Prior to introduction of '*VAHAN*' software, manual records of vehicle details were maintained in a register which was called Combined Register.

[56] Which is an online system.

[57] DTOs, Kamrup (Metro) R & L, Kamrup (Rural), Nagaon, Morigaon and Nalbari.

that there was nothing on record to suggest that the owners of such vehicles had submitted form 'H' for exemption from tax during the period. Despite having an in-built facility in the *VAHAN* software to generate tax defaulters report, the DTOs showed laxity to review the defaulters report and initiate action to recover tax and fine from the owners of 26,214 commercial vehicles. This resulted in non-realisation of MV tax amounting to ₹ 8.61 crore and fine of ₹ 2.85 crore up to March 2020.

On this being pointed out, three DTOs[58] had furnished replies as below:

- DTO, Kamrup (Rural), Amingaon stated (February 2021) that based on the audit observation, they had issued demand notices to the vehicle owners to pay road tax and fine. In the meantime, the DTO had realised ₹ 4.93 crore of MV tax and fine from the defaulters. However, in June 2022, Audit further analysed '*VAHAN*' database to verify the status of realisation of MV tax and fine from the vehicles pointed out in the audit observation and it was noticed that out of 5,934 vehicles under observation, only ₹ 61 lakh was realised from 810 vehicles leaving ₹ 1.53 crore yet to be realised from 5,124 vehicles.
- DTO, Kamrup (Metro) R & L stated (July 2021) that based on the audit observation, besides issue of demand notices, phone calls and SMS, the Department had carried out special enforcement drive and realised ₹ 7.37 crore as MV tax and fine. However, in June 2022, Audit further analysed the '*VAHAN*' database to verify the status of realisation of MV tax and fine from the 11,891 vehicles under observation and it was noticed that a sum of only ₹ 1.75 crore was realised from 2,242 vehicles leaving ₹ 4.23 crore yet to be realised from 9,649 vehicles.
- DTO, Morigaon stated (December 2021) that based on the audit observation, road tax and fine of ₹ 2.13 lakh against 27 vehicles had been realised. However, Audit further analysed the '*VAHAN*' database in June 2022 and noticed that MV tax and fine of ₹ 0.13 crore was realised from 182 vehicle owners, out of 1,792 vehicles under observation, leaving an amount of ₹ 0.92 crore from 1,610 vehicles yet to be realised.
- The DTOs, Nagaon and Nalbari did not furnish replies to the audit observation. However, Audit further analysed the '*VAHAN*' database pertaining to Nagaon in June 2022 and noticed that MV tax and fine of ₹ 0.28 crore was realised from 487 vehicle owners, out of 4,823 vehicles under observation, leaving a sum of ₹ 1.57 crore from 4,336 vehicles yet to be realised. Similarly, Audit analysed the '*VAHAN*' database pertaining to Nalbari in June 2022 and noticed that MV tax and fine of ₹ 0.07 crore was realised from 216 vehicle owners, out of 1,774 vehicles under observation, leaving an amount of ₹ 0.39 crore from 1,558 vehicles yet to be realised.

[58] DTOs, Kamrup (Metro) R & L, Kamrup (Rural) and Morigaon.

After this was pointed out, ₹ 12.78 crore of MV tax and fine was realised from the defaulting vehicle owners in five DTOs. However, MV tax and fine of ₹ 8.64 crore was yet to be realised from 22,277 vehicles under observation at five DTOs.

The matter was reported to the Government/Department (September 2022); their reply was awaited (February 2023).

Recommendation: *The Department should periodically generate defaulters report from 'VAHAN' database and ensure that no vehicle plies on road without payment of MV tax. The defaulters list may invariably be forwarded to the enforcement branch for interception of defaulting vehicles plying on road.*

3.4 Fitness certificate of transport vehicles not renewed

Despite availability of information in '*VAHAN*' database, the DTOs failed to levy fitness fee of ₹ 78.18 lakh and penalty of ₹ 12.51 crore on 12,040 transport (commercial) vehicles potentially plying without valid fitness certificates.

Under Section 56 of the Motor Vehicles (MV) Act, 1988 read with Rule 62 of the Central Motor Vehicle (CMV) Rules, 1989 made thereunder, a transport vehicle shall not be deemed to be validly registered unless it carries a certificate of fitness. Further, under Section 84 (a) of the MV Act, 1988, the vehicle to which the permit relates should carry a valid certificate of fitness issued under Section 56 of the Act. A fitness certificate granted in respect of a newly registered transport vehicle is valid for two years and is required to be renewed every year on payment of prescribed testing fee of ₹ 400 for three wheelers and light motor vehicles (LMV) and ₹ 600 for medium (MMV) and heavy (HMV) motor vehicles with effect from 29 December 2016. In addition to this, renewal fee of ₹ 200 is also leviable for all categories of vehicles. In case of default, an additional[59] fee of ₹ 50 for each day of delay after expiry of certificate of fitness is also leviable.

Rule 87(2) of the AMV Rules, 2003, provides that the Motor Vehicle Inspector (MVI) may inspect any transport vehicle at any time at any place to check whether the vehicle is fit for plying on public roads.

Previous Audit Reports[60] of 2015-16 to 2019-20 had highlighted persistent loss of Government revenue of ₹ 5.50 crore due to non-levy of fitness fee.

Audit analysed (December 2020-March 2021) the '*VAHAN*' database and noticed that fitness certificates of a total of 25,445 commercial vehicles had expired in the State (all the 27 DTOs) as on 31 March 2020.

To evaluate the corrective measures adopted by the Department in this regard, Audit examined Fitness Expiry Reports generated from '*VAHAN*' database in five DTOs[61],

[59] Vide notification no. TMV.219/2017/22 dated 19 December 2018 followed by Government of India's notification no. G.S.R.1183 (E) dated 29 December 2016.

[60] Paragraphs 4.2.9, 4.6, 4.4, 4.4.4 and 4.3 of the Audit Reports (Revenue Sector) for the year ended 31 March 2016, 31 March 2017, 31 March 2018, 31 March 2019 and 31 March 2020 respectively.

[61] Kamrup (Metro) R & L, Kamrup (Rural), Nalbari, Nagaon and Morigaon.

which showed that out of the total 2,79,670 transport vehicles[62] registered in these five districts, fitness certificate of 12,040 vehicles[63] had expired between April 2018 and March 2020 but had not been renewed. On cross-check of Fitness Expiry Report with Tax Payment Report of 4,151 vehicles, audit noticed that 1,540 vehicle owners had deposited MV tax during the same period without renewal of fitness certificates.

Though information regarding expiry of fitness of these vehicles was available in '*VAHAN'* database, the concerned DTOs failed to take cognisance of these cases. Specific feature to prevent vehicle owners from paying tax in cases of vehicles whose fitness had expired was not available in the software. The DTOs neither initiated any action to cancel the registration/permit of those vehicles whose fitness certificate had expired nor did they issue any notices to the defaulting vehicle owners. Plying of such vehicles without valid fitness certificate poses a potential hazard to the public and the environment. The officials of Enforcement branch also failed to identify and stop these vehicles from plying on road during their checking.

Thus, due to non-renewal of the fitness certificates, inspection fee and renewal fee of ₹ 78.18 lakh[64] had not been realised from 12,040 commercial vehicles. Besides, additional fee of ₹ 12.51 crore at the rate of ₹ 50 per day for the period of delay was also leviable **(Appendix-XXIII)**.

On this being pointed out by Audit:

- The DTO, Kamrup (Rural) stated (February 2021) that all the enforcement teams of this office have been directed to conduct special day/night drive to detect the defaulting vehicles which are plying on the road without carrying valid fitness certificates.
- The DTO (R & L), Kamrup (Metro) stated (July 2021) that necessary steps have been taken to share fitness expiry report as pointed out by audit with the DTO (Enforcement), Kamrup Metro to check the movement of vehicles without valid fitness certificates.
- The DTO, Morigaon stated (December 2021) that based on the audit observation, fitness fees and fines of ₹ 0.20 lakh had been realised against three vehicles.

The matter was reported to the Government/Department (September 2022); their reply was awaited (February 2023).

Recommendation: *The Department may generate periodical fitness expiry report from 'VAHAN' data base and action may be taken to detect vehicles plying without fitness certificate. Further, the Department may take up with the Ministry of Road Transport & Highways of India (MoRTH) to develop a system to generate alerts in the 'VAHAN' software showing other dues, if any, while realising payment of road tax or permit fee.*

---

62 Of the total registered vehicles of 16.17 lakh including private car/two wheeler, Government vehicles, *etc*.

63 Vehicles which have not completed 15 years have only been taken under observation.

64 Testing fee of ₹ 54.10 lakh and Certificate renewal fee of ₹ 24.08 lakh.

3.5 Non-realisation of One Time Tax from personalised (non-Transport) vehicles

Eight DTOs did not realise One Time Tax (OTT) from owners of 2,231 personalised (non-Transport) four-wheeler vehicles, which led to non-realisation of OTT of ₹6.36 crore besides fine of ₹ 0.77 crore.

Under Section 4-A of Assam Motor Vehicle Taxation (AMVT) Act, 1936 as amended from time to time, the owner of any motor vehicle, tricycle, trailer/side car, motor car or jeep meant for exclusive personal use and not registered as a public service vehicle and which is less than 15 years old when applying for first registration or assignment of a fresh registration mark or change of address or removal of the aforesaid vehicle from any State other than Assam shall pay One Time Tax (OTT) as specified in Schedule-I of AMVT Act, 1936.

Taxation rates of OTT under Schedule I of AMVT Act, 1936 were amended[65] in May 2011 and September 2015, which provided different rates of OTT based on cost price of the personalised four wheeler vehicle. Owners may opt to either:

i. pay OTT in full for 15 years at the time of registration of the vehicle, or
ii. pay OTT in two slabs *i.e.*, 50 *per cent*[66] of the total OTT for a period of first five years and 50 *per cent* of total OTT payable for the next 10 years.

Further, as per AMVT Act, 1936 (amended in May 2011) owners of personalised vehicles, who prefer payment of OTT in slabs, shall have to pay the OTT for the remaining period[67] (10 years) immediately after expiry of the taxes paid, failing which a fine of ₹ five per diem shall be levied from the due date for payment of tax.

Audit analysed (between November 2021 and September 2022) the tax defaulters in payment of OTT from '*VAHAN*' software of eight DTOs[68] (out of 32 DTOs in Assam) and noticed that owners of 2,231 personalised four-wheeler vehicles (out of 5,52,075 vehicles) did not pay the amount of OTT of ₹ 6.36 crore involved in second slab of payment for registration of vehicles, which became due between March 2016 and March 2022 as detailed in **Appendix-XXIV**.

Despite having an in-built facility in the software to generate the Tax Defaulters report, the DTOs did not review the defaulters report and initiate action to recover OTT and applicable fine as per AMVT Act, 1936 from the owners of 2,231 non-transport (personalised) vehicles. This resulted in non-realisation of OTT of ₹ 6.36 crore and fine of ₹ 0.77 crore up to March 2022.

---

65 Vide notification No. LGL.3/2010/27 dated 24th May, 2011 and notification No. LGL.3/2010/80 dated 30th September, 2015.

66 Where cost of vehicle is more than ₹ four lakh up to 16 June 2015 and more than ₹ six lakh on or after 17 June 2015.

67 Fifty *per cent* of prevailing rate of OTT base on cost of the vehicle.

68 DTOs at Kokrajhar, Sonitpur, Kamrup (Metro) R & L, Dibrugarh, Lakhimpur, Dhemaji, Tinsukia and Udalguri.

On this being pointed out, five[69] out of eight DTOs, while accepting the audit observation, stated as under:

- DTO, Sonitpur (Tezpur) stated (November 2022) that demand notices have been issued from time to time to the defaulting owner of vehicles and vigorous enforcement drive is going on.
- DTO, Tinsukia stated (December 2022) that besides issue of demand notices, 73 vehicle owners had deposited MV tax and fines of ₹ 20.02 lakh (tax and fine amount not separated).
- DTO, Dibrugarh stated (September 2022) that instruction was issued to the dealing assistant to issue demand notices and enforcement teams have been directed to take necessary steps to book cases against such tax defaulting vehicle owners.
- DTO, Lakhimpur stated (September 2022) that demand notices are issued on a regular basis and arrear tax has been realised in some cases (number of vehicles and amount realised not mentioned).
- DTO, R & L, Kamrup (Metro) stated (July 2021) that the Department had carried out special enforcement drive besides issue of demand notices, phone calls and SMS to the defaulters. Further, DTO (Enforcement), Kamrup Metro has shared the data in respect of the defaulters' vehicle provided by audit and requested all the enforcement teams under his control to conduct day/night drive against all categories of vehicles including 875 numbers of non-transport personalised vehicles against which final instalment of OTT MV tax/fine is yet to be realised.

Reply from the remaining three DTOs[70] is still awaited.

The matter was reported to the Government/Department in January 2023, their reply is awaited (February 2023).

Recommendation: *The Department may ensure realisation of OTT and fine from vehicle owners and immediately take up the matter with the enforcement wing for interception of vehicles plying on road without payment of OTT.*

3.6 Plying of vehicles without valid permit

District Transport Officer (DTO) failed to realise permit fee of ₹ 51.92 lakh from 1,985 transport vehicles which were plying without valid permits.

Section 66 of the Motor Vehicle (MV) Act, 1988 read with Rule 45 (2) of the Assam Motor Vehicle (AMV) Rules, 2003 stipulates that the owner of a transport vehicle including local and all-Assam Taxi can use his vehicle within a region only after obtaining a permit from the prescribed authority[71].

[69] DTOs- Sonitpur, Tinsukia, Dibrugarh, Lakhimpur and Kamrup (Metro) R & L.
[70] DTOs- Dhemaji, Udalguri and Kokrajhar.
[71] State Transport Authority (STA)/Regional Transport Authority (RTA).

As per Rule 46 (C) of the AMV Rules, 2003, a periodic permit for carrying goods and passengers shall be issued for a duration of minimum one year and up to a maximum period of five years. However, a temporary permit shall be issued for a maximum duration of four months, but it cannot be renewed for more than three times. Rule 46 (B) of the AMV Rules, 2003 provides fees[72] for grant/renewal of different categories of permits as shown in **Table 3.2**.

Table 3.2: Rate of permit fee effective from 30 July 2015

Type of vehicle	Periodic permit fee up to three years (in ₹)	Periodic permit fee for more than three years up to five years (in ₹)
Three wheelers (Passengers)	300	600
Three wheelers (Goods)	500	700
Local taxi	1,000	1,000
All Assam Taxi	1,500	1,500
Others vehicles	2,000	3,000

In January 2021, audit analysed the '*VAHAN*' database of the DTO, Kamrup (Metro) regarding issue of periodic permits and noticed that the validity of periodic permits of 1,985 transport vehicles[73] (1.14 *per cent*), out of 1,73,487 registered commercial vehicles) lapsed between April 2017 and March 2020. Further, audit cross verified 100 out of these 1,985 transport vehicles with their registration details and noticed that registration of these 100 commercial vehicles were still valid (*i.e.*, these 100 vehicles were less than 15 years old).

Audit further test-checked (July 2022) the status of payment of MV tax and fitness validity of these vehicles and found that the owners of 434 vehicles had deposited MV tax, which was indicative of the fact that these vehicles were plying on road without valid permit. Scrutiny of records revealed that the DTO/RTA had not initiated prompt action such as sharing of defaulters report with the enforcement branch to trace out the defaulters on road. Further, there was no feature available in the '*VAHAN*' software to ensure validity of permit, fitness, *etc*. during payment of MV tax by the owners nor did the DTO concerned take into consideration various MIS reports (*viz*., Defaulter Report, *etc*.) at the time of payment of MV tax by the defaulting owners. Thus, non-detection of commercial vehicles plying without valid permit resulted in non-realisation of periodic permit fee of ₹ 51.92 lakh as shown in **Appendix-XXV**.

On this being pointed out by audit, the DTO/RTA, Kamrup (Metro) stated (April 2021) that demand notices are being issued to the defaulters on the expiry of permit but most of the show-cause notices came back to the office for non-availability of the addresses mentioned in the Registration Certificate. However, the copies of the demand notices are also forwarded to the DTO, Enforcement, Kamrup (Metro) for taking necessary action at his end *viz*., seizure of vehicles along with vehicle records. However, Audit noticed that vehicle owners had paid MV tax without renewal of periodical permit.

[72] Amended vide Govt. Notification No. TMV.193/2015/47 dated 30 July 2015.

[73] Goods Carrier 1314, Dumper 233, Excavator 45, Articulated vehicle, 15, Vehicle fitted with Rig 7, Bus 27, Cab 156 and Three Wheeler Passenger 188.

The matter was reported to the Government/Department in September 2022; reply from Government was still awaited (February 2023).

Recommendation: *The Department may consider developing a standard operating procedure incorporating mandatory checks regarding validity of fitness certificate, renewal of road permit, insurance, etc. while realising MV tax.*

3.7 Non realisation of Composite Fee/Authorisation Fee

Composite and authorisation fees amounting to ₹ 21.41 lakh was not realised from 669 tourist motor cabs plying on road without renewal of authorisation of tourist permit.

Section 88 (9) of the Motor Vehicle (MV) Act, 1988 provides that any State Transport Authority may, for the purpose of promoting tourism, grant permits in respect of tourist vehicles valid for the whole of India, or such contiguous States not being less than three in number including the State in which the permit is issued.

Rule 82 of the Central Motor Vehicle (CMV) Rules, 1989 provides that a tourist permit shall be deemed to be invalid from the date on which the motor vehicle covered by the permit completes nine years and eight years in case of motor cab[74] and motor vehicle respectively from the date of initial registration.

Further, Rule 83 of the CMV Rules, 1989, provides that the grant of an authorisation for a tourist permit shall be made on realisation of authorisation fee of ₹ 500 per annum along with composite fee fixed by the respective State Government, in the form of bank draft. The period of validity of an authorisation shall not exceed one year at a time.

Composite fee is payable at the rate of ₹ 375 and ₹ 300 per quarter for plying tourist motor cab in Arunachal Pradesh[75] and Meghalaya[76] respectively, other than home State. In Assam, the Commissioner of Transport, on realisation of authorisation and composite fees, grants tourist permits.

Audit scrutiny (September-October 2020) of Permit issue Register in respect of tourist cab[77] authorised to ply in Arunachal and Meghalaya other than Assam at the office of the Commissioner of Transport, Assam revealed that owners of 669 motor cabs neither renewed their authorisation of tourist permits (validity of which had expired between December 2018 and March 2020) nor informed the authority about surrender of tourist permits in terms of Rule 49 (1) of Assam Motor Vehicle Rules, 2003. Audit test-checked the details of 200 out of these 669 commercial vehicles and noticed that all these vehicles had paid MV tax after March 2020 without obtaining fresh permit.

74 Seating capacity not more than six.
75 Notification No.T/STA/4/79/Vol.II dated 13 July 2000.
76 Letter No. STA.407/96/7 dated 6 May 1997.
77 Seating capacity up to six persons.

Thus, non-renewal of authorisation of tourist permit by the owners of 669 vehicles resulted in non-realisation of authorisation fee as well as composite fee of ₹ 21.41 lakh[78]. Audit noticed that the Commissioner of Transport, Assam could not detect plying of these vehicles without authorisation of permits and payment of fees by the tourist permit holders due to non-review of permit register.

During the exit conference (October 2020), the Deputy Commissioner of Transport, Assam, while accepting the audit observation, stated that demand notices would be issued to the respective vehicle owners with a copy to the concerned DTO to take necessary action against the vehicle owners.

The matter was reported to the Government/Department in September 2022; reply from Government was still awaited (February 2023).

Recommendation: *The Department should ensure sending of SMS alert to the vehicle owners on expiry of tourist permits. In the event of failure to renew authorisation of permit, the matter may be taken up with the Enforcement Wing for taking necessary action.*

78

State	Type of fee	Rate of fee per annum (in ₹)	Number of motor cabs	Total amount (in ₹)
Assam	Authorisation fee	500	669	3,34,500
Arunachal Pradesh	Composite fee	1500	669	10,03,500
Meghalaya	Composite fee	1200	669	8,02,800
Total				**21,40,800**

CHAPTER-IV
ENVIRONMENT AND FORESTS DEPARTMENT

CHAPTER - IV
ENVIRONMENT AND FORESTS DEPARTMENT

4.1 Administration

The State of Assam comprising 33 civil districts, including three hill districts, is endowed with rich forest resources. The State has also been identified as one of the 18 biodiversity hotspots in the world. Out of the total geographical area of 78,438 sq. km., the forest cover of Assam is 28,312 sq. km[79]. Revenue in the Forest Divisions are mainly derived from sale proceeds of major and minor forest produce through auction, negotiation and permit of allotment. Collection of royalty from minor minerals, licence fee from sawmills and timber depots also form part of forest revenue apart from fees, fines, *etc*. imposed under various Acts/Rules.

The Principal Chief Conservator of Forests and Head of Forest Force (PCCF and HoFF), Assam is in overall charge of the Department. The PCCF & HoFF is assisted by two Principal Chief Conservators of Forests (PCCF), 13 Additional Principal Chief Conservators of Forests (APCCF), 11 Chief Conservators of Forests (CCF) and 10 Conservators of Forests (CF). In addition, there are 68 forest divisions including Research, Education and Working Plan wings[80] each headed by a Deputy Conservator of Forests (DCF)/Divisional Forest Officers (DFOs). The divisions are further divided into ranges and beats for ensuring effective control and supervision of the forests of the State.

The mandate of the Forest Department is to manage the forests, forest produce and wildlife of the State of Assam. The principal Act, regulations and rules which govern the functioning of the Department of Environment and Forests are the Assam Forest Regulation, 1891; Assam Sale of Forest Produce, Coupes and *Mahals* Rules, 1977; Forest (Conservation) Act, 1980; Assam Minor Minerals Concession Rules, 2013, and Rules and notifications/orders issued thereunder, from time to time.

4.2 Results of Audit

Test-check of records of 18 offices and 13 offices (out of 100 offices and 110 offices) in 2020-21 and 2021-22 respectively relating to the Environment and Forest Department revealed deficiencies as shown in **Table-4.1**.

Table-4.1: Results of Audit

Sl. No.	Category	2020-21		2021-22	
		No. of IRs	Amount (₹ in crore)	No. of IRs	Amount (₹ in crore)
1	Short/Non-realisation of royalty	3	0.90	19	14.10

[79] 3,017 sq. km is very dense forest, 9,991 sq. km is moderately dense forest and 15,304 sq. km is open forest as per Chapter-2 of India State of Forest Report 2021.

[80] Under the Forest Department, there were 33 Territorial Forest Divisions, 8 Wildlife Forest Divisions and 14 Social Forestry Divisions. Assam also has 11 Research, Education, Working Plan wings along with two State Forestry Training Institutes, namely the Assam Forest School and Assam Forest Guards School for training of the Foresters and Forest Guards respectively.

Sl. No.	Category	2020-21		2021-22	
		No. of IRs	Amount (₹ in crore)	No. of IRs	Amount (₹ in crore)

4.3 Performance Audit on "Implementation of Assam Minor Mineral Concession Rules, 2013"

4.3.1 Introduction

Minerals, being a natural resource, are essential raw material for infrastructure, capital goods and basic industries. As a major resource for development, the extraction and management of minerals have to be integrated into the overall strategy of economic development. Being finite and non-renewable, their exploitation is to be guided by long-term national goals, development of the economy and upliftment of the local population. As such, a harmony and balance is to be maintained between their conservation and exploitation.

Minerals have been classified into 'Major mineral' and 'Minor mineral' based on their end uses. Major minerals are those specified in the First Schedule appended in the Mines and Minerals (Development and Regulation) Act, 1957 (MMDR Act, 1957) such as coal, uranium, iron ore, *etc*. and all other minerals, which are not declared as minor minerals. Minor minerals[81] means building stones, gravel, ordinary clay, ordinary sand other than sand used for prescribed purposes, and any other mineral which the Central Government may, by notification in the Official Gazette, declare to be a minor mineral. Management of mineral resources is the responsibility of both the Central Government and State Governments in terms of entry 54 of the Union list (List I) and entry 23 of the State list (List II) of Seventh Schedule of the Constitution of India. The Central Government has enacted the MMDR Act, 1957, which lays down the legal framework for regulation of mines and development of all minerals, other than Petroleum and Natural Gas. Sections 15 and 23 of the MMDR Act, 1957 empower the State Government to make rules by issuing notification in the Official Gazette, for regulating the grant of mineral concessions in respect of minor minerals and to prevent illegal mining, transportation and storage of minor minerals.

Assam is blessed with minerals and mineral oils such as crude oil, natural gas, coal, limestone, granite, *etc*. along with various minor minerals like stone, sand, gravel, clay, *etc*.

Government of Assam (GoA) had introduced the Assam Minor Mineral Concession Rules, 1994 to regulate minor minerals in Assam as per provision of Section 15 of the

[81] Section 3 (e) of MMDR 1957.

MMDR Act, 1957 repealing all Rules or executive instructions regarding quarrying or collection of minor minerals within the State.

In compliance to the orders of Hon'ble Gauhati High Court[82] (2009) and Hon'ble Supreme Court[83] (2012), GoA had introduced the Assam Minor Mineral Concession (AMMC) Rules, 2013 in March 2013.

With the introduction of the AMMC Rules, 2013, clear segregation of powers between Mines & Mineral Department and Forests Department was provided with respect to administration of minor minerals which was hitherto not available as per AMMC Rules, 1994. As per AMMC Rules 2013, the PCCF & HoFF, Assam was made the competent authority to administrate minor minerals listed in Schedule Y[84] only. Moreover, AMMC Rules, 1994 did not provide the scope of settlement of Mineral Concession Areas (MCAs) by inviting open tenders whereas AMMC Rules, 2013 provided for settlement of MCA through inviting tenders.

As such, Department of Mines and Minerals[85], GoA regulates the AMMC Rules, 2013 and operation of minor minerals, used for other than industrial purposes, are controlled by the PCCF & HoFF of Assam and his officers.

4.3.2 Trends of Receipts from minor minerals

The State's revenue from Forestry and Wildlife *vis-à-vis* minor minerals during the period 2013-21 are shown in **Table 4.2**.

Table 4.2: State's revenue from Forestry and Wildlife *vis-à-vis* minor minerals

(₹ in crore)

Year	Receipts from		Non-Tax Revenue	Percentage of receipts from minor minerals over	
	Forestry and Wildlife	Minor Minerals		Forestry and Wildlife receipts	Non-Tax Revenue
2013-14	100.92	44.91	2705.03	44.50	1.66
2014-15	115.99	54.56	2412.89	47.04	2.26
2015-16	117.3	64.12	2741.56	54.66	2.34
2016-17	215.85	119.21	4353.13	55.23	2.74
2017-18	250.74	129.83	4071.97	51.78	3.19
2018-19	364.27	169.83	8221.29	46.62	2.07
2019-20	416.06	228.93	5539.34	55.02	4.13
2020-21	352.89	188.45	2899.63	53.40	6.50

(*Source: Finance Accounts*)

Table 4.2 shows that receipts under the 'Minor head -103' (minor minerals) forms a major component of the 'Major Head-0406' (Forestry and Wildlife), which ranged between 44.50 and 55.23 *per cent* during 2013-21. There was a sharp increase in revenue in 2019-2020 as compared to 2018-19 which was mainly attributable to increase of royalty rates of minor minerals in respect of private *patta* land. However, sharp decline in revenue was noted in 2020-21 due to the Covid-19 pandemic.

[82] Haren Saikia vrs. State of Assam & others (W.A. No.327/2009).
[83] Deepak Kumar, *etc*. vrs. State of Haryana & others (SLP (C) No. 19628-19629 of 2009).
[84] Gravel, Ordinary Sand, Boulder, *Murram*, Brick earth, Road metal, Salt-petre, *etc.*
[85] Erstwhile it was called as the Department of Power (E), Mines and Mineral, GoA.

4.3.3 Organisational set up for administration of minor minerals

The PCCF & HoFF, Assam is the competent authority in respect of minor minerals listed in Schedule- 'Y' of AMMC Rules, 2013 for exercising such powers and functions as specified in the AMMC Rules, 2013. Further, GoA has also authorised all concerned DFOs for field level activities with approval from their respective higher officials under provisions of the AMMC Rules, 2013 in respect of minerals under schedule 'Y'.

The Department of Mines & Minerals, Assam administers extraction of minor minerals as listed in Schedule "X". Further, the Department of Mines & Minerals is the authority for registration of a person as "Recognised Qualified Person" (RQP) for preparation of mining plan on behalf of MCA holder(s). The Department of Mines & Minerals, Assam is the competent authority to approve the Mining Plan (MP).

The functioning of Department of Environment & Forests (DoE&F), GoA is classified into two categories *viz*., Revenue Collection and Environmental Conservation and Protection. Revenue is raised by the DoE&F mainly from sale of Minor Minerals and Forest produce like Timbers & Non-Timbers which accounted for 55 *per cent* of Forests Revenue. Audit noticed persistent deficiencies/shortcomings in the implementation of AMMC Rules, 2013 during the compliance audits conducted during the last few years. As such, it was felt necessary to conduct a Performance Audit on "Implementation of AMMC Rules, 2013".

4.3.4 Audit Objectives

The objectives of the Performance Audit (PA) were to assess:

- the efficacy of the management and regulatory processes governing the mining of minor minerals in Assam with focus on the implementation of the AMMC Rules, 2013.
- the adequacy of the measures taken to safeguard the environment in relation to mining of minor minerals.
- the adequacy of monitoring mechanisms to safeguard revenue and the environment.

4.3.5 Audit Criteria

To evaluate the above-mentioned audit objectives, the criteria and indicators were sourced from the following Acts, Rules and documents: -

- Mines & Minerals (Development and Regulation) Act, 1957, Assam Minor Mineral Concessions Rules, 2013, Assam District Mineral Foundation (Trust) Rules, 2020, Mineral Concession Rule, 1960;
- Sustainable Sand Mining Management Guidelines, 2016 issued by Ministry of Environment, Forest & Climate Change (MoEF&CC), GoI, Enforcement & Monitoring Guidelines for Sand Mining issued by MoEF&CC, GoI in 2020; and
- Orders, instructions, guidelines, standards issued by Government, Hon'ble Court/Additional Chief Secretary, GoA, (E & F)/PCCF & HoFF, Principal

Secretary GoA, Mines and Minerals Department, Director of Geology and Mining, *etc*. from time to time.

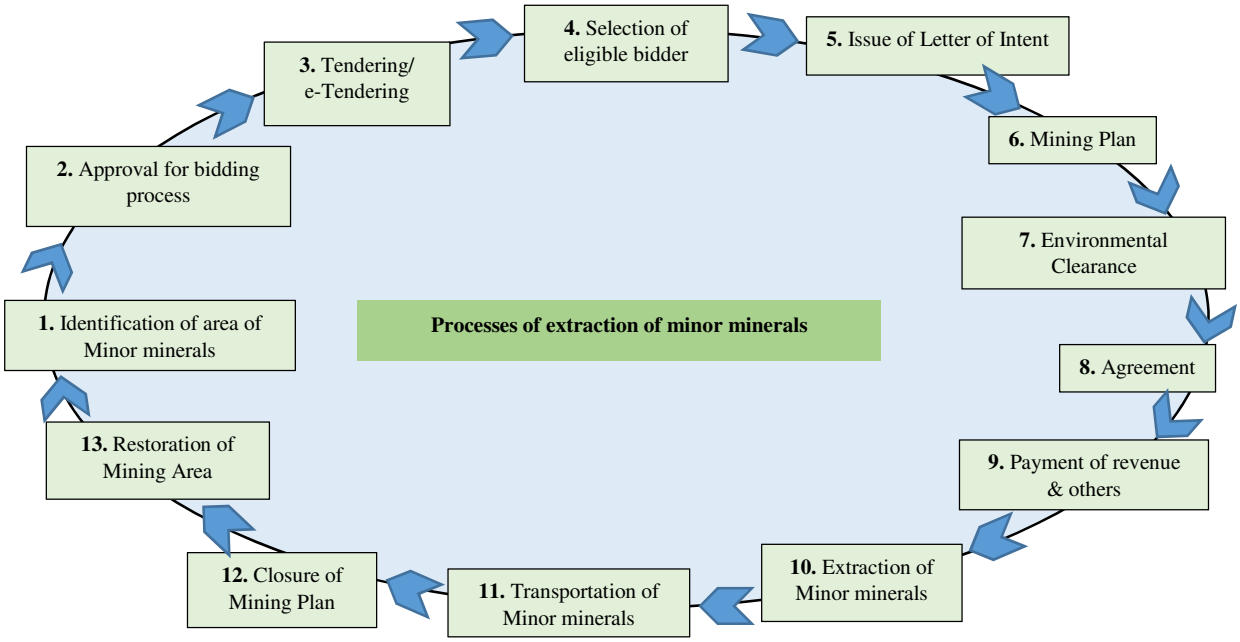
4.3.6 Scope of Audit and Methodology

- Administration and management of minor minerals for the period from 2016-17 to 2020-21 was reviewed.
- The records of the Principal Secretary, Mines & Mineral Department, Additional Chief Secretary, Environment and Forests Department, Directorate of Geology and Mining, Assam and PCCF & HoFF, Assam and selected divisions were scrutinised.
- Joint Inspection/Verification along with Departmental authorities was conducted to assess the extent of non-compliance with stipulated terms and conditions as per requirement.
- 11 divisions[86] (out of 33 territorial divisions) were selected based on Probability Proportional to Size Without Replacement (PPSWOR) sampling method taking revenue involvement of each division as the criteria.

The Performance Audit commenced with an entry conference (05 August 2021) wherein the audit objectives, criteria and scope of audit and methodology was discussed. The audit observations were discussed in an Exit Conference (06 December 2022) and views expressed and replies furnished were included in the Audit Report appropriately.

4.3.7 Processes of extraction of minor minerals:

The process of extraction of minor minerals are depicted in the diagram below:



Source:-Graphical representation of the process as defined in AMMCR, 2013

[86] DFOs (Territorial), (1) Nagaon,(2) Dhubri, (3) Nagaon South, (4) Golaghat, (5) Digboi, (6) Dhemaji, (7) Karimganj, (8) Dibrugarh (9) Hamren, (10) Dhansiri, and (11) Baksa *i.e.,* eight from State and three from Council area.

4.3.8 State Mineral Policy

The National Mineral Policy (NMP), 2008 was adopted by the Central Government to identify opportunities, regularise and simplify mining processes and check illegal mining. Accordingly, the Ministry of Mines had circulated (October 2009) a draft model State Mineral Policy, 2010 for states to develop suitable mineral policies within the ambit of the NMP keeping in view their local requirements. The draft model emphasised on the following:

- Minerals required to be conserved through improvement in mining methods, beneficiation and utilisation of low grade minerals;
- For systematic and complete extraction of minerals, the conditions of mining leases with reference to geological boundaries and others should be governed favourably;
- Reframe the terms of references of extraction of minerals covering aspects like Sustainable Development Framework, prevention of illegal mining, *etc*.

However, Government of Assam (GoA) has not developed any Mineral Policy on the lines of the model State Mineral Policy even after a lapse of more than 11 years. Further, none of the above-mentioned major aspects is fully covered in the AMMCR. For example, the Rules call for preparation of MP for systematic extraction of minerals, but the mandatory aspects to be included in the MP were not spelt out nor were the guidelines issued by the Indian Bureau of Mines (IBM) followed while preparing the MP. Similarly, the issue of transport pass has been prescribed in the Rules to prevent illegal mining/pilferage, however, the modalities for issue, verification and prevention of multiple use of transport pass have not been institutionalised.

In reply (July 2022), the Department of Mines & Minerals GoA stated that necessary process has been initiated to formulate a State Mineral Policy. As such, the State continued to administer mines and minerals without a comprehensive and inclusive mineral policy.

Recommendation: *Government may consider early finalisation and implementation of the State Mineral Policy.*

4.3.9 Overview of Assam Minor Minerals Concession (AMMC) Rules, 2013

In January 1995, GoA introduced the Assam Minor Mineral Concessions Rules, 1994 in accordance with the provision of Section 15 of the Mines and Minerals (Regulation and Development) Act, 1957 to regulate the minor minerals in the State.

In February 2012, Hon'ble Supreme Court directed the State Governments to frame necessary rules under Section 15 of the Mines and Minerals (Development and Regulation) Act, 1957 taking into consideration model guidelines issued[87] (2011) by the Ministry of Mines, GoI. Accordingly, in 2013, the GoA has introduced the AMMC

[87] Issued by Ministry of Mines, Indian Bureau of Mines vide No. 296/7/2000/MRC dated 16-05-2011.

Rules, 2013 as per provisions of Section 15[88] and Section 23 C[89] the MMDR Act, 1957 superseding the AMMC Rules, 1994.

The administration and regulation for granting of various mineral concessions and prevention of illegal mining are guided by the provision of the AMMC Rules, 2013 as mentioned below:

Rules 1 to 7	Preliminary and General Restrictions
Rules 8 to 31	Granting of Mining Area (Mining Lease, Mining Contract and Mining or Quarrying Permit)
Rules 32 to 37	Procedure for inviting competitive bids/auctions and payments
Rules 38	Collection of royalty, fees, *kist* money, *etc*.
Rules 39 to 47	General condition for grant of any mineral concession and payment of rent and compensation to the landowners and determination thereof
Rules 48 to 57	Scientific and systematic mining and environmental safeguards and Regulation and control of mining operations
Rules 58 to 79	Mines and mineral Department, Restoration and Rehabilitation Fund and Delegation, review and appeals along with Miscellaneous subjects

Audit Findings

4.3.10 Allotment of Mining Areas

4.3.10.1 Identification of areas with extractable minor minerals

In view of rapid urbanisation, there is a huge demand for minor minerals in Assam. Therefore, identification of suitable mining reserves with appropriate mapping and environmental safeguards for extraction of mineral is necessary to ensure developmental initiatives. The process of extraction of minor mineral commences with identification of areas of aggradations or deposition where mining can be allowed[90].

Rule 8 (1) of AMMC Rules, 2013 provides that no mining lease shall be granted by the competent authority unless it is satisfied that there is evidence to show that the area for which grant of mining lease is considered has been prospected earlier for minor mineral or the existence of minor mineral therein has been established otherwise.

However, the process of such identification of areas with evidence of extractable minor minerals was not defined in the AMMC Rules, 2013.

---

88 Power of State Governments to make rules in respect of minor minerals → Section 15.
89 Prevention of illegal mining → Section 23 (C).
90 Guidelines under Mineral Conservation and Development Rules (MCDR), 2017 for United Nations Framework Classification of Mineral Reserves/ Resources.

Good Practice: *In Andhra Pradesh, the District Level Committee in consultation with the concerned Conservator of River/ Executive Engineer, Irrigation Department and the Director of Ground Water Department identifies the sand bearing areas and available quantity, etc.*

There are no specific provisions under AMMC Rules, 2013 involving scientific assessment for identification of areas bearing minor minerals, preparation of comprehensive mine plan for contiguous stretches of mineral deposits, identification of specific river stretches, preparation of detailed hydro-geological report for minor minerals, *etc*. as suggested by the Hon'ble Supreme Court (in February 2012). Accordingly, the respective forest divisions prepared preliminary information before initiating bidding process for extraction of minor minerals from a particular area by including geo-coordinates, types of minor minerals, available quantity, forest type and density, *etc*. without any scientific assessment.

On being pointed out, the Mines & Minerals (M&M) Department, Assam stated (January 2023) that steps have already been initiated for inclusion of necessary provisions in the AMMC Rules, 2013 for identification of areas bearing minor minerals with scientific assessment.

Further, DoE&F, Assam stated (January 2023) that MP and Environment Clearance (EC) were obtained and approved by the concerned DFOs which meets the objectives of scientific assessment. However, DoE&F remained silent about the process of identification of MCAs.

4.3.10.2 Status of Mineral Concession Areas

The AMMC Rules, 2013 were introduced in Assam covering a total of 404 MCAs under the jurisdiction of 22 Forest (Territorial) divisions excluding[91] MCAs in Sixth Schedule areas[92]. Audit noticed that the number of MCAs under those 22 Forest Divisions decreased from 404 declared MCAs in 2013 to 312 MCAs in 2021. The Department stated that the decrease in operational MCAs is mainly attributable to declaration of eco-sensitive zones, insufficient quantity of minor minerals, *etc*. Of the total existing 312 MCAs in 2021, Audit noticed that only 128 MCAs were settled with bidders, settlement of 140 MCAs was in progress and remaining 44 MCAs remained idle due to Court cases as on 31 August 2021.

On being pointed out, DoE&F stated (January 2023) that steps are being taken to make the idle MCAs operational.

4.3.10.3 District Survey Report not prepared

In 2016, GoI introduced the concept of District Survey Report (DSR) by amending the Environment Impact Assessment Notification, 2006 with an objective to ensure identification of areas of aggradations or deposition where mining can be allowed; and identification of areas of erosion and proximity to infrastructural structures and

[91] Related data were not available with the Department.
[92] Involves 11 Forest Divisions.

installations where mining should be prohibited and time required for replenishment after mining in that area.

The DSRs are required to be prepared for each minor mineral in each district separately by the District Environment Impact Assessment Authority (DEIAA) with the assistance of Geology Department, Irrigation Department, Forest Department, Public Works Department, Ground Water Board Remote Sensing Department, Mining Department, *etc*. in the district. The DSR should contain the mineral potential and its location, depth of minable mineral and quantity of minerals of the district. The DSR shall be updated once in every five years and placed in the public domain.

In April 2016, GoA instructed Mines and Minerals Department, Assam to initiate preparation of DSR; however, the Department had not prepared a single DSR till June 2022. Thus, due to non-preparation of DSR, the identification and quantification of reserves was limited to field verification carried out by the forest divisions without consulting other departments to adopt scientific methods.

On being pointed out, the M&M Department stated (January 2023) that provision of DSR is not included in the AMMCR, 2013. The fact remains that in spite of GoA's instruction (April 2016) for preparation of DSR, the Department has not prepared any DSR till February 2023.

Recommendation: *The Government may ensure that the DSRs are prepared in a time-bound manner.*

4.3.10.4 Sand gravel not included in list of minor minerals

A mixture of sand and gravel forms an aggregate[93] (in Assam, it is known as sand-gravel), which is one of the most important construction materials. The main source of sand-gravel is the river bed, extraction from which requires environmental safeguards. Mention was made in Sustainable Sand Mining Management Guidelines, 2016 framed by Ministry of Environment, Forest and Climate Change that the mining of aggregates has reached a level threatening the environment and ecosystem besides threats to the economy.

In Assam, sand and gravel were notified separately in Schedule "Y" of AMMC Rules, 2013 in accordance with Section 3 (e) of MMDR Act, 1957. Moreover, after commencement of AMMC Rules, 2013, permits for extraction of sand-gravel from 41 MCAs were issued in Assam. Accordingly, in February 2017, the PCCF & HoFF issued[94] a clarification stating that there is no mineral namely 'Sand-gravel' in Schedule "Y" of AMMC Rules, 2013 and therefore, classification of minor mineral as 'Sand-gravel' is not admissible for mineral concession. Despite this, audit noticed that permits for extraction of sand-gravel were issued for government works in 29 out of 128 MCAs during 2017-21.

---

93 Sand particles lies between 0.15 to 4.75 mm in diameter (IS 383-1970), while the size of gravel lies between 10 mm to 63 mm.

94 Against a prayer petition in June 2014 by a MC holder.

Further, audit noticed that Mines & Minerals Department had notified[95] the rate of royalty in respect of sand and gravel separately along with other minor minerals. Thus, in AMMC Rules, 2013, there was no provision to treat these two minor minerals as one. In spite of this, the Chief Conservator of Forest (Planning)[96], had directed[97] levy royalty on sand-gravel at the same rate as that on gravel *i.e.*, on the higher side of royalty[98].

During the period 2013-21, five out of the 11 selected divisions had issued permits for sand-gravel. Audit noticed that of these five divisions, two divisions collected royalty at the rate prescribed for gravel (*i.e.,* ₹ 200 per cum) while three had collected royalty for sand-gravel at rates varying from ₹151 to ₹ 164 per cum as shown in **Table 4.3**.

Table 4.3: Revenue collection from Sand Gravel for Govt. Permit during 2013-14 to 2020-21

Sl. No	Name of Division	Details of Permit issued		Rate per cum fixed (in ₹)	Total Revenue collected (in ₹)
		No.	For quantity (cum)		
1	Baksa	226	1,94,783.28	164	3,19,44,457
2	Dhansiri	83	86,122.14	164	1,41,24,031
3	Nagaon	43	10,369.44	151	15,65,785
4	Digboi	12	13,500.00	200	27,00,000
5	Dhemaji	195	45,234.93	200	90,46,986
Total		**559**	**3,50,009.79**		**5,93,81,260**

Thus, despite sand-gravel not featuring in the list of minor minerals, the issuance of permits for sand-gravel as a separate category of minor mineral at various royalty rates was irregular.

On being pointed out, the M&M Department stated (January 2023) that geologically sand and gravel are two different minerals and accordingly included separately in AMMC Rules, 2013, while sand-gravel is the mixture/aggregate of sand and gravel in different proportional percentages, therefore, classification of minor mineral as 'sand-gravel' is not fit for mineral concession.

However, DoE&F, Assam stated (January 2023) that steps will be taken to make royalty rate of sand-gravel regular and systematic.

Recommendation*: The Government may review the need for inclusion of sand-gravel as a separate minor mineral, and issue suitable guidelines for setting the royalty rates based on a scientific assessment of the composition of sand and gravel found in Assam to prevent such variation in the rates of royalty.*

4.3.10.5 Non-formation of Cluster of Mineable Areas

The Committee on Minor Minerals constituted (2011) by the GoI recommended a minimum lease size of 5 hectares (ha) for minor minerals for undertaking scientific mining for the purpose of integrating and addressing environmental concerns. In 2012, Hon'ble Supreme Court while delivering judgement on requirement of environmental clearance in respect of area less than 5 ha also recommended to implement cluster of minable areas having 5 ha or more, so that eco-friendly scientific and sustainable

[95] Notification No-PEM-83/2009/Pt-VII-A/39 dated 17 June 2015.
[96] Office of the Principal Chief Conservator of Forest, Head of Forest Forces (PCCF & HoFF), Assam
[97] Letter No-FA.12/CAG/11-12 on 5 December 2012.
[98] Rate of royalty of Gravel→ ₹ 200 and rate of royalty of Sand→ ₹ 140.

mining practices could be adopted. The committee[99] constituted by the PCCF & HoFF (April 2013) also suggested (April 2013) that the adjoining/contiguous areas should constitute one mining area and areas in proximity shall be put into one cluster.

A perusal of the AMMC Rules, 2013, shows that these rules neither have any provisions for formation of cluster of mineable areas nor have any steps been taken by the Government to incorporate the recommendations of both the Committees through amendment even after lapse of eight years from implementation of the AMMC Rules, 2013. Audit observed that in Assam, out of 128 settled MCAs as of August 2021, there were 66 MCAs having less than 5 Ha area as of March 2021.

On being pointed out, DoE&F stated (January 2023) that cluster approach had already been initiated by clubbing nearby MCAs. Recently, new MCAs are identified in the form of cluster having area more than 5 Ha and with minimum extractable quantity of 10,000 cum/year. Further, the M&M Department, Assam stated (January 2023) that necessary process would be initiated to include provisions for formation of cluster of mineable areas in AMMC Rules, 2013.

Recommendation: *Government may consider to insert the provision for formation of cluster in the AMMC Rules through amendment and implement the same to ensure eco-friendly, scientific and sustainable mining.*

4.3.11 Mineral Concession Area as Lease, Contract and Permit

The AMMC Rules, 2013 provide that the mineable areas are to be allotted as MCA[100] under three categories *viz*., Mining Lease, Contract and Permit, segregated on the basis of period of allotment. In this regard, audit observed the following:

I) **Mining lease→** grant is considered for such MCA which was prospected earlier and for a period ordinarily not less than of 10 years but not exceeding 20 years following a competitive bid process.
(*Rules 8 to 17 of AMMC Rules, 2013*).
II) **Mining Contract →**for a specified annual quantity of minor mineral for a period ordinarily not less than 7 years but not exceeding 10 years following a competitive bid process.
(***Rules 18 to 22 AMMC Rules, 2013***).
III) **Mining Permit →**for a specified quantity of minor minerals to be extracted /collected within a specified period not exceeding two years in specified cases on payment of advance royalty.
(***Rules 23 to 31 AMMC Rules, 2013***).

4.3.11.1 Settlement of MCAs for a shorter term

The Hon'ble Supreme Court viewed (in 2012) that if the tenure of the mine lease is short, it would encourage the lessee to concentrate more on rapid exploitation of mineral without really undertaking adequate measures for reclamation and rehabilitation of mined out area, posing thereby a serious threat to the environment and

[99] PCCF & HoFF constituted (April 2013) a Committee to adopt uniform system for smooth execution and to suggest the various aspects of AMMC Rules, 2013.

[100] Mineral Concession (Rule 2(q)) means a mining lease or a mining contract or permit in respect of minor mineral and includes quarry permits and any other mineral concession permitting the mining of minor mineral in accordance with the provision of these rules.

health of the workers and public at large. As such, the Hon'ble Supreme Court recommended that the minimum period of a mine lease should be five years, so that eco-friendly, scientific and sustainable mining practices are adopted. However, under exceptional circumstances arising due to judicial interventions, short term mining leases/contracts could be granted to the State agencies to meet the situation arising therefrom.

In 11 selected divisions, out of 175 MCAs[101] (including MCAs in Sixth Schedule Areas) settled during 2014-21, 64 MCAs were settled as permits for a period of two years, nine MCAs were settled as contracts for a period of three years, 17 MCAs were settled as contracts for a period of five years and 85 MCAs were settled as contracts for a period of seven years.

Further, audit noticed 13 MCAs (**Appendix-XXVI)** under Dibrugarh and Nagaon divisions were settled through mining permits for two to three times for a period not exceeding two years in each spell during 2014-21. However, the Department has not initiated any steps for settlement of these MCAs through mining contract or lease *i.e.*, for a longer period of five years or more to avoid the gap period between settlement of permits and adopting eco-friendly, scientific and sustainable mining practices as recommended by the Hon'ble Supreme Court.

Audit also noticed that 26 MCAs were settled as contracts for a period of three or five years without recorded reasons for settlement of these MCAs for less than seven years (as specified in Rule 18 of AMMC Rules, 2013). However, the Department did not initiate pre-feasibility report regarding availability of minor minerals for scientific mining for longer period.

On this being pointed out, DoE&F stated (January 2023) that the MCAs were settled for a period of two years or less for utilisation of minor minerals in government development works. The reply of the Department is not based on facts as Audit noticed that 13 MCAs under two selected divisions were repeatedly settled for non-government purposes through tendering process for two years.

4.3.11.2 Absence of provisions in the AMMC Rules, 2013

The AMMC Rules, 2013 provides for grant of mining permit for minor minerals either to the Departments notified by the State/Central Government based on applications or following a competitive bid process for a specified annual quantity of minor minerals not exceeding two years. However, audit noticed that the following aspects are not adequately covered in the Rules *ibid*.

- In view of the high cost of extraction in cases of extraction of smaller quantity of minor minerals by departmental contractors, the Rules *ibid* did not provide for supply of minor minerals by the MC holders to the departments at departmental rates.

[101] Out of 257 MCAs, 175 MCAs were settled and 82 MCAs are in progress.

- The Rules *ibid* did not have provisions to prevent issue of indent by the Departments in excess of requirement and actual removal of minor minerals to avoid blocking of mineable minerals as well as illegal removal. Audit noticed that though indents were issued by various Government Departments for granting permits, however, these were neither monitored nor pursued by the divisions to safeguard against the loss of Government revenue as well as damage to the environment.

In Nagoan South Division, against the indent[102] of 17,500 cum of sand (valid for three years), 4,550 cum of sand was shown as extracted as per Divisional records. However, on cross-verification of the records of the indent issuing authority, it was noticed that 13,950 cum sand has been utilised for the work. Similarly, in Digboi, against an indent[103] of 1000 cum of sand (valid for nine months), only three cum of sand was shown as extracted. On similar cross verification of the records of the indent issuing authority, it was noticed that 547 cum of sand had been utilised for the same.

From the above, it is clear that 9,944 cum[104] sand was extracted against the allocation of 18,500 cum of sand without payment of royalty.

On this being pointed out, the M&M Department stated (January 2023) that necessary steps would be taken to put in place a computerised database to monitor project-wise utilisation of minor minerals by user departments. Further, DoE&F, while accepting the audit observation, stated (January 2023) that notices have already been issued to the defaulters for realisation of short payment of royalty.

Recommendation*: The Government may put in place a computerised database to monitor project-wise utilisation of minor minerals by the user departments so as to prevent unauthorised extraction of minor minerals by the contractors.*

4.3.11.3 Regulation of MCAs

The AMMC Rules, 2013 provides for settlement of MCA for extraction of minor minerals through mining lease or contract or permits followed by a competitive bid process. All lessees/MC holders are liable to pay minimum amount called annual dead rent (or annual contract money) in a year irrespective of the fact as to whether or not the area is operated fully or partly and the amount of annual dead rent is determined

[102] Issued (October 2017) by the EE, PHE, Hojai Division.
[103] Issued (October 2020) by the EE, PWD (R), Dhuliajan.
[104]

Name of Division	Quantity sand as per indent (in cum)	Quantity of sand extracted as per division's record (in cum)	Quantity of sand utilised by contractors as per user Department (in cum)	Quantity of sand utilised without permit (in cum)
(1)	**(2)**	**(3)**	**(4)**	**(5) = (4) – (3)**
Nagaon south	17,500	4,550	13,950	9,400
Digboi	1,000	3	547	544
Total				**9,944**

based on annual bid value of the lessee. The bid amount depends on the reserve price[105] (*i.e.*, minimum price of the minor minerals) fixed by the Department, which plays an important role in determination of its annual dead rent/contract money.

4.3.11.4 Lop-sided fixation of Reserve Price

The AMMC Rules, 2013[106] provides that the competent authority shall upfront determine the reserve price in each case where mineral concessions are granted through competitive bidding or open auction, as the case may be. The reserve price may be fixed keeping in view the past trends, availability of mineral reserve in the area, the potential, access and proximity to the markets. However, in case no bid is received against the reserve price fixed for an area on two successive occasions, the reserve price may be revised downward.

Audit noticed that in Dhansiri and Nagaon Divisions, the tenders were invited for three MCAs stating reserve price below the reserve price actually calculated by the divisions on the basis of past trends of these MCAs without recording any reasons thereof, which had an impact on the final bidding price of the MCAs. This resulted in minimum loss of Government revenue of ₹ 29.17 lakh. The details are shown in **Table 4.4**:

Table 4.4: Details of quoting of reserve price in tenders

Sl. No.	Name of MCA (Date of inviting NIT)	Types of MMs	Qty of MMs per year	Period of contract in Year	Details of last settlement			Reserve Price fixed by the Division		Total Value of MMs as per Reserve Price fixed by the Division	Reserve Price stated in NIT (in ₹/ cum)		Accepted bid value (in ₹/ cum)	Loss of revenue (in ₹/ cum)	Total Loss of Revenue in 7 years (₹ in lakh)
					Year	RP	Minimum RP	(in ₹/cum)		(₹ in lakh)					
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)		(10)	(11)		(12)	(13) = (9) – (12)	(14) = (4) X (5) X (13)
Dhansiri Division															
1	Beltola S.S.G. Mahal (06-07-15)	Sand	2200	7	2009	154	240	210	253	74.48	140	178	205	48	14.11
		Stone	2000			222	346	301			220				
2	Daisam Boulder Mahal (19-04-19)	Boulder	3200	7	2009	130	203	220		49.28	203		200	20	4.48
Nagaon Division															
3	Jamunamukh Kapili 1(A) (22-10-19)	Sand	30000	7	2014	151	236	151		317.1	143		146	5	10.58
		Total													**29.17**

[105] Percentage of value of mineral despatched as referred in sub-rule (1) of rule 8 of Mineral (Auction) Rules, 2015.

[106] Rule 33 of AMMC Rules 2013.

On this being pointed out, DoE&F stated (January 2023) that lop-sided fixation of reserve price in respect of MCAs under Dhansiri Division was done wrongly while fixation under Nagaon Division was done due to non-receipt of bids on two consecutive occasions. The reply of the Department was not acceptable as the Committee constituted for revising the reserve price of MCAs under Nagaon Division had recommended to reduce the reserve price, mining quantity and mining period. However, audit noticed that though the above MCAs were settled with a reduced reserve price, mining quantity and mining periods were not reduced.

4.3.11.5 Granting of MCA to the lowest bidder

Audit noticed that two Divisions (Baksa and Dhansiri) under the control of Bodo Territorial Council (BTC) had settled two MCAs with the lowest tenderer instead of highest tenderer following the direction of the Addl. PCCF & CHD, Forest, BTC[107] as shown in **Table 4.5**.

Table 4.5:-MCAs settled with the lowest bidders

Name of the Division	Name of the MCA (Date of settlement)	Govt Value	Number of Tenders received	Value of Eligible Highest Tender (in ₹)	Value of awarded Tender (in ₹)	Loss of Government Revenue (in ₹)
Baksa	Motonga Sand and Stone Mahal No.4 (01-10-2015)	26,95,000	4	29,40,000	28,00,000	1,40,000
Dhansiri	Deepabasti Stone Mahal (09-09-2019)	14,00,000	3	28,00,000	14,18,000	13,82,000
Total						**15,22,000**

This had resulted in loss of revenue of ₹ 15.22 lakh.

Audit further noticed that in the same two divisions, another three MCAs[108] were initially settled with the lowest bidders. Aggrieved with the settlement orders, the highest eligible bidders appealed before the court and on the direction of the Hon'ble Gauhati High Court, these MCAs were finally settled with the respective highest bidders.

Similar irregularities of awarding contract to the lowest bidder instead of eligible highest bidder had been pointed out by Audit in Audit Report of 2018-19 (Paragraph 4.5.3); however, due to inaction of the Department such irregularities are still persisting.

On this being pointed out, DoE&F stated (January 2023) that the aforesaid MCAs were settled by the Principal Secretary of BTC, Bodoland. The reply is not acceptable as there was no provision in AMMC Rules, 2013 for settlement of MCAs in favour of the lowest bidder.

[107] Addl. PCCF &CHD, Forest BTC order dated 01.07.2015 for Motonga Sand & Stone Mahal No. 4, Baksa and dated 06.09.2019 for Deepabasti Stone mahal, Dhansiri.

[108] Montonga Sand & Stone Mahal No. 3 and Montonga Sand & Stone Mahal No.5 of Baksa Division and Dhansiri Sand and Gravel Mahal of Dhansiri Division.

4.3.11.6 Settlement of MCA at exorbitant rates without analysis

Rule 33 (3) of the AMMC Rules *ibid* provides that any abnormalities in the auctions held earlier and the bids received of exceptionally lower or higher amount, may be ignored. The Central Vigilance Commission, GoI, also instructed[109] that awarding of the contracts at too high a price needs to be discouraged and the organisations must ensure that contracts are awarded on the basis of competitive bidding at reasonable rates.

Audit noticed that in Dibrugarh Division, in case of two MCAs, the bidders were selected for grant of MCAs, though the bidders offered an exorbitant value in consideration against the reserve price of minor minerals fixed by the Department. However, the selected bidders failed to pay the deposits as required prior to execution of agreement in each case. Due to the failure of the highest bidders to deposit the initial dues, the Department was compelled to invite fresh tenders on each occasion. Finally, the MCAs were settled with the highest bidders after third NIT with a price just above the reserve price in each case. The details are shown in **Table 4.6**.

Table 4.6: Grant of MCA against exorbitant rates without analysis in Dibrugarh Division

Sl. No	NIT No.	Date of NIT	Name of successful bidder	Qty of Sand in M^3	Reserve Price per M^3 (in ₹)	Period	Date of LoI	Bid offered	Offered rate per M^3 (in ₹)
Name of MCA : DBR 18									
1	1st	26-09-13	Dilip Sonowal	5000	194	2013-15	20-12-13	3,17,20,500	6,344
2	2nd	13-02-14	Dilip Borgohain	5000	194	2014-16	06-08-14	2,35,65,551	4,713
Finally allotted to Shri Mohan Gogoi @₹ 196 per cum on 27 January 2017									
Name of MCA : DBR 15									
1	1st	26-09-13	Debojit Borgohain	6000	196	2013-15	24-01-14	39,99,999	666
2	2nd	05-08-16	Chandan Gogoi	6000	196	2016-18	10-11-16	50,00,000	833
Finally allotted to Shri Nilmoni Konwar @₹ 206 per cum on 01 November 2017									

Thus, due to non-analysis of the rates quoted by the bidders and settlement of MCAs with highest bidders in spite of exorbitant rate of minerals offered resulted in inordinate delay in settlement of MCAs ranging between 2 years to more than 3 years resulting in a loss of ₹ 27.34 lakh calculated on the reserve price.

Audit noticed that in Karimganj Division, while finalising the successful bidder of 62 Hal Baruala Sand Minor Mineral Unit (MMU) rejected the highest bidder and selected the second highest bidder in the interest of smooth realisation of Government revenue and to avoid gap period. While rejecting the highest bidder, it was recorded that the rate offered by the highest bidder was exorbitant as the offered price was seven times more than the reserve price.

Audit noticed that the PCCF & HoFF directed (June 2015) to enquire[110] into the reasons for the sharp decline of bid values during the third NIT in case of DBR 18. The DFO

[109] Vide letter No.OFF-1-CTE-1 dated 05.02.2004.
[110] As per instruction of PCCF & HoFF, Assam.

reported[111], that the following were the reasons for sharp decline of bid value in the third NIT.

- During the first two NIT, the offer was made intentionally at a higher rate to spoil the bids:
- First two offers were without site inspection and assessment of minable quantity by the bidders
- Third offer was low due to presence of silt in large quantity.

From the enquiry report, it is clear that the bidding process was manipulated by the bidders and no action was taken against the officers who had accepted such exorbitant offers without analysis of bid value with market price which caused delay in settlement of the MCA.

Thus, there was no uniformity in the decisions taken by Forest Divisions on the reasonableness of the bid value.

On this being pointed out, DoE&F stated (January 2023) that there is no provision for settlement of MCA at exorbitant price in AMMC Rules, 2013; however, due to small quantity of mineral in NIT, bidders offered exorbitant prices. At present, the minimum quantity was fixed at 10,000 cum per year and the mining plans would be prepared by the divisions in advance to restrict offer of exorbitant rates during bidding. The justification provided by the Department is not acceptable as Rule 67 of AMMC Rules, 2013 provides scope for review of the orders by the PCCF & HoFF; however, in the instant case, the same was not reviewed even though the highest bidder of the first NIT failed to deposit the initial dues.

Recommendation: *The Government may consider putting in place a mechanism to analyse the bid value for its reasonableness and workability before acceptance so that bids with exorbitant bid values could be discarded.*

4.3.11.7 Irregular settlement of MCA

(A) Audit noticed that against an NIT (August 2013), 12 tenders were received for extraction of 4000 cum of sand per *annum* from Doboka Sand Mining Unit-2 of Nagaon South Division. Out of 12 tenderers, eight tenderers quoted their offer rate for the entire period of contract (*i.e*., seven years) while four tenderers quoted annual offer rate. The tender committee, while preparing the comparative statement, did not convert the annual offered rate into total offered value for the entire period of seven years. Consequently, the highest bidder who offered annual rate of ₹ 28.22 lakh was overlooked and the bidder with offered value of ₹ 75 lakh for the entire contract term of seven years (*i.e*., ₹ 10.71 lakh per *annum*) was selected and granted (January 2014) the contract. Aggrieved with the settlement order the highest bidder approached the Hon'ble Gauhati High Court and the case was disposed of (September 2014) in favour

[111] Submitted by the DFO (14 July 2015).

of the highest bidder. However, the Department took five years to settle (February 2019) the MCA, which resulted in loss of revenue of ₹1.41 crore[112].

(B) As per Rule 34 of the AMMC Rules, 2013, a public notice of 21 days shall be published for inviting bids or conduct of open auctions for mineral concession. In addition, the gist of such notice shall be published in one daily newspaper having circulation in the area and a copy of the public notice shall also be sent to the Deputy Commissioner and others as decided by the competent authority for giving wide publicity in the area.

Audit noticed that in five divisions, out of seven MCAs, six MCAs were granted by the PCCF & HoFF, Assam against notice period ranging from 7 to 25 days from the date of public/sale notice to tender opening date and periods ranging from 7 to 18 days from publication in newspaper to tender opening date as shown in **Table 4.7**:

Table 4.7:-Details of sale notice

Sl. No.	Name of MCA	Date of public/ sale notice	Date of publication in newspaper	Tender opening date	Notice period between		Remarks
					Col 3 and Col 5	Col 4 and Col 5	
	(i) Nagaon South Division						
1	Debsthan-1	17.08.13	28.08.13	09.09.13	22	11	Approved by the PCCF & HoFF on 18.12.13
2	Debsthan-2	17.08.13	28.08.13	09.09.13	22	11	Approved by the PCCF & HoFF on 18.12.13
3	Doboka sand Mining Unit-3	27.01.15	04.02.15	18.02.15	22	14	Rejected by the PCCF & HoFF (03.07.15) stating non-fulfilment of criteria of Rule 34 of AMMCR, 2013.
	(ii) Golaghat Division						
4	Bokial Stone Quarry	14.06.16	21.06.16	08.07.16	25	18	First rejected by the PCCF & HoFF (20.07.16) stating non-fulfilment of criteria of Rule 34 of AMMCR, 2013. After intervention of DFO, Golaghat stating tenders were opened after 25 days from the date of sale notice, the PCCF & HoFF granted (25.04.17) the MCA to successful bidder.
	(iii) Dhemaji Division						
5	Likabali S&G	16.08.13	23.08.13	11.09.13	25	18	Approved by the PCCF & HoFF on 27.02.14
	(iv) Nagaon Division						
6	Borpani- 1 A	08.08.14	12.08.14	30.08.14	23	18	Approved by the PCCF & HoFF on 09.01.15
	(v) Dibrugarh Division						
7	DBR-18	13.02.14	13.02.14	19.02.14	7	7	Approved by the PCCF & HoFF on 06.08.14

From **Table 4.7**, it is clear that DBR 18 MCA was awarded against notice period of seven days from the date of public/sale notice and tender open date against the provision of 21 days in the Rules *ibid*, while two MCAs *viz*., Doboka sand Mining Unit-3 and Bokial Stone Quarry were rejected by the PCCF & HoFF stating that provision of Rules *ibid* were not fulfilled during public notice. However, the MCA *viz*., Bokial Stone

[112] Gap period calculated from settlement to final agreement *i.e*., from 01.01.14 to 06.02.19 *i.e*., lapse of 5 years (₹ 28,21,999 X 5 years).

Quarry were granted by the PCCF & HoFF after intervention/approach of the DFO, Golaghat stating that the notice period was 25 days from issuance of public notice. Audit also noticed in respect of Doboka Sand Mining Unit-3 that aggrieved with the order, the highest bidder appealed in the Hon'ble Gauhati High Court and the petition was disposed of (November 2020) due to non-appearance of the petitioner in the court. Thus, due to irregular rejection of the bidding/sale notice, the MCA remained idle for more than eight years[113], which resulted in loss of minimum revenue of ₹51.68 lakh[114].

Thus, irregular decision by the authority on fixing of gap period between issue of sale notice and opening of NIT resulted in loss of revenue to the Department.

On this being pointed out, DoE&F stated (January 2023) that e-auction process has been initiated to avoid any discrepancy in settlement of MCA.

4.3.11.8 Non-reduction of reserve price

The AMMC Rules *ibid* provide that in case no bid/offer is received against a reserve price fixed for an area on two successive occasions, the competent authority may revise the reserve price downwards to an appropriate level. Further, clause No. 8 of Tender sale notice of Mineral Concession Area (MCA) mentions that the tenderers should offer their bids only after fully satisfying themselves regarding availability and quantity of materials in the respective MCAs.

Audit noticed that in two (out of 11 selected) divisions[115], though tenders for grant of seven MCAs[116] were invited, no tender was received on two successive occasions. The Department did not take further initiative to identify the reasons for non-receipt of tenders and re-consideration of the reserve price for the respective MCAs. These MCAs remained idle (March 2022) since October 2016 due to inaction of the Department to negotiate the reserve price of MCAs.

On this being pointed out, DoE&F stated (January 2023) that a Committee was formed to ascertain the actual extractable quantity available. The Committee recommended to amalgamate six unsettled MCAs under Golaghat Division into three MCAs. Accordingly, MCAs were amalgamated. Out of these, two MCAs were settled and one MCA was demarcated for Government permits due to non-availability of successful bidders.

4.3.11.9 Fixation of floor price on the basis of Reserve Price

GoA amended (October 2018) the AMMC Rules, 2013[117] introducing the process of e-tendering[118] for grant of all mining leases/contracts/permits through a transparent

---

113 During January 2015 to November 2022.
114 Minimum loss- Reserve price 6,08,000 x 8 years 6 months= ₹ 51,68,000
115 Dibrugarh and Golaghat.
116 Six MCAs under Golaghat Division (*viz*., (i) Bandar Ghat Sand/Stone Mahal No.1, (ii) Bandar Ghat Sand/ Stone Mahal No.2 (iii) Bandar Ghat Sand/Stone Mahal No.3 (iv) Bandar Ghat Sand/Stone Mahal No.4 (v) Kanaighat Sand Mahal No.1/2 (vi) Kanaighat Sand Mahal No. 1/1 and one under Nagaon Division (*viz*., Sonaikuchi Sand Permit Area).
117 Published vide notification No. PEM.47/2018/16 dated 26 October 2018.
118 Under Rule 32.

process of inviting e-auction. Further, clause 8 of the Bid document for e-auction specified that the initial price offer shall be equal to or greater than the reserve price and the qualified bidders may submit their final price offer which shall be greater than the floor price.

Out of 11 selected divisions, eight divisions initiated (November 2018) e-tendering process.

Audit noticed that in four divisions, the reserve prices for e-tender were fixed without analysis of revenue trend and market value as per provisions of AMMC Rules, 2013 and fixed at royalty rates or previous reserve price. As such, the initial price for respective e-tenders were fixed either below or at par with the penultimate reserve price which had affected the floor price as per provision of Clause 8 of the Bid document as mentioned *ibid*.

Golaghat Division fixed (January 2021) the reserve prices for eight MCAs by adding 25 per cent to the last sale value of minor minerals per cum of respective MCAs. Audit noticed that the Division fixed the reserve price of Borpother Sand Mahal No. 1 at ₹ 411 per cum from the last sale value of ₹ 329 per cum of the said MCA.

Audit further noticed that in the other 10 cases, during e-tendering, the reserve prices were not fixed as per provisions made under the AMMC Rules, 2013 which affected the floor price of e-tenders of respective MCAs and resulted in a minimum loss of ₹ 8.89 crore **(Appendix-XXVII)**.

On this being pointed out, DoE&F stated (January 2023) that the reserve price is fixed as equal to or above the royalty rate and put into the e-auctioning process, hence the bidders are bound to offer appropriate bids. The reply is not tenable because as per Rule 33 of the AMMC Rules, 2013, reserve price is to be up-fronted by considering past trends where the mineral concession area is granted through competitive bidding process.

4.3.11.10 Irregular acceptance of tender

Rule 37 (1) of AMMC Rules, 2013 provides that no bid shall be regarded as 'successful' unless accepted by the officer competent to accept bid/tender in accordance with the provision of the Delegation of Financial Rules,1999 of the State. Further, GoA also notified[119] (November 2016) limits for acceptance of bid values for settlement of mining contract for minor minerals under AMMC Rules, 2013 and specified that the financial limit for acceptance of tender for DFO and Conservator of Forests (CF) are up to ₹ five lakh and ₹25 lakh respectively.

Audit noticed that three MCs under Digboi Division were settled with the approval of DFO/CF where bid values were in excess of the financial limit for acceptance of the concerned officers as stipulated in the aforesaid Government notification. No *post-facto* approval was obtained in any of these cases. Details are given in **Table 4.8**:

[119] Government notification No. FRM.300/2012/Pt/7 dated 15 November 2016.

Table 4.8:-Details of bid approved by the DFO/CF in excess of limit for acceptance under Digboi Division

Sl. No.	Name of MC Area	Date of settlement	Period of mining	Annual bid value	Total settlement value	Tender accepted by (LOI issued)	Remarks
1	DIG-22	24-01-18	2 years	4,68,000	9,36,000	DFO	Not forwarded to CF for acceptance of bid value.
2	DIG-21	27-11-17	2 years	3,74,992	7,49,984	DFO	
3	DIG-12	03-12-16	7 years	8,22,000	57,54,000	CF	Not forwarded to CCF for acceptance of bid value

On this being pointed out, DoE&F stated (January 2023) that MCAs under Digboi Division were settled inadvertently with the approval of DFO.

4.3.12 Environmental Management Plan

A Core Group constituted (2009) by MoEF, GoI, recommended various environmental aspects associated with mining of minor minerals along with various issues[120]. Based on the recommendation of the Core Group, the MoEF, GoI had issued (May 2011), a model guideline[121] which specified that Mining Plan[122] and environmental clearance is a pre-requisite to grant of MCA having an area of 5 ha and above. MP is the basic document for EC/Environmental Management Plan (EMP), Forest Clearance, *etc*. for grant of a mining area and connects the mine with all stakeholders.

The AMMC Rules, 2013 also made provisions for preparation of mining plan and environmental safeguards, restoration and rehabilitation measures of the mining area.

➢ Mining Plan

The AMMC Rules, 2013 provides for preparation of an MP[123] by a Recognised Qualified Person (RQP)[124] on behalf of the mineral concession holder and includes progressive and final mine closure plans. As the AMMC Rules, 2013 did not provide for any specific format or information to be incorporated while preparing the MP, audit enquired about the procedures followed while preparing the MP. In reply, the Geology & Mining Department, GoA stated that MPs were prepared following the guidelines issued by the Indian Bureau of Mines (IBM) and AMMC Rules, 2013.

The procedures to be followed while preparing the MP as prescribed by IBM are as shown in the following flowchart:

---

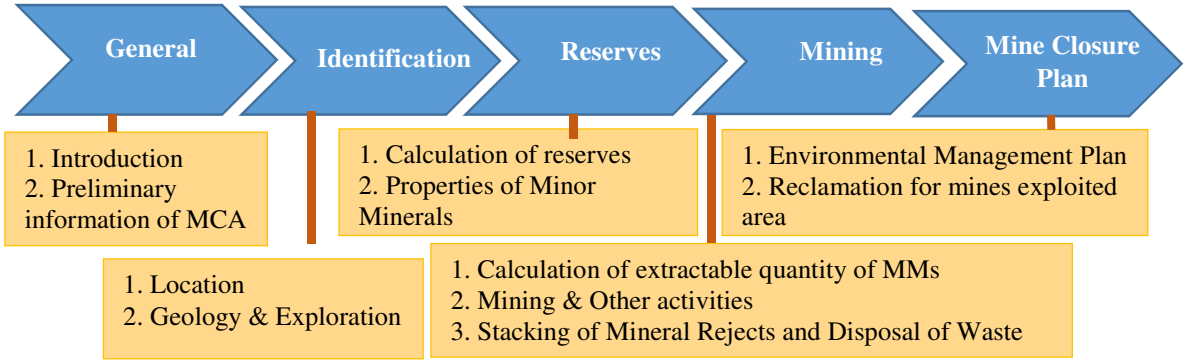
120 (i) definition of minor mineral, (ii) minimum size of lease for adopting eco-friendly scientific mining practices, (iii) period of lease, (iv) cluster of mine approach for addressing and implementing EMP in case of small mines, (v) depth of mining to minimise adverse impact on hydrological regime, (vi) requirement of mine plan for minor minerals, similar to major minerals, and (vii) reclamation of mined out area, post mine land use, progressive mine closure plan, *etc*.

121 namely Environmental aspects of quarrying of minor minerals - Evolving of Model Guidelines

122 A proposal for mining on a mining site, including a description of the systematic activities to be used for the purpose of extracting minerals.

123 Chapter 9& 10 (Rules 48 to 57) of AMMC Rules 2013.

124 Director or an officer authorised by him, or by a person recognised by the Central Government or an officer authorised by the Central Government in this behalf the provision of rule 22 B of the Mineral Concession Rules,1960. (Rules 50 of AMMC Rules 2013).

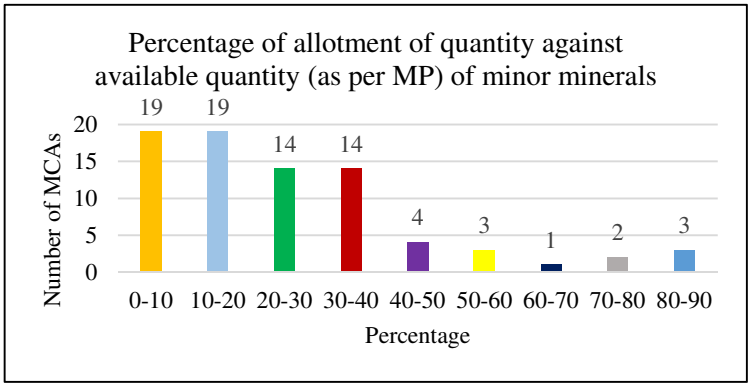


Audit noticed the following deficiencies in the MPs approved by Geology and Mining Department:

4.3.12.1 Non-compliance/shortfalls in the Mining Plans

Audit scrutinised MPs of 89 MCAs granted by the 11 sampled divisions during 2013-21 and noticed that the RQP, while preparing MPs on behalf of MC holders, did not consider all parameters suggested by the IBM. For example, the MPs did not anticipate life of the mines and volumes of mineable reserves of minor minerals and were calculated by considering maximum depth of 3 meters without considering the water level in river bed or Reduced Level (RL) distance[125] of the land bed mines. Other issues noticed are as discussed in the following paragraphs:

- During settlement of MCAs through competitive bidding process, the Department allowed extraction of two to 86 *per cent* of the mineable reserve as estimated in the MPs in case of 79 river bed MCAs as shown in the chart placed alongside. Thus, due to absence of any scientific study of extractable mineable reserves prior to NIT, a huge quantity of mineral remained unallocated for extraction, which had narrowed the scope of replenishment of minor minerals specifically in case of river bed MCAs. Therefore, preparation of MP after finalisation of selection of bidders for the specific quantity during bidding process led to shortfall in allocation of mineable minerals and scope for removal of excess minor minerals without payment of government dues. Further, in one case[126], it was noticed that allotment of quantity of minor minerals was 138 *per cent* against estimated quantity in the respective MP.



[125] Reduced level (RL) refers to equating elevations of survey points with reference to a commonly assumed datum. It is a vertical distance above or below the datum plane. The most common datum used is Mean Sea Level. This reduced level is the term used in levelling.

[126] Golondl Boulder Mahal under Dhansiri Division.

Good practice: *In Odisha, a minimum guaranteed quantity (MGQ) of minor minerals is declared in the sale notice of minor minerals with a right to modify the MGQ as per respective MPs.*

- Extraction of minor minerals was allowed to MC holders (selected through bidding process) and Government departments from the same mineable reserves overruling the Hon'ble Gauhati High Court order[127] restricting grant of Government permits from the same mineable reserves, which have already been settled with MC holders.
- One MCA was settled for extraction of sand (3000 cum per year) and stone (1500 cum per year) in Digboi Division[128], however, MP was prepared for extraction of stone only. Further, audit noticed that EC was obtained for extraction of both sand and stone without any mining plan for extraction of sand.
- In four MCAs of two divisions, the allotted quantities of minor minerals during NITs ranged from six to 33 *per cent* against the available quantities of minor minerals as per respective mining plans. However, the respective MC holders, after completion of periods ranging from first to seven quarters, requested to reduce the allotted quantities stating non-availability of the same. The Divisions, without verification of the facts by experts from DGM, reduced the quantities of minor minerals, however, the period for extraction was not reduced in this regard, which not only negated the objectives of the mining plan but was also irregular as the AMMC Rules, 2013 did not make any such provision to reduce the allotted quantities of minor minerals (**Appendix-XXVIII**).
- In four MCAs, the minor minerals were extracted in excess of the estimated quantity in the respective MPs (Details in **Appendix-XXIX**). The excess minerals were extracted due to allocation of mining contract and permits from the same MCA. The extraction of minor minerals in excess of estimated mineable quantity was in contradiction to the environmental safeguard measures.

Thus, shortfall in compliance of parameters suggested by the IBM and other issues discussed above affected the allocation of extractable minor minerals *vis-à-vis* revenue collection, scientific mining of minor minerals, restoration and reclamation, *etc*.

On this being pointed out, the M&M Department, while accepting the audit observation, stated (January 2023) that henceforth all the MPs would be approved subject to fulfilment of terms and conditions as laid down in AMMCR, 2013 and parameters as envisaged by IBM.

Recommendation: *The Government may consider putting in place a mechanism to assess availability of minerals through the Mines and Minerals Department prior to NIT for optimum utilisation of mineral resources.*

[127] Hon'ble High Court, Gauhati ordered against WP (C) No 3790/2016.
[128] DIG 5 MCA.

4.3.12.2 Calculation of mineable reserves in MPs

As per Manual for Appraisal of Mining Plan issued (August 2014) by IBM, MP plays a vital role in the mining process as it scientifically identifies mineral deposits or mineral resources through a mine design and evaluation process that optimally plans the mineral resources with a life of mine plan as the primary output.

Audit noticed that the details of values of parameters for calculation of mineable reserves were not recorded in the final copies of MPs. However, in response to audit, the Director, Geology & Mining (DGM) stated that there were no working sheets attached with the respective MPs to verify the correctness of calculations of mineable reserves. The discrepancies noticed in 15 MPs are explained in **Table 4.9**.

Table 4.9: Discrepancies noticed in MPs

Parameters	River Bed MPs (13 MPs)	Land Bed MPs (2 MPs)
Area Allowed (in Ha)	Pre-defined by the Forest Department without taking into consideration the surroundings *viz*., bridges, embankments, *etc*.	Pre-defined by the Forest Department
Mining Area (in Ha)	The basis of determination of mining area was not recorded except in one MP wherein the GPS coordinates (Polygonal area) were the basis of determination of mining area.	
Maximum Depth applied (in M)	In all mining plans, the maximum depth was taken as 3 m universally without taking into consideration the water level (The Hon'ble Supreme Court directed that in case of river bed mining the depth of mining may be restricted to 3m or water level, whichever is less.)	
Rate of replenishment	In seven out of 13 river bed MPs, the rate of replenishment was arbitrarily calculated without any justification and in six river bed MPs, this parameter was not considered.	
Bulk Density[129]	In one out of 13 river bed MPs, the bulk density was considered and arbitrarily calculated without any justification while in 12 river bed MPs, this parameter was not considered.	
Rate of Mining loss per year (Reasons not mentioned)	In seven out of 13 river bed MPs, the mining loss was considered as 10 *per cent* while in six other river bed MPs, it was 20 *per cent*. The basis of fixation of such percentage of mining loss was not recorded.	
Total Working Days (WDs) per year (in days)	A total of 200 days were taken as WDs per year except in one MP where 225 days was taken as WDs without any justification.	
Ratio of Minor minerals (if any)	Out of 13 MPs, the ratio of minor minerals was recorded only in one MP.	
Benches[130]	All the 13 MPs referred to benches, however, the same was not considered for calculation of mineable reserves.	
Permissible quantity of MMs per year (in cum)	As a general practice, the mineable reserves were multiplied by the maximum depth and rate of replenishment &/or rate of bulk density to get the gross estimated quantity of minor minerals, from which the mining loss was deducted to get the net mineable reserves. The net mineable reserve was then multiplied by WDs per year to get the permissible quantity of Minor Minerals (MMs) per year. However, in one case, the mineable reserve was multiplied by the period of	Calculated roughly without declaration about methods of calculation and the permissible quantity remained

[129] Bulk density is defined as the mass of the many particles of the material divided by the total volume they occupy.

[130] As per Evolving of Model Guidelines issued (16 May 2011) by GoI, system of working in minor minerals quarries shall be performed by formation of benches as per MMR Regulation 115.

Parameters	River Bed MPs (13 MPs)	Land Bed MPs (2 MPs)
	extraction to increase the mineable reserves and then multiplied by WDs per year. This inflated the net mineable reserve by 62,614 cum of sand and gravel per year.	limited to the contract quantity

It is clear from the above that the methods adopted for calculating various parameters were arbitrary and there was limited scope for verification of the correctness of estimated mineable reserves after approval of the MPs by the Geology and Mining Department.

On this being pointed out, the M&M Department stated (January 2023) that henceforth all the MPs would be approved subject to fulfilment of all the parameters as envisaged by IBM.

4.3.12.3 Incorrect geo co-ordinates

Rule 52 (5) of the AMMC Rules, 2013 stipulates that an MP shall incorporate the area under concession delineated on a map with boundaries duly marked along with the positions of boundary pillars with GPS reading as one of the minimum requirements.

Audit test-checked the geo-coordinates of 23 MCAs[131] (involving six selected divisions) as mentioned in the respective MPs by plotting the coordinates in Google Earth and found the following discrepancies:

- As per geo-coordinates, in four MCAs, areas were smaller than the actual allotted areas ranging between 3.353 ha to 14.003 ha (**Appendix -XXX**).
- As per geo-coordinates, in 10 MCAs, areas were greater than actual allotted areas ranging between 2.5 ha to 1272.78 ha (**Appendix - XXXI**).

An illustrative diagram in one MCA is given below:

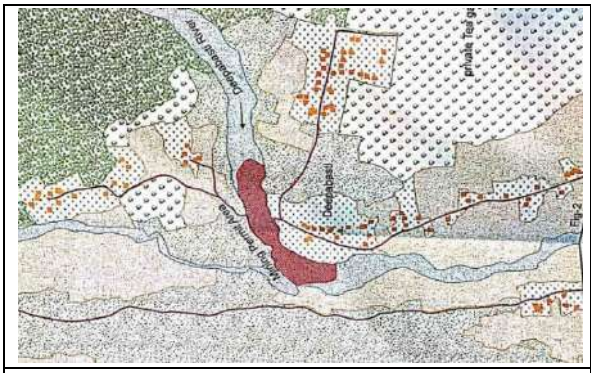


Image as per Mining Plan of Deepabasti Stone Mahal under Dhansiri Division

Image as per Google Earth of Deepabasti Stone Mahal under Dhansiri Division

On this being pointed out, both the Departments (M&M Department and DoE&F), while accepting the audit observation, stated (January 2023) that henceforth geo-coordinates would be verified before approval of the MPs and steps will be taken to correct the geo-coordinates.

[131] 12 MCAs are of river bed and 11 MCAs of land bed.

➢ Environmental Clearance

In 2016, the MoEF&CC amended the Environmental Impact Assessment (EIA) Notification, 2006 to bring small-scale mining projects under its ambit. The amendment made environmental clearance (EC) compulsory for mining of minor minerals including clusters in areas less than or equal to five hectares. Issue of EC for minor minerals was regulated by different notifications issued by GoI. The validity period of EC was modified from seven to five years in 2015 by GoI. As such, mining operations for a period of more than five years require renewal of EC after expiry of every five years or validity period as mentioned in the respective EC.

Though there is a provision of environment safeguards and restoration and rehabilitation measures for every mining area but still Environmental Clearance has not been made mandatory in the Rules *ibid*. However, the Environment & Forest Department, GoA included (July 2013) a clause in "Sale Notice" to obtain an EIA clearance from the competent authority[132] within a period of 45 days or within the extended time by the successful bidders.

Good practice: *In Odisha and Meghalaya, requirement of environmental clearance has been introduced in their respective Minor Mineral Concession Rules, 2016.*

Recommendation:-*The Government may consider including a provision for requirement of environmental clearance from the State Environment Impact Assessment Authority in AMMC Rules.*

4.3.12.4 Delay in issuance of EC

Audit test-checked 150 ECs[133] pertaining to 11 divisions and noticed that in 86 MCAs, there was delay in issuance of ECs by the State Environment Impact Assessment Authority (SEIAA) ranging from 49 days to 2,512 days which resulted in delay in settlement of 74 MCAs ranging from 69 to 2,542 days (**Appendix-XXXII**). Further, 12 MCAs were settled prior to issuance of ECs which is not regular (**Appendix–XXXIII**). Audit also noticed that in Nagaon Division, permissions were issued for extraction of minor minerals from four MCAs without EC certificates.

On being pointed out, DoE&F, Assam while accepting the audit observation, stated (January 2023) that presently, regular monitoring and pursuance with SEIAA for issue of EC is being carried out.

4.3.12.5 Non-renewal of EC/EIA Clearance

Audit noticed that 12 MCAs of four divisions were settled for seven years during the period 2013-16. The respective ECs were issued for five years each. On expiry of validity period of the ECs, MC holders of five MCAs had applied for extension of validity period of EC while the other seven MC holders had not applied for extension (**Appendix-XXXIV**). The extraction of minor minerals from eight MCAs had been

[132] State Environment Impact Assessment Authority (SEIAA) or District Environment Impact Assessment Authority (DEIAA).
[133] Out of 257 MCAs.

completed while the extraction of minor minerals from four MCAs is still in progress (till March 2022). The respective Divisions neither pursued the matter with the SEIAA for renewal nor took any action to stop extraction of minor minerals without valid ECs, which negated the very objectives of issuance of EC.

On this being pointed out, DoE&F stated (January 2023) that presently EC/EIA is being obtained by the concerned DFOs directly from the SEIAA to safeguard environmental aspects.

4.3.12.6 Non-compliance of conditions stipulated in EC

The AMMC Rules, 2013 authorised the competent authority to suspend or terminate the mining operations in case of violation of norms for environmental safeguards or terms and conditions for grant of the mineral concession agreement[134]. Further, based on compliance of specific and general conditions of environmental safeguards, an EC for minor minerals can be issued. However, audit noticed the following:

- As per conditions laid down in EC[135], blasting should be done only in the presence of the license holder and forest officials. Audit noticed that in Nagaon Division[136], the competent authority issued (January 2018) blasting permission with various conditions which included that the permit holder would be responsible for any eventuality and blasting was required to be done by a license holder. Blasting permission was issued (28 May 2019) by the DFO, Nagaon on a request made by the MC holder (27 May 2018) with a direction to the concerned Range Officer to be present during the blasting process (28 May 2019). Audit further noticed that the MC holder, against a notice issued by the Division, informed that the blasting was done in his absence due to ignorance of his team. Further, as per the enquiry report of ACF, Nagaon (08 June 2019) one hectare area beyond the permissible area had been blasted when neither the MC holder nor the Range Officer concerned was present. Thus, the Division did not take the requisite precautions for the blasting operations which led to violation of conditions laid in the EC and in the concerned blasting permission. However, no action was taken against the concerned officials and the MC holder for non-compliance of norms and the order except for issuing a warning to the MC holder. Thus, the Department failed to take appropriate action for violation of the stipulated conditions. There was also a lack of monitoring mechanism to safeguard against loss of life and property and damage to the environment.
- In Digboi Division, an MCA was awarded[137] (July 2018) for two years to extract sand (4,000 cum per year) and ordinary clay (3,000 cum per year) against which an EC certificate was issued (September 2020) for extraction of sand (4,000 cum) and ordinary clay (3,000 cum) for a period of two years[138]. The difference among the

134 Rule 41(1) of the AMMC Rule 2013.
135 Sl. No. 28 and 48 of EC.
136 Dholpahar Stone Permit Area No-1 allotted to the selected bidder for five years for extraction of 50,000 CuM of Stone at offered value of ₹ 2.81 crore.
137 DIG-15C of Digboi.
138 September 2020 to September 2022.

award and the EC was noticed by the DFO, Digboi after lapse of one year and he requested (August 2021) the SEIAA to provide further EC in this regard. Audit noticed that in the meantime, the permit holder extracted the entire quantity within one year[139]. This resulted in violation of the conditions of the EC and guidelines for scientific mining.

- In Dhubri Division[140], it was noticed that against an MCA, an EC was accorded (August 2017) for extraction of 50,000 cum of stone during the five year period 2018-23. In the meantime, the DFO issued government permits for extraction of 65,206 cum of stone from the MCA without obtaining EC for the additional quantity. As a result, a total of 87,706 cum[141] stone was extracted from the MCA within two years (08 June 2018 to 07 August 2020). Thus, extraction of 65,206 cum of stone without EC was not only unscientific mining but also posed a threat to the environment.

The following photographs taken from Google Earth Application depict the effects of unscientific mining leading to reduction in forest cover and degradation of environment in and around MCAs over the years.

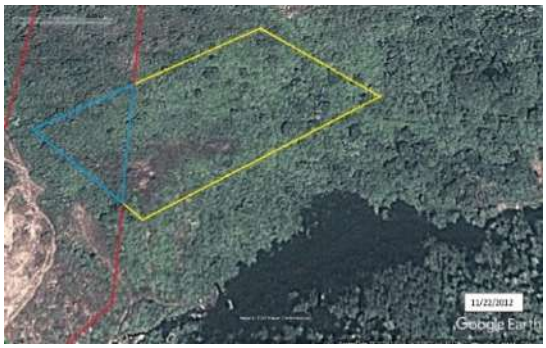
Image in the year 2012 of Moderatoli Stone Mahal No.2 under Nagoan South Division	Image in the year 2021 of Moderatoli Stone Mahal No.2 under Nagoan South Division
	


Image in the year 2012 of Moderatoli Stone Mahal No.4 under Nagoan South Division	Image in the year 2021 of Moderatoli Stone Mahal No.4 under Nagoan South Division

[140] Tokrabandha Hill Stone Quarry No. 02.
[141] 22,500 CuM of stone by MC holder and 65,206 CuM stone by permits to Government agencies.

Image in the year 2012 of Bipin Stone Mahal under Nagoan Division	Image in the year 2020 of Bipin Stone Mahal under Nagoan Division

On this being pointed out, the M&M Department stated (January 2023) that in case of violation of terms and conditions of the mineral concession agreement and norms of mining operation, the PCCF & HoFF, Assam may take appropriate action as per provisions of Rules 55, 56, 57,63 and 64 of the AMMC Rules, 2013. The reply points towards lack of coordination between the line departments.

Recommendation:-*The Government may issue necessary instructions to ensure that no MCA is operated without valid EC to safeguard environmental aspects. Responsibility needs to be fixed against the erring officials for allowing extraction of minerals without requisite clearances.*

4.3.13 Collection of Revenue and other dues

4.3.13.1 Security Deposit

The AMMC Rules, 2013 stipulate that the successful bidder is required to deposit security money equal to 25 *per cent* of the annual bid value prior to execution of agreement. Further, the Rules also provide for enhancement of the annual bid value by 25 *per cent* on expiry of each block of three years along with deposit of balance amount of security to upscale the security amount. The shortcomings noticed during the course of audit are discussed in the succeeding paragraphs:

- **Short realisation of Security Deposit**

Audit noticed that in three divisions (out of 11 selected divisions) in 32 cases, the security deposits were collected at rates ranging between zero *per cent* to six *per cent* instead of 25 *per cent* as stipulated in the Rules, which resulted in short realisation of ₹ 32.28 lakh **(Appendix-XXXV)**. However, in the other eight divisions security deposits were collected at the prescribed rate. Audit further noticed that out of these 32 cases, security deposits in two cases[142] of Nagaon South Division were forfeited due to default in payment of contract money. Thus, due to less realisation of security money, the Government failed to forfeit revenue of ₹ 6.16 lakh.

[142] Two MCAs of Nagaon South Division namely (i) Doboka Ordinary Sand Mining Unit-3 and (ii) Doboka Ordinary Sand Mining Unit-4.

- **Non-enhancement of Security Deposit**

Audit noticed that in four out of 11 selected divisions security deposits in 19 cases were not enhanced as per Rules *ibid*, which resulted in short realisation of security money of ₹ 35.99 lakh (detailed in **Appendix-XXXVI).** Audit further noticed that out of 19 cases, security deposit in three cases[143] were forfeited due to default in payment of instalments. Thus, due to failure to enhance the security deposit, the Government failed to forfeit deposits of ₹ 8.24 lakh.

- **Security Deposit not deposited in Government Account**

The AMMC Rules, 2013 do not specify the manner of collection of security deposits as well as deposit of security deposit in the Public Account. Audit noticed that in the selected 11 divisions, 105 MC holders deposited security deposit of ₹ 4.29 crore in the form of demand drafts. Audit scrutiny revealed that neither were these demand drafts deposited into Government Account nor were re-validated after expiry of the validity period. The details are shown in **Table 4.10**.

Table 4.10: Statement showing amount of collected as Security Deposit

Sl. No.	Name of Division	Number of MCAs in operation	Amount of Security Deposit collected (in ₹)
1	Baksa	16	14,88,969
2	Dhansiri	27	50,86,430
3	Dhemaji	4	49,53,757
4	Dhubri	8	37,24,769
5	Dibrugarh	9	33,30,029
6	Digboi	10	28,90,189
7	Golaghat	4	23,19,643
8	Hamren	3	4,44,438
9	Karimganj	9	48,06,268
10	Nagaon	9	84,41,115
11	Nagaon South	6	54,06,000
Total		**105**	**4,28,91,606**

Audit noticed that Department of Finance, GoA issued instructions (November 2018) to all Works divisions in Assam to deposit the security deposits collected in the Public Account as Civil Deposits. However, similar directive was not issued to DoE&F, GoA for deposit of security deposits under Public Account.

Thus, the Department did not initiate any action to safeguard the Government interest.

On being pointed out, DoE&F, Assam stated (January 2023) that it will not be proper to deposit the SD in Public Account since it is refundable after completion of tenure. The reply of the Department is not acceptable as receipts under Public Account are a liability to the Government and all the deposits are to be deposited into Public Account.

Further, the Department stated that on implementation of online system of collection of government dues, security deposits, *kists* and other dues as per AMMC Rule, 2013 would be monitored in a better way.

[143] Baksa, Dhemaji and Nagaon South Divisions.

Recommendation: *The Government may issue instructions to ensure that security deposits are deposited in Government Account and accounted for in the Public Account.*

4.3.13.2 Revenue Collection from minor minerals

The AMMC Rules, 2013 provide that in case of mining lease/contract, the agreement deed shall be executed and registered[144] within a period of ninety days (or 120 days[145] if the competent authority is satisfied) from the date of issue of Letter of Intent (LoI). In the event of failure to execute the deed of agreement, the "advance dead rent" and "security money" deposited shall stand forfeited. The Rules further provide that the lessee/contractor shall deposit annual dead rent/annual contract money, in four equal instalments in advance. However, in case of permit, the agency/contractor shall be liable to pay royalty in advance.

Rule 38 (6) of AMMC Rules, 2013 also stipulates provisions for levy of interest for delay in payment of instalments beyond seven days from the due dates mentioned in the agreement. In the event of non-payment of instalments within 60 days, there is a provision for termination of the lease/contract agreement. Audit scrutiny showed the following:

- In eight out of 11 selected divisions, nine MC holders did not pay instalments of annual contract money in time. The divisions terminated the mining contracts in respect of these nine MCAs for non-payment of instalments exceeding 60 days from the due date of payment. However, there was delay in termination ranging between 60 days to 195 days. Audit noticed that no mining operation stop order was issued. Further, Audit noticed that against instalment amount of ₹1.48 crore for the defaulted period, the Department could realise ₹ 44.33 lakh through forfeiture of security deposit and the balance amount of ₹1.04 crore remained unrealised (January 2023) (**Appendix-XXXVII**).
- Further, Audit noticed that eight MC holders of Dhansiri Division failed to pay the full amount of quarterly instalments, which ranged between one to eight instalments involving an amount of ₹ 56.23 lakh till March 2022 (**Appendix-XXXVIII**). However, the Department neither took any action to terminate the contracts nor realised the amount from the MC holders as per the provisions of the Rules *ibid*.

On being pointed out, DoE&F, Assam stated (January 2023) that due to implementation of online process there is no scope for delay in deposit of royalty. The Department was however, silent on the action taken against the defaulters.

4.3.13.3 Renewal of MCA

As per Rule 20 (3) of the AMMC Rules, 2013, while according approval to the renewal of a contract, the annual contract amount shall be increased by an amount of 25 *per cent*

[144] Rule 17 and 22.

[145] Provided that where the competent authority is satisfied that the LoI holder/contractor is not responsible for the delay in execution of the agreement, the competent authority may, for the reasons to be recorded in writing permit the execution of the contract agreement deed beyond a period of 90 days but not exceeding 120 days of the expiry of the aforesaid period.

over the amount of contract money payable in the last year of the original contract grant. Further, the annual contract amount shall be increased by 25 *per cent* on the expiry of each block of three years.

Audit noticed that while renewing the mining contract of Tokrabandha Hill Stone Quarry No.6 under Dhubri division, the contract money was not enhanced at all as per the Rules *ibid*. Further, the Division enhanced the contract value at the rate of 15 *per cent* of the last annual contract value for a block of two years instead of 25 *per cent* of the last annual contract value for a block of three years as provided in the AMMC Rules, 2013. This resulted in short realisation of contract money of ₹ 17.37 lakh in the instant case as detailed in **Table 4.11**.

Table 4.11: Short realisation of contract money

Extraction period	Year	Quantity of Stone extracted (in cum)	Revenue Realised (in ₹) per cum	Total Revenue Realised (in ₹)	Revenue realisable (in ₹) per cum	Total Revenue realisable (in ₹)	Short realisation of government revenue (in ₹)
(1)	(2)	(3)	(4)	(5) = (3)*(4)	(6)	(7) = (3)*(6)	(8) = (7) – (5)
Previous	2016	6,000	323	19,38,000	323	19,38,000	0
Renewed	2017	5,000	323	16,15,000	404	20,20,000	4,05,000
	2018	6,000	371	22,26,000	404	24,24,000	1,98,000
	2019	6,000	371	22,26,000	404	24,24,000	1,98,000
	2020	6,000	427	25,62,000	505	30,30,000	4,68,000
	2021	6,000	427	25,62,000	505	30,30,000	4,68,000
Total							**17,37,000**

In reply, Dhubri division stated that the enhancement of contract value at the rate of 15 *per cent* for each block of two years was greater than the enhancement contract value at the rate of 25 *per cent* for each block of three years. However, the justification provided by the Division is factually incorrect as the decision of the Division led to a loss of Government revenue as detailed in the above table.

On being pointed out, DoE&F, Assam stated (January 2023) that due to implementation of online process there is no scope for delay in deposit of royalty. The Department was however, silent on the action taken against the defaulters.

4.3.13.4 Registration of Agreement

AMMC Rules, 2013 provide that a mineral concession granted under the Rules shall commence from the date of execution of the agreement and all lease deeds or contract agreements effective for a period of 11 months or more shall be duly registered with the Registrar. All expenditure on registration of the lease deed or contract agreement shall be borne by the concession holder. However, audit observed that in the 11 selected divisions, only 45 out of 105 contract agreements under three divisions[146] were registered. Therefore, 60 mining contract agreements in the other eight divisions[147] were not registered, which not only made those contracts legally unenforceable in the

[146] Baksa, Dhansiri and Nagaon.
[147] Dhemaji, Dhubri, Dibrugarh, Digboi, Golaghat, Hamren, Karimganj and Nagaon South Divisions.

event of any default but also led to loss of Government revenue in the form of stamp duty and registration fee.

The PCCF & HoFF stated that considering the minor minerals as goods, stamp duty cannot be levied. However, the Judicial Department, GoA viewed (April 2022) that being the nature of a lease, the mining lease/contract agreement would come under the scope of 'Entry 35' of Schedule 1 of the Indian Stamp Act, 1899.

On being pointed out, DoE&F, Assam stated (January 2023) that necessary instructions had been issued to respective DFOs for registration of all agreements.

Recommendation: *The Government may ensure that all MCAs are registered in keeping with the extant provisions of Stamp Act, and take strict action against operation of MCAs without registration of contract agreement.*

The above indicates shortcomings in implementation of AMMC Rules.

4.3.13.5 Short realisation of royalty from *Patta* land

As per Rule 5(5) of the AMMC Rules, 2013[148], a private landowner having clear title on the record of rights (*Jama bandi*) over a periodic *patta* land[149] is allowed to carry out mining operation in his periodic *patta* land up to a depth of 1.5 meters and sell minor minerals mentioned in Schedule Y[150] only, by paying 1.5 times of royalty of minerals as per the Rules laid down. Government of Assam had notified[151] the rate of royalty[152] on minor minerals in June 2015.

Out of available records of five divisions[153], in two divisions[154], audit noticed that the royalty for extraction of minor minerals from *patta* land was realised at the pre-revised rate. This resulted in short realisation of royalty of ₹ 9.54 lakh as detailed in **Table 4.12**:

Table 4.12: Short realisation of royalty for extraction of minor minerals from *patta* land

Name of Division	Type of Minor Minerals	Period	Quantity (in CuM)	Notified rate of royalty (in ₹)	Royalty to be realised (in ₹)	Royalty realised (in ₹)/@ per cum	Short realisation of Royalty (in ₹)
Baksa	Earth	July 2019 to August 2021	12,870	45	5,79,150	3,95,100	1,84,050
	Stone		5,950	300	17,85,000	11,90,000	5,95,000
Dhansiri	Sand		2,500	210	5,25,000	3,50,000	1,75,000
Total							**9,54,050**

In reply, the DFOs stated that demand notice would be issued to the concerned persons at the earliest to realise the same.

148 Amended vide Government of Assam's notification No. PEM.47/2018/16 dated 26 October 2018
149 Status of any land settled for longer tenure with right to transfer which is not in case of Annual or Short Lease *Patta*.
150 Schedule Y contains name of Minor Minerals *viz*., Sand, Gravel, Stone, Boulder, Brick Earth, *etc*.
151 Notification No. PEM.83/2009/Pt-VII – A/39 dated 17 June 2015.
152 Rate of Royalty of Earth is ₹ 30 per cum, Sand is ₹ 140 per cum and Gravel/ Stone/Boulder is ₹ 200 per cum.
153 Baksa, Dhansiri, Nagaon, Golaghat and Karimganj divisions.
154 Dhanisri and Baksa Division.

Similar observations in respect of DFO, Nagaon had featured in Report of the CAG (Revenue Sector) for the year ended March 2019.

On being pointed out, DoE&F, Assam stated (January 2023) that DFOs being the competent authority would take necessary action for realisation of outstanding revenue.

4.3.14 Rehabilitation and Restoration Funds

➢ ***Mines and Mineral Development, Restoration and Rehabilitation***

The AMMC Rules, 2013 provide for realisation of Mines and Mineral Development, Restoration and Rehabilitation (MMDRR) Fund at the rate of 10 *per cent* (as other charges). The GoI amended (March 2015) the MMDR (Amendment) Act, 2015 and empowered the State Governments to establish District Mineral Foundation (DMF) in each district affected by mining related operations under Section 9B of MMDR Act, 1957. Section 15A of the Act empowers the State to prescribe the payment and collect funds for DMF in case of minor minerals. However, no rate of contribution was specified in the Act. Further, the DMF fund was to be utilised through Pradhan Mantri Khanij Khsetra Kalyan Yojna (PMKKKY), which was launched (September 2015) by GoI. Accordingly, the GoA approved for constitution of District Mineral Foundation Trust (DMFT) in all the districts including Sixth Schedule areas of the State. The GoA also notified (December 2017) the rate (10 *per cent*) of contribution to the DMFT by the holder of concession related to minor minerals.

Thus, presently in Assam, two funds are simultaneously applicable for restoration and rehabilitation of areas affected by extraction of minor minerals namely, MMDRR Fund and DMFT fund. The difference between both the funds are detailed in **Table 4.13**.

Table 4.13: Difference between DMFT and MMDRR Fund

DMFT	MMDRR Fund
(i) The objective is to work for the interest and benefit of persons and areas affected by mining related operations.	(i) The objective is only rehabilitation of flora and fauna including other vegetation such as trees, shrubs, *etc*. destroyed by quarrying or mining operation.
(ii) Introduced vide Section 9B and 15(4) of the MMDR Act, 1957 by GoI[155].	(ii) Introduced vide Rules 58 to 62 of the AMMC Rules, 2013 by GoA
(iii) It is a Trust maintained at District level and fund realised is kept in Savings account.	(iii) It is a State level fund to be kept under 'Public Account' of the State.
(iv) The fund has to be managed by the District authorities (non-profit body) constituted by GoA under Section 9 B(1) of the MMDR (Amended) Act, 1957.	(iv) The fund has to be managed/utilised by the State level Committee constituted by GoA under AMMC Rules, 2013.
(v) The amount/contribution deposited by the mineral concession holder is non-refundable.	(v) The expenditure made towards restoration and rehabilitation works as part of progressive mine closure plan by the mineral concession holder shall be reimbursed out of this Fund to the extent of actual expenditure subject to such re-imbursement being limited to the amount contributed by him. Any expenditure incurred over and above this limit shall have to be borne by the mineral concession holder from his own account.

[155] Notification No. PEM. 40/2015/100 dated 26.8.2016 and PEM.40/2015/101 dated 26.8.2016.

4.3.14.1 Non-creation of Head of Account under Public Account for MMDRR fund

As per Rule 58 of the AMMC Rules, 2013 the 'MMDRR' shall be established under 'Public Account' in the State of Assam under the administrative control of the Department to which rehabilitation charge is payable under clause (i) of sub section (1 A) of Section 15 of the Act.

Further, an amount equal to 10 *per cent* of the dead rent or royalty or contract money is to be collected from the MC holders and deposited in the Public Account as mentioned in Rule 59(1) of the AMMC Rules, 2013.

Audit noticed that action for creation of appropriate Head of Account under 'Public Account' of the State was neither initiated by the concerned departments *i.e.*, the Director of Mines & Minerals/DoE&F, GoA nor by the Finance Department, GoA till March 2022. In absence of a specific head of account, the MMDRR fund contribution was being collected through 'Demand Draft' and was being deposited in the savings bank accounts of the respective DFOs. Therefore, in spite of specific provision for creation of a separate head under Public Account in the AMMC Rules, the same was not done even after a lapse of eight years from the implementation of the Rules.

Further, audit noticed that Mines and Mineral Department, GoA had directed (November 2017) the PCCF & HoFF, GoA to transfer the fund already collected under MMDRR to the concerned DMFT. In compliance to the direction issued (October 2017) by the Mines and Mineral Department, 22 Divisions (out of 33 divisions in Assam) had transferred ₹ 16.37 crore (out of total collection of ₹ 22.35 crore till 2019-20[156]) from MMDRR fund to DMFT fund. However, it is evident as per the current enactments that the objective of both the funds are different and funds are collected under the two separate provisions. Thus, merger of both funds without amendment of the AMMC Rules, 2013 is irregular.

On being pointed out, the M&M Department, Assam replied (January 2023) that the concerned authorities would take necessary action for creation of a head of account under Public Account for deposit of MMDRR contribution in respect of minor mineral included under 'X' Schedule and 'Y' Schedule. Further, DoE&F, Assam stated that bank account for depositing MMDRR fund had already been notified in December 2011. The reply of DoE&F, Assam is not acceptable as the AMMC Rules, 2013 did not provide any scope for operation of bank account for the Fund.

4.3.14.2 Collection of MMDRR fund

Audit noticed from the information furnished by the Department relating to the total collection of MMDRR funds and balance thereof with the Department, that during the period from 2013-14 to 2019-20, an amount of ₹ 26.42 crore was collected towards MMDRR from 25 divisions against realisable amount of ₹ 41.80 crore towards MMDRR fund (*i.e.*, 10 *per cent* of total revenue collection of ₹ 417.97 crore). Thus, there was an overall short-collection of ₹ 15.38 crore towards MMDRR fund. Further,

[156] PCCF & HoFF, Assam did not provide information for the year 2020-21 though called for.

audit analysed the MMDRR funds collected by eight selected divisions and noticed that there was also short collection of ₹ 2.35 crore towards MMDRR fund as detailed in **Appendix-XXXIX**.

Audit also noticed that in seven divisions[157], there was short realisation of MMDRR fund amounting to ₹ 3.04 crore due to non-collection of MMDRR fund from different permit holders (**Appendix-XL**).

Thus, due to non-compliance of AMMC Rules, 2013 by the divisions, an amount of ₹ 3.04 crore of MMDRR fund was short realised.

Similar observations in respect of DFOs, Dhemaji, Nagaon and Dhubri had featured in Report of the CAG (Revenue Sector) for the year ended March 2018.

On being pointed out, DoE&F, Assam stated (January 2023) that Government Departments had not deposited the MMDRR fund collected by them. Further, AMMC Rules, 2013 has been amended (October 2021) to collect MMDRR fund and DMFT fund along with royalty on minor minerals.

4.3.14.3 Constitution of committee for utilisation of MMDRR Fund

As per Rule 62 (1), GoA is required to constitute a Committee headed by Secretary of Department of Mines and Minerals and comprising representatives from Departments of Mines and Minerals, Finance, E&F, Health, Education, Panchayat and Rural Development and Social welfare.

Audit noticed that though the PCCF & HoFF requested (November 2016) the Secretary, DoE&F, GoA and followed it up in March 2021 for constitution of a committee for utilisation of MMDRR fund, no such Committee has been constituted till March 2022. Thus, due to non-constitution of the Committee, the fund could not be utilised except under Sixth Schedule areas. This indicates that the AMMC Rules were not fully implemented even after lapse of eight years of its implementation and the restoration and rehabilitation works was not carried out as per progressive mine closure plan. In absence of the recognised Committee, the Divisions irregularly utilised the fund for other purposes as discussed below:

- Audit noticed that in Dhansiri and Baksa Divisions, the DFOs had withdrawn ₹ 1.02 crore[158] from the respective savings bank account for creation of plantation at river bank, repairing of vehicle, *etc*. However, the DFOs could not produce vouchers in support of such expenditure.

[157] Digboi, Golaghat, Dhansiri, Baksa, Karimganj, Hamren and Nagaon South Divisions.
[158] Dhansiri Division = ₹ 66.50 lakh and Baksa = ₹ 35.00 lakh.

- In another case, the DFO, Dibrugarh Division refunded the MMDRR fund of ₹ 10.06 lakh[159] to three contractors after completion of mining permit period in contravention of the provision guiding collection of MMDRR as per the AMMC Rules, 2013.
- In Dibrugarh Division, the DFO irregularly adjusted ₹ 12.57 lakh[160] from MMDRR fund against the defaulted contract money of the three permit holders.

Thus, the DFOs of Dhansiri, Baksa and Dibrugarh Divisions had irregularly withdrawn and spent ₹ 1.24 crore of MMDRR fund.

On being pointed out, DoE&F, Assam stated (January 2023) that proposal for formation of the committee for utilisation of MMDRR fund had already submitted to the Cabinet.

Recommendation: *The Government may consider immediate creation of a head of account under Public Account and formation of a committee for utilisation of MMDRR fund as per AMMC Rules, 2013.*

➢ *District Mineral Foundation Trust*

Section 15 A of the MMDR Act, 1957 (amended in 2015) provides that the State Government may prescribe the payment of specified amounts by all holders of concessions related to minor minerals to the DMF of the district in which the mining operations are carried on. Accordingly, GoA had constituted district level trust in all districts of Assam (including Sixth Schedule area) and fixed 10 *per cent* of the contract amount to be collected from the MC holders and deposited in the respective DMFT.

Further, the Central Government directed[161] (16 September, 2015) to utilise DMF in accordance with the guidelines of PMKKKY. GoA introduced (October 2020) Assam District Mineral Foundation (Trust) Rules, 2020 for regulating the composition and functions of DMFT.

159

Sl. No.	Name of MPA	Name of MPA holder	Period of settlement	Settled value	MMDRR realised	MMDRR released to MP holder
1	DBR/Jeypore/6	Sri Polash Phukon	2013-15	18,61,000	1,86,100	1,86,100
2	DBR/Jeypore/1	M/S ASCON	2013-15	42,00,000	4,20,000	4,20,000
3	DBR/Jeypore/4	Sri Prakash Baruah	2013-15	39,99,490	3,99,949	3,99,949
Total (in ₹)						**10,06,049**

160

Sl. No.	Name of MPA	Name of MPA holder	Period of settlement	MMDRR forfeited with adjustment of defaulted amount
1	MPA No. DBR/12	Shri Joyanta Gogoi	2014-16	5,00,000
2	MPA No. DBR/15	Shri Debajit Borgohain		4,00,000
3	MPA No. DBR/19	Smt. Deepshikha Dutta		3,56,712
Total (in ₹)				**12,56,712**

161 Under Section 20 A of the MMDR Act *i.e.*, power of the Central Government to issue directions.

4.3.14.4 Regulation of DMFT fund

Audit noticed the following discrepancies:

- Though GoA notified contribution towards the DMFT in case of minor minerals in December 2017, the AMMC Rules are yet to be amended specifying the contribution from minor minerals towards DMFT
- Out of 11 districts, DCs[162] of seven districts furnished information relating to amount of fund collected towards DMFT and expenditure incurred from the same. Information furnished by the DCs in respect of accounting of DMFT fund was compared with the information furnished by the concerned DFOs[163] relating to collection towards DMFT fund and it was noticed that there was a mismatch between fund collected and fund accounted for as shown in **Table 4.14**:

Table 4.14:-Details of fund collected and fund accounted in 11 selected districts

(₹ in lakh)

Sl. No.	Name of District	DMFT collected and transferred (to DMFT account) by DFOs	MMDRR fund transferred to DMFT Account	Expenditure incurred from DMFT by DCs	Availability of DMFT funds with DCs		Discrepancy between what DMFT fund should be and what is actually available
					should be	Actual	
1	Baksa	22.10	0.00	0.00	22.10	34.55	(-) 12.45
2	Dibrugarh	8.57	106.08	0.00	114.65	111.39	3.26
3	Golaghat	5.53	36.80	0.00	42.33	28.81	13.52
4	Karimganj	157.75[164]	0.00	0.00	157.75	35.63	122.12
5	Tinsukia	2.76	67.15	0.00	69.91	81.53	(-) 11.62
6	Nagaon South	58.76	100.16	NA	158.92	NA	
7	Dhansiri	0.00	0.00	0	0	0	
8	Hamren	53.27	0.00	NA	53.27	NA	

NA: Not Available

From the above table, it may be seen that in three Districts[165], there was short availability of funds to the tune of ₹ 1.39 crore as compared to the funds collected and transferred to the DC concerned. The authorities concerned need to reconcile the balances and take appropriate action against the erring officials in case of excess/shortfall in the balances.

On this being pointed out, DoE&F, Assam stated (January 2023) that DMF funds are handled by the concerned Deputy Commissioners. The Department was however, silent about the reason for short accounting of DMF fund.

4.3.14.5 Delay in implementation of DMFT

GoA had issued instructions (December 2017) to realise 10 *per cent* of the contract amount from the MC holders and transfer the same to respective DMFT.

---

[162] Four DCs of Nagaon, Hojai (Nagaon South division), Karbi Anglong West (Hamren division) and Dhemaji did not furnish information relating to DMFT fund.

[163] Three DFOs of Dhubri, Nagaon and Dhemaji did not furnish information relating to DMFT fund.

[164] Includes two districts namely Cachar and Karimganj.

[165] Dibrugarh, Golaghat and Karimganj Districts.

- Audit observed that in selected 11 divisions[166], ten divisions had realised DMFT fund from April 2018 from the MC holder except in Dhansiri division.
- Audit also noticed that in one division[167], there was short realisation of DMFT fund amounting to ₹ 21.84 lakh **(Appendix–XLI)**

On this being pointed out, DoE&F, Assam stated (January 2023) that the matter relates to concerned Deputy Commissioners.

4.3.14.6 Utilisation of DMFT Fund

The PMKKKY was implemented by the DMFs of the respective districts using the funds collected from major and minor minerals under DMFT.

Audit sought information from the DCs of 11 selected districts regarding expenditure incurred from DMFT fund. Audit received information from seven DCs and noticed that DC, Dhubri had incurred an expenditure of ₹ 39.39 lakh, however, the other six DCs had not utilised the DMFT fund. The details of expenditure were not provided by DC, Dhubri though called for.

On this being pointed out, DoE&F, Assam stated (January 2023) that the matter relates to concerned Deputy Commissioners.

Recommendation: *The Government may set up a mechanism for accounting of DMFT fund under both major and minor minerals separately with periodical reconciliation of the same.*

4.3.15 Extraction and Transportation of minor minerals

Rule 54 of the AMMC Rules, 2013 provides that the extraction of minor minerals should take place only in accordance with the terms and conditions of the environmental clearance, methods of extraction as specified in the agreement, mining plan and EC certificate.

➢ Transportation of minor minerals

Transportation is a vital step in the value chain of mining of minor minerals, which needs to be regulated to ensure transparency and better control over illegal operations.

The AMMC Rules, 2013 provide for "mineral transit pass" which are issued by the competent authority to the lease/contractor/permit holder for lawful despatch and transportation of any minerals raised from the concession area. Transportation of minor

166

Sl. No.	Name of Division	Year for which DMFT collected	Sl. No.	Name of Division	Year for which DMFT collected
1	Dhansiri	Nil	7	Karimganj	2018-19
2	Baksa	2020-21	8	Dibrugarh	2019-20
3	Nagaon South	2018-19	9	Dhubri	2019-20
4	Golaghat	2020-21	10	Nagaon	2020-21
5	Digboi	2020-21	11	Dhemaji	2018-19
6	Hamren	2019-20			

167 Dhemaji Division.

minerals without a valid mineral transit pass would be treated as violation of the provision of the Rules. The PCCF & HoFF instructed (May 2020) to ensure issuance of transit passes for minor minerals only in respect of transport vehicles fitted with location tracking device to be effective from 1st June 2020. The installation of location tracking device is imperative for online monitoring of such vehicles used in transportation of minor minerals to prevent pilferage and loss of Government revenue.

Audit noticed the following irregularities relating to transportation of minor minerals:

4.3.15.1 Transportation of minor minerals through invalid vehicles

Audit examined 630 numbers of transit passes issued in respect of 12 MCAs of six divisions[168] during May 2016 to November 2020 for transportation of 2,977 cum of minor minerals. These transit passes involved use of 263 vehicles. Audit cross-verified the details of these 263 vehicles with VAHAN database of Transport Department and observed that 208 vehicles were goods carriers which are able to transport minor minerals. In case of the remaining 55 vehicles, details of seven vehicles were available in the VAHAN database and were not found suitable for transportation of minor minerals. Further, details of 48 vehicles were not even available in the VAHAN database. The details of these 55 vehicles are shown in **Table 4.15**.

Table 4.15: Vehicles utilised for transportation of minor minerals

Particulars	Number of vehicles
Ambulance (LPV)	1
Excavator (Commercial)(HGV)	1
Motor Car (LMV)	2
Three Wheelers (Passenger)	3
Vehicle details not found in VAHAN	48
Grand Total	**55**

Thus, issue of transport passes using registration numbers of ambulance, three wheelers, *etc*. raises doubts on the effectiveness of the controls over proper movement of mineral bearing vehicles, raising the possibility of illegal mining.

On this being pointed out, DoE&F, Assam stated (January 2023) that presently vehicles for transportation of minor minerals are being registered through an online process, hence scope of using invalid vehicles is remote.

4.3.15.2 Utilisation of transit challans

The transit challan contains vital information like name of MCA, vehicle numbers, quantity, *etc*.

In Assam, as per practice, books of transit challans were issued by the Division to the MC/permit holders, who submitted counterfoils of challans utilised for transportation of minerals to the Division for verification. In this regard, audit noticed the following:

- In six[169] out of 11 divisions, transit passes were issued for different quantities of minerals extracted ranging between 1 cum to 15 cum without verifying the

[168] Baksa, Dhemaji, Golaghat, Karimganj, Dhubri and Nagaon Division.
[169] Baksa, Dhemaji, Golaghat, Karimganj, Nagaon and Dhubri Division.

carrying capacity of the vehicles. For instance, the capacity of a dumper was 10 cum against which transit passes were issued for two/five cum leaving scope for illegal transportation of minor minerals in excess of the permitted quantity. In Karimganj Division, it was noticed that in three cases, the quantity of minor minerals being transported was lower than the capacity of the vehicles as mentioned in the e-Transit Passes.

- Further, in two divisions[170], audit noticed that 16,625 transit challans were issued to transport 60,750 cum of sand to three MC holders. However, 83,125 cum of sand was transported by the MC holders which led to excess extraction and transportation of 22,375 cum involving value of ₹ 64.04 lakh (Details in **Table 4.16**).

Table 4.16:-Details of excess extraction of minor minerals

Name of Mahal	Period	No. of Royalty (*Kist*)/Bid Value (₹)	Stipulated Quantity up to 12th *kist* (in CuM)	Transit Challan issued	Quantity of Minor Mineral extracted (in CuM)		Rate per CuM	Amount in excess extraction (in ₹)
					Actual	Excess

On this being pointed out, DoE&F, Assam stated (January 2023) that at present, challans are being generated online which consist of details of MCA, vehicle number, quantity, *etc*. hence, scope of misappropriation of quantity is remote. However, Department's reply is silent about the loss of revenue due to excess extraction of minor minerals.

Recommendation*: The Government may consider putting in place a mechanism for proper monitoring of transportation of minor minerals.*

4.3.16 Illegal mining

The demand for minor minerals continues to increase day-by-day as building and construction of new infrastructure and expansion of existing ones continues, thereby placing immense pressure on the supply of minor minerals, and encouraging illegal mining. To restrict illegal mining, the MMDR Act, 1957 provides under Section 21 that any mineral raised and transported without any lawful authority from any land shall be liable to be seized. Further, Section 23 of the Act authorised the State Governments to make rules for preventing illegal mining, transportation and storage of minerals and for the purposes connected therewith.

[170] Dhubri and Golaghat Division.

The AMMC Rules, 2013 also made provisions for registering and compounding[171] offence cases against illegal or unauthorised mining *i.e*., mining operations without a valid mineral concession granted under the Act and the rules framed thereunder.

4.3.16.1 Non-issuance of stop of mining operations order

The AMMC Rules, 2013 made provisions[172] for issue of stop order for extraction and despatch of minor minerals in case the concession holder fails to deposit the due amount within a period of thirty days of the due date along with interest thereon.

Audit noticed that in four[173] out of the 11 selected divisions, 17 MC holders failed to deposit their due amounts (instalments) of ₹ 2.04 crore within the stipulated period of 30 days (deposited after 121 to 255 days), however, no stop order had been issued by the authority.

On this being pointed out, DoE&F, Assam stated (January 2023) that now payment and notices are triggered online as such, there is no scope of delay in depositing royalty, *etc*.

4.3.16.2 Illegal operation of Minor Mineral concessions:

Some instances of illegal mining and transportation noticed by Audit from the divisional records are as under:

1) In Baksa division, the MCA *viz*., Khagrabari Stone and Sand Gravel (settled in September 2015) was terminated (January 2021) due to non-payment of quarterly instalments[174] from July 2020 onwards. However, there were instances of extraction (January-February 2021) of 1,104 cum of minor minerals at the same area of Khagrabari, which was seized by the officials of Baksa division.

2) In Dibrugarh division, the MCA *viz*., DBR 18 on Buridehing river remained idle during December 2013 to January 2017. However, during the idle period the EE, Irrigation, Dibrugarh informed (November 2015) the DFO, Dibrugarh division that extraction of sand was in progress, which obstructed the course of Buridehing River. Further, the Officer in Charge of Tengaghat Police Station had seized (February 2020) three vehicles carrying sand and sand gravel based on a public complaint relating to illegal extraction and selling of sand from Buridehing river coast. Due to the instances of illegal extraction of minerals from the area, the DFO requested (December 2020) the SP, Dibrugarh for enquiry and to make arrangements to stop illegal mining.

---

171 (i) for a first-time violation, the said mineral shall be liable to be seized which may be released only upon realisation of the payment of (a) price of the mineral and (b) the applicable royalty for the mineral extracted and in addition, a fine which shall not be less than (c) Ten Thousand rupees;
(ii) for a second time violation, the said mineral shall be liable to be seized which may be released only upon realisation of the payment of (a) price of the mineral and (b) the applicable royalty for the mineral extracted and, in addition, a fine which shall not be less than (c) fifteen thousand rupees;
(iii) wherever a person is found to be indulging in such offence for the third time or more, the officer concerned shall register an FIR.

172 Rule 38 (7) of AMMC Rule, 2013.

173 Nagaon, Baksa, Golaghat and Dhansiri.

174 19th instalment.

3) In Nagaon South Division, the Range officer submitted a report (February 2019) to the DFO mentioning illegal extraction of minor minerals from different areas (15 sand *ghats*) in and around the Doboka Sand Mining Area- 1 & 2.

4) In three MCAs *viz*., Modertoli Stone Mining Unit -2, 3 & 4 under the Nagaon South division, an enquiry was carried out by the ACF who reported (October 2020) that there was illegal transportation of minor minerals using dumpers from these MCAs; however, further action taken was not on record.

The above instances are indicative of illegal extraction and transportation of minor minerals.

On this being pointed out, DoE&F, Assam stated (January 2023) that steps are being taken to operationalising the idle MCAs to minimise illegal mining.

4.3.16.3 Provisions for extraction of minor minerals for Government works

Rule 63 of the AMMC Rules, 2013 provides that any mining operation without valid authorisation shall be deemed to be indulging in illegal or unauthorised mining and shall be dealt in accordance with the provisions contained in Rule 64 of the Rules *ibid*. Rule 64 stipulates that in case of first time violation, the illegal/un-authorised extracted minerals shall be liable to be seized and may be released only upon realisation of payment of price of minerals and applicable royalty in addition to a fine not less than ₹ 10,000.

Audit noticed that in Dhemaji division, during the period 2019-20, in 51 offence cases, 2,21,110 cum of illegally extracted minor minerals[175] had been seized. Of these 51 offenders, two were existing MC holders[176] and 12 were Government contractors.

However, the division did not initiate any steps either against MC holders or against the Government contractors as per provisions made under AMMC Rules, 2013.

Audit further noticed that in these 51 cases, the CCF & Nodal Officer (FC Act), Assam instructed[177] (July 2019) the CF, Northern Assam Circle to compound the cases by retaining the seized materials as government property and realise an amount equal to 25 *per cent* of price of seized minor minerals or ₹ 10,000, whichever is more, from the claimant/ offender. Further, the CCF directed to dispose of the seized materials by granting permits for various Government works against valid indents and also stated that such action should not become a precedent and inducement for carrying out illegal mining in future.

However, the decision taken by CCF was not in compliance with Rule 64 of AMMC Rules, 2013. Rule 64 required that the offender be made to pay the market price as well as the royalty on the amount seized. Instead, the CCF decided to retain the seized material and levy a penalty of only 25 *per cent* of the royalty, thereby leading to short

---

175 Sand and gravel.

176 (1) Sri Joy Kr. Basumatary-Upper Subensiri Sonapur S&G MC holder (2) Sri Debojit Gogoi- Upper Subensiri Tamuli S&G MC holder.

177 Provisions made under Section 23A read with Section 21 of the MMDR Act 1957 read with Rule 64 and 74 of the AMMC Rules 2013 and Govt. notification No FRM. 300/2012/321 dated 17-05-2013.

realisation of the balance 75 *per cent* of the total royalty[178], amounting to ₹ 3.19 crore, which would have ordinarily been leviable under Rule 64.

In all other cases pertaining to four out of the 11 selected divisions examined by audit, it was noticed that the DFOs had released the seized materials to the offenders only on realisation of penalty of *cent per cent* price of minerals, royalty and applicable fine as stipulated under Rule 64 of AMMC Rules, 2013.

On this being pointed out, DoE&F, Assam stated (January 2023) that as per amendment of AMMC Rules, 2013 (October 2021) certain percentage had been fixed for collection of revenue on project cost basis for developmental works undertaken by the Government and royalty is being deducted from the bills of the contractors. Even if they use illegally collected material in Government works, royalty would be deducted from their bills, and as such, there is no loss of royalty. However, the Department is silent about the environmental implications due to illegal extraction of minor minerals besides levy of penalty for illegal extraction of minor minerals as per provision of AMMC Rules, 2013.

4.3.16.4 Systemic deficiency in regulation of offence cases

The Assam Minor Mineral Concession Rules, 2013 made provisions for restriction of illegal or unauthorised mining by imposing fines of ₹ 10,000, ₹15,000 and FIR against the person involved for similar offence on the first, second and third occasion respectively.

Audit noticed that the selected divisions had not maintained any electronic database of such offence cases. From the 'Offence Case Register' maintained in three divisions[179], audit noticed that 19 cases were compounded considering them as first time offence with collection of ₹ 10,000 in each case, though they had violated the rules more than once. Thus, non-maintenance of any centralised electronic database not only encouraged illegal mining but also resulted in short collection of fines.

On this being pointed out, DoE&F, Assam stated (January 2023) that efforts would be made to maintain an online database of offences.

4.3.16.5 Monitoring Mechanism

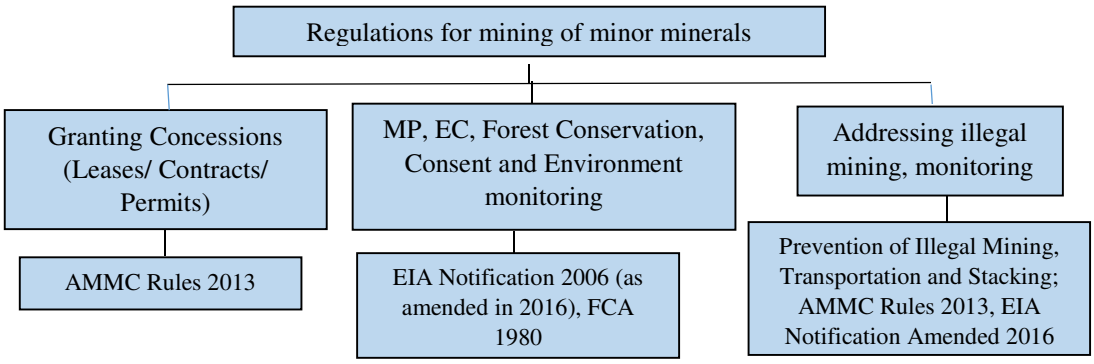
An appropriate monitoring system to monitor the implementation of AMMC Rules, 2013 would not only ensure scientific mining of minor minerals but also ensure correct revenue collection for the State exchequer. To enhance the monitoring system of mining of minor minerals in the country, the Ministry of Environment, Forest & Climate Change formulated the Enforcement & Monitoring Guidelines for Sand Mining, 2020 to serve as a guidance for collection of critical information for enforcement of the regulatory provision(s) and also highlight the essential infrastructural requirements necessary for effective monitoring for sustainable sand mining. Special emphasis is

[178] Total royalty on seized material (Sand at ₹ 140 [27181 cum], Stone at ₹ 200 [104746 cum], Sand-Gravel at ₹ 200 [89184 cum] = ₹ 4,25,91,340.

[179] Nagaon, Dhubri and Dibrugarh.

given on monitoring of the mined-out material, which is key to the success of the environmental management plan.

The flowchart of the overarching regulatory framework for mining of minor minerals is as follows:



4.3.16.6 Requirements & existing monitoring system

The necessary requirements to facilitate effective monitoring and enforcement of regulatory provision for mining of minor minerals in Assam are as follows:

(i) Identification, quantification and feasibility of mining of minor minerals considering various environmental[180] and other factors such as habitation, prohibited area, *etc*.

(ii) As per the recommendation of the Hon'ble Supreme Court (2012), unplanned grant of mining of minor minerals through contracts and permits for shorter periods (mostly for two years) instead of grant of lease for longer period leads to difficulty in regulating and monitoring.

(iii) Mining Plan which connects the mine with all stakeholders is an important document to operate the mine in a scientific manner.

(iv) As per notification issued by MoEF (September 2006), a half yearly compliance report in respect of the stipulated terms and conditions of EC is required to be submitted by the implementing authority to the regulatory authority *i.e.,* SEIAA.

In the light of above, audit observed the following:

a. In order to address the issues *viz*., identification, quantification and feasibility of mining considering various environmental and other factors, more emphasis is required on the preparation of DSR and its format for reporting.

b. There was lack of monitoring in preparation of MPs and their implementation as there is no practice for regular replenishment study to ascertain the rate of depositing and replenishment of the deposits of minor minerals as indicated by the inconsistency in calculation of mineable reserves pointed out in Paragraph 4.3.10.3.

[180] Proximity of protected area, wetlands, creeks, forest, *etc*.

c. With regard to submission of compliance report to SEIAA, none of the selected divisions had submitted the compliance reports to SEIAA. However, non-submission of the compliance reports was neither reported to the Department of Environment & Forest nor to the Department of Mines & Minerals.

d. Instances of illegal mining showed that there was a need for strengthening the system of mineral dispatch and its monitoring. Further, there was a lack of proper monitoring of the transportation of minor minerals.

Thus, it is clear that non-compliance to different provisions of AMMC Rules, 2013 at different levels resulted in lack of accountability of the lessee to any of the monitoring agencies.

On this being pointed out, DoE&F, Assam stated (January 2023) that a new Standard Operating Procedure is being made operational wherein GPS tracking system would be installed to track the movement of vehicles transporting minor minerals.

4.3.16.7 Lack of comprehensive databases

In respect of leases/contracts other than current ones, the implementing Department *i.e.*, the Department of Environment & Forest did not have a comprehensive database, such as their status indicating date of expiry of the contract period, details of renewal application filed, pendency at various stages, demand, collection & balance, *etc*. Due to the absence of a comprehensive database of MCAs, the Department was not in a position to monitor the same properly.

The fragmentation and multiplicity of functions has also led to ineffectiveness in the functioning of regulatory authorities. The requirement of MP and ECs, as brought under different acts, notifications, *etc*. will not help to alleviate the situation with respect to mining of minor minerals.

On this being pointed out, DoE&F, Assam stated (January 2023) that now a comprehensive online database is being maintained.

4.3.16.8 Lack of validation check in online collection system

Audit noticed that government revenue and other dues are collected online *w.e.f.* June 2020. However, there was lack of validation check in the database as it was noticed that though contribution towards MMDRR fund and DMFT fund were calculated in the online system, the prescribed rate was not applied which resulted in short realisation of ₹ 11.35 lakh (**Appendix–XLII**).

On this being pointed out, the M&M Department, Assam stated (January 2023) that necessary action would be taken for validation checks in the online collection system.

4.3.17 Conclusion

Granting of mining areas for shorter period in place of a longer period under mining lease/contract not only increases gap periods between consecutive settlement of MCAs but also encourages the rapid exploitation of mineral without really undertaking adequate measures for reclamation and rehabilitation of mined out area. Further,

non-implementation of cluster approach prevents eco-friendly scientific and sustainable mining especially in case of small river bed mineable areas. Again, the fixation of reserve prices without following a specific method of calculation of reserve price and quality assessment of minor minerals led to abrupt fixation of reserve price. Further, the bidding process repeats due to default in payment of Government dues by the MC holders selected with an exorbitant rate resulted in occurrences of regular gap periods. Moreover, due to lacuna in preparation of mining plans and its monitoring, there were instances of illegal extraction of minor minerals. There was delay in sanction of EC, extraction of minor minerals without ECs, *etc*. Further, lack of appropriate database caused non-realisation, short realisation and non-upscaling of security deposits. Due to non-creation of appropriate head of account under Public Account even after a lapse of eight years, the collected MMDRR fund could not be accounted in govt. accounts and also could not be utilised for the purposes for which the same was provided. While in case of DMFT fund, there were issues like merging of MMDRR fund with the DMFT fund though objectives of both the funds are differed from each other. The fund collected and accounted for under the MMDRR and DMFT needs to be reconciled.

There is thus a strong need to review the AMMC Rules, and for a comprehensive approach for instituting a cohesive, effective and transparent regulatory and institutional framework. Fragmentation and multiplicity that exist in the processes of assessment, granting permissions for mining of minor minerals, and monitoring needs to be addressed comprehensively. To ensure this, convergence must happen in these processes, and responsibilities of various departments and authorities will also have to be consolidated accordingly.

4.3.18 Recommendations

The Government may

i. ***Consider the early finalisation and implementation of the model State Mineral Policy.***
ii. ***Ensure that the DSRs are prepared in a time-bound manner.***
iii. ***Consider inserting a provision for formation of cluster in the AMMC Rules through amendment and implement the same.***
iv. ***Put in place a computerised database to monitor project-wise utilisation of minor minerals by the user departments so as to prevent unauthorised extraction of minor minerals by the contractors.***
v. ***Put in place a mechanism to analyse the bid value and its impact on the market before acceptance so that exorbitant bid values could be discarded.***
vi. ***Put in place a mechanism to assess availability of minerals through Mines and Minerals Department prior to NIT for optimum utilisation of mineral resources.***
vii. ***Insert a provision for requirement of environmental clearance from the State Environment Impact Assessment Authority in the AMMC Rules.***

viii. Consider depositing the security deposits under the Public Account.

ix. Take strict action against operation of MCA without registration of contract agreement.

x. Consider immediate creation of a head of account under Public Account and formation of a committee for utilisation of MMDRR fund as per AMMC Rules, 2013.

xi. Set up a mechanism for accounting of DMFT fund under both major and minor minerals separately with periodical reconciliation of the same.

xii. Consider putting in place a mechanism for proper monitoring of transportation of minor minerals.

CHAPTER-V
REVENUE AND DISASTER MANAGEMENT DEPARTMENT

CHAPTER - V

REVENUE & DISASTER MANAGEMENT DEPARTMENT

5.1 Administration

Management of levy and collection of stamps duty and registration fees is the responsibility of both Government of India (GoI) and the State Government. The Indian Stamp Act, 1899 (IS Act) enacted by GoI prescribes the rates of stamp duty in respect of bills of exchange, cheques, promissory notes, bills of lading, letter of credit, policies of insurance, transfer of shares, debentures, proxies and receipts as specified in Entry 91 of List-I Union list of the Seventh Schedule to the Constitution of India. The states are empowered under Entry 63 of List-II State list of the Seventh Schedule to the Constitution of India to prescribe the rate of stamp duty on instruments other than the instruments specified in Entry 91 of Union list. Receipts from stamp duty and registration fees in Assam are regulated under the IS Act, 1899; the Registration Act, 1908 and Rules made thereunder. Stamp duty is leviable (*ad valorem* or fixed) on value of instruments executed at the rates prescribed from time to time in the IS Act and registration fees is payable at the rates prescribed in the Registration Act, 1908.

At the Government level, the Secretary to Government of Assam, Revenue & Disaster Management Department is responsible for administration of Acts and Rules in the State. The Inspector General of Registration (IGR) is the executive regarding levy and collection of stamp duty and registration fee. The IGR is assisted by Additional Inspector General of Registration and two Assistant Inspectors General of Registration. At the District and sub-divisional levels, implementing officers are Senior Sub-Registrars, Deputy Sub-Registrars and Sub-Registrars.

5.2 Results of Audit

During test-check of records of nine offices and 15 offices (out of total 80 offices and 79 offices) relating to Senior Sub-Registrar, Deputy Sub-Registrar and Sub-Registrar in the State during 2020-21 and 2021-22, Audit noticed deficiencies as shown in **Table-5.1**.

Table 5.1: Results of Audit

Sl. No.	Category	2020-21		2021-22	
		Number of IRs	Amount (₹ in crore)	Number of IRs	Amount (₹ in crore)
1	Short levy of revenue due to under valuation of land	5	1.19	7	0.27
2	In cases of collection of user fees and other irregularities	34	0.01	72	0
Total		**39**	**1.20**	**79**	**0.27**

Compliance Audit Observations

5.3 Under-valuation of sale deeds due to incorrect application of zonal value.

Sub-Registrars of Kamrup (Sadar) and Rangia registered 18 deeds of sale considering zonal value of agricultural class of land instead of zonal value of non-agricultural (Industrial) class of land. This resulted in under valuation of land and consequent short levy of stamp duty and registration fee of ₹ 66.58 lakh.

As per Section 3 (ii) of the Assam Agricultural land (Regulation of Re-classification and Transfer for Non-Agricultural purpose) (AALR) Act[181], 2015, no agricultural land shall be transferred for intended non-agricultural purposes without the prior permission of the Deputy Commissioner (DC). The Deputy Commissioner shall be competent to accord permission only after re-classification of the land. Further, as per sub-section 6 of Section 5 of the AALR Act, 2015, on approval of re-classification of agricultural land into non-agricultural class of land, it shall be mandatory on the part of the owner of the land to remit the prescribed re-classification premiums[182] at the rate of 10 or 15 *per cent* of the prevailing minimum zonal value[183] of the agricultural land in that area in respect of re-classification or re-classification-cum-transfer respectively. Section 5 (7) of the Act *ibid* provides that after issue of No Objection Certificate (NOC) by the DC, the Circle Officer shall reclassify such agricultural land into appropriate non-agricultural class and make necessary entries in the land records and where the land is made for reclassification-cum-transfer, the Registrar of Land Registration shall register the deed of transfer after reclassification by the Circle Officer.

[181] Introduced vide notification No.LGL.131/2015/Pt/7 dated 30 September 2015.

[182] At the rate 10 *per cent* in the case of reclassification and 15 *per cent* in the case of reclassification cum sale.

[183] Minimum base value of land for a particular class of land in an area that is fixed and notified by the DC of the District from time to time.

As per Serial Number 23 of Schedule-I of Indian Stamp (Assam Amendment) Act, 2013 (as applicable in Assam) and the Registration (Assam Amendment) Act, 2013, stamp duty and registration fee is prescribed at the rate of three *per cent* (two *per cent* for women) and two *per cent* (one *per cent* for women) respectively of the consideration/ agreed value or zonal value of land, whichever is higher.

The DCs, Kamrup (Sadar) and Rangia had fixed the zonal value of land, revenue village-wise[184] in 2018[185].

Out of 7,858 deeds[186] of sale registered in the office of the Sub-Registrars, Kamrup (Sadar) and Rangia between April 2018 and March 2020, Audit scrutinised (October 2020 and February 2021) 208 registered deeds[187] of sale during 2020-21. Audit noticed that in 18 cases, the DCs had issued NOC allowing re-classification-cum-transfer of agricultural land into non-agricultural land (Industrial purposes) in respect of land measuring 100.655 Bigha[188] and directed the circle officer to correct the land record as per approved class of land with immediate effect. However, the Sub-Registrars while registering the deeds of sale considered the zonal value of other class of land instead of zonal value of industrial land/trade site land (as reclassified by the DCs) of the respective circles. This resulted in short levy of stamp duty and registration fee of ₹ 66.58 lakh[189] as detailed in **Appendix-XLIII**.

On this being pointed out, Sub-Registrar, Rangia stated (November 2021) that the registration fee and stamp duty have been calculated on the basis of actual consideration or as mentioned in NOC, whichever is higher. Moreover, there is neither any provision for viewing zonal value of land in e-*panjeeyan* software nor any separate column for zonal value in NOC. The Sub-Registrar's reply is not tenable as zonal value of class of land in which it has been reclassified and entries appearing in the land records are applicable for the purpose of levy of stamp duty and registration fee while executing deed of sale.

The case was reported to the Government/Department in September 2022; their replies have not been received (February 2023).

184 North Guwahati Revenue Circle and Rangia Revenue Circle.
185 Kamrup (Sadar) – in October 2018 and Rangia – in July 2018.
186 Registered 5130 deeds of sale during 2019-20 in Sub-Registrar, Kamrup (Sadar) and Registered 2,728 deeds of sale during 2018-20 in Sub-Registrar, Rangia.
187 In Kamrup Sadar- 105 cases and in Rangia – 103 cases.
188 5 Katha= 1 Bigha , 1 Katha= 20 Lessa, 1 Lessa= 4 Pawa.
189 Stamp duty of ₹ 4018260 and Registration fee of ₹ 2639711.

5.4 Lower value of land considered during registration of sale deeds

Sub-Registrars considered lower value of land instead of value of land fixed by the Government during registration of 24 deeds of sale. This resulted in short levy of stamp duty, registration fee and surcharge of ₹ 45.50 lakh.

As per Serial number 23 of Schedule-1 of Indian Stamp (Assam amendment) Act, 2013 (as applicable in Assam) and the Registration (Assam Amendment) Act, 2013, stamp duty and registration fee was prescribed at the rate of three *per cent* (two *per cent* for women) and two *per cent* (one *per cent* for women) respectively of the consideration/ agreed value or zonal value of land, whichever is higher.

The Deputy Commissioners, Kamrup (Metro), Kamrup (Sadar) and Rangia had fixed the zonal value of land in August 2011, October 2018 and September 2018 respectively.

In addition to registration fee and stamp duty, a surcharge at the rate of one *per cent* and two *per cent* of total consideration value of land within the municipal[190] area and GMC area respectively is leviable.

Out of a total of 67,200 deeds of sale of land/flat including land registered in the three Sub-Registrar offices of Kamrup (Metro), Kamrup (Sadar) and Rangia during 2020-21 and 2021-22 (up to August 2021), Audit scrutinised (October 2020-September 2021) 2,407 registered deeds[191]. Audit noticed that in 24 cases, the Sub-Registrars, while executing the deeds of sale in respect of land/house, considered value of property as agreed upon between the seller and the purchaser instead of zonal value as fixed by the respective DCs, which was higher. Thus, consideration of lower value of property resulted in short levy of stamp duty of ₹ 20.43 lakh and registration fee of 13.34 lakh (**detailed in Appendix-XLIV**). In case of six properties (out of 18) located in Guwahati Municipal Corporation area, surcharge at the rate of two *per cent* of value of property amounting to ₹ 11.73 lakh is additionally leviable.

On this being pointed out, the Sub-Registrar, Rangia stated (November 2021) that during registration of deed, the value of properties had been considered in accordance with the NOC. Further, it was stated that there is neither any provision of viewing zonal valuation in the *e-panjeeyan* software nor was there any separate column for zonal value in NOC. However, Audit observed that while issuing NOC, the DC had inserted a condition stating that stamp duty and registration fee should be levied on the amount agreed upon by the seller and the purchaser or the zonal value, whichever is higher.

[190] Introduced vide Memo No. REGN 69/2020/40-A dated 27th July, 2021.
[191] 2020-21: 607 deeds and 2021-22: 1800 deeds.

The matter was reported to Government/Department in September 2022; their replies have not been received (February 2023).

Recommendation: *During registration of sale deed, Registration authorities may ensure levy of Stamp Duty and Registration fee on the amount agreed upon by the seller and purchaser or the zonal value applicable, whichever is higher.*

APPENDICES

Appendix-I

(*Reference: Paragraph 1.7.3*)

Action taken by the Government/Department on the recommendations.

Year of Audit Report	Name of the Performance Audit	Reference of Paragraph	Recommendations pointed out in the Audit Report	Action Taken
2017-18 (Report No. 2 of 2019)	**Collection of arrears of revenue in Finance (Taxation) Department**	2.4.7	• Government should ensure realisation of arrears under the existing law which have been subsumed in GST Act by application of provision of AGST Act. • Government should link all the outstanding demands under the existing law with GSTN to ensure that no defaulters continue their business without relinquishing previous demands prior to registration under GST Act. • AGST Act, 2017 has given special powers to the Prescribed Authority to initiate recovery proceeding. Therefore, the Department may consider creating a separate recovery cell under the Commissioner of Taxes abolishing existing Recovery Offices considering number of arrear cases involved under the Acts which have not been subsumed under GST.	Arrear cases are discussed in every review meeting and instruction given to realise arrear dues. Monitoring by zonal DCT is also done. In order to ascertain arrear position, process has been undertaken. Therefore, after receiving such report action will be undertaken to realise outstanding dues and minimise the arrear.
		2.4.8.1	• Government should reconcile the realisable arrears and non-realisable arrears at different stages and focus on realisable arrears for recovery.	Process has already been undertaken.
		2.4.8.2	• Government/Department may prescribe norms/targets for collection of arrears considering realisable arrears and monitor the progress at all levels, with special emphasis on those cases which are more than five years old to avoid pendency of arrears for long time.	Process has already been undertaken.
		2.4.9	• The legal cell of the Department establish a liaison with Courts/Tribunal/Appellate authorities to ensure timely and appropriate action where cases have been disposed of.	The legal cell of the Department liaising with Standing Counsel and prompt action taken as and when necessary.
		2.4.10	• Government/Department may consider to prescribe a time frame for disposal of cases under revision by CT in the interest of State revenue. The Department should fix responsibility for non-disposal of two cases involving arrears of demand of ₹1700.27 crore, for more than three years.	Due to lack of manpower at higher level some revision cases are pending. Once full strength is gained, it is expected such cases will be disposed of quickly.

Year of Audit Report	Name of the Performance Audit	Reference of Paragraph	Recommendations pointed out in the Audit Report	Action Taken
		2.4.11	• Government/Department may consider timely disposal of appeal cases which are pending under the existing law to initiate process of recovery to accelerate collection of arrears of revenue. Further, pending cases be reviewed periodically so that proper action may be initiated against the disposed of cases without delay.	Appeal cases were pending due to lack of officer in those posts. However, after appointment of DCTs (A) in 2019, a number of appeal cases disposed of and presently there are very few pending cases. For example, Guwahati Appeal office has just 21 pending cases of earlier Acts and out of these cases, two cases are pending in ABR. Further, such pending cases are filed recently.
		2.4.12.1	• Department may take appropriate and timely action to claim and realise dues against the Companies which had already been declared closure of their business.	Cases are being monitored.
		2.4.12.3	• Department may consider a practical yet a time bound monitoring system to claim and realise dues from the Government Companies and Department.	Cases are being monitored.
		2.4.13.1	• Department may issue necessary instruction to ROs to follow up inter-State arrear certificate cases and initiate action under the GST laws/existing laws.	Cases are being monitored.
		2.4.13.2	• Department may fix responsibility for non-issue of inter-State arrear certificate which resulted in accumulation of arrears.	Matter will be reviewed.
		2.4.14	• Department should take up the matter with the higher authorities of the Police Department and ensure all possible action under the existing/GST laws to realise dues from the defaulter. Action may also be initiated against the officials for failure to take up the matter with the highest authorities of the Police Department for execution of arrest warrants.	Matter will be reviewed.
		2.4.15.1	• Department should fix responsibility to AOs for non-cooperation with the ROs in furnishing information. All old cases of registration should be reviewed to obtain important information (PAN, Bank Account Numbers) as required under Goods and Services Tax Act.	Matter will be reviewed.
		2.4.15.2	• Department should realise the outstanding dues against the defaulter within a limited time period, otherwise, attachment of movable and immovable property may be initiated.	Matter will be reviewed.

Year of Audit Report	Name of the Performance Audit	Reference of Paragraph	Recommendations pointed out in the Audit Report	Action Taken
		2.4.15.3	• Department should realise interest within a specific time period under the existing laws otherwise, recovery procedure under GST Act may be applied.	Necessary actions are being taken. Further liquidation of Arrear Dues, Act notified from time to time to liquidate arrear tax along with arrear tax and penalty.
		2.4.15.4	• Department should diligently explore all possible means to recover the dues else move for write off as last resort.	Action has already been stated to verify status of arrear dues. Once report is complied, action will be initiated to liquidate arrear dues as early as possible.
		2.4.16.1	• Department may issue instruction to the AOs for instituting a system to monitor demand and collection register/arrear register and exhibit promptness to recover the dues as arrear of land revenue.	
		2.4.16.2	• The Government/Department should ensure time bound verification of old TDS cases and take action accordingly. In GST regime, such verification would be carried out automatically through Goods and Service Tax Network.	
		2.4.17	• Department may issue instruction to all AOs to monitor bank guarantee(s) furnished by the assessees and non-renewal of bank guarantee should be immediately taken up with the authority on whose direction bank guarantee was obtained.	Action will be initiated.
		2.4.18	• Department may ensure levy of penalty as per the provision of the AVAT Act, 2003, where dealer failed to make payment of demand (s) under the notice period.	Matter will be examined.
		2.4.19.5	• Government/Department may consider strengthening of control mechanism and follow up and persuasion of cases, where the Acts are still in force.	Matter will be examined.

41	xxxxxxxxxxP1ZV Deepak Ghosh Silchar / 3	7G- Taxable Turnover	579.36	The taxpayer in ASMT-11 replied that unreconciled turnover pertain to transportation charges received which is exempted under GST Act. As the reply was not satisfactory further clarification in this regard has been called for by the proper officer.
42	xxxxxxxxxxB1Z5 Netra Trading Guwahati - A / 8	9R – Tax paid	1.15	During 2017-18 and 2018-19 total tax liability as per GSTR-1 is ₹253.38 lakh and tax discharged as per GSTR-3 B is ₹303.05 lakh; thus there was excess payment of tax was ₹49.66 lakh. Similarly during 2017-18 and 2018-19 total ITC as per GSTR 2A: ₹258.39 lakh and as per GSTR-3B: ₹309.19 lakh. Thus there was excess ITC availed as per GSTR-3B. But net difference of tax liability minus ITC claimed it showed there was excess of ₹1.15 lakh. The taxpayer paid excess ITC availed by him through DRC-03 dated 5.9.2022 for ₹0.3 lakh (₹0.15 lakh each CGST and SGST) and dated 5.9.2022 for ₹0.85 lakh (₹0.42 lakh each CGST and SGST) however notice in ASMT-10 has been issued.
43	xxxxxxxxxxH1ZP M/S Binni Construction Guwahati-C / 6	9R – Tax paid	52.34	Notice in REG 31 to the taxpayer by the department has been issued for reply which is awaited.
44	xxxxxxxxxxG1ZM Bharti Airtel Limited Guwahati-C / 99	9R – Tax paid	43.69	In reply to notice issued the taxpayer stated this was due to adjustment of pre GST reduction in price and the same is allowed as per section 142(2)(b) of SGST Act. So audit against the dealer has been initiated to ascertain the mismatch.

Cases where Department's response were rebutted

(₹ in lakh)

Sl. No.	Taxpayer Name & GSTIN/ Jurisdiction (Name of the Unit/ Circle number)	Deviation name	Deviation amount	Department's reply	Audit rebuttal
1	xxxxxxxxxxxE1ZY Mahindra & Mahindra Limited GUWAHATI-C/ 99	ITC (3B v/s 2A)	222.14	A taxpayer can avail ITC as per books of accounts if he satisfied all other conditions laid in Section 16 of AGST Act.	The reply of the department is not tenable as per Section 16(2) (c) of AGST Act the tax charged in respect to the supply has been actually paid to the Government by the supplier. In the instant case, the proper officer had not verified actual deposit of tax into the Government account by the supplier.
2	xxxxxxxxxxF1ZE Joyshree Cement Industries GUWAHATI-C / 8	ITC (3B v/s 2A)	131.50	A taxpayer can avail ITC as per books of accounts if he satisfied all other conditions laid in Section 16 of AGST Act.	
3	xxxxxxxxxxE1Z0 M/S Global Distributors GUWAHATI-C / 3	ITC (3B v/s 2A)	408.38	A taxpayer can avail ITC as per books of accounts if he satisfied all other conditions laid in Section 16 of AGST Act.	The reply of the department is not tenable as per Section 16(2) (c) of AGST Act the tax charged in respect to the supply has been actually paid to the Government by the supplier. In the instant case, the proper officer had not verified actual deposit of tax into the Government account by the supplier.
4	xxxxxxxxxxE2ZT Assam Air Products Pvt. Ltd. (Assam Unit) GUWAHATI-C / 4	ITC (3B v/s 2A)	148.23	A taxpayer can avail ITC as per books of accounts if he satisfied all other conditions laid in Section 16 of AGST Act.	
5	xxxxxxxxxxR1ZO M/S Pawan Trading Co. BONGAIGAON / 2	9R Tax paid	13.78	Department replied the taxpayer committed mistake by filing Nil GSTR-3B for March 2018 which was rectified and liability was discharged in return of April 2018.	Verification of GSTR-9C for 2018-19 disclosed out of unreconciled tax amount of ₹62.90 lakh pertaining to 2017-18 an amount of ₹60.88 lakh paid during 2018-19. But short payment of tax for ₹2.03 lakh and interest of ₹11.76 lakh is yet to be paid.
6	xxxxxxxxxxM1Z2 M/S Dhaniwala Stores Chowkbazar by lane Dhubri DHUBRI / 1	9R Tax paid	0.47	As stated by the department the taxpayer has paid ₹0.47 lakh through DRC-03.	Verification revealed the taxpayer paid ₹29.70 lakh during 2018-19 pertains to 2017-18. As such his liable to pay interest on such delayed payment of tax. Further copy of DRC-03 regarding payment of ₹0.47 lakh may be furnished.
7	xxxxxxxxxxQ1ZW M/S Mir Agencies NORTH LAKHIMPUR / 1	9R Tax paid	87.85	In response to notice issued by the department in ASMT-10 the taxpayer stated in ASMT-11 that mistakes occurred due to ignorance. However the mistakes were rectified in GSTR-1 and due tax liability was paid through GSTR-3B.	Copy of rectified GSTR-1 may be submitted.
8	xxxxxxxxxxF1ZM Jyotsna Commercial	9R Tax paid	2.49	The taxpayer stated that tax liability of ₹20.75 lakh related to outward liabilities of October 2017 which	As the taxpayer paid tax liabilities of October 2017 in June 2018 hence taxpayer is liable to pay an

Sl. No.	Taxpayer Name & GSTIN/ Jurisdiction (Name of the Unit/ Circle number)	Deviation name	Deviation amount	Department's reply	Audit rebuttal
	SILCHAR / 3			was discharged by the taxpayer through GSTR-3B on June 2018.	amount of ₹2.49 lakh as interest which is to be recovered.
9	xxxxxxxxxxK1ZE Jordano Enterprise TANGLA / 1	9R Tax paid	14.11	The taxpayer paid ₹42.32 lakh through DRC-3 by cash and credit ledger on 6/2/2020.	However interest on delayed payment of tax for ₹14.11 lakh to be recovered from the taxpayer.
10	xxxxxxxxxxQ2ZO Sri Gopikrishna Infrastructure Pvt. Ltd. GUWAHATI-C / 4	Undischarged liability	242.19	Tax liability for the period 2017-18 on taxable turnover the taxable value of ₹61.28 lakh was ₹11.03 lakh which the taxpayer had discharged through GSTR 3B in the month of February 2018 and March 2018.	The reply is not tenable as the taxpayer amended invoice/credit note/debit note pertaining to the year 2017-18 amounting to ₹242.19 in GSTR 1 during the year 2018-19 which brought the total tax liability for 2017-18 of ₹253.22. This needs further clarification from the department.
11	18AQEPA xxxxxxxxxxB1ZK Abdul Trading Agency GOALPARA / 1	Undischarged liability	119.60	Taxpayer has discharged all his liability through DRC-03. But verification of DRC-03 showed that the payment actually related to year 2018-19.	However department failed to state the reason for mismatch of liability between GSTR1 and GSTR 3B during the 2017-18. As such further necessary action may be initiated in this regard under intimation to audit.
12	18ALZPK xxxxxxxxxxH1ZH Shahi Md Karim GOALPARA / 1	Undischarged liability	146.24	Taxpayer has discharged tax by correction of R3B for the month of April 2018.	As the taxpayer filed return for March 2017 and April 2018 beyond due date hence discharged tax liability of 146.24 lakh by utilizing ineligible ITC was irregular.
13	18ADJPN xxxxxxxxxxB1ZE VIP Mobile Centre GOALPARA / 1	No 3B filed but R1 available	20.48	The taxpayer had discharged tax by filing all the GSTR 3B returns for the FY 2017-18 and taxpayer registration *suo-moto* cancelled w.e.f 31/10/2019.	As the taxpayer filed return after due date of March 2019 (*i.e.* after 20-04-2018) he was not eligible to avail ITC. As such payment of tax of ₹ 20.48 lakh by utilizing ineligible ITC was irregular.
14	18AQBPD xxxxxxxxxxN1ZU M/S Saraswati Dn Trading. NAGAON / 3	No 3B filed but R1 available	0.79	The taxpayer submitted GSTR-3B for the month of July 2017 and August 2017 and discharge tax liability of ₹0.80 lakh.	As the taxpayer filed return after due date of March 2019 (*i.e.* after 20-04-2018) he is not eligible to avail ITC. As such payment of tax of ₹0.79 lakh by utilizing ineligible ITC was irregular.
15	18AGXPA xxxxxxxxxxB1ZF Agriculture Equipment TINSUKIA / 6	No 3B filed but R1 available	2.46	The taxpayer filed all GSTR-1 (2017-18) on 21.08.2020 and GSTR-3B on 26.08.2021 along with payment of late fee. All liability was discharged through ITC. So question of interest payment does not arise.	As the taxpayer filed return after due date of March 2019 hence the taxpayer was not eligible to avail ITC. As such payment of tax of ₹2.46 lakh on 26.08.2021 by utilizing ineligible ITC was irregular.
Total Amount			**1560.71**

18	M/S Indigo Flame (xxxxxxxxxxxH3ZR) Guwahati -A /10	90	76.65	13.36	OBS-401547 Dated.:03/09/22	The taxpayer stated that (July 2022 reply received through Department) at the time of filing annual return, it is found that some sale is excess declared in GSTR-1 as no option to revise GSTR-1. So they have corrected the same in annual return. That resulted the tax liability shown in the GSTR-1 is ₹87.49 instead of ₹76.65.Tax liability paid through GSTR-3B is ₹72.73 and the balance tax liability of ₹3.91(IGST-₹0.82 lakh CGST- ₹1.55 lakh SGST-₹1.55 lakh) is Paid through DRC-03 dated 14/05/2021.	During scrutiny of the Taxpayer's reply it was noticed that the excess sale declared by the taxpayer was not explained in detailed against which month and in which invoice No. and date such excess sale was occurred. In this connection the department's view/Comment was also not provided to the audit after scrutiny of the Taxpayer's reply. Further the taxpayer paid tax liability of ₹3.91 lakh without interest on delayed payment amounting to ₹2.17 lakh/- (37 Months from May 2018 to May 2021). Hence the case may be thoroughly scrutinized along with

X

AFFIDAVIT - IN- OPPOSITION

I, Smti Mauchumi Barua, daughter of late Rohini Barua, aged about 55 years, presently holding the post of Secretary, Government of Assam, Department of Environment and Forest, Dispur, Guwahati - 6 in the district of Kamrup (Metro), Assam do hereby solemnly affirm and states as follows:

1. That I am the Secretary, Government of Assam, Department of Environment and Forest, on being duly authorized to represent the respondent No. 2 and being fully conversant with the facts and circumstances of the case swear his instant affidavit -in- opposition.

2. That I have received a copy of the above mentioned Original Application, have gone through the same and understood the contents made therein swear this affidavit.

NOTARY Nabasish Chakrabarty (Kamrup Metro) Regd. No. KAM - 06 Exp-16/1/27 GOVERNMENT OF ASSAM

3. That the instant Original Application is preferred before the Hon'ble Tribunal seeking quashing of already auctioned mahals i.e minor minerals in 8 (eight) districts of Assam, viz., Cachar, Tinsukia, Udalguri, Goalpara, Golaghat, Kamrup (Metro), Lakhimpur and Nagaon in absence of District Survey Report (hereinafter called as DSR). The applicant further preferred an interlocutory Application registered and numbered as I.A No. 32/2024/EZ, praying for a stay

NABASISH CHAKRABARTY NOTARY Govt. of Assam Regd. No. KAM - 06 Panbazer, Guwahati - 781001

28 SEP 2024

of operation of all the mining activities in the said districts, on the ground of absence of District Survey Report (DSR), which was disposed by order dated 23.07.24 allowing the same.

4. That the answering deponent on the outset begs to state that Department of Environment & Forest was working on the District Survey Report (DSR) for all the districts of Assam and the required exercises like survey studies, data collection etc. were already made, though the DSR was not finalized. The necessary formalities are in progress and all out efforts were being made to finalize the same at the earliest.

5. That the answering deponent begs to state that, after various judicial decisions of the Hon'ble Apex Court as well as of the Hon'ble National Green Tribunal, and also from the time to time guidelines issued by the Ministry Of Environment Forest & Climate Change, it is observed that the DSR is of utmost importance and mandatory for mining of minor minerals, for each and every districts and as such the preparation of DSR has become indispensable, or else various development work of the Government would be affected which may adversely affect the revenue collection of the State. That presently mahals are auction under Assam Minor Mineral Concession Rules, 2013. That even amendment of Assam Minor Mineral Concession Rules, 2013 is underway and there also the preparation of DSR is being made mandatory.

Exp-16/1/27
GOVERNMENT OF ASSAM

For this purpose, a series of meetings were held at the Government level, to ensure that there is no negative impact on the surrounding eco system. The first meeting in this regard was held on 01.06.2024, which was attended by the DFOs from all the districts of the State, who are entrusted with the job of study of the river system using satellite images and carefully locate the mining areas. That after extensive discussion and explanation by the Chairperson of State Environment Appraisal Committee (hereinafter called SEAC) about the importance of DSR, the same is being prepared for each and every district of Assam.

The copy of the minutes of the meeting dated 01.06.24 is annexed herewith and marked as ***Annexure – I***

6. That the answering deponent begs to state that, second meeting was held on 10.07.2024, under the Chairmanship of Special Chief Secretary (Forests), wherein after elaborate discussions, it was decided that, since there is massive flood in the State of Assam during that time, it was impossible to complete the task of preparation of DSR, and as such six month's time be sought for from the Hon'ble NGT/EZ, for completion of the preparation of DSR.

GOVERNMENT OF ASSAM

The copy of the minutes of the said meeting dated 10.07.24 is annexed herewith and marked as ***Annexure – II***

7. That the answering deponent begs to state that, it pertinent to mention herein that Hon'ble NGT by order dated 23.07.24 was pleased to issue prohibitor order of stay on all mining activities related to the e-auction / auction of the Minor Minerals in the districts of Goalpara and Lakhimpur as well as any other district that do not have a duly approved District Survey Report (DSR).

The answering respondent humbly submits that such order of the Hon'ble NGT/EZ, has been duly complied with and on this ground a Notification being ECF. No. 491770 dated 05.09.2024, was issued by the Special Chief Secretary (Forest), Government of Assam, Department of Environment and Forest.

The said notification dated 05.09.2024 is annexed herewith and marked as ***Annexure – III***

8. The answering deponent begs to state that, a series of VC meetings were held on 05.08.2024, 22.08.2024 and 12.09.2024, to sensitize all the District Commissioners, concerned DFOs and

other stakeholders to complete the preparation of DSR latest by 20.09.2024.

The copies of the minutes of the said VC meetings dated 05.08.2024, 22.08.2024 and 12.09.2024 are annexed herewith and marked as ***Annexure – IV*** series

9. The answering deponent begs to state that, in this connection the Government of Assam vide Notification No. ECF No. 535050/852 dated 17.09.2024 constituted District Committees chaired by the respective District Commissioner in general areas / Principal Secretary of Autonomous Council, to oversee the preparation of DSR in each district.

Be it mentioned that these District Committees are constituted in compliance with the order 10.11.2021 passed by the Hon'ble Supreme Court passed in *Civil Appeal No. 3661-3662 of 2020 (State of Bihar and Ors. Vs Pawan Kumar and Ors.)* and included officers from District Water Resources Department, Land Revenue Department, Geological & Mining Department, Pollution Control Board, concerned Divisional Forest Officer (T) among its other members. It is also directed in the said order (Para 14), which states that, draft DSRs shall be prepared by Sub-divisional

The relevant excerpts of the minutes of the Departmental Review Meeting Held at Room No. 308 of Assam Administrative Staff College, Khanapara on 1st June, 2024.

"Opening the session on District Survey Report (DSR), Special Chief Secretary (Forest) informed the house that as per the order of the Hon'ble Supreme Court and Hon'ble National Green Tribunal, DSR is a must for every district. Those districts which have not initiated DSR preparation works, they must start forthwith as non preparation of the same may hit various Govt. development works and may adversely impact the revenue collection. He emphasized that the rivers of Assam carry a lot of silt load and ecological flow is a must requirement to ensure that there is no untoward impact on the surrounding eco system. He also stated that all DFOs should study the river system using satellite images and carefully locate the mining areas. He also stated the proposed amendment of Assam Minor Mineral Concession Rules, 2013 is underway where the preparation of DSR is being made mandatory.

Thereafter, Sri Jatindra Sarma, IFS (Retd.), Chairman, SEAC, talked about the importance of DSR and explained the rule position in terms of the orders of Hon'ble Supreme Court, Hon'ble National Green Tribunal and guidelines of MoEF& CC issued from time to time. He also shared the draft template for DSR preparation. The presentation of the Chairman, SEAC was followed by a presentation of a Consultant Expert who gave a detailed talk on the methodology of DSR preparation. It was followed by a question and answer session with the invited expert and the DFOs."

MINUTES OF THE MEETING HELD IN HYBRID MODE IN THE MATTER ON OA No.86/2024/EZ (I.A. No. 32/2024/EZ) (Pradeep Singh Shekhawat -Vs- Union of India & Ors.) held on 10.07.2024.

Members present in the VC : Annexed

A Virtual meeting was held under the Chairmanship of Shri MK Yadava, IFS, Special Chief Secretary, (Forests), Government of Assam to discuss about the directions of the Hon'ble NGT, Eastern Zone Bench, Kolkata, in the matter **OA No.86/2024/EZ (I.A. No. 32/2024/EZ) (Pradeep Singh Shekhawat -Vs- Union of India & Ors.) whereby all respondents were asked to file affidavits by the next date of hearing i.e. 12.7.2024.** The meeting was held with all stakeholders including Principal Chief Conservator of Forests & HoFF (PCCF & HoFF), Assam, concerned DCs and DFOs from the 8 districts, PCBA, Directorate of Geology and Mines, Govt. of Assam aided by the learned counsels.

The key action points that emerged in the meeting are as below:

1. That the forest dept regulates the mining of minor minerals pertaining to Schedule Y as per the provision of AMMC Rule-2013. Further that there are no mining leases granted by the forest department. Further that so far only mining permits of short term duration not exceeding two years and contract nor exceeding seven years are being issued currenly. All the minerals concession areas under Schedule Y in operation are legal. However there may be instances of thefts in the mining areas. Special Chief Secretary, (Forests), Environment & Forest Department, Assam said that the Government is committed to stop any theft of minor minerals in the State and offenders are to be duly penalized as per the existing provision of AMMC Rule- 2013. **Action: PCCF & HoFF, Assam shall direct all the DFOs of the 8 districts to prepare the list of offenses related to minor minerals, royalty collected, vehicle seized, penalty imposed etc in the last 2 years for the kind appraisal of the Hon'ble NGT.**
2. That the Project proponents who were earlier given permits for mining activities in Assam for short durations of 2 years and contracts for 5-7 years have been operating their mines based on the Mining plan and EC. The Mining plans are duly approved by the Directorate of Geology and Mining, Assam and Environmental Clearance is granted by SEIAA, Assam. However the new project proponents who are given EC to do mining must also obtain **Consent to Establish (CTE) and Consent to Operate (CTO) as made mandatory as per new guidelines. Action: All DFOs from all the 8 districts shall immediately provide Pollution Control Board of Assam with the list of all the project proponents who have been mining in the respective districts and PCBA shall issue show cause notices to all**

Certified to be true copy
Advocate

those Project proponents who do not have CTE and/ or CTO permissions. In case of failure on their part to apply for CTO and / or CTE permissions which are mandatory as per the new guidelines, their permits/ contracts shall be cancelled. The entire exercise shall be monitored by SEIAA & SEAC, Assam.

3. **The DFOs has already initiated the process of preparing the District Survey Report (DSR) in consultation with the Directorate of Geology & Mines, Govt of Assam. However as the rivers of Assam have behavioral patterns which are totally different from the behavior of rivers from the mainland states of India** and **rivers in Assam often do not carry pure sand but also carry Silt, Clay, Boulder, Gravel in mixed state. Therfore the DSR for the State of Assam should be River specific**. Special Chief Secretary, (Forests), Environment & Forest Department, Assam, suggested that the while the DSR preparation shall go on in full swing but at the same time the morphology and behaviour of rivers should be studied at regular intervals. He proposed that the Assam Science Technology and Environment Council (ASTEC) which is the scientific arm of Government of Assam and shall study the river behaviors in a two year cycle. **Action: The DFOs shall prepare the DSR under the guidance of PCCF & HoFF, Assam and Directorate of Geology and Mining and the fund for its preparation will be met from the MMDRR fund.**
4. Reference was made to the Budget Speech of 2024-25 by the Hon'ble Minister Finance, Assam regarding penal provision in respect of Forest Revenue violations and evasions. It was announced that the penal provisions shall be incorporated in the Assam Minor Mineral Concession Rules 2013 (AMMCR) by bringing an amendment in the Rules. Accordingly AMMCR is in the process of being amended and is being drafted.
5. The meeting further referred about the Budget Speech that included **the provision of geo-fencing of mines, GPS to track the trucks and other electronic controls that shall be introduced in selected mines and that the designated vehicles only shall carry minor minerals on the fixed routes.**
6. The learned Counsels were requested to apprise Hon'ble NGT that all the District Commissioners were busy in Elections till the month of June, 2024 followed by mitigating serious consequences of floods and rain in the State. The DSR cannot be prepared without studying the river behavior first and due to the ongoing floods it will be difficult for the State authorities to undertake inspection of mining sites, analyzing river depths and other action to be taken. The DFOs started collecting the data on mineable rivers such as river bank height,

Certified to be true copy
Advocate

depth, width, type of minor minerals etc but had to be halted due to ongoing flood situation in Assam Hence in view of all these hurdles that the state is facing right now, **it was requested to the legal counsel to apprise the Hon'ble NGT about the current flood scenario in Assam and to seek at least 6 (six) months time to complete the entire exercise including conducting survey studies, preparation of DSR, eradicating all discontinuities related to mining and for filing a comprehensive affidavit covering all the action points.**

With this the meeting ended with a vote of thanks from the Chair.

Minutes of the meeting regarding preparation of District Survey Reports for Minor Minerals and filing of counter Affidavit in the matter O.A No.86/2024/EZ (Pradeep Singh Shekhawat –Vs- UoI&Ors.) chaired by the Chief Secretary, Assam, on 5th August, 2024 at 12 PM

Attendance- At Annexure-A

Dr. Ravi Kota, IAS, Chief Secretary, Assam chaired the meeting with the concerned District Commissioners, Divisional Forest Officers in presence of the Special Chief Secretary (Forest), PCCF & HoFF, Assam and all other stakeholders to review the status of the preparation of the District Survey Reports (DSR) for mining of Minor Minerals in different districts and filing of counter Affidavit for the State of Assam in the O.A **No.86/2024/EZ (Pradeep Singh Shekhawat –Vs- UoI & Ors.)**

A power point presentation was given by Shri Jatindra Sarma, Chairman, SEAC, Assam on **'Requirement of DSRs for Mining of Minor Minerals'** and **'Requirement of DSRs for Mining of Minor Minerals-A condition precedent for grant of EC"** involving the procedures and parameters to be adhered to in the preparation of the DSRs and the legal requirements out of the orders of NGT and Hon'ble Supreme Court.

Dr Shantanu Kr Dutta, Member Secretary, PCBA also gave presentation on **"Status of CTE/CTO of different units listed under various districts"**

After threadbare discussions the following decisions were taken and proposed:

1. Pollution Control Board (PCBA), Assam with the help of the District Commissioners and Divisional Forest Officers shall identify and check the mineral mining units which are yet to apply for CTE/CTO and the units which have already attained the CTE/CTO permissions and to submit a report. Environment & Forest Department shall instruct all the District Commissioners and the DFOs to coordinate with the Units which are yet to apply for the CTE/CTO.
2. All Units in the State shall complete the DSR and comply with all relevant regulations in the next 2-3 months and it shall be constantly monitored by DCS and DFOs with the operators of the Units and under the guidance of PCBA and SEIA, Assam.
3. For better coordination, PCBA shall circulate the names and contact details/jurisdiction of officials from its 11 (eleven) Regional Offices to all District Commissioners and Divisional Forest officers. By doing this, PCBA shall target to bring all the Mining Units under the consent mechanism and to comply with the CPCB guidelines / Court directives.

Certified to be true co
Advocat

4. PCBA under the Environment & Forest Department shall coordinate with all the District Commissioners and Divisional Forest Officers to issue CTE/CTOs by August 31st, 2024 wherever required.
5. Separate Committee for each of the 6th Schedule areas comprising of officers from Forest, Irrigation, PCBA, Geologist, PWD etc. for each district shall be formed and oversee the preparation of the DSR headed by the Seniormost Secretary of the Autonomous /Territorial Councils for coherence.
6. A set of subsequent review meetings for monitoring DSR preparation shall be held in the months of August and September 2024 chaired by the Chief Secretary, Assam.
7. An Internal Committee consisting of officers of Environment & Forest Department, Assam, Pollution Control Board Assam and Geology & Mining Department shall be notified. The committee shall monitor the progress of DSR preparation for all districts on a weekly basis.
8. For compliance of the latest NGT Order dated 23.07.2024, all District Commissioners and Divisional Forest Officers shall ensure that the DSRs are completed by November, 2024. As per the NGT order, all mining operations in the Units that did not comply with the relevant regulations in the State shall be stalled till further order of the Hon'ble Tribunal or appropriate Court.
9. State Government shall take up with the Learned Additional Advocate General, Assam in the Apex Court to vacate the stay order of Hon'ble NGT so that the States' demand and supply in operations can be continued in the interim period till approved DSRs are available as continued stay on mining of minor minerals shall adversely impact and seriously hinder developmental works and may lead to illegal mining at the cost of state exchequer.
10. Further opinion is also proposed to be sought to move the Hon'ble High Court regarding issuance of mining permits as per Assam Minor Mineral Concession Rules, 2013 (AMMCR 2013) as an interim measure to meet the ***bonafide*** needs of the Govt. Departments.
11. Chief Secretary, Assam requested all the concerned District Commissioners, Divisional Forest Officers to consult the concerned departmental officers/departmental counsels before submission of sensitive information/ para-wise comments in the court. Any such information which can weaken the stand of the department in the court may not in any way be transmitted to the opposite parties or their legal counsels.
12. All District Commissioners, the Department of Environment & Forest shall have proper coordination with their standing counsels.

The meeting ended with a vote of thanks from the chair.

Minutes of the meeting to review the progress of the preparation District Survey Reports (DSR) for Minor Minerals and filing counter affidavit in the matter O.A No.86/2024/EZ (Pradeep Singh Shekhawat –Vs- UoI&Ors.) chaired by the Special Chief Secretary(Forests), Environment & Forest Department, Assam, on 22nd August, 2024 at 9.30 AM

Attendance- Annexed

A Virtual meeting under the chairmanship of Shri M.K.Yadav (IFS, Retd), Special Chief Secretary (Forest), Environment & Forest Department, Assam was held with all stakeholders to review the status of the preparation of the District Survey Reports (DSR) for Minor Minerals and filing counter affidavit. The Hon'ble National Green Tribunal (NGT) Eastern Zone Bench, Kolkata has directed for stay on mining activities in respect of the e-auction/auction of the minor minerals in the District of Goalpara and Lakhimpur and such other districts which do not have duly approved District Survey Report vide order in its hearing dated 23.07.2024.

At the outset the chairperson welcomed all the participants in the meeting. The primary focal point of discussion in the meeting was to prepare an approach paper to the Advocate General (AG), Assam for submission of affidavit before the Hon'ble Gauhati High Court for issuance of mining permits in respect of Govt. works by Central and State Govt. Agencies as per Assam Minor Mineral Concession Rules, 2013 seeking an interim measure to meet the bonafide needs of the Government departments till the DSR for all districts are finalized and approved by the State Authorities. The chairperson also emphasized upon preparation of DSR in a time bound manner. The completion time for preparation and submission of draft DSR by the Divisional Forest Officers to the respective District Level Committees is fixed before **25.09.2024**.

Sri Jatindra Sarma (IFS, Retd) Chairman, SEAC, as requested by the Special Chief Secretary (Forests), deliberated over the matter of State of Bihar & Ors. V/S Pawan Kumar & Ors. (Civil Appeals Nos. 3661-3662 of 2020) and the relevant Hon'ble Supreme Court order, so that a clearer picture of the State's approach can be drawn with respect to the process of DSR preparation for all the districts.

After threadbare discussions the following decisions were taken:

1. The status for preparation of draft DSR by the DFOs (Territorial) was reviewed and all the DFOs informed the status in the meeting. The DFOs were informed that the

Certified to be true cop
Advocate

completion time for preparation of draft DSR would not get extended beyond 25th September, 2024.

2. All DFOs (Territorial) were instructed to chalk out the various government developmental works along with their details like their project value, quantum of minor minerals required and the importance of these projects with supporting documents to the PCCF & HoFF, Assam within 3 (three) days for preparation of approach paper to be submitted to the AG Assam for his kind needful action and decision. The details shall be compiled by the O/o PCCF & HoFF and be submitted to this department **within a week** for appraisal of the AG Assam.

3. All DFOs shall prepare draft DSRs in collaboration/consultation with the departments of Water Resources, Geology and Mining, Officers of Pollution Control Board, Revenue, etc or knowledge partner and shall place their DSRs before the District Level Committee. While preparing DSRs, DFOs may utilize data from approved mining plan, data collected in the last 4-5 years and carry out drone survey as and where required. The DFOs may also utilize satellite imagery & data procured so for the purpose. In respect of other data like Meteorological Data, Hydrological data required for preparation of DSR may also be collected from the portal of other authorized agencies.

4. All previous potential mines which have been mined and new potential mines are to be identified for sand, stone, gravel, silt; earth cutting from forest & non-forest lands including patta land areas may all be included in the DSR by the DFOs. The mining, that is to be carried out in certain forest reserves are also to be mentioned in the DSR. In case of Eco-sensitive zones, dredging operation in rivers for the maintenance of riverbeds and to prevent it from becoming swampy/ marshy shall also be proposed to be carried out. Minor Minerals obtained from dredging of rivers shall be used for Government permits only and not for any commercial purposes.

5. Their DSR reports should also include records of revenue collection, illegal mining by machines, vehicles, pumps etc. and seized so. To keep illegal mining on a check the regulatory regime followed by the Forest officials should also be mentioned.

6. A Standard outline for draft DSR shall be prepared by SEAC as per MoEF & CC guidelines 2016, 2018, 2020 and relevant Hon'ble Supreme Court and NGT orders. The same shall be shared with all DFOs (Territorial) by the O/o of the PCCF & HoFF of Assam, within a period of 7 days.

7. The District Level Committees headed by District Commissioners of respective Districts shall be constituted instead of Sub-Divisional Committees to oversee the DSR preparation in each district. A notification to this effect shall be published soon.

Certified to be true co
Advocate

8. A District Committee comprising of officers from District Water Resources, Pollution Control Board, Land Revenue, Forest Department and Geological or Mining Officer shall be constituted. **This District Committee headed by the District Commissioner shall examine the draft District Survey Reports of each district** and shall visit all the identified mining areas included in the DSR. **The Senior most Secretary shall chair the Committee in areas governed by autonomous councils.**

9. The District Committees shall visit all the mining areas indicated in the DSR and give geo-tagged photographs of the same.

10. The chairperson also emphasized upon preparation and approval of DSR in a time bound manner. The draft DSR prepared by the Divisional Forest Officers shall be submitted to the District Level Committees latest by **25th September, 2024.** Each DFO assured to complete preparation and submission of draft DSRs within specific dates before 25.09.2024.

11. Each draft DSR shall be made available in Public Domain by the District Commissioner for 21 days in the District portal. If no objection is received within the time period, the DSR shall be finalized by the District level Committee and shall be submitted by the District Commission to SEAC and which shall further be submitted to SEIAA by SEAC for final approval **within 6 (six) weeks**.

12. All DFOs were instructed to ensure the CTE/CTO for all mining units is completed by **7th September, 2024**. They shall provide the list of project proponents which are yet to apply for CTO/CTE to Pollution Control Board and sensitize the proponents to apply immediately. The Member Secretary, Pollution Control Board, Assam was requested to share the contact details with name of District Pollution Control Board Officer with the DCF (M&E) of O/o the PCCF & HoFF, Assam for coordination.

13. Shri Rajpal Singh, IFS, Principal Chief Conservator of Forests & HoFF, Assam instructed all DFOs to expedite the preparation of DSR and to stick to the scheduled timelines. He impressed on the ardent need of the minor minerals for various developmental works. With the advent of the dry season demand for minor minerals will be very high owing to various construction activities and if the supply is not met with, the Forest department shall not be able to meet up with huge revenue targets. In the meantime he also instructed that all necessary checks against illegal mining should be looked into with stern interventions from forest officials and imposing heavy fines on the offenders.

14. The Special Chief Secretary (Forests), Assam instructed all the DFOs to adhere to the rules under the Assam Minor Mineral Concession Rules, 2013 for installation of weigh-bridge and fitting of GPS in all vehicles carrying minor minerals which are to be treated as violation and breach of agreement. No mining activities shall be allowed without

Certified to be true copy
Advocate

installation of weigh-bridge by the mineral concession holders and without fitting of GPS in the vehicles by the vehicle owners involved in transportation of minor minerals in future.

With the above decision points the meeting ended with a vote of thanks from the chair.

Minutes of the meeting to review the status of DSR preparation in various districts of Assam in the matter OA No. 86/2024/EZ (Pradeep Singh Shekhawat –Vs- UoI & Ors.) chaired by the Chief Secretary, Assam, on 12th September, 2024 at 10.30 PM

Attendance- At Annexure-I &II

Dr. Ravi Kota, IAS, Chief Secretary, Assam chaired a review meeting with all the District Commissioners, Divisional Forest Officers, SIEAA, SEAC and PCBA in the presence of the Special Chief Secretary (Forest), PCCF & HoFF, Assam and all other stakeholders to review the status of the preparation of the District Survey Reports (DSR) which is compulsory for mining of Minor Minerals in the different districts of Assam as per NGT's order in the matter O.A **No.86/2024/EZ (Pradeep Singh Shekhawat –Vs- UoI & Ors.)**

At the outset Special Chief Secretary (Forest), Environment & Forest Department, Assam presented a power point presentation where the status of the DSR for the various districts was detailed. Out of the 35 districts in Assam, 10 (ten) draft DSRs have been completed and uploaded in the public domain of the respective districts for viewing and comments. The rest of the draft DSRs were expected very soon and their status were apprised in the meeting.

The district wise status of CTE/CTO permission for various mining units was also reviewed and it was apprised that CTE/CTO for 74 (Seventy-four) units have already being issued by Pollution Control Board, Assam.

After threadbare discussions the following decisions were taken and proposed:

1. All the District Commissioners and the DFOs (T) were urged to coordinate with the Minor Mineral Mining Units which are yet to apply for the CTE/CTO. It was decided that all operational Mining Mahals to apply for CTE/CTO latest by **20th September, 2024**
2. Wherever necessary, DFOs were asked to call for meetings and to sensitize the left out Minor Mineral Mining Units to immediately bring them under the consent mechanism of CTE/CTO.
3. The Principal Chief Conservator of Forests & HoFF was requested to take a review meeting with the Divisional Forest officers (T) on **18th September, 2024** to analyse the progress on CTE/CTO approval for the mining units.
4. Regarding preparation of DSR, Chief Secretary instructed all the Districts Commissioner and Divisional Forest Officers (T) to work in close coordination to complete the preparation of the DSR latest by **20th September, 2024** and to see that there are no gaps in the preparation and submission of the DSRs. The completed DSRs be made available in the public domain of the respective districts **for 21 days for viewing and comments**. If no objection is received within the time period, the DSR shall be finalized by the District level Committee and shall be submitted by the District Commissioner to SEAC for further process of approval.
5. Sri Jatindra Sarma (IFS, Retd.) Chairman, SEAC apprised that analysis of each DSR usually takes a time of 6 weeks. However he agreed that he and his team shall review

Certified to be true co

Advocate

DSRs on a regular basis on war footing and if the DSRs are found in order, DSRs of respective districts shall be recommended to SIEAA.

6. Chief Secretary, Assam requested all the District Commissioners and the DFOs (T) to comply with the timelines and deadlines. And also, urged them to have a close coordination with SEAC and SIEAA so that there are no loopholes in the DSRs.
7. It was suggested that another meeting in between 20th to 23rd September will be held to review the status of DSR.

With the above decision points, the meeting ended with a vote of thanks from the chair.

ORDERS BY THE GOVERNOR
NOTIFICATION

ECF No. 535050/852 : Pursuant to the order of the Hon'ble National Green Tribunal, Eastern Bench, Kolkata, dated 23.07.2024 in the matter of O.A. No. 86/2024/EZ and IA No.32/2024/EZ regarding mining of minor minerals in the State of Assam, the Governor of Assam is pleased to constitute a District Committee to oversee the preparation of **District Survey Report** (DSR) for General areas/areas governed by Autonomous Council, comprising of the following members with immediate effect:

1.	District Commissioner in General areas/ Principal Secretary of Autonomous Council s	-	Chairman.
2.	District Representative from Water Resources Department	-	Member
3.	District Representative from Land Revenue Department	-	Member
4.	District Representative from Geological & Mining Deptt.	-	Member
5.	Regional Officer / District Representative from Pollution Control Board.		
6.	Divisional Forest Officer (T)	-	Member Secretary

Terms of Reference :

The following shall be the role & responsibilities of the Committee :

1. The District Committees shall visit all the minor mineral mining areas/potential mining areas indicated in the DSR and give geo-tagged photographs, images etc. of the inspected areas.
2. During the preparation of DSRs, each District Committee has to follow the guidelines enumerated in the **MoEF & CC guidelines of 2016, 2018 and 2020 for mining of minor minerals**.
3. The Committee shall propose necessary inputs/corrections in the draft DSRs submitted by the concerned DFOs and shall make them available in public domain for 21 days in the district portal.

Status of Granting of Consent to River Bed Material Mining (RBMM) and Stone Quarry Units in Assam

The Govt. of Assam in Pollution Control Board, Assam ensures that all the RBMM and Stone Quarries are granted with Consent to Establish (CTE) and Consent to Operate (CTO). As on date, PCBA has granted 107 Consents (CTE/CTO) to the said categories of Industries. The break up of consent granted so far is as follows:

- River Bed Material Mining (RBMM) Projects:
  1. CTE: 22
  2. CTO: 81
- Stone Quarry
  1. CTE:1
  2. CTO:3

The detailed district wise list of the 107 nos. of industries, which are granted with CTE/CTO, is annexed (Annexure-I).

ANNEXURE A-22

Item No.04 Court No.1

BEFORE THE NATIONAL GREEN TRIBUNAL
EASTERN ZONE BENCH, KOLKATA
(THROUGH PHYSICAL HEARING WITH HYBRID MODE)

Original Application No.125/2024/EZ

Bibekananda Pattnaik Applicant(s)

Versus

State of Odisha & Ors. Respondent(s)

Date of hearing: 08.08.2024

CORAM: HON'BLE MR. JUSTICE B. AMIT STHALEKAR, JUDICIAL MEMBER
HON'BLE DR. ARUN KUMAR VERMA, EXPERT MEMBER

For Applicant(s) : Mr. Sankar Prasad Pani, Advocate (in Virtual Mode) a/w Mr. Ashutosh Padhy, Advocate (in Virtual Mode)

For Respondent(s) : Mr. S. K. Nayak, AGA for R-1, 4-7, (in Virtual Mode)
Mr. Dipanjan Ghosh, Advocate for R-2,

ORDER

1. Mr. Sankar Prasad Pani assisted by Mr. Ashutosh Padhy, learned Counsel are present (in Virtual Mode) for the Applicant.

2. Mr. Dipanjan Ghosh, learned Counsel files Vakalatnama on behalf of the Respondent No.2, Odisha State Pollution Control Board; the same is taken on record. Learned Counsel prays for and is granted three weeks time for filing counter-affidavit.

3. Till date, no counter-affidavit has been filed by the State Respondents.

4. Mr. Sankar Prasad Pani, learned Counsel for the Applicant submits that State Respondents are going ahead with the grant of auction under tender notice with regard to finalization of the auction on the Budhabalang Sand Bed-1 in Belonapura, Madhunanda, Demphouda of Betonai Tahasil. The specific allegation of the Applicant is that the District Survey Report in question is only an interim Report as stated under the head 'Conclusion' of the District

Survey Report of Mayurbhanj District, Odisha, for River Sand Mining. The 'Conclusion' of the said District Survey Report reads as under:-

> *"**CONCLUSION**:*
> *Since it is an interim report, to meet the requirement of minerals in the present scenario, it is proposed to identify such potential areas at certain interval and get the data bank of DSR to be updated. The insitu mining activity in any area is on one hand bring revenue and employment (Direct and indirect) and on other hand if not done properly potential pollution and ecological imbalance increases, the ability of the ecosystem can also be reduced. Particulate matter transported by the wind as a result of excavations, blasting, transportation of minerals, heavy equipments used raise these particulate levels; and Gas emissions from the combustion of fuels in stationary and mobile sources, explosions, and mineral process. All these activities indirectly affected the biodiversity of area. Large potential and smaller areas have been identified in Mayurbhanj district on the basis of geological study carried out during field observation, which can be considered for mining concession after all the parameters for statutory clearances are verified by consulting with concerned authorities."*

5. Mr. Sankar Prasad Pani, learned Counsel for the Applicant submits that this District Survey Report has not been accepted by the SEIAA, Odisha, as yet and as held by this Tribunal in Original Application No.46/2022/EZ (*Bibekananda Pattnaik Vs. State of Odisha & Ors.*), also relying upon the judgment of the Hon'ble Supreme Court in Civil Appeal Nos.3661-62 of 2020 (*State of Bihar Vs. Pawan Kumar*), and the directions given in Original Application No.63/2020/EZ (*Haripada Manna Vs. District Collector & Ors.*), the interim District Survey Report has to be considered by the SEIAA, Odisha, before it can be acted upon.

6. In view of the judgments referred to hereinabove which have been placed before the Court by the learned Counsel for the Applicant, we direct that no mining activity shall be carried on in the District-Mayurbhanj under the interim District Survey Report until further orders of the Court.

7. Mr. S. K. Nayak, learned Additional Government Advocate appearing (in Virtual Mode) for Respondent Nos.1 & 4 to 7, State Respondents, Government of Odisha, prays for and is granted three weeks time for filing counter-affidavit.

8. A request for adjournment has been made by Mr. Apurba Ghosh, learned Counsel for Respondent No.3, SEIAA, Odisha, vide his letter dated 08.08.2024 on grounds of his ill-health.

9. Matter is accordingly adjourned.

10. **List on 03.10.2024.**

Under Para 3A

13. New Category Called Category B2 For Sandmining In Districts Was Introduced Through Para 4(iv)
14. Preparation Of District Survey Report Introduced Through Para 7 (iii)
15. Procedure For Preparation Of DSR Introduced Through Appendix X
16. Challenge To The Notification 2016 The Direction Of NGT In Satendra Pandey's Case
17. EIA Notification For Prescribing Procedure For Preparation Of DSR Of Minor Minerals Other Than Sandmining And River Bed Mining
18. Enforcement And Monitoring Guidelines For Sand Mining, 2020:
19. Decision Of this Court In *State Of Bihar* V. *Pawan Kumar*
20. Conclusions

1. *Affirmation:* We unequivocally uphold the law and the regulations governing sand mining, demanding zero tolerance for unauthorized activities, strict adherence to these regulations is non-negotiable.

1.1. Unregulated sandmining disrupts riverine ecosystems, alters natural flow patterns, and leads to erosion and habitat loss. Aquatic biodiversity suffers as spawning grounds are destroyed and water quality deteriorates. The destabilisation of riverbanks increases flooding, risking human life and animal habitat alike. Moreover, the illicit sand trade often operates under the shadow of organised crime, undermining the rule of law and weakening governance structures. Therefore, absolute standards with get tough policies, strict enforcement and quick accountability are compelling for effective regulatory control.

1.2. We have upheld the decision of National Green Tribunal[1] quashing e-auction notice dated 13.02.2023 issued by the State Government for sand mining and the consequent grant of Letters of Interest (LOIs) in favour of successful bidders on the ground that the auction was conducted in the absence of a valid, final and a subsisting District Survey Report (DSR). We have also held that a *Draft* DSR is not tenable. A draft DSR can never be the basis for a recommendation by the District Level Expert Appraisal Committee (DEAC) and for the District Level Environment Impact Assessment Authority (DEIAA) for B2 category projects pertaining to mining of minor minerals lease area less than or equal to five hectares to grant environment clearance.

2. *Facts:* District Magistrate, Saharanpur issued notice inviting e-tenders on 13.02.2023 for sand gravel, boulders, etc. available in the riverbed in Saharanpur district under the U.P. Sub Mineral (Remedy)

SCC Online Web Edition, © 2025 EBC Publishing Pvt. Ltd.

Rules, 2021. Questioning the legality and validity of the e-auction notice, respondent no. 1, a resident of Haryana approached the National Green Tribunal by filing an original application invoking section 14 and 18 of the National Green Tribunal Act contending that the e-auction notice is illegal as there was no District Survey Report (DSR) as on that date. It was his contention that the last DSR for the Saharanpur district of 2017 expired in the year 2022. Thereafter, steps were taken to prepare a DSR for the succeeding 5 years for Saharanpur district, but only a draft DRS was ready by 13.01.2023. However, even before its finalization, the impugned e-auction notice was issued by District Magistrate, Saharanpur on 13.02.2023 which according to the respondent no. 1 is illegal and unsustainable in law.

3. *Proceedings before the NGT leading to Civil Appeals & Submissions* : NGT vide order dated 13.03.2023 constituted a Joint Committee comprising of Central Pollution Control Board (CPCB), State Pollution Control Board (UPPCB) and District Magistrate, Saharanpur (D.M.) to collect relevant information and submit a factual report. The Joint Committee submitted its report on 10.07.2023 indicating that pursuant to the e-auction notice dated 13.02.2023 Letters of Interest (LOI) were issued with respect to 14 sites for river bed mining. Accordingly, the NGT impleaded the parties holding LOIs as party respondents to the original application.

3.1. Pending further proceedings before the NGT, the State Expert Appraisal Committee (SEAC) considered the draft DSR and accorded its approval on 03.05.2024 and then, the State Environment Impact Assessment Authority (SEIAA) granted its approval to the fresh DSR in its 814th meeting on 24.05.2024.

3.2. However, in view of the fact that the last subsisting DSR issued in 2017 expired after five years, i.e. by 2022 and that only a draft DSR dated 13.01.2023 was subsisting when the impugned e-auction notice dated 13.02.2023 was issued, the NGT quashed the auction on the ground that it is in violation of the legal mandate under the 2006 EIA Notification, as amended in 2006, 2018 and also the Enforcement and Monitoring Guidelines for Sand Mining, 2020 and decision of this Court in *State of Bihar* v. *Pawan Kumar*[2].

3.3. Questioning the legality and validity of the judgment of the NGT, 3 appeals are filed before us. The first Civil Appeal No. 14170 of 2024 is by the State of U.P., represented by Ld. ASG Aishwarya Bhati, assisted by Mr. Vishnu Shankar Jain. In the other Civil Appeal No. 14933 of 2024 and Civil Appeal No. 14000 of 2024 by M/s Vedanta Associates and Nutressaorganics India Pvt. Ltd., LOI holders, we have also heard Mr. Ranjit Kumar, Sr. Advocate, ably assisted by Mr. Vanshdeep Dalmia and also Mr. S.P. Singh, Sr. Advocate respectively.

3.4. Having considered submissions of the Ld. Counsels for the appellants in detail and having examined the relevant documents and material on record we had agreed with the reasoning and the conclusions drawn by the NGT and therefore proceeded to dismiss the civil appeals[3]. By way of this judgment, we supply detailed reasons for our decision.

4. *Sandmining and its impact on Environment:* Sand holds significant ecological and environmental value. Coastal dunes, river, and seabeds act as natural buffers against storms, floods, and rising sea levels, thereby enhancing climate resilience. Sand also supports vital ecosystems by providing habitat for numerous plant and animal species, including microorganisms crucial to nutrient cycling and water purification. Its role in maintaining the structural integrity of freshwater and marine systems underscores its contribution to biodiversity and environmental sustainability. As such, the stewardship of sand resources is not only an economic imperative but also an ecological necessity.

4.1. As per a study[4] undertaken by the United Nations Environment Programme (UNEP), approximately 50 billion tonnes of aggregate sand and gravel are reportedly removed globally each year. With the rapid increase in global population and urbanization, the demand for sand continues to rise at an unprecedented rate.[5] Consequently, it has become the most extracted mineral on the planet, with billions of tons being mined annually from riverbeds, lakes, coastlines, and deltas.

4.2. The rate at which we are mining sand, for whatsoever purposes, is much higher than the replenishment rate. This imbalance between consumption and natural replenishment is what becomes the cause of worry.[6] The geological processes that produce sand—like the weathering of rocks and the movement of sediments through rivers cannot match the rate at which we're extracting sand from nature. Further, human interventions, such as damming rivers or diverting their natural courses block the natural downstream flow of sediment. As a result, sand fails to reach the places where it would normally accumulate, the river deltas and coastal areas. Beaches are wearing away faster than natural forces can restore them, and riverbeds are being emptied more quickly than upstream erosion can replenish them.[7]

4.3. The need for development, and the concerns to preserve ecology stands at crossroads when it comes to the issue of sand mining. The urgent need is to raise awareness that while sand is a crucial resource for economic and industrial development, it also plays a vital role in climate resilience and preserving healthy ecosystems.

SCC Online Web Edition, © 2025 EBC Publishing Pvt. Ltd.
Page 5 Wednesday, June 11, 2025

SCC Online Web Edition: https://www.scconline.com
© 2025 EBC Publishing Pvt. Ltd., Lucknow.

4.4. While a complete ban on sand mining would certainly restore ecology and preserve environment, we all know that such a measure is impractical. Way ahead is sustainable development with effective regulation. While development may be necessity for societal progress, it must be pursued with a balanced approach that prioritizes environmental conservation.[8] It is imperative for regulatory authorities to design an effective and an efficient regulatory regime and implement it by maintaining absolute standards and strict enforcement[9].

5. *Legal Framework* : We will now refer to the legal framework concerning mining and its regulation in India. The mining sector forms the backbone of key industries such as steel, cement, petroleum, petrochemicals, fertilizers, power generation and of course, for erection of civil infrastructure. Government of India Act, 1935 placed the subject of "mines" and "development of minerals" under the control of Central Legislature and Provincial Legislature vide Entry 36, List I and Entry 23, List II. However, there was no dedicated legislation to deal with issues of mining. With the advent of the Constitution, Entry 54 of List I[10] and Entry 23 List II[11] became the source of legislative competence to enact laws developing and regulating mining. Parliament enacted the Mines and Minerals (Regulation and Development) Act, 1957.[12] Section 2[13] of MMRD Act is the declaration that it is expedient in the public interest that the Union should take under its control regulation of mines and development of minerals as indicated in Schedule I. However, the scope of this enactment was limited to development and regulation of mines and minerals, with no special emphasis on the environmental concerns. Hence, recourse has to be made to the environmental legislations such as the Water Act, 1974, Air Act, 1981 and the Environment Protection Act, 1986, and policies such as the National Mineral Policy, 2008, followed by the National Mineral Policy, 2019.

6. *Environment Protection Act, 1986* : The Environment Protection Act, 1986[14], is an overarching legislation governing the field of environment protection. The object of the 1986 Act is to "*provide for the protection and improvement of environment and for matters connected there with*". Section 3[15] enable the Central Government to take such measures as are deemed or necessary for the purpose of protecting and improving the quality of the environment and also preserving, controlling and abating environmental pollution. Section 5[16] gives the Central Government the power to issue directions.

7. *EIA Notifications* : In exercise of powers under section 3(2)(v) read with the Environment Protection Rules, 1986, the Ministry of Environment, Forest and Climate Change (MoEFCC) issued an important notification, popularly referred to as the EIA Notification

SCC Online Web Edition, © 2025 EBC Publishing Pvt. Ltd.

1994.

8. *EIA Notification, 1994* : The EIA Notification was a landmark regulation that made environmental clearance mandatory for certain industrial and developmental projects, including mining. It introduced a structured process for assessing the potential environmental consequences of proposed projects before granting approval. It was stipulated that the expansion or modernization of any activity, where such expansion would result in an increase in the existing pollution load or the establishment of a new project listed under Schedule I of the said Notification, shall not be undertaken in any part of India without obtaining prior Environmental Clearance (EC) from the Central Government, in accordance with the procedure prescribed therein. This regulatory required project proponents to conduct an Environmental Impact Assessment (EIA), obtain public feedback, and implement mitigating measures to minimize environmental damage. It established a structured procedure for the grant of EC to ensure that industrial and developmental projects adhere to environmental safeguards. As per Para 2 of the Notification, any individual or entity intending to undertake a new project, or seeking expansion or modernization of an existing industry or project, as specified in Schedule I, was required to submit an application to the Secretary, MoEFCC.

8.1. Schedule I of the Notification enumerated 29 categories of projects that necessitated prior EC. Notably, Item 20 pertained specifically to mining projects, thereby bringing such activities under the purview of environmental regulation. This provision underscored the legislative intent to subject mining operations to rigorous environmental scrutiny, ensuring that mineral extraction did not proceed without due assessment of its impact on our ecology. Para 2 provided that in respect of mining projects, amongst others, the project proponent shall intimate the Government of the location site, and it may grant clearance after conducting necessary investigation and survey.

9. *EIA Notification, 2006* : Twelve years after the EIA Notification 1994, MoEFCC issued the present notification EIA Notification, 2006[17]. Para 2 of the 2006 Notification reads as under;

> *"2. Requirements of prior Environmental Clearance (EC):— The following projects or activities shall require prior environmental clearance from the concerned regulatory authority, which shall hereinafter referred to be as the Central Government in the Ministry of Environment and Forests for matters falling under Category 'A' in the Schedule and at State level the State Environment Impact Assessment Authority (SEIAA) for matters falling under Category 'B' in the said Schedule, before any construction work, or preparation of land by the project management except for securing the land, is*

SCC Online Web Edition, © 2025 EBC Publishing Pvt. Ltd.
Page 7 Wednesday, June 11, 2025

started on the project or activity:

(i) All new projects or activities listed in the Schedule to this notification;

(ii) Expansion and modernization of existing projects or activities listed in the Schedule to this notification with addition of capacity beyond the limits specified for the concerned sector, that is, projects or activities which cross the threshold limits given in the Schedule, after expansion or modernization;

(iii) Any change in product - mix in an existing manufacturing unit included in Schedule beyond the specified range."

9.1. Projects under the 2006 Notification were categorized into Category 'A' and Category 'B' based on spatial extent of potential impact on human health and natural and manmade resources. For projects included under Category A, EC from Central Government is mandated. As far as projects categorized under Category B are concerned, the EC shall be obtained from a new body created, the State Environmental Impact Assessment Authority, SEIAA. Further, Paras 5, 6 and 7 gives a detailed procedure for grant of prior EC. The same are extracted below for ready reference:

"5. Screening, Scoping and Appraisal Committees:

The same Expert Appraisal Committees (EACs) at the Central Government and SEACs (hereinafter referred to as the (EAC) and (SEAC) at the State or the Union territory level shall screen, scope and appraise projects or activities in Category 'A' and Category 'B' respectively. EAC and SEAC's shall meet at least once every' month.

(a) The composition of the EAC shall be as given in Appendix VI. The SEAC at the State or the Union territory level shall be constituted by the Central Government in consultation with the concerned State Government or the Union territory Administration with identical composition;

(b) The Central Government may, with the prior concurrence of the concerned State Governments or the Union territory Administrations, constitutes one SEAC for more than one State or Union territory for reasons of administrative convenience and cost;

(c) The EAC and SEAC shall be reconstituted after every three years;

(d) The authorised members of the EAC and SEAC, concerned, may inspect any site(s) connected with the project or activity in respect of which the prior environmental clearance is sought, for the purposes of screening or scoping or appraisal, with prior notice of at least seven days to the applicant, who shall provide necessity facilities for the inspection;

SCC Online Web Edition, © 2025 EBC Publishing Pvt. Ltd.
Page 8 Wednesday, June 11, 2025
Printed For: Choudhury's Law Office .
SCC Online Web Edition: https://www.scconline.com
© 2025 EBC Publishing Pvt. Ltd., Lucknow.

(e) The EAC and SEACs shall function on the principle of collective responsibility. The Chairperson shall endeavour to reach a consensus in each case, and if consensus cannot be reached, the view of the majority shall prevail.

6. Application for Prior Environmental Clearance (EC):

An application seeking prior environmental clearance in all cases shall be made in the prescribed Form 1 annexed herewith and Supplementary Form 1 A if applicable, as given in Appendix II, after the identification of prospective site(s) for the project and/or activities to which the application relates, before commencing any construction activity, or preparation of land, at the site by the applicant. The applicant shall furnish, along with the application, a copy of the pre-feasibility project report except that, in case of construction projects or activities (item 8 of the Schedule) in addition to Form 1 and the Supplementary Form 1 A, a copy of the conceptual plan shall be provided, instead of the pre-feasibility report.

7. Stages in the Prior Environmental Clearance (EC) Process for New Projects:

7(i) The environmental clearance process for new projects will comprise of a maximum of four stages, all of which may not apply to particular cases as set forth below in this notification. These four stages in sequential order are:

- *Stage (1) Screening (Only for Category 'B' projects and activities)*
- *Stage (2) Scoping*
- *Stage (3) Public Consultation*
- *Stage (4) Appraisal*

.....".

9.2. Under Para 8, the appropriate authority can either grant or reject prior EC. Para 9 deals with the tenure and validity of an EC and Para 10 provides for post grant monitoring. The Appendix III enumerates the generic structure of an EIA application and its essentials.

9.3. Over the years, amendments were brought about in this EIA Notification, 2006 for the purpose of strengthening the EC norms and laying down further procedures for close scrutiny. For the present purpose, we are not concerned with other details, except to indicate herein the background in which amendments leading to requirement of District Survey Report, with which we are concerned, are incorporated in the notification. The starting point for this can be said to be the decision of this Court in *Deepak Kumar* v. *State of Haryana*[18].

10. *Deepak Kumar* v. *State of Haryana* : Validity of certain mining

SCC Online Web Edition, © 2025 EBC Publishing Pvt. Ltd.

Printed For: Choudhury's Law Office .
SCC Online Web Edition: https://www.scconline.com
© 2025 EBC Publishing Pvt. Ltd., Lucknow.

leases granting permission for sand mining in violation of environment norms in the State of Haryana came up for consideration before this Court. Deprecating the practice of issuing auction notice without conducting necessary studies to analyse the impact such mining will have on the ecology, this Court held;

> *"8..... Sand mining on either side of the rivers, upstream and instream, is one of the causes for environmental degradation and also a threat to the biodiversity. Over the years, India's rivers and riparian ecology have been badly affected by the alarming rate of unrestricted sand mining which damage the ecosystem of rivers and the safety of bridges, weakening of riverbeds, destruction of natural habitats of organisms living on the riverbeds, affects fish breeding and migration, spells disaster for the conservation of many bird species, increases saline water in the rivers, etc.*
>
> *9. Extraction of alluvial material from within or near a streambed has a direct impact on the stream's physical habitat characteristics. These characteristics include bed elevation, substrate composition and stability, instream roughness elements, depth, velocity, turbidity, sediment transport, stream discharge and temperature. Altering these habitat characteristics can have deleterious impacts on both instream biota and the associated riparian habitat. The demand for sand continues to increase day by day as building and construction of new infrastructures and expansion of existing ones is continuous thereby placing immense pressure on the supply of the sand resource and hence mining activities are going on legally and illegally without any restrictions. Lack of proper planning and sand management cause disturbance of marine ecosystem and also upset the ability of natural marine processes to replenish the sand.*
>
> *10. We are expressing our deep concern since we are faced with a situation where the auction notices dated 3-6-2011 and 8-8-2011 have permitted quarrying, mining and removal of sand from instream and upstream of several rivers, which may have serious environmental impact on ephemeral, seasonal and perennial rivers and riverbeds and sand extraction may have an adverse effect on biodiversity as well. Further, it may also lead to bed degradation and sedimentation having a negative effect on the aquatic life. The rivers mentioned in the auction notices are on the foothills of the fragile Shivalik Hills. Shivalik Hills are the source of rivers like Ghaggar, Tangri, Markanda, etc. River Ghaggar is a seasonal river which rises up in the outer Himalayas between Yamuna and Satluj and enters Haryana near Pinjore, District Panchkula, which passes through Ambala and Hissar and reaches Bikaner in Rajasthan. River Markanda is also a seasonal river like Ghaggar, which also originates from the lower Shivalik Hills and enters Haryana near Ambala.*

During monsoon, this stream swells up into a raging torrent, notorious for its devastating power, as also, River Yamuna.

11. We find that it is without conducting any study on the possible environmental impact on/in the riverbeds and elsewhere the auction notices have been issued. We are of the considered view that when we are faced with a situation where extraction of alluvial material within or near a riverbed has an impact on the river's physical habitat characteristics, like river stability, flood risk, environmental degradation, loss of habitat, decline in biodiversity, it is not an answer to say that the extraction is in blocks of less than 5 ha, separated by 1 km, because their collective impact may be significant, hence the necessity of a proper environmental assessment plan.

* * *

25. Quarrying of river sand, it is true, is an important economic activity in the country with river sand forming a crucial raw material for the infrastructural development and for the construction industry but excessive instream sand and gravel mining causes the degradation of rivers. Instream mining lowers the stream bottom of rivers which may lead to bank erosion. Depletion of sand in the streambed and along coastal areas causes the deepening of rivers which may result in destruction of aquatic and riparian habitats as well. Extraction of alluvial material as already mentioned from within or near a streambed has a direct impact on the stream's physical habitat characteristics.

26. We are of the considered view that it is highly necessary to have an effective framework of mining plan which will take care of all environmental issues and also evolve a long-term rational and sustainable use of natural resource base and also the bio-assessment protocol. Sand mining, it may be noted, may have an adverse effect on biodiversity as loss of habitat caused by sand mining will affect various species, flora and fauna and it may also destabilise the soil structure of river banks and often leaves isolated islands. We find that, taking note of those technical, scientific and environmental matters, MoEF, Government of India, issued various recommendations in March 2010 followed by the Model Rules, 2010 framed by the Ministry of Mines which have to be given effect to, inculcating the spirit of Article 48-A and Article 51-A(g) read with Article 21 of the Constitution."

(emphasis supplied)

10.1. The above quoted observations became the jurisprudential basis for evaluating the DSR for gauging the impact assessment of sand-mining on the ecology and the environment in general even at the district level.

11. *EIA Notification 2016:* Following the decision of this Court in *Deepak Kumar* (supra) the Government amended the EIA Notification 2006 to introduce special procedure with respect to river bed mining, sand mining and mining of minor minerals. The preamble of this notification is important even for considering the nature, scope and ambit of the DSR which has fallen for our consideration. The relevant portion of the preamble is as under;

> *"And whereas, in pursuance to the order of Hon'ble Supreme Court dated the 27th February, 2012 in I.A. No. 12-13 of 2011 in Special Leave Petition (C) No. 19628-19629 of 2009, in the matter of* Deepak Kumar *v.* State of Haryana, *prior environmental clearance has now become mandatory for mining of minor minerals irrespective of the area of mining lease;*
>
> *And whereas, as a result of the above said Order of Hon'ble Supreme Court, the number of cases which are now required to obtain prior environmental clearance has increased substantially;*
>
> *And whereas, the Hon'ble National Green Tribunal, vide its order dated the 13th January, 2015 in the matter regarding sand mining has directed for making a policy on environmental clearance for mining leases in cluster for minor minerals;*
>
> *And whereas, the State Governments have represented for streamlining the process of environmental clearance for mining of minor mineral;*
>
> *And whereas, the Ministry of Environment, Forest and Climate Change in consultation with State Governments, has prepared Guidelines on Sustainable Sand Mining detailing the provisions on environmental clearance for cluster, creation of District Environment Impact Assessment Authority and proper monitoring of sand mining using information technology and information technology enabled services to track the mined out material from source to destination;*
>
> *Now, therefore, in exercise of the powers conferred by subsection (1) and clause (v) of sub-section (2) of section 3 of the Environment (Protection) Act, 1986 read with clause (d) of sub-rule (3) of rule 5 of the Environment (Protection) Rules, 1986, the Central Government hereby makes the following amendments in the said notification, namely:—*
>
> *In the said notification,- (a) in paragraph 2, after the words "in the said Schedule", the following words shall be inserted, namely:— "and at District level, the District Environment Impact Assessment Authority (DEIAA) for matters falling under Category 'B2' for mining of minor minerals in the said Schedule"; (b) after paragraph 3, the following paragraph shall be inserted…"*

12. *Establishment of District Level Environment Impact*

SCC Online Web Edition, © 2025 EBC Publishing Pvt. Ltd.

Assessment Authority (DEIAA) & District Expert Appraisal Committee (DEAC) under Para 3A : As is evident from the above extracted portion of the preamble to the EIA Notification 2016, two bodies namely, the DEIAA and DEAC have been established by inserting Para 3A to the EIA Notification, 2006 for grant of EC to a newly introduced category (by amending para 2), called category B2. The amended Para 3A establishing DEIAA and DEAC, is extracted herein below for ready reference;

"3A. District Level Environment Impact Assessment Authority:

(I) A District Level Environment Impact Assessment Authority hereinafter referred to as the DEIAA shall be constituted by the Central Government under sub-section (3) of section 3 of the Environment (Protection) Act, 1986 comprising of four members including a Chairperson and a Member-Secretary.

(2) The District Magistrate or District Collector shall be the Chairperson of the DEIAA.

(3) The Sub-Divisional Magistrate or Sub-Divisional Officer of the district head quarter of the concerned district of the State shall be the Member-Secretary of the DEIAA.

(4) The other two members of the DEIAA shall be the senior most Divisional Forest Officer and one expert. The expert shall be nominated by the Divisional Commissioner of the Division or Chief Conservator of Forest, as the case may be. The term and qualifications of the expert fulfilling the eligibility criteria are given in Appendix VII to this notification.

(5) The members of the DEIAA who are serving officers of the concerned State Government or the Union territory Administration shall be ex-officio members except the expert member.

(6) The District Level Expert Appraisal Committee hereinafter referred to as the DEAC shall comprise of eleven members, including a Chairman and a Member-Secretary.

(7) The senior most Executive Engineer, Irrigation Department in the district of respective State Governments or Union territory Administration shall be the Chairperson of the DEAC.

(8) The Assistant Director or Deputy Director of the Department of Mines and Geology or District Mines Officer or Geologist of the district shall be the Member-Secretary of the DEAC in that order.

(9) A representative of the State Pollution Control Board or Committee, senior most Sub-Divisional Officer (Forest) in the district, representative of Remote Sensing Department or

SCC Online Web Edition, © 2025 EBC Publishing Pvt. Ltd.

© 2025 EBC Publishing Pvt. Ltd., Lucknow.

Geology Department or State Ground Water Department, one occupational health expert or Medical Officer to be nominated by the District Magistrate or District Collector, Engineer from Zila Parishad, and three expert members to be nominated by the Divisional Commissioner or Chief Conservator of Forest, as the case may be, shall be the other members of the DEAC. The term and qualifications of the experts fulfilling the eligibility criteria are given in Appendix VII to this notification.

10) The members of the DEAC who are serving officers of the concerned State Government or the Union territory Administration shall be ex-officio members except the expert members.

(11) The District Magistrate or District Collector shall notify an agency to act as Secretariat for the DEIAA and the DEAC and shall provide all financial and logistic support for their statutory functions.

(12) The DEIAA and DEAC shall exercise the powers and follow the procedure as specified in the said notification, as amended from time to time.

(13) The DEAC shall function on the principle of collective responsibility and the Chairman shall endeavor to reach a consensus in each case and if consensus cannot be reached, the view of the majority shall prevail.";

13. *New category called Category B2 for sandmining in districts was introduced through para 4(iv)*> : Paragraph 4 of the EIA notification 2006 relating to categorization of projects and activities was also amended and category B2 falling within the jurisdiction of the DEIAA, acting on the decision and recommendation of DEAC is introduced. Relevant portion of para 4(iv) is as under;

"4. Categorization of projects and activities:

(i)

(ii)

(iii)

(iv) The 'B2' Category projects pertaining to mining of minor mineral of lease area less than or equal to five hectare shall require prior environmental clearance from DEIAA. The DELAA shall base its decision on the recommendations of DEAC, as constituted for this notification."

14. *Preparation of District Survey Report Introduced through Para 7(iii)* : Para 7 of the EIA Notification 2006 has already been reproduced. It relates to the process before grant of EC. While 7(i) related to process for new projects, which comprises of four stages namely, screening, scoping, public consultation and appraisal

SCC Online Web Edition, © 2025 EBC Publishing Pvt. Ltd.

© 2025 EBC Publishing Pvt. Ltd., Lucknow.

respectively; para 7(ii) relates to process for expansion or modernisation or change of project mix in existing projects. It is in this very paragraph that the amendment introduces para 7(iii). Introduction of para 7(iii) for the first time contemplated, preparation of DSR for sand mining or river bed mining and mining of other minor minerals. Para 7(iii) reads as under;

"7. Stages in the Prior Environmental Clearance (EC) Process for New Projects

(i) ....

(ii) ...

(iii) Preparation of District Survey Report for Sand Mining or River Bed Mining and Mining of other Minor Minerals:

(a) The prescribed procedure for preparation of District Survey Report for sand mining or river bed mining and mining of other minor minerals is given in Appendix X.

(b) The prescribed procedure for environmental clearance for mining of minor minerals including cluster situation is given in Appendix XI."

15. *Procedure for preparation of DSR introduced through Appendix X* : Procedure for preparation of the above referred DSR under para 7(iii) is laid down in great detail in Appendix X to the notification. Appendix X, apart from laying down the detailed procedure, also declares that the, "*District Survey Report shall form the basis for application for environmental clearance, preparation of reports and appraisal of projects. The Report shall be updated once every five years*." Appendix X is as follows;

"PROCEDURE FOR PREPARATION OF DISTRICT SURVEY REPORT

The main objective of the preparation of District Survey Report (as per the Sustainable Sand Mining Guideline) is to ensure the following:

Identification of areas of aggradations or deposition where mining can be allowed; and identification of areas of erosion and proximity to infrastructural structures and installations where mining should be prohibited and calculation of annual rate of replenishment and allowing time for replenishment after mining in that area.

The report shall have the following structure:

1. Introduction

2. Overview of Mining Activity in the District

3. The List of Mining Leases in the District with location, area and period of validity

4. Details of Royalty or Revenue received in last three years

5. Detail of Production of Sand or Bajari or minor mineral in last three years

SCC Online Web Edition, © 2025 EBC Publishing Pvt. Ltd.
Page 15 Wednesday, June 11, 2025

6. Process of Deposition of Sediments in the rivers of the District

7. General Profile of the District

8. Land Utilization Pattern in the district : Forest, Agriculture, Horticulture, Mining etc.

9. Physiography of the District

10. Rainfall : month-wise

11. Geology and Mineral Wealth

In addition to the above, the report shall contain the following:

(a) District wise detail of river or stream and other sand source.

(b) District wise availability of sand or gravel or aggregate resources.

(c) District wise detail of existing mining leases of land and aggregates.

A survey shall be carried out by the DEIAA with the assistance of Geology Department or Irrigation Department or Forest Department or Public Works Department or Ground Water Boards or Remote Sensing Department or Mining Department etc. in the district.

Drainage system with description of main rivers

* * *

Methodology adopted for calculating mineral potential

The mineral potential is calculated based on field investigation and geology of the catchment area of the river or streams. As per the site conditions and location, depth of minable mineral is defined. The area for removal of the mineral in a river or stream can be decided depending on geo-morphology and other factors, it can be 50 % to 60 % of the area of a particular river or stream. For example in some hill States mineral constituents like boulders, river born Bajri, sand up to a depth of one meter are considered as resource mineral. Other constituents like clay and silt are excluded as waste while calculating the mineral potential of particular river or stream.

The District Survey Report shall be prepared for each minor mineral in the district separately and its draft shall be placed in the public domain by keeping its copy in Collectorate and posting it on district's website for twenty one days. The comments received shall be considered and if found fit, shall be incorporated in the final Report to be finalised within six months by the DEIAA.

The District Survey Report shall form the basis for application for environmental clearance, preparation of reports and appraisal of projects. The Report shall be updated once every five years."

16. *Challenge to the Notification 2016 the direction of NGT in Satendra Pandey's case* : Environmental concerns were expressed that the amendments brought about by the EIA notification 2016 did not translate into action the mandate of this Court's decision in *Deepak Kumar* (supra). These concerns were considered by the NGT in *Satendra Pandey* v. *MoEFCC*[19] wherein the following directions were issued.

> *"22. For all these reasons, we direct that the procedure laid down in the impugned Notification be brought in consonance and in accord with the directions passed in the case of* Deepak Kumar *(supra) by (i) providing for EIA, EMP and therefore, Public Consultation for all areas from 5 to 25 ha falling under Category B-2 at par with Category B-1 by SEAC/SIEAA as well as for cluster situation wherever it is not provided; (ii) Form-1M be made more comprehensive for areas of 0 to 5 ha by dispensing with the requirement for Public Consultation to be evaluated by SEAC for recommendation of grant EC by SEIAA instead of DEAC/DEIAA; (iii) if a cluster or an individual lease size exceeds 5 ha the EIA/EMP be made applicable in the process of grant of prior environmental clearance; (iv) EIA and/or EMP be prepared for the entire cluster in terms of recommendation 5 (supra) of the Guidelines for the purpose of recommendations 6, 7 and 8 thereof; (v) revise the procedure to also incorporate procedure with respect to annual rate of replenishment and time frame for replenishment after mining closure in an area; (vi) the MoEF & CC to prepare guidelines for calculation of the cost of restitution of damage caused to mined-out areas along with the Net Present Value of Ecological Services forgone because of illegal or unscientific mining."*

17. *EIA Notification for prescribing procedure for preparation of DSR of minor minerals other than sandmining and river bed mining:* A further amendment was introduced to the EIA Notification, 2006 as amendment by the EIA Notification 2016 for the purpose of prescribing a separate procedure for preparing DSR for minor minerals other than sand mining and river bed mining through notification dated 25.07.2018. This amendment introduces Part II to Appendix X which reads as under;

> *II. PROCEDURE FOR PREPARATION OF DISTRICT SURVEY REPORT OF MINOR MINERALS OTHER THAN SAND MINING OR RIVER BED MINING*
>
> *The District Survey Report shall be prepared for each minor mineral in the district separately and its draft shall be placed in the public domain by keeping its copy in Collectorate and posting it on district's website for twenty one days. Report to be finalised within six months by the DEIAA.

The District Survey Report for minor minerals other than sand mining or River bed mining shall be as per structure mentioned below:

FORMAT FOR PREPARATION OF DISTRICT SURVEY REPORT FOR MINOR MINERALS OTHER THAN SAND MINING OR RIVER BED MINING

1) Introduction

2) overview of Mining Activity in the District;

3) general profile of the district;

4) geology of the district;

5) drainage of irrigation pattern;

6) land utilization pattern in the district : forest, agricultural, horticultural, mining etc;

7) surface water and ground water scenario of the district;

8) rainfall of the district and climatic condition;

9) details of the mining leases in the district……..

10) details of royalty or revenue received in last three years;

11) details of production of minor minerals in last three years;

12) mineral map of the district;

13) list of Letter of Intent (LOI) Holders in the district along with its validity….

14) total mineral reserve available in the District.

15) quality/grade of mineral available in the District;

16) use of mineral;

17) demand and Supply of the Mineral in the last three years;

18) mining leases marked on the map of the district;

19) details of the area of where there is a cluster of mining leases viz. number of mining leases, location (latitude and longitude);

20) details of Eco-sensitive Area, if any, in the District;

21) impact on the Environment (Air, Water, Noise, Soil, Flora & Fauna, land use, agriculture, forest etc.) due to mining activity;

22) remedial Measures to mitigate the impact of mining on the Environment;

23) reclamation of Mined out area (best practice already implemented in the district, requirement as per roles and regulation, proposed reclamation plan);

24) risk Assessment & Disaster Management Plan;

25) details of the Occupational Health issues in the District. (Last five-year data of number of patients of Silicosis & Tuberculosis is also needs to be submitted);

SCC Online Web Edition, © 2025 EBC Publishing Pvt. Ltd.

26) plantation and Green Belt development in respect of leases already granted in the District;

27) any other information.

18. *Enforcement and Monitoring Guidelines for Sand Mining, 2020* : It is important to mention at this stage the MoEFCC has also issued the Sustainable Sand Mining Management Guidelines, 2016[20] and the Enforcement and Monitoring Guidelines for Sand Mining, 2020[21]. The 2020 Guidelines does not replace the 2016 Guidelines, rather, they both supplement and complement each other.

18.1. Building on the 2016 Guidelines, MoEFCC came with the 2020 Guidelines. One of the key objectives with which the said guidelines were framed was to regulate the sand and gravel mining in the country. Para 4.1.1 deals with preparation of DSR. It is recognized therein that, "*preparation of District Survey Report is a very important step and sustainable sand mining in any part of the country will depends on the quality of District Survey Report*." A detailed procedure is given in para 4.1.1, the relevant portion of which is extracted as under;

"*a) District Survey Report for sand mining shall be prepared before the auction/e-auction/grant of the mining lease/Letter of Intent (LoI) by Mining department or department dealing the mining activity in respective states.*

b) The first step is to develop the inventory of the River Bed Material and Other sand sources in the District. In order to make the inventory of River Bed Material, a detailed survey of the district needs to be carried out, to identify the source of River Bed Material and alternative source of sand (M-Sand). The source will include rivers, de-siltation of reservoir/dams, Patta lands/Khatedari Land, M-sand etc.

.....

c) District Survey Report is to be prepared in such a way that it not only identifies the mineral-bearing area but also define the mining and no mining zones considering various environmental and social factors.

d) Identification of the source of Sand & M-Sand.....

e) Defining the sources of Sand/M-Sand in the district is the next step for identification of the potential area of deposition/aggradation wherein mining lease could be granted.....

* * *

p) Public consultation-The Comments of the various stakeholders may be sought on the list of mining lease to be auctioned. The State Government shall give an advertisement in the local and national newspaper for seeking comments of the general public on the list of mining lease included in the DSR. The DSR should be

SCC Online Web Edition, © 2025 EBC Publishing Pvt. Ltd.
Page 19 Wednesday, June 11, 2025

SCC Online Web Edition: https://www.scconline.com
© 2025 EBC Publishing Pvt. Ltd., Lucknow.

placed in the public domain for at least one month from the date of publication of the advertisement for obtaining comments of the general public. The comments so received shall be placed before the sub-divisional committee for active consideration. The final list of sand mining areas [leases to be granted on riverbed & Patta land/Khatedari land, desiltation location (ponds/lakes/dams), M-Sand Plants (alternate source of sand)] after the public hearing needs to be defined in the final DSR in the format as per Annexure-V. The details regarding cluster and contiguous cluster needs to be provided in Annexure-VI. The details of the transportation need to be provided in Annexure-VII."

19. Decision of this Court in *State of Bihar* v. *Pawan Kumar*[22] : Considering the mandatory requirement of preparation of DSR, which shall form the basis for grant of EC for sand mining in any districts, this Court specifically directed appraisal by SEIAA and SEAC as under;

16.2. Needless to state that while preparing DSRs and the appraisal thereof by SEAC and SEIAA, it should be ensured that a strict adherence to the procedure and parameters laid down in the policy of January 2020 should be followed.

19.1. Further, noting the existence of the *Enforcement and Monitoring Guidelines for Sand Mining, 2020*, the Court directed as under;

"*12. It could thus be seen that in accordance with the 2020 Guidelines, the DSR is required to be prepared before the auction/e-auction/grant of mining lease by Mining Department or Department dealing with mining activity in the respective States. It is further provided that the potential site for mining having its impact on the forest, protected area, habitation and bridges should be avoided. For this, a Sub-Divisional Committee is required to be formed which, after the site visit, is required to decide regarding the suitability of the sites for mining. The Sub-Divisional Committee is further required to record its reasons for selecting the mining lease in the patta land. Various details are required to be given in the annexures appended to the said policy.*

13. It is further to be noted that Appendix X of the Notification dated 15-1-2016, issued by MoEF and CC also provides for composition of the Sub-Divisional Committee:

"A Sub-Divisional Committee comprising of Sub-Divisional Magistrate, Officers from Irrigation Department, State Pollution Control Board or Committee, Forest Department, Geology or Mining Officer shall visit each site for which environmental clearance has been applied for and make recommendation on suitability of site for mining or prohibition thereof."

14. It is to be noted that with the advent of modern technology, various technological gadgets like drones and satellite imaging, etc. can be used for identification of the potential sites and preparation of the DSR and also to check misuse and unauthorised mining."

(emphasis supplied).

19.2. We have also noted that the NGT has been taking a consistent stand about the mandatory requirement of a DSR being a condition precedent to carry mining activity.[23] Further, the decision of the NGT that DSR should be the basis for an application for grant of an EC and that an application without DSR is incomplete cannot be processed or proceeded further is correct in law.[24] We may add that a 'draft DSR' is virtually a non-existing DSR for purpose of grant of environmental clearance.

20. *Conclusion:* Having considered the regulatory regime introduced from time to time, increasing the width as well as the depth of scrutiny before granting an environmental clearance for sand mining, we are of the opinion that there is a mandatory requirement of preparation of a DSR. The DSR shall form the basis for application of environmental clearance. It shall also be the basis for preparation of reports and also appraisal of the projects. Another important facet of DSR is that it shall be prepared for all the districts and the draft is to be placed in the public domain. There is a requirement for keeping a copy of DSR in Collectorate. It must also be posted on the district's website for 21 days. After comments are received, they shall be considered and if found correct, they will be incorporated in the final report. The final DSR will then be finalized within 6 months by the DEIAA. The lifetime of the report is five years. After five years the existing DSR will not be tenable and a new DSR will have to be prepared and finalized. The purpose and object of prescribing a lifetime of five years for subsistence of a DSR is for the reason that the position of ecology and the environment is rapidly changing and the position that exists five years back, may not subsist for later days. It is true that it might have changed even before the expiry of five years but a reasonable estimate, to work as a benchmark is a policy consideration. May be a precautionary principle, it is not only legal and valid but is also mandatory. It must be enforced strictly and with all vigor.

21. We conclude by holding that:

(i). A District Survey Report is a document of seminal importance as it enables informed decision making.

(ii). Preparation of a DSR as per the procedure prescribed for its preparation under Appendix X, read with para 7(iii)(a), is required to be followed meticulously.

(iii). A valid and a subsisting DSR alone can be the basis for an

SCC Online Web Edition: https://www.scconline.com
© 2025 EBC Publishing Pvt. Ltd., Lucknow.

application for grant of EC. A draft DSR is untenable for grant of an EC.

(iv). Preparation of reports and appraisal of projects by DEIAA and DEAC shall be on the basis of a valid and a subsisting DSR.

(v). DEIAA and DEAC are recognized as the authorities fastened with the statutory duty of preparing the DSR every five years and this duty compels them to have a comprehensive and a real time perspective of the environment position of the district including its eco-sensitivity and other fragilities.

22. For the reasons stated above, we reiterate our decision of dismissing these civil appeals against the judgment and order passed by the NGT holding that the e-auction notice dated 13.02.2023 is illegal and contrary to law.

[9] *At the same time, while only so much can come from the regulatory side, we must also endeavor to explore alternatives to sand mining. Researchers from the University of Geneva (UNIGE) and the Sustainable Minerals Institute at the University of Queensland (UQ) have identified a sustainable alternative to natural sand, termed "ore-sand".*[9] *Derived from mineral processing waste, ore-sand offers a dual solution to two pressing global challenges : the growing demand for sand and the massive accumulation of mining waste, which currently amounts to 30-60 billion tonnes annually. By repurposing what was once considered discarded material, ore-sand not only reduces environmental pressure on natural ecosystems but also promotes a circular economy. According to experts like UNIGE's Pascal*

Peduzzi and UQ's Daniel Franks, this innovation can significantly cut down on mine tailings while providing a responsible, scalable sand resource. If adopted widely, ore-sand could help shift the global construction industry toward more sustainable and environmentally conscious practices.

[10] 54 (List I) : Regulation of mines and minerals development to the extent to which such regulation and development under the control of the Union is declared by Parliament by law to be expedient in the public interest.

COMMON ORDER

A.The Writ Petitions:-

All these Writ Petitions are connected and, as such, are taken up and disposed of by this common order.

1.1. In all these Writ Petitions, the core issue involves the action of the respondents in passing individual orders that direct the Writ Petitioners, who are the licensees operating quarries without Environmental Clearance (in short, 'EC'), for the period from 15.01.2016 to 10.01.2017, thereby requiring them to pay 100% of the value of the mineral for the relevant period.

https://www.mhc.tn.gov.in/judis

WEB COPY

1.2. All of these writ petitioners have been mining either major or minor minerals at the relevant time, and all have obtained licenses for areas of less than 5 hectares.

B.The Facts:-

2. The case in brief of the Petitioners is that they were quarrying minor minerals, and originally, there was no necessity for the persons engaged in this activity to obtain prior Environmental Clearance (in short 'EC'). Neither the Environment Protection Act,1986 nor the Rules framed thereunder, including the notifications issued by the Ministry of Environment and Forests (in short 'MoEF'), Government of India, mandated the obtaining of EC. However, on 27.2.2012, the Hon'ble Supreme Court of India delivered a judgment in ***Deepak Kumar and Others Vs. State of Haryana***[1]. According to the said judgment, the Hon'ble Supreme Court held that even in respect of quarrying of minor minerals, both areas of less than 5 hectares and more than 5 hectares need prior EC. However, it was specified that such EC is necessary at the time of renewal. Subsequently, on 18.05.2012, the MoEF issued a circular in compliance with the

1 (2012) 4 SCC 629

https://www.mhc.tn.gov.in/judis

WEB COPY

Judgment of the Hon'ble Supreme Court of India.

2.1. Pursuant thereto, the State of Tamil Nadu introduced Rules 41 and 42 to the Tamil Nadu Minor Mineral Concession Rules, 1959, through an amendment made by G.O.(Ms) No. 79, Industries Department, dated 06.04.2015. Rule 42 (iii) and (iv) were introduced, directing the holders of licenses to quarry minor minerals, including granites, to submit applications for EC within 180 days from the date the said rules came into force. Failure to submit such an application entitled the District Collector to cancel the lease. The said rule came into effect from the date of publication of the amendment in the Gazette, i.e., 22.04.2015. Subsequently, by an amendment dated 29.05.2015, the period of 180 days was amended to 270 days, effective from 27.01.2016. Further, the period was extended to 390 days from 13.05.2016, then to 450 days and from 14.07.2016, to 630 days. Thus, the 630-day period granted by the State of Tamil Nadu for quarry operators to submit applications for EC lasted until 10.01.2017. From 10.01.2017, all quarrying operations were halted, and no one has quarried without the EC.

https://www.mhc.tn.gov.in/judis

WEB COPY

2.2. In the meantime, on 15.01.2016, the Ministry of Environment and Forests, Government of India, amended sub-rule 3 of Rule 5 of the Environment Protection Rules, 1986, by introducing Rule 3A concerning the formation of the District Level Environment Impact Assessment Authority, while prescribing Form - VIII, application for mining of minor minerals under Category B2 for less than or equal to 5 hectares. On 18.04.2017, the National Green Tribunal, New Delhi, dismissed M.A. No. 260 of 2017 in O.A. No. 123 of 2014 filed by the State of Tamil Nadu, seeking an extension of time to implement the directions contained in the Tribunal's Judgment dated 13.01.2015, by one year or any other reasonable period.

2.3. Under these circumstances, in September 2019, the State of Tamil Nadu began issuing demand notices to those who had not submitted their applications for EC. Subsequently, notices were also issued to those who submitted applications by the cut-off date, which were pending consideration by the State Environmental Impact Assessment Authority of Tamil Nadu. Previously, when the respondents issued orders in some cases, the learned Single

https://www.mhc.tn.gov.in/judis

WEB COPY

Judges upheld those orders. However, in other matters, the orders were quashed on the grounds of non-compliance with the principles of natural justice. All these matters were carried on appeal in a batch of Writ Appeals by both individuals and the State, with some Writ Petitions referred to the Division Bench. By the Judgment of the Hon'ble First Division Bench, dated 15.02.2024(in which I was also a member), it was held that the orders could not have been issued without hearing the writ petitioners. The court directed that the final orders passed by the respondents be treated as show cause notices, granting the writ petitioners the opportunity to submit their explanations and instructing the respondents to consider those explanations and issue orders accordingly. Consequently, all these impugned orders were passed, leading to the Writ Petitions.

2.4. Similar are the contentions regarding the Writ Petitioners who were quarrying major minerals, except for the rule position. They argue that at the relevant time, there was no mandate under the Mines and Minerals (Regulation and Development) Act, 1957, the rules framed thereunder, the Environment

https://www.mhc.tn.gov.in/judis

WEB COPY

Protection Act, 1986, or the notifications issued in relation to leases under 5 hectares. This issue was not specifically addressed by the Hon'ble Supreme Court of India either. When it was made mandatory for the first time, the quarrying operations had already been halted. Therefore, their activities were never in violation of the law. Thus, the orders passed against them are bad in law.

2.5. Furthermore, both groups of Writ Petitioners contend that they submitted their application on time, but it was not considered promptly by the authorities. They cannot be held responsible for this delay, especially since the minerals were removed with the proper permits and payment of applicable fees.

C. Contentions made by the Petitioners:-

3. The impugned orders are inherently flawed, as the State itself extended the time up to 10.01.2017, before which there was no legal mandate to obtain EC. All these licensees were quarrying with valid licenses and after obtaining permissions from the respective District Collectors. The seignorage fee has also

https://www.mhc.tn.gov.in/judis

WEB COPY

been paid for the quarried minerals. Additionally, all other charges have been settled. When the State itself granted permission and collected the seignorage fee along with all the charges, and was advocating for these licensees by presenting the necessity to quarry in the interest of development before the National Green Tribunal while seeking an extension, there is no justification for turning around and imposing a compensation of hundred percent value of the mineral.

3.1. They further contend that their quarrying was not illegal, and therefore 100% of the mineral's value cannot be imposed on them. They argue that all these orders are stereotype orders, failing to consider the numerous factual circumstances relevant to each petitioner; thus, once again, the impugned orders suffer from a non-application of mind.

3.2. The case of the Writ Petitioners who were quarrying major minerals is that, for the first time, the Environment Impact Assessment (EIA) notification dated 27.01.1994 introduced the requirement to obtain an EC. Paragraph No.2

https://www.mhc.tn.gov.in/judis

WEB COPY

(1) (a) provides for the requirements and procedure for seeking an EC. According to this provision, only new projects or the expansion and modernization of existing projects require an EC. The schedule to the notification listed the projects that require an EC, and Entry 20 to the Schedule mandated mining projects (major minerals) with leases of more than 5 hectares. Subsequently, the above notification was superseded by the Environment Impact Assessment (EIA) notification dated 14.09.2006. As per the EIA 2006, there was no requirement for an EC in respect of minerals mined in lease areas of less than 5 hectares. On 28.10.2004, the Government of India issued a Circular clarifying that all mining projects of major minerals of more than 5 hectares shall obtain an EC at the time of lease renewal.

3.3. While so, the Hon'ble Supreme Court of India in ***Deepak Kumar's case*** (cited supra) was dealing with minor minerals, wherein it held that leases for minor minerals, including their renewal for an area of less than 5 hectares, should be granted by the States / Union Territories only after obtaining EC from the MoEF. Subsequently, an Office Memorandum dated 18.05.2012 was issued

https://www.mhc.tn.gov.in/judis

WEB COPY

by the MoEF, mandating EC in relation to minor minerals. When a doubt arose following the Judgment of the Hon'ble Supreme Court of India in ***Deepak Kumar's case*** (cited supra), the State Environment Impact Assessment Authority, Karnataka, sought clarification regarding the applicability of the rule relating to prior EC for licensees quarrying major minerals of less than 5 hectares. A clarification was issued by the MoEF on 04.01.2013, expressly stating that no prior EC is required for mining projects involving minor minerals with a lease area of less than 5 hectares. Thereafter, only by the EIA notification dated 17.10.2014 were all new mining operations required to obtain prior EC, even for mining areas of less than 5 hectares. However, the necessity will arise only at the stage of renewal of the mining lease or if the activity is enhanced.

3.4. Thus, on 13.01.2015, the National Green Tribunal in the case of ***Himmat Singh Shekhawat Vs. State of Rajasthan and Others*** (O.A.No.123 of 2014) held that obtaining an EC is mandatory for quarries smaller than 5 hectares concerning minor minerals. Once again, M/s Adhunik Cements, having a mining lease, sought clarification from the MoEF regarding the requirement of prior EC in cases where mining operations were being carried out and continued

https://www.mhc.tn.gov.in/judis

WEB COPY

before the amendment of the EIA notification on 07.10.2014. The MoEF issued a clarification via letter dated 08.01.2016, stating that after 07.10.2014, all new mining operations required prior EC, and for existing mines, EC had to be obtained only at the time of renewal of mining leases. It categorically clarified that for major minerals, as long as they continued within their consented capacity and were operating before 07.10.2014, they need EC at the time of renewal. Subsequently, the MoEF also issued the EIA notification dated 15.01.2016, which made EC mandatory solely for minor minerals.

3.5. As a matter of fact, this position was recorded by the National Green Tribunal in ***Jatinder Singh Vs. Union of India and Others,*** (O.A.No.495 of 2015) which has held in paragraph No.13 that the necessary notification regarding the need for an Environmental Clearance (EC) for mining projects of major minerals with a lease area of less than 5 hectares would also be issued. Under these circumstances, on 02.08.2017, the Hon'ble Supreme Court of India delivered a Judgment in ***Common Cause Vs. Union of India***[2]. By this Judgment, the Hon'ble Supreme Court of India issued a series of directions

2 (2017) 9 SCC 499

https://www.mhc.tn.gov.in/judis

WEB COPY

concerning illegal mining of iron ore and manganese in the State of Odisha. It is pertinent to note that these directions were also issued for lease areas of more than 5 hectares.

3.6. The Hon'ble National Green Tribunal (Principal Bench) in ***Sathyendra Pandey Vs. MoEF and Others*** (O.A.No.186 of 2018) held that the EIA notification dated 15.01.2016 must align with the Judgment of the Hon'ble Supreme Court of India in ***Deepak Kumar's case*** (cited supra). Subsequently, the National Green Tribunal in ***Vikrant Tongad Vs. Union of India*** (E.A.No.55 of 2018 in O.A.No.520 of 2016) also suspended the operation of the EIA notification dated 15.01.2016, as it was contrary to the Judgment of the National Green Tribunal in O.A.No.186 of 2018. Given the ambiguity still persisting regarding major minerals in mining lease areas of less than 5 hectares, the State Environmental Impact Assessment Authority of Andhra Pradesh sought clarification through its letter dated 01.11.2018. However, in the interim, during January 2017, all the District Authorities directed lessees of major minerals with lease areas of less than 5 hectares to halt mining operations and refused to issue

https://www.mhc.tn.gov.in/judis

WEB COPY

transport permissions, citing the EIA notification dated 15.01.2016. Consequently, mining operations were suspended. On 03.04.2017, the MoEF clarified that the notification dated 15.01.2016 would apply to major minerals. Another notification dated 14.03.2017 was issued for granting EC to violators. Under these circumstances, for the period from 15.01.2016 to 10.01.2017, the full value of the minerals was sought from these licensees, thus they are before this Court.

3.7. The specific case of the Writ Petitioners is that the Judgment of the Hon'ble Supreme Court of India in ***the Common Cause case*** (cited supra) is not applicable to them. They contend that the respondents have consciously refused to publish or notify any mechanism for major minerals under 5 hectares to obtain EC, which amounts to a promise, leading the petitioners to have a substantive and legitimate expectation that no EC was required. Furthermore, they argue that the State of Tamil Nadu's pleading before the National Green Tribunal was otherwise, and a functional mechanism in the State Level Environment Impact Assessment Authority was also absent. Finally, the orders

https://www.mhc.tn.gov.in/judis

WEB COPY

were passed without specific consideration of their respective grounds, and they were issued without application of mind and without compliance with the principles of natural justice.

D.Case of the Respondents:-

4. The respondents resist the Writ Petitions by filing a common counter affidavit.

4.1. It is their case that after the Environment Protection Act, 1986, the mechanism for granting Environmental Clearances (EC) for mining activities came into effect with the notification from the Ministry of Environment and Forests (MoEF) dated 27.01.1994, issued under Rule 5 (3) of the Environment Protection Rules, 1986, in conjunction with Rule 3 (2) (v) of the Rules. This notification prescribes EC for major minerals mining projects exceeding 5 hectares. This notification was later superseded by a notification dated 14.09.2006 from the MoEF, which listed projects requiring prior EC in the schedule. The notification categorizes projects into two types: Category A,

https://www.mhc.tn.gov.in/judis

WEB COPY

which requires prior EC from the MoEF, and Category B, which requires EC from the State Environment Impact Assessment Authority. According to the issued notification, projects covering an area greater than 50 hectares require EC from the MoEF, whereas areas ranging from 5 to 50 hectares must obtain EC from the State Environment Impact Assessment Authority. The procedure for granting EC from both the State and Central authorities is similar, involving screening, scoping, public consultation, appraisal, and recommendations from the Expert Appraisal Committee, which leads to the clearance decision. This process aligns with the requirements of the Environment Impact Assessment Appraisal. Projects under Category B are further sub-categorized into B1 and B2 categories.

4.2. Subsequently, on 27.02.2012, the Judgment of the Hon'ble Supreme Court of India in ***Deepak Kumar's case*** (cited supra) directed all the States and Union Territories to grant leases of minor minerals, including renewals of areas less than 5 hectares, only after obtaining EC from the MoEF. Through an Office Memorandum dated 18.05.2012, the MoEF issued a Circular to this effect,

https://www.mhc.tn.gov.in/judis

WEB COPY

stating that projects less than 5 hectares should be treated under Category B. Thereafter, Rule 42 was inserted into the Tamil Nadu Minor Mineral Concession Rules, 1959, through G.O.Ms.No.79 dated 06.04.2015. Initially, 180 days were granted for existing mining leases to submit EC, which was extended on various occasions, finally extended to 630 days per G.O.Ms.No.105 (Industries Department) dated 14.07.2016, with a further extension on 10.01.2017.

4.3. The National Green Tribunal in ***Ajay Tiwari Vs. State of UP,*** by a Judgment dated 12. 02. 2013, held that exempting major minerals of less than 5 hectares would be against the spirit of the judgment in ***Deepak Kumar's case*** (cited supra). In ***Jatinder Singh's case*** (O. A. No. 495 of 2015), the National Green Tribunal, by an order dated 09.02.2016, mandated that all applicants seek EC for carrying out mining activities for minor or major minerals, even if the lease area is less than 5 hectares. It expressly held that the judgment in ***Deepak Kumar' s case*** (cited supra) would apply to both minor and major minerals. Thereafter, on 04.05.2016, in ***Naresh Zargar Vs. State of Madhya Pradesh*** (O.A.No. 34 of 2016), the National Green Tribunal ruled that all circulars issued

https://www.mhc.tn.gov.in/judis

WEB COPY

contrary to the Tribunal's orders are illegal and directed all mine owners who had not submitted their applications as of 31.03.2016 to the SEIAA, DEIAA, and DEAC to shut down forthwith and not to carry on mining activities. To implement the above directions of the NGT, the Commissioner of Geology and Mining sent a letter dated 11.01.2017 to all District Collectors to ensure compliance with the directives of the Hon'ble Supreme Court of India and the NGT in both letter and spirit. Consequently, the issuance of transport permits was halted for mining and quarrying leases that do not possess EC. However, in the interest of the public, the State filed M.A.No.260 of 2017 in O.A.No.123 of 2014 in ***Himmat Singh Shekhawat' s case*** before the NGT, New Delhi. The MoEF, via a letter dated 03.04.2017, clarified that according to the notification in S.O.141 (E) dated 15.01.2016, all mining leases (both major and minor minerals) operating in the country are required to obtain EC after 15.01.2016, as per the provisions in the EIA notification 2016 as amended. It further stated that no mining lease shall operate without prior EC, and those in operation before 15.01.2016 must stop their mining activities and apply to the appropriate agency seeking EC.

https://www.mhc.tn.gov.in/judis

WEB COPY

4.4. Subsequently, in a letter dated 18.04.2017, concerning M.A.No.260 of 2017, the NGT reiterated while dismissing the application filed by the State of Tamil Nadu that mine holders would be required to obtain EC, regardless of whether the area involved is more or less than 5 hectares. The Hon'ble Supreme Court of India, in the Judgment of ***Common Cause*** (cited supra), has categorically held that even if minerals are extracted without EC, even within the licensed area, 100% of the price of the illegally extracted mineral should be collected as compensation. The MoEF subsequently issued directions via its Office Memorandum dated 30.05.2018, directing the concerned State Governments to ensure that mining operations do not commence until the entire compensation levied is paid by the project proponents.

4.5. At this stage, when penalties were levied, the petitioners approached this Court. While some Writ Petitions were allowed, others were dismissed with costs. Finally, in W.A.No.671 of 2020, etc., Batch, the Division Bench directed that an opportunity be granted, and the issue be decided afresh thereafter. The

https://www.mhc.tn.gov.in/judis

WEB COPY

said Judgment was passed on 15.02.2024. Meanwhile, on 30.06.2020, the NGT passed orders in O.A.No.136 of 2017, categorically stating that existing mining lease holders should submit an application to obtain an EC, as per the amended EIA notification dated 15.01.2016. It clarified that those who filed an application on or before 31.03.2016 shall not be treated as violators. In light of all the directions from the NGT and the Hon'ble Supreme Court of India, especially considering the dictum laid down in the ***Common Cause case*** (cited supra), the petitioners are directed to pay 100% of the value of the mineral. This directive was issued after due consideration of the explanation submitted by the petitioners, with careful application of mind regarding the rules, clarifications, and various explanations provided by them. The demand is justified according to the law. The Writ Petitions lack merit and should therefore be dismissed.

E.Rejoinder by the Petitioners:-

5. Reply affidavits were filed by the petitioners, through which they presented additional details and sought to distinguish the judgments relied upon by the respondent authorities. They also contended that many grounds raised by

https://www.mhc.tn.gov.in/judis

WEB COPY

them were not considered in the impugned orders.

F. The Arguments:

5.1. Heard, *Mr.A.L.Somayaji,* the learned Senior Counsel; *Mr.Lajapathi Roy*, the learned Senior Counsel; *Mr.V.P.Sengottuvel,* the learned Senior Counsel; *Mr.V.Sanjeevi*, the learned counsel; *Ms.C.Uma,* the learned counsel; *Mr.V.Elangovan,* the learned counsel; *Mr.Rahul Balaji,* the learned counsel; *Mr.K.R.Nishanth,* the learned counsel; *Mr.Vikram Veeraswamy,* the learned counsel; *Mr.P.Tamilavel,* the learned counsel; *Mr.J.Saravanavel,* the learned counsel; *Mr.K.Balakrishnan,* the learned counsel; *Mr.M.Santhanaraman,* the learned counsel; *Mr.P.S.Raman,* the learned Advocate General; *Mr.K.Srinivasa Murthy,* the learned Senior Panel Counsel; *Mr.Venkataswamy Babu,* the learned Central Government Standing Counsel; *Mr.V.Chandrasekaran,* the learned Central Government Standing Counsel and *Mr.K.S.Jayaganesan,* the learned Central Government Senior Panel Counsel.

5.2. To avoid overlap, all submissions made on behalf of the petitioners

https://www.mhc.tn.gov.in/judis

WEB COPY

are collated and presented below. With reference to major minerals the following contentions were made. The first contention is that all these Writ Petitioners operate in an area of less than 5 hectares. There is no provision in the MMDR Act or any related rule requiring prior EC concerning major minerals. The requirement for obtaining EC was introduced in 1994 and applied only to leases exceeding 5 hectares. When the EIA notification was subsequently superseded in 2006 and again in 2014, no specific provision was made for obtaining EC regarding major minerals for projects under 5 hectares.

5.3. The Judgment of the Hon'ble Supreme Court of India in ***Deepak Kumar's case*** (cited supra) did not address the case of major minerals. The Judgment of the Hon'ble Supreme Court of India in ***Common Cause*** (cited supra) also did not address leases involving less than 5 hectares. In this context, a specific clarification was made by the MoEF on 29.01.2013 that EC was not necessary. As of 17.10.2014, according to the EIA notification, new mining leases or those needing renewal had to obtain EC, even if they were less than 5 hectares. The EIA notification dated 15.01.2016 was initially issued only with

https://www.mhc.tn.gov.in/judis

WEB COPY

reference to minor minerals. Thus, it is clear that only by the notification dated 14.03.2017 and the clarification letter dated 03.04.2017 was the EIA notification clarified to apply to major minerals, by which time the quarries had already been closed as of 10.01.2017. Therefore, the imposition of compensation for the value of minerals is unwarranted.

5.4. The stand taken by the State of Tamil Nadu in M.A.No.260 of 2017 in O.A.No.123 of 2014, whereby they sought time to comply with the orders of the Tribunal, by pointing out 441 existing mines of major minerals and their action of issuing permits etc, would operate as a bar in claiming such compensation on the principles of promissory estoppel as well as the doctrine of legitimate expectation.

5.5. The following Judgments were relied upon in support of the arguments relating to legitimate exception;

(i) ***State of Jharkhand and Others Vs. Brahmputra Metallics Limited***[3], more specifically paragraph Nos.22, 24, 40 to 51 to contend that the conduct of

3 2023 (10) SCC 634

https://www.mhc.tn.gov.in/judis

WEB COPY

the State cannot turn around and seek compensation, having permitted the quarries to run and collected the seignorage fee and other charges and their action would be violative of Article 14 of the Constitution of India.

(ii) The Judgment in ***Army Welfare Education Society, New Delhi Vs. Sunil Kumar Sharma***[4] is also relied upon.

5.6. The further argument made is that in the absence of the rule position, the contention of the State of Tamil Nadu, based on the Judgment rendered by the NGT, Principal Bench in O.A.No.136 of 2017, should not be considered. The contention is based on the principle that once the South Zone Bench at Chennai was formed, the jurisdiction over the Southern States of Tamil Nadu, Kerala, Andhra Pradesh, Karnataka, and the Union Territory of Puducherry and Lakshadweep was vested in the South Zone Bench. In the absence of any orders being passed by the said Bench, the earlier directions cannot be held to be binding, as they were passed without hearing the affected parties.

5.7. The Judgment of the Division Bench of this Court in

4 2024 SCC Online SC 1683

https://www.mhc.tn.gov.in/judis

WEB COPY

M.Swaminathan Vs. State of Tamil Nadu dated 25.01.2022 and the Judgment of the Supreme Court in ***Tamil Nadu Pollution Control Board Vs. Sterlite Industries (India) Limited and Others***[5] are relied upon in this regard.

5.8. The next contention of the Writ Petitioners is that they submitted their applications well in advance, in the year 2015 itself. An appropriate mechanism to consider their applications was absent, and the State Environment Impact Assessment Authority was also non-functional. The fact that the authority was not functioning during the relevant period is acknowledged in the common counter-affidavit. Therefore, the State cannot now turn back and argue that compensation should be paid, especially without making the necessary arrangements. The Judgment of the Hon'ble Supreme Court of India in ***State of Punjab Vs. Nestle India Limited***[6] is cited for reliance. The plea of proportionality is also made specifically with reference to the Judgment in ***Brahmputra Metallics Limited's case*** (cited supra).

5 (2019) 19 SCC 479
6 (2004) 6 SCC 465

https://www.mhc.tn.gov.in/judis

WEB COPY

5.9. Finally, all the Writ Petitioners contend that the specific grounds raised by them have not been considered, indicating a complete non-application of mind, and that the specific circumstances of each of their cases have not been individually addressed. The stereotypical orders have been passed in all the cases, and therefore, the orders lack reasoning. The Judgment of the Hon'ble Supreme Court of India in ***Whirlpool Corporation Vs. Registrar of Trade Marks, Mumbai and Others***[7], more specifically paragraph No.15, is relied upon to contend that the respondents' plea of alternative remedy should be rejected.

5.10. With reference to minor minerals, the following submissions were made:

The first submission is that the authorities lack jurisdiction to levy compensation for the cost of the mineral, since the requirement for the quarry to be in operation with prior EC came into existence only from 11.01.2017. From that date, none of the petitioners extracted or quarried any mineral without EC. The activities were stopped on 10.01.2017. It is their case that the rule, namely Rule 41 of the Tamil Nadu Minor Mineral Concession Rules, 1959, requiring the

7 (1998) 8 SCC 1

https://www.mhc.tn.gov.in/judis

WEB COPY

submission of a mining plan, and Rule 42, requiring EC, was inserted for the first time only by G.O.(Ms.) No.79, notified on 22.04.2015. Originally, 180 days were given, which was subsequently extended to a total period of 630 days, expiring only on 10.01.2017. After the granted time, quarrying was never permitted. Therefore, the quarrying that occurred within the granted time cannot be termed illegal. Thus, no compensation could have been levied.

5.11. The impugned orders have been passed as if directions were issued by the Hon'ble Supreme Court of India in the cases of ***Deepak Kumar's case*** (cited supra) as well as the Judgment in ***Common Cause*** (cited supra). The Judgment in ***Common Cause*** (cited supra) dealt with a case of major minerals. Although the Judgment in ***Deepak Kumar's case*** (cited supra) directed that even minor minerals of less than 5 hectares should have EC, it did not mandate anything concerning the existing leases. It directed that fresh licenses should be granted or renewals should be permitted only after obtaining EC. These petitioners were all existing licensees; therefore, the impugned orders that were issued solely based on the directions of the Hon'ble Supreme Court of India stem

https://www.mhc.tn.gov.in/judis

WEB COPY

from an erroneous consideration of the dictum of the Hon'ble Supreme Court of India.

5.12. It is the further contention that the State's actions in allowing these quarries to operate even after 15.01.2016, by issuing permits and collecting fees, would amount to estoppel, and therefore the State cannot subsequently impose compensation.

5.13. Their next contention is that the State Government filed an application in M.A.No.260 of 2017 before the NGT, Principal Bench, in which it is specifically pleaded that the closure of the mines will have a catastrophic effect on industrial growth and will also result in heavy unemployment and a non-supply of raw materials for production. Since the application was filed based on the conduct of the State, these petitioners have a legitimate expectation that compensation will not be claimed against them.

5.14. The next contention is that in order to implement the Judgment of

https://www.mhc.tn.gov.in/judis

WEB COPY

the Hon'ble Supreme Court of India in ***Deepak Kumar's case*** (cited supra), the MoEF issued notification dated 15.01.2016, providing the mechanism and procedures for getting EC in respect of lease area of less than 5 hectares. However, by the Judgment of the NGT dated 13.09.2018, in ***Satendra Pandey Vs. MOEF & others*** (O.A. No. 186 of 2016 etc) the said notification was held to be illegal by holding that the same was not in confirmity with the letter and spirit of the order passed by the Hon'ble Supreme Court of India in ***Deepak Kumar's case*** (cited supra). Further, by another order dated 11.12.2018, in ***Vikrant Tongad Vs. Union of India*** (Execution Application No. 55 of 2018 in Original Application No. 520 of 2016) the said notification was held to be illegal and in violation of the Judgment of the NGT.

5.15. The NGT suspended the notification in question and insisted that a fresh notification be issued by the MoEF. Therefore, imposing compensation based on the notification dated 15.01.2016, which has already been set aside, cannot be accepted. Consequently, the only ground available pertains to the rules that are framed by the State of Tamil Nadu. However, that can only apply

https://www.mhc.tn.gov.in/judis

WEB COPY

after 10.01.2017. The rule cannot be applied retrospectively to existing leases. Any legislation can only be prospective. The Judgment of the Hon'ble Supreme Court of India in ***Khemka & Co Agencies Vs. State of Maharashtra***[8] is cited to argue that any ambiguity in the position should result in favour of the petitioners.

5.16. The next contention on behalf of the petitioners is that in order to impose compensation under Section 21 (5) of the MMDR Act, 1957, the minerals should have been raised without any lawful authority. An explanation was inserted on 28.03.2021 with reference to the term 'without lawful authority'. An amendment was introduced with a view to bring clarity and certainty to the mining sector. The same is categorically mentioned in the objects and reasons. Therefore, when an amendment is clarificatory in nature, the same would operate retrospectively. The Judgment of the Hon'ble Supreme Court of India in ***University of Kerala and others Vs. Merlin J.N. & others***[9] more specifically paragraph No.23 and the Judgment reported in ***Ghanshyam Mishra and Sons***

8 (1975 2 SCC 22)
9 (2022) 9 SCC 389

https://www.mhc.tn.gov.in/judis

WEB COPY

Private Limited Vs. Edelweiss Asset Reconstruction Company[10] more specifically paragraph Nos.76 and 94 are relied upon.

5.17. Therefore, when the petitioners have operated only with the license and have complied with all the rules made thereunder, for any other violation of the Circular or the EIA notification, etc, cannot come within the scope of Section 21 (5) MMDR Act, 1957 and therefore, the impugned orders are illegal.

5.18. The further contention on behalf of the petitioners is that while determining the cost of the mineral, the seignorage fee and the royalty paid are not deducted. Additionally, the production cost was not deducted. Therefore, the full value of the mineral, which includes the seignorage fee and *excludes* the production cost, cannot be imposed.

5.19. The next contention made is that all the petitioners submitted their EC in 2015, and when they applied with all the requirements, the matters were kept pending solely due to the non-functioning of the SEIAA. Therefore,

10 (2021) 9SCC 657)

https://www.mhc.tn.gov.in/judis

WEB COPY

because of the State's failure to consider, process applications, and grant EC in a timely manner, the petitioners cannot be faulted. The State cannot impose compensation without even appointing a Chairperson to the SEIAA. It is further contended that in some cases, EC was granted on time. Yet, without acknowledging this, the orders were passed.

G.Contentions made by the Respondents:-

6. *Mr.P.S.Raman,* the learned Advocate General appearing for the State, would first invite the attention of this Court to the power of the Union vis-à-vis the State in respect of the regulation of minerals. He would submit that as far as the regulation of Mines and Minerals (Development and Regulation) is concerned, it is in Entry 54 of List I of the Union List. The same reads as under:-

> "54. Regulation of mines and mineral development to the extent to which such regulation and development under the control of the Union is declared by Parliament by law to be expedient in the public interest."

6.1. Thus, only to the extent, the Parliament does not enact the law in that regard. The State has powers under List – II Entry 23, which reads as under:-

https://www.mhc.tn.gov.in/judis

WEB COPY

"23. Regulation of mines and mineral development subject to the provisions of List I with respect to regulation and development under the control of the Union."

6.2. The Parliament has enacted the MMDR Act, 1957. According to Section 15, the State Government is empowered to make rules regarding minor minerals. By virtue of the power conferred / delegated to the State Government, it has the authority to frame rules only within the scope of Section 15 of the MMDR Act, 1957. Accordingly, the State has framed the Tamil Nadu Minor Minerals (Concession) Rules, 1959.

6.3. While so, the Parliament enacted the Environment Protection Act, 1986, and the Central Government also framed the Environment Protection Rules, 1986, exercising the powers under Section 3 (2) (v) of the Environment Protection Act, read with Rule 5 (3) (d) of the Environment Protection Rules, 1986.

6.4. The MoEF notified the Environmental Impact Assessment of Developmental Projects through the first notification dated 27.01.1994. Under this notification, all the projects listed in Schedule – I require EC, specifically

https://www.mhc.tn.gov.in/judis

WEB COPY

Item 20 – Mining Projects (Major Minerals) with leases exceeding 5 hectares included. This notification was later superseded by S.O.153 (E) dated 14.09.2006. According to this notification, the projects in the Schedule are categorized into A and B. For Category A projects, prior EC from the MoEF is necessary, while for Category B projects, clearance from the State Level Environment Impact Assessment Authority is required. According to the Schedule, mining of minerals with a lease area exceeding 50 hectares and asbestos mining regardless of the mining area is classified as Category A; mining with a lease area greater than 5 hectares up to 50 hectares is classified as Category B.

6.5. In this context, where obtaining EC was avoided by securing leases for 4.5 hectares, the matter was considered by the Hon'ble Supreme Court of India in ***Deepak Kumar's case*** (cited supra). The Hon'ble Supreme Court of India reviewed the detailed recommendations made by the Department of Mines regarding the reclassification of minerals into major and minor categories, the proposed minimum size of mining leases (5 hectares), the suggested lease period

https://www.mhc.tn.gov.in/judis

WEB COPY

(5 years), cluster mining, the necessity of a mining plan, the establishment of a separate corpus fund for the reclamation and rehabilitation of mines, the depth of mining, and other related aspects. The Court instructed the States and Union Territories to adopt these guidelines and directed the Central Government to take steps to implement the Minor Mineral Conservation and Development Rules at the earliest.

6.6. In the meantime, the Hon'ble Supreme Court of India laid down that even leases of mines and minerals, including their renewal for an area less than 5 hectares, must be granted by the States and Union Territories only after obtaining EC from the MoEF. In compliance, the Government of India issued an Office Memorandum dated 18.05.2012, indicating that mining projects of minor minerals with lease areas less than 5 hectares would also be classified as category B. It was also explicitly clarified by an office memorandum dated 04.01.2013 that these directions would not include major mineral leases of less than 5 hectares. The EIA notification was further amended by the MoEF through S.O.2601 (E) dated 07.10.2014. Consequently, all mining leases for both major

https://www.mhc.tn.gov.in/judis

WEB COPY

and minor minerals of less than 50 hectares require EC.

6.7. The learned Advocate General would thus submit that, as of 07.10.2014, both major and minor minerals, regardless of the lease area, require EC. He would further submit that the EIA notification was amended by S.O.141 (E) dated 15.01.2016. It categorizes Category B into B1 and B2, and establishes District-level Environmental Impact Assessment Authorities, with the procedure for considering these applications also laid down.

6.8. Under the said circumstances, the Tamil Nadu Small Mine Owners Federation, in which most of the petitioners are members, has moved O.A.No.136 of 2017 before the National Green Tribunal (Southern Zone), Chennai. Their case was that concerning the existing leases, they were not required to obtain an EC as per the EIAA notification mandated by 15.01.2016; therefore, they challenged the clarification issued by the MoEF on 03.04.2017, which stated that even the existing mines operational prior to 15.01.2016 were required to cease their mining activity and seek an EC. They further prayed that

https://www.mhc.tn.gov.in/judis

WEB COPY

a scheme and a uniform practice for granting EC be established. Additionally, they sought a declaration that the existing mines operational before the EIA notification dated 07.10.2014 would require an EC only at the time of renewal, extension, or increase in production capacity. The application was considered in detail, and the office memorandum dated 03.04.2017 was upheld. However, it was clarified that individuals who had already filed applications for EC as of 31.03.2016 could not be treated as violators and their applications should be regarded as non-violation applications. Those who filed applications for EC after 31.03.2016 could be considered violation applications, and those applications could also be disposed of in accordance with the law. It was expressly clarified that all mining leases, whether major or minor, even for areas less than 5 hectares, were required to apply for and obtain an EC according to the amended EIA notification dated 15.01.2016. This applies to the existing mining leases as well, and accordingly, the point was addressed.

6.9. It was further clarified that since the EC is necessary, even for existing leases of less than 5 hectares, from the EIA notification dated

https://www.mhc.tn.gov.in/judis

WEB COPY

15.01.2016, no mining, whether minor or major, shall be allowed to operate after that date. Thus, as of 15.01.2016, any mining operation became illegal, rendering the State Government's periodic extensions unnecessary. While it is true that the State Government filed applications for time extensions, these were ultimately dismissed. When the State itself acts as a delegatee and is mandated by the Central Government to obtain the EC from a specific date, granting extensions under the rules cannot change this situation. The Hon'ble Supreme Court of India, in the case of ***Common Cause*** (cited supra), has made it clear that for any violation of the clause relating to the EC, 100% compensation must be levied. Therefore, there is no escape for the petitioners from paying the 100% cost of the minerals as directed by the Hon'ble Supreme Court of India.

6.10. The learned Advocate General would also reiterate his submissions regarding the maintainability of the Writ Petitions, which was decided by a preliminary order of this Court concerning the power being exercised under Rule 36-A of the Tamil Nadu Minor Mineral Concession Rules, in relation to the minor mineral leases. He would submit that alternatively, the penalty of up to 15

https://www.mhc.tn.gov.in/judis

WEB COPY

times the seignorage fee can also be levied.

6.11. He would specifically point out the Judgment in ***Common Cause*** (cited supra) to contend that merely because the State has levied a seignorage fee and collected it, it cannot impede the collection of the mineral's value as a penalty. He would submit that all these factors have been duly considered and a reasoned order has been passed. Therefore, there are no grounds for interference, and he would plead that the Writ Petitions be dismissed.

H.The Questions:-

7. After reviewing the material records and the submissions made, the following questions emerge for consideration in these Writ Petitions:

(i) Whether the extraction of minerals without an EC would constitute unlawful extraction, thereby attracting recovery under Section 21 (5) of the MMDR Act, 1957?

(ii) Is there a mandate to obtain EC for leases of major minerals covering an area of less than 5 hectares that existed prior to 17.10.2014, and if so, from

https://www.mhc.tn.gov.in/judis

WEB COPY

what date?

(iii) Is there a mandate to obtain EC regarding the leases of minor minerals in areas of less than 5 hectares that existed prior to 17.10.2014, and if so, from what date?

(iv) Should the impugned orders imposing compensation be quashed based on the principles of promissory estoppel and the doctrine of legitimate expectation?

(v) Are the impugned orders subject to being quashed due to the SEIAA or DEAC's failure to process the applications timely?

(vi) Are the impugned orders liable to be quashed for non-application of mind and non-consideration of the grounds raised by the petitioners?

(vii) To what other relief are the parties entitled?

I.Question No.(i):

8. At the outset, Section 21 (5) of the MMDR Act, 1957 and the explanation thereunder are extracted hereunder for ready reference:-

> "Section 21:…..
>
> (5) Whenever any person raises, without any lawful authority, any

https://www.mhc.tn.gov.in/judis

WEB COPY

> mineral from any land, the State Government may recover from such person the mineral so raised, or, where such mineral has already been disposed of, the price thereof, and may also recover from such person, rent, royalty or tax, as the case may be, for the period during which the land was occupied by such person without any lawful authority.
>
> [Explanation.—On and from the date of commencement of the Mines and Minerals (Development and Regulation) Amendment Act, 2021, the expression "raising, transporting or causing to raise or transport any mineral without any lawful authority" occurring in this section, shall mean raising, transporting or causing to raise or transport any mineral by a person without prospecting licence, mining lease or composite licence 3 [exploration licence] or in contravention of the rules made under section 23C.]"

8.1. It can be seen that the explanation seeks to restrict the meaning of the expression 'raising, transporting, causing to raise or to transport any mineral without any lawful authority' only if it is done without a prospecting licence, mining lease, composite licence, exploration licence, or in contravention of the rules made under Section 23 (C) of the Act. It is contended that the Rules made under Section 23 (C), viz Rule 42 (iii) of the Tamilnadu Minor Mineral Concession Rules, 1959, granted 630 days' time to the existing lessees, that is, up to 10.01.2017, and therefore, there will be a violation of the rules only if the mineral was extracted after 10.01.2017. However, it can be seen that the said argument is based on the explanation to Section 21 (5) of the MMDR Act, 1957,

https://www.mhc.tn.gov.in/judis

WEB COPY

which was extracted above. The said explanation was inserted by Act 16 of 2021 and came into force on 28.03.2021. In this regard, the contention on behalf of the petitioners is that the amendment, being clarificatory in nature, would always be retrospective. The Statement of Objects and Reasons of the amending Act explicitly mentions that the amendment is intended to provide clarification. Therefore, the explanation should be applied retrospectively. If applied retrospectively, only the violations of the provisions of the Act, viz., the MMDR Act and the rules made thereunder, can attract Section 21 (5) of the MMDR Act.

8.2. There can be no dispute regarding the proposition that any clarificatory amendment can be treated as retrospective. However, the power of the State to make it prospective cannot be denied. The general rule for legislation is that it operates prospectively, although the legislature is empowered to expressly make it retrospective. In the same way, a clarificatory amendment is considered retrospective, but the State is empowered to specifically render it prospective. Naturally, such an exercise of power by the State may always be challenged on the grounds of interference with vested

https://www.mhc.tn.gov.in/judis

WEB COPY

rights or other applicable grounds. Nevertheless, in this case, the State's action in explicitly making the explanation prospective is not under challenge. The legislature has expressly chosen to make it prospective, effective from the date of commencement of the Mines and Minerals Development (Amendment) Act 2021, i.e., effective only from 28.03.2021. Therefore, the entire cause of action in this case refers to the period from 15.01.2016 to 10.01.2017, and thus the explanation would not be applicable.

8.3. The next submission made in this regard references the applicability of the Judgment in ***Deepak Kumar's case*** (cited supra) as well as the Judgment in the ***Common Cause case*** (cited supra). It is settled law that the Judgments of the Courts cannot be read like a statute; they must be understood as a whole, with only the ratio to be ascertained and applied. In ***Deepak Kumar's case*** (cited supra), the Court was concerned about miners exploiting the 5-hectare rule. The case specifically addressed sand mining, classified as a minor mineral. However, the issue the Court addressed involved the causes of environmental degradation, threats to biodiversity, destruction of riverine vegetation, erosion, and pollution

https://www.mhc.tn.gov.in/judis

WEB COPY

of water sources, among others. After considering the model rules and proposals made by the authorities, it was concluded that an effective framework for a mining plan is highly necessary, one that considers all environmental issues and promotes a long-term rationale for the sustainable use of the natural resource base as well as the bio-assessment protocol. In the final paragraph, after directing the appropriate governments to frame rules in accordance with the recommendations/model rules, the Court ordered that, until such rules are framed, no renewal or grant of leases for minor minerals of less than 5 hectares shall be made except upon obtaining Environmental Clearance (EC) from the MoEF. This does not imply that the ratio of the Judgment applies only to the grant of fresh leases. The principle established is that no environmental degradation should result from mining activities, and that one of the key measures to ensure sustainable development is the adoption of a mining plan.

8.4. Similarly, in the Judgment made in ***Common Cause*** (cited supra), the Court was concerned with the indiscriminate extraction of iron ore and manganese ore (major minerals) in several districts of Odisha and elsewhere.

https://www.mhc.tn.gov.in/judis

WEB COPY

While addressing this issue, the Court considered the relevant rules, namely, the Mineral Concession Rules of the Central Government and the Environment Impact Assessment notifications requiring EC, and established under what circumstances the ECs were required. The Court held that violating other requirements would also constitute unlawful extraction of minerals. It further clarified the meaning of Section 21 (5) of the MMDR Act, noting that unlawful extraction of minerals does not only refer to activities outside the mining area; it also applies to activities within the mining area for which a lease is granted. If any rule, including those related to obtaining EC, is violated, it would be deemed an unlawful activity. This would amount to the raising of minerals without lawful authority. The Court also emphasized that there can be no compromise where minerals have been unlawfully extracted, and that 100% compensation must be recovered. This interpretation of Section 21 (5) of the MMDR Act, including the expression 'illegal mining' and the quantum of compensation, cannot be claimed to apply only to major minerals extracted in leases over 5 hectares. It would be applicable to all cases of mining leases.

https://www.mhc.tn.gov.in/judis

WEB COPY

8.5. It was also held that there cannot be any ex-post facto grant of EC. It is essential to extract paragraph No.129 of the Judgment in ***Common cause*** (cited supra), which reads as follows:-

> "129. The simple reason for not accepting this interpretation is that Rule 2(ii-a) of the MCR was inserted by a Notification dated 26-7-2012 while we are concerned with an earlier period. That apart, as mentioned above, the holder of a mining lease is required to adhere to the terms of the mining scheme, the mining plan and the mining lease as well as the statutes such as the EPA, the FCA, the Water (Prevention and Control of Pollution) Act, 1974 and the Air (Prevention and Control of Pollution) Act, 1981. **If any mining operation is conducted in violation of any of these requirements, then that mining operation is illegal or unlawful. Any extraction of a mineral through an illegal or unlawful mining operation would become illegally or unlawfully extracted mineral**."
>
> (Emphasis supplied)

8.6. Thus, it can be seen that if the mining operation is conducted in violation of the Environmental Protection Act,1986 that is, without EC that is prescribed, pursuant to the rules framed under the Act, then the mining operation is illegal and unlawful. This is made even more explicitly clear in paragraph No.186 of the Judgment in ***Common Cause case*** (cited supra), which is as follows:-

> "186. There may be some overlap in the period when mining operations were conducted by the mining leaseholders without an EC and/or an FC. **We make it clear that mineral extracted either without an EC or without an FC or without**

https://www.mhc.tn.gov.in/judis

WEB COPY

> **both would attract the provisions of Section 21(5) of the MMDR Act and 100% of the price of the illegally or unlawfully mined mineral must be compensated by the mining leaseholder.** To the extent of the overlap or the common period, obviously only one set of compensation is payable by the mining leaseholder to the State of Odisha. We order accordingly. However, we make it clear that whatever payment has already been made by the mining leaseholders towards NPV, additional NPV or penal compensatory afforestation is neither adjustable nor refundable since that falls in a different category altogether."
>
> (Emphasis supplied)

8.7. Thus, if there is a requirement of obtaining an EC and the mining activity had continued without the same, there is absolutely no doubt whatsoever that the same would attract the provisions of Section 21 (5) of the MMDR Act, thereby, not only entitling the State, but making it mandatory that 100 % value of the minerals be recovered as compensation. In this regard, it is essential to extract paragraph No.153 and 154 that read as follows:-

> "153. The learned counsel for the petitioners and the learned Amicus were of the opinion that the provisions of Section 21(5) of the MMDR Act require that the entire price of the illegally mined ore should be recovered from each defaulting lessee. Similarly, in its affidavit, the Union of India differs with the recommendation of CEC. According to the affidavit of the Union of India this would be contrary to the statutory scheme and in fact 100% recovery should be made under the provisions of Section 21(5) of the MMDR. We may note that only to this extent, the learned Attorney General differed with the view

https://www.mhc.tn.gov.in/judis

WEB COPY

expressed by the Union of India and submitted that the recommendation of CEC to recover only 30% of the value of the illegally mined ore should be accepted.

154. **In our opinion, there can be no compromise on the quantum of compensation that should be recovered from any defaulting lessee — it should be 100%. If there has been illegal mining, the defaulting lessee must bear the consequences of the illegality and not be benefited by pocketing 70% of the illegally mined ore**. It simply does not stand to reason why the State should be compelled to forego what is its due from the exploitation of a natural resource and on the contrary be a party in filling the coffers of defaulting lessees in an ill-gotten manner."

8.8. It is again relevant to extract paragraph No.185, which reads as follows:-

"185.For the reasons that we have already expressed above, we are not in agreement with CEC that only a part of the notional value (in this case 70 %) of the iron ore and manganese ore produced by the mining leaseholders should be recovered. We are of the view that Section 21 (5) of the MMDR Act should be given full effect and so we reiterate that the recovery should be to the extent of 100%."

8.9. Thus, I answer the question that if there is a requirement of EC for the petitioners who are lessees of both major and minor minerals of an extent of less than 5 hectares for the relevant period, i.e., from 15.01.2016 to 10.01.2017, then the violation of the same would attract Section 21 (5) and that the State would

https://www.mhc.tn.gov.in/judis

WEB COPY

be fully justified in demanding 100 % value of the mineral as compensation.

J.Question Nos.(ii) & (iii):

9. Although there are some differences regarding the requirements of EC for major and minor minerals, these questions can be addressed together to avoid repetition. In this case, we are focused on the period from 15.01.2016 to 10.01.2017 alone. However, for the sake of completeness, the situation from the beginning can be briefly mentioned.

9.1. Originally, there was no provision for obtaining EC for mining leases under the MMDR Act, 1957. After the enactment of the Environment (Protection) Act, 1986, and the framing of the Environmental Protection Rules, 1986, the Environment Impact Assessment notification dated 27.01.1994 was issued for the first time. Under the same, Item No. 20 of Schedule I included mining projects with leases of an area greater than 5 hectares as projects requiring EC. Thereafter, the Circular dated 12.02.2002 clarified the applicability concerning the renewal. The question was first considered in

https://www.mhc.tn.gov.in/judis

WEB COPY

M.C.Metha Vs. Union of India and Others[11], where it was held to be mandatory for any fresh lease or renewal coming after the date of notification, and no mining activity in violation of this can be permitted.

9.2. A clarification was issued on 28.10.2004, based on the said Judgment, stating that all leases over 5 hectares that have commenced production and are increasing their production or renewing their leases after the notification must obtain clearance. Subsequently, the EIAA notification of 1994 was superseded by the EIAA notification of 2006 dated 14.09.2006. According to the notification, mining activities were categorized as Category A and Category B. Coal mining leases exceeding 150 hectares and other mines over 100 hectares were classified as Category A, while the remaining were classified as Category B. Category B was further divided into B1 and B2. On 02.07.2007, a clarification was issued stating that mining projects of less than 5 hectares for major minerals and the mining leases for minor minerals could continue to operate without EC, provided there was no increase in lease area or enhancement of production. They were required to secure EC only at the time of

11 (2004) 12 SCC 118

https://www.mhc.tn.gov.in/judis

WEB COPY

renewal. It was specifically clarified that leases of 5 hectares need not obtain clearance if they were operational prior to 14.09.2006. Following this, the EIA notification of 2009 amended the notification from 2006. This amendment brought leases over 50 hectares under Category A while those from 5 hectares to 50 hectares fell under Category B. There was no distinction between major and minor minerals. The clause requiring the acquisition of EC at the time of renewal was added by a further amendment dated 04.04.2011. It was at this stage that the judgment of the Hon'ble Supreme Court of India in the ***Deepak Kumar's case*** (cited supra) was rendered.

9.3. Thereafter, an Office Memorandum dated 18.05.2012 was issued by the MoEF, based on the Judgment in ***Deepak Kumar's case*** (cited supra), stating that minor mineral projects of less than 5 hectares would also be treated as Category B. This notification did not mention anything regarding major minerals.

https://www.mhc.tn.gov.in/judis

WEB COPY

9.4. On 04.01.2013, another Office Memorandum was issued by MoEF specifically stating that major minerals in lease areas less than 5 hectares do not need to obtain any prior EC from the State Government or the Central Government. Another amendment to the EIA notification 2006 was issued on 09.09.2013, further modifying the Schedule. It was made clear in Column 5 of the Schedule that prior EC is required at the stage of renewal of the mining lease, for which an application must be submitted up to two years before the renewal date. Additionally, a two-year period from 04.04.2011 was also provided for obtaining EC for all mining leases that were operational as of 04.04.2011, which had fallen due for renewal on that date. The EIA 2006 notification was further amended pursuant to the notification dated 07.10.2014. Consequently, mining leases less than 50 hectares were classified under Category B, and general conditions were exempted for projects or activities involving less than 5 hectares of mining lease area. A note stated that prior EC is required at the stage of renewal of a mining lease, for which an application must be made two years prior to the renewal due date. It is essential to extract Item 1A of the Schedule, which reads as follows:

https://www.mhc.tn.gov.in/judis

WEB COPY

(1)	*(2)*	*(3)*	*(4)*	*(5)*
1(a)	(i) mining of minerals (ii) Slurry pipelines (coal lignite and other ores) passing through national parks or sanctuaries or coal reefs, ecologically sensitive areas.	>50 ha of mining lease area in respect of non coal mine lease >150 ha of mining lease area in respect of coal mine lease Asbestos mining irrespective of mining area All projects	<50 ha of mining lease area in respect of non coal mine lease. <ha of mining lease area in respect of local mine lease	General conditions shall apply except; (i)for project or activity of mining or minor minerals of category 'B2' (upto 25 ha of mining lease area); (ii)River bed mining projects on account of inter state boundary. Note: (1)Mineral prospecting is exempted (2)The prescribed procedure for environmental clearance for mining of minor minerals including cluster situation is given in Appendix XI. (3)The mining lease which have obtained environmental clearance under Environment Impact

https://www.mhc.tn.gov.in/judis

WEB COPY

(1)	*(2)*	*(3)*	*(4)*	*(5)*
				Assessment Notification, 1994 and Environment Impact Assessment Notification 2006 shall not require fresh environmental clearance during renewal provided the project has valid and subsisting environmental clearance.

9.5. Thus, it can be seen that the notification does not make any exemptions for leases up to 5 hectares. While it did not explicitly make clear that all the existing leases should immediately obtain EC, at the same time, previous provisions regarding the general conditions of activities for mining lease areas of less than 5 hectares and the requirement to submit an application at the time of renewal, as well as the timeline originally prescribed in the successive notification preceding the notification for making applications at the time of renewal, were all expressly removed.

https://www.mhc.tn.gov.in/judis

WEB COPY

9.6. As a matter of fact, subsequently, by an office note dated 14.08.2018, all doubts were clarified explicitly, making it clear that all mining activities, both existing and new, were required to obtain an Environmental Clearance (EC) and could not proceed with mining without it. However, the NGT, Principal Bench, in the matter of ***Naresh Zargar's case*** (cited supra), considered the issue in detail and, by an order dated 13.01.2015, held that no mining activity, including existing units, would be permitted to continue without obtaining EC. It also directed the disposal of the applications that were pending within a period of six months. Subsequently, when a clarification was issued by the MoEF on 03.04.2017, it was challenged by the ***Tamil Nadu Small Mine Owners Federation, represented by its Secretary,*** before the NGT, Southern Zone, Chennai, stating that the EIA notification 2006, as amended on 15.01.2006, cannot be construed to require the existing lessees of less than 5 hectares to obtain EC, except at the time of renewal. This was again considered by the NGT, Southern Zone, and after reviewing the provisions of the earlier notifications, the purpose of the amendment, and the actual amendment carried out on

https://www.mhc.tn.gov.in/judis

WEB COPY

15.01.2016, the NGT examined the cases of both major and minor minerals in detail. It held that due to the deletion of the period prescribed to apply at the time of renewal and the specific deletion of general conditions relating to mining leases of less than 5 hectares, on a combined reading of the successive notifications effective from 15.01.2006, all existing mines must immediately obtain EC without waiting for renewal. The relevant portion of paragraph No.59 of the said judgment is extracted hereunder:-

> "59.Further, it is clear from the observations made above that even in 2014, when 2006 Notification was amended, the distinction between major and minor minerals was taken away and any mining lease of non coal product, having less than 5 hectares, has been brought under the regime of Environment Clearance. Further, as per 2016 Notification, the time limit for filing application provided for the purpose of renewal, has been taken away perhaps, for the reason that by amending the Mines and Minerals (Development and Regulation) Act, 1957, the period of lease has been extended upto 50 years from 20 years. That may be reason why the MoEF & CC has though that existing mines also has to obtain Environment Clearance after 15.1.2016 and they need not wait for renewal. Further, the National Green Tribunal in the decision stated supra, has categorically stated that no mining activity should be carried out in India without obtaining Environment Clearance that includes the existing mining leases as well, irrespective of its character viz., minor or major and it is further held that those minors who have not filed application prior to 31.3.2016 were completely debarred from operating mining operations. So under these circumstances, the cut off date for filing the application has to be limited upto 31.3.2016 and those minors who have filed application thereafter, will be treated as violators and their applications will have to be treated as violation applications and disposes of in accordance with law.

https://www.mhc.tn.gov.in/judis

WEB COPY

.....
....."

9.7. After holding so, the conclusion that is reached in paragraph No.61 (3) is extracted hereunder:-

> "(iii) It is also made clear that all mining leases, either major or minor, even less than 5 hectares area, has to apply and get Environment Clearance as per the amended EIA Notification dated 15.1.2016. This will apply to the existing mining leases as well. The points are answered accordingly."

9.8. Therefore, there cannot be any doubt that the petitioners are required to obtain an EC as of 15.01.2016. The additional points regarding the State Government's applications to the NGT for extensions and the granting of extensions under the Tamil Nadu Minor Mineral Concession Rules also cannot be upheld. This is because, effective from 12.01.2015, Section 20 (a) was inserted into the MMDR Act, 1959, which grants specific powers to the Central Government to issue directives for the scientific and sustainable development and exploitation of mineral resources. The entire Section 20 (a) is extracted hereunder:-

> "[20A. Power of Central Government to issue directions.-
> (1) Notwithstanding anything contained in this Act, the Central Government may issue such directions to the State Governments, as may be required for the conservation of mineral resources, or on any policy matter in the national interest, and for the scientific and

https://www.mhc.tn.gov.in/judis

WEB COPY

sustainable development and exploitation of mineral resources.
(2) In particular, and without prejudice to the generality of the foregoing powers, the Central Government may also issue directions in respect of the following matters, namely:-
(i) improvement in procedure for grant of mineral concessions and to ensure co-ordination among agencies entrusted with according statutory clearances;
(ii) maintenance of internet-based databases including development and operation of a mining tenement system;
(iii) implementation and evaluation of sustainable development frameworks;
(iv) reduction in waste generation and related waste management practices and promotion of recycling of materials;
(v) minimising and mitigating adverse environmental impacts particularly in respect of ground water, air, ambient noise and land;
(vi) ensuring minimal ecological disturbance, in terms of bio-diversity, flora, fauna and habitat;
(vii) promoting restoration and reclamation activities so as to make optimal use of mined out land for the benefit of the local communities; and
(viii) such other matters as may be necessary for the purposes of implementation of this Act.]"

9.9. In view thereof, the Central Government was empowered to issue directions to implement and evaluate sustainable development frameworks, ensuring minimal ecological disturbance concerning biodiversity, flora, fauna, and habitat. Thus, it can be seen that it was introduced pursuant to the directive principles of the State policy contained under Article 48-A and integrates the purposes of the Environment Protection Act, 1986. As a matter of fact, the same was also considered by the Hon'ble Supreme Court of India in ***the Common Cause case*** (cited supra), and it was held as follows regarding the objective of

https://www.mhc.tn.gov.in/judis

WEB COPY

the MMDR Act, with the relevant portion extracted hereunder:-

> "84. Briefly therefore, the overall purpose and objective of the MMDR Act as well as the Rules framed thereunder is to **ensure that mining operations are carried out in a scientific manner with a high degree of responsibility including responsibility in protecting and preserving the environment and the flora of the area. Through this process, the holder of a mining lease is obliged to adhere to the standards laid down under the Environment (Protection) Act, 1986** or the EPA as well as the laws pertaining to air and water pollution and also by necessary implication, the provisions of the Forest (Conservation) Act, 1980 (for short "the FC Act"). Exploitation of the natural resources is ruled out. If the holder of a mining lease does not adhere to the provisions of the statutes or the rules or the terms and conditions of the mining lease, that person is liable to incur penalties under Section 21 of the MMDR Act. In addition thereto, Section 4-A of the MMDR Act which provides for the termination of a mining lease is applicable. This provides that where the Central Government, after consultation with the State Government is of the opinion that it is expedient in the interest of regulation of mines and mineral development, preservation of natural environment, prevention of pollution, etc. then the Central Government may request the State Government to prematurely terminate a mining lease."
>
> (Emphasis supplied)

9.10. Thus, as rightly contended by the learned Advocate General, the mere filing of an application by the State of Tamil Nadu or the framing of a rule granting time beyond the mandatory limit will not alter the requirement of obtaining EC and refraining from any mining activity. Therefore, by virtue of the authoritative pronouncement of the Judgment of the Hon'ble Supreme Court of

https://www.mhc.tn.gov.in/judis

WEB COPY

India in ***the Common Cause case*** (cited supra), read with Section 20(a) of the MMDR Act, it can be seen that the State of Tamil Nadu, as a delegatee in framing rules relating to minor minerals, could not have created any contra rules that overreach or supersede the notifications issued by the Government of India. Consequently, notwithstanding Rule 42 (iii) of the Tamil Nadu Minor Mineral Concession Rules, 1959, which grants 630 days of time, I hold that both the lessees of major minerals and those of minor minerals of less than 5 hectares are mandated to obtain the EC, even if they are existing lessees and their renewal is not due as of 15.01.2016; accordingly, the questions are answered.

K.Question No.(iv):

10. It is evident that all the petitioners were aware of the mandatory requirement of EC and that they all submitted applications. Once it has been established that it is a mandate of law, merely because there were some actions taken by the State Government and the MoEF in issuing certain clarifications, it cannot be claimed that Section 21 (5) of the MMDR Act, 1957 cannot be enforced. In fact, this issue is *no longer res integra* and has been settled by the Judgement of the Hon'ble Supreme Court of India in ***Common Cause*** (cited

https://www.mhc.tn.gov.in/judis

WEB COPY

supra). Therefore, it is essential to extract paragraph Nos. 100 and 101 of the said Judgment, which are provided below:-

> "100. It was submitted that **in view of these ambiguous and unclear signals emanating from the MoEF which resulted in confusion being worse confounded, the mining leaseholders were not clear whether or not they were required to obtain an EC** particularly in respect of pre-EIA 1994 mining leases and operations.
>
> 101. As mentioned above, these dates and the text of the circulars were emphasised by the learned counsel for the leaseholders to contend that it was not obligatory for the mining leaseholders, who did not expand their mining operations, to obtain an EC and in any event the period for obtaining an EC was extended till 31-3-2003 with ex post facto approval. In this context, reliance was placed on M.C. Mehta [M.C. Mehta v. Union of India, (2004) 12 SCC 118] referred to above."
>
> (Emphasis supplied)

10.1. In that context it was held in paragraph No.106 as follows:

> "106. **It is clear from the decision rendered by this Court that EIA 1994 is mandatory in character**; that it is applicable to all mining operations—expansion of production or even increase in lease area, modernisation of the extraction process, new mining projects and renewal of mining leases. A mining leaseholder is obliged to adhere to the terms and conditions of a mining lease and the applicable laws and the mere fact that a mining plan has been approved does not entitle a mining leaseholder to commence mining operations. In M.C. Mehta [M.C. Mehta v. Union of India, (2004) 12 SCC 118] this Court concluded that EIA 1994 is clearly applicable to the renewal of a mining lease."
>
> (Emphasis Supplied)

and in paragraph No.108, it was finally concluded as follows:-

https://www.mhc.tn.gov.in/judis

WEB COPY

> "108. It was submitted on behalf of the mining leaseholders that the possibility of getting an ex post facto EC was a signal to the mining leaseholders that obtaining an EC was not mandatory or that if it was not obtained, the default was retrospectively condonable. We do not agree. We have referred to various provisions of the MMDR Act and the Rules framed thereunder to indicate the statutory importance given to the protection and preservation of the environment. This was also emphasised in M.C. Mehta [M.C. Mehta v. Union of India, (2004) 12 SCC 118] in which it was also stated that: (SCC p. 161, para 37)
>
> "37. … It does not appear that MoEF intended to legalise the commencement or continuance of mining activity without compliance of stipulations of the notification."
>
> It appears to us that the MoEF was, in a sense, cajoling the mining leaseholders to comply with the law and EIA 1994 rather than use the stick. **That the mining leaseholders chose to misconstrue the soft implementation as a licence to not abide by the requirements of the law is unfortunate and was an act of omission or commission by them at their own peril**. We cannot attribute insensitivity to the MoEF or even to the mining leaseholders to environment protection and preservation, but at the same time we cannot overlook the obligation of everyone to abide by the law. That the MoEF took a soft approach cannot be an escapist excuse for non-compliance with the law or EIA 1994."
>
> (Emphasis supplied)

10.2. Thus, it can be seen that while starting from ***Deepak Kumar's case*** (cited supra) and the successive orders of the NGT, the law has been laid down to comply with and strictly enforce the law relating to Environmental Impact Assessment, the State authorities were only attempting a soft implementation of the same in the name of economic development, which can never aid the

https://www.mhc.tn.gov.in/judis

WEB COPY

petitioners. Any illegality or impropriety on the part of the State can never be perpetuated in the name of promissory estoppel, nor can the expectation arising out of the same be held to be legitimate. Thus, those principles cannot be applied to the facts and circumstances of the case, and the contentions made merely on the basis that the State filed applications, issued permits, and collected seignorage fees will not, in any manner, come to the aid of the petitioners.

L.Question No.(v):

11. Regarding the contention of the SEIAA's non-functioning and the delayed consideration of applications, the petitioners do not claim that they ceased quarrying as of 15.01.2016 and resumed operations only after the SEIAA's deadline expired. Furthermore, the established and consistent legal stance is that when an activity requires Environmental Clearance (EC), the petitioners must resolve their grievances through the appropriate process to obtain the EC. The inaction or non-functioning of the SEIAA cannot create a right to continue mining activities without securing the EC. The SEIAA's inefficiency, delays in application reviews, or any related irregularities cannot

https://www.mhc.tn.gov.in/judis

WEB COPY

justify or serve as a legal basis for committing another offense, specifically quarrying without EC. Thus, the various individual contentions about the application date, improper return of the application, and the SEIAA's inaction will only support a Mandamus to the SEIAA to consider the application and potential claims for lost time. Nonetheless, these points do not, in any way, legitimize the continuation of mining activities without EC.

M.Question No.(vi):

12. From the above discussion, it is clear that the entire liability to pay the value of the mineral rests on the question of whether there was any mandate regarding the mining leases of less than 5 hectares to obtain EC, and if so, from what date?

12.1. Any specific individual pleadings regarding the filing of the application and other grievances, such as communications issued to them, will not influence the ultimate decision made by the authorities. Once the authorities have considered the legal position and issued all these orders, even if a

https://www.mhc.tn.gov.in/judis

WEB COPY

grievance is raised that other grounds were not considered, since they do not affect the ultimate decision reached, I reject the submission that every ground raised by the petitioners should have been considered. If, regarding a primary legal question, liability must be established, the consideration of the factual scenarios concerning each of the petitioners will not change the outcome. Therefore, in this case, the issuance of similar orders in all cases cannot be deemed illegal or without application of mind. Accordingly, this question is answered.

N.Question No.(vii):

13. This is a case, where the quarrying operations were done after the leases and the minerals were removed with permit and the seignorage fee and the other charges have already been paid. In respect of the minor mineral, the seignorage fee is prescribed in Appendix 2 of the Tamil Nadu Minor minerals Rules and in respect of the major minerals, the same is prescribed under the Mineral Concession Rules, 1960.

https://www.mhc.tn.gov.in/judis

WEB COPY

13.1. In this regard, the matter is no longer *res integra* and is considered in detail by the Judgment of the Hon'ble Supreme Court of India in ***Common Cause case*** (cited supra). The relevant portions which deal with the issue are paragraph Nos.152 to 154. Ultimately, when it was proposed that only 30% of the value be recovered, it was held that the State should not be compelled to forego what is rightfully due from the exploitation of natural resources and, on the contrary, become a party to enriching the defaulting lessee in an ill-gotten manner. On a combined reading of paragraph Nos.185, 186 and 197 of the said Judgment, it can be seen that there need not be any overlap and the State will be entitled for 100 % value of the unlawfully mined mineral.

13.2. As a matter of fact, in the conclusion in paragraph No.188 (5), it has been again held as follows:-

> "(5) Any iron ore or manganese ore extracted contrary to EIA 1994 or EIA 2006 would constitute illegal or unlawful mining (as understood and interpreted by us) and compensation at 100% of the price of the mineral should be recovered from 2000-2001 onwards in terms of Section 21(5) of the MMDR Act, if the extracted mineral has been disposed of. **In addition, any rent, royalty or tax for the period that such mining activity was carried out outside the mining lease area should be recovered.**"

https://www.mhc.tn.gov.in/judis

WEB COPY

(Emphasis supplied)

13.3. Similarly in paragraph Nos.188 (8) and 188 (9), it has been held as follows:-

> "(8) Any mining activity carried on after 7-1-1998 without an FC amounts to illegal or unlawful mining in terms of the provisions of Section 21(5) of the MMDR Act attracting 100% recovery of the price of the extracted mineral that is disposed of.
>
> (9) In the event of any overlap, that is, illegal or unlawful mining without an FC or without an EC or without both would attract only 100% compensation and not 200% compensation. In other words, only one set of compensation would be payable by the mining leaseholder."

13.4. Thus, it can be seen that if only the mineral is extracted outside the mining lease area, the State will be entitled to any rent, royalty, or tax over and above 100% of the value of the mineral. The total amount of compensation will be 100% of the mineral, and only one set of compensation would be payable, i.e., as contemplated under Section 21 (5) of the MMDR Act, 1957. When the rules, depending on the mineral, impose a seignorage fee of 30% of the value of the mineral, then, in the facts and circumstances of the case, I believe that all these Writ Petitioners will be entitled to deduct the seignorage fee that has been paid and pay the balance amount. The conduct of the State, as narrated above, is

https://www.mhc.tn.gov.in/judis

WEB COPY

taken into account, and in this context, it would only be fair to consider the seigniorage fee already paid as part of the value of the mineral, with only the balance amount to be collected from the petitioners. Two months' time is granted for the petitioners to make the payment, immediately upon receipt of the website-uploaded copy of this order. It will be open for the authorities to inform the respective petitioners of the exact amount that is payable after deducting the seignorage fee that has been paid by the petitioners. The petitioners would be entitled to the relief as stated above.

O.The Result:-

14. In view thereof, all the Writ Petitions are disposed of on the following terms:-

(i) The individual orders challenged in these Writ Petitions, which impose a compensation of 100% of the mineral's value under Section 21(5) of the MMDR Act, 1957, are upheld;

(ii) However, in the final calculation of the amount, the seignorage fee that has already been paid or recovered by the respondents shall be credited, and

https://www.mhc.tn.gov.in/judis

WEB COPY

only the balance of the compensation is recoverable. Within three weeks from the date of receipt of the website-uploaded copy of this order, individual communications shall be sent to the petitioners regarding the exact amount payable by them.

(iii) The petitioners are granted two months' time thereafter to make the payment as per the impugned orders, after deducting the seignorage fee as may be intimated by the respondents via their communication;

(iv) No costs. Consequently, the associated miscellaneous petitions are closed.
