UNION OF INDIA & ORS. …RESPONDENTS

To,
The Registrar,
National Green Tribunal,
Eastern Zone Bench,
Kolkata

Sir,

Will you kindly treat the accompanying application as an urgent one in accordance with NGT Rules and Orders.

The grounds of urgency as set in the Original Application may kindly be treated as part and parcel of the present Application. Further, the proposed public hearing is likely to be conducted on 07.01.2025.

Place: Kolkata

SYNOPSIS

1. The present Application has been preferred, *inter alia* to seek directions upon the Respondents to take immediate steps to stop any mining activity being carried out and to prevent any mining activity from being carried out in the District of Baksa, State of Assam in the absence of a District Survey Report ('**DSR**') and for setting aside and quashing the mining leases and/or mining contracts and/or mining permits and/or mining concessionaire granted by the Respondent Nos. 1 to 7 illegally and unlawfully in favour of several third parties in transgression and violation of the provisions of Environmental Impact Assessment dated September 14, 2006 ('**EIA, 2006**') as amended by the Respondent No. 1, by and under the Notification dated January 15, 2016 along with the decisions passed by the Hon'ble Supreme Court, this Hon'ble Tribunal, as well as the Sustainable Sand Mining Management Guidelines, 2016 ('**SSMMG, 2016**') and Enforcement & Monitoring Guidelines for Sand Mining, 2020 ('**EMGSM, 2020**') issued by the Respondent No. 1. The Applicant further seeks directions on the Respondent Nos. 8 to 14 and such other persons who have carried on illegal and unlawful mining activities in the District of Baksa in the absence of a DSR to pay environmental compensation for the damage done to the natural resources.

2. The Parliament had enacted the Environmental Protection Act, 1986 on 23rd May 1986 to implement the decisions taken at the at the United Nations Conference on Human Environment in so far as they relate to protection and improvement of environment and prevention of hazards to human beings, other living creatures, plants and property.

3. The Respondent No.1 issued the Environment Impact Assessment Notification dated September 14, 2006 ('**EIA 2006**') directing that certain projects or activities as provided for in the said notification

can be undertaken only after prior environmental clearance is granted. Entry 1 of the Schedule to the said notification provided that prior environmental clearance is required for mining of minerals either from the Central Government or from State Level Environmental Impact Assessment Authorities depending upon the categorization of the project and the threshold limits. It is further submitted that as per the EIA Notification 2006, Environmental Clearance or Environmental Impact Assessment was not required to be undertaken where the area of mining minerals was less than 5 hectares.

4. The Respondent No. 1 further issued a Notification dated January 15, 2016 which amended the EIA notification dated September 14, 2006, *inter alia*, making it mandatory to obtain Environmental Clearance for mining of minor mineral of lease area of less than or equal to 5 hectares. By way of the amendment notification, the subparagraph 7(iii) was introduced which provides for the *'Preparation of District Survey Report for Sand Mining or River Bed Mining and Mining of other Minor Minerals.'*

5. The main objective for preparation of DSR was to ensure to identify areas of aggradation or deposition wherein mining can be allowed; and identification of areas of erosion and proximity to infrastructural structures and installations wherein mining should be prohibited, and calculation of annual rate of replenishment and allowing time for replenishment after mining in that area.

6. The Respondent No. 1 had after thorough and extensive consultation with the State Governments has issued the Sustainable Sand Mining Management Guidelines, 2016 ('**SSMMG, 2016**'). The main objectives of the said guidelines are, *inter alia,* to ensure that sand and gravel mining is done in an environmentally sustainable and socially responsible manner, and to further ensure the conservation

of river equilibrium and its natural environment by protection and restoration of the ecological system.

7. This Hon'ble Tribunal, Principal Bench at New Delhi in the case of *Anjani Kumar v. State of UP reported in 2017* SCC OnLine NGT 979. The Hon'ble National Green Tribunal vide judgement dated December 8, 2017 unequivocally held that *"preparation of District Survey Report and obtaining Environmental Clearance is a condition precedent to carrying on mining activity"*.

8. The Respondent No. 1, in supplement and addition to SSMMG, 2016, issued the Enforcement & Monitoring Guidelines for Sand Mining 2020 ('**EMGSM, 2020**'). The said EMGSM, 2020 alongwith highlighting the requisite judicial decisions passed by this Hon'ble Tribunal wherein the importance of DSR has been reflected, enumerated the various benefits of a DSR and its imperative role in curbing the unplanned grant of mining leases.

9. The Hon'ble Supreme Court *vide* judgement dated November 10, 2021 in *State of Bihar v. Pawan Kumar*, (2022) 2 SCC 348 interpreting the 2020 guidelines held that District Survey Report is required to be prepared before auction/e-auction/grant of mining lease.

10. Highlighting the importance of preparation of District Survey Report before any mining activity is carried out, the Hon'ble Supreme Court of India in the case of *Mangal Singh Bundela v. State of Madhya Pradesh & Ors*, bearing Civil Appeal No. 4593 of 2022 passed an interim order directing that no mining shall be carried out in terms of the e-auction therein without finalizing the District Survey Report.

11. Thus, from the aforesaid notifications, rules and guidelines issued by the Respondent No.1 and from the various judicial precedents passed by the Hon'ble Supreme Court of India as well as this Hon'ble

Tribunal it is evidently clear that preparation of DSR is a condition precedent for grant of mining leases and Environmental Clearance for carrying out any mining activities.

12. It is submitted that no District Survey Report for the District of Baksa, State of Assam has been finalized and notified and without there being a District Survey Report mining activities are being carried out.

13. The Applicant recently came to learn that illegal mining is going on in the District of Baksa and after making necessary searches, the Applicant came to learn that mining leases and Environmental Clearances are being illegally and unlawfully granted by the Respondent Nos. 1 to 7 without finalization and notification of a DSR. The Applicant also came to learn that the Respondent Nos. 1 to 7 have been illegally and unlawfully granting such mining leases and Environmental Clearances to various third parties since January 2016 without approval of any DSR, in violation of the provisions of the EIA, 2006 as amended by the Respondent No. 1, by and under the Notification dated January 15, 2016 along with the decisions passed by the Hon'ble Supreme Court, this Hon'ble Tribunal, as well as SSMMG, 2016 and EMGSM, 2020.

14. It is submitted that the draft DSR for the District of Baksa was uploaded in the public portal only in the month of September, 2024 for suggestions, comments and objections to the draft DSR from the public. Even in the draft DSR uploaded by the Respondents, it is evident that mining activities were going on in the District of Baksa at the time of preparation of the draft DSR. Such mining activities could only have been permitted by the Respondent Nos. 1 to 7 after grant of mining leases and Environmental Clearances and since no DSR was ever approved for the District of Baksa, the mining leases and Environmental Clearances granted by the Respondent Nos. 1 to 7 were illegal and unlawful.

15. The fact that the DSR for the State of Baksa has not been approved would be evident from the Minutes of the Meeting of the Respondent No.5 held on May 13, 2025 where Environmental Clearances have been granted to the Respondents Nos. 8, 12 and 13 even though such minutes clearly states that DSR for the District of Baksa is yet to be approved.

16. In fact, this Hon'ble Tribunal in *OA No. 5/EZ/2025 titled as Atanu Borthakur -vs- Union of India & Ors.* after observing that the Respondent No.5 has issued Environmental Clearances without approval of a DSR and called upon the Respondent Nos. 2, 4 and 5 by an order dated April 4, 2025 to file an affidavit to the short question explaining as to how the Environmental Clearance, Consent to Operate and Consent to Establish were granted to the Project Proponent to carry on sand mining.

17. Despite such observations made by this Hon'ble Tribunal, the Respondent No.5 is continuing to grant Environmental Clearances for mining in the absence of a DSR. Such act and conduct of the Respondent Nos. 1 to 7 shows their blatant and brazen disregard to the various directions passed by this Hon'ble Tribunal from time to time to stop mining activities in the absence of an approved DSR and of the laws of the land.

18. It is therefore, submitted that mining activities are being carried out illegally in the District of Baksa, State of Assam in the absence of any DSR which is a mandatory requirement in law.

Hence the present application.

LIST OF DATE AND EVENTS

DATE	EVENTS
14.09.2006	EIA Notification 2006 notified under Environment Protection Act, 2006.
27.02.2012	Judgement/order passed by the Hon'ble Supreme Court in the matter of Deepak Kumar & Ors. -vs- State of Haryana & Ors. bearing I.A. No. 12 and 13 of 2011 in Special Leave Petition (Civil) No. 19628-19629 of 2009 made taking prior environmental clearance from Ministry of Environment and Forest mandatory for leases of minor minerals even where the area was less than 5 hectares. Further, the Hon'ble Supreme Court of India inter alia also directed State Governments and Union Territories to take immediate steps to frame necessary rules under Section 15 of the Mines and Minerals (Development and Regulation) Act, 1957 taking into consideration the recommendations of MoEF in its Report of March 2010 and model guidelines framed by the Ministry of Mines, Govt. of India.
16.03.2013	Respondent No.2 promulgated the Assam Minor Mineral Concession Rules, 2013 ('**Assam Rules 2013**') on March 16, 2013 *inter alia* for prevention of illegal mining.
15.01.2016	Respondent No. 1 issued a Notification which amended the EIA notification dated September 14, 2006, *inter alia*, making it mandatory to obtain Environmental Clearance for mining of minor mineral of lease area of less than or equal to 5 hectares. The notification further provided detailed procedure for Preparation of District Survey Report ('**DSR**').
20.01.2016	Respondent No. 1 issued another Notification by which the District Level Environment Impact Assessment Authority ('**DEIAA**') and District Level Expert Appraisal Committee ('**DEAC**') was constituted.

2016	Respondent No. 1 had after thorough and extensive consultation with the State Governments has issued the Sustainable Sand Mining Management Guidelines, 2016 ('**SSMMG, 2016**').
Since 2016	The Respondent Nos.1 to 7 have been granting mining leases and Environmental Clarance to various third parties without approval of any DSR.
08.12.2017	The importance of preparation of the District Survey Report and obtaining environmental clearance before carrying out any mining activity of minor mineral was highlighted by this Hon'ble Tribunal, Principal Bench at New Delhi in the case of Anjani Kumar v. State of UP reported in 2017 SCC OnLine NGT 979.
11.04.2018	The Hon'ble High Court of Jharkhand, *vide* its judgement dated April 11, 2018 in '*Court on its own motion v. State of Jharkhand*' in W.P. (PIL) No. 1806 of 2015 directed the Respondent No. 1 to lay down a format for the preparation of District Survey Report for minor minerals other than sand and *bajri*.
25.07.2018	Respondent No. 1 in compliance of the directions passed by the Hon'ble High Court of Jharkhand in '*Court on its own motion v. State of Jharkhand*' issued a Notification dated July 25, 2018 making amendments to Appendix X to the EIA 2006 and incorporated the procedure for formulation of a DSR for minerals other than sand and *bajri*.
2020	Respondent No. 1, in supplement and addition to SSMMG, 2016, issued the Enforcement & Monitoring Guidelines for Sand Mining 2020 ('**EMGSM, 2020**').
10.11.2021	The Hon'ble Supreme Court vide judgement dated November 10, 2021 in State of Bihar v. Pawan Kumar, (2022) 2 SCC 348 interpreting the 2020 guidelines held that

	District Survey Report is required to be prepared before auction/e-auction/grant of mining lease.
20.07.2022	The Hon'ble Supreme Court of India in the case of *Mangal Singh Bundela v. State of Madhya Pradesh & Ors*, bearing Civil Appeal No. 4593 of 2022 passed an interim order directing that no mining shall be carried out in terms of the e-auction therein without finalizing the District Survey Report.
24.11.2023	This Hon'ble Tribunal at Bhopal by a judgment dated passed in Dinesh Bothra v. Union of India, 2023 SCC OnLine NGT 490 reiterated that the act of conducting mining or de-silting and the consequent sale of minerals at prices fixed by the Government is a mining activity and in such a case, requirements defined in Clause 7 of EIA 2006 has to be followed, viz. preparation of DSR, obtaining of Environmental Clearances (EC) etc.
06.04.2024	EC granted to Respondent No.8 for project named Government Permit Area of Balti Clay/Silt Mahal which was subsequently transferred to respondent No.11. It is pertinent to mention that that the said EC will expire on 06.04.2026.
14.05.2024	EC granted to Respondent No.8 for project named Government Permit Area of Barandi Sand Mahal-9. The said EC will expire on 14.05.2029
31.05.2024	EC granted to Respondent No.8 for project named Government Permit Area of Barandi Sand Mahal-8. The said EC will expire on 31.05.2029
06.06.2024	The report of Comptroller and Auditor General of India on Revenue Sector for the year ended March 31, 2022
01.07.2024	EC granted to Respondent No.9 for project named Khagraburi PP Land Sand & Stone Mining Permit Area. The said EC will expire on 01.07.2026

08.08.2024	The Hon'ble Tribunal in the case of *Bibekananda v State of Odisha & Ors.* O.A. No. 125/2024/EZ vide order dated 08.08.2024 has directed that no mining activity shall be carried out under interim District Survey Report.
September 2024	The draft District Survey Report for the District of Baksa, State of Assam was uploaded at the public portal.
08.10.2024	EC granted to Respondent No.14 for project named Suagpur Village Patta S.S. Gravel Mining Permit Area. The said EC expired on 08.04.2025
25.03.2025	EC granted to Respondent No.11 for project named Saukuchi Village Patta Land Earth Mining Permit Area. The said EC will expire on 25.03.2026
04.04.2025	This Hon'ble Tribunal in *OA No. 5/EZ/2025 titled as Atanu Borthakur -vs- Union of India & Ors.* after observing that the Respondent No.5 has issued Environmental Clearances without approval of a DSR called upon the Respondent Nos. 2, 4 and 5 by an order dated April 4, 2025 to file an affidavit to the short question explaining as to how the Environmental Clearance, Consent to Operate and Consent to Establish were granted to the Project Proponent to carry on sand mining.
13.05.2025	EC granted to Respondent No.8 for project named Government Permit Area of Keleng Chock A.
13.05.2025	EC granted to Respondent No.12 for project named Saukuchi Village PP Land Ordinary Earth Mining Permit Area.
13.05.2025	EC granted to Respondent No.13 for project named Gobardhana Village Patta Land Sand, Sand Gravel, & Stone Mining Permit Area.

APPLICATION UNDER SECTION 18 READ WITH SECTION 14 AND 15 OF THE NATIONAL GREEN TRIBUNAL ACT, 2010

To,

The Hon'ble Chairperson and his Companion Members of the Hon'ble National Green Tribunal, Eastern Zone Bench, Kolkata

The humble application on behalf
of the Applicant abovenamed

MOST RESPECTFULLY SHOWETH:

1. **Particulars of the Petitioner:** As mentioned in the above cause title. The address of the Applicant is as given above for the service of notices of this application.

2. **Particulars of the Respondents:** As mentioned in the above cause title. The addresses of the Respondent Nos. 1 to 14 are as given above for services of notices of the instant application.

3. DESCRIPTION OF PARTIES

3.1. That the present application is being filed under Section 18 read with Sections 14 and 15 of the National Green Tribunal Act, 2010 by the Applicant, being affected and interested in the protection of the environment and ecology.

3.2. The Applicant is a social worker and committed to espouse the cause of general public at large. He has been performing several social and public interest activities throughout the State of Assam and specifically relating to protection of forest, rivers and environment which is being affected due to illegal mining activities permitted by

the authorities concerned in gross violation of the established laws, regulatory frameworks and principles laid down by the Hon'ble National Green Tribunal and the Hon'ble Supreme Court of India, as well as various directives and guidelines issued by the Union Government. The Applicant's dedication is in preserving the ecological integrity of regions under threat. The Applicant has earlier filed an Original Application bearing O.A. No.5/2025/EZ challenging the illegal mining activities which are being carried out in the District of Udalgiri, Assam. The said OA is pending adjudication before this Hon'ble Tribunal.

3.3. The Respondent No. 1 is the nodal agency in the administrative structure of the Union Government entrusted with the task of implementation of policies and programs relating to conservation of country's natural resources and has issued the relevant Notification dated January 15, 2016 and the Sustainable Sand Mining Management Guidelines, 2016 ('**SSMMG, 2016**') and Enforcement & Monitoring Guidelines for Sand Mining, 2020 ('**EMGSM, 2020**') which mandate for the preparation of District Survey Report ('**DSR**') before granting of mining lease(s) and carrying out any mining activities.

3.4. The Respondent No. 2 is responsible for granting mining leases in the State of Assam. The Respondent No. 3 manages the Forests, Environment and Wild-Life related issues of State of Assam. The Respondent No. 4 is the body under the State Government mandated to monitor and regulate pollution levels and enforce environmental laws and standards within the State of Assam.

3.5. The Respondent No. 5 is the state-level expert committee constituted under Section 3(3) of The Environment (Protection) Act, 1986 ('**EP Act**') to appraise and evaluate proposal seeking environmental clearance in the State of Assam. The Respondent No. 6 is the

authority responsible for approval of mining plans. The Respondent No.7 is the officer within State Government of Assam and in particular to District of Baksa and entrusted with the task of preparation of DSR and is the Chairperson of the District Level Environment Impact Assessment Authority ('**DEIAA**') in Assam.

3.6. The Respondent Nos. 8 to 13 are few persons who have been illegally and unlawfully granted mining leases by the Respondent No.7 and Environmental Clearance ("**EC**") by the Respondent No.5 on and from April, 2024 and are carrying on illegal and unlawful mining activities in different Mahals situated in the District of Baksa, Assam. Similarly, there are other persons as well who have been illegally and unlawfully granted mining leases by the Respondent No.7 and EC by the Respondent No.5 and are carrying on illegal and unlawful mining activities in the District of Baksa, State of Assam after issuance of the Notification dated January 15, 2016 by the Respondent No.1. However, the Applicant despite his best efforts have not been able to extract the details of such other persons who have been illegally and unlawfully granted mining leases and EC or are carrying on illegal and unlawful mining activities in the District of Baksa, State of Assam.

3.7. The Respondent No. 14 was illegally and unlawfully granted mining lease by the Respondent No.7 and Environmental Clearance ("**EC**") by the Respondent No.5 on October 8, 2024 for a period of 6 months and was carrying on illegal and unlawful mining activities at 'Suagpur Village Patta S.S. Gravel Mining Permit Area' in the District of Baksa, Assam till April 8, 2024. Similarly, there are other persons as well who were illegally and unlawfully granted mining leases by the Respondent No.7 and EC by the Respondent No.5 and were carrying on illegal and unlawful mining activities in the District of Baksa, State of Assam after issuance of the Notification dated

January 15, 2016 by the Respondent No.1 but such mining lease and EC has expired as on the date of filing of this petition. However, the Applicant despite his best efforts have not been able to extract the details of such other persons who have been illegally and unlawfully granted mining leases and EC [which has expired as on the date of filing of this application] or were carrying on illegal and unlawful mining activities in the District of Baksa, State of Assam. The Applicant states that despite such mining lease and EC having been expired, the Respondent No.14 and such other persons have caused damage to the natural resources due to illegal and unlawful mining activities in the absence of a District Survey Report and are entitled to pay compensation for restitution of the environment.

3.8. The Applicant states that grant of EC or mining leases or carrying of mining activities, in the absence of a District Survey Report, is in gross violation of the established laws, regulatory frameworks and principles laid down by the Hon'ble National Green Tribunal and the Hon'ble Supreme Court of India, as well as various directives and guidelines issued by the Union Government.

3.9. The Applicant submits that the present application pertains to all such entities/persons who are/were unlawfully carrying on mining activities in the District of Baksa in the absence of a District Survey Report since the issuance of the Notification dated January 15, 2016.

3.10. This Hon'ble Tribunal has the jurisdiction to adjudicate the present original application it involves a substantial question relating to environment and that such question arises out of the implementation of the enactments specified in Schedule I of the National Green Tribunal Act, 2010.

3.11. The present Application has been preferred, *inter alia* to seek directions upon the Respondents to take immediate steps to stop any mining activity being carried out and to prevent any mining activity from being carried out in the District of Baksa, State of Assam in the absence of a District Survey Report and for setting aside and quashing the mining leases and/or mining contracts and/or mining permits and/or mining concessionaire granted by the Respondent Nos. 1 to 7 illegally and unlawfully in favour of several third parties in transgression and violation of the provisions of EIA, 2006 as amended by the Respondent No. 1, by and under the Notification dated January 15, 2016 along with the decisions passed by the Hon'ble Supreme Court, this Hon'ble Tribunal, as well as SSMMG, 2016 and EMGSM, 2020 issued by the Respondent No. 1. The Applicant further seeks directions on the Respondent Nos. 8 to 14 and such other persons who have carried on illegal and unlawful mining activities in the District of Baksa in the absence of a District Survey Report to pay compensation for the damage done to the natural resources.

4. SUBSTANTIAL QUESTIONS OF LAW

That the present Original Application seeks to raise the following substantial questions relating to the environment:

4.1 Whether the issuance and grant of mining leases and/or mining contracts and/or mining permits and/or mining concessionaire and Environmental Clearance to several third parties and permitting them to carry out mining activities without finalization and notification of a District Survey Report (**"DSR"**) is in gross violation of the provisions of the Environmental Impact Assessment dated September 14, 2006 ('**EIA, 2006**') as amended by the Respondent No. 1, by and under the Notification dated January 15, 2016 along with the decisions passed by the Hon'ble Supreme Court, this Hon'ble Tribunal, as well as the Sustainable Sand Mining

Management Guidelines, 2016 ('**SSMMG, 2016**') and Enforcement & Monitoring Guidelines for Sand Mining, 2020 ('**EMGSM, 2020**') issued by the Respondent No. 1.

4.2 Whether issuance and grant of mining leases and/or mining contracts and/or mining permits and/or mining concessionaire and Environmental Clearance in the absence of a final and notified District Survey Report would render the mining leases and/or mining contracts and/or mining permits and/or mining concessionaire and Environmental Clearance void ab-initio?

4.3 Whether the decision of the Hon'ble Apex Court in *State of Bihar v. Pawan Kumar*, (2022) 2 SCC 348 and *Mangal Singh Bundela v. State of Madhya Pradesh & Ors. Civil Appeal No. 4593 of 2022* and this Hon'ble Tribunal in *Anjani Kumar v State of Uttar Pradesh, 2017 SCC Online NGT 979, Dinesh Bothra v. Union of India,* 2023 SCC OnLine NGT 490 and *State of Uttar Pradesh & Anr. -vs- Gaurav Kumar & Ors.*, *2025 SCC OnLine SC 1069* is directly applicable wherein it has been categorically held that preparation of DSR and obtaining of Environmental Clearance is a mandatory condition, precedent to carrying out any mining activity?

4.4 Whether it was incumbent upon the Respondent Nos. 2 to 7 to finalize and notify a DSR as per provisions of the EIA 2016, subsequent Notifications dated January 15, 2016, January 20, 2016 and July 25, 2018 and the SSMMG, 2016 and EMGSM, 2020 before granting any mining lease/mining contract/mining permit/mining concessionaire and Environmental Clearance and permitting the Respondent Nos. 8 to 14 and other unknown third parties from carrying out any mining activity?

4.5 Whether non-notification of the DSR in public domain is contrary to the spirit and purpose of Appendix X to the EIA, 2006, as amended?

4.6 Whether carrying out mining activities without the finalization and notification of the District Survey Report violates the fundamental

right to be free from the adverse effects of climate change under Article 21 of Constitution of India?

4.7 Whether the Respondents and other third parties, who have carried out mining activities in the District of Baksa since January, 2016 in the absence of a DSR, are liable to compensate, rehabilitate and restitute the area under Section 15 of the NGT Act, 2010 for damage done to the environment?

5 BRIEF FACTS

5.1 The present Application has been preferred, *inter alia* to seek directions upon the Respondents to take immediate steps to stop any mining activity being carried out and to prevent any mining activity from being carried out in the District of Baksa, State of Assam in the absence of a District Survey Report ('**DSR**') and for setting aside and quashing the mining leases and/or mining contracts and/or mining permits and/or mining concessionaire granted by the Respondent Nos. 1 to 7 illegally and unlawfully in favour of several third parties in transgression and violation of the provisions of Environmental Impact Assessment dated September 14, 2006 ('**EIA, 2006**') as amended by the Respondent No. 1, by and under the Notification dated January 15, 2016 along with the decisions passed by the Hon'ble Supreme Court, this Hon'ble Tribunal, as well as the Sustainable Sand Mining Management Guidelines, 2016 ('**SSMMG, 2016**') and Enforcement & Monitoring Guidelines for Sand Mining, 2020 ('**EMGSM, 2020**') issued by the Respondent No. 1. The Applicant further seeks directions on the Respondent Nos. 8 to 14 and such other persons who have carried on illegal and unlawful mining activities in the District of Baksa in the absence of a DSR to pay compensation for the damage done to the natural resources.

5.2 The brief facts leading to the filing of the present application are as follows:

5.3 In the sixties, there had been increased concern over the state of environment all over the world. Such concern was on account of decline in the environmental quality which had been evidenced by increasing pollution, loss of vegetal cover and biological diversity, excessive concentrations of harmful chemicals in the ambient atmosphere and in food chains, growing risks of environmental accidents and threats to life support systems. Accordingly, decision was taken in the United Nations Conference on the Human Environment at Stockholm in June 1972 to take appropriate steps for the protection and improvement of human environment. India was a participant in the conference and strongly advocated for the environmental concerns. Thus, the Parliament enacted the Environmental Protection Act, 1986 on May 23, 1986 (hereinafter referred to as the '**EP Act**'), to implement the decisions taken at the at the United Nations Conference on Human Environment in so far as they relate to protection and improvement of environment and prevention of hazards to human beings, other living creatures, plants and property.

5.4 Section 3 of the Environmental Protection Act, 1986 empowers the Central Government to take measures to protect and improve the environment. Section 3(2) of the Environmental Protection Act, 1986 provides that Central Government may take measures for restriction of areas in which in any industries, operations or processes or class of industries, operations or processes shall not be carried out or shall be carried out subject to certain safeguards.

5.5 Thus, the Respondent No.1 under Section 3(1) and Section 3(2) (v) of the Environmental Protection Act, 1986 read with Rule 5 (3) (d) of Environmental (Protection) Rules, 1986 issued the Environment Impact Assessment Notification dated September 14, 2006 ('**EIA**

2006') directing that certain projects or activities as provided for in the said notification can be undertaken only after prior environmental clearance is granted. Entry 1 of the Schedule to the said notification provided that prior environmental clearance is required for mining of minerals either from the Central Government or from State Level Environmental Impact Assessment Authorities depending upon the categorization of the project and the threshold limits. The Environment Impact Assessment Notification was uniformly applicable all over India. It is further submitted that as per the EIA Notification 2006, Environmental Clearance or Environmental Impact Assessment was not required to be undertaken where the area of mining minerals was less than 5 hectares.

5.6 The Environment Impact Assessment Notification *inter alia* also provided for constitution of Central and State Level Environmental Impact Assessment Authorities ('**SEIAA**'), manned by professionals, experts and technical individuals that shall screen, scope and appraise projects from an environmental perspective and further monitor the same from time to time, in order to achieve the desired goals of sustainable development.

A true copy of the EIA Notification dated September 14, 2006 issued by Respondent No. 1 is annexed herewith and marked as **Annexure A-1 (Pages 61 to 103).**

5.7 In order to flout the EIA notification 2006, it was observed that homogeneous areas were being broken into pieces of land less than 5 hectares so that no Environment Impact Assessment or Environmental Clearance would be required. Taking into account the fact that auction notices were being issued in respect of minor minerals without carrying out the necessary Environmental Impact Assessment or granting Environmental Clearance as the area under

auction for mining leases was less than 5 hectares, the Hon'ble Supreme Court of India in the case of *Deepak Kumar & Ors. -vs- State of Haryana & Ors. bearing I.A. No. 12 and13 of 2011 in Special Leave Petition (Civil) No. 19628-19629 of 2009* vide judgment dated February 27, 2012 made taking prior environmental clearance from Ministry of Environment and Forest mandatory for leases of minor minerals even where the area was less than 5 hectares. Further, the Hon'ble Supreme Court of India *inter alia* also directed State Governments and Union Territories to take immediate steps to frame necessary rules under Section 15 of the Mines and Minerals (Development and Regulation) Act, 1957 taking into consideration the recommendations of MoEF in its Report of March 2010 and model guidelines framed by the Ministry of Mines, Govt. of India.

5.8 Section 23-C of the Mines and Minerals (Development and Regulation) Act, 1957 provides that the State Government may make rules for preventing illegal mining, transportation and storage of minerals. Further, Section 15 of the Mines and Minerals (Development and Regulation) Act, 1957 empowers the State Government to make rules in respect of minor minerals. Respondent No.2, in exercise of powers under Section 15(1) and Section 23C of the Mines and Minerals (Development and Regulation) Act, 1957, accordingly promulgated the Assam Minor Mineral Concession Rules, 2013 ('**Assam Rules 2013**') on March 16, 2013 *inter alia* for prevention of illegal mining.

5.9 In order to implement the aforesaid decision of the Hon'ble Supreme Court of India in the case of Deepak Kumar & Ors. -vs- State of Haryana & Ors. in its true letter and spirit and to streamline the process of environmental clearance for mining of minor minerals, the Respondent No. 1 issued a Notification dated January 15, 2016 which amended the EIA notification dated September 14, 2006, *inter alia*, making it mandatory to obtain Environmental Clearance for

mining of minor mineral of lease area of less than or equal to 5 hectares. By way of the amendment notification, the subparagraph 7(iii) was introduced which provides for the *'Preparation of District Survey Report for Sand Mining or River Bed Mining and Mining of other Minor Minerals.'* By way of the amendment notification, it was also directed to constitute a District Level Environment Impact Assessment Authority ("**DEIAA**") comprising of professionals, experts and technical individuals. The Environmental Clearance in respect of B2 category projects as mentioned in the Schedule to the notification pertaining to mining of minor minerals of lease area of less than or equal to 5 hectares had to be obtained from the DEIAA. Further, the DEIAA and District Expert Appraisal Committee ('**DEAC**') had been assigned the task for preparation of the DSR at the district level in each State.

5.10 The Appendix – X to the EIA 2006 which was also incorporated by and under the Notification dated January 15, 2016 provided the detailed procedure for Preparation of DSR wherein the said DSR was to be prepared for each District as per the Sustainable Sand Mining Guidelines. The main objective for preparation of DSR was to ensure to identify areas of aggradation or deposition wherein mining can be allowed; and identification of areas of erosion and proximity to infrastructural structures and installations wherein mining should be prohibited, and calculation of annual rate of replenishment and allowing time for replenishment after mining in that area.

5.11 It is relevant to mention that as per the said Appendix-X, the survey was to be carried out by the newly constituted DEIAA with the assistance of the Geology Department, Irrigation Department, Forest Department, Public Works Department and ground water boards of mining department on the said district.

A true copy of the Notification dated 15.01.2016 issued by Respondent No. 1 is **Annexure A-2 (Pages 104 to 115).**

5.12 Thereafter, Respondent No. 1 issued another Notification dated January 20, 2016 by which DEIAA and DEAC was constituted.

A true copy of the Notification dated January 20, 2016 issued by Respondent No. 1 is **Annexure A-3 (Pages 116 to 117).**

5.13 The Respondent No. 1 had after thorough and extensive consultation with the State Governments has issued the Sustainable Sand Mining Management Guidelines, 2016 ('**SSMMG, 2016**'). It was stated in the guidelines that sand and gravel are one of the most important construction materials and their mining has reached a level threatening the environment and ecosystem besides also reaching a level of scarcity that would threaten the economy. The main objectives of the said guidelines is, *inter alia,* to ensure that sand and gravel mining is done in an environmentally sustainable and socially responsible manner, and to further ensure the conservation of river equilibrium and its natural environment by protection and restoration of the ecological system. In the said guidelines as well, great emphasis was laid on preparation of DSR. In fact, in the Annexure AI to the said guidelines it has been explicitly mentioned that the broad principle on which any sustainable sand mining guidelines/policy can be based is that river/natural resources must be utilized for the benefit of the present and future generation, so river resources should be prudently managed and developed and the preparation of DSR is an important initial step in that regard.

5.14 In fact, one of the key nodal objectives enumerated in the SSMMG, 2016 was the preparation of the DSR that would *'identify the areas of aggradation/deposition where mining can be allowed; and identification of areas of erosion and proximity to infrastructural structures and installations wherein mining should be prohibited and calculation of annual rate of replenishment and allowing time for replenishment after mining area.'* The Applicant seeks leave to refer

and rely on the contents of the SMMG, 2016 at the time of hearing, which are not repeated herein for the sake of brevity.

5.15 Interpreting the aforesaid rules, guidelines and notifications, the importance of preparation of the DSR and obtaining environmental clearance before carrying out any mining activity of minor mineral was further highlighted by this Hon'ble Tribunal, Principal Bench at New Delhi in the case of *Anjani Kumar v. State of UP reported in 2017* SCC OnLine NGT 979. The Hon'ble National Green Tribunal vide judgement dated December 8, 2017 unequivocally held that preparation of DSR is not only important act but it should be conducted prior to sanctioning of permission/concession. It was further held that in absence of DSR after due inspection, grant of mining lease will be in conflict of the environmental laws as sand mining lease could be granted in an area only when aspect of replenishment of minor mineral especially in river sand is clearly established. It was further held in the said judgment that *"preparation of District Survey Report and obtaining Environmental Clearance is a condition precedent to carrying on mining activity"*. Further, it was also held that all laws in other fields than environment must tilt in favour of the environmental laws and no extraction of minor minerals should be carried on unless the requirement of environmental laws are fully satisfied.

5.16 The Hon'ble High Court of Jharkhand, *vide* its judgement dated April 11, 2018 in '*Court on its own motion v. State of Jharkhand*' in W.P. (PIL) No. 1806 of 2015 after the appreciating the importance and relevance of the DSR, directed the Respondent No. 1 to lay down a format for the preparation of DSR for minor minerals other than sand and *bajri*.

5.17 Accordingly, the Respondent No. 1 in compliance of the directions passed by the Hon'ble High Court of Jharkhand in '*Court on its own motion v. State of Jharkhand*' issued a Notification dated July 25,

2018 making amendments to Appendix X to the EIA 2006 and incorporated the procedure for formulation of a DSR for minerals other than sand and *bajri*.

A true copy of the Notification dated July 25, 2018 issued by Respondent No. 1 is **Annexure A-4 (Pages 118 to 123).**

5.18 Thereafter, even after framing of the SSMMG, 2016, it was observed that apart from management and systematic mining practices there is urgent need to have guidelines for effective enforcement of regulatory provision and their monitoring. In fact, the Hon'ble NGT in the matter titled as '*Sudarsan Das v State of West Bengal'* bearing O.A. No. 173 of 2018 vide its order dated 04.09.2018 *inter alia* also observed that *"There can be no two views that an effective institutional monitoring mechanism is required not only at the stage when Environmental Clearance is granted but also at subsequent stages. The guidelines focus on the preparation of District Survey Report and the Management Plan. We are of the view that all the safeguards which are suggested in sustainable sand mining guidelines as well as notification dated 15.01.2016 ought to be scrupulously followed. It is a known fact that in spite of the above-suggested guidelines being in existence, on the ground level, illegal mining is still going on. The existing mechanism has not been successful and effective in remedying the situation. …Since there is an utter failure in the current monitoring mechanism followed by the State Boards, SEIAAs and DEIAAs, it is required to be revised for effective monitoring of sand and gravel mining and a dedicated monitoring mechanism be set up."*

5.19 Accordingly, the Respondent No. 1, in supplement and addition to SSMMG, 2016, issued the Enforcement & Monitoring Guidelines for Sand Mining 2020 ('**EMGSM, 2020**'). The said EMGSM, 2020 alongwith highlighting the requisite judicial decisions passed by this Hon'ble Tribunal wherein the importance of DSR has been reflected,

enumerated the various benefits of a DSR and its imperative role in curbing the unplanned grant of mining leases.

5.20 The Hon'ble Supreme Court *vide* judgement dated November 10, 2021 in *State of Bihar v. Pawan Kumar*, (2022) 2 SCC 348 interpreting the 2020 guidelines held that DSR is required to be prepared before auction/e-auction/grant of mining lease.

5.21 Highlighting the importance of preparation of DSR before any mining activity is carried out, the Hon'ble Supreme Court of India in the case of *Mangal Singh Bundela v. State of Madhya Pradesh & Ors*, bearing Civil Appeal No. 4593 of 2022 passed an interim order directing that no mining shall be carried out in terms of the e-auction therein without finalizing the DSR. In the present case e-auction for sand mining was conducted on 16.11.2021 whereas the draft DSR was published only on 04.03.2022. Thus, taking into account the fact that mining leases was granted without there being a final DSR, the Hon'ble apex was pleased to pass the interim order directing that no mining shall be carried out in terms of the e-auction without finalizing the DSR.

5.22 This Hon'ble Tribunal at Bhopal by a judgment dated November 24, 2023 passed in *Dinesh Bothra v. Union of India*, 2023 SCC OnLine NGT 490 reiterated that the act of conducting mining or de-silting and the consequent sale of minerals at prices fixed by the Government is a mining activity and in such a case, requirements defined in Clause 7 of EIA 2006 has to be followed, *viz.* preparation of DSR, obtaining of Environmental Clearances (EC) etc.

5.23 It is pertinent to highlight that the Hon'ble Supreme in the case of *Common Cause v. Union of India (2017) 9 SCC 499* has definitively ruled that mining activities conducted without securing the necessary Consent to Establish ('**CTE**') and Consent to Operate ('**CTO**') constitute illegal mining. As a consequence, those engaged

in such activities are obligated to compensate for the value of the mineral extracted unlawfully, in addition to damage caused to the environment.

5.24 Thus, from the aforesaid notifications, rules and guidelines issued by the Respondent No.1 and from the various judicial precedents passed by the Hon'ble Supreme Court of India as well as this Hon'ble Tribunal it is evidently clear that finalization and notification of DSR is a condition precedent for grant of Environmental Clearance and to carrying out any mining activity. It is amply clear that DSR is not only an important act but it should be conducted prior to sanctioning of permission/concession or grant of Environmental Clearance. In the absence of DSR, grant of mining lease or Environmental Clearance will be in conflict of the environmental laws as sand mining lease could be granted in an area only when aspect of replenishment of minor mineral especially in river sand is clearly established. Further, it is established that that all laws in other fields than environment must tilt in favour of the environmental laws and no extraction of minor minerals should be carried on unless the requirements of environmental laws are fully satisfied. Hence, grant of mining lease or Environmental Clearance, in the absence of DSR is not only illegal and unlawful but also *void ab-initio*.

5.25 It is submitted that as a consequence, those engaged in carrying out mining activities in the absence or notification of a DSR are clearly acting in gross violation of the provisions of the EIA, 2006 as amended by the Respondent No. 1, by and under the Notification dated January 15, 2016 along with the decisions passed by the Hon'ble Supreme Court, this Hon'ble Tribunal, as well as SSMMG, 2016 and EMGSM, 2020 and are thus, obligated to compensate for the value of the mineral extracted unlawfully, in addition to damage caused to the environment.

5.26 Despite being aware of the aforesaid legal situation, the Respondent Nos. 1 to 7 have granted mining leases and Environmental Clearances and have permitted mining activities to be carried out in the District of Baksa, State of Assam in the absence of a DSR. Such acts on behalf of the Respondent Nos.1 to 7 clearly shows that they have scant regard for the law of the land and have carried acts in dereliction of their duties.

5.27 The Applicant recently came to learn that illegal mining is going on in the District of Baksa and after making necessary searches, the Applicant came to learn that mining leases and Environmental Clearances are being illegally and unlawfully granted by the Respondent Nos. 1 to 7 without finalization and notification of the final DSR. The Applicant also came to learn that the Respondent Nos. 1 to 7 have been illegally and unlawfully granting such mining leases and Environmental Clearances to various third parties since January, 2016 without approval of any DSR, in violation of the provisions of the EIA, 2006 as amended by the Respondent No. 1, by and under the Notification dated January 15, 2016 along with the decisions passed by the Hon'ble Supreme Court, this Hon'ble Tribunal, as well as SSMMG, 2016 and EMGSM, 2020.

A true copy of the photographs taken by the Applicant evidencing that illegal and unlawful mining activities are being carried out in the District of Baksa, Assam is annexed herewith and marked as **Annexure A- 5 (Pages 124 to 130)**.

5.28 It is submitted that the draft DSR for the District of Baksa was uploaded in the public portal only in the month of September, 2024 for suggestions, comments and objections to the draft DSR from the public. Even in the draft DSR uploaded by the Respondents, it is evident that mining activities were going on in the District of Baksa at the time of preparation of the draft DSR. Such mining activities could only have been permitted by the Respondent Nos. 1 to 7 after

grant of mining leases and Environmental Clearances and since no DSR was ever approved for the District of Baksa, the mining leases and Environmental Clearances granted by the Respondent Nos. 1 to 7 were illegal and unlawful.

A true copy of the Draft District Survey Report for Baksa District, Assam as uploaded in the district portal is annexed and marked as **"Annexure A-6" (Pages 131 to 217).**

A true copy of the web page showing that the draft District Survey Report was uploaded only in the month of September 2024 is annexed and marked as **"Annexure A-7" (Pages 218 to NIL).**

5.29 The Applicant, through his searches and examination has ascertained and identified names of certain persons in whose favor such mining leases have been granted and who on the basis of such mining leases are carrying out mining activities in the District of Baksa in the absence of a DSR from the web portal of PARIVESH 2.0 being "*https://parivesh.nic.in*". The Applicant states that in the said website, the Applicant could find details of illegal and unlawful grant of EC by the Respondent No.5 to third parties only from the month of April, 2024. Such details of illegal and unlawful grant of EC are as under:

Name	**Project Name**	**Date of SEAC approval**	**Date of SIEAA approval**	**Date of grant of EC**	**Expiry of EC**
Respondent No.8	Government Permit Area of Balti Clay/Silt Mahal [*subsequently transferred to Respondent No.11*]	23.02.2024	06.04.2024	26.04.2024	26.04.2026
	Government Permit Area of Barandi Sand Mahal-9	28.03.2024	14.05.2024	11.06.2024	11.06.2029

	Government Permit Area of Barandi Sand Mahal-8	30.04.2024	31.05.2024	11.06.2024	11.06.2029
	Government Permit Area of Keleng Chock A	05.04.2025	13.05.2025	28.05.2025	28.05.2026

A true copy of the Application Form, Minutes of the Meeting of Respondent No.5 and the EC granted to the Respondent No.8 for Government Permit Area of Balti Clay/Silt Mahal is annexed and marked as **"Annexure A-8" (Pages 219 to 286).**

A true copy of the Application Form, Minutes of the Meeting of Respondent No.5 and the EC granted to the Respondent No.8 for

Government Permit Area of Barandi Sand Mahal-9 is annexed and marked as **"Annexure A-9" (Pages 287 to 376).**

A true copy of the Application Form, Minutes of the Meeting of Respondent No.5 and the EC granted to the Respondent No.8 for Government Permit Area of Barandi Sand Mahal-8 is annexed and marked as **"Annexure A-10" (Pages 377 to 476).**

A true copy of the Application Form, Minutes of the Meeting of Respondent No.5 and the EC granted to the Respondent No.8 for Government Permit Area of Keleng Chock A is annexed and marked as **"Annexure A-11" (Pages 477 to 689).**

A true copy of the Application Form, Minutes of the Meeting of Respondent No.5 and the EC granted to the Respondent No.9 for Khagraburi PP Land Sand & Stone Mining Permit Area is annexed and marked as **"Annexure A-12" (Pages 690 to 767).**

A true copy of the Application Form, Minutes of the Meeting of Respondent No.5 and the EC granted to the Respondent No.10 for Government Permit Area of Balti Clay/Silt Mahal is annexed and marked as **"Annexure A-13" (Pages 768 to 853).**

A true copy of the Application Form, Minutes of the Meeting of Respondent No.5 and the EC granted to the Respondent No.11 for Saukuchi Village Patta Land Earth Mining Permit Area is annexed and marked as **"Annexure A-14" (Pages 854 to1081).**

A true copy of the Application Form, Minutes of the Meeting of Respondent No.5 and the EC granted to the Respondent No.12 for Saukuchi Village PP Land Ordinary Earth Mining Permit Area is annexed and marked as **"Annexure A-15" (Pages 1082to1295).**

A true copy of the Application Form, Minutes of the Meeting of Respondent No.5 and the EC granted to the Respondent No.13 for

Gobardhana Village Patta Land Sand, Sand Gravel, & Stone Mining Permit Area is annexed and marked as **"Annexure A-16" (Pages 1296 to 1509).**

A true copy of the Application Form, Minutes of the Meeting of Respondent No.5 and the EC granted to the Respondent No.14 for for Suagpur Village Patta S.S. Gravel Mining Permit Area is annexed and marked as **"Annexure A-17" (Pages 1510 to 1640).**

5.30 The fact that the DSR for the State of Baksa has not been approved would be evident from the Minutes of the Meeting of the Respondent No.5 held on May 13, 2025 where Environmental Clearances have been granted to the Respondents Nos. 8, 12 and 13 even though such minutes clearly states that DSR for the District of Baksa is yet to be approved. The extract of the relevant portions from the minutes of the meeting is set out herein:

"*It is pertinent to mention that Evaluation, Examination and Appraisal of the final DSR for the district has already been done by the SEAC with its observations for compliance and recommended in principle for further approval by the SEIAA, Assam.*"

"*EC is approved for project area allotted 4.90Ha with a quantity of 27,000Cu M of Clay for 6 (six) months subjected to the terms and conditions laid down by SEAC and that the area in question is to be reflected in the approved final DSR.*"

Such minutes of the meeting have already been annexed above.

5.31 This Hon'ble Tribunal in *OA No. 5/EZ/2025 titled as Atanu Borthakur -vs- Union of India & Ors.* pertaining to illegal and unlawful mining activities in the District of Udalguri, Assam by an order dated January 17, 2025 directed the District Commissioner of Udalguri District to ensure stay of all mining activities, if the DSR for such District has not been approved by the Respondent No.5.

A true copy of the order dated January 17, 2025 passed by this Hon'ble Tribunal in OA No. 5/EZ/2025 is annexed and marked as **"Annexure A-18" (Pages 1641 to 1647).**

5.32 This Hon'ble Tribunal in the said *OA No. 5/EZ/2025* after observing that the Respondent No.5 has issued Environmental Clearances without approval of a DSR has also called upon the Respondent Nos. 2, 4 and 5 by an order dated April 4, 2025 to file an affidavit to the short question explaining as to how the Environmental Clearance, Consent to Operate and Consent to Establish were granted to the Project Proponent to carry on sand mining. The relevant portions of the order dated April 4, 2025 in this regard is extracted hereinbelow:

"5. Ms. Rashhmi Singhee, learned Counsel appearing (in Virtual Mode) on behalf of the SEIAA, Assam states that the process of consideration of DSR is going on and appropriate orders may be passed within ten days. This statement is endorsed by Ms. Malabika Roy Dey, learned Counsel appearing for the State of Assam.

6. Question is when the DSR has not yet been approved for Udalguri District, how was the Environmental Clearance granted by SEIAA, Assam to the Project Proponent on 08.03.2022. Question also arises as to how the Consent to Operate (CTO) and Consent to Establish (CTE) was granted by the Assam State Pollution Control Board on 22.07.2024 when the DSR for Udalguri District has not yet been approved and finalized.

7. Ms. Rashhmi Singhee for SEIAA, Assam, Ms. Malabika Roy Dey for State of Assam and Mr. Shayambar Deb for Assam State Pollution Control Board shall file affidavit to the short question explaining as to how the Environmental Clearance, Consent to Operate and Consent to Establish were granted to the Project Proponent to carry on sand mining."

A true copy of the order dated April 4, 2025 passed by this Hon'ble Tribunal in OA No. 5/EZ/2025 is annexed and marked as **"Annexure A-19" (Pages 1648 to 1650).**

5.33 Despite such observations made by this Hon'ble Tribunal, the Respondent No.5 is continuing to grant Environmental Clearances for mining in the absence of a DSR. Such act and conduct of the Respondent Nos. 1 to 7 shows their blatant and brazen disregard to the various directions passed by this Hon'ble Tribunal from time to time to stop mining activities in the absence of an approved and notified DSR and of the laws of the land.

5.34 The Applicant submits that after the issuance of the Notification dated January 2016, mining leases and Environmental Clearances have continuously been granted to various persons, illegally and unlawfully, for carrying out mining activities in the District of Baksa, State of Assam without there being a DSR, however, the Applicant despite his best efforts is unable to gather information in respect of the same as the same is not available in public portal.

5.35 It is therefore, humbly prayed that this Hon'ble Tribunal may kindly direct the Respondent Nos. 1 to 7 to place on record the complete details of the persons who have illegally and unlawfully carried out mining activities or to whom mining leases and Environmental Clearances have been illegally and unlawfully granted by the Respondent Nos. 1 to 7, since issuance of the Notification dated January 2016 without approval and notification of the DSR.

5.36 Further, from the report of the Comptroller and Auditor General of India on Revenue Sector for the year ended March 31, 2022 it would be evident that despite DSR being mandatory, no such report has ever been prepared by the State of Assam till February 2023. A few relevant excerpts from the report of Comptroller and Auditor General

of India are quoted herein for ready reference of this Hon'ble Tribunal:

"4.3.10.3. District Survey Report not prepared: In 2016, GoI introduced the concept of District Survey Report (DSR) by amending the Environment Impact Assessment Notification, 2006 with an objective to ensure identification of areas of aggradations or deposition where mining can be allowed; and identification of areas of erosion and proximity to infrastructural structures and installations where mining should be prohibited and time required for replenishment after mining in that area. The DSRs are required to be prepared for each minor mineral in each district separately by the District Environment Impact Assessment Authority (DEIAA) with the assistance of Geology Department, Irrigation Department, Forest Department, Public Works Department, Ground Water Board Remote Sensing Department, Mining Department, etc. in the district. The DSR should contain the mineral potential and its location, depth of minable mineral and quantity of minerals of the district. The DSR shall be updated once in every five years and placed in the public domain. In April 2016, GoA instructed Mines and Minerals Department, Assam to initiate preparation of DSR; however, the Department had not prepared a single DSR till June 2022. Thus, due to non-preparation of DSR, the identification and quantification of reserves was limited to field verification carried out by the forest divisions without consulting other departments to adopt scientific methods. On being pointed out, the M&M Department stated (January 2023) that provision of DSR is not included in the AMMCR, 2013. The fact remains that in spite of GoA's instruction (April 2016) for preparation of DSR, the Department has not prepared any DSR till February 2023. Recommendation: The Government may ensure that the DSRs are prepared in a timebound manner."

A true copy of the report of the Comptroller and Auditor General of India on Revenue Sector for the year ended March 31, 2022 is annexed and marked as **"Annexure A-20" (Pages 1651 to 1864).**

5.37 In fact, recently the Applicant while doing his research came to know that an application being *"Pradeep Singh Shekhawat v. Union of India & Ors."* bearing O.A. No. 86 of 2024/EZ was filed before this Hon'ble Tribunal wherein a similar issue was raised regarding e-auction of minor minerals being conducted in the districts of Assam without preparation of District Survey Report. The Applicant thereafter conducting further research was able to procure the affidavit filed by Respondent No.2 in O.A. No. 86 of 2024/EZ. It is pertinent to mention here that the Respondent No.2 has in para 5 expressly stated that *"That the answering deponent begs to state that, after various judicial decisions of the Hon'ble Apex Court as well as of the Hon'ble National Green Tribunal, and also from the time to time guidelines issued by the Ministry Of Environment Forest & Climate Change, it is observed that the DSR is of utmost importance and mandatory for mining of minor minerals, for each and every districts and as such the preparation of DSR has become indispensable, or else various development work of the Government would be affected which may adversely affect the revenue collection of the State. That presently mahals are auction under Assam Minor Mineral Concession Rules, 2013. That even amendment of Assam Minor Mineral Concession Rules, 2013 is underway and there also the preparation of DSR is being made mandatory"*. Further, in the affidavit filed by the Respondent No.2 it would become evident that Final District Survey Report has not been prepared for the District of Baksa amongst other districts. Thus, from the affidavit of the Respondent No.2 itself it is evident that preparation and finalization of District Survey Report is mandatory before any mining activity can be permitted to be carried out and evidently there is no District Survey Report for the District of Baksa.

A true copy of the affidavit filed by Respondent No.2 in O.A. No. 86 of 2024/EZ is annexed and marked as **"Annexure A-21"**. **(Pages 1865 to 1905)**

5.38 It is further submitted that mining activities are being carried out in the District of Baksa, State of Assam without there being any DSR which is a mandatory requirement in law. In fact, this Hon'ble Tribunal has recently in the case of *Bibekananda v State of Odisha & Ors.* O.A. No. 125/2024/EZ vide order dated August 8, 2024 has directed that no mining activity shall be carried out under interim District Survey Report. Thus, in the light of the aforesaid, it is quite evident that no mining activity can be carried out without a final District Survey Report.

A true copy of the order dated August 8, 2024 in the case *Bibekananda v State of Odisha & Ors.* O.A. No. 125/2024/EZ is annexed and marked as **"Annexure A-22" (Pages1906 to1908).**

5.39 The Hon'ble Supreme Court in a recent decision passed on May 8, 2025 reported in *2025 SCC OnLine SC 1069, State of Uttar Pradesh & Anr. -vs- Gaurav Kumar & Ors.* has held, as under:

"*21. We conclude by holding that:*

(i) A District Survey Report is a document of seminal importance as it enables informed decision making.

(ii) Preparation of a DSR as per the procedure prescribed for its preparation under Appendix X, read with para 7(iii)(a), is required to be followed meticulously.

(iii) A valid and a subsisting DSR alone can be the basis for an application for grant of EC. A draft DSR is untenable for grant of an EC.

(iv) Preparation of reports and appraisal of projects by DEIAA and DEAC shall be on the basis of a valid and a subsisting DSR.

(v) *DEIAA and DEAC are recognized as the authorities fastened with the statutory duty of preparing the DSR every five years and this duty compels them to have a comprehensive and a real time perspective of the environment position of the district including its eco-sensitivity and other fragilities.*"

A true copy of the judgment May 8, 2025 reported in *2025 SCC OnLine SC 1069, State of Uttar Pradesh & Anr. -vs- Gaurav Kumar & Ors.* is annexed and marked as **"Annexure A-23" (Pages 1909 to 1931).**

5.40 It is further submitted that it has been held by this Hon'ble Tribunal that any Environmental Clearance granted in the absence of a District Survey Report is a null and void document and Environmental Clearance could have been issued only after issuance of a valid District Survey Report. Therefore, in the facts of the present case, admittedly there is no valid District Survey Report for the District of Baksa, hence, no Environmental Clearance could have also been granted for any mining activity and if granted is null and void ab initio. Despite various judicial decision having been passed holding the importance of a valid DSR for grant of EC or carrying on mining activities, the Respondent Nos. 1 to 7 by their actions are time and again denuding such mandatory requirement as a mere paper formality.

5.41 It is submitted that the persons who had and have been carrying on mining activities in the District of Baksa, State of Assam after issuance of the Notification dated January 15, 2016 were aware that no mining activities can be carried without any valid DSR. Hence, in view of the judgment passed by the *Hon'ble High Court at Madras on June 5, 2025 in W.P. No. 33079 of 2024, Mathavakannan -vs- State of Tamil Nadu & Ors.*, the persons engaged in such unlawful and illegal mining is liable to compensate for the value of the mineral extracted unlawfully and to compensate, rehabilitate and restitute

the area under Section 15 of the NGT Act, 2010 for damage done to the environment.

A true copy of the judgment passed by the *Hon'ble High Court at Madras on June 5, 2025 in W.P. No. 33079 of 2024, Mathavakannan -vs- State of Tamil Nadu & Ors.* is annexed and marked as **"Annexure A-24" (Pages 1932 to 2006).**

5.42 It is submitted that in recent years, District of Baksa, State of Assam has witnessed a concerning surge in the illegal mining of minor minerals including sand, gravel and stone, exacerbating environmental degradation, endangering public health, and undermining the state's socio-economic stability. Further, unregulated extraction of these resources has become rampant, posing a significant challenge to the sustainable development of the region. The consequences of rampant illegal mining of minor minerals in the District of Baksa, State of Assam are manifold and severe. Environmental degradation is the most immediate and visible impact, as unregulated mining activities result in the destruction of natural habitats, soil erosion, contamination of water bodies and depletion of ground water levels. Furthermore, the unchecked exploitation of minor minerals poses grave risks to public health and safety. The use of heavy machinery and equipment in mining operations contributes to air and noise pollution, endangering the health of nearby communities, as these illegal mining activities are done without taking requisite permissions under the Air Act or the Water Act.

5.43 In the absence of a District Survey Report (DSR), excessive mining activities are leading to the depletion and contamination of groundwater in District of Baksa, State of Assam. The districts watershed has been adversely affected due to such illegal mining activities without finalization and notification of the requisite DSR. This has resulted in the alteration of river courses in the District of

Baksa, State of Assam, primarily because of sand and stone mining. It is submitted that the Respondent Nos. 1 to 7 have failed to even the monitor the ground water levels being caused by such illegal mining. The monitoring of groundwater levels is not conducted by any authority before granting and issuing mining leases, the development of a mining plan by the Department of Mines and Resources (DMR), or the issuance of Environmental Clearance (EC) by the State Environmental Impact Assessment Authority (SEIAA). Consequently, permissions for mining are being issued without any consideration for the effects on groundwater quality, volume, or the overall watershed integrity.

5.44 The failure of the Respondent Nos. 1 to 7 to take steps in finalization and notification of District Survey Reports (DSRs) before granting and issuing mining leases/ mining contracts/ mining permits/ mining concessionaire and Environmental Clearances represents a serious dereliction of duty of the Respondent Nos. 1 to 7 to comply with the environmental laws of the country, which needs to be addressed by this Hon'ble Tribunal at the earliest.

5.45 Hence, the present Application.

6 GROUNDS

6.1 **BECAUSE** the Hon'ble NGT, Principal Bench at New Delhi in the case of *Anjani Kumar v. State of UP reported in 2017* SCC OnLine NGT 979 vide judgement dated December 8, 2017 has unequivocally held that preparation of District Survey Report and obtaining Environmental Clearance is a condition precedent to carrying on mining activity and thus mining activity of minor minerals being carried out in the District of Baksa without there being a final District Survey Report for the District of Baksa is in direct contravention of the law laid down by this Hon'ble Tribunal and the entities engaged in such unlawful and illegal mining is liable to

compensate for the value of the mineral extracted unlawfully and to compensate, rehabilitate and restitute the area under Section 15 of the NGT Act, 2010 for damage done to the environment.

6.2 **BECAUSE** the Hon'ble Supreme Court *vide* judgement dated November 10, 2021 in *State of Bihar v. Pawan Kumar*, (2022) 2 SCC 348 interpreting the 2020 guidelines held that District Survey Report is required to be prepared before auction/e-auction/grant of mining lease and thus mining activity of minor minerals being carried out in the District of Baksa without there being a final District Survey Report for the District of Baksa is in direct contravention of the law laid down by this Hon'ble Tribunal and the entities engaged in such unlawful and illegal mining is liable to compensate for the value of the mineral extracted unlawfully and to compensate, rehabilitate and restitute the area under Section 15 of the NGT Act, 2010 for damage done to the environment.

6.3 **BECAUSE** the Hon'ble Supreme Court of India in the case of *Mangal Singh Bundela v. State of Madhya Pradesh & Ors*, bearing Civil Appeal No. 4593 of 2022 passed an interim order directing that no mining shall be carried out in terms of the e-auction therein without finalizing the District Survey Report and thus evidently in the present case as well since there is no final District Survey Report for the District of Baksa, hence, no mining activity can be permitted in absence of a final District Survey Report.

6.4 **BECAUSE** this Hon'ble Tribunal at Bhopal by a judgment dated November 24, 2023 passed in *Dinesh Bothra v. Union of India*, 2023 SCC OnLine NGT 490 reiterated that the act of conducting mining or de-silting and the consequent sale of minerals at prices fixed by the Government is a mining activity and in such a case, requirements defined in Clause 7 of EIA 2006 has to be followed, *viz.* preparation of DSR, obtaining of Environmental Clearances (EC) etc.

6.5 **BECAUSE** EC has been granted to the various persons illegally and unlawfully by the Respondent No.5. The details of illegal and unlawful grant of EC by the Respondent No.1 since April, 2024 are as under:

Name	**Project Name**	**Date of SEAC approval**	**Date of SIEAA approval**	**Date of grant of EC**	**Expiry of EC**
Respondent No.8	Government Permit Area of Balti Clay/Silt Mahal [*subsequently transferred to Respondent No.11*]	23.02.2024	06.04.2024	26.04.2024	26.04.2026
	Government Permit Area of Barandi Sand Mahal-9	28.03.2024	14.05.2024	11.06.2024	11.06.2029
	Government Permit Area of Barandi Sand Mahal-8	30.04.2024	31.05.2024	11.06.2024	11.06.2029
	Government Permit Area of Keleng Chock A	05.04.2025	13.05.2025	28.05.2025	28.05.2026
Respondent No.9	Khagraburi PP Land Sand & Stone Mining Permit Area	30.05.2024	01.07.2024	05.10.2024	26.04.2026
Respondent No.10	Government Permit Area of Balti Clay/Silt Mahal [*upon Transfer approved on 04.04.2025*]	N.A.	06.04.2024	02.01.2025	06.04.2026
Respondent No.11	Saukuchi Village Patta Land Earth Mining Permit Area	07.03.2025	25.03.2025	10.04.2025	25.03.2026
Respondent No.12	Saukuchi Village PP Land Ordinary Earth Mining Permit Area	05.04.2025	13.05.2025	28.05.2025	28.11.2025

Respondent No.13	Gobardhana Village Patta Land Sand, Sand Gravel, & Stone Mining Permit Area	05.04.2025	13.05.2025	03.06.2025	03.06.2026
Respondent No.14	Suagpur Village Patta S.S. Gravel Mining Permit Area	09.09.2024	08.10.2024	18.10.2024	18.04.2025 [*Expired*]

6.6 **BECAUSE** the fact that the DSR for the State of Baksa has not been approved would be evident from the Minutes of the Meeting of the Respondent No.5 held on May 13, 2025 where Environmental Clearances have been granted to the Respondents Nos. 8, 12 and 13 even though such minutes clearly states that DSR for the District of Baksa is yet to be approved. The extract of the relevant portions from the minutes of the meeting is set out herein:

> "*It is pertinent to mention that Evaluation, Examination and Appraisal of the final DSR for the district has already been done by the SEAC with its observations for compliance and recommended in principle for further approval by the SEIAA, Assam.*"

> "*EC is approved for project area allotted 4.90Ha with a quantity of 27,000Cu M of Clay for 6 (six) months subjected to the terms and conditions laid down by SEAC and that the area in question is to be reflected in the approved final DSR.*"

6.7 **BECAUSE** This Hon'ble Tribunal in the said *OA No. 5/EZ/2025* after observing that the Respondent No.5 has issued Environmental Clearances without approval of a DSR has also called upon the Respondent Nos. 2, 4 and 5 by an order dated April 4, 2025 to file an affidavit to the short question explaining as to how the Environmental Clearance, Consent to Operate and Consent to

Establish were granted to the Project Proponent to carry on sand mining. However, despite such observations made by this Hon'ble Tribunal, the Respondent No.5 is continuing to grant Environmental Clearances for mining in the absence of a DSR.

6.8 **BECAUSE** the act and conduct of the Respondent Nos. 1 to 7 shows their blatant and brazen disregard to the various directions passed by this Hon'ble Tribunal from time to time to stop mining activities in the absence of an approved and notified DSR and of the laws of the land.

6.9 **BECAUSE** after the issuance of the Notification dated January 2016, mining leases and Environmental Clearances have continuously been granted to various persons, illegally and unlawfully, for carrying out mining activities in the District of Baksa, State of Assam without there being a DSR, however, the Applicant despite his best efforts is unable to gather information in respect of the same as the same is not available in public portal.

6.10 **BECAUSE** the persons engaged in carrying out mining activities in the absence of a DSR are clearly acting in gross violation of the provisions of the EIA, 2006 as amended by the Respondent No. 1, by and under the Notification dated January 15, 2016 along with the decisions passed by the Hon'ble Supreme Court, this Hon'ble Tribunal, as well as SSMMG, 2016 and EMGSM, 2020 and are thus, obligated to compensate for the value of the mineral extracted unlawfully, in addition to damage caused to the environment.

6.11 **BECAUSE** any Environmental Clearance granted in the absence of a District Survey Report is a null and void document and Environmental Clearance could have been issued only after issuance of a valid District Survey Report.

6.12 **BECAUSE** despite various judicial decision having been passed holding the importance of a valid DSR for grant of EC or carrying on mining activities, the Respondent Nos. 1 to 7 by their actions are time and again denuding such mandatory requirement as a mere paper formality.

6.13 **BECAUSE** despite being aware of the aforesaid legal situation, the Respondent Nos. 1 to 7 have granted mining leases and Environmental Clearances and have permitted mining activities to be carried out in the District of Baksa, State of Assam in the absence of a DSR. Such acts on behalf of the Respondent Nos.1 to 7 clearly shows that they have scant regard for the law of the land and have carried acts in dereliction of their duties.

6.14 **BECAUSE** this Hon'ble Tribunal in *OA No. 5/EZ/2025 titled as Atanu Borthakur -vs- Union of India & Ors.* after observing that the Respondent No.5 has issued Environmental Clearances without approval of a DSR called upon the Respondent Nos. 2, 4 and 5 by an order dated April 4, 2025 to file an affidavit to the short question explaining as to how the Environmental Clearance, Consent to Operate and Consent to Establish were granted to the Project Proponent to carry on sand mining.

6.15 **BECAUSE** despite such observations made by this Hon'ble Tribunal, the Respondent No.5 is continuing to grant Environmental Clearances for mining in the absence of a DSR. Such act and conduct of the Respondent Nos. 1 to 7 shows their blatant and brazen disregard to the various directions passed by this Hon'ble Tribunal from time to time to stop mining activities in the absence of an approved DSR and of the laws of the land.

6.16 **BECAUSE** after the issuance of the Notification dated January 2016, mining leases and Environmental Clearances have continuously been granted to various persons, illegally and unlawfully, for

carrying out mining activities in the District of Baksa, State of Assam without there being a DSR, however, the Applicant despite his best efforts is unable to gather information in respect of the same as the same is not available in public portal.

6.17 **BECAUSE** admittedly there is no District Survey Report for the District of Baksa, State of Assam and without there being a District Survey Report mining activities are being carried out and the Respondent No. 1 to 7 are granting mining leases and Environmental Clearances and are permitting mining activities from being carried out in gross violation of the provisions of the EIA, 2006 as amended by the Respondent No. 1, by and under the Notification dated January 15, 2016 along with the decisions passed by the Hon'ble Supreme Court, this Hon'ble Tribunal, as well as the SSMMG, 2016 and EMGSM, 2020.

6.18 **BECAUSE** the Respondent No.5 in the affidavit filed in O.A. No. 86 of 2024/EZ has expressly stated that *"That the answering deponent begs to state that, after various judicial decisions of the Hon'ble Apex Court as well as of the Hon'ble National Green Tribunal, and also from the time to time guidelines issued by the Ministry Of Environment Forest & Climate Change, it is observed that the DSR is of utmost importance and mandatory for mining of minor minerals, for each and every districts and as such the preparation of DSR has become indispensable, or else various development work of the Government would be affected which may adversely affect the revenue collection of the State. That presently mahals are auction under Assam Minor Mineral Concession Rules, 2013. That even amendment of Assam Minor Mineral Concession Rules, 2013 is underway and there also the preparation of DSR is being made mandatory"* and further stated that Final District Survey Report has not been prepared for the District of Baksa amongst other districts.

6.19 **BECAUSE** the draft District Survey Report for the district of Baksa has been uploaded at the public portal only in the month of September 2024 and thus all the mining activities carried out in the absence of a final District Survey Report is in violation of the provisions of the Environmental Impact Assessment dated September 14, 2006 ('**EIA, 2006**') as amended by the Respondent No. 1, by and under the Notification dated January 15, 2016 along with the decisions passed by the Hon'ble Supreme Court, this Hon'ble Tribunal, as well as the Sustainable Sand Mining Management Guidelines, 2016 ('**SSMMG, 2016**') and Enforcement & Monitoring Guidelines for Sand Mining, 2020 ('**EMGSM, 2020**') and the entities engaged in such illegal and unlawful mining is liable to compensate for the value of the mineral extracted unlawfully and to compensate, rehabilitate and restitute the area under Section 15 of the NGT Act, 2010 for damage done to the environment.

6.20 **BECAUSE** from a perusal of the Draft District Survey Report it will be evident that there are running and existing mining leases in favour of third parties wherein mining activities are being carried out without there being a final District Survey Report which is in violation of the mandatory requirement imposed vide notification dated January 15, 2016.

6.21 **BECAUSE** from the report of the Comptroller and Auditor General of India on Revenue Sector for the year ended March 31, 2022 it would be evident that despite DSR being mandatory, no such report has been prepared by the State of Assam till February 2023. A few relevant excerpts from the report of Comptroller and Auditor General of India are quoted herein for ready reference of this Hon'ble Tribunal:

"4.3.10.3. District Survey Report not prepared: In 2016, GoI introduced the concept of District Survey Report (DSR) by amending the Environment Impact Assessment Notification, 2006 with an

objective to ensure identification of areas of aggradations or deposition where mining can be allowed; and identification of areas of erosion and proximity to infrastructural structures and installations where mining should be prohibited and time required for replenishment after mining in that area. The DSRs are required to be prepared for each minor mineral in each district separately by the District Environment Impact Assessment Authority (DEIAA) with the assistance of Geology Department, Irrigation Department, Forest Department, Public Works Department, Ground Water Board Remote Sensing Department, Mining Department, etc. in the district. The DSR should contain the mineral potential and its location, depth of minable mineral and quantity of minerals of the district. The DSR shall be updated once in every five years and placed in the public domain. In April 2016, GoA instructed Mines and Minerals Department, Assam to initiate preparation of DSR; however, the Department had not prepared a single DSR till June 2022. Thus, due to non-preparation of DSR, the identification and quantification of reserves was limited to field verification carried out by the forest divisions without consulting other departments to adopt scientific methods. On being pointed out, the M&M Department stated (January 2023) that provision of DSR is not included in the AMMCR, 2013. The fact remains that in spite of GoA's instruction (April 2016) for preparation of DSR, the Department has not prepared any DSR till February 2023. Recommendation: The Government may ensure that the DSRs are prepared in a timebound manner."

6.11 **BECAUSE** this Hon'ble Tribunal has recently in the case of *Bibekananda v State of Odisha & Ors.* O.A. No. 125/2024/EZ vide order dated 08.08.2024 has directed that no mining activity shall be carried out under interim District Survey Report. Thus, in the light of the aforesaid, it is quite evident that no mining activity can be carried out without a final District Survey Report.

6.12 **BECAUSE** applicant upon conducting its searches was able to ascertain from the documents available at public portal that Respondent No. 8 to 13 are currently carrying out mining activities under the mining leases and Environmental Clearances granted by the Respondent Nos. 1 to 7, without there being a District Survey Report which is in gross violation of provisions of the Environmental Impact Assessment dated September 14, 2006 ('**EIA, 2006**') as amended by the Respondent No. 1, by and under the Notification dated January 15, 2016 along with the decisions passed by the Hon'ble Supreme Court, this Hon'ble Tribunal, as well as the Sustainable Sand Mining Management Guidelines, 2016 ('**SSMMG, 2016**') and Enforcement & Monitoring Guidelines for Sand Mining, 2020 ('**EMGSM, 2020**'). There are other third parties/entities as well who are/were conducting mining activities in the District of Baksa without there being a DSR, however, the applicant despite its best efforts is unable to ascertain or find out such entities.

6.13 **BECAUSE** illegal mining constitutes a flagrant violation of the public trust doctrine, which holds that natural resources are a public trust to be protected for the benefit of present and future generations. The State, as the trustee of these resources, is entrusted with the responsibility to manage them sustainably and ensure their equitable distribution. However, illegal mining exploits natural resources for private gain, disregarding the interests of the public and future generations. This not only deprives the public of their rightful access to these resources but also leads to environmental degradation and irreparable harm to ecosystems. By condoning or allowing illegal mining to persist, the Respondents are breaching their fiduciary duty under the public trust doctrine, thereby undermining the principles of environmental justice and intergenerational equity.

6.14 **BECAUSE** it has come to the knowledge of the Applicant that the Respondents are granting mining lease/mining contract/ mining permits/ mining concessionaire and Environmental Clearances and are permitting mining activities to take place in the District of Baksa, State of Assam without finalization or notification of District Survey Reports (DSRs) which is in direct contravention of established legal requirements and a grave violation of the Environment (Protection) Act, 1986.

6.15 **BECAUSE** the Respondents have failed to formulate and prepare a DSR for the District of Baksa in consonance with Notification dated January 15, 2016, the SSMMG, 2016 and EMGSM, 2020 issued by the Respondent No. 1 and various judgements and orders passed by the Hon'ble Apex Court, this Hon'ble Tribunal as well as the Hon'ble Jharkhand High Court, whereby it has been authoritatively held that DSR is a mandatory pre-requisite and thus a conditional precedent before carrying out any mining activity.

6.16 **BECAUSE** the Respondents have failed to appreciate the judgments passed by the Hon'ble Supreme Court in *State of Bihar v. Pawan Kumar*, (2022) 2 SCC 348 and by this Hon'ble Tribunal in the case of *Anjani Kumar v. State of U.P* and *Subhash Bhai Ishwar Bhai Parmar v. State of Gujarat*, 2022 SCC OnLine NGT 3854 whereby this Hon'ble Tribunal has highlighted the importance and relevance of the DSR and how it is mandatorily incumbent on the State government to start the process of granting mining lease/mining contract/ mining permits/mining concessionaire after the preparation of the DSR and in sync thereof. This Hon'ble Tribunal has also stated that the DSR is an integral and essential part, which is fundamental and a pre-requisite, and its absence would be in the conflict with Environmental laws, which all state governments under the Public trust doctrine and Article 48 of the Constitution of India are required to adhere.

6.17 **BECAUSE** it is the case of the Applicant that a final DSR is a pre-requisite for grant of mining leases and Environmental Clearances and for carrying out any mining activity.

6.18 **BECAUSE** the persons who had and have been carrying on mining activities in the District of Baksa, State of Assam after issuance of the Notification dated January 15, 2016 were aware that no mining activities can be carried without any valid DSR.

6.19 **BECAUSE** the said actions and inactions on the part of Respondents have adversely impacted the watershed of the District of Baksa. As a consequence, intensive sand, gravel and stone mining activities have resulted in alteration of river courses and contamination of water, particularly in Baksa district. It is submitted that the act of the Respondents in granting permissions without any consideration of the after effects of mining on the effects on groundwater quality, volume, watershed integrity and the disorientation of rivers in the state is bound to cause permanent ecological damage, the consequences of which shall have to be dealt with by the future generations.

7 LIMITATION

The cause of action first arose when the Applicant became aware about the Draft District Survey Report of Baksa District being uploaded in the district portal in the month of September, 2024 from which it is apparent that mining activities are being carried out without preparation of DSR. The cause of action is still continuing, as the DSR has not been prepared, till date and the Respondent Nos. 8 to 14 along with other third parties [who have been granted mining leases/mining contracts/mining permits/mining concessionaire, illegally and unlawfully] continue to excavate, extract and carry on mining activities in direct violation of the rules and notifications as issued by Respondent No. 1. Hence, it is submitted that cause of

action subsists till date and therefore the instant Original Application is being filed within the period of limitation.

8 PRAYER

In view of the aforesaid facts and circumstances, the Hon'ble tribunal may be pleased the cognizance of the issues highlighted above and pass the following directions:

a. Issue suitable order/directions directing the Respondent Nos. 1 to 7 to take action against and prohibit any mining of sand, gravel, stones and other minor minerals in the District of Baksa, State of Assam till the time final District Survey Report is finalized and notified and impose environmental compensation;

b. Issue suitable order/directions setting aside and quashing any mining leases/mining contracts/mining permits/mining concessionaire and Environmental Clearances granted to Respondent Nos. 8 to 13 in the District of Baksa, State of Assam without finalization and notification of the District Survey Report;

c. Issue suitable order/directions setting aside and quashing the mining leases/mining contracts/ mining permits/mining concessionaire and Environmental Clearances granted to unknown third parties in the District of Baksa, State of Assam which have been granted without finalization and notification of the District Survey Report;

d. Pass suitable order/directions directing the Respondent Nos. 1 to 7 to take necessary steps restraining any mining activity from being carried on till the District Survey Report for the District of Baksa is notified in accordance with law;

e. Issue suitable orders/directions directing constitution of a Court monitored committee under the supervision of the Central

Pollution Control Board, Ministry of Environment, Forest and Climate Change (MoEFCC) and Central Empowered Committee (CEC) to oversee and submit a report regarding the extent and the impact of the illegal mining being conducted in the District of Baksa, Assam; and/or

f. Direct the Respondent Nos. 8 to 14 and other unknown third parties to pay compensation for the damage done to the natural resources due to illegal mining activities being conducted without preparation of the District Survey Report in the District of Baksa, Assam;

g. Direct the Respondents to compensate, rehabilitate and restitute the area under Section 15 of the NGT Act, 2010 for damage done to the environment;

h. Grant an ex-parte ad-interim order directing the Respondent Nos. 1 to 7 to place on record the complete details of the persons/ project proponents who have illegally and unlawfully carried out mining activities or to whom mining leases and Environmental Clearances have been illegally and unlawfully granted by the Respondent Nos.1 to 7, since issuance of the Notification dated January, 2016, without approval of the DSR;

i. Grant an ex-parte ad-interim stay immediately restraining any mining activity being carried out in the District of Baksa, State of Assam till the pendency of the present application

j. Grant an ex-parte ad-interim order directing the Respondent Nos. 1 to 7 to seize the vehicles, equipment and excavators of the Respondent Nos. 8 to 13 and other unknown third parties which are being used for carrying on mining activities, without preparation of the District Survey Report in the respective Mahals in the District of Baksa, Assam;

k. Grant an order directing the Respondent Nos. 1 to 7 to seize the vehicles, equipment and excavators of the Respondent Nos. 8 to 13 and other unknown third parties which are being used for the carrying on mining activities, without preparation of the District Survey Report in the respective Mahals in the District of Baksa, Assam;

l. Direct the Respondent Nos. 1 to 7 to produce the relevant records regarding the mining leases/mining contracts/mining permits/ mining concessionaire and Environmental Clearances granted to various parties during the period when there is no District Survey Report.

m. Pass suitable order/directions directing the Respondents to produce relevant records and documents of the extent of illegal mining activity carried out in the District of Baksa without preparation of DSR.

n. Pass suitable order/directions directing the Respondent Nos. 8 to 14 and other unknown third parties who have carried out mining activity unlawfully to pay adequate compensation for the restitution of the environment.

o. Pass any other orders as this Hon'ble Tribunal may deem fit and proper in the facts and circumstances of the instant case.

ANNEXURE A-1

(Published in the Gazette of India, Extraordinary, Part-II, and Section 3, Sub-section (ii)
MINISTRY OF ENVIRONMENT AND FORESTS

New Delhi 14th September, 2006

Notification

S.O. 1533 Whereas, a draft notification **under sub-rule (3) of Rule 5 of the Environment (Protection) Rules, 1986 for imposing** certain restrictions and prohibitions on new projects or activities, or on the expansion or modernization of existing projects or activities based on their potential environmental impacts as indicated in the Schedule to the notification, being undertaken in any part of India[1], unless prior environmental clearance has been accorded in accordance with the objectives of National Environment Policy **as approved by the Union Cabinet on 18th May, 2006** and the procedure specified in the notification, by the Central Government or the State or Union territory Level Environment Impact Assessment Authority (SEIAA), to be constituted by the Central Government in consultation with the State Government or the Union territory Administration concerned under sub-section (3) of section 3 of the Environment (Protection) Act, 1986 for the purpose of this notification, was published in the Gazette of India ,Extraordinary, Part II, section 3, sub-section (ii) vide number S.O. 1324 (E) dated the 15th September ,2005 inviting objections and suggestions from all persons likely to be affected thereby within a period of sixty days from the date on which copies of Gazette containing the said notification were made available to the public;

And whereas, copies of the said notification were made available to the public on 15th September, 2005;

And whereas, all objections and suggestions received in response to the above mentioned draft notification have been duly considered by the Central Government;

Now, therefore, in exercise of the powers conferred by sub-section (1) and clause (v) of sub-section (2) of section 3 of the Environment (Protection) Act, 1986, read with clause (d) of sub-rule (3) of rule 5 of the Environment (Protection) Rules, 1986 and in supersession of the notification number S.O. 60 (E) dated the 27th January, 1994, except in respect of things done or omitted to be done before such supersession, the Central Government hereby directs that on and from the date of its publication the required construction of new projects or activities or the expansion or modernization of existing projects or activities listed in the Schedule to this notification entailing capacity addition with change in process and or technology shall be undertaken in any part of India only after the prior environmental clearance from the Central Government or as the case may be, by the State Level Environment Impact Assessment Authority, duly constituted by the Central Government under sub-section (3) of section 3 of the said Act, in accordance with the procedure specified hereinafter in this notification.

---

[1]Includes the territorial waters

2. Requirements of prior Environmental Clearance (EC):- The following projects or activities shall require prior environmental clearance from the concerned regulatory authority, which shall hereinafter referred to be as the Central Government in the Ministry of Environment and Forests for matters falling under Category 'A' in the Schedule and at State level the State Environment Impact Assessment Authority (SEIAA) for matters falling under Category 'B' in the said Schedule, before any construction work, or preparation of land by the project management except for securing the land, is started on the project or activity:

(i) All new projects or activities listed in the Schedule to this notification;

(ii) Expansion and modernization of existing projects or activities listed in the Schedule to this notification with addition of capacity beyond the limits specified for the concerned sector, that is, projects or activities which cross the threshold limits given in the Schedule, after expansion or modernization;

(iii) Any change in product - mix in an existing manufacturing unit included in Schedule beyond the specified range.

3. State Level Environment Impact Assessment Authority:- (1) A State Level Environment Impact Assessment Authority hereinafter referred to as the SEIAA shall be constituted by the Central Government under sub-section (3) of section 3 of the Environment (Protection) Act, 1986 comprising of three Members including a Chairman and a Member – Secretary to be nominated by the State Government or the Union territory Administration concerned.

(2) The Member-Secretary shall be a serving officer of the concerned State Government or Union territory administration familiar with environmental laws.

(3) The other two Members shall be either a professional or expert fulfilling the eligibility criteria given in Appendix VI to this notification.

(4) One of the specified Members in sub-paragraph (3) above who is an expert in the Environmental Impact Assessment process shall be the Chairman of the SEIAA.

(5) The State Government or Union territory Administration shall forward the names of the Members and the Chairman referred in sub- paragraph 3 to 4 above to the Central Government and the Central Government shall constitute the SEIAA as an authority for the purposes of this notification within thirty days of the date of receipt of the names.

(6) The non-official Member and the Chairman shall have a fixed term of three years (from the date of the publication of the notification by the Central Government constituting the authority).

(7) All decisions of the SEIAA shall be unanimous and taken in a meeting.

4. Categorization of projects and activities:-

(i) All projects and activities are broadly categorized in to two categories - Category A and Category B, based on the spatial extent of potential impacts and potential impacts on human health and natural and man made resources.

(ii) All projects or activities included as Category 'A' in the Schedule, including expansion and modernization of existing projects or activities and change in product mix, shall require prior environmental clearance from the Central Government in the Ministry of Environment and Forests (MoEF) on the recommendations of an Expert Appraisal Committee (EAC) to be constituted by the Central Government for the purposes of this notification;

(iii) All projects or activities included as Category 'B' in the Schedule, including expansion and modernization of existing projects or activities as specified in sub paragraph (ii) of paragraph 2, or change in product mix as specified in sub paragraph (iii) of paragraph 2, but excluding those which fulfill the General Conditions (GC) stipulated in the Schedule, *will* require prior environmental clearance from the State/Union territory Environment Impact Assessment Authority (SEIAA). The SEIAA shall base its decision on the recommendations of a State or Union territory level Expert Appraisal Committee (SEAC) as to be constituted for in this notification. In the absence of a duly constituted SEIAA or SEAC, a Category 'B' project shall be treated as a Category 'A' project;

5. Screening, Scoping and Appraisal Committees:-

The same Expert Appraisal Committees (EACs) at the Central Government and SEACs (hereinafter referred to as the (EAC) and (SEAC) at the State or the Union territory level shall screen, scope and appraise projects or activities in Category 'A' and Category 'B' respectively. EAC and SEAC's shall meet at least once every month.

(a) The composition of the EAC shall be as given in Appendix VI. The SEAC at the State or the Union territory level shall be constituted by the Central Government in consultation with the concerned State Government or the Union territory Administration with identical composition;

(b) The Central Government may, with the prior concurrence of the concerned State Governments or the Union territory Administrations, constitutes one SEAC for more than one State or Union territory for reasons of administrative convenience and cost;

(c) The EAC and SEAC shall be reconstituted after every three years;

(d) The authorised members of the EAC and SEAC, concerned, may inspect any site(s) connected with the project or activity in respect of which the prior environmental clearance is sought, for the purposes of screening or scoping or appraisal, with prior notice of at least seven days to the applicant, who shall provide necessary facilities for the inspection;

(e) The EAC and SEACs shall function on the principle of collective responsibility. The Chairperson shall endeavour to reach a consensus in each case, and if consensus cannot be reached, the view of the majority shall prevail.

6. Application for Prior Environmental Clearance (EC):-

An application seeking prior environmental clearance in all cases shall be made in the prescribed Form 1 annexed herewith and Supplementary Form 1A, if applicable, as given in Appendix II, after the identification of prospective site(s) for the project and/or activities to which the application relates, before commencing any construction activity, or preparation of land, at the site by the applicant. The applicant shall furnish, along with the application, a copy of the pre-feasibility project report except that, in case of construction projects or activities (item 8 of the Schedule) in addition to Form 1 and the Supplementary Form 1A, a copy of the conceptual plan shall be provided, instead of the pre-feasibility report.

7. Stages in the Prior Environmental Clearance (EC) Process for New Projects:-

7(i) The environmental clearance process for new projects will comprise of a maximum of four stages, all of which may not apply to particular cases as set forth below in this notification. These four stages in sequential order are:-

- Stage (1) Screening (Only for Category 'B' projects and activities)
- Stage (2) Scoping
- Stage (3) Public Consultation
- Stage (4) Appraisal

I. **Stage (1) - Screening**:

In case of Category 'B' projects or activities, this stage will entail the scrutiny of an application seeking prior environmental clearance made in Form 1 by the concerned State level Expert Appraisal Committee (SEAC) for determining whether or not the project or activity requires further environmental studies for preparation of an Environmental Impact Assessment (EIA) for its appraisal prior to the grant of environmental clearance depending up on the nature and location specificity of the project . The projects requiring an Environmental Impact Assessment report shall be termed Category 'B1' and remaining projects shall be termed Category 'B2' and will not require an Environment Impact Assessment report. For categorization of projects into B1 or B2 except item 8 (b), the Ministry of Environment and Forests shall issue appropriate guidelines from time to time.

II. **Stage (2) - Scoping**:

(i) "Scoping": refers to the process by which the Expert Appraisal Committee in the case of Category 'A' projects or activities, and State level Expert Appraisal Committee in the case of Category 'B1' projects or activities, including applications for expansion and/or modernization and/or change in product mix of existing projects or activities, determine detailed and comprehensive Terms Of Reference (TOR) addressing all relevant environmental concerns for the preparation of an Environment Impact Assessment (EIA) Report in respect of the project or activity for which prior environmental clearance is sought. The Expert Appraisal Committee or State level Expert Appraisal Committee concerned shall determine the Terms of Reference on the basis of the information furnished in the prescribed application Form1/Form 1A including Terns of Reference proposed by the applicant, a site visit by a sub- group of Expert Appraisal Committee or State level Expert Appraisal Committee concerned only if considered necessary by the Expert Appraisal Committee or State Level Expert Appraisal Committee concerned, Terms of Reference suggested by the applicant if furnished and other information that may be available with the Expert Appraisal Committee or State Level Expert Appraisal Committee concerned. All projects and activities listed as Category 'B' in Item 8 of the Schedule (Construction/Township/Commercial Complexes /Housing) shall not require Scoping and will be appraised on the basis of Form 1/ Form 1A and the conceptual plan.

(ii) The Terms of Reference (TOR) shall be conveyed to the applicant by the Expert Appraisal Committee or State Level Expert Appraisal Committee as concerned within sixty days of the receipt of Form 1. In the case of Category A Hydroelectric projects Item 1(c) (i) of the Schedule the Terms of Reference shall be conveyed along with the clearance for pre-construction activities .If the Terms of Reference are not finalized and conveyed to the applicant within sixty days of the receipt of Form 1, the Terms of Reference suggested by the applicant shall be deemed as the final Terms of Reference approved for the EIA studies**.** The approved Terms of

Reference shall be displayed on the website of the Ministry of Environment and Forests and the concerned State Level Environment Impact Assessment Authority.

(iii) Applications for prior environmental clearance may be rejected by the regulatory authority concerned on the recommendation of the EAC or SEAC concerned at this stage itself. In case of such rejection, the decision together with reasons for the same shall be communicated to the applicant in writing within sixty days of the receipt of the application.

III. **Stage (3) - Public Consultation**:

(i) "Public Consultation" refers to the process by which the concerns of local affected persons and others who have plausible stake in the environmental impacts of the project or activity are ascertained with a view to taking into account all the material concerns in the project or activity design as appropriate. All Category 'A' and Category B1 projects or activities shall undertake Public Consultation, except the following:-

(a) modernization of irrigation projects (item 1(c) (ii) of the Schedule).

(b) all projects or activities located within industrial estates or parks (item 7(c) of the Schedule) approved by the concerned authorities, and which are not disallowed in such approvals.

(c) expansion of Roads and Highways (item 7 (f) of the Schedule) which do not involve any further acquisition of land.

(d) all Building /Construction projects/Area Development projects and Townships (item 8).

(e) all Category 'B2' projects and activities.

(f) all projects or activities concerning national defence and security or involving other strategic considerations as determined by the Central Government.

(ii) The Public Consultation shall ordinarily have two components comprising of:-

(a) a public hearing at the site or in its close proximity- district wise, to be carried out in the manner prescribed in Appendix IV, for ascertaining concerns of local affected persons;

(b) obtain responses in writing from other concerned persons having a plausible stake in the environmental aspects of the project or activity.

(iii) the public hearing at, or in close proximity to, the site(s) in all cases shall be conducted by the State Pollution Control Board (SPCB) or the Union territory Pollution Control Committee (UTPCC) concerned in the specified manner and forward the proceedings to the regulatory authority concerned within 45(forty five) of a request to the effect from the applicant.

(iv) in case the State Pollution Control Board or the Union territory Pollution Control Committee concerned does not undertake and complete the public hearing within the specified period, and/or does not convey the proceedings of the public hearing within the prescribed period

directly to the regulatory authority concerned as above, the regulatory authority shall engage another public agency or authority which is not subordinate to the regulatory authority, to complete the process within a further period of forty five days,.

(v) If the public agency or authority nominated under the sub paragraph (iii) above reports to the regulatory authority concerned that owing to the local situation, it is not possible to conduct the public hearing in a manner which will enable the views of the concerned local persons to be freely expressed, it shall report the facts in detail to the concerned regulatory authority, which may, after due consideration of the report and other reliable information that it may have, decide that the public consultation in the case need not include the public hearing.

(vi) For obtaining responses in writing from other concerned persons having a plausible stake in the environmental aspects of the project or activity, the concerned regulatory authority and the State Pollution Control Board (SPCB) or the Union territory Pollution Control Committee (UTPCC) shall invite responses from such concerned persons by placing on their website the Summary EIA report prepared in the format given in Appendix IIIA by the applicant along with a copy of the application in the prescribed form , within seven days of the receipt of a written request for arranging the public hearing . Confidential information including non-disclosable or legally privileged information involving Intellectual Property Right, source specified in the application shall not be placed on the web site**.** The regulatory authority concerned may also use other appropriate media for ensuring wide publicity about the project or activity. The regulatory authority shall, however, make available on a written request from any concerned person the Draft EIA report for inspection at a notified place during normal office hours till the date of the public hearing. All the responses received as part of this public consultation process shall be forwarded to the applicant through the quickest available means.

(vii) After completion of the public consultation, the applicant shall address all the material environmental concerns expressed during this process, and make appropriate changes in the draft EIA and EMP. The final EIA report, so prepared, shall be submitted by the applicant to the concerned regulatory authority for appraisal. The applicant may alternatively submit a supplementary report to draft EIA and EMP addressing all the concerns expressed during the public consultation.

IV. Stage (4) - Appraisal:

(i) Appraisal means the detailed scrutiny by the Expert Appraisal Committee or State Level Expert Appraisal Committee of the application and other documents like the Final EIA report, outcome of the public consultations including public hearing proceedings, submitted by the applicant to the regulatory authority concerned for grant of environmental clearance. This appraisal shall be made by Expert Appraisal Committee or State Level Expert Appraisal Committee concerned in a transparent manner in a proceeding to which the applicant shall be invited for furnishing necessary clarifications in person or through an authorized representative. On conclusion of this proceeding, the Expert Appraisal Committee or State Level Expert Appraisal Committee concerned shall make categorical recommendations to the regulatory authority concerned either for grant of prior environmental clearance on stipulated terms and conditions, or rejection of the application for prior environmental clearance, together with reasons for the same.

(ii) The appraisal of all projects or activities which are not required to undergo public consultation, or submit an Environment Impact Assessment report, shall be carried out on the basis of the prescribed application Form 1 and Form 1A as applicable, any other relevant

validated information available and the site visit wherever the same is considered as necessary by the Expert Appraisal Committee or State Level Expert Appraisal Committee concerned.

(iii) The appraisal of an application be shall be completed by the Expert Appraisal Committee or State Level Expert Appraisal Committee concerned within sixty days of the receipt of the final Environment Impact Assessment report and other documents or the receipt of Form 1 and Form 1 A, where public consultation is not necessary and the recommendations of the Expert Appraisal Committee or State Level Expert Appraisal Committee shall be placed before the competent authority for a final decision within the next fifteen days .The prescribed procedure for appraisal is given in Appendix V ;

7(ii). Prior Environmental Clearance (EC) process for Expansion or Modernization or Change of product mix in existing projects:

All applications seeking prior environmental clearance for expansion with increase in the production capacity beyond the capacity for which prior environmental clearance has been granted under this notification or with increase in either lease area or production capacity in the case of mining projects or for the modernization of an existing unit with increase in the total production capacity beyond the threshold limit prescribed in the Schedule to this notification through change in process and or technology or involving a change in the product –mix shall be made in Form I and they shall be considered by the concerned Expert Appraisal Committee or State Level Expert Appraisal Committee within sixty days, who will decide on the due diligence necessary including preparation of EIA and public consultations and the application shall be appraised accordingly for grant of environmental clearance.

8.Grant or Rejection of Prior Environmental Clearance (EC):

(i) The regulatory authority shall consider the recommendations of the EAC or SEAC concerned and convey its decision to the applicant within forty five days of the receipt of the recommendations of the Expert Appraisal Committee or State Level Expert Appraisal Committee concerned or in other words within one hundred and five days of the receipt of the final Environment Impact Assessment Report, and where Environment Impact Assessment is not required, within one hundred and five days of the receipt of the complete application with requisite documents, except as provided below.

(ii) The regulatory authority shall normally accept the recommendations of the Expert Appraisal Committee or State Level Expert Appraisal Committee concerned. In cases where it disagrees with the recommendations of the Expert Appraisal Committee or State Level Expert Appraisal Committee concerned, the regulatory authority shall request reconsideration by the Expert Appraisal Committee or State Level Expert Appraisal Committee concerned within forty five days of the receipt of the recommendations of the Expert Appraisal Committee or State Level Expert Appraisal Committee concerned while stating the reasons for the disagreement. An intimation of this decision shall be simultaneously conveyed to the applicant. The Expert Appraisal Committee or State Level Expert Appraisal Committee concerned, in turn, shall consider the observations of the regulatory authority and furnish its views on the same within a further period of sixty days. The decision of the regulatory authority after considering the views of the Expert Appraisal Committee or State Level Expert Appraisal Committee concerned shall be final and conveyed to the applicant by the regulatory authority concerned within the next thirty days.

(iii) In the event that the decision of the regulatory authority is not communicated to the applicant within the period specified in sub-paragraphs (i) or (ii) above, as applicable, the

applicant may proceed as if the environment clearance sought for has been granted or denied by the regulatory authority in terms of the final recommendations of the Expert Appraisal Committee or State Level Expert Appraisal Committee concerned.

(iv) On expiry of the period specified for decision by the regulatory authority under paragraph (i) and (ii) above, as applicable, the decision of the regulatory authority, and the final recommendations of the Expert Appraisal Committee or State Level Expert Appraisal Committee concerned shall be public documents.

(v) Clearances from other regulatory bodies or authorities shall not be required prior to receipt of applications for prior environmental clearance of projects or activities, or screening, or scoping, or appraisal, or decision by the regulatory authority concerned, unless any of these is sequentially dependent on such clearance either due to a requirement of law, or for necessary technical reasons.

(vi) Deliberate concealment and/or submission of false or misleading information or data which is material to screening or scoping or appraisal or decision on the application shall make the application liable for rejection, and cancellation of prior environmental clearance granted on that basis. Rejection of an application or cancellation of a prior environmental clearance already granted, on such ground, shall be decided by the regulatory authority, after giving a personal hearing to the applicant, and following the principles of natural justice.

9. Validity of Environmental Clearance (EC):

The "Validity of Environmental Clearance" is meant the period from which a prior environmental clearance is granted by the regulatory authority, or may be presumed by the applicant to have been granted under sub paragraph (iv) of paragraph 7 above, to the start of production operations by the project or activity, or completion of all construction operations in case of construction projects (item 8 of the Schedule), to which the application for prior environmental clearance refers. The prior environmental clearance granted for a project or activity shall be valid for a period of ten years in the case of River Valley projects (item 1(c) of the Schedule), project life as estimated by Expert Appraisal Committee or State Level Expert Appraisal Committee subject to a maximum of thirty years for mining projects and five years in the case of all other projects and activities. However, in the case of Area Development projects and Townships [item 8(b)], the validity period shall be limited only to such activities as may be the responsibility of the applicant as a developer. This period of validity may be extended by the regulatory authority concerned by a maximum period of five years provided an application is made to the regulatory authority by the applicant within the validity period, together with an updated Form 1, and Supplementary Form 1A, for Construction projects or activities (item 8 of the Schedule). In this regard the regulatory authority may also consult the Expert Appraisal Committee or State Level Expert Appraisal Committee as the case may be.

10. Post Environmental Clearance Monitoring:

(i) It shall be mandatory for the project management to submit half-yearly compliance reports in respect of the stipulated prior environmental clearance terms and conditions in hard and soft copies to the regulatory authority concerned, on 1st June and 1st December of each calendar year.

(ii) All such compliance reports submitted by the project management shall be public documents. Copies of the same shall be given to any person on application to the concerned regulatory authority. The latest such compliance report shall also be displayed on the web site of the concerned regulatory authority.

11. Transferability of Environmental Clearance (EC):

A prior environmental clearance granted for a specific project or activity to an applicant may be transferred during its validity to another legal person entitled to undertake the project or activity on application by the transferor, or by the transferee with a written "no objection" by the transferor, to, and by the regulatory authority concerned, on the same terms and conditions under which the prior environmental clearance was initially granted, and for the same validity period. No reference to the Expert Appraisal Committee or State Level Expert Appraisal Committee concerned is necessary in such cases.

12. Operation of EIA Notification, 1994, till disposal of pending cases:

From the date of final publication of this notification the Environment Impact Assessment (EIA) notification number S.O.60 (E) dated 27th January, 1994 is hereby superseded, except in suppression of the things done or omitted to be done before such suppression to the extent that in case of all or some types of applications made for prior environmental clearance and pending on the date of final publication of this notification, the Central Government may relax any one or all provisions of this notification except the list of the projects or activities requiring prior environmental clearance in Schedule I , or continue operation of some or all provisions of the said notification, for a period not exceeding one year from the date of issue of this notification.

[No. J-11013/56/2004-IA-II (I)]

(R.CHANDRAMOHAN)
JOINT SECRETARY TO THE GOVERNMENT OF INDIA

SCHEDULE

(See paragraph 2 and 7)

LIST OF PROJECTS OR ACTIVITIES REQUIRING PRIOR ENVIRONMENTAL CLEARANCE

Project or Activity		**Category with threshold limit**		**Conditions if any**
		A	**B**	
1		**Mining, extraction of natural resources and power generation (for a specified production capacity)**		
(1)	(2)	(3)	(4)	(5)
1(a)	Mining of minerals	≥ 50 ha. of mining lease area Asbestos mining irrespective of mining area	<50 ha ≥ 5 ha .of mining lease area.	General Condition shall apply Note Mineral prospecting (not involving drilling) are exempted provided the concession areas have got previous clearance for physical survey
1(b)	Offshore and onshore oil and gas exploration, development & production	All projects		Note Exploration Surveys (not involving drilling) are exempted provided the concession areas have got previous clearance for physical survey
1(c)	River Valley projects	(i) ≥ 50 MW hydroelectric power generation; (ii) ≥ 10,000 ha. of culturable command area	(i) < 50 MW ≥ 25 MW hydroelectric power generation; (ii) < 10,000 ha. of culturable command area	General Condition shall apply
1(d)	Thermal Power Plants	≥ 500 MW (coal/lignite/naphta & gas based); ≥ 50 MW (Pet coke diesel and all other fuels -)	< 500 MW (coal/lignite/naptha & gas based); <50 MW ≥ 5MW (Pet coke ,diesel and all other fuels)	General Condition shall apply

(1)	(2)	(3)	(4)	(5)
1(e)	Nuclear power projects and processing of nuclear fuel	All projects	-	
2		**Primary Processing**		
2(a)	Coal washeries	≥ 1 million ton/annum throughput of coal	<1million ton/annum throughput of coal	General Condition shall apply (If located within mining area the proposal shall be appraised together with the mining proposal)
2 (b)	Mineral beneficiation	≥ 0.1million ton/annum mineral throughput	< 0.1million ton/annum mineral throughput	General Condition shall apply (Mining proposal with Mineral beneficiation shall be appraised together for grant of clearance)

3		**Materials Production**		
(1)	**(2)**	**(3)**	**(4)**	**(5)**
3(a)	Metallurgical industries (ferrous & non ferrous)	a)Primary metallurgical industry All projects		
		b) Sponge iron manufacturing ≥ 200TPD	Sponge iron manufacturing <200TPD	General Condition shall apply for Sponge iron manufacturing
		c)Secondary metallurgical processing industry	Secondary metallurgical processing industry	
		All toxic and heavy metal producing units ≥ 20,000 tonnes /annum	i.)All toxic andheavymetal producing units <20,000 tonnes /annum	
		-	ii.)All other non –toxic secondary metallurgical processing industries >5000 tonnes/annum	
3(b)	Cement plants	≥ 1.0 million tonnes/annum production capacity	<1.0 million tonnes/annum production capacity. All Stand alone grinding units	General Condition shall apply

4		**Materials Processing**		
(1)	**(2)**	**(3)**	**(4)**	**(5)**
4(a)	Petroleum refining industry	All projects	-	-
4(b)	Coke oven plants	≥2,50,000 tonnes/annum -	<2,50,000 & ≥25,000 tonnes/annum	-
4(c)	Asbestos milling and asbestos based products	All projects	-	-
4(d)	Chlor-alkali industry	≥300 TPD production capacityor a unit located out side the notified industrial area/ estate	<300 TPD production capacity and located within a notified industrial area/ estate	Specific Condition shall apply No new Mercury Cell based plants will be permitted and existing units converting to membrane cell technology are exempted from this Notification
4(e)	Soda ash Industry	All projects	-	-
4(f)	Leather/skin/hide processing industry	New projects outside the industrial area or expansion of existing units out side the industrial area	All new or expansion of projects located within a notified industrial area/ estate	Specific condition shall apply
5		**Manufacturing/Fabrication**		
5(a)	Chemical fertilizers	All projects	-	-
5(b)	Pesticides industry and pesticide specific intermediates (excluding formulations)	All units producing technical grade pesticides	-	-

(1)	(2)	(3)	(4)	(5)
5(c)	Petro-chemical complexes (industries based on processing of petroleum fractions & natural gas and/or reforming to aromatics)	All projects -	-	-
5(d)	Manmade fibres manufacturing	Rayon	Others	General Condition shall apply
5(e)	Petrochemical based processing (processes other than cracking & reformation and not covered under the complexes)	Located out side the notified industrial area/ estate -	Located in a notified industrial area/ estate	Specific Condition shall apply
5(f)	Synthetic organic chemicals industry (dyes & dye intermediates; bulk drugs and intermediates excluding drug formulations; synthetic rubbers; basic organic chemicals, other synthetic organic chemicals and chemical intermediates)	Located out side the notified industrial area/ estate	Located in a notified industrial area/ estate	Specific Condition shall apply
5(g)	Distilleries	(i)All Molasses based distilleries (ii) All Cane juice/ non-molasses based distilleries ≥30 KLD	All Cane juice/non-molasses based distilleries – <30 KLD	General Condition shall apply
5(h)	Integrated paint industry	-	All projects	General Condition shall apply

(1)	(2)	(3)	(4)	(5)
5(i)	Pulp & paper industry excluding manufacturing of paper from waste paper and manufacture of paper from ready pulp with out bleaching	Pulp manufacturing and Pulp& Paper manufacturing industry -	Paper manufacturing industry without pulp manufacturing	General Condition shall apply
5(j)	Sugar Industry	- -	≥ 5000 tcd cane crushing capacity	General Condition shall apply
5(k)	Induction/arc furnaces/cupola furnaces 5TPH or more	- -	All projects	General Condition shall apply
6		**Service Sectors**		
6(a)	Oil & gas transportation pipe line (crude and refinery/ petrochemical products)**,** passing through national parks /sanctuaries/coral reefs /ecologically sensitive areas including LNG Terminal	All projects -		-

(1)	(2)	(3)	(4)	(5)
6(b)	Isolated storage & handling of hazardous chemicals (As per threshold planning quantity indicated in column 3 of schedule 2 & 3 of MSIHC Rules 1989 amended 2000)	-	All projects	General Condition shall apply
7		**Physical Infrastructure including Environmental Services**		
7(a)	Air ports	All projects	-	-
7(b)	All ship breaking yards including ship breaking units	All projects	-	-
7(c)	Industrial estates/ parks/ complexes/ areas, export processing Zones (EPZs), Special Economic Zones (SEZs), Biotech Parks, Leather Complexes.	If at least one industry in the proposed industrial estate falls under the Category A, entire industrial area shall be treated as Category A, irrespective of the area**.** Industrial estates with area greater than 500 ha. and housing at least one Category B industry.	-Industrial estates housing at least one Category B industry and area <500 ha. Industrial estates of area> 500 ha. and not housing any industry belonging to Category A or B.	Special condition shall apply Note: Industrial Estate of area below 500 ha. and not housing any industry of category A or B does not require clearance**.**
7(d)	Common hazardous waste treatment, storage and disposal facilities (TSDFs)	All integrated facilities having incineration &landfill or incineration alone	All facilities having land fill only	General Condition shall apply

(1)	(2)	(3)	(4)	(5)
7(e)	Ports, Harbours	≥ 5 million TPA of cargo handling capacity (excluding fishing harbours)	< 5 million TPA of cargo handling capacity and/or ports/ harbours ≥10,000 TPA of fish handling capacity	General Condition shall apply
7(f)	Highways	i) New National High ways; and ii) Expansion of National High ways greater than 30 KM, involving additional right of way greater than 20m involving land acquisition and passing through more than one State.	i) New State High ways; and ii) Expansion of National / State Highways greater than 30 km involving additional right of way greater than 20m involving land acquisition.	General Condition shall apply
7(g)	Aerial ropeways		All projects	General Condition shall apply
7(h)	Common Effluent Treatment Plants (CETPs)		All projects	General Condition shall apply
7(i)	Common Municipal Solid Waste Management Facility (CMSWMF)		All projects	General Condition shall apply

(1)	(2)	~~(3)~~	(4)	(5)
8		**Building /Construction projects/Area Development projects and Townships**		
8(a)	Building and Construction projects		≥20000 sq.mtrs and <1,50,000 sq.mtrs. of built-up area#	#(built up area for covered construction; in the case of facilities open to the sky, it will be the activity area)
8(b)	Townships and Area Development projects.		Covering an area ≥ 50 ha and or built up area ≥1,50,000 sq .mtrs ++	++All projects under Item 8(b) shall be appraised as Category B1

Note:-

General Condition (GC):

Any project or activity specified in Category 'B' will be treated as Category A, if located in whole or in part within 10 km from the boundary of: (i) Protected Areas notified under the Wild Life (Protection) Act, 1972, (ii) Critically Polluted areas as notified by the Central Pollution Control Board from time to time, (iii) Notified Eco-sensitive areas, (iv) inter-State boundaries and international boundaries.

Specific Condition (SC):

If any Industrial Estate/Complex / Export processing Zones /Special Economic Zones/Biotech Parks / Leather Complex with homogeneous type of industries such as Items 4(d), 4(f), 5(e), 5(f), or those Industrial estates with pre –defined set of activities (not necessarily homogeneous, obtains prior environmental clearance, individual industries including proposed industrial housing within such estates /complexes will not be required to take prior environmental clearance, so long as the Terms and Conditions for the industrial estate/complex are complied with (Such estates/complexes must have a clearly identified management with the legal responsibility of ensuring adherence to the Terms and Conditions of prior environmental clearance, who may be held responsible for violation of the same throughout the life of the complex/estate).

APPENDIX I

(See paragraph – 6)

FORM 1

(I) Basic Information

Name of the Project:

Location / site alternatives under consideration:

Size of the Project: *

Expected cost of the project:

Contact Information:

Screening Category:

- *Capacity corresponding to sectoral activity (such as production capacity for manufacturing, mining lease area and production capacity for mineral production, area for mineral exploration, length for linear transport infrastructure, generation capacity for power generation etc.,)*

(II) Activity

1. **Construction, operation or decommissioning of the Project involving actions, which will cause physical changes in the locality (topography, land use, changes in water bodies, etc.)**

S.No.	Information/Checklist confirmation	Yes/No	Details thereof (with approximate quantities /rates, wherever possible) with source of information data
1.1	Permanent or temporary change in land use, land cover or topography including increase in intensity of land use (with respect to local land use plan)		
1.2	Clearance of existing land, vegetation and buildings?		
1.3	Creation of new land uses?		
1.4	Pre-construction investigations e.g. bore houses, soil testing?		
1.5	Construction works?		

1.6	Demolition works?		
1.7	Temporary sites used for construction works or housing of construction workers?		
1.8	Above ground buildings, structures or earthworks including linear structures, cut and fill or excavations		
1.9	Underground works including mining or tunneling?		
1.10	Reclamation works?		
1.11	Dredging?		
1.12	Offshore structures?		
1.13	Production and manufacturing processes?		
1.14	Facilities for storage of goods or materials?		
1.15	Facilities for treatment or disposal of solid waste or liquid effluents?		
1.16	Facilities for long term housing of operational workers?		
1.17	New road, rail or sea traffic during construction or operation?		
1.18	New road, rail, air waterborne or other transport infrastructure including new or altered routes and stations, ports, airports etc?		
1.19	Closure or diversion of existing transport routes or infrastructure leading to changes in traffic movements?		
1.20	New or diverted transmission lines or pipelines?		
1.21	Impoundment, damming, culverting, realignment or other changes to the hydrology of watercourses or aquifers?		
1.22	Stream crossings?		
1.23	Abstraction or transfers of water form ground or surface waters?		
1.24	Changes in water bodies or the land surface affecting drainage or run-off?		

1.25	Transport of personnel or materials for construction, operation or decommissioning?		
1.26	Long-term dismantling or decommissioning or restoration works?		
1.27	Ongoing activity during decommissioning which could have an impact on the environment?		
1.28	Influx of people to an area in either temporarily or permanently?		
1.29	Introduction of alien species?		
1.30	Loss of native species or genetic diversity?		
1.31	Any other actions?		

2. **Use of Natural resources for construction or operation of the Project (such as land, water, materials or energy, especially any resources which are non-renewable or in short supply):**

S.No.	Information/checklist confirmation	Yes/No	Details thereof (with approximate quantities /rates, wherever possible) with source of information data
2.1	Land especially undeveloped or agricultural land (ha)		
2.2	Water (expected source & competing users) unit: KLD		
2.3	Minerals (MT)		
2.4	Construction material – stone, aggregates, and / soil (expected source – MT)		
2.5	Forests and timber (source – MT)		
2.6	Energy including electricity and fuels (source, competing users) Unit: fuel (MT), energy (MW)		
2.7	Any other natural resources (use appropriate standard units)		

3. Use, storage, transport, handling or production of substances or materials, which could be harmful to human health or the environment or raise concerns about actual or perceived risks to human health.

S.No.	Information/Checklist confirmation	Yes/No	Details thereof (with approximate quantities/rates, wherever possible) with source of information data
3.1	Use of substances or materials, which are hazardous (as per MSIHC rules) to human health or the environment (flora, fauna, and water supplies)		
3.2	Changes in occurrence of disease or affect disease vectors (e.g. insect or water borne diseases)		
3.3	Affect the welfare of people e.g. by changing living conditions?		
3.4	Vulnerable groups of people who could be affected by the project e.g. hospital patients, children, the elderly etc.,		
3.5	Any other causes		

4. Production of solid wastes during construction or operation or decommissioning (MT/month)

S.No.	Information/Checklist confirmation	Yes/No	Details thereof (with approximate quantities/rates, wherever possible) with source of information data
4.1	Spoil, overburden or mine wastes		
4.2	Municipal waste (domestic and or commercial wastes)		
4.3	Hazardous wastes (as per Hazardous Waste Management Rules)		

4.4	Other industrial process wastes		
4.5	Surplus product		
4.6	Sewage sludge or other sludge from effluent treatment		
4.7	Construction or demolition wastes		
4.8	Redundant machinery or equipment		
4.9	Contaminated soils or other materials		
4.10	Agricultural wastes		
4.11	Other solid wastes		

5. Release of pollutants or any hazardous, toxic or noxious substances to air (Kg/hr)

S.No.	**Information/Checklist confirmation**	**Yes/No**	**Details thereof (with approximate quantities/rates, wherever possible) with source of information data**
5.1	Emissions from combustion of fossil fuels from stationary or mobile sources		
5.2	Emissions from production processes		
5.3	Emissions from materials handling including storage or transport		
5.4	Emissions from construction activities including plant and equipment		
5.5	Dust or odours from handling of materials including construction materials, sewage and waste		

5.6	Emissions from incineration of waste		
5.7	Emissions from burning of waste in open air (e.g. slash materials, construction debris)		
5.8	Emissions from any other sources		

6. Generation of Noise and Vibration, and Emissions of Light and Heat:

S.No.	Information/Checklist confirmation	Yes/No	Details thereof (with approximate quantities/rates, wherever possible) with source of information data with source of information data
6.1	From operation of equipment e.g. engines, ventilation plant, crushers		
6.2	From industrial or similar processes		
6.3	From construction or demolition		
6.4	From blasting or piling		
6.5	From construction or operational traffic		
6.6	From lighting or cooling systems		
6.7	From any other sources		

7. Risks of contamination of land or water from releases of pollutants into the ground or into sewers, surface waters, groundwater, coastal waters or the sea:

S.No.	Information/Checklist confirmation	Yes/No	Details thereof (with approximate quantities/rates, wherever possible) with source of information data
7.1	From handling, storage, use or spillage of hazardous materials		
7.2	From discharge of sewage or other effluents to water or the land (expected mode and place of discharge)		
7.3	By deposition of pollutants emitted to air into the land or into water		
7.4	From any other sources		
7.5	Is there a risk of long term build up of pollutants in the environment from these sources?		

8. Risk of accidents during construction or operation of the Project, which could affect human health or the environment

S.No.	Information/Checklist confirmation	Yes/No	Details thereof (with approximate quantities/rates, wherever possible) with source of information data
8.1	From explosions, spillages, fires etc from storage, handling, use or production of hazardous substances		
8.2	From any other causes		
8.3	Could the project be affected by natural disasters causing environmental damage (e.g. floods, earthquakes, landslides, cloudburst etc)?		

9. Factors which should be considered (such as consequential development) which could lead to environmental effects or the potential for cumulative impacts with other existing or planned activities in the locality

S. No.	Information/Checklist confirmation	Yes/No	Details thereof (with approximate quantities/rates, wherever possible) with source of information data
9.1	Lead to development of supporting. lities, ancillary development or development stimulated by the project which could have impact on the environment e.g.: • Supporting infrastructure (roads, power supply, waste or waste water treatment, etc.) • housing development • extractive industries • supply industries • other		
9.2	Lead to after-use of the site, which could havean impact on the environment		
9.3	Set a precedent for later developments		
9.4	Have cumulative effects due to proximity to other existing or planned projects with similar effects		

(III) Environmental Sensitivity

S.No.	Areas	Name/ Identity	Aerial distance (within 15 km.) Proposed project location boundary
1	Areas protected under international conventions, national or local legislation for their ecological, landscape, cultural or other related value		

2	Areas which are important or sensitive for ecological reasons - Wetlands, watercourses or other water bodies, coastal zone, biospheres, mountains, forests		
3	Areas used by protected, important or sensitive species of flora or fauna for breeding, nesting, foraging, resting, over wintering, migration		
4	Inland, coastal, marine or underground waters		
5	State, National boundaries		
6	Routes or facilities used by the public for access to recreation or other tourist, pilgrim areas		
7	Defence installations		
8	Densely populated or built-up area		
9	Areas occupied by sensitive man-made land uses *(hospitals, schools, places of worship, community facilities)*		
10	Areas containing important, high quality or scarce resources *(ground water resources, surface resources, forestry, agriculture, fisheries, tourism, minerals)*		
11	Areas already subjected to pollution or environmental damage. *(those where existing legal environmental standards are exceeded)*		
12	Areas susceptible to natural hazard which could cause the project to present environmental problems (*earthquakes, subsidence, landslides, erosion, flooding or extreme or adverse climatic conditions*)		

(IV). Proposed Terms of Reference for EIA studies

APPENDIX II

(See paragraph 6)

FORM-1 A (only for construction projects listed under item 8 of the Schedule)

CHECK LIST OF ENVIRONMENTAL IMPACTS

(Project proponents are required to provide full information and wherever necessary attach explanatory notes with the Form and submit along with proposed environmental management plan & monitoring programme)

1. LAND ENVIRONMENT

(Attach panoramic view of the project site and the vicinity)

1.1. Will the existing landuse get significantly altered from the project that is not consistent with the surroundings? (Proposed landuse must conform to the approved Master Plan / Development Plan of the area. Change of landuse if any and the statutory approval from the competent authority be submitted). Attach Maps of (i) site location, (ii) surrounding features of the proposed site (within 500 meters) and (iii)the site (indicating levels & contours) to appropriate scales. If not available attach only conceptual plans.

1.2. List out all the major project requirements in terms of the land area, built up area, water consumption, power requirement, connectivity, community facilities, parking needs etc.

1.3. What are the likely impacts of the proposed activity on the existing facilities adjacent to the proposed site? (Such as open spaces, community facilities, details of the existing landuse, disturbance to the local ecology).

1.4. Will there be any significant land disturbance resulting in erosion, subsidence & instability? (Details of soil type, slope analysis, vulnerability to subsidence, seismicity etc may be given).

1.5. Will the proposal involve alteration of natural drainage systems? (Give details on a contour map showing the natural drainage near the proposed project site)

1.6. What are the quantities of earthwork involved in the construction activity-cutting, filling, reclamation etc. (Give details of the quantities of earthwork involved, transport of fill materials from outside the site etc.)

1.7. Give details regarding water supply, waste handling etc during the construction period.

1.8. Will the low lying areas & wetlands get altered? (Provide details of how low lying and wetlands are getting modified from the proposed activity)

1.9. Whether construction debris & waste during construction cause health hazard? (Give quantities of various types of wastes generated during construction including the construction labour and the means of disposal)

2. WATER ENVIRONMENT

2.1. Give the total quantity of water requirement for the proposed project with the breakup of requirements for various uses. How will the water requirement met? State the sources & quantities and furnish a water balance statement.

2.2. What is the capacity (dependable flow or yield) of the proposed source of water?

2.3. What is the quality of water required, in case, the supply is not from a municipal source? (Provide physical, chemical, biological characteristics with class of water quality)

2.4. How much of the water requirement can be met from the recycling of treated wastewater? (Give the details of quantities, sources and usage)

2.5. Will there be diversion of water from other users? (Please assess the impacts of the project on other existing uses and quantities of consumption)

2.6. What is the incremental pollution load from wastewater generated from the proposed activity? (Give details of the quantities and composition of wastewater generated from the proposed activity)

2.7. Give details of the water requirements met from water harvesting? Furnish details of the facilities created.

2.8. What would be the impact of the land use changes occurring due to the proposed project on the runoff characteristics (quantitative as well as qualitative) of the area in the post construction phase on a long term basis? Would it aggravate the problems of flooding or water logging in any way?

2.9. What are the impacts of the proposal on the ground water? (Will there be tapping of ground water; give the details of ground water table, recharging capacity, and approvals obtained from competent authority, if any)

2.10. What precautions/measures are taken to prevent the run-off from construction activities polluting land & aquifers? (Give details of quantities and the measures taken to avoid the adverse impacts)

2.11. How is the storm water from within the site managed?(State the provisions made to avoid flooding of the area, details of the drainage facilities provided along with a site layout indication contour levels)

2.12. Will the deployment of construction labourers particularly in the peak period lead to unsanitary conditions around the project site (Justify with proper explanation)

2.13. What on-site facilities are provided for the collection, treatment & safe disposal of sewage? (Give details of the quantities of wastewater generation, treatment capacities with technology & facilities for recycling and disposal)

2.14. Give details of dual plumbing system if treated waste used is used for flushing of toilets or any other use.

3. VEGETATION

3.1. Is there any threat of the project to the biodiversity? (Give a description of the local ecosystem with it's unique features, if any)

3.2. Will the construction involve extensive clearing or modification of vegetation? (Provide a detailed account of the trees & vegetation affected by the project)

3.3. What are the measures proposed to be taken to minimize the likely impacts on important site features (Give details of proposal for tree plantation, landscaping, creation of water bodies etc along with a layout plan to an appropriate scale)

4. FAUNA

4.1. Is there likely to be any displacement of fauna- both terrestrial and aquatic or creation of barriers for their movement? Provide the details.

4.2. Any direct or indirect impacts on the avifauna of the area? Provide details.

4.3. Prescribe measures such as corridors, fish ladders etc to mitigate adverse impacts on fauna

5. AIR ENVIRONMENT

5.1. Will the project increase atmospheric concentration of gases & result in heat islands? (Give details of background air quality levels with predicted values based on dispersion models taking into account the increased traffic generation as a result of the proposed constructions)

5.2. What are the impacts on generation of dust, smoke, odorous fumes or other hazardous gases? Give details in relation to all the meteorological parameters.

5.3. Will the proposal create shortage of parking space for vehicles? Furnish details of the present level of transport infrastructure and measures proposed for improvement including the traffic management at the entry & exit to the project site.

5.4. Provide details of the movement patterns with internal roads, bicycle tracks, pedestrian pathways, footpaths etc., with areas under each category.

5.5. Will there be significant increase in traffic noise & vibrations? Give details of the sources and the measures proposed for mitigation of the above.

5.6. What will be the impact of DG sets & other equipment on noise levels & vibration in & ambient air quality around the project site? Provide details.

6. AESTHETICS

6.1. Will the proposed constructions in any way result in the obstruction of a view, scenic amenity or landscapes? Are these considerations taken into account by the proponents?

6.2. Will there be any adverse impacts from new constructions on the existing structures? What are the considerations taken into account?

6.3. Whether there are any local considerations of urban form & urban design influencing the design criteria? They may be explicitly spelt out.

6.4. Are there any anthropological or archaeological sites or artefacts nearby? State if any other significant features in the vicinity of the proposed site have been considered.

7. SOCIO-ECONOMIC ASPECTS

7.1. Will the proposal result in any changes to the demographic structure of local population? Provide the details.

7.2. Give details of the existing social infrastructure around the proposed project.

7.3. Will the project cause adverse effects on local communities, disturbance to sacred sites or other cultural values? What are the safeguards proposed?

8. BUILDING MATERIALS

8.1. May involve the use of building materials with high-embodied energy. Are the construction materials produced with energy efficient processes? (Give details of energy conservation measures in the selection of building materials and their energy efficiency)

8.2. Transport and handling of materials during construction may result in pollution, noise & public nuisance. What measures are taken to minimize the impacts?

8.3. Are recycled materials used in roads and structures? State the extent of savings achieved?

8.4. Give details of the methods of collection, segregation & disposal of the garbage generated during the operation phases of the project.

9. ENERGY CONSERVATION

9.1. Give details of the power requirements, source of supply, backup source etc. What is the energy consumption assumed per square foot of built-up area? How have you tried to minimize energy consumption?

9.2. What type of, and capacity of, power back-up to you plan to provide?

9.3. What are the characteristics of the glass you plan to use? Provide specifications of its characteristics related to both short wave and long wave radiation?

9.4. What passive solar architectural features are being used in the building? Illustrate the applications made in the proposed project.

9.5. Does the layout of streets & buildings maximise the potential for solar energy devices? Have you considered the use of street lighting, emergency lighting and solar hot water systems for use in the building complex? Substantiate with details.

9.6. Is shading effectively used to reduce cooling/heating loads? What principles have been used to maximize the shading of Walls on the East and the West and the Roof? How much energy saving has been effected?

9.7. Do the structures use energy-efficient space conditioning, lighting and mechanical systems? Provide technical details. Provide details of the transformers and motor efficiencies, lighting intensity and air-conditioning load assumptions? Are you using CFC and HCFC free chillers? Provide specifications.

9.8. What are the likely effects of the building activity in altering the micro-climates? Provide a self assessment on the likely impacts of the proposed construction on creation of heat island & inversion effects?

9.9. What are the thermal characteristics of the building envelope? (a) roof; (b) external walls; and (c) fenestration? Give details of the material used and the U-values or the R values of the individual components.

9.10. What precautions & safety measures are proposed against fire hazards? Furnish details of emergency plans.

9.11. If you are using glass as wall material provides details and specifications including emissivity and thermal characteristics.

9.12. What is the rate of air infiltration into the building? Provide details of how you are mitigating the effects of infiltration.

9.13. To what extent the non-conventional energy technologies are utilised in the overall energy consumption? Provide details of the renewable energy technologies used.

10. Environment Management Plan

The Environment Management Plan would consist of all mitigation measures for each item wise activity to be undertaken during the construction, operation and the entire life cycle to minimize adverse environmental impacts as a result of the activities of the project. It would also delineate the environmental monitoring plan for compliance of various environmental regulations. It will state the steps to be taken in case of emergency such as accidents at the site including fire.

APPENDIX III

(See paragraph 7

GENERIC STRUCTURE OF ENVIRONMENTAL IMPACT ASSESSENT DOCUMENT

S.NO	EIA STRUCTURE	CONTENTS
1.	Introduction	• Purpose of the report • Identification of project & project proponent • Brief description of nature, size, location of the project and its importance to the country, region • Scope of the study – details of regulatory scoping carried out (As per Terms of Reference)
2.	Project Description	• Condensed description of those aspects of the project (based on project feasibility study), likely to cause environmental effects. Details should be provided to give clear picture of the following: • Type of project • Need for the project • Location (maps showing general location, specific location, project boundary & project site layout) • Size or magnitude of operation (incl. Associated activities required by or for the project • Proposed schedule for approval and implementation • Technology and process description • Project description. Including drawings showing project layout, components of project etc. Schematic representations of the feasibility drawings which give information important for EIA purpose • Description of mitigation measures incorporated into the project to meet environmental standards, environmental operating conditions, or other EIA requirements (as required by the scope) • Assessment of New & untested technology for the risk of technological failure

3.	Description of the Environment	• Study area, period, components & methodology • Establishment of baseline for valued environmental components, as identified in the scope • Base maps of all environmental components
4.	Anticipated Environmental Impacts & Mitigation Measures	• Details of Investigated Environmental impacts due to project location, possible accidents, project design, project construction, regular operations, final decommissioning or rehabilitation of a completed project • Measures for minimizing and / or offsetting adverse impacts identified • Irreversible and Irretrievable commitments of environmental components • Assessment of significance of impacts (Criteria for determining significance, Assigning significance) • Mitigation measures
5.	Analysis of Alternatives (Technology & Site)	• In case, the scoping exercise results in need for alternatives: • Description of each alternative • Summary of adverse impacts of each alternative • Mitigation measures proposed for each alternative and • Selection of alternative
6.	Environmental Monitoring Program	• Technical aspects of monitoring the effectiveness of mitigation measures (incl. Measurement methodologies, frequency, location, data analysis, reporting schedules, emergency procedures, detailed budget & procurement schedules)
7.	Additional Studies	• Public Consultation • Risk assessment • Social Impact Assessment. R&R Action Plans
8.	Project Benefits	• Improvements in the physical infrastructure • Improvements in the social infrastructure • Employment potential –skilled; semi-skilled and unskilled • Other tangible benefits

9.	Environmental Cost Benefit Analysis	If recommended at the Scoping stage
10.	EMP	• Description of the administrative aspects of ensuring that mitigative measures are implemented and their effectiveness monitored, after approval of the EIA
11	Summary & Conclusion (This will constitute the summary of the EIA Report)	• Overall justification for implementation of the project • Explanation of how, adverse effects have been mitigated
12.	Disclosure of Consultants engaged	• The names of the Consultants engaged with their brief resume and nature of Consultancy rendered

APPENDIX III A
(See paragraph 7)

CONTENTS OF SUMMARY ENVIRONMENTAL IMPACT ASSESSMENT

The Summary EIA shall be a summary of the full EIA Report condensed to ten A-4 size pages at the maximum. It should necessarily cover in brief the following Chapters of the full EIA Report: -

1. Project Description
2. Description of the Environment
3. Anticipated Environmental impacts and mitigation measures
4. Environmental Monitoring Programme
5. Additional Studies
6. Project Benefits
7. Environment Management Plan

APPENDIX IV

(See paragraph 7)

PROCEDURE FOR CONDUCT OF PUBLIC HEARING

1.0 The Public Hearing shall be arranged in a systematic, time bound and transparent manner ensuring widest possible public participation at the project site(s) or in its close proximity District -wise, by the concerned State Pollution Control Board (SPCB) or the Union Territory Pollution Control Committee (UTPCC).

2. 0 **The Process:**

2.1 The Applicant shall make a request through a simple letter to the Member Secretary of the SPCB or Union Territory Pollution Control Committee, in whose jurisdiction the project is located, to arrange the public hearing within the prescribed statutory period. In case the project site is extending beyond a State or Union Territory, the public hearing is mandated in each State or Union Territory in which the project is sited and the Applicant shall make separate requests to each concerned SPCB or UTPCC for holding the public hearing as per this procedure.

2.2 The Applicant shall enclose with the letter of request, at least 10 hard copies and an equivalent number of soft (electronic) copies of the draft EIA Report with the generic structure given in Appendix III including the Summary Environment Impact Assessment report in English and in the local language, prepared strictly in accordance with the Terms of Reference communicated after Scoping (Stage-2). Simultaneously the applicant shall arrange to forward copies, one hard and one soft, of the above draft EIA Report along with the Summary EIA report to the Ministry of Environment and Forests and to the following authorities or offices, within whose jurisdiction the project will be located:

(a) District Magistrate/s
(b) Zila Parishad or Municipal Corporation
(c) District Industries Office
(d) Concerned Regional Office of the Ministry of Environment and Forests

2.3 On receiving the draft Environmental Impact Assessment report, the above-mentioned authorities except the MoEF, shall arrange to widely publicize it within their respective jurisdictions requesting the interested persons to send their comments to the concerned regulatory authorities. They shall also make available the draft EIA Report for inspection electronically or otherwise to the public during normal office hours till the Public Hearing is over. The Ministry of Environment and Forests shall promptly display the Summary of the draft Environmental Impact Assessment report on its website, and also make the full draft EIA available for reference at a notified place during normal office hours in the Ministry at Delhi.

2.4 The SPCB or UTPCC concerned shall also make similar arrangements for giving publicity about the project within the State/Union Territory and make available the Summary of the draft Environmental Impact Assessment report (Appendix III A) for inspection in select offices or public libraries or panchayats etc. They shall also additionally

make available a copy of the draft Environmental Impact Assessment report to the above five authorities/offices viz, Ministry of Environment and Forests, District Magistrate etc.

3.0 Notice of Public Hearing:

3.1 The Member-Secretary of the concerned SPCB or UTPCC shall finalize the date, time and exact venue for the conduct of public hearing within 7(seven) days of the date of receipt of the draft Environmental Impact Assessment report from the project proponent, and advertise the same in one major National Daily and one Regional vernacular Daily. A minimum notice period of 30(thirty) days shall be provided to the public for furnishing their responses;

3.2 The advertisement shall also inform the public about the places or offices where the public could access the draft Environmental Impact Assessment report and the Summary Environmental Impact Assessment report before the public hearing**.**

3.3 No postponement of the date, time, venue of the public hearing shall be undertaken, unless some untoward emergency situation occurs and only on the recommendation of the concerned District Magistrate the postponement shall be notified to the public through the same National and Regional vernacular dailies and also prominently displayed at all the identified offices by the concerned SPCB or Union Territory Pollution Control Committee;

3.4 In the above exceptional circumstances fresh date, time and venue for the public consultation shall be decided by the Member –Secretary of the concerned SPCB or UTPCC only in consultation with the District Magistrate and notified afresh as per procedure under 3.1 above.

4.0 The Panel

~~4.1~~ The District Magistrate or his or her representative not below the rank of an Additional District Magistrate assisted by a representative of SPCB or UTPCC**,** shall supervise and preside over the entire public hearing process.

5.0 Videography

5.1 The SPCB or UTPCC shall arrange to video film the entire proceedings. A copy of the videotape or a CD shall be enclosed with the public hearing proceedings while forwarding it to the Regulatory Authority concerned.

6.0 Proceedings

6.1 The attendance of all those who are present at the venue shall be noted and annexed with the final proceedings.

6.2 There shall be no quorum required for attendance for starting the proceedings.

6.3 A representative of the applicant shall initiate the proceedings with a presentation on the project and the Summary EIA report.

6.4 Every person present at the venue shall be granted the opportunity to seek information or clarifications on the project from the Applicant. The summary of the public

hearing proceedings accurately reflecting all the views and concerns expressed shall be recorded by the representative of the SPCB or UTPCC and read over to the audience at the end of the proceedings explaining the contents in the vernacular language and the agreed minutes shall be signed by the District Magistrate or his or her representative on the same day and forwarded to the SPCB/UTPCC concerned**.**

6.5 A Statement of the issues raised by the public and the comments of the Applicant shall also be prepared in the local language and in English and annexed to the proceedings.

6.6 The proceedings of the public hearing shall be conspicuously displayed at the office of the Panchyats within whose jurisdiction the project is located, office of the concerned Zila Parishad, District Magistrate ,and the SPCB or UTPCC . The SPCB or UTPCC shall also display the proceedings on its website for general information. Comments, if any, on the proceedings which may be sent directly to the concerned regulatory authorities and the Applicant concerned.

7.0 Time period for completion of public hearing

7.1 The public hearing shall be completed within a period of 45 (forty five) days from date of receipt of the request letter from the Applicant. Therefore the SPCB or UTPCC concerned shall sent the public hearing proceedings to the concerned regulatory authority within 8(eight) days of the completion of the public hearing .The applicant may also directly forward a copy of the approved public hearing proceedings to the regulatory authority concerned along with the final Environmental Impact Assessment report or supplementary report to the draft EIA report prepared after the public hearing and public consultations.

7.2 If the SPCB or UTPCC fails to hold the public hearing within the stipulated 45(forty five) days, the Central Government in Ministry of Environment and Forests for Category 'A' project or activity and the State Government or Union Territory Administration for Category 'B' project or activity at the request of the SEIAA, shall engage any other agency or authority to complete the process, as per procedure laid down in this notification.

APPENDIX –V
(See paragraph 7)

PROCEDURE PRESCRIBED FOR APPRAISAL

1. The applicant shall apply to the concerned regulatory authority through a simple communication enclosing the following documents where public consultations are mandatory: -

- Final Environment Impact Assessment Report [20(twenty) hard copies and 1 (one) soft copy)]
- A copy of the video tape or CD of the public hearing proceedings
- A copy of final layout plan (20 copies)
- A copy of the project feasibility report (1 copy).

2. The Final EIA Report and the other relevant documents submitted by the applicant shall be scrutinized in office within 30 days from the date of its receipt by the concerned Regulatory Authority strictly with reference to the TOR and the inadequacies noted shall be communicated electronically or otherwise in a single set to the Members of the EAC /SEAC enclosing a copy each of the Final EIA Report including the public hearing proceedings and other public responses received along with a copy of Form -1or Form 1A and scheduled date of the EAC /SEAC meeting for considering the proposal .

3. Where a public consultation is not mandatory and therefore a formal EIA study is not required, the appraisal shall be made on the basis of the prescribed application Form 1 and a pre-feasibility report in the case of all projects and activities other than Item 8 of the Schedule .In the case of Item 8 of the Schedule, considering its unique project cycle , the EAC or SEAC concerned shall appraise all Category B projects or activities on the basis of Form 1, Form 1A and the conceptual plan and stipulate the conditions for environmental clearance . As and when the applicant submits the approved scheme /building plans complying with the stipulated environmental clearance conditions with all other necessary statutory approvals, the EAC /SEAC shall recommend the grant of environmental clearance to the competent authority.

4. Every application shall be placed before the EAC /SEAC and its appraisal completed within 60 days of its receipt with requisite documents / details in the prescribed manner.

5. The applicant shall be informed at least 15 (fifteen) days prior to the scheduled date of the EAC /SEAC meeting for considering the project proposal.

6. The minutes of the EAC /SEAC meeting shall be finalised within 5 working days of the meeting and displayed on the website of the concerned regulatory authority. In case the project or activity is recommended for grant of EC, then the minutes shall clearly list out the specific environmental safeguards and conditions. In case the recommendations are for rejection, the reasons for the same shall also be explicitly stated.

.

APPENDIX VI

(See paragraph 5)

COMPOSITION OF THE SECTOR/ PROJECT SPECIFIC EXPERT APPRAISAL COMMITTEE (EAC) FOR CATEGORY A PROJECTS AND THE STATE/UT LEVEL EXPERT APPRAISAL COMMITTEES (SEACs) FOR CATEGORY B PROJECTS TO BE CONSTITUTED BY THE CENTRAL GOVERNMENT `

1. The Expert Appraisal Committees (EAC(s) and the State/UT Level Expert Appraisal Committees (SEACs) shall consist of only professionals and experts fulfilling the following eligibility criteria:

Professional: The person should have at least (i) 5 years of formal University training in the concerned discipline leading to a MA/MSc Degree, or (ii) in case of Engineering /Technology/Architecture disciplines, 4 years formal training in a professional training course together with prescribed practical training in the field leading to a B.Tech/B.E./B.Arch. Degree, or (iii) Other professional degree (e.g. Law) involving a total of 5 years of formal University training and prescribed practical training, or (iv) Prescribed apprenticeship/article ship and pass examinations conducted by the concerned professional association (e.g. Chartered Accountancy),or (v) a University degree , followed by 2 years of formal training in a University or Service Academy (e.g. MBA/IAS/IFS). In selecting the individual professionals, experience gained by them in their respective fields will be taken note of.

Expert: A professional fulfilling the above eligibility criteria with at least 15 years of relevant experience in the field, or with an advanced degree (e.g. Ph.D.) in a concerned field and at least 10 years of relevant experience.

Age: Below 70 years. However, in the event of the non-availability of /paucity of experts in a given field, the maximum age of a member of the Expert Appraisal Committee may be allowed up to 75 years

2. The Members of the EAC shall be Experts with the requisite expertise and experience in the following fields /disciplines. In the event that persons fulfilling the criteria of "Experts" are not available, Professionals in the same field with sufficient experience may be considered:

- **Environment Quality Experts**: Experts in measurement/monitoring, analysis and interpretation of data in relation to environmental quality

- **Sectoral Experts in Project Management**: Experts in Project Management or Management of Process/Operations/Facilities in the relevant sectors.

- **Environmental Impact Assessment Process Experts**: Experts in conducting and carrying out Environmental Impact Assessments (EIAs) and preparation of Environmental Management Plans (EMPs) and other Management plans and who have wide expertise and knowledge of predictive techniques and tools used in the EIA process

- **Risk Assessment Experts**

- **Life Science Experts in floral and faunal management**

- **Forestry and Wildlife Experts**

- **Environmental Economics Expert with experience in project appraisal**

3. The Membership of the EAC shall not exceed 15 (fifteen) regular Members. However the Chairperson may co-opt an expert as a Member in a relevant field for a particular meeting of the Committee.

4. The Chairperson shall be an outstanding and experienced environmental policy expert or expert in management or public administration with wide experience in the relevant development sector.

5. The Chairperson shall nominate one of the Members as the Vice Chairperson who shall preside over the EAC in the absence of the Chairman /Chairperson.

6. A representative of the Ministry of Environment and Forests shall assist the Committee as its Secretary.

7. The maximum tenure of a Member, including Chairperson, shall be for 2 (two) terms of 3 (three) years each.

8. The Chairman / Members may not be removed prior to expiry of the tenure without cause and proper enquiry.

ANNEXURE A-2

MINISTRY OF ENVIRONMENT, FOREST AND CLIMATE CHANGE

NOTIFICATION

New Delhi, the 15th January, 2016

S.O. 141(E).—Whereas in exercise of the powers conferred by sub-section (1) and clause (v) of sub-section (2) of section 3 of the Environment (Protection) Act, 1986 (29 of 1986), a draft notification for making certain amendments in the Environment Impact Assessment Notification, 2006, issued *vide* number S.O. 1533(E), dated the 14th September 2006, was published under sub-rule (3) of rule (5) of the Environment (Protection) Rules, 1986, vide number S.O. 2588(E), dated 22nd September, 2015, inviting objections and suggestions from all persons likely to be affected thereby, within a period of sixty days from the date of publication on which copies of Gazette containing the said notification were available to the public;

And whereas, copies of said notification were made available to the public on 22nd September 2015;

And whereas, all objections and suggestions received in response to the above mentioned draft notification have been duly considered by the Central Government;

And whereas, in pursuance to the order of Hon'ble Supreme Court dated the 27th February, 2012 in I.A. No.12-13 of 2011 in Special Leave Petition (C) No.19628-19629 of 2009, in the matter of Deepak Kumar etc. Vs. State of Haryana and Others etc., prior environmental clearance has now become mandatory for mining of minor minerals irrespective of the area of mining lease;

And whereas, as a result of the above said Order of Hon'ble Supreme Court, the number of cases which are now required to obtain prior environmental clearance has increased substantially;

And whereas, the Hon'ble National Green Tribunal, *vide* its order dated the 13th January, 2015 in the matter regarding sand mining has directed for making a policy on environmental clearance for mining leases in cluster for minor minerals;

And whereas, the State Governments have represented for streamlining the process of environmental clearance for mining of minor mineral;

And whereas, the Ministry of Environment, Forest and Climate Change in consultation with State Governments has prepared Guidelines on Sustainable Sand Mining detailing the provisions on environmental clearance for cluster, creation of District Environment Impact Assessment Authority and proper monitoring of sand mining using information technology and information technology enabled services to track the mined out material from source to destination;

Now, therefore, in exercise of the powers conferred by sub-section (1) and clause (v) of sub-section (2) of section 3 of the Environment (Protection) Act, 1986 read with clause (d) of sub-rule (3) of rule 5 of the Environment (Protection) Rules, 1986, the Central Government hereby makes the following amendments in the said notification, namely:-

In the said notification,-

(a) in paragraph 2, after the words "in the said Schedule", the following words shall be inserted, namely:-

"and at District level, the District Environment Impact Assessment Authority (DEIAA) for matters falling under Category 'B2' for mining of minor minerals in the said Schedule";

(b) after paragraph 3, the following paragraph shall be inserted, namely:-

"3 A. District Level Environment Impact Assessment Authority:-

(1) A District Level Environment Impact Assessment Authority hereinafter referred to as the DEIAA shall be constituted by the Central Government under sub-section (3) of section 3 of the Environment (Protection) Act, 1986 comprising of four members including a Chairperson and a Member-Secretary.

(2) The District Magistrate or District Collector shall be the Chairperson of the DEIAA.

(3) The Sub-Divisional Magistrate or Sub-Divisional Officer of the district head quarter of the concerned district of the State shall be the Member-Secretary of the DEIAA.

(4) The other two members of the DEIAA shall be the senior most Divisional Forest Officer and one expert. The expert shall be nominated by the Divisional Commissioner of the Division or Chief Conservator of Forest, as the case may be. The term and qualifications of the expert fulfilling the eligibility criteria are given in Appendix VII to this notification.

(5) The members of the DEIAA who are serving officers of the concerned State Government or the Union territory Administration shall be *ex-officio* members except the expert member.

(6) The District Level Expert Appraisal Committee hereinafter referred to as the DEAC shall comprise of eleven members, including a Chairman and a Member-Secretary.

(7) The senior most Executive Engineer, Irrigation Department in the district of respective State Governments or Union territory Administration shall be the Chairperson of the DEAC.

(8) The Assistant Director or Deputy Director of the Department of Mines and Geology or District Mines Officer or Geologist of the district shall be the Member-Secretary of the DEAC in that order.

(9) A representative of the State Pollution Control Board or Committee, senior most Sub-Divisional Officer (Forest) in the district, representative of Remote Sensing Department or Geology Department or State Ground Water Department, one occupational health expert or Medical Officer to be nominated by the District Magistrate or District Collector, Engineer from Zila Parishad, and three expert members to be nominated by the Divisional Commissioner or Chief Conservator of Forest, as the case may be, shall be the other members of the DEAC. The term and qualifications of the experts fulfilling the eligibility criteria are given in Appendix VII to this notification.

(10) The members of the DEAC who are serving officers of the concerned State Government or the Union territory Administration shall be *ex-officio* members except the expert members.

(11) The District Magistrate or District Collector shall notify an agency to act as Secretariat for the DEIAA and the DEAC and shall provide all financial and logistic support for their statutory functions.

(12) The DEIAA and DEAC shall exercise the powers and follow the procedure as specified in the said notification, as amended from time to time.

(13) The DEAC shall function on the principle of collective responsibility and the Chairman shall endeavor to reach a consensus in each case and if consensus cannot be reached, the view of the majority shall prevail. ";

(c) in paragraph 4, after sub-paragraph (iii), the following sub-paragraph shall be inserted, namely:-

"(iv) The 'B2' Category projects pertaining to mining of minor mineral of lease area less than or equal to five hectare shall require prior environmental clearance from DEIAA. The DEIAA shall base its decision on the recommendations of DEAC, as constituted for this notification." ;

(d) for paragraph 5, the following paragraph shall be substituted, namely:-

"5. Screening, Scoping and Appraisal Committees:-

The same Expert Appraisal Committees (EACs) at the Central Government, SEACs at the State or Union territory level and DEAC at the district level shall screen, scope and appraise projects or activity in category 'A', 'B1 and B2' and 'B2' projects for mining of minor minerals of lease area less than and equal to five hectare respectively. EAC, SEACs and DEACs shall meet at least once every month.

(a) The composition of the EAC shall be as given in Appendix VI. The SEAC at the State or the Union territory level shall be constituted by the Central Government in consultation with the concerned State Government or the Union

territory Administration with identical composition. DEAC at the district level shall be constituted by the Central Government as per the composition given in paragraph 3 A.

(b) The Central Government may with the prior concurrence of the concerned State Governments or the Union territory Administration constitute one SEAC for more than one State or Union territory for reasons of administrative convenience and cost.

(c) The EAC and SEAC shall be reconstituted after every three years.

(d) The authorised members of the EAC, SEACs and DEACs concerned, may inspect any site connected with the project or activity in respect of which the prior environmental clearance is sought for the purpose of screening or scoping or appraisal with prior notice of at least seven days to the project proponent who shall provide necessary facilities for the inspection.

(e) The EAC, SEACs and DEACs shall function on the principle of collective responsibility. The Chairperson shall endeavor to reach a consensus in each case and if consensus cannot be reached the view of the majority shall prevail.";

(e) for paragraph 6, the following paragraph shall be substituted, namely:-

"6. Application for Prior Environmental Clearance (EC):-

An application seeking prior environmental clearance in all cases shall be made by the project proponent in the prescribed Form 1 annexed herewith and Supplementary Form 1A, if applicable, as given in Appendix II after the identification of prospective site (s) for the project and/or activities to which the application relates; and in Form 1M for mining of minor minerals up to five hectare under Category 'B2' projects, as given in Appendix VIII, before commencing any construction activity, or preparation of land, or mining at the site by the project proponent. The project proponent shall furnish along with the application, a copy of the pre-feasibility project report, in addition to Form 1, Form 1A, and Form 1M; and in case of construction projects or activities (item 8 of the Schedule), a copy of the conceptual plan shall be provided instead of pre-feasibility report.";

(f) in paragraph 7,-

(i) in sub-paragraph (i), under the heading "I. Stage (1)- Screening:", the existing sub-paragraph shall be lettered as sub-paragraph "(A)" and after sub-paragraph as so lettered, the following sub-paragraph shall be inserted, namely:-

"(B) The cases as specified in Appendix IX shall be exempted from prior environmental clearance." ;

(ii) after sub-paragraph 7 (ii), the following sub-paragraph shall be inserted, namely:-

"7 (iii) Preparation of District Survey Report for Sand Mining or River Bed Mining and Mining of other Minor Minerals:

(a) The prescribed procedure for preparation of District Survey Report for sand mining or river bed mining and mining of other minor minerals is given in Appendix X.

(b) The prescribed procedure for environmental clearance for mining of minor minerals including cluster situation is given in Appendix XI.";

(g) in paragraph 8,-

(i) for the letters and word "EAC or SEAC", the words and letters "EAC or SEAC or DEAC" shall be substituted;

(ii) for the words "Expert Appraisal Committee or State Level Expert Appraisal Committee" wherever they occur, the words "Expert Appraisal Committee or State Level Expert Appraisal Committee or District Level Expert Appraisal Committee" shall be substituted;

(h) in paragraph 9, in sub-paragraph (i),-

for the words "Expert Appraisal Committee or State Level Expert Appraisal Committee", the words "Expert Appraisal Committee or State Level Expert Appraisal Committee or District Level Expert Appraisal Committee" shall be substituted;

(i) in paragraph 10, after sub-paragraph (iii), the following sub-paragraph shall be inserted, namely:-

"(iv) The prescribed procedure for sand mining or river bed mining and monitoring is given in Appendix XII.";

(j) in paragraph 11, -

for the words "Expert Appraisal Committee or State Level Expert Appraisal Committee", the words "Expert Appraisal Committee or State Level Expert Appraisal Committee or District Level Expert Appraisal Committee" shall be substituted;

(k) in the Schedule,-

(i) for item 1 (a) and the entries relating thereto, the following item and entries shall be substituted, namely:-

(1)	(2)	(3)	(4)	(5)
"1(a)	(i) Mining of minerals	≥50 ha of mining lease area in respect of non-coal mine lease >150 ha of mining lease area in respect of coal mine lease Asbestos mining	<50 ha of mining lease area in respect of non-coal mine lease ≤150 ha of mining lease area in respect of coal mine lease	General Conditions shall apply except: (i) for project or activity of mining of minor minerals of Category 'B2' (up to 25 ha of mining lease area); (ii) River bed mining projects on account of inter-state boundary.

		irrespective of mining area		**Note:** (1) Mineral prospecting is exempted. ''; (2) The prescribed procedure for environmental clearance for mining of minor minerals including cluster situation is given in Appendix XI."; (3) The mining leases which have obtained environmental clearance under Environment Impact Assessment Notification, 1994 and Environment Impact Assessment Notification, 2006 shall not require fresh environmental clearance during renewal provided the project has valid and subsisting environmental clearance.
	(ii) Slurry pipelines (coal lignite and other ores) passing through national parks or sanctuaries or coral reefs, ecologically sensitive areas.	All projects.		

(l) after Appendix VI, the following appendices shall be inserted, namely:-

"APPENDIX VII

(See paragraph 3 A)

Qualifications and terms for the Experts in DEIAA and DEAC

1. **Qualification:** The person should have at least (i) 5 years of formal University training in the concerned discipline leading to a MA or M Sc Degree or (ii) in case of Engineering/ Technology/ Architectural discipline, 4 years formal training course together with prescribed practical training in the field leading to a B. Tech/ B.E./ B. Arch. Degree, or (iii) Other professional degree (e.g. MBA etc.) involving a total of 5 years of formal University training and prescribed practical training, or (iv) Prescribed apprenticeship/ article ship and pass examinations conducted by the concerned professional associations (e.g. Chartered Accountancy) or (v) a University degree, followed by two years of formal training in a University or Service Academy (e.g. MBA/MPA etc.). In selecting the individual professionals, experience gained by them in their respective fields will be taken note of.
2. **Expert:** A professional fulfilling the above eligibility criteria with at least 10 years of relevant experience in the field or with an advanced degree (e.g. Ph. D) in a concerned field with at least 5 years of relevant experience.
3. **Age:** Below 70 years. However, in the event of non-availability of paucity of experts in a given field, the maximum age of a member may be allowed up to 75 years.
4. **Fields:** Experts in Mining, Geology, Hydrology, Remote Sensing, Environment Quality, Environment Impact Assessment Process, Risk Assessment, Life Sciences, Marine Sciences, Forestry and Wildlife, Environmental Economics, Bio-diversity, and River Ecology.

5. **Tenure:** The maximum tenure of expert members shall be for two terms of three years each.

6. The Expert Members may not be removed prior to expiry of the tenure without cause and proper enquiry.

APPENDIX VIII
(See paragraph 6)
FORM 1 M
APPLICATION FOR MINING OF MINOR MINERALS UNDER CATEGORY 'B2' FOR LESS THAN AND EQUAL TO FIVE HECTARE

(II) Basic Information

(viii) Name of the Mining Lease site:
(ix) Location / site (GPS Co-ordinates):
(x) Size of the Mining Lease (Hectare):
(xi) Capacity of Mining Lease (TPA):
(xii) Period of Mining Lease:
(xiii) Expected cost of the Project:
(xiv) Contact Information:

Environmental Sensitivity

Sl. No.	Areas	Distance in kilometer / Details
1.	Distance of project site from nearest rail or road bridge over the concerned River, Rivulet, Nallah etc.	
2.	Distance from infrastructural facilities Railway line National Highway State Highway Major District Road Any Other Road Electric transmission line pole or tower Canal or check dam or reservoirs or lake or ponds In-take for drinking water pump house Intake for Irrigation canal pumps	
3.	Areas protected under international conventions, national or local legislation for their ecological, landscape, cultural or other related value	
4.	Areas which are important or sensitive for ecological reasons - Wetlands, watercourses or other water bodies, coastal zone, biospheres, mountains, forests	
5.	Areas used by protected, important or sensitive species of flora or fauna for breeding, nesting, foraging, resting, over wintering, migration	
6.	Inland, coastal, marine or underground waters	
7.	State, National boundaries	
8.	Routes or facilities used by the public for access to recreation or other tourist, pilgrim areas	
9.	Defence installations	
10.	Densely populated or built-up area, distance from nearest human habitation	
11.	Areas occupied by sensitive man-made land uses (hospitals, schools, places of worship, community facilities)	
12.	Areas containing important, high quality or scarce resources (ground water resources, surface resources, forestry, agriculture, fisheries, tourism, minerals)	
13.	Areas already subjected to pollution or environmental damage. (those where existing legal environmental standards are exceeded)	
14.	Areas susceptible to natural hazard which could cause the project to present environmental problems (earthquakes, subsidence, landslides, erosion, flooding or extreme or adverse climatic conditions)	

15.	Is proposed mining site located over or near fissure / fracture for ground water recharge	
16.	Whether the proposal involves approval or clearance under the following Regulations or Acts, namely:- (a) The Forest (Conservation) Act, 1980; (b) The Wildlife (Protection) Act, 1972; (c) The Coastal Regulation Zone Notification, 2011. If yes, details of the same and their status to be given.	
17.	Forest land involved (hectares)	
18.	Whether there is any litigation pending against the project and/or land in which the project is propose to be set up? (a) Name of the Court (b) Case No. (c) Orders or directions of the Court, if any, and its relevance with the proposed project.	

(Signature of Project Proponent
Along with name and address)

APPENDIX – IX
[See paragraph 7(i) (B)]
EXEMPTION OF CERTAIN CASES FROM REQUIREMENT OF ENVIRONMENTAL CLEARANCE

The following cases shall not require prior environmental clearance, namely:-

1. Extraction of ordinary clay or sand, manually, by the Kumhars (Potter) to prepare earthen pots, lamp, toys, etc. as per their customs.
2. Extraction of ordinary clay or sand, manually, by earthen tile makers who prepare earthen tiles.
3. Removal of sand deposits on agricultural field after flood by farmers.
4. Customary extraction of sand and ordinary earth from sources situated in Gram Panchayat for personal use or community work in village.
5. Community works like de-silting of village ponds or tanks, construction of village roads, ponds, bunds undertaken in Mahatama Gandhi National Rural Employment and Guarantee Schemes, other Government sponsored schemes, and community efforts.
6. Dredging and de-silting of dams, reservoirs, weirs, barrages, river, and canals for the purpose of their maintenance, upkeep and disaster management.
7. Traditional occupational work of sand by Vanjara and Oads in Gujarat *vide* notification number GU/90(16)/ MCR-2189(68)/5-CHH, dated the 14th February, 1990 of the Government of Gujarat.
8. Digging of well for irrigation or drinking water.
9. Digging of foundation for buildings not requiring prior environmental clearance.
10. Excavation of ordinary earth or clay for plugging of any breach caused in canal, nala, drain, water body, etc., to deal with any disaster or flood like situation upon orders of District Collector or District Magistrate.
11. Activities declared by State Government under legislations or rules as non-mining activity with concurrence of the Ministry of Environment, Forest and Climate Change, Government of India.

APPENDIX - X
[See paragraph 7 (iii) (a)]
PROCEDURE FOR PREPARATION OF DISTRICT SURVEY REPORT

The main objective of the preparation of District Survey Report (as per the Sustainable Sand Mining Guideline) is to ensure the following:

Identification of areas of aggradations or deposition where mining can be allowed; and identification of areas of erosion and proximity to infrastructural structures and installations where mining should be prohibited and calculation of annual rate of replenishment and allowing time for replenishment after mining in that area.

The report shall have the following structure:

1. Introduction
2. Overview of Mining Activity in the District
3 The List of Mining Leases in the District with location, area and period of validity
4. Details of Royalty or Revenue received in last three years
5. Detail of Production of Sand or Bajari or minor mineral in last three years
6. Process of Deposition of Sediments in the rivers of the District
7. General Profile of the District
8. Land Utilization Pattern in the district: Forest, Agriculture, Horticulture, Mining etc.

9. Physiography of the District
10. Rainfall: month-wise
11. Geology and Mineral Wealth

In addition to the above, the report shall contain the following:

(a) District wise detail of river or stream and other sand source.
(b) District wise availability of sand or gravel or aggregate resources.
(c) District wise detail of existing mining leases of sand and aggregates.

A survey shall be carried out by the DEIAA with the assistance of Geology Department or Irrigation Department or Forest Department or Public Works Department or Ground Water Boards or Remote Sensing Department or Mining Department etc. in the district.

Drainage system with description of main rivers

S. No.	Name of the River	Area drained (Sq. Km)	% Area drained in the District

Salient Features of Important Rivers and Streams:

S. No.	Name of the River or Stream	Total Length in the District (in Km)	Place of origin	Altitude at Origin

Portion of the River or Stream Recommended for Mineral Concession	Length of area recommended for mineral concession (in kilometer)	Average width of area recommended for mineral concession (in meters)	Area recommended for mineral concession (in square meter)	Mineable mineral potential (in metric tonne) (60% of total mineral potential)

Mineral Potential

Boulder (MT)	Bajari (MT)	Sand (MT)	Total Mineable Mineral Potential (MT)

Annual Deposition

S. No.	River or Stream	Portion of the river or stream recommended for mineral concession	Length of area recommended for mineral concession (in kilometer)	Average width of area recommended for mineral concession (in meters)	Area recommended for mineral concession (in square meter)	Mineable mineral potential (in metric tonne) (60% of total mineral potential)
Total for the District						

A Sub-Divisional Committee comprising of Sub-Divisional Magistrate, Officers from Irrigation department, State Pollution Control Board or Committee, Forest department, Geology or mining officer shall visit each site for which environmental clearance has been applied for and make recommendation on suitability of site for mining or prohibition thereof.

Methodology adopted for calculation of Mineral Potential:

The mineral potential is calculated based on field investigation and geology of the catchment area of the river or streams. As per the site conditions and location, depth of minable mineral is defined. The area for removal of the mineral in a river or stream can be decided depending on geo-morphology and other factors, it can be 50 % to 60 % of the area of a particular river or stream. For example in some hill States mineral constituents like boulders, river born Bajri, sand up

to a depth of one meter are considered as resource mineral. Other constituents like clay and silt are excluded as waste while calculating the mineral potential of particular river or stream.

The District Survey Report shall be prepared for each minor mineral in the district separately and its draft shall be placed in the public domain by keeping its copy in Collectorate and posting it on district's website for twenty one days. The comments received shall be considered and if found fit, shall be incorporated in the final Report to be finalised within six months by the DEIAA.

The District Survey Report shall form the basis for application for environmental clearance, preparation of reports and appraisal of projects. The Report shall be updated once every five years.

APPENDIX - XI

[See paragraph 7 (iii) (b)]

PROCEDURE FOR ENVIRONMENTAL CLEARANCE FOR MINING OF MINOR MINERALS INCLUDING CLUSTER

The following policy shall be followed for environmental clearance of mining of minor minerals including cluster situation:-

(1). The data provided by the States (Sustainable Sand Mining Guidelines) shows that most of the mining leases for minor minerals are of lease area less than 5 hectare. It is also reported that in hill States getting a stretch in river with area more than 5 hectare is very uncommon. So the size of lease for minor minerals including river sand mining will be determined by the States as per their circumstances.

(2). The mining of minor minerals is mostly in clusters. The Environment Impact Assessment or Environment Management Plan are required to be prepared for the entire cluster in order to capture all the possible externalities. These reports shall capture carrying capacity of the cluster, transportation and related issues, replenishment and recharge issues, geo-hydrological study of the cluster area. The Environment Impact Assessment or Environment Management Plan shall be prepared by the State or State nominated Agency or group of project proponents in the Cluster or the project proponent in the cluster.

(3). There shall be one public consultation for entire cluster after which the final Environment Impact Assessment or Environment Management Plan report for the cluster shall be prepared.

(4). Environmental clearance shall be applied for and issued to the individual project proponent. The individual lease holders in cluster can use the same Environment Impact Assessment or Environment Management Plan for application for environmental clearance. The cluster Environment Impact Assessment or Environment Management Plan shall be updated as per need keeping in view any significant change.

(5). The details of cluster Environment Impact Assessment or Environment Management Plan shall be reflected in each environmental clearance in that cluster and DEAC, SEAC, and EAC shall ensure that the mitigative measures emanating from the Environment Impact Assessment or Environment Management Plan study are fully reflected as environmental clearance conditions in the environmental clearance's of individual project proponents in that cluster.

(6). A cluster shall be formed when the distance between the peripheries of one lease is less than 500 meters from the periphery of other lease in a homogeneous mineral area.

(7). Form 1M, Pre-Feasibility Report and mine plan for Category 'B2' projects for mining of minor minerals shall be prepared by the Registered Qualified Person or Accredited Consultants of Quality Council of India, National Accreditation Board for Education and Training. The Environment Impact Assessment or Environment Management Plan for Category 'A' and Category 'B1' projects shall be prepared by the accredited consultants of Quality Council of India, National Accreditation Board for Education and Training.

(8). The SEIAAs shall have supervisory jurisdiction over the DEIAAs and decisions of DEIAA shall be reviewed by the SEIAA without prejudice to any provisions under any existing law.

Schematic Presentation of Requirements on Environmental Clearance of Minor Minerals including cluster situation

Area of Lease (Hectare)	Category of Project	Require-ment of EIA / EMP	Require-ment of Public Hearing	Require-ment of EC	Who can prepare EIA/ EMP	Who will apply for EC	Authority to appraise/ grant EC	Authority to monitor EC compliance
EC Proposal of Sand Mining and other Minor Mineral Mining on the basis of individual mine lease								
0 – 5ha	**'B2'**	Form –1M, PFR and Approved Mine Plan	No	Yes	Project Proponent	Project Proponent	DEAC/ DEIAA	DEIAA SEIAA SPCB CPCB MoEFCC Agency

> 5 ha and < 25 ha	**'B2'**	Form –I, PFR and Approved Mine Plan and EMP	No	Yes	Project Proponent	Project Proponent	SEAC / SEIAA	nominated by MoEFCC
≥ 25ha and < 50ha	**'B1'**	Yes	Yes	Yes	Project Proponent	Project Proponent	SEAC/ SEIAA	
≥ 50 ha	**'A'**	Yes	Yes	Yes	Project Proponent	Project Proponent	EAC/ MoEFCC	
EC Proposal of Sand Mining and other Minor Mineral Mining in cluster situation								
Cluster area of mine leases up to 5 ha	**'B2'**	Form –1M, PFR and Approved Mine Plan	No	Yes	State, State Agency, Group of Project Proponents, Project Proponent	Project Proponent	DEAC/ DEIAA/	DEIAA SEIAA SPCB CPCB MoEFCC Agency nominated by MoEFCC
Cluster area of Mine leases > 5 ha and < 25 ha with no individual lease > 5 ha	**'B2'**	Form –I, PFR and Approved Mine Plan and one EMP for all leases in the Cluster	No	Yes	State, State Agency, Group of Project Proponents, Project Proponent	Project Proponent	DEAC/ DEIAA/

Cluster of any size with any of the individual lease ≥ 50ha	**'A'**	Yes	Yes	Yes	State, State Agency, Group of Project Proponents, Project Proponent	Project Proponent	EAC/ MoEFCC	

APPENDIX - XII

[See paragraph 10 (iv)]

PROCEDURE FOR MONITORING OF SAND MINING OR RIVER BED MINING

1. The security feature of Transport Permit shall be as under:

   (a) Printed on Indian Banks' Association (IBA) approved Magnetic Ink Character Recognition (MICR) Code paper.

   (b) Unique Barcode.

   (c) Unique Quick Response (QR) code.

   (d) Fugitive Ink Background.

   (e) Invisible Ink Mark.

   (f) Void Pantograph.

   (g) Watermark.

2. Requirement at Mine Lease Site:

   (a) Small Size Plot (Up to 5 hectare): Android Based Smart Phone.

(b) Large Size Plots (More than 5 hectare): CCTV camera, Personal Computer (PC), Internet Connection, Power Back up.

(c) Access control of mine lease site.

(d) Arrangement for weight or approximation of weight of mined out mineral on basis of volume of the trailer of vehicle used.

3. Scanning of Transport Permit or Receipt and Uploading on Server:

(a) Website: Scanning of receipt on mining site can be done through barcode scanner and computer using the software;

(b) Android Application: Scanning on mining site can be done using Android Application using smart phone. It will require internet availability on SIM card;

(c) SMS: Transport Permit or Receipt shall be uploaded on server even by sending SMS through mobile. Once Transport Permit or Receipt get uploaded, an unique invoice code gets generated with its validity period.

4. Proposed working of the system:

The State Mining Department should print the Transport Permit or Receipt with security features enumerated at Paragraph 1 above and issue them to the mine lease holder through the District Collector. Once these Transport Permits or Receipts are issued, they would be uploaded on the server against that mine lease area. Each receipt should be preferably with pre-fixed quantity, so the total quantity gets determined for the receipts issued.

When the Transport Permit or Receipt barcode gets scanned and invoice is generated, that particular barcode gets used and its validity time is recorded on the server. So all the details of transporting of mined out material can be captured on the server and the Transport Permit or Receipt cannot be reused.

5. Checking On Route:

The staff deployed for the purpose of checking of vehicles carrying mined mineral should be in a position to check the validity of Transport Permit or Receipt by scanning them using website, Android Application and SMS.

6. Breakdown of Vehicle:

In case the Vehicle breakdown, the validity of Transport Permit or Receipt shall be extended by sending SMS by driver in specific format to report breakdown of vehicle. The server will register this information and register the breakdown. The State can also establish a call centre, which can register breakdowns of such vehicles and extend the validity period. The subsequent restart of the vehicle also should be similarly reported to the server or call centre.

7. Tracking of Vehicles:

The route of vehicle from source to destination can be tracked through the system using check points, RFID Tags, and GPS tracking.

8. Alerts or Report Generation and Action Review:

The system will enable the authorities to develop periodic report on different parameters like daily lifting report, vehicle log or history, lifting against allocation, and total lifting. The system can be used to generate auto mails or SMS. This will enable the District Collector or District Magistrate to get all the relevant details and shall enable the authority to block the scanning facility of any site found to be indulged in irregularity. Whenever any authority intercepts any vehicle transporting illegal sand, it shall get registered on the server and shall be mandatory for the officer to fill in the report on action taken. Every intercepted vehicle shall be tracked.

The monitoring of mined out mineral, environmental clearance conditions and enforcement of Environment Management Plan will be ensured by the DEIAA, SEIAA and the State Pollution Control Board or Committee. The monitoring arrangements envisaged above shall be put in place not later than three months. The monitoring of enforcement of environmental clearance conditions shall be done by the Central Pollution Control Board, Ministry of Environment, Forest and Climate Change and the agency nominated by the Ministry for the purpose.".

ANNEXURE A-3

MINISTRY OF ENVIRONMENT, FOREST AND CLIMATE CHANGE

NOTIFICATION

New Delhi, the 20th January, 2016

S.O.190(E).—In exercise of the powers conferred by sub-section (3) of Section 3 of the Environment (Protection) Act, 1986 (29 of 1986) and in pursuance of the notification of the Government of India in the erstwhile Ministry of Environment and Forest number S.O. 1533 (E), dated the 14th September 2006 (hereinafter referred to as the said notification), the Central Government hereby constitutes the District Level Environment Impact Assessment Authority (DEIAA), for grant of environmental clearance for Category 'B2' Projects for mining of minor minerals, for all the districts in the country (hereinafter referred to as Authority for the districts) comprising of the following members, namely:—

1.	District Magistrate or District Collector of the district	—Chairperson
2.	Senior most Divisional Forest Officer in the district	—Member
3.	An expert member to be nominated by the Divisional Commissioner or Chief Conservator of the Forest	—Member
4.	Sub-Divisional Magistrate or Sub-Divisional Officer of the district head quarter	—Member-Secretary

2. The Chairperson and official members of the Authority for the districts shall hold office during their tenure in the district on said posts and the expert member shall hold office for a period of three years from the date of nomination by the competent authority.

3. The Authority for the districts shall exercise such powers and follow the procedures as specified in the said notification.

4. The Authority for the districts shall base its decision on the recommendations of the District Level Expert Appraisal Committee constituted under paragraph 5 of this notification.

5. For the purposes of assisting the Authority for the districts, the Central Government hereby constitutes the District Level Expert Appraisal Committee for all the districts of the country (hereinafter referred to as DEAC for the district) comprising of the following members, namely:-

1.	Senior most Executive Engineer, Irrigation Department	—Chairperson
2.	Senior most Sub-Divisional Officer (Forest)	—Member
3.	A representative of Remote Sensing Department or Geology Department or State Ground Water Department to be nominated by the District Magistrate or District Collector	—Member
4.	Occupational health expert or Medical Officer to be nominated by the District Magistrate or District Collector	—Member
5.	Engineer from Zila Parishad	—Member
6.	A representative of State Pollution Control Board or Committee	—Member
7.	An expert to be nominated by the Divisional Commissioner or Chief Conservator of Forest	—Member
8.	An expert to be nominated by the Divisional Commissioner or Chief Conservator of Forest	—Member
9.	An expert to be nominated by the Divisional Commissioner or Chief Conservator of Forest	—Member
10.	Senior most Assistant Engineer, Public Works Department	—Member
11.	Assistant Director or Deputy Director or District Mines Officer or Geologist in the district in that order	—Member- Secretary

6. The Chairperson and the official members of the DEAC shall hold office during their tenure in the district and the non-official members shall hold office for three years from the date of their nomination by the competent authority.

7. The DEAC shall exercise the powers and follow the procedures as specified in the said notification.

8. The DEAC shall function on the principles of collective responsibility and the Chairperson shall endeavor to reach a consensus in each case, and if consensus cannot be reached, the view of the majority shall prevail.

9. The District Magistrate or District Collector of the district shall notify an agency to act as Secretariat for the Authority for the districts and DEAC. The agency shall provide all logistic support including transportation, accommodation, and such other facilities in respect of all its statutory functions.

10. The non-official members of the Authority for districts and the DEAC shall be entitled to such sitting fees, travelling allowance and dearness allowance which shall be paid in accordance with the concerned rules of the respective State Governments.

MINISTRY OF ENVIRONMENT, FOREST AND CLIMATE CHANGE

NOTIFICATION

New Delhi, the 25th July, 2018

S.O. 3611(E).—Whereas by notification of the Government of India in the erstwhile Ministry of Environment and Forest issued *vide* number S.O. 1533(E), dated the 14th September, 2006 published in the Gazette of India, Extraordinary, Part II, Section 3, Sub-section (ii) (hereinafter referred to as the said notification) directions have been given regarding the prior environmental clearance;

And whereas, the Ministry of Environment, Forest and Climate Change has amended the said Notification *vide* S.O. 141 (E) dated 15th January, 2016 wherein the procedure for preparation of District Survey Report for minor mineral has been prescribed;

And whereas, the Hon'ble High Court of Jharkhand at Ranchi in its orders dated the 11th April, 2018 and 19th June, 2018 in W.P. (PIL) No. 1806 of 2015, in the matter of Court on its Own Motion Versus the State of Jharkhand & Others with W.P. (PIL) No. 290 of 2013, in the matter of Hemant Kumar Shilkarwar Versus the State of Jharkhand & Others, has *inter-alia* directed the preparation of District Survey Report for minor minerals other than Sand and Bajri or delegation of the powers for preparation of format of District Survey Report of minor minerals other than sand and bajri to the State Government and/or District Environment Impact Assessment Authority and District Expert Appraisal Committee;

And whereas, the Central Government hereby in the public interest dispense with the requirement of notice under clause (a) of sub-rule (3) of rule 5 of the Environment Protection Rules, 1986,

Now, therefore in exercise of the powers conferred by sub-section (1) and clause (v) of sub-section (2) of section 3 of the Environment (Protection) Act, 1986 (29 of 1986) read with sub-rule (4) of rule 5 of the Environment (Protection) Rules, 1986, the Central Government hereby makes the following further amendments to the notification of the Government of India, in the erstwhile Ministry of Environment and Forests *vide* number S.O. 1533(E), dated the 14th September, 2006, namely: –

In the said notification, for Appendix X, the following shall be substituted, namely: -

"APPENDIX - X

[See paragraph 7 (iii) (a)]

I. PROCEDURE FOR PREPARATION OF DISTRICT SURVEY REPORT FOR SAND MINING OR RIVER BED MINING

The main objective of the preparation of District Survey Report (as per the Sustainable Sand Mining Guideline) is to ensure the following: -

Identification of areas of aggradations or deposition where mining can be allowed; and identification of areas of erosion and proximity to infrastructural structures and installations where mining should be prohibited and calculation of annual rate of replenishment and allowing time for replenishment after mining in that area.

The report shall have the following structure:

(1) Introduction;

(2) overview of Mining Activity in the District;

(3) the List of Mining Leases in the District with location, area and period of validity;

(4) details of Royalty or Revenue received in last three years;

(5) detail of Production of Sand or Bajri or minor mineral in last three years;

(6) process of Deposition of Sediments in the rivers of the District;

(7) general Profile of the District;

(8) land Utilization Pattern in the district: Forest, Agriculture, Horticulture, Mining etc.;

(9) physiography of the District;

(10) rainfall: month-wise;

(11) geology and Mineral Wealth.

In addition to the above, the report shall contain the following:

(a) District wise detail of river or stream and other sand source;

(b) District wise availability of sand or gravel or aggregate resources;

(c) District wise detail of existing mining leases of sand and aggregates.

A survey shall be carried out by the District Environment Impact Assessment Authority with the assistance of Geology Department or Irrigation Department or Forest Department or Public Works Department or Ground Water Boards or Remote Sensing Department or Mining Department etc. in the district.

Total for the District						

A Sub-Divisional Committee comprising of (i) Sub-Divisional Magistrate, (ii) Officers from (a) Irrigation department, (b) State Pollution Control Board or Committee, (c) Forest department, (d) Geology or mining officer shall visit each site for which environmental clearance has been applied for and make recommendation on suitability of site for mining or prohibition thereof.

Methodology adopted for calculation of Mineral Potential:

The mineral potential is calculated based on field investigation and geology of the catchment area of the river or streams. As per the site conditions and location, depth of minable mineral is defined. The area for removal of the mineral in a river or stream can be decided depending on geo-morphology and other factors, it can be 50 % to 60 % of the area of a particular river or stream. For Example, in some hill States mineral constituents like boulders, river born Bajri, sand up to a depth of one meter are considered as resource mineral. Other constituents like clay and silt are excluded as waste while calculating the mineral potential of particular river or stream.

The District Survey Report shall be prepared in the district and its draft shall be placed in the public domain by keeping its copy in Collectorate and posting it on the district's website for twenty-one days. The comments received shall be considered and if found correct, shall be incorporated in the final Report to be finalised within six months by the District Environment Impact Assessment Authority.

The District Survey Report shall form the basis for application for environmental clearance, preparation of reports and appraisal of projects. The Report shall be updated once every five years.

II. PROCEDURE FOR PREPARATION OF DISTRICT SURVEY REPORT OF MINOR MINERALS OTHER THAN SAND MINING OR RIVER BED MINING

The District Survey Report shall be prepared for each minor mineral in the district separately and its draft shall be placed in the public domain by keeping its copy in Collectorate and posting it on district's website for twenty-one days. The comments received shall be considered and if found fit, shall be incorporated in the final Report to be finalised within six months by the DEIAA.

The District Survey Report for minor minerals other than sand mining or River bed mining shall be as per structure mentioned below: -

FORMAT FOR PREPARATION OF DISTRICT SURVEY REPORT FOR MINOR MINERALS OTHER THAN SAND MINING OR RIVER BED MINING

(1) Introduction;

(2) overview of Mining Activity in the District;

(3) general Profile of the District;

(4) geology of the District;

(5) drainage of Irrigation pattern;

(6) land Utilisation Pattern in the District: Forest, Agricultural, Horticultural, Mining etc.;

(7) surface Water and Ground Water scenario of the district;

(8) rainfall of the district and climatic condition;

(9) details of the mining leases in the District as per the following format: -

Sl. No.	Name of the Mineral	Name of the Lessee	Address & Contact No. of Lessee	Mining lease Grant Order No. & date	Area of Mining lease (ha)	Period of Mining lease (Initial)		Period of Mining lease (1st/2nd…renewal)	
						From	To	Form	To
1	**2**	**3**	**4**	**5**	**6**	**7**	**8**	**9**	**10**

Date of commencement of Mining Operation	Status (Working/Non-Working/Temp. Working for dispatch etc.)	Captive/ Non-Captive	Obtained Environmental Clearance (Yes/No), If Yes Letter No with date of grant of EC.	Location of the Mining lease (Latitude & Longitude)	Method of Mining (Opencast/Underground)
11	**12**	**13**	**14**	**15**	**16**

(10) details of Royalty or Revenue received in last three years;

(11) details of Production of Minor Mineral in last three years;

(12) mineral Map of the District;

(13) list of Letter of Intent (LOI) Holders in the District along with its validity as per the following format :-

(14) total Mineral Reserve available in the District;

Sl. No.	Name of the Mineral	Name of the Lessee	Address & Contact No. of Letter of Intent Holder	Letter of Intent Grant Order No. & date	Area of Mining lease to be allotted	Validity of LoI	Use (Captive/ Non-Captive)	Location of the Mining lease (Latitude & Longitude)
1	**2**	**3**	**4**	**5**	**6**	**7**	**8**	**9**

(15) quality /Grade of Mineral available in the District;

(16) use of Mineral;

(17) demand and Supply of the Mineral in the last three years;

(18) mining leases marked on the map of the district;

(19) details of the area of where there is a cluster of mining leases viz. number of mining leases, location (latitude and longitude);

(20) details of Eco-Sensitive Area, if any, in the District;

(21) impact on the Environment (Air, Water, Noise, Soil, Flora & Fauna, land use, agriculture, forest etc.) due to mining activity;

(22) remedial Measures to mitigate the impact of mining on the Environment;

(23) reclamation of Mined out area (best practice already implemented in the district, requirement as per rules and regulation, proposed reclamation plan);

(24) risk Assessment & Disaster Management Plan;

(25) details of the Occupational Health issues in the District. (Last five-year data of number of patients of Silicosis & Tuberculosis is also needs to be submitted);

(26) plantation and Green Belt development in respect of leases already granted in the District;

(27) any other information.

The District Environment Impact Assessment Authority (DEIAA) based on the nature and type of minor mineral in the District may include the additional parameters in the District Survey Report in consultation with the Department of Mines and Geology of the concerned State Government.

The District Survey Report shall form the basis for application for environmental clearance, preparation of reports and appraisal of projects. The Report shall be updated once every five years";

PREFACE

The need for a District Survey Report (DSR) has been mandated by the Ministry of Environment, Forest, and Climate Change (MoEF&CC) through Notification No. 125 (Extraordinary, Part II Section 3, Sub-section ii), S.O. 141 (E), dated 15th January 2016. This notification introduced amendments to the EIA Notification 2006, aimed at improving legislativecontrol. As part of these changes, district-level committees were introduced, and the preparation of DSRs became a requirement.

Subsequently, Notification No. 3611 (E), dated 25th July 2018, expanded the DSR's scope to include "Minerals Other than Sand" and provided a specific format for its preparation. The DSR's purpose is to identify areas with mineral potential where mining activities can be permitted, as well as to flag areas where mining should be restricted due to proximity to infrastructure, erosion-prone zones, or environmentally sensitive regions.

The preparation of the DSR involves both primary and secondary data collection. Primary data includes site inspections, surveys, and ground truthing, while secondary data comes from authenticated sources and satellite imagery studies. The secondary data covers information such as the district profile mineralization, and other relevant activities, often compiled from disparate sources.

DRAFT

Key Aspects of District Survey Report (DSR)

Assessment of Resources: The DSR provides a comprehensive evaluation of the mineral resources available in riverbeds within the district. It includes detailed data on the quantity, quality, and distribution of sand and other minor minerals, helping to prevent over-extraction and resource depletion through accurate estimation.

Environmental Impact Analysis: The report analyzes the environmental effects of riverbed mining, addressing changes in river morphology, hydrology, and impacts on aquatic ecosystems and biodiversity. This analysis is vital for mitigating harmful environmental impacts and conserving riverine habitats.

Regulation and Compliance: The DSR serves as a regulatory tool for riverbed mining, outlining standards and guidelines to ensure compliance with national and state environmental laws. It helps to curb illegal mining activities and promotes regulated, lawful mining operations.

Sustainable Mining Practices: The DSR advocates for sustainable mining practices that reduce environmental degradation. Recommendations may include controlled mining depths, designated extraction zones, and periodic studies to maintain the ecological balance of river systems.

Socio-Economic Considerations: The report addresses the socioeconomic implications of riverbed mining, such as employment generation and local government revenue. It also considers the negative impacts on communities, including displacement and loss of livelihoods.

Data-Driven Decision Making: The DSR provides a scientific foundation for decisions regarding riverbed mining. Incorporating geospatial data, remote sensing images, and field surveys enhances the accuracy and reliability of the report, supporting informed policy-making and resource management.

Stakeholder Involvement: The preparation of the DSR involves consultations with various stakeholders, such as government bodies, local communities, environmentalists, and industry representatives. This inclusive approach ensures diverse perspectives which are considered for promoting balanced and equitable mining practices.

DRAFT

1. Introduction of District Survey Report (DSR) of Baksa District

Introduction

The District Survey Report (DSR) of Baksa District has been prepared following the guidelines of the Ministry of Environment, Forests and Climate Change (MoEF&CC), Government of India. This report aligns with the MoEF&CC Notification S.O.-1533(E) dated 14th September 2006 and subsequent notification S.O. 141(E) dated 15th January 2016. It aims to ensure the scientific and systematic utilization of natural resources for the benefit of present and future generations. Furthermore, MoEF&CC's notification S.O. 3611(E) dated 25th July 2018 recommends the format for preparing the DSR.

The main objective of the DSR is to identify areas of aggradation where mining can be allowed, and areas of erosion where mining should be restricted. It also involves the calculation of the annual replenishment rate to maintain ecological balance. Additionally, the DSR includes assessing the development potential of in-situ minor minerals.

Objectives of the DSR:

1. Identification and quantification of minor mineral resources for optimal utilization.
2. Regulation of riverbed mining and reduction of demand- supply gaps.
3. Use of Information Technology (IT) for surveillance of riverbed mining activities.
4. Facilitation of environmental clearance for clusters of mines.
5. Restriction of illegal mining.
6. Reduction of flood occurrences in the area.
7. Preservation of aquatic habitats.
8. Protection of groundwater by limiting extraction to above base flow levels.
9. Maintenance of data records related to mineral resources, leases, and revenue generation.
10. Creation of a scientific mining plan, including ultimate pit/trench limit estimation.
11. Development of comprehensive guidelines for mining minor minerals.

The DSR includes secondary data on the district's geology, climate, mineral resources, and other relevant factors, compiled from published and unpublished reports, as well as government websites.

DRAFT

Statutory Framework

The MoEF&CC has issued several notifications and guidelines over the years to regulate mining and formulate DSRs for each district. Below is a summary of the legal framework:

Year	Particulars
1994	The MoEF&CC issued the Environmental Impact Assessment (EIA) Notification for major minerals covering areas over 5 hectares.
2006	EIA Notification SO 1533 (E) made it mandatory to obtain environmental clearance (EC) for minor minerals exceeding 5 hectares.
2012	The Hon'ble Supreme Court mandated EC for minor minerals, even for areas under 5 hectares.
2016	"Sustainable Sand Mining Guidelines (SSMG)" introduced, requiring EC for all minor minerals and district-level monitoring.
2018	MoEF&CC issued notification S.O. 3611(E) with a recommended DSR format for identifying aggradation areas, replenishment rates, and protected zones.
2020	The "Enforcement and Monitoring Guidelines for Sand Mining (EMGSM)" introduced for improved regulatory enforcement and technological monitoring of sand mining activities.

Enforcement & Monitoring Guidelines, 2020

These guidelines address illegal mining, directing states to implement monitoring mechanisms like river audits, aerial surveys, and drone-based surveillance.

DRAFT

Utilization and Demand of the minerals

Riverbed minerals like sand, gravel, stone etc. plays an essential role in construction and is widely used in concrete production, glass manufacturing, road base formation, and many more. Riverbed mining is a prevalent practice in Baksa District, mainly for construction. The rise in real estate and government infrastructure projects has significantly increased the demand for sand and bricks. The minor minerals of Baksa district come under B-category mining .

Uses of minerals:

1. **Construction**: Sand, gravel, silt, clay and ordinary earth are key ingredients in concrete, mortar and asphalt.
2. **Industrial**: Used in glass production and abrasives.
3. **Environmental**: The minerals can improve traffic safety by providing grip on icy roads, and it helps in soil conditioning for agriculture.
4. **Decorative**: Sand, gravel and stones are used in candles, aquariums, and for enhancing aesthetic appeal in landscaping.
5. **Flood Protection**: Proper management of sand mining helps maintain river flood discharge capacity, reducing the risk of floods.

This DSR aims to provide a well-rounded, data-driven approach for sustainable mineral resource management, ensuring compliance with environmental guidelines and promoting socio-economic benefits for the district.

DRAFT

Methodology of DSR Preparation

The District Survey Report (DSR) preparation follows a systematic methodology to ensure accuracy and comprehensiveness. The steps involved in the preparation of the DSR are illustrated in Figure and are described in detail in the following sections.

a. Data Source Identification

The DSR is based on both primary and secondary data collected from reliable and authoritative sources. Identifying authentic data sources is critical for compiling accurate data. The primary data sources for the DSR are collected through field surveys and replenishment studies. Secondary data sources include publicly available information from government publications, reports, and reputable journals.

- **District Profile**: Information related to the district's demographics and basic statistics is sourced from the **District Census Report, 2011** and the **District Statistical Handbook** published by the Government of Assam.
- **Mineral Resources**: The potential mineral resources of the district are described based on reports published by the **Geological Survey of India (GSI)** or other government agencies
- **Mining Data**: Information on mining leases, lease holders, lease areas, resource allocations, and revenue generation is collected from the **Forest Department.**
- **Satellite Images**: Satellite imagery is utilized to prepare maps related to the district's physiography and land use (LU)/land cover(LC).

b. Data Analysis and Map Preparation

After collecting data, a detailed analysis is conducted to extract relevant insights. This involves analyzing geo-spatial data and preparing maps that depict:

- Geomorphology of the district
- Topography
- Land use patterns
- Mineral resource distribution

These maps help to visualize the key characteristics of the district and identify potential mining areas.

DRAFT

c. Primary Data Collection

Primary data is essential for preparing a comprehensive DSR. Fieldwork is conducted across the district to assess mineral resources. This field study provides a detailed understanding of the mineral composition and their distribution in the area.

d. Replenishment Study

A key aspect of sustainable mining is ensuring that the amount of sediment removed from riverbeds is replenished naturally. Therefore, replenishment studies are conducted to assess the annual rate of replenishment of riverbed sand. This helps avoid the adverse impacts of excessive sand extraction.

- Physical surveys of the riverbed are carried out using **GPS/DGPS** to define the topography, contours, and offsets.
- The surveys provide a detailed depiction of important features in and around the river, including nearby civil structures and other key landmarks.
- This information helps to define the spatial area eligible for sand mining and estimate the sand reserves.

e. Report Preparation

The DSR covers various aspects of the district, including:

- **General Profile**: Overview of the district, including demographics, land use patterns, and economic activities.
- **Geomorphology and Geology**: An assessment of the district's physical landscape, including its geological structure.
- **Mineral Resources**: A detailed account of riverbed sands and other minor minerals in the district, including their distribution and potential for extraction.
- **Mining Block Delineation**: Identification of potential mining blocks and mineral reserves within the district.
- **Production Trends**: An analysis of recent trends to cater light in the production of minor minerals and the revenues generated from the mining sectors.
- **Replenishment Estimation**: The annual replenishment rate of riverbed sand, based on field surveys.

DRAFT

- **Environmental Impact and Mitigation**: An evaluation of the potential environmental impacts of mining activities, along with proposed mitigation measures.
- **Risk Assessment and Disaster Management**: A strategy for managing risks associated with mining and minimizing the impact of any jaw dropping disasters.
- **Reclamation Strategy**: A plan for the reclamation of already mined-out areas to restore the ecological balance.

This structured approach ensures that the DSR not only identifies mineral resources but also emphasizes sustainable mining practices and environmental preservation.

DRAFT

2. Overview of mining activity in the district

In the Baksa district collection of sand, gravel, stone, clay/silt etc. from riverbed is considered as one of the main minor mineral sources of the district. These materials are primarily used for civil construction purposes.

DRAFT

3. List of existing mining leases of the districts

Sl. No.	Name of Mining lease	Name of the lessee	Location and area of mining lease	Period of lease	Status (working/ closed)
1	Chandrapur Sand, Gravel & Stone Mahal	Sri Janata Brahma	4.90 Ha		Existing

6. Process of Deposition of Sediments in the rivers of the District of Baksa

The sediment of a river is commonly considered to be aesthetically displeasing and environmentally degrading. Conversely, part of the sediment (sand and gravel) may represent a natural resource for use by society. The potential usefulness of the sediment is enhanced when it is composed of particle sizes found in deposits on the riverbed that would be replenished by newly transported sediment after mining. As such, river deposits become renewable resources, periodically replaced by sediment transport in the river aftermath of rainy season.

Sediment transport is the movement of organic and inorganic particles by water. In general, the greater the flow, the higher will be the rate of sedimentation. Water flow can be strong enough to suspend particles in the water column as they move downstream, or simply push them along the bottom of a water way. Transported sediment may include mineral matter, chemical sand pollutants, and organic material. Another name for sediment transport is sediment load. The total load includes all particles moving as bed load, suspended load, and wash load. Sediment deposition is the process of settling down of suspended particles to the bottom of a body of water. This settling often occurs when water flow slows down or stops, and heavy particles can no longer be supported by the bed turbulence. Sediment deposition can be found anywhere in a water system, from high mountain streams to rivers, lakes, delta and floodplains.

Sediment transport is critical to grip how rivers work because it is the set of processes that mediates between the flowing water and the channel boundary. Erosion involves removal and transport of sediment (mainly from the boundary) and deposition involves the transport and placement of sediment on the boundary. Erosion and deposition are what form the channel of any alluvial river as well as the flood plain through which it moves. The amount and size of sediment moving through a river channel are determined by three fundamental controls: competence, capacity and sediment supply. Competence refers to the largest size (diameter) of sediment particle or grain that the flow is capable of moving; it is a hydraulic limitation. If a river is sluggish and moving very slowly it simply may not have the power to mobilize and transport sediment of a given size even though such sediment is available to transport. So a river may be competent or incompetent with respect to a given grain size. If it is incompetent it will not transport sediment of the given size.

If it is competent it may transport sediment of that size if such sediment is available (that is, the river is not supply-limited). Capacity refers to the maximum amount of sediment

of a given size that a stream can transport in traction as bed load. Given a supply of sediment, capacity depends on channel gradient, discharge and the caliber of the load (the Presence of fines may increase fluid density and increase capacity; the presence of large particles may obstruct the flow and reduce capacity). Capacity transport only occurs when sediment supply is abundant (non- limiting).

Sediment supply refers to the amount and size of sediment available for sediment transport. Capacity transport for a given grain size is only achieved if the supply of that caliber of sediment is not limiting (that is, the maximum amount of sediment in stream is capable of transporting is actually available). Because of these two different potential constraints (hydraulic sand sediment supply) distinction is often made between supply-limited and capacity-limited transport.

Much of the material supplied to a stream is so fine (silt and clay) that provided it can be carried in suspension, almost any flow will transport it. Although there must be an upper limit to the capacity of the stream to transport such fines, it is probably never reached in natural channels and the amount moved is limited in supply. In contrast, transport of coarser material (say, coarser than fine sand) is largely capacity limited.

Modes of Sediment Transport: The sediment load of a river is transported in various ways although these distinctions are to some extent arbitrary and not always very practical in the sense that not all of the components can be separated in practice.

The modes are: 1. Dissolved Load.
2. Suspended Load.
3. Intermittent Suspension (Siltation) Load
4. Wash Load
5. Bed Load

DRAFT

7. General Profile of the district

a) General Information :

The original word 'Baksa' is not above controversy, a good chunk of population prefer to use 'Bagsa' in lieu of 'Baksa'. The popular assumption that 'Baksa' is the misspelt form of 'Bangsa'- a 'Dzonkha' word meaning a farm house and a corridor as it is known that Bhutanese king and subjects used this area for trade and passage to the plains. 'Bangsa' (Bagsa or Baksa) was in fact one of the most important 'Dooars' of Bhutan. Another source says that the name "Bagsa" is originated from Bhutanese language. According to Bhutanese origin they denoted the area as "Bagsa Duar". "Bagsa" means one kind of rice and "Duar" means entrance point. As Bhutanese king ruled these areas for a long time in an around first half of the nineteenth, so it might be possible that the name "Bagsa" or "Baksa" had a Bhutanese origin. According to Bodo source the name originated from a kind of rice grain which is known as "Bagsa". The said rice grain is one kind of broken and uncleaned product which is gained after milling the rice. As the name Baksa is itself derived from various sources and antecedents so there exists lots of controversy over the name. But still today no concrete evidence has been found which might determine the final source. Only popular sources and folklores are evident but no historical source has been found. Now the name Baksa is officially taken and used.

As a result of the historic BTC (Bodoland Territorial Council) accord signed on February 10th, 2003, BTAD (Bodoland Territorial Autonomous District) was formed with four districts namely Baksa, Chirang, Kokrajhar and Baksa. Baksa district was carved out of Nalbari, Barpeta, Kamrup and a small portion of Darrang district.

Baksa district is located in the north- western part of Assam with the district headquarter at Mushalpur, which is 105 Km away from state capital Dispur, Guwahati and 20 Km away from National Highway no.31 towards north. The main mode of connectivity with the district is by Road. The district headquarter is linked to the National Highway 31 mainly at two junction points namely Barama and Kadamtola. It shares its border with Tamulpur district in the east, Barpeta, Nalbari and Kamrup districts in the south and Chirang district in the west. The district also shares the privilege of having International Boundary with Bhutan in the North. The gentle and gradual slopes can be seen stretching from the foot hills of Bhutan and reaching out to the southern tips of Barpeta, Nalbari and Kamrup district.

Baksa was notified as one of the districts of Bodoland Territorial Council in October 2003 while it started functioning from 1 June 2004 when naturalist-bureaucrat Dr Anwaruddin Choudhury of the Assam Civil Service took charge as its founding Deputy Commissioner.

Administrative Setup :

Deputy Commissioner of the District is the overall in charge of the administration of the entire district. He also acts as the Collector in case of Revenue matters, as a District Magistrate in case of maintenance of Law and Order and General Administration, as a District Election Officer in case of conduct of Election, as a Principal Census Officer while conducting Census, and so on. A number of Officers, like Additional Deputy Commissioners, Subdivisional Officers, Extra Assistant Commissioners and others assist the Deputy Commissioner is looking after the administration of the district. At lower level each sub-division is headed by one Sub-Divisional Officer whereas under him there will be Revenue Circle Officers for each revenue circles who are responsible for the entire administration of the area under their respective revenue circle. For the administrative purposes, theentire district is divided into two sub-divisions : Mushalpur, Salbari. These sub- divisions comprising of 384 villages are further divided into 4 revenue circles. Important point to be noted is that Baksa is the only district in Assam where there is no notified town. Baksa district covers an area of 2400 Sq.Km.

GENERAL INFORMATION ABOUT BAKSA DISTRICT :	
1. Geographical area	2400 Sq. Km (Approx)
2. Population	**9.53773** Lakhs (as per 2011 census)
3. Sub-Divisions	1. Mushalpur (Sadar)
	2. Salbari(Civil)
4. Revenue Circles	1. Baska (Sadar)
	2. Barama
	3. Baganpara
	4. Jalah
5. Development Blocks	1. Baska Dev. Block
	2. Tihu-Barama Dev. Block
	3. Gobardhana Dev. Block
	4. Jalah Dev. Block
	5. Dhamdhama Dev. Block
6. Education Blocks (Ele.)	1. Baska
	2. Jalah
	3. Tihu- Barama
	4. Gobardhana
7. Health Blocks	1. Mushalpur BPHC
	2. Barama BPHC

14. No. of LAC(major part)	1. 62- Barama LAC
	2. 63- Chapaguri LAC

ACCESS TO THE DISTRICT:

By Road Connectivity:

There are number of bus services and small car services (Winger, Cruiser etc.) from Adabari and Basistha Chariali, Guwahati via NH31 touching two connection points to district head quarter (one at Barama, another at Kadamtola). Distance between Guwahati and Barama via NH31 is about 75 Km and Guwahati and Kadamtola via NH31 is about 80 Km.

i) From Adabari Bus Terminal, Guwahati there is direct bus service to Mushalpur (HQ). Distance is about 100 Km.
ii)From Adabari Bus Terminal, Guwahati there is direct bus service to Salbari Sub-Div HQ. Distance is about 160 Km.

By Railway Connectivity:

The district does not have any railway station. However the nearest railway station is Tihu which falls under Nalbari district (Distance 35 Km from District HQ). The distance of Nalbari railway station from district HQ is about 45 Km and Distance of Pathsala railway station (Barpeta district) is about 50 Km.

The distance of Guwahati railway station to district HQ by road (via NH 31) is about 105 Km.

By Air Connectivity:
The nearest airport is Lokpriya Gopinath Bordoloi International Airport at Borjhar, Kamrup (M) which is about 130 Km from the District HQ.

Places of Tourist Interest:

Baksa district has massive potential for development of tourism. The world famous Manas National Park falls under Baksa district. The main places of tourist interest in the district are as follows:-

1) Manas National Park
2) Manas Soushi Khongkhor
3) Moina Pukhuri
4) Daragaon Picnic Spot

1) <u>Manas National Park & Tiger Project</u>: Located at the western part of the district in the foothills of Bhutan, it is a place of great tourist attraction-both national as well as international. There are about 60 species of mammals, 312 birds, 42 reptiles, 7 amphibian, 54 fishes and more than 100 species of insects. The most abundantly found animals are Tiger, Leopard, Golden Langur, Pigmie Hog, DhaneshPakhi, Wild Buffalo, Bison, Python, Wild Cat, Elephant, Hyena, Fox etc. The river Manas flows through the National Park. River rafting facility is newly introduced for the tourists. Both govt. and private lodging and food facility is available.

Nearest Railway station: Barpeta Road

Connection through motorway: Barpeta Road - Bansbari forest range (Distance about 15 Kms)

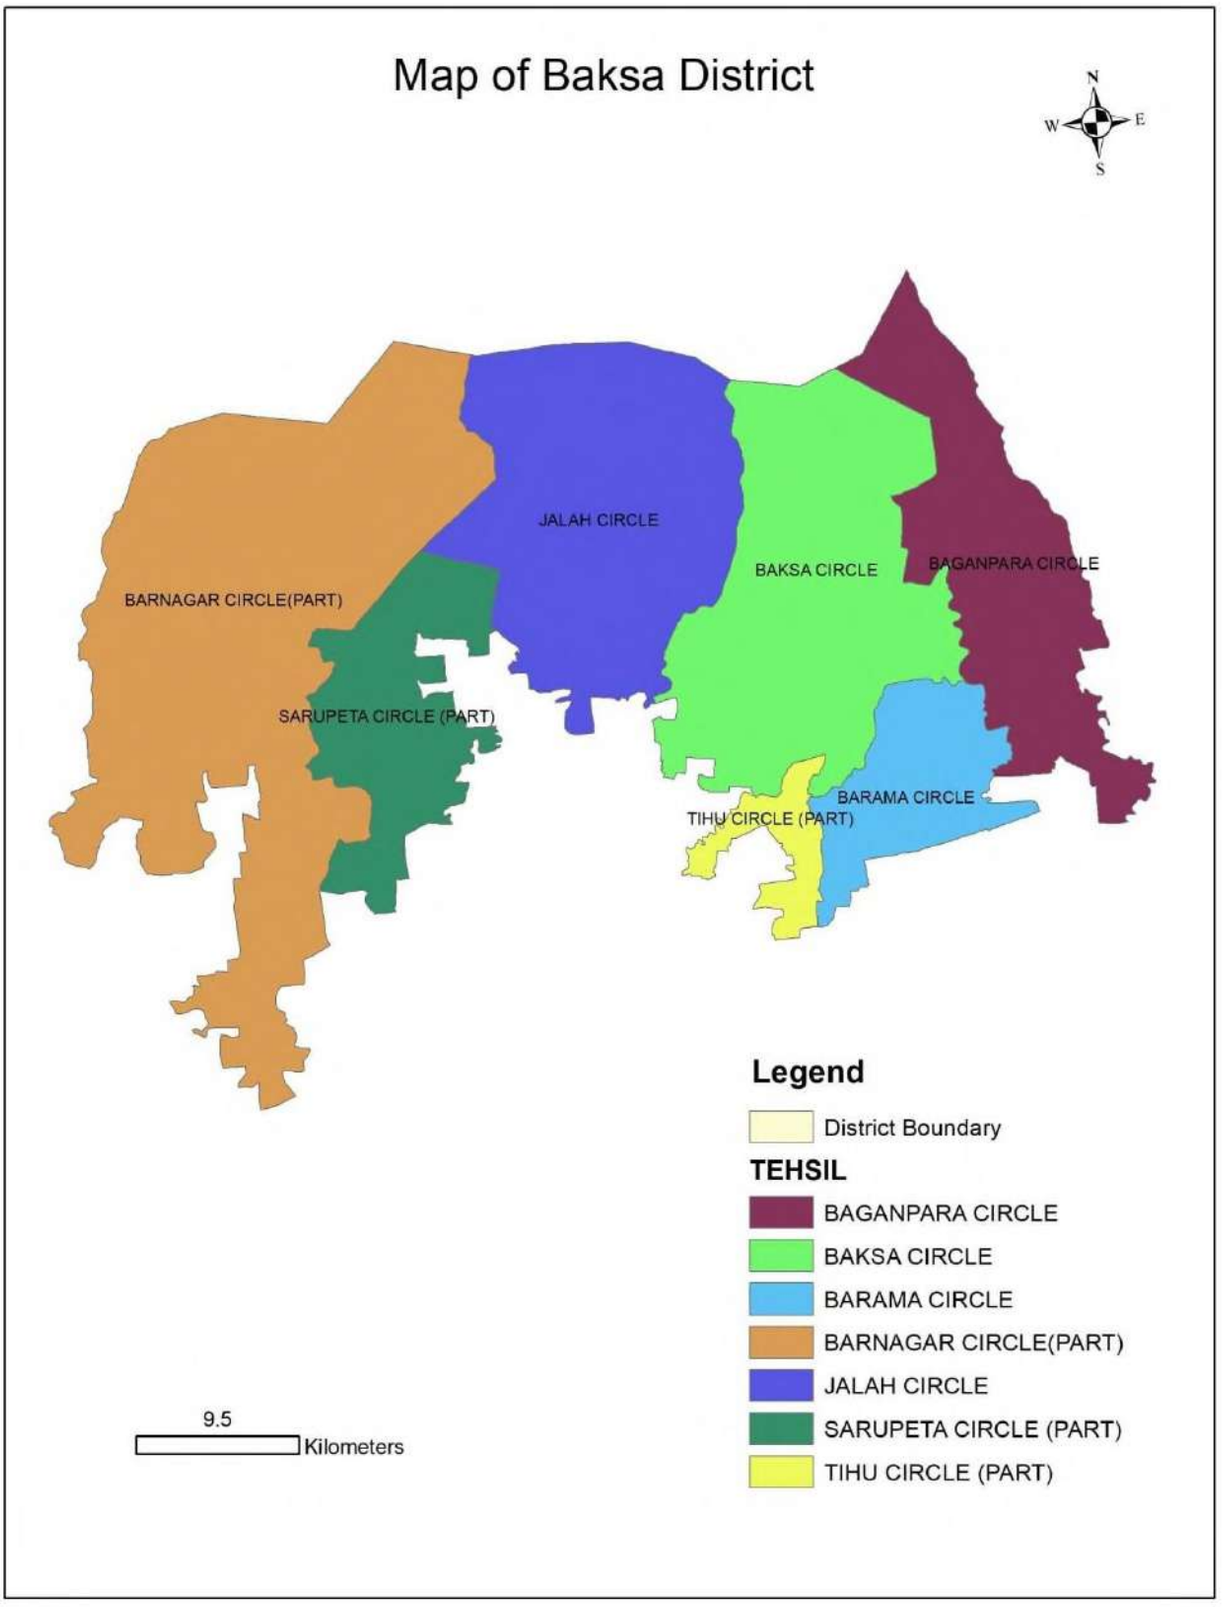
2) <u>Manas Soushi Khongkhor</u>: An eco-tourism spot located in the middle of Baksa district on the mouth of river Pagladia. Enshrined with natural beauty just adjacent with Bhutan hills, it attracts a large number of picnic goers in the month of December and January. It is new well maintained and looked after by an NGO known as Manas Soushi Khongkhor Eco Tourism Society (MASKETS). Some endangered wild animals such as Bison, Deer, Hogg Deer, White Belly Heron, Royal Bengal Tiger etc. are found here. Food and Guest House facility is provided by the volunteers of MASKETS if needed.

Nearest Railway station: Nalbari

Connection through motorway:

i) Mushalpur- Nikashi- Subankhata- Chowki (Distance about 25 Kms)

ii) Nalbari- Baganpara- Nayabasti- Subankhata- Chowki (Distance about 55 Kms)



Map: Administrative map of the District

b) Climatic condition:

The climate of the district is sub - tropical in nature with warm and humid summer followed by dry and cool winter. The average annual rainfall is about 2,200 mm per annum of which 70parcent is received during monsoon season (June to September). The rainfall is not uniform rather erratic. The mean maximum and minimum temperature varies from 33 to 38° C and 8 to 10°C respectively. The relative humidity varies from 65 - 90 per cent. The sky remains cloudy during June to September. The light and sun shine hour is the highest during March – April.

c) Drainage System

Number of perennial streams flow through the district from north to south and join the Brahmaputra River. The major streams that drain the area are Mara Manas, Palla, Po-Mara, Kaldia, Tihu, Burhadia, Pagladia, Nona and Puthimari River. The whole drainage of the district ultimately finds its way to all rivers and tributaries.

Assam state comprises of two main river valleys. The northern valley is known as the Brahmaputra valley and the southern valley is known as Barak valley. Baksa district falls in the Brahmaputra valley which is an alluvial plain in between the foot hills of Bhutan ranges and other hill tracts, on North and central ranges of Naga, Karbi, Khasi, Jaintia, Garo hills etc. This valley approximately covers 56339 sqkm. of riverine area within the strip of both bank of the river, stretching from Sadiya on the east up to Baksa on the West.

The district contains a network of 3 major rivers namely Beki, Pagladia, and Barnadi and around 10 small rivers which are very active during the summer season. There are numerous springs and streams which are a good source of water for household use and small scale irrigation. The district is endowed with large number of Dongs (Natural Depressions) where water remains stagnant for a large part (around 8 months) of the year. Farming community is using dong water for irrigation of their crops since long. The ground water is good and remains at about 25 to 45 feet during winter. Utilization of this water resource in the foothill region during winter is a problem since soil is shallow.

DRAFT

d) Irrigation

The district is primarily rainfed. Out of the gross cropped area of **164862** ha, the extent of irrigated land is only **22,043** ha, i.e. 13.37% of total cropped area. Considering the block-wise data, percentage of gross irrigated land to gross cropped area is maximum in Goreswar block, followed by Tamulpur block, i.e 21.0% and 20.8% respectively.

A total of **1,42,819** ha of area is under rainfed cultivation. While comparing the ratio of area under rainfed cultivation to gross cropped area in each block, Dhamdhama block comes at the top position with 90.35% (gross cropped area of 21146 ha) under rainfed irrigation, followed closely by Baska block with 90.34% area under rainfed cultivation (gross cropped area of 21085 ha). The area under partial irrigation has been reported to be zero across all the blocks the district.

Table No. 2.3: Irrigation Based Classification (Undivided Baksa District)

Block	Irrigated (Area in Ha)		Rainfed (Area in Ha)	
	Gross Irrigated Area	Net Irrigated Area	Partial /Protective Irrigation	Un- Irrigated or Totally Rainfed
Baksa	2,037.00	1,767.00	-	19,048.00
Tihu- Barama	2,096.00	1,812.00	-	19,066.00
Tamulpur	4,756.00	3,388.00	-	18,099.00
Nagrijuli	1,580.00	1,580.00	-	14,572.00
Goreswar	4848	3477	-	18,226.00
Jalah	2,065.00	1,843.00	-	18,728.00
Gobardhana	2,620.00	2,390.00	-	15,975.00
Dhamdhama	2,041.00	1,771.00	-	19,105.00
Total	**22,043.00**	**18,028.00**	**-**	**1,42,819.00**

Source: Irrigation Department, Baksa

e) Soil resources

The district forms a part of the vast alluvial plains of Brahmaputra River system and sub-basin of River Manas. Physiographically, it is characterized by the different land forms resulting from a) denudation structural hill and b) alluvial plain. The low mounds/hillocks are covered by a thick lateritic mantle and these are occupied by evergreen mixed forests. The alluvial plains comprise of Older and Newer alluvium.

The Older alluvium occupies the piedmont zone towards the north of the district bordering Bhutan. The narrow zone at the Himalayan foothill is known as the Bhabar zone and it supports grow of dense forests. To the south of the Bhabar zone and parallel to it, the flat Terai zone lays where the ground remains damp and sometimes, spring oozes out. The Terai zone is covered by tall grass. The Newer alluvium includes sand, gravel, pebble with silt and clay. Soil in greater parts of the district is sandy and silty loam, or clayey loam. The variation in composition is mainly due to the varying composition of the river borne 2 materials deposited at different times and under different conditions. The younger alluvial soil has a high phosphorous content whereas, in Older Alluvial soils, it is very low. In general, the soil is acidic to slightly alkaline in nature and is moderately permeable and characterized by the presence of low organic carbon and low soluble salts. Soils restricted to inselberg areas are more clayey, lateritic and less permeable and are highly acidic in nature.

From agricultural point of view, the soils in major parts of the district are suitable for all sorts of crops Overall the soil of the district has been classified into two orders namely

(i) Entisols (new alluvium) and
(ii) Inceptisols (Old alluvium).

The soil of this zone is mostly acidic in nature and pH increases towards south direction. The Organic carbon and available Nitrogen of the soil mostly varies from medium to high, low to medium in available P_2O_5 and medium K_2O status. The district has a more or less plain topography, some hillocks are found elsewhere. It has a gentle slope from northern side towards south direction.

Soil erosion is a naturally occurring process that affects all landforms. In agriculture, soil erosion refers to the wearing away of a field's topsoil by the natural physical forces of weather and wind or through forces associated with farming activities

DRAFT

such as tillage. In the Baksa district, soil movement by rainfall (raindrop splash) is usually greatest and most noticeable during short-duration. Floods accompanied with soil erosion and sand deposition causes maximum damage to standing crops of the agricultural lands in the district and as a result the soils are subjected to severe soil erosion during rainy season. Due to topographical factors, the soil is subject to splash, sheet and gully erosion resulting into degradation of the soil. Besides this, there is biotic pressure on the lands to the curb this menace particularly on the agricultural lands.

f) Groundwater prospects in the district :

Hydrogeology The ground water conditions in the district can be described under two distinct hydrogeological units, i.e. conditions prevailing in the semi-consolidated formations and conditions prevailing in the unconsolidated formations.

I) Semi-Consolidated Formations: A very narrow belt of Upper Tertiary semi consolidated rock formation engulf the northern fringe area of the district with Bhutan consisting mainly claystone/siltstone/sandstone and form low to moderate altitude denudation structural hills. The trend of hills is generally in E-W direction. These are characterized by high run off, low infiltration to groundwater and experience secondary porosity development through cracks/joints/bedding planes. Springs are developed in this belt.

II) Unconsolidated Formations: Major parts of the district are underlain by unconsolidated formations represented by the alluvial deposits of Recent age. Bhabar formation comprises of the alluvial sediments at the foothill belt in the north and the valley covering the central and southern part. The behaviour of ground water in the piedmont sediments is naturally different from that in the alluvial areas occurring further south.

Bhabar- Terai Belt: This zone consists of the terrace deposits in the foot hill regions of the Himalayas composed of talus fans. The material is a heterogeneous admixture of boulders, pebbles, cobbles with the interstices filled by sand and silt. These sediments are highly permeable with low retentive capacity. Thus, the streams in this region are devoid of any appreciable surface flow, although, there are evidences of sub- surface flow. Behaviour of ground water in the further south is less erratic. Here, ground water occurs under water table conditions. The depth to water level is rather high.

DRAFT

Older Alluvium: Ground water occurs under water table conditions in the elevated flat-topped areas of Older alluvial sediments. These areas are usually forested. It comprises of sand, gravel and silt with higher proportion of clay. Ground water occurs under unconfined to confined conditions.

Newer Alluvium: The district is mostly covered by Newer alluvium and the formation comprises of sand, gravel and pebble with silt and clay. Ground water in this zone occurs under unconfined condition. Based on the behaviour and occurrence of ground water, the regional ground water flow system of district has been described under following categories.

i. Shallow Aquifer Group occurring within 50 m depth.
ii. Deeper Aquifer Group beyond the depth of 50 m and down to 200 m bgl.

i. **Shallow Aquifer Group**: It consists of a mixture of boulder, gravel, sand, silt and clay. The thickness of the aquifer varies from 15 to 40 m. Ground water in this aquifer generally occurs under water table to semi-confined conditions. The pebbles, boulders are restricted mostly to the northern parts of the district. They occur at the depth between GL to 50 m bgl. The development of ground water from this aquifer is done by open well and shallow tube well for both the domestic and irrigation purposes. The water level in the major parts of the district generally lies between 2 to 4 m bgl. The northern most parts occupied by the piedmont zones and the areas adjoining to the border area are having deeper water level. The movement of ground water is southerly towards Brahmaputra River. The water table contour follows the topography of the area and lies more or less parallel to the Brahmaputra River. The hydraulic gradient becomes gentler towards south.

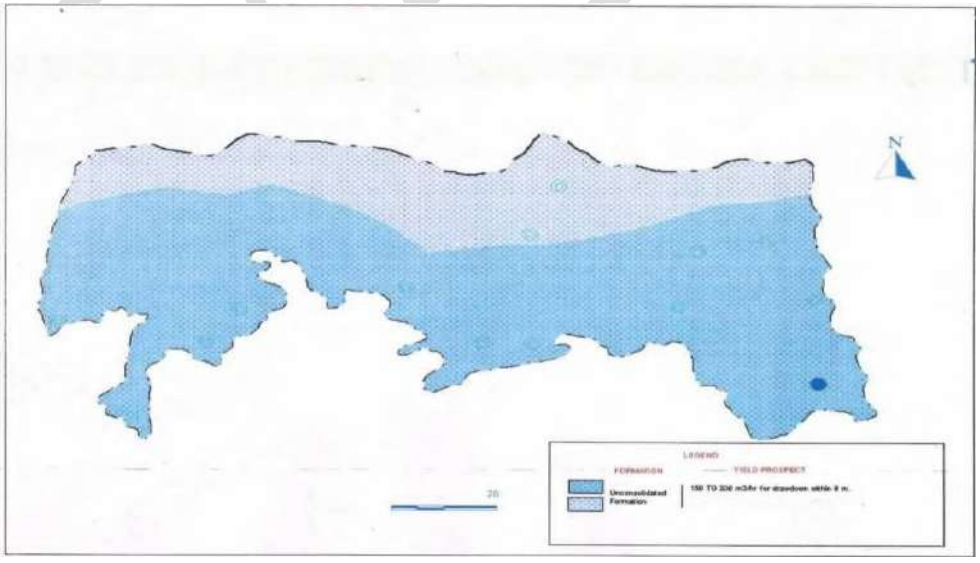
ii. Deeper Aquifer Group: It consists of coarse to medium sand with intercalation of clay. Ground water occurs under water table to confined conditions. Detailed hydrogeological surveys aided by exploratory drilling revealed the existence of two to three promising aquifer zones down to the depth of maximum 200 m bgl. Aquifer displays various degree of lateral and vertical variation of aquifer indicating various degree of depositional environment both in space and 4 times. The piezometric surface is highly variable and the movement of ground water is towards the south.

Ground Water Resource: Resources could not be computed for 2009 as the district was not formed at that time and was part of Darrang district.

DRAFT

Ground Water Quality: The ground water of the district is acidic to slightly alkaline in nature. Ground water has low content of dissolved minerals. The iron content is generally high for use for drinking purpose in some areas. In most of the sources, it is within permissible limit as per BIS (1991) standard of 1.0 ppm and as such, it does not pose any serious health hazard. Except high iron content, the ground water of the district is suitable and safe for drinking and other uses. Ground water of both shallow and deeper aquifers is suitable for irrigational and industrial purposes. Ground water having a little higher concentration of iron can be used after treatment.

Ground Water Management Strategy: Shallow ground water structures are congenial for construction in the district, as water resource and aquifer material are laterally persistent throughout the district. Dug wells and dug-cum-bore wells especially near the border area are beneficial. Deep tube well can be constructed preferably below the depth of 50 m tapping aquifer zone with an expected discharge of about 100 m3 /hr. 6.0 Ground Water Related Issues and Problems Floods devastate the district regularly during the monsoon season. Flood accompanied with soil erosion and sand deposition causes maximum damage to standing crops of the agricultural lands. Other than high Iron content in sporadic occurrences, most of the chemical constituents are within permissible limit.



Map: HydroGeological Map of Baksa (Undivided) District.

8. Land and land use pattern:

The total geographical area (TGA) of Baksa is 2.07 lakh hectare. The largest Block of the district is Gobardhana which comprises of a TGA of 42,787 hectare i.e. about 20.6% of the TGA of the district.

Table : Land use pattern in Baksa District (Undivided)

Name of the Taluka	TGA	Area under Agriculture				Area under forest	Area under wasteland	Area under other uses
		GCA	NSA	AST	CI (%)

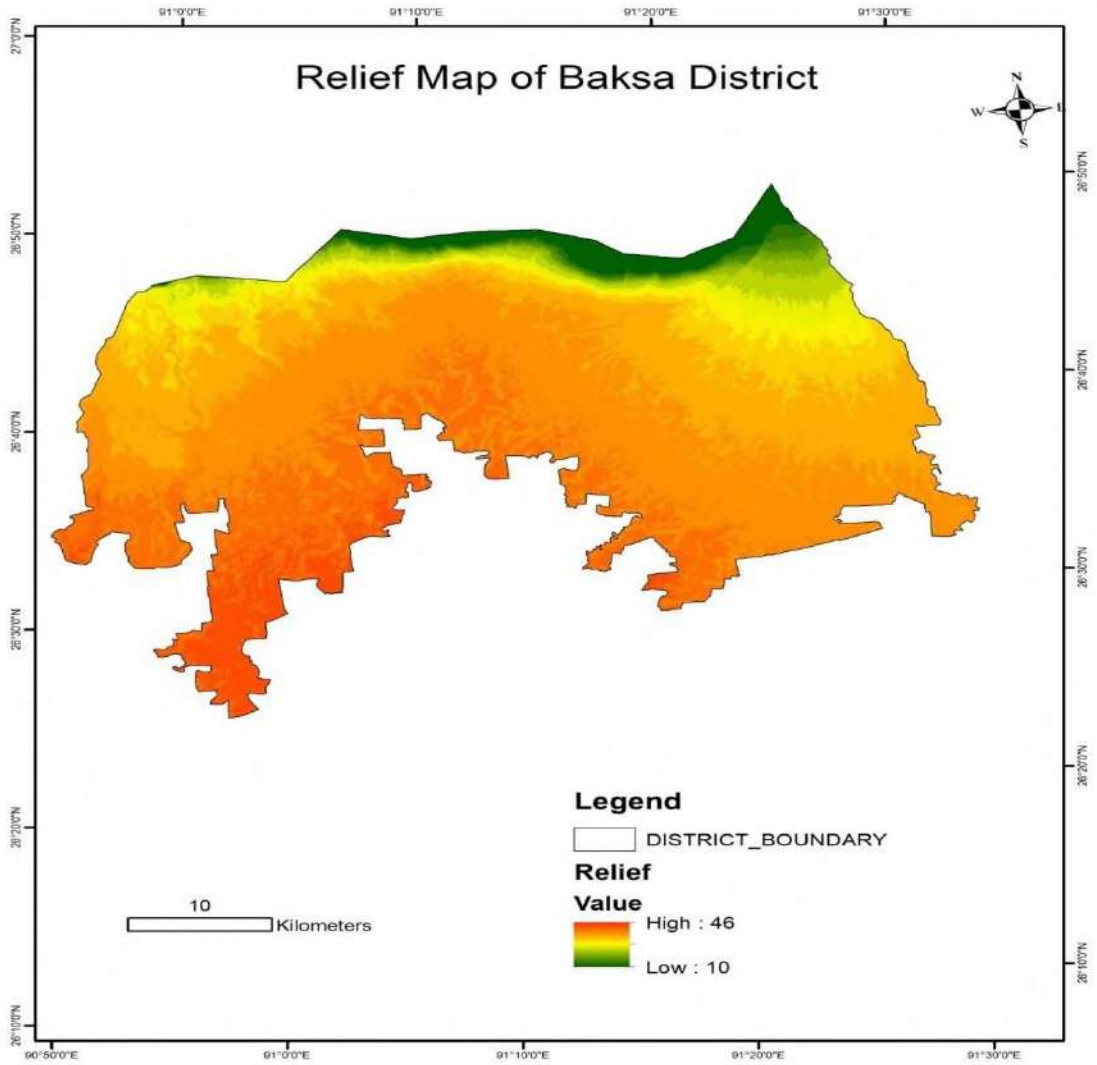
9. Physiography of the District

The district forms a part of the vast alluvial plains of Brahmaputra River system andsub-basin of River Manas. Physiographically, it is characterized by the different land forms resulting from a) denudation structural hill and b) alluvial plain. The low mounds/hillocks are covered by a thick lateritic mantle and these are occupied by evergreen mixed forests. The alluvial plains comprise of Older and Newer alluvium. The Older alluvium occupies the piedmont zone towards the north of the district bordering Bhutan. The narrow zone at the Himalayan foothill is known as the Bhabar zone and it supports grow of dense forests. To the south of the Bhabar zone and parallel to it, the flat Terai zone lays where the ground remains damp and sometimes, spring oozes out. The Terai zone is covered by tall grass. The Newer alluvium includes sand, gravel, pebble with silt and clay.



10. Rainfall

The climate of the district is sub-tropical in nature with warm and humid summer followed by cool and dry winter. The average rainfall of the district is found to be 76 mm in the recent years.

YEARS	JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC
	R/F	R/F	R/F	R/F	R/F	R/F	R/F	R/F	R/F	R/F	R/F	R/F

Temperature:

The district enjoys a sub-tropical humid climate with a hot summer and moderate winter. January is the coldest month and July/August is the warmest month. The winter temperature drops to 10°C and summer temperature goes up to 35°C. South-West monsoon activates from June and continues up to September-October.

DRAFT

11. a) Geology

(i) Regional Geology:

The Shillong Plateau (approx. 47,614 sq. km) is a Precambrian cratonic block in Northeast India, tectonically separated from the Indian Peninsula. It is bordered by:

- Dauki Fault to the south (dextral strike-slip fault),
- Brahmaputra Lineament to the north,
- Garo-Rajmahal Grabenand Dhuburi/Madhupur Lineament to the west,
- Belt of Schuppen to the east.

This block is made up of high- to medium-grade Paleoproterozoic basement gneisses and schists, which are classified as the **Basement Gneissic Group (BGG)**. These are overlain by Mesoproterozoic metasediments and metavolcanics of the **Shillong Group**, intruded by Neoproterozoic acidic intrusives such as:

- Myllem pluton
- South Khasi pluton
- Umroi granite
- Nongpoh pluton

The plateau is composed mainly of orthogneiss and paragneiss with the following geological units:

- Banded gneiss (bimodal character)
- Migmatite
- Augen gneiss
- Banded Iron Formation (BIF)
- Amphibolites
- Pyroxene granulite
- Calc granulite
- High-grade sillimanite-bearing metapelite with cordierite, corundum, spinel, sapphire.
- Intrusives like lamprophyre, diorite, granodiorite, mafic intrusions, andpegmatite veins.

Towards the southern boundary of the Shillong Plateau, Cretaceous–Tertiary sedimentary sequences overlay these basement rocks. The plateau also contains an intra-cratonic basin (approx. 2,500 sq. km) with sedimentary cover.

DRAFT

The Assam Basin to the north represents the cratonic margin with three main tectonic phases:

1. Late Cretaceous to Eocene block faulting and development of a southeasterly dipping shelf.
2. Oligocene uplift and erosion, during which basement faults reactivated.
3. Post-Oligocene phases, marked by sedimentation and structural developments.

The Eocene Sylhet Formation is significant for its varied depositional environments:

- The Lakadong Member (lagoonal environment) contains thin sandstone and interbedded shale and coal.
- The upper part of the Lakadong Formation represents calcareous sandstones formed in a shallow water platform.

DRAFT

11. b) Mineral Wealth

1. Overview of mineral resources:

In Baksa District especially riverbed sand & gravel deposits are found to occur. The flood plain deposits of Sand, Gravel, Stone, Clay/ Silt and M-sand occur in the form of fossilized channel. These have intrinsic economic interest in or within the earth's crust in such form, quality & quantity that these are reasonable for eventual economic extraction.Geological investigation carried out at Baksa reveals that a compatible relationship exists between the geological set up of Baksa & minor mineral occurrences.

Names of minor minerals , found at Baksa, are elucidated below: Riverbed Sand, Gravel, Stone, Clay/ Silt and M-sand Deposits having variation only in framework or sediment particles diameter

2. Details of Sand and other riverbed minerals Resources:

(The mineral resources of the district whose categorization and estimation is to be done will be furnished in this section.)

12. (a) District wise detail of river or stream and other sand source

i) Drainage system with description of main rivers

S. No.	Name of the river	Area drained (sq. m)	% Area drained in the district
1	Dirring		
2	Kaldia

DRAFT

Replenishment study for a river solely depends on estimation of sediment load for any river system and the estimation is a time consuming and should be done over a period. The process in general is very slow and hardly measurable on season-to-season basis except otherwise the effect of flood is induced which is again a cyclic phenomenon. Usually, replenishment or sediment deposition quantities can be estimated in the following ways as given below:

A. Replenishment study based on satellite imagery involves demarcation of sand bars potential for riverbed mining. Both pre and post monsoon images need to be analyzed to established potential sand bars. Volume estimation of sand is done by multiplying Depth and Area of the sand bar. The sand bars are interpreted with the help of satellite imagery. Ground truthing has been done for 100% of the total identified sand bars. During ground truthing, width and length of each segment were physically measured. It has also been observed that in few cases, sand bars have attained more than 3 meters height from the average top level of the river beds. Considerations of sand resources have been restricted within 3 meters from the average top surface of the river bed.

B. Direct field measurement of the existing leases involving estimation of the volume difference of sand during pre and post-monsoon period. With systematic data acquisition, a model has developed for calculation of sediment yield and annual replenishment with variable components.

C. The replenishment estimation based on a theoretical empirical formula with the estimation of bed-load transport comprising of analytical models to calculate the replenishment estimation.

Field data collation:

Secondary data were collected for pre- monsoon period and during September 2024 post-monsoon data were collected for the river banks. The relative elevation levels were captured through GPS/DGPS. Thickness of the sand bars was measured through sectional profiles.

DRAFT

REPLENISHMENT STUDY

DISTRICT SURVEY REPORT
OF
BAKSA DISTRICT, ASSAM

(For Minor minerals other than sand or river bed mining)

CPC Environment Solution Pvt. Ltd.
(A QCI-NABET Accredited Organization)

Table of Content

1. Introduction

2. Overview of Mining Activity in the District

3. General Profile of the District
4. Geology of the District
5. Drainage of Irrigation pattern
6. Land Utilization Pattern in the District: Forest, Agriculture, Horticulture, Mining, etc.
7. Surface water and Ground water scenario of the district
8. Rainfall of the District and climatic condition
9. Details of the Mining Leases Areas in the District
10. Details of Royalty or Revenue Received in the Last Three Years
11. Details of Production of Minor Minerals in Last Three Years
12. Mineral map of the District
13. List of Letter of Intent (LOI) Holders in the District along with its validity
14. Total Mineral Reserve available in the District
15. Quality /Grade of Mineral available in the District
16. Use of Mineral
17. Demand and Supply of the Mineral in the last three years
18. Mining leases marked on the map of the district
19.Details of the area of where there is a cluster of mining leases viz. number of mining leases, location 20. Details of Eco-Sensitive Area, if any, in the District
21. Impact on the Environment due to mining activity
22. Remedial Measures to mitigate the impact of mining on the Environment
23. Reclamation of Mined out area
24. Risk Assessment & Disaster Management Plan
25. Details of the Occupational Health issues in the District
26. Plantation and Green Belt development in respect of leases already granted in the District

PREFACE

The need for a District Survey Report (DSR) has been mandated by the Ministry of Environment, Forest, and Climate Change (MoEF&CC) through Notification No. 125 (Extraordinary, Part II Section 3, Sub-section ii), S.O. 141 (E), dated 15th January 2016. This notification introduced amendments to the EIA Notification 2006, aimed at improving legislative control. As part of these changes, district-level committees were introduced, and the preparation of DSRs became a requirement.

Subsequently, Notification No. 3611 (E), dated 25th July 2018, expanded the DSR's scope to include "Minerals Other than Sand" and provided a specific format for its preparation. The DSR's purpose is to identify areas with mineral potential where mining activities can be permitted, as well as to flag areas where mining should be restricted due to proximity to infrastructure, erosion-prone zones, or environmentally sensitive regions.

The preparation of the DSR involves both primary and secondary data collection. Primary data includes site inspections, surveys, and ground truthing, while secondary data comes from authenticated sources and satellite imagery studies. The secondary data covers information such as the district profile, local geology, mineralization, and other relevant activities, often compiled from disparate sources.

DRAFT

Key Aspects of District Survey Report (DSR)

Assessment of Resources: The DSR provides a comprehensive evaluation of the mineral resources available in riverbeds within the district. It includes detailed data on the quantity, quality, and distribution of sand and other minor minerals, helping to prevent over-extraction and resource depletion through accurate estimation.

Environmental Impact Analysis: The report analyzes the environmental effects of riverbed mining, addressing changes in river morphology, hydrology, and impacts on aquatic ecosystems and biodiversity. This analysis is vital for mitigating harmful environmental impacts and conserving riverine habitats.

Regulation and Compliance: The DSR serves as a regulatory tool for riverbed mining, outlining standards and guidelines to ensure compliance with national and state environmental laws. It helps curb illegal mining activities and promotes regulated, lawful mining operations.

Sustainable Mining Practices: The DSR advocates for sustainable mining practices that reduce environmental degradation. Recommendations may include controlled mining depths, designated extraction zones, and periodic studies to maintain the ecological balance of river systems.

Socio-Economic Considerations: The report addresses the socioeconomic implications of riverbed mining, such as employment generation and local government revenue. It also considers the negative impacts on communities, including displacement and loss of livelihoods.

Data-Driven Decision Making: The DSR provides a scientific foundation for decisions regarding riverbed mining. Incorporating geospatial data, remote sensing images, and field surveys enhances the accuracy and reliability of the report, supporting informed policy-making and resource management.

Stakeholder Involvement: The preparation of the DSR involves consultations with various stakeholders, such as government bodies, local communities, environmentalists, and industry representatives. This inclusive approach ensures diverse perspectives are considered, promoting balanced and equitable mining practices.

DRAFT

1. Introduction of District Survey Report (DSR) of Baksa District

Introduction

The District Survey Report (DSR) of Baksa District has been prepared following the guidelines of the Ministry of Environment, Forests and Climate Change (MoEF&CC), Government of India. This report aligns with the MoEF&CC Notification S.O.-1533(E) dated 14th September 2006 and subsequent notification S.O. 141(E) dated 15th January 2016. It aims to ensure the scientific and systematic utilization of natural resources for the benefit of present and future generations. Furthermore, MoEF&CC's notification S.O. 3611(E) dated 25th July 2018 recommends the format for preparing the DSR.

The main objective of the DSR is to identify areas of aggradation where mining can be allowed, and areas of erosion where mining should be restricted. It also involves the calculation of the annual replenishment rate to maintain ecological balance. Additionally, the DSR includes assessing the development potential of in-situ minor minerals.

Objectives of the DSR:

1. Identification and quantification of minor mineral resources for optimal utilization.
2. Regulation of river bed mining, and reduction of demand-supply gaps.
3. Use of Information Technology (IT) for surveillance of river bed mining activities.
4. Facilitation of environmental clearance for clusters of mines.
5. Restriction of illegal mining.
6. Reduction of flood occurrences in the area.
7. Preservation of aquatic habitats.
8. Protection of groundwater by limiting extraction to above base flow levels.
9. Maintenance of data records related to mineral resources, leases, and revenue generation.
10. Creation of a scientific mining plan, including ultimate pit limit estimation.
11. Development of comprehensive guidelines for mining minor minerals.

The DSR includes secondary data on the district's geology, climate, mineral resources, and other relevant factors, compiled from published and unpublished reports, as well as government websites.

DRAFT

Statutory Framework

The MoEF&CC has issued several notifications and guidelines over the years to regulate mining and formulate DSRs for each district. Below is a summary of the legal framework:

Year	Particulars
1994	The MoEF&CC issued the Environmental Impact Assessment (EIA) Notification for major minerals covering areas over 5 hectares.
2006	EIA Notification SO 1533 (E) made it mandatory to obtain environmental clearance (EC) for minor minerals exceeding 5 hectares.
2012	The Hon'ble Supreme Court mandated EC for minor minerals, even for areas under 5 hectares.
2016	"Sustainable Sand Mining Guidelines (SSMG)" introduced, requiring EC for all minor minerals and district-level monitoring.
2018	MoEF&CC issued notification S.O. 3611(E) with a recommended DSR format for identifying aggradation areas, replenishment rates, and protected zones.
2020	The "Enforcement and Monitoring Guidelines for Sand Mining (EMGSM)" introduced for improved regulatory enforcement and technological monitoring of sand mining activities.

Enforcement & Monitoring Guidelines, 2020

These guidelines address illegal mining, directing states to implement monitoring mechanisms like river audits, aerial surveys, and drone-based surveillance.

DRAFT

Utilization and Demand of the minerals

River bed minerals like sand, gravel, stone etc. plays an essential role in construction and is widely used in concrete production, glass manufacturing, road base formation, and many more. River bed mining is a prevalent practice in Baksa District, mainly for construction. The rise in real estate and government infrastructure projects has significantly increased the demand for sand and bricks. The minor minerals of Baksa district comes under B-category mining and it is included in sub-category B2. All the available minerals are of Y-schedule.

Uses of minerals:

1. **Construction**: Sand, gravel, silt, clay and ordinary earth are key ingredients in concrete, mortar and asphalt.
2. **Industrial**: Used in glass production and abrasives.
3. **Environmental**: The minerals can improve traffic safety by providing grip on icy roads, and it helps in soil conditioning for agriculture.
4. **Decorative**: Sand, gravel and stones are used in candles, aquariums, and for enhancing aesthetic appeal in landscaping.
5. **Flood Protection**: Proper management of sand mining helps maintain river flood discharge capacity, reducing the risk of floods.

This DSR aims to provide a well-rounded, data-driven approach for sustainable mineral resource management, ensuring compliance with environmental guidelines and promoting socio-economic benefits for the district.

DRAFT

Methodology of DSR Preparation

The District Survey Report (DSR) preparation follows a systematic methodology to ensure accuracy and comprehensiveness. The steps involved in the preparation of the DSR are illustrated in Figure 2.1 and are described in detail in the following sections.

a. Data Source Identification

The DSR is based on both primary and secondary data collected from reliable and authoritative sources. Identifying authentic data sources is critical for compiling accurate data. The primary data sources for the DSR are collected through field surveys and replenishment studies. Secondary data sources include publicly available information from government publications, reports, and reputable journals.

- **District Profile**: Information related to the district's demographics and basic statistics is sourced from the **District Census Report, 2011** and the **District Statistical Handbook** published by the Government of Assam.
- **Mineral Resources**: The potential mineral resources of the district are described based on reports published by the **Geological Survey of India (GSI)** or other government agencies
- **Mining Data**: Information on mining leases, lease holders, lease areas, resource allocations, and revenue generation is collected from the **Forest Department.**
- **Satellite Images**: Satellite imagery is utilized to prepare maps related to the district's physiography and land use/land cover.

b. Data Analysis and Map Preparation

After collecting data, a detailed analysis is conducted to extract relevant insights. This involves analyzing spatial data and preparing maps that depict:

- Geomorphology of the district
- Topography
- Land use patterns
- Mineral resource distribution

These maps help visualize the key characteristics of the district and identify potential mining areas.

DRAFT

c. Primary Data Collection

Primary data is essential for preparing a comprehensive DSR. Fieldwork is conducted across the district to assess mineral resources. This field study provides a detailed understanding of the mineral composition and their distribution in the area.

d. Replenishment Study

A key aspect of sustainable mining is ensuring that the amount of sediment removed from riverbeds is replenished naturally. Therefore, replenishment studies are conducted to assess the annual rate of replenishment of riverbed sand. This helps avoid the adverse impacts of excessive sand extraction.

- Physical surveys of the riverbed are carried out using **GPS/DGPS** to define the topography, contours, and offsets.
- The surveys provide a detailed depiction of important features in and around the river, including nearby civil structures and other key landmarks.
- This information helps define the spatial area eligible for sand mining and estimate the sand reserves.

e. Report Preparation

The DSR covers various aspects of the district, including:

- **General Profile**: A brief overview of the district, including demographics, land use patterns, and economic activities.
- **Geomorphology and Geology**: An assessment of the district's physical landscape, including its geological structure.
- **Mineral Resources**: A detailed account of riverbed sands and other minor minerals in the district, including their distribution and potential for extraction.
- **Mining Block Delineation**: Identification of potential mining blocks and mineral reserves within the district.

DRAFT

- **Production Trends**: An analysis of recent trends in the production of minor minerals and the revenue generated from the mining sector.
- **Replenishment Estimation**: The annual replenishment rate of riverbed sand, based on field surveys.
- **Environmental Impact and Mitigation**: An evaluation of the potential environmental impacts of mining activities, along with proposed mitigation measures.
- **Risk Assessment and Disaster Management**: A strategy for managing risks associated with mining and minimizing the impact of any potential disasters.
- **Reclamation Strategy**: A plan for the reclamation of already mined-out areas to restore the ecological balance.

This structured approach ensures that the DSR not only identifies mineral resources but also emphasizes sustainable mining practices and environmental preservation.

DRAFT

2. Overview of mining activity in the district

In the Baksa district collection of sand, gravel, stone, clay/silt etc. from river- bed is considered as one of the main minor mineral sources of the district. These materials are primarily utilized for construction purpose.

DRAFT

3. General profile of the district

- **General Information**

The original word 'Baksa' is not above controversy, a good chunk of population prefer to use 'Bagsa' in lieu of 'Baksa'. The popular assumption that 'Baksa' is the misspelt form of 'Bangsa'- a 'Dzonkha' word meaning a farm house and a corridor as it is known that Bhutanese king and subjects used this area for trade and passage to the plains. 'Bangsa' (Bagsa or Baksa) was in fact one of the most important 'Dooars' of Bhutan. Another source says that the name "Bagsa" is originated from Bhutanese language. According to Bhutanese origin they denoted the area as "Bagsa Duar". "Bagsa" means one kind of rice and "Duar" means entrance point. As Bhutanese king ruled these areas for a long time in an around first half of the nineteenth, so it might be possible that the name "Bagsa" or "Baksa" had a Bhutanese origin. According to Bodo source the name originated from a kind of rice grain which is known as "Bagsa". The said rice grain is one kind of broken and uncleaned product which is gained after milling the rice. As the name Baksa is itself derived from various sources and antecedents so there exists lots of controversy over the name. But still today no concrete evidence has been found which might determine the final source. Only popular sources and folklores are evident but no historical source has been found. Now the name Baksa is officially taken and used.

As a result of the historic BTC (Bodoland Territorial Council) accord signed on February 10th, 2003, BTAD (Bodoland Territorial Autonomous District) was formed with four districts namely Baksa, Chirang, Kokrajhar and Baksa. Baksa district was carved out of Nalbari, Barpeta, Kamrup and a small portion of Darrang district.

Baksa district is located in the north- western part of Assam with the district headquarter at Mushalpur, which is 105 Km away from state capital Dispur, Guwahati and 20 Km away from National Highway no.31 towards north. The main mode of connectivity with the district is by Road. The district headquarter is linked to the National Highway 31 mainly at two junction points namely Barama and Kadamtola. It shares its border with Tamulpur district in the east, Barpeta, Nalbari and Kamrup districts in the south and Chirang district in the west. The district also shares the privilege of having International Boundary with Bhutan in the North. The gentle and gradual slopes can be seen stretching from the foot hills of Bhutan and reaching out to the southern tips of Barpeta, Nalbari and Kamrup district.

Baksa was notified as one of the districts of Bodoland Territorial Council in October 2003 while it started functioning from 1 June 2004 when naturalist-bureaucrat Dr Anwaruddin Choudhury of the Assam Civil Service took charge as its founding Deputy Commissioner.

Administrative Setup :

Deputy Commissioner of the District is the overall in charge of the administration of the entire district. He also acts as the Collector in case of Revenue matters, as a District Magistrate in case of maintenance of Law and Order and General Administration, as a District Election Officer in case of conduct of Election, as a Principal Census Officer while conducting Census, and so on. A number of Officers, like Additional Deputy Commissioners, Subdivisional Officers, Extra Assistant Commissioners and others assist the Deputy Commissioner is looking after the administration of the district. At lower level each sub-division is headed by one Sub-Divisional Officer whereas under him there will be Revenue Circle Officers for each revenue circles who are responsible for the entire administration of the area under their respective revenue circle. For the administrative purposes, the entire district is divided into two sub-divisions : Mushalpur, Salbari. These sub- divisions comprising of 384 villages are further divided into 4 revenue circles. Important point to be noted is that Baksa is the only district in Assam where there is no notified town. Baksa district covers an area of 2400 Sq.Km.

GENERAL INFORMATION ABOUT BAKSA DISTRICT :	
1. Geographical area	2400 Sq. Km (Approx)
2. Population	**9.53773** Lakhs (as per 2011 census)
3. Sub-Divisions	1. Mushalpur (Sadar)
	2. Salbari(Civil)
4. Revenue Circles	1. Baska (Sadar)
	2. Barama
	3. Baganpara
	4. Jalah
5. Development Blocks	1. Baska Dev. Block
	2. Tihu-Barama Dev. Block
	3. Gobardhana Dev. Block
	4. Jalah Dev. Block

DRAFT

	5. Dhamdhama Dev. Block
6. Education Blocks (Ele.)	1. Baska

DRAFT

ACCESS TO THE DISTRICT:

By Road Connectivity:

There are number of bus services and small car services (Winger, Cruiser etc.) from Adabari and Basistha Chariali, Guwahati via NH31 touching two connection points to district head quarter (one at Barama, another at Kadamtola). Distance between Guwahati and Barama via NH31 is about 75 Km and Guwahati and Kadamtola via NH31 is about 80 Km.

i) From Adabari Bus Terminal, Guwahati there is direct bus service to Mushalpur (HQ). Distance is about 100 Km.

ii)From Adabari Bus Terminal, Guwahati there is direct bus service to Salbari Sub-Div HQ. Distance is about 160 Km.

By Railway Connectivity:

The district does not have any railway station. However the nearest railway station is Tihu which falls under Nalbari district (Distance 35 Km from District HQ). The distance of Nalbari railway station from district HQ is about 45 Km and Distance of Pathsala railway station (Barpeta district) is about 50 Km.

The distance of Guwahati railway station to district HQ by road (via NH 31) is about 105 Km.

By Air Connectivity:

The nearest airport is Lokpriya Gopinath Bordoloi International Airport at Borjhar, Kamrup (M) which is about 130 Km from the District HQ.

Places of Tourist Interest:

Baksa district has massive potential for development of tourism. The world famous Manas National Park falls under Baksa district. The main places of tourist interest in the district are as follows:-

1) Manas National Park
2) Manas Soushi Khongkhor
3) Moina Pukhuri
4) Daragaon Picnic Spot

1) <u>Manas National Park & Tiger Project</u>: Located at the western part of the district in the foothills of Bhutan, it is a place of great tourist attraction-both national as well as international. There are about 60 species of mammals, 312 birds, 42 reptiles, 7 amphibian, 54 fishes and more than 100 species of insects. The most abundantly found animals are Tiger, Leopard, Golden Langur, Pigmie Hog, DhaneshPakhi, Wild Buffalo, Bison, Python, Wild Cat, Elephant, Hyena, Fox etc. The river Manas flows through the National Park. River rafting facility is newly introduced for the tourists. Both govt. and private lodging and food facility is available.

Nearest Railway station: Barpeta Road

Connection through motorway: Barpeta Road - Bansbari forest range (Distance about 15 Kms)

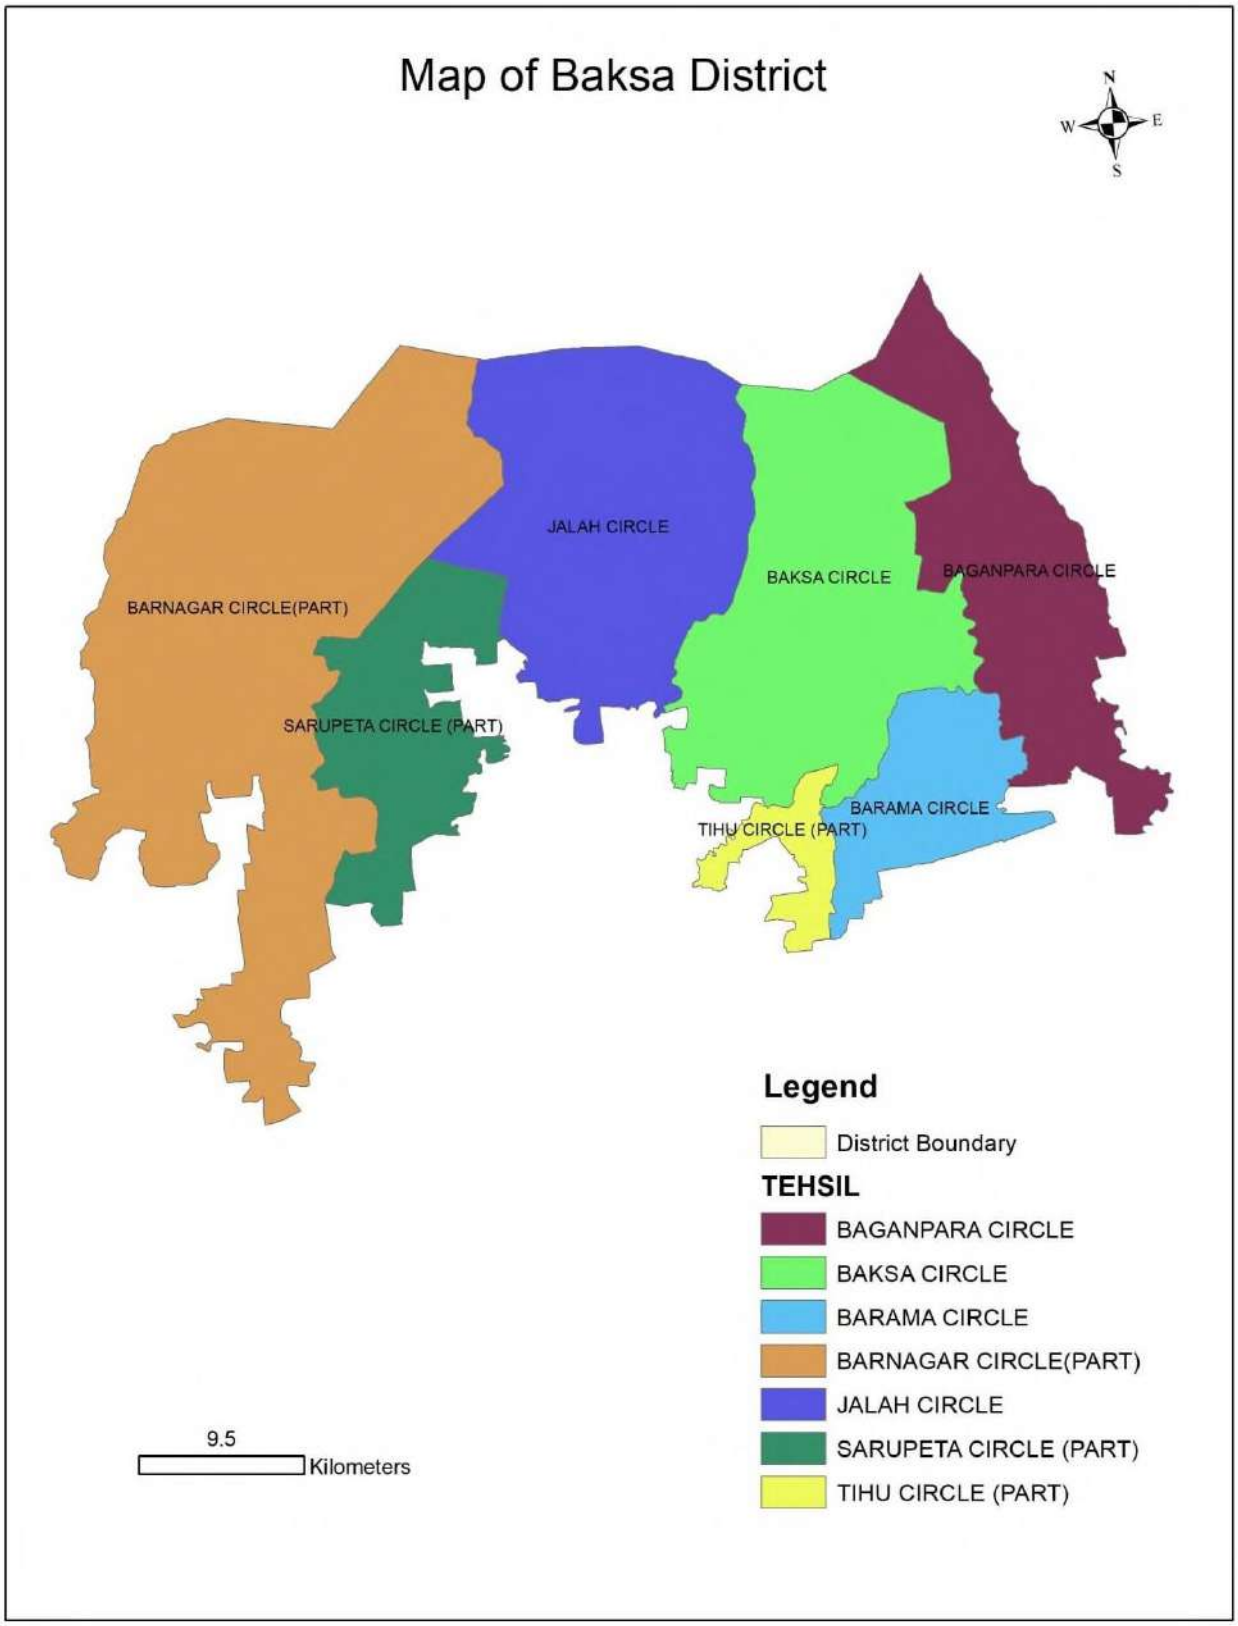
2) <u>Manas Soushi Khongkhor</u>: An eco-tourism spot located in the middle of Baksa district on the mouth of river Pagladia. Enshrined with natural beauty just adjacent with Bhutan hills, it attracts a large number of picnic goers in the month of December and January. It is new well maintained and looked after by an NGO known as Manas Soushi Khongkhor Eco Tourism Society (MASKETS). Some endangered wild animals such as Bison, Deer, Hogg Deer, White Belly Heron, Royal Bengal Tiger etc. are found here. Food and Guest House facility is provided by the volunteers of MASKETS if needed.

Nearest Railway station: Nalbari

Connection through motorway:

i) Mushalpur- Nikashi- Subankhata- Chowki (Distance about 25 Kms)

ii) Nalbari- Baganpara- Nayabasti- Subankhata- Chowki (Distance about 55 Kms)



Map: Administrative map of the District

4. Geology of the district

(i) Regional Geology:

The Shillong Plateau (approx. 47,614 sq. km) is a Precambrian cratonic block in Northeast India, tectonically separated from the Indian Peninsula. It is bordered by:

- Dauki Fault to the south (dextral strike-slip fault),
- Brahmaputra Lineament to the north,
- Garo- Rajmahal Graben and Dhuburi/Madhupur Lineament to the west,
- Belt of Schuppen to the east.

This block is made up of high- to medium-grade Paleoproterozoic basement gneisses and schists, which are classified as the **Basement Gneissic Group (BGG)**. These are overlain by Mesoproterozoic metasediments and metavolcanics of the **Shillong Group**, intruded by Neoproterozoic acidic intrusives such as:

- Myllem pluton
- South Khasi pluton
- Umroi granite
- Nongpoh pluton

The plateau is composed mainly of orthogneiss and paragneiss with the following geological units:

- Banded gneiss (bimodal character)
- Migmatite
- Augen gneiss
- Banded Iron Formation (BIF)
- Amphibolites
- Pyroxene granulite
- Calc granulite
- High- grade sillimanite-bearing metapelite with cordierite, corundum, spinel, sapphirine. Intrusives like lamprophyre, diorite, granodiorite, mafic intrusions, and pegmatite veins.

DRAFT

Towards the southern boundary of the Shillong Plateau, Cretaceous– Tertiary sedimentary sequences overlay these basement rocks. The plateau also contains an intracratonic basin (approx. 2,500 sq. km) with sedimentary cover.

The Assam Basin to the north represents the cratonic margin with three main tectonic phases:

1. Late Cretaceous to Eocene block faulting and development of a southeasterly dipping shelf.
2. Oligocene uplift and erosion, during which basement faults reactivated.
3. Post- Oligocene phases, marked by sedimentation and structural developments.

The Eocene Sylhet Formation is significant for its varied depositional environments:

- The Lakadong Member (lagoonal environment) contains thin sandstone and interbedded shale and coal.
- The upper part of the Lakadong Formation represents calcareous sandstones formed in a shallow water platform.

DRAFT

5. Drainage of irrigation pattern

Number of perennial streams flow through the district from north to south and join the Brahmaputra River. The major streams that drain the area are Mara Manas, Palla, Po-Mara, Kaldia, Tihu, Burhadia, Pagladia, Nona and Puthimari River. The whole drainage of the district ultimately finds its way to all rivers and tributaries.

Assam state comprises of two main river valleys. The northern valley is known as the Brahmaputra valley and the southern valley is known as Barak valley. Baksa district falls in the Brahmaputra valley which is an alluvial plain in between the foot hills of Bhutan ranges and other hill tracts, on North and central ranges of Naga, Karbi, Khasi, Jaintia, Garo hills etc. This valley approximately covers 56339 sqkm. of riverine area within the strip of both bank of the river, stretching from Sadiya on the east up to Baksa on the West.

The district contains a network of 3 major rivers namely Beki, Pagladia, and Barnadi and around 10 small rivers which are very active during the summer season. There are numerous springs and streams which are a good source of water for household use and small scale irrigation. The district is endowed with large number of Dongs (Natural Depressions) where water remains stagnant for a large part (around 8 months) of the year. Farming community is using dong water for irrigation of their crops since long. The ground water is good and remains at about 25 to 45 feet during winter. Utilization of this water resource in the foothill region during winter is a problem since soil is shallow.

The district is primarily rainfed. Out of the gross cropped area of **164862** ha, the extent of irrigated land is only **22,043** ha, i.e. 13.37% of total cropped area. Considering the block-wise data, percentage of gross irrigated land to gross cropped area is maximum in Goreswar block, followed by Tamulpur block, i.e 21.0% and 20.8% respectively.

A total of **1,42,819** ha of area is under rainfed cultivation. While comparing the ratio of area under rainfed cultivation to gross cropped area in each block, Dhamdhama block comes at the top position with 90.35% (gross cropped area of 21146 ha) under rainfed irrigation, followed closely by Baska block with 90.34% area under rainfed cultivation (gross cropped area of 21085 ha). The area under partial irrigation has been reported to be zero across all the blocks the district.

DRAFT

Table No. 2.3: Irrigation Based Classification (Undivided Baksa District)

Block	Irrigated (Area in Ha)		Rainfed (Area in Ha)	
	Gross Irrigated Area	Net Irrigated Area	Partial /Protective Irrigation	Un- Irrigated or Totally Rainfed
Baksa	2,037.00	1,767.00	-	19,048.00
Tihu- Barama	2,096.00	1,812.00	-	19,066.00
Tamulpur	4,756.00	3,388.00	-	18,099.00

8. Surface and Groundwater scenario of the district:

Number of perennial streams flow through the district from north to south and join the Brahmaputra River. The major streams that drain the area are Mara Manas, Palla, Po-Mara, Kaldia, Tihu, Burhadia, Pagladia, Nona and Puthimari River. The whole drainage of the district ultimately finds its way to all rivers and tributaries.

Assam state comprises of two main river valleys. The northern valley is known as the Brahmaputra valley and the southern valley is known as Barak valley. Baksa district falls in the Brahmaputra valley which is an alluvial plain in between the foot hills of Bhutan ranges and other hill tracts, on North and central ranges of Naga, Karbi, Khasi, Jaintia, Garo hills etc. This valley approximately covers 56339 sqkm. of riverine area within the strip of both bank of the river, stretching from Sadiya on the east up to Baksa on the West.

The district contains a network of 3 major rivers namely Beki, Pagladia, and Barnadi and around 10 small rivers which are very active during the summer season. There are numerous springs and streams which are a good source of water for household use and small scale irrigation. The district is endowed with large number of Dongs (Natural Depressions) where water remains stagnant for a large part (around 8 months) of the year. Farming community is using dong water for irrigation of their crops since long. The ground water is good and remains at about 25 to 45 feet during winter. Utilization of this water resource in the foothill region during winter is a problem since soil is shallow.

The ground water conditions in the district can be described under two distinct hydrogeological units, i.e. conditions prevailing in the semi-consolidated formations and conditions prevailing in the unconsolidated formations.

I) Semi-Consolidated Formations: A very narrow belt of Upper Tertiary semi consolidated rock formation engulf the northern fringe area of the district with Bhutan consisting mainly claystone/siltstone/sandstone and form low to moderate altitude denudation structural hills. The trend of hills is generally in E-W direction. These are characterized by high run off, low infiltration to groundwater and experience secondary porosity development through cracks/joints/bedding planes. Springs are developed in this belt.

DRAFT

II) Unconsolidated Formations: Major parts of the district are underlain by unconsolidated formations represented by the alluvial deposits of Recent age. Bhabar formation comprises of the alluvial sediments at the foothill belt in the north and the valley covering the central and southern part. The behaviour of ground water in the piedmont sediments is naturally different from that in the alluvial areas occurring further south.

Bhabar- Terai Belt: This zone consists of the terrace deposits in the foot hill regions of the Himalayas composed of talus fans. The material is a heterogeneous admixture of boulders, pebbles, cobbles with the interstices filled by sand and silt. These sediments are highly permeable with low retentive capacity. Thus, the streams in this region are devoid of any appreciable surface flow, although, there are evidences of sub- surface flow. Behaviour of ground water in the further south is less erratic. Here, ground water occurs under water table conditions. The depth to water level is rather high.

Older Alluvium: Ground water occurs under water table conditions in the elevated flat-topped areas of Older alluvial sediments. These areas are usually forested. It comprises of sand, gravel and silt with higher proportion of clay. Ground water occurs under unconfined to confined conditions.

Newer Alluvium: The district is mostly covered by Newer alluvium and the formation comprises of sand, gravel and pebble with silt and clay. Ground water in this zone occurs under unconfined condition. Based on the behaviour and occurrence of ground water, the regional ground water flow system of district has been described under following categories.

i. Shallow Aquifer Group occurring within 50 m depth.
i. Deeper Aquifer Group beyond the depth of 50 m and down to 200 m bgl.

i. Shallow Aquifer Group: It consists of a mixture of boulder, gravel, sand, silt and clay. The thickness of the aquifer varies from 15 to 40 m. Ground water in this aquifer generally occurs under water table to semi-confined conditions. The pebbles, boulders are restricted mostly to the northern parts of the district. They occur at the depth between GL to 50 m bgl. The development of ground water from this aquifer is done by open well and shallow tube well for both the domestic and irrigation purposes. The water level in the major parts of the district generally lies between 2 to 4 m bgl. The northern most parts occupied by the piedmont zones and the areas adjoining to the border area are having deeper water level. The movement of

ground water is southerly towards Brahmaputra River. The water table contour follows the topography of the area and lies more or less parallel to the Brahmaputra River. The hydraulic gradient becomes gentler towards south.

ii. Deeper Aquifer Group: It consists of coarse to medium sand with intercalation of clay. Ground water occurs under water table to confined conditions. Detailed hydrogeological surveys aided by exploratory drilling revealed the existence of two to three promising aquifer zones down to the depth of maximum 200 m bgl. Aquifer displays various degree of lateral and vertical variation of aquifer indicating various degree of depositional environment both in space and 4 times. The piezometric surface is highly variable and the movement of ground water is towards the south.

DRAFT

8. Rainfall of the district and climatic condition

The climate of the district is sub-tropical in nature with warm and humid summer followed by cool and dry winter. The average rainfall of the district is found to be 76 mm in the recent years.

YEARS	JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC

Temperature:

The district enjoys a sub-tropical humid climate with a hot summer and moderate winter. January is the coldest month and July/August is the warmest month. The winter temperature drops to 10°C and summer temperature goes up to 35°C. South-West monsoon activates from June and continues up to September-October.

Climatic condition

The climate of the district is sub - tropical in nature with warm and humid summer followed by dry and cool winter. The average annual rainfall is about 2,200 mm per annum of which 70parcent is received during monsoon season (June to September). The rainfall is not uniform rather erratic. The mean maximum and minimum temperature varies from 33 to 38° C and 8 to 10°C respectively. The relative humidity varies from 65 - 90 per cent. The sky remains cloudy during June to September. The light and sun shine hour is the highest during March – April.

9. Details of the mining leases in the district as per the following:

20. Details of Eco-Sensitive Area, if any, in the District

(TO BE UPDATED AFTER FIELD SURVEY)

DRAFT

21. Impact on the Environment due to mining activity

The demand for sand and gravel continues to increase for the construction of roads and buildings. The impact of mining on environment can occur at local, regional, and global scales through direct and indirect mining practices. Impact on Environment due to mining activities varies based on amount of production rate. Mining can cause erosion, sinkholes, loss of biodiversity, or the contamination of soil, groundwater, and surface water by chemicals emitted from mining processes. These processes also affect the atmosphere through carbon emissions which contributes to climate change. The different activities involved before & during mining can impact the environment. The high growth in population speeds- up economic activities. Meanwhile, it also deteriorates environment as for the high level of economic development, plenty of natural resources are exploited. Similarly, mining activities have considerable impacts on environment.

Excessive instream sand- gravel mining causes the degradation of rivers. Instream mining lowers the stream bottom, which may lead to bank erosion. Depletion of sand in the streambed and along coastal areas causes the deepening of rivers and estuaries, and the enlargement of river mouths and coastal inlets. It may also lead to saline- water intrusion from the nearby sea. The effect of mining is compounded by the effect of sea level rise. Any volume of sand exported from streambeds and coastal areas is a loss to the system.

Excessive instream sand mining is a threat to bridges, river banks and nearby structures. Sand mining also affects the adjoining groundwater system and the uses that local people make of the river. River bed mining impacts include bed degradation, bed coarsening, lowered water tables near the streambed, and channel instability. These physical impacts cause degradation of riparian and aquatic biota and may lead to the undermining of bridges and other structures. Continued extraction may also cause the entire streambed to degrade to the depth of excavation. River bed mining can have other costly effects beyond the immediate mine sites. Many hectares of fertile streamside land are lost annually, as well as valuable timber resources and wildlife habitats in the riparian areas. Degraded stream habitats result in loss of fisheries productivity, biodiversity, and recreational potential. Severely degraded channels may lower land and aesthetic values.

DRAFT

Native species in streams are uniquely adapted to the habitat conditions that existed before humans began large-scale alterations. These have caused major habitat disruptions that favored some species over others and caused overall declines in biological diversity and productivity. In most streams and rivers, habitat quality is strongly linked to the stability of channel bed and banks. Unstable stream channels are inhospitable to most aquatic species. Sand mining generates extra vehicle traffic, which negatively impairs the environment. Where access roads cross riparian areas, the local environment may be impacted.

Degradation of land is one of the significant impacts arising out of mining and quarrying activity which is mainly in the form of alternation of land structure due to excavation, stacking of top soil and loss of the land due to dumping of mine waste and overburden soil. Stone and sand quarrying causes damage to property, depletion of ground water, loss of fertile top soil, degradation of forest land, adverse effect on the biodiversity and public health.

Mining and quarrying, either open cast or underground, destroys landscape and forest ecosystems. Air pollution, due to dust from the mines, is a common environmental problem in mines and quarries especially open cast operations.

Immediate impact of stone quarrying is land degradation. It causes landscape alternation due to excavation, water induced soil erosion due to surface runoff water in quarrying site, dumping of waste rock causes loss of land or generation of waste land, over burned soil etc. Soil erosion and soil contamination are common in quarrying sites. In current study area, in many places waste land were generated due to stone quarrying activities. Waste stones are dumped in many places causes blockage of drainage channels. In many sites of the quarry area waste water were stored. This decrease aesthetic value of the site. In many areas, plants are unable to grow and some land completely lost their ability for cultivation because of soil contamination by stone quarrying activities.

Noise pollution occurs due to blasting operation in quarry, noise emitted by stone crusher and transport of stone material by truck, dumper, tractor etc. Loss of peace, fear due to loud noise and vibration, increased heart beat, headache, development of cracks on houses etc. are various effects of quarrying related noise pollution. Stone quarrying activities also goes during night. Stone quarrying occupation is not a suitable alternative livelihood like agriculture, service, business etc.

DRAFT

because of its uncertainty nature. Massive transport of truck and dumper are not safe and there is always chance of accident. Due to short time, seasonal and uncertainty nature, it is not possible to formulate any future planning for employment generation in this field.

Noise pollution is associated with many types of equipment used in mining operations, but blasting is considered as the major source. It also affects stability of infrastructures, building and houses of people living near to these working sites. In this regard, noise pollution may include noise from vehicle engines, power generation, and other sources. Mining operations impact the environment in several ways, and water pollution is a major concern in such operations. For instance quarry dust can change the chemistry of water resources by dissolving in them, it can also settle in water bodies and cause pollution. Furthermore, these operations disrupt the existing movement of surface water and groundwater; they interrupt natural water recharge and can lead to reduced quantity and quality of drinking water for residents and wildlife near or down streams from a quarry site.

As far as impact on surface water is concerned, during mining and transportation, the chances of contamination of surface water resources (pond, well etc.) with dust or by other means.

The labourers working in stone mining come from nearby districts and colonies in the surrounding areas with inadequate facilities for waste disposal. This, in due course, leads to disposal of various things into surface water bodies which in due course of time results into surface water contamination through misuse/mismanagement and decomposition of the trash.

DRAFT

22. Remedial Measures to mitigate the impact of mining on the Environment

Recommendation 1	**Recognise sand as a strategic resource** that delivers critical ecosystem services and underpins the construction of vital infrastructure in expanding towns and cities globally.
Recommendation 2	**Include place-based perspectives for just sand transitions,** ensuring the voices of all impacted people are part of decision-making, agenda-setting and action.
Recommendation 3	**Enable a paradigm shift to a regenerative and circular future.**
Recommendation 4	**Adopt strategic and integrated policy and legal frameworks** horizontally, vertically and intersectionally, in tune with local, national, and regional realities.
Recommendation 5	**Establish ownership and access to sand resources** through mineral rights and consenting.
Recommendation 6	**Map, monitor and report sand resources** for transparent, science-based and data-driven decision-making.
Recommendation 7	**Establish best practices and national standards, and a coherent international framework**
Recommendation 8	**Promote resource efficiency & circularity** by reducing the use of sand, substituting with viable alternatives and recycling products made of sand when possible.
Recommendation 9	**Source responsibly** by actively and consciously procuring sand in an ethical, sustainable, and socially conscious way.
Recommendation 10	**Restore ecosystems and compensate for remaining losses** by advancing knowledge, mainstreaming the mitigation hierarchy, and promoting nature-based solutions.

DRAFT

23. Reclamation of Mined out area

Reclamation entails the re- establishing of viable soils and vegetation at a mine site. Although regulatory agencies may require complex reclamation designs, simple approaches can be very effective. One simple approach depends on adding lime or other materials that will neutralize acidity plus a cover of top soil or suitable growth medium to promote vegetation growth. Modifying slopes and other surfaces and planting vegetation as part of the process stabilizes the soil material and prevents erosion and surface water infiltration. Even this simple approach is likely to cost a few thousand dollars per acre to implement. Where soils have a sustained high acidity, the costs of using this approach can increase, sometimes to tens of thousands of dollars per acre. The challenge to find cost-effective reclamation approaches continues.

Promising reclamation options in the future may include using sludge, "biosolids," from municipal waste water treatment processes as an organic soil amendment, and growing plant species that are more tolerant of acidic conditions.

Soil Treatment

High levels of metals in soils, not just acidity, can be harmful to plants, animals, and, in some cases, people. A common to specially designed repositories. This approach can be very expensive and controversial, but it is sometimes required. With this approach, the volume and toxicity of the soil is not reduced, the soil is just relocated. Effective soil treatment approaches in the future depend upon better understanding of the risks associated with metals in mine wastes. These "natural" metals in minerals may not be as readily available in the biosphere, and therefore, they may not be as toxic as the metals in processed forms, such as lead in gasoline.

Future approaches may include:

- Using chemical methods to stabilize metals in soils, making them less mobile and biologically available.
- Using bacteriacides that stop the bacterial growth that promotes the oxidation of pyrite and the accompanying formation of sulfuric acid.

- Using bioliners, such as low permeability and compacted manure, as barriers at the base of waste piles.
- Permanently flooding waste materials containing pyrite to cut off the source of oxygen, stop the development of acidic conditions, and prevent mobilization of metals.

Water Treatment

The most common treatment for acidic and metal-bearing waters is the addition of a neutralizing material, such as lime, to reduce the acidity. This "active" treatment process, which causes the dissolved metals to precipitate from the water, usually requires the construction of a treatment facility. The ongoing maintenance that such a plant requires makes this treatment technique very expensive.

Aside from the expense, some active treatment plants generate large amounts of sludge. Disposal of the sludge is a major problem. Because of the cost and the physical challenges of dealing with sludge, alternatives to active treatment facilities are needed. Some possible alternatives include:

- Using "passive" wetland systems to treat metal-bearing water. This approach has been successfully used where the volumes and acidity of the water are not too great. Passive wetland systems have the added advantage of creating desirable wildlife habitat.
- Using in-situ treatment zones where reactive materials or electric currents are placed in the subsurface so that water passing through them would be treated.
- Combining treatment with the recovery of useful materials from contaminated water.

24. Risk Assessment & Disaster Management Plan

(TO BE UPDATED AFTER FIELD SURVEY)

DRAFT

25. Details of the Occupational Health issues in the District

The negative impacts of dust pollution due to quarrying activities on health revealed by respondent information were respiratory problem, eye infection, cough, sneezing, allergy , chest pain , headache , accumulation of dust on home , and slow growth of fodder for cattle and goats. Negative effects of dust pollution on crop productivity. Two major effects were reduction of agricultural yield due to deposition of dust on crop and secondly availability of ground water and water contamination. Another problem we noticed through interview was many agricultural labour were faced difficulty to work in dusty environment therefore resulting in reduction of agricultural yield indirectly. Many fruit trees also affected by dust pollution resulting in stunted growth and decreased fruit yields. There are also reductions in appearance of insect pollination like butterflies, bees, moths etc. due to dust pollution.

26. Plantation and Green Belt development in respect of leases already granted in the District

Protect natural or semi- natural environments:

- Improve air quality with inurban areas
- Protect the unique character of rural communities that might otherwise be absorbed by expanding suburbs.
- Plants that grow fast should be preferred
- Preference for high canopy covers plants with local varieties
- Perennial and evergreen plants should be preferred
- Plants having a high Air pollution Tolerance Index (APTI) should be preferred.

Greenbelt Development & Plantation Programme

Plantation should be developed at 2**M**x2**M** spacing, the rate of survival should be aimed at 80% by regular watering & fencing to keep plants safe from animal grazing. Local species will be planted in consultation with local horticulturist. Diseased plants should be replaced by planting new saplings.

Recommendation for green Belt Development

It is strongly recommended to create greenbelt around the project or incase lease failed the authority should take proper action to stop mining operation or Revoke mining permission with necessary action.

9. Whether project area involves shifting of watercourse/road/rail/Transmission line/water pipeline, etc. required?	NO
10. Whether any alternative site(s) examined or part thereof for the non-site-specific component?	Not applicable as the project or activity is site specific
11. Whether there is any Government Order or Policy/ Court order relevant or restricting to the site?	NO
12. Whether there is any litigation pending against the project and/or land in which the project is proposed to be set	NO

project and/or land in which the project is proposed to be set up?	NO
13. Whether the proposal involves violation of Act/Rule/Regulation/Notification of Central/State Government?	NO

Application for ToR (Category A, B1, and B2 Violation)/EC (Category B2) - Form 1

Basic Information

1. Category of the Project/Activity

1.1. Name of the project proposal	Govt. Permit Area of Balti Clay / Silt Mahal	
1.2. Type of Proposal	New	
1.3. Whether the Project Activity (Construction/ Operation) has been undertaken without obtaining **prior** Environmental Clearance under the provision of EIA Notification 1994/ 2006?	No	
1.4. Whether multiple items (Components) as per the notification involved in the proposal?	No	
1.4.1. Item No. as per schedule to EIA Notification, 2006	1(a) Mining of minerals	Non-Coal Mining (Minor Minerals- river bed mining)
Capacity	4.88	Ha
2. Whether project/activity attracts the General Condition specified in the Schedule of EIA Notification?	No	
3. Whether any Protected Areas Notified Under the Wild Life (Protection) Act, 1972 are located within 10 km of the project site	N/A	
4. Whether any Severely Polluted Areas as identified by the CPCB from time to time located in proximity to the project site	No	
5. Whether any Critically Polluted Areas as identified by the CPCB from time to time located in proximity to the project site	N/A	
6. Whether any Notified Eco-Sensitive area notified under Environmental (Protection) Act, 1986 located in proximity to the project site	N/A	
7. Whether any Inter-State Boundaries and International Boundaries located in proximity to the project site	N/A	
8. Whether any Eco-sensitive Zone notified/proposed to be notified under Environment (Protection) Act, 1986 located within 10 km of the project site	No	
9. Whether any forest land present within 10 km of the project site	No	
10. Category of the Project as per EIA Notification, 2006	B2	
10.1. Whether proposal is required to be appraised at Central level?	No	
11. Whether Proposal has interlinked / interdependent projects or activities?	No	
11.1. Reason thereof	NA	

12. Whether any Forest Land involved in the project or part thereof	No
13. Whether NBWL recommendation is required?	No

14. Land Acquisition Details

Type of Land	In case of non-forest land, please specify	Type of privately owned land	Type of land in terms of ownership	Supporting documents			Status of Land Acquisition
				Document Name	Remarks	Document	

Project Details

14. Details of CTE

14.1. Whether consent under Air & Water Act has been obtained from SPCB / UTPCC?	No
14.1.1. Reason thereof	NA
15. Whether the project/activity located in Notified Industrial Area?	No
16. Whether the project/activity located in CRZ or ICRZ area?	No
17. Whether the project proposed to be located in Territorial waters (Off-shore)	No
18. Whether project/activity attracts the Specific Condition specified in the Schedule of EIA Notification?	No

Product Details

19. Details of Products & By-products

Name of Product	Product / By Product	Quantity / Capacity	Unit	Mode of Transport / Transmission	Remarks
Clay/Silt	Product	141.14	Cubic Meter per Day	Road	NA

20. Whether any other Environmental Sensitive area exists within 10 Km from the project/activity boundary?	No

Note : Others, interalia, includes areas protected under international conventions/ Area important or sensitive ecological reasons/ Sensitive species of flora or fauna/ Inland or coastal/Tourist places/ Defence installations / Densely populated areas/ Areas containing important, high quality, or scarce resources/ Areas susceptible to natural Hazards

21. Status of collection of baseline data	Not required as the proposal is under B2 category

Consultant Details

24. Whether QCI/NABET Accredited EIA Consultant

24. Whether QCI/NABET Accredited EIA Consultant engaged?	No
24.1. Reason for not engaging the Consultant	Proposal is under B2 category

Application for ToR (Category A, B1, and B2 Violation)/EC (Category B2) - Form 1

Project Details

1. Introduction of Project or Activity

1.1. Need for the project or activity and its importance to the country/region	Will generate employment and fulfill the demand of minerals in the region
1.2. Demand - Supply Gap and Domestic and export markets, if any	Domestic

2. Social Infrastructure

2.1. Readily available	NA
2.2. Proposed to be developed	NA

3. Connectivity to the project or activity

3.1. Nearest railway station and its distance (in Km)	Khoirabari	20.5
3.2. Nearest Airport and its distance (in Km)	LGB, Guwahati	64.5
3.3. Nearest Town/City/District head quarter and its distance (in Km)	Baksa	28.0
4. Soil classification	U.S.F. Land	
5. Distance from the HFL of the river in m, if any	0	

6. Benefits of the project

6.1. Social benefits of project or activity	Generate employment
6.2. Financial benefits of project or activity	Economic upliftment of surrounding area

7. Project/ Activity Construction Status	To be Started
7.1. Likely date of start of construction activity (start of mining operations in case of mining proposals)	14/12/2023
7.2. Likely date of completion of construction activity (end of mining operations in case of mining proposals)	29/11/2029

Resource Utilization

8. Use of resources for construction or operation of the project

8.1. Whether requirement of water involved in the project?	No
8.2. Whether requirement of Minerals and/or fuels involved in the project?	No
8.3. Construction material	No
8.4. Timber	No

8.5. Electric Power:	No
8.6. Whether any other natural resources / other raw materials required?:	No
8.7. Whether any use of substances or materials, which are hazardous (as per MSIHC rules) to human health or the environment (flora, fauna, and water supplies) required?	No
8.8. Whether any resource efficiency / optimization / recycling and reuse envisaged in the project?	No

Physical Changes

9. Construction, operation or decommissioning of the Project involving actions, which will cause physical changes in the locality:

9.1. Whether any permanent or temporary change in land use, land cover or topography due to project activity?	No
9.2. Whether any clearance of existing vegetation due to project activity?	No
9.3. Whether any loss of native species or genetic diversity?	No
9.4. Whether any demolition works involved in project activity?	No
9.5. Whether any linear structures proposed for diversion or demolition due to project activity? (e.g. roads, transmission lines, rail line, pipeline, conveyor, etc.)	No
9.6. Whether any closure or diversion of existing transport routes or infrastructure due to project leading to changes in traffic movements?	No
9.7. Whether any closure or diversion of water bodies present in project area or realignment of water courses passing through project area?	No
9.8. Whether any dismantling or decommissioning or restoration works or reclamation works (Long-term/ short-term)?	No
9.9. Whether any construction works for temporary use for project activity?	No
9.10. Whether any cut and fill excavations proposed for the project activity?	No
9.11. Whether any underground works including tunnelling?	No
9.12. Whether any dredging involved in project?	No

9.13. Whether any offshore structures involved in project?	No
9.14. Whether any new road, rail, sea, airports, helipad, etc. during construction or operation?	No
9.15. Whether any construction of new linear structures? (e.g. transmission lines, pipelines, etc.)	No
9.16. Whether any Facilities for storage of goods or raw materials?	No
9.17. Whether any Facilities for long term/ permanent housing of operational workers/ staff?	No
9.18. Whether any Impoundment, damming, culverting, realignment or other changes to the hydrology of watercourses or aquifers?	No
9.19. Whether any Stream crossings, temporary and permanent?	No
9.20. Whether any Influx of people to an area in either temporarily or permanently?	No
9.21. Whether any other information would like to submit?	No

Pollution Details

10. Release of pollutants to Air and Mitigation measures

10.1. Whether any probable air pollutants generated?	No
10.2. Other information, if any	NA

10.3. Generation of Noise & Vibration and mitigation measures

10.3.1. Whether any probable generation of Noise and vibration from the proposed project?	No
10.3.2. Whether any probable generation of Light and Heat?	No

10.4. Discharge of pollutants to water and mitigation measures

10.4.1. Whether any probable water pollutants generated?	No
10.5. Probable sources of water pollutant	No

Details of reuse / recycle of wastewater

Details	Qty / Capacity
10.6. Quantity of waste water generation per day (KLD)	0
10.7. Quantity of treated water proposed to use per day (KLD)	0
10.8. Quantity of treated water proposed to discharge outside the premises (KLD)	0

outside the premises (KLD)	0
10.9. Purpose for which treated water is proposed to use	NA
10.10. Whether it is proposed to opt/avail common off-site Sewage Treatment Plant (CSTP)/Effluent Treatment Plant (CETP) facility?	No
10.11. Whether it is proposed to setup on-site Sewage Treatment Plant (STP)/Effluent Treatment Plant (ETP) facility?	No
10.12. Whether the adequacy of the Sewage Treatment Plant (STP) or Effluent Treatment Plant certified by an independent expert?	No
10.12.1. Reasons thereof	NA
10.13. Whether any other mitigation measures proposed?	No
10.14. Whether Dual Plumbing System proposed to be implemented?	No
10.14.1. Reasons thereof	NA
10.15. Whether any discharge of treated effluent involved?	No

Water Requirements

11. Ground water intersection and water conservation measures:

11.1. Whether ground water table intersection involved in the project activities?	No
11.2. Area category from Groundwater availability perspective?	Safe
11.3. Whether Rainwater harvesting proposed	No
11.4. Whether any other water conservation measures proposed?	No
11.5. Whether the ZLD is proposed?	No

2. Greenbelt

12.1. Area proposed for green belt (in Ha)	0
12.2. Width of green belt (in m) along the boundaryof the project or activity	0
12.3. Percentage of the total area covered under green belt	0
12.4. Details of the species proposed for plantation	0
12.5. No. of tree saplings to be planted	158
12.6. Funds allocated for plantation in Lakhs.	0

Waste Generation

13. Production of wastes during construction or operation or decommissioning

13.1. Whether any generation of Solid waste (domestic wastes)?	No
13.2. Whether any generation of plastic waste?	No
13.3. Whether any generation of e-waste?	No
13.4. Whether any generation of batteries waste?	No
13.5. Whether any generation of Bio-medical waste?	No
13.6. Whether any generation of hazardous wastes (as per Hazardous Waste Management Rules)?	No
13.7. Whether any generation of construction or demolition wastes?	No
13.8. Whether any generation of other wastes?	No
13.9. Whether any generation of surplus products?	No
13.10. Whether measures for waste minimization proposed?	No

Risk Assessment

14. Whether any risks associated with project activities which could affect human health or the environment, -

14.1. From explosions, spillages, fires etc. from storage, handling, use or production of hazardous substances?	No
14.2. From any other causes?	No
14.3. Could the project be affected by natural disasters causing environmental damage (e.g. floods, earthquakes, landslides, cloudburst etc)?	No
14.4. Changes in occurrence of disease or affect disease vectors (e.g. insect or water borne diseases)	No
14.5. Could project adversely affect the wellbeing of people in project area e.g. by changing living conditions?	No
14.6. Vulnerable groups of people who could be adversely affected by the project e.g. hospital patients, children, the elderly etc.	No
14.6.1. Has cumulative risk assessment been performed?	N/A
14.7. Whether any likely impacts of the proposed activity on the existing facilities adjacent to the proposed site due to generation of dust, smoke, odorous fumes or other hazardous gases?	No

15. Factors which should be considered (such as consequential development) which could lead to environmental effects or the potential for cumulative impacts with other existing or planned activities in the locality	
15.1. Whether lead to development of supportive facilities, ancillary development or development stimulated by the project which could have impact on the environment e.g.: Supportive infrastructure (roads, power supply, waste or waste water treatment, etc.); housing development; industries in supply chain and downstream; any other?	No
15.2. Whether lead to after-use of the site, which could have an impact on the environment? (e.g. mine void, dump sites, etc.)	No
15.3. Whether set a precedent for later developments?	No
15.4. Have cumulative effects due to proximity to other existing or planned projects with similar effects?	No
15.5. Whether lead to growth of alien species, if any?	No
15.6. Is there any threat of the project to the biodiversity (including displacement of fauna-both terrestrial and aquatic and avi-fauna or creation of barriers for their movement)?	No
15.7. Will the proposed project in any way result in the obstruction of a view, scenic amenity or landscapes?	No
15.8. Is there any impact on anthropological or archaeological sites or any important site feature in the vicinity of the proposed site have been considered?	No
15.9. Will the proposed project result in any changes to the demographic structure of local population?	No
15.10. Will the project cause adverse effect on local communities, disturbance to sacred sites or other cultural values?	No

6. Mining Proposals

16.1. Details of Letter of Intent (LoI) / Vesting order / Mining Lease

16.1.1. Date of issue of LoI/Vesting order/Minning Lease	29/11/2022
16.1.2. Validity of the LoI/Vesting order	29/11/2029
16.1.3. Lease Period	07/00
16.1.4. Date of expiry of lease	29/11/2029
16.1.5. Lease area (in Ha) as per LoI/Vesting order/Mining Lease	4.88
16.1.6. Production capacity (in MTPA) as per LoI / Vesting Order / Mining lease, if any prescribed	0.0850
16.1.7. Details of Lease renewal(s), if any	NA
16.1.8. Other information, if any	NA

16.1. Status of approval of Mining plan	Approved

17. Minerals to be mined

Name of Mineral	Classification	Production Capacity	Remarks
Clay/Silt	Minor	0.085	NA

18. Details of Total excavation (RoM) including Topsoil, Overburden, Mining waste, Rejects, etc.

18.1. Total excavation in MTPA	0.085
18.2. Total Excavation in M.Cu.m/Annum	0.0352
18.3. Enter stripping Ratio	00:00
18.4. Other information, if any	NA

19. Mineral Reserves

Name of Mineral	Proved Reserves	Indicated Reserves	Inferred Reserves	Mineable Reserves	Remarks
Clay/Silt	0.3448	0.3448	0.3448	0.4251	

20. Life of Mine (Years)

20.1. Life of the mine as per approved mining plan	05/00
20.2. Life of the mine as per total estimated reserves, if any	05/00
20.3. Other information, if any	NA

21. Type and method of Mining Method

21.1. Type of mining	Opencast
21.2. Method of mining	Manual
21.3. Other information, if any	NA

22. Type of blasting, if any, to be adopted

22.1. Type of blasting	NA
22.2. Mitigation measures for control of blast induced vibrations	NA
22.3. Other information, if any	NA

23. Whether it is proposed to install beneficiation plant/Coal washery within the mining lease area?	No

24. Whether it is proposed to install crusher within the	No

mining lease area?	No

25. Dumping strategy

Description	Area in Ha	Maximum height in m	Remarks
External dump	0	0	NA
Internal dump	0	0	NA
Topsoil dump/ storage	0	0	NA

26. Topsoil management

26.1. Total Topsoil excavated during the entire life of the mine (in Million Cubic Meter)	0
26.2. Utilization strategy of topsoil	NA
26.3. Other information, if any	NA

27. Details of the Quarry/Mine Pit

27.1. Total Quarry Area (Ha)	4.88
27.2. Enter Area of final void (in Hectare)	0
27.3. Maximum Depth of final void (in meter)	0
27.4. Other information, if any	NA

28. Details of Transportation

28.1. Mode of transportation upto pit head	Manual
28.2. Mode of transportation from pit head to siding/loading	Manual
28.3. Mode of transport from loading point to consumers	Trucks/Dumpers
28.4. Other information, if any	NA

29. Details of reclamation/post mining land use

29.1. Plantation area (ha)	0
29.2. Water body in Ha	4.88
29.3. Public use in Ha	0
29.4. Enter Other uses in Ha	0

30. Details of DSR; Cluster and Replenishment study

30.1. Whether approved DSR available	No
30.2. Whether the instant proposal is part of cluster	No

30.1. Whether road/river /seasonal nallah /irrigation canal passes through project site

Reason thereof (No Object	Reason

S.No.	Type of Road/Waterway	Any diversion is proposed	No Object Certificate obtained	Application for NOC has been submitted	NOC from the concerned department or authority	Proof of application for NOC	Object Certificate obtained - Not Applicable)	Reason thereof (NOC has not been submitted)

Enclosures

24. Layout Plan showing the components of the project and green belt proposed; general location and specific location of the project along with coordinates	Toposheet & Google Map.pdf
25. Upload copy of Replenishment Study Report & Baseline Survey data	Replenishment.pdf Preview
26. Letter of Intent / Mining Lease	LOI.pdf
27. Upload copy of District Survey Report	NOT APPLICABLE.pdf
28. Schematic representation of the feasibility drawings which give information for EIA purpose	KeyMap.pdf

8. Additional Information

S. No.	Document Name	Remark	Document
1	Toposheet & Google Map	NA	Toposheet & Google Map.pdf
2	Mining Plan	NA	Mining Plan.pdf
3	Mining Plan Approval Letter	NA	Mining Plan Approval Letter.pdf
4	LOI	NA	LOI.pdf
5	KeyMap	NA	KeyMap.pdf
6	DFO Letter	NA	DFO Letter.pdf
7	Cover letter	NA	Cover letter.pdf

Undertaking

19. ☑ I hereby give undertaking that the data and information given in the application and enclosures are true to be best of my knowledge and belief and I am aware that if any part of the data and information is found to be false or misleading at any stage, the project will be rejected and clearance given if any to the project will be revoked at our risk and cost. In addition to the above, I hearby give undertaking that no activity/construction/expansion has been taken up

19.1. Name	PRABODH KUMAR BRAHMA
19.2. Designation	Proprietor
19.3. Company	BAKSA FOREST DIVISION MUSHALPUR
19.4. Address	vill: Mushalpur, Po: Mushalpur, Ps, Mushalpur,
19.5. Date	14/12/2023

Government of India
Ministry of Environment, Forest and Climate Change
(Issued by the State Environment Impact Assessment Authority (SEIAA), ASSAM)
***

Minutes of 11th Meeting of SEIAA, Assam State Environment Impact Assessment Authority meeting held from 06/04/2024 to 06/04/2024

Date: 19/04/2024

MoM ID: EC/MOM/SEIAA/368103/4/2024

Agenda ID: EC/AGENDA/SEIAA/368103/4/2024

Meeting Venue: Office of the Chief Engineer, PWD (EAP), Fatashil Ambari

Meeting Mode: Physical

Date & Time:

06/04/2024	11:00 AM	04:00 PM

1. Opening remarks

The Member Secretary, SEIAA welcomed the Chairman, SEIAA and the Member of regulatory body. She briefed the house about the agenda for the meeting for deliberation and to expedite disposal of the recommended proposals by SEAC, Assam.

2. Confirmation of the minutes of previous meeting

As per the agenda, the regulatory body duly reviewed the Minutes of the Meetings held on 22nd March'2024.

3. Details of proposals considered by the committee

Day 1 -06/04/2024

3.1. Agenda Item No 1:

3.1.1. Details of the proposal

Pachim Dairong and Pub Jira Sand Mining Permit Area by **YFC-TTC(JV)** located at **GOALPARA,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/454836/2023	SEIAA.3649/2024	08/12/2023	Mining of minerals (1(a))

3.1.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :30/01/2024

Deliberations of SEAC 1 :

Due discussions and deliberations is held by the SEAC. The Committee after having been satisfied with the documents as furnished from the competent authority and after due deliberation and appraisal is pleased to recommend for grant of the EC by the SEIAA for a recommended quantity of of **66,720** cu m Sand- Gravel in **2 (two)** years as per the approved Mining Plan (**@ 33,360** cum **Sand,** annually**)**. This is subject to the conditions that the project Proponent shall have to strictly follow all the terms and conditions laid down in the approved mining plan and also with the conditions that: (a) mining shall be confined and limited to the area falling within GPS coordinates; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials and (c)the Proponent is permitted to extract the approved quantity of river bed Sand with maximum mining depth of up to 2(two) mtrs from the non-mined surface.

3.1.3. Deliberations by the SEIAA in current meetings

The proposal is reverted back to the SEAC for clarification and confirmation of the existing Zira grant bridge along with no mining zone and photograph.

3.1.4. Recommendation of SEIAA

Refer-Back to SEAC for Reconsideration

3.2. Agenda Item No 2:

3.2.1. Details of the proposal

2.97 Ha Gomari Nala Sand, Gravel & Boulder Mining Permit Area by **PRANJAL ROY** located at **LAKHIMPUR,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/455966/2023	SEIAA3646/2024	18/12/2023	Mining of minerals (1(a))

3.2.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :30/01/2024

Deliberations of SEAC 1 :

Due discussions and deliberations is held by the SEAC. The Committee after having been satisfied with the documents as furnished from the competent authority and after due deliberation and appraisal is pleased to recommend for grant of the EC by the SEIAA for a quantity of recommended quantity of **12,704** cu m Sand; **15,761** cu m Gravel and **15,475** cu m Boulder in **2 (two)** years as per the approved Mining Plan (**@** 6,350 cum **Sand;** 7,880 cu m **Gravel** and 7,735 cu m **Stone,** annually**)**.This is subject to the conditions that the project Proponent shall have to strictly follow all the terms and conditions laid down in the approved mining plan and also with the conditions that: (a) mining shall be confined and limited to the area falling within GPS coordinates; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials and (c)the Proponent is permitted to extract the approved quantity of river bed Sand with maximum mining depth of up to 2(two) mtrs from the non-mined surface.

3.2.3. Deliberations by the SEIAA in current meetings

The approach road to the proposed mining site from the nearest road need to be properly shown in the map.

3.2.4. Recommendation of SEIAA

Deferred for ADS

3.3. Agenda Item No 3:

3.3.1. Details of the proposal

Choraikhosra P.P. Land Sand & Stone Mining Permit Area by **LACHIT BRAHMA** located at **CHIRANG,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/455533/2023	SEIAA.3666/2024	14/12/2023	Mining of minerals (1(a))

3.3.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :23/02/2024

Deliberations of SEAC 1 :

iscussions and deliberations is held.

Committee after due deliberation and appraisal is of the opinion for allowing extraction of the Minor al for a quantum of**3,958**cum of **Sand** and **356 cu m** of Stone in 1**(one)** Year**.** This is subject to the tions that the proponent shall have to strictly follow all terms and conditions laid down in the approved g plan and also subject to the conditions that: (a) mining shall be confined and limited to the plot of area g within the GPS coordinates ; (b) the active bank of the river is not disturbed / damaged because of g operation and transportation of mining materials.

3.3.3. Deliberations by the SEIAA in current meetings

Photograph furnished in the mining plan does not match with google map image enclosed by proposed mine in the KML file.

3.3.4. Recommendation of SEIAA

Deferred for ADS

3.4. Agenda Item No 4:

3.4.1. Details of the proposal

PANCHNOI SAND AND GRAVEL MAHAL NO. 2 by **DIVISIONAL FOREST OFFICER SONITPUR WEST DIVISION** located at **SONITPUR,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/456259/2023	SEIAA.3664/2024	21/12/2023	Mining of minerals (1(a))

3.4.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :23/02/2024

Deliberations of SEAC 1 :

iscussions and deliberations is held.

Committee after due deliberation and appraisal is of the opinion for allowing extraction of the Minor al for a quantum of**1,04,080**cum of **Sand** @ **15,000** cu m and @ **5,000** cu m **Gravel** in **5(five)** Years **ally.** This is subject to the conditions that the proponent shall have to strictly follow all terms and tions laid down in the approved mining plan and also subject to the conditions that: (a) mining shall be ned and limited to the area falling within the revised GPS coordinates ; (b) the active bank of the river is isturbed / damaged because of mining operation and transportation of mining materials and (c)the nent shall extract / the approved quantity of minerals indicated herein with maximum mining depth of up two) meters only from the non-mined surface.

3.4.3. Deliberations by the SEIAA in current meetings

The proposal is reverted back to the SEAC for clarification and confirmation of the some part of one block in shown agriculture land.

3.4.4. Recommendation of SEIAA

Refer-Back to SEAC for Reconsideration

3.5. Agenda Item No 5:

3.5.1. Details of the proposal

Dhamkhunda-Hatibagora Sand Mahal Part-II (Rev. Portion) by **DIVISIONAL FOREST OFFICER** located at **MARIGAON,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/456709/2023	SEIAA 3662/2024	26/12/2023	Mining of minerals (1(a))

3.5.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :23/02/2024

Deliberations of SEAC 1 :

iscussions and deliberations is held.

Committee after due deliberation and appraisal is of the opinion for allowing extraction of the Minor al for a quantum of**25,000**cum of **Sand** @ **12,500** cu m **annually.** This is subject to the conditions that oponent shall have to strictly follow all terms and conditions laid down in the approved mining plan and ubject to the conditions that: (a) mining shall be confined and limited to the area falling within the d GPS coordinates ; (b) the active bank of the river is not disturbed / damaged because of mining tion and transportation of mining materials and (c) the Proponent shall extract / harvest the approved ity of minerals indicated herein with maximum mining depth of up to 2 (two) meters only from the non-l surface.

3.5.3. Deliberations by the SEIAA in current meetings

Mining method is to be opencast and manual but there seems to be no any existing sand bars in the proposed site as seen in the google image. Therefore, it is requested to clarify the mining methodology for the extraction of sand below the river bed.

3.5.4. Recommendation of SEIAA

Deferred for ADS

3.6. Agenda Item No 6:

3.6.1. Details of the proposal

PANCHNOI SANDAND GRAVEL MAHAL NO 1 by **DIVISIONAL FOREST OFFICER SONITPUR WEST DIVISION** located at **SONITPUR,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**

SIA/AS/MIN/456251/2023	SEIAA.3647/2024	21/12/2023	Mining of minerals (1(a))

3.6.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :30/01/2024

Deliberations of SEAC 1 :

Due discussions and deliberations is held by the SEAC.It is stressed upon by the Committee that as a part of the Corporate Environment Responsibility (CER) the Proponent shall under take plantation activities in the nearby Institutions, Public places, Graveyards etc involving local youths, NGOs etc with evergreen species of plants having aesthetic value, medicinal value. Efforts should also be made to label the plant species as far as practicable in Scientific parlance and Vernacular language. The fund so required (2% of the project cost) may be earmarked for the purpose and put at the disposal of the DFO concerned in advance for necessary activity timely in planting season.

The Divisional Forest Officer, Sonitpur West Division shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. Further, DFO is to ensure that mining be allowed only within the approved mining site and not beyond the limit of the same. Accordingly, DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan.

3.6.3. Deliberations by the SEIAA in current meetings

EC is approved for **project area allotted 4.88Ha with a quantity of 1,08,295 cu m Sand- Gravel in 5 (five) years @ 21,659 cum Sand -Gravel annually** subject to the terms and conditions laid down in the approved mining plan and also subject to the following conditions that.

3.6.4. Recommendation of SEIAA

Approved

3.6.5. Details of Environment Conditions

3.6.5.1. Specific

Specific conditions by SEAC	
1.	It is also stressed upon by the Committee that as a part of the Corporate Environment Responsibility (CER) the Proponent shall under take plantation activities in the nearby Institutions, Public places, Graveyards etc involving local youths, NGOs etc with evergreen species of plants having aesthetic value, medicinal value. Efforts should also be made to label the plant species as far as practicable in Scientific parlance and Vernacular language. The fund so required (2% of the project cost) may be earmarked for the purpose and put at the disposal of the DFO concerned in advance for necessary activity timely in planting season. The Divisional Forest Officer, Sonitpur West Division shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. Further, DFO is to ensure

	that mining be allowed only within the approved mining site and not beyond the limit of the same. Accordingly, DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan.
Specific conditions by SEIAA	
1.	• Mining shall be confined and limited to the area falling within the GPS coordinates. • The active bank of the river should not be disturbed / damaged because of mining operation and transportation of mining materials. • The proponent is permitted to extract the approved quantity of Ordinary Clay with maximum mining depth of up to 2 (two) meters only from the non-mined surface. • If DFO himself is the Project Proponent than he shall initiate necessary formalities for transferring the EC to the lessee and apply accordingly to SEIAA as per the EIA Notification, 2006. The mining can only be commence after the approval of transfer of EC by SEIAA. • Proposed lifting of river deposited ordinary sand & gravel would be allowed at least 50m away from the present bank line of river Panchnoi. • The existing water way must not be blocked at any circumstances by the project work. • Lifting of ordinary sand and gravel should be carried out intermittently leaving at least 15m space between two consecutive borrow pits. • No damage should be made to the bank of the river, private properties at any cost. • Cost of any damage to the properties should be borne by the implementing agency as per assessment by this department. • The Authority reserves the right to stop lifting of sand & gravel at any time without any notice thereof. • The lifting of ordinary sand and should not be allowed during flood period. • Forest Royalty and other taxes will be deposited to the concerned department before starting lifting of ordinary sand and gravel.

3.6.5.2. Standard

1(a)	**Mining of minerals**
Air quality monitoring and mitigation measure	
1.	Vehicular emissions shall be kept under control and regularly monitored. All the vehicles engaged in mining and allied activities shall operate only after obtaining ‘PUC’ certificate from the authorized pollution testing centres.
1.	The transportation of materials shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the materials through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.

1.	Major approach roads should be properly maintained with dust suppression measures and the river bank in any case must not be damaged.
1.	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
Corporate Environment Responsibility	
1.	Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
1.	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders.
Land Recalmation	
1.	Native tree species shall be selected and planted over areas affected by subsidence.
Mining Plan	
1.	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.
1.	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.
1.	
1.	Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable.
1.	No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
Miscellaneous	
1.	The above conditions shall be enforced, inter-alia under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986, Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 and the Public Liability Insurance Act, 1991 along with their amendments and Rules and any other orders passed by the Hon'ble Supreme Court of India / High Courts and any other Court of Law relating to the subject matter.
1.	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local

	newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently.
1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
1.	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	Concealing factual data or submission of false/fabricated data may result in revocation of this environmental clearance and attract action under the provisions of Environment (Protection) Act, 1986.
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Regional Office of MoEF & CC shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
Noise and Vibration monitoring and prevention	
1.	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.
Public hearing and Human health issues	
1.	PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius

1.	PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
1.	PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
1.	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
Statutory compliance	
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the Pollution Control Board Assam.
1.	The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC.
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA Notification, 2006 and its amendments therein
Water quality monitoring and mitigation measures	
1.	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
1.	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.
1.	The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.

3.7. Agenda Item No 7:

3.7.1. Details of the proposal

Deulguri P.P. Land Sand Gravel Mining Permit Area by **HARENDRA DAIMARY** located at **CHIRANG,ASSAM**	
Proposal For	Fresh EC

Proposal No	File No	Submission Date	Activity (Schedule Item)
SIA/AS/MIN/454342/2023	SEIAA.3672/2024	05/12/2023	Mining of minerals (1(a))

3.7.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :23/02/2024

Deliberations of SEAC 1 :

iscussions and deliberations is held.

Committee after due deliberation and appraisal is of the opinion for allowing extraction of the Minor al for a quantum of **15,928** cum of **Sand-Gravel** @ **6,125** cu m **Sand** and @ **1,837** cu m **Gravel** for **)** Years, **annually.** This is subject to the conditions that the proponent shall have to strictly follow all and conditions laid down in the approved mining plan and also subject to the conditions that: (a) mining be confined and limited to the area falling within the revised GPS coordinates ; (b) the active bank of the s not disturbed / damaged because of mining operation and transportation of mining materials and (c)the nent shall extract / harvest the approved quantity of minerals indicated herein with maximum mining of up to 2 (two) meters only from the non-mined surface.

3.7.3. Deliberations by the SEIAA in current meetings

EC is approved for **project area allotted 2.04Ha with a quantity of 15,928 cum of Sand-Gravel @ 6,125 cu m Sand and @ 1,837 cu m Gravel for 2(two) years annually** subject to the terms and conditions laid down in the approved mining plan and also subject to the following conditions that.

3.7.4. Recommendation of SEIAA

Approved

3.7.5. Details of Environment Conditions

3.7.5.1. Specific

Specific conditions by SEAC	
1.	i) The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. ii) The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geocoordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan. iii) CSR activities shall be carried out / undertaken by the Proponent and minimum 2% of the total project cost **(Rs 2.00 Lakh)** shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the near by existing school 1 and (one) village with due consultation with the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 2 (two) years of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report.
Specific conditions by SEIAA	

1.	

3.7.5.2. Standard

1(a)	**Mining of minerals**
Air quality monitoring and mitigation measure	
1.	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
1.	Atleast three (3) ambient air quality monitoring stations shall be established in the core zone as well as in the buffer zone for monitoring of pollutants, namely particulates, SO2 and NOx. Location of the stations shall be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive receptors in consultation with the Pollution Control Board, Assam. Online ambient air quality monitoring station/stations may also be installed in addition to the regular air monitoring stations as per the requirement and/or in consultation with the PCBA
1.	Major approach roads should be properly maintained with dust suppression measures and the river bank in any case must not be damaged.
1.	The transportation of materials shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the materials through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.
1.	The transportation of coal shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the coal through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.
1.	Vehicular emissions shall be kept under control and regularly monitored. All the vehicles engaged in mining and allied activities shall operate only after obtaining ‘PUC’ certificate from the authorized pollution testing centres.
Corporate Environment Responsibility	
1.	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders.
1.	Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
1.	Self environmental audit shall be conducted annually.
Land Recalmation	
1.	Native tree species shall be selected and planted over areas affected by subsidence.
Mining Plan	
1.	Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable.

1.	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.
1.	Mining shall be carried out as per the approved mining plan (including Mine Closure Plan) abiding by mining laws and the relevant circulars issued by Directorate General Mines Safety (DGMS).
1.	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.
1.	Mining shall be carried out as per the approved mining plan (including Mine Closure Plan) abiding by mining laws related to coal mining and the relevant circulars issued by Directorate General Mines Safety (DGMS).
1.	No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
Miscellaneous	
1.	The project authorities must strictly adhere to the stipulations made by the Pollution Control Board, Assam and the State Government.
1.	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently.
1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
1.	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	Concealing factual data or submission of false/fabricated data may result in revocation of this environmental clearance and attract action under the provisions of Environment (Protection) Act, 1986.
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities

	should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	The above conditions shall be enforced, inter-alia under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986, Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 and the Public Liability Insurance Act, 1991 along with their amendments and Rules and any other orders passed by the Hon'ble Supreme Court of India / High Courts and any other Court of Law relating to the subject matter.
1.	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours
Noise and Vibration monitoring and prevention	
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the MoEF & CC / RO on six-monthly basis.
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.
1.	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
Public hearing and Human health issues	
1.	PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
1.	PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius
1.	PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
1.	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
Statutory compliance	
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC.
1.	The Environmental clearance shall be subject to orders of Hon’ble Supreme Court of India, Hon’ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention &

	Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the Pollution Control Board, Assam
1.	Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA Notification, 2006 and its amendments therein
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee.
Water quality monitoring and mitigation measures	
1.	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
1.	The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.
1.	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.

Date of SEAC 1 :23/02/2024

Deliberations of SEAC 1 :

The proposal is rejected due to overlapping of proposed mining site with another online proposal SIA/AS/MIN//455587/2023 .

3.8.3. Deliberations by the SEIAA in current meetings

The proposal is rejected due to overlapping of proposed mining site with another online proposal SIA/AS/MIN//455587/2023.

3.8.4. Recommendation of SEIAA

Reject

3.9. Agenda Item No 9:

3.9.1. Details of the proposal

Govt. Permit Area of Balti Clay / Silt Mahal by **BAKSA FOREST DIVISION MUSHALPUR** located at **BAKSA, ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/455587/2023	SEIAA.3659/2024	14/12/2023	Mining of minerals (1(a))

3.9.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :23/02/2024

Deliberations of SEAC 1 :

iscussions and deliberations is held.

ommittee after due deliberation and appraisal is pleased to recommend for grant of the EC by the SEIAA quantity of **1,08, 740** cum of **Clay**@ **54,370** cu m, annually to be extracted in **2 (two) Years**only **as antial quantum of mineral is required for the purposes of construction of a Medical College at ılpur area, subsequently informed by the concerned DFO** subject to the conditions that the proponent ıave to strictly follow all terms and conditions laid down in the approved mining plan and also subject to ɔnditions that: (a) mining shall be confined and limited to the area falling within the revised GPS inates ; (b) the active bank of the river is not disturbed / damaged because of mining operation and ortation of mining materials and (c)the Proponent is permitted to extract the approved quantity of Clay naximum mining depth of up to 2 (two) meters only from the non-mined surface.

3.9.3. Deliberations by the SEIAA in current meetings

EC is approved for **project area allotted 4.88Ha with a quantity of 1,08, 740 cum of Clay for 2 (two) years @ 54,370cu.m annually as substantial quantum of mineral is required for the purposes of construction of a Medical College at Tamulpur area, subsequently informed by the concerned DFO** subject to the terms and conditions laid down in the approved mining plan and also subject to the following conditions that.

3.9.4. Recommendation of SEIAA

Approved

3.9.5. Details of Environment Conditions

3.9.5.1. Specific

Specific condition by SEAC	
1.	i) The DFO shall comply with necessary formalities for transfer of the EC to the lessee with due NOC for filing application to the SEIAA before allowing mining so that the entire accountability in mining is vested on the lessee / Proponent with the same terms and conditions stipulated in the EC as per the EIA Notification, 2006. ii) The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. iii) The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geocoordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan. iv) CSR activities shall be carried out / undertaken by the Proponent and 2% of the total project cost (**Rs 1.48** Lakh) shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the near by existing school 1 and (one) village with due consultation with the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st 2 (two) years of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report. v) Plantation activities shall be carried out / undertaken in any educational institution or Govt lands involving local NGOs, School / College students and an amount **of Rs 5 (Five)** Lakh shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the D]FO and label the plant species for the benefits of the villagers, common people and specially the school students. The recommended species of plants in the locality could be of species like Bakul (*Mimosupselengi*), Agor (*Aquillaria malaccensis*), Amlokhi (*Phyllantus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*), Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*), Mohaneem (*Azedirachta indica*), Jamun (*Syzygium cuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Sewali phul (*Nyctanthes arbor tris tis*), Giloi (*Tinospora cordifoia*),Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*) etc etc. Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.
Specific conditions by SEIAA

3.9.5.2. Standard

1(a)	**Mining of minerals**
Air quality monitoring and mitigation measure	
1.	Atleast 3 (three) ambient air quality monitoring stations shall be established in the core zone as well as in the buffer zone for monitoring of air pollutants. Location of the stations shall be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive receptors in consultation with the Pollution Control Board, Assam. Online ambient air quality monitoring station/stations may also be installed in addition to the regular air monitoring stations as per the requirement and/or in consultation with the PCBA
1.	Major approach roads should be properly maintained with dust suppression measures and the river bank in any case must not be damaged.
1.	The transportation of coal shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the coal through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.

1.	Post environmental closure third party monitoring by reputed instituted in air quality, water, land & soil etc shall be carried out and analysed with EMP measures at regular interval. A suitable recommendation in this regard, shall be furnished to IRO, MoEF&CC for compliance. The data used for analysis shall be obtained from continuos AQMS, site specific water regime. Also third party shall analyses the implementation of river diversion, meeting to the requirement of project report.
1.	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
1.	Vehicular emissions shall be kept under control and regularly monitored. All the vehicles engaged in mining and allied activities shall operate only after obtaining 'PUC' certificate from the authorized pollution testing centres.
1.	The transportation of material shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the material through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.
Corporate Environment Responsibility	
1.	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders.
1.	Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
1.	Self environmental audit shall be conducted annually.
Land Recalmation	
1.	Native tree species shall be selected and planted over areas affected by subsidence.
Mining Plan	
1.	No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
1.	Mining shall be carried out as per the approved mining plan (including Mine Closure Plan) abiding by mining laws and the relevant circulars issued by Directorate General Mines Safety (DGMS).
1.	Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable.
1.	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.
1.	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.
Miscellaneous	
1.	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the

	biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently.
1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
1.	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
1.	The project authorities must strictly adhere to the stipulations made by the Pollution Control Board, Assam and the State Government.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	Concealing factual data or submission of false/fabricated data may result in revocation of this environmental clearance and attract action under the provisions of Environment (Protection) Act, 1986.
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	The above conditions shall be enforced, inter-alia under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986, Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 and the Public Liability Insurance Act, 1991 along with their amendments and Rules and any other orders passed by the Hon'ble Supreme Court of India / High Courts and any other Court of Law relating to the subject matter.
Noise and Vibration monitoring and prevention	
1.	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work

	environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the MoEF & CC/ RO on six-monthly basis.
Public hearing and Human health issues	
1.	PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
1.	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
1.	PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
1.	PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius
Statutory compliance	
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee.
1.	Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA Notification, 2006 and its amendments therein
1.	The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned pollution Control Board, Assam.
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
Water quality monitoring and mitigation measures	
1.	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
1.	The project proponent shall not alter major water channels around the site. Appropriate embankment shall be

	provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.
1.	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.

3.10. Agenda Item No 10:

3.10.1. Details of the proposal

PACHNOI SAND MAHAL NO 3 by **DIVISIONAL FOREST OFFICER SONITPUR WEST DIVISION** located a t **SONITPUR,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/456268/2023	SEIAA 3661/2024	21/12/2023	Mining of minerals (1(a))

3.10.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :23/02/2024

Deliberations of SEAC 1 :

iscussions and deliberations is held.

Committee after due deliberation and appraisal is of the opinion for allowing extraction of the Minor al for a quantum of **1,10.735** cum of **Sand** @ **22,147**cu m in **5 (five)** Years **annually.** This is subject to onditions that the proponent shall have to strictly follow all terms and conditions laid down in the ved mining plan and also subject to the conditions that: (a) mining shall be confined and limited to the alling within the revised GPS coordinates ; (b) the active bank of the river is not disturbed / damaged se of mining operation and transportation of mining materials and (c)the Proponent shall extract / st the approved quantity of minerals indicated herein with maximum mining depth of up to 2 (two) s only from the non-mined surface.

3.10.3. Deliberations by the SEIAA in current meetings

EC is approved for **project area allotted 4.99Ha with a quantity of 1,10,735cum of Sand for 5 (five) Years @ 22,147cu.m for annually** subject to the terms and conditions laid down in the approved mining plan and also subject to the following conditions that.

3.10.4. Recommendation of SEIAA

Approved

3.10.5. Details of Environment Conditions

3.10.5.1. Specific

Specific conditions by SEAC	
1.	i) The DFO shall comply with necessary formalities for transfer of the EC to the lessee with due NOC for filing application to the SEIAA before allowing mining so that the entire accountability in mining is vested on the Lessee / Proponent with the same terms and conditions stipulated in the EC as per the EIA Notification, 2006. ii) The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. iii) The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geocoordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan. iv) CSR activities shall be carried out / undertaken by the Proponent and minimum 2% of the total project cost (**Rs 2.00 lakh)** shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the near by existing school 1 and (one) village with due consultation with the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 2 (two) years of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report. v) Plantation activities shall be carried out / undertaken in any educational institution or Govt lands involving local NGOs, School / College students and an amount of **Rs 5 (Five) Lakh** shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the D]FO and label the plant species for the benefits of the villagers, common people and specially the school students. Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.
Specific conditions by SEIAA	
1.	

3.10.5.2. Standard

1(a)	**Mining of minerals**
Air quality monitoring and mitigation measure	
1.	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
1.	Atleast 3 (three) ambient air quality monitoring stations shall be established in the core zone as well as in the buffer zone for monitoring of air pollutants. Location of the stations shall be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive receptors in consultation with the State Pollution Control Board. Online ambient air quality monitoring station/stations may also be installed in addition to the regular air monitoring stations as per the requirement and/or in consultation with the PCBA
1.	Major approach roads should be properly maintained with dust suppression measures and the river bank in any case must not be damaged.
1.	The transportation of material shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the material through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.

1.	The transportation of coal shall be carried out as per the provisions and route proposed in the approved mining plan. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.
1.	Vehicular emissions shall be kept under control and regularly monitored. All the vehicles engaged in mining and allied activities shall operate only after obtaining 'PUC' certificate from the authorized pollution testing centres.
Corporate Environment Responsibility	
1.	Self environmental audit shall be conducted annually.
1.	Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
1.	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders.
Land Recalmation	
1.	Native tree species shall be selected and planted over areas affected by subsidence.
Mining Plan	
1.	Mining shall be carried out as per the approved mining plan (including Mine Closure Plan) abiding by mining laws and the relevant circulars issued by Directorate General Mines Safety (DGMS).
1.	Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable.
1.	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.
1.	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.
1.	No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
Miscellaneous	
1.	The project authorities must strictly adhere to the stipulations made by the Pollution Control Board, Assam and the State Government.
1.	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently.
1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.

1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
1.	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	Concealing factual data or submission of false/fabricated data may result in revocation of this environmental clearance and attract action under the provisions of Environment (Protection) Act, 1986.
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	The above conditions shall be enforced, inter-alia under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986, Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 and the Public Liability Insurance Act, 1991 along with their amendments and Rules and any other orders passed by the Hon'ble Supreme Court of India / High Courts and any other Court of Law relating to the subject matter.
1.	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours
Noise and Vibration monitoring and prevention	
1.	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the MoEF & CC /RO on six-monthly basis.
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.

Public hearing and Human health issues	
1.	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
1.	PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
1.	PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius
1.	PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
Statutory compliance	
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned Pollution Control Board, Assam..
1.	The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
1.	The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC.
1.	Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA Notification, 2006 and its amendments therein
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee.
Water quality monitoring and mitigation measures	
1.	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
1.	The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.
1.	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.

3.11. Agenda Item No 11:

3.11.1. Details of the proposal

Jora Simolu Sand Mining Permit Unit 2023-25 (Revenue Portion) by **DIVISIONAL FOREST OFFICER NAGA ON SOUTH DIVISION HOJAI** located at **HOJAI,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/458213/2024	SEIAA3645/2024	12/01/2024	Mining of minerals (1(a))

3.11.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :30/01/2024

Deliberations of SEAC 1 :

The Committee, after having been satisfied with the documents as furnished from the competent authority and after due deliberation and appraisal, is pleased to recommend for grant of the EC by the SEIAA for a quantity of **54,880** cum of **Sand** in 2 **(Two)** years @ **27,440** cum per year.

This is subject to the conditions that the PP shall have to strictly follow all the terms and conditions laid down in the approved mining plan and also with the conditions that: (a) mining shall be confined and limited to the area falling within GPS coordinates; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials and (c)the Proponent is permitted to extract the approved quantity of river bed Sand with maximum mining depth of up to 2(two) mtrs from the non-mined surface.

The committee is also of the opinion that necessary formalities for transfer of the EC to be done in the event the mining is not done by the DFO himself as the Project Proponent so that the entire accountability in mining is vested on the lessee / Proponent with the same terms and conditions stipulated in the EC as per the EIA Notification, 2006. Due formalities are required to be completed before allowing mining by the DFO with necessary application for due transfer of the EC to the authorized person/ lessee by the SEIAA.

3.11.3. Deliberations by the SEIAA in current meetings

EC is approved for **project area allotted 4.40Ha and mining area 3.71Ha with a quantity of 54,880 cum of Sand in 2 (Two) years @ 27,440 cum per year** subject to the terms and conditions laid down in the approved mining plan and also subject to the following conditions that.

3.11.4. Recommendation of SEIAA

Approved

3.11.5. Details of Environment Conditions

3.11.5.1. Specific

Specific conditions by SEAC	
1.	This is subject to the conditions that the PP shall have to strictly follow all the terms and conditions laid down in the approved mining plan and also with the conditions that: (a) mining shall be confined and limited to the area falling within GPS coordinates; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials and (c)the Proponent is permitted to extract the approved quantity of river bed Sand with maximum mining depth of up to 2(two) mtrs from the non-mined surface. The committee is also of the opinion that necessary formalities for transfer of the EC to be done in the event the mining is not done by the DFO himself as the Project Proponent so that the entire accountability in mining is vested on the lessee / Proponent with the same terms and conditions stipulated in the EC as per the EIA Notification, 2006. Due formalities are required to be completed before allowing mining by the DFO with necessary application for due transfer of the EC to the authorized person/ lessee by the SEIAA. It is also stressed upon by the Committee that as a part of the Corporate Environment Responsibility (CER) the Proponent shall undertake plantation activities in the nearby Institutions, Public places, Graveyards etc involving local youths, NGOs etc with evergreen species of plants having aesthetic value, medicinal value. Efforts should also be made to label the plant species as far as practicable in Scientific parlance and vernacular language. The fund so required (2% of the project cost) may be earmarked for the purpose and put at the disposal of the DFO concerned in advance for necessary activity timely in planting season. The Divisional Forest Officer, Nagaon South Division shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. Further, DFO is to ensure that mining be allowed only within the approved mining site and not beyond the limit of the same. Accordingly, DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan.
Specific conditions by SEIAA	
1.	

3.11.5.2. Standard

1(a)	**Mining of minerals**
Air quality monitoring and mitigation measure	
1.	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
1.	Adequate ambient air quality monitoring stations shall be established in the core zone as well as in the buffer zone for monitoring of air pollutants. Location of the stations shall be decided based on the meteorological data,

	topographical features and environmentally and ecologically sensitive receptors in consultation with the State Pollution Control Board. Online ambient air quality monitoring station/stations may also be installed in addition to the regular air monitoring stations as per the requirement and/or in consultation with the PCBA
1.	Major approach roads should be properly maintained with dust suppression measures and the river bank in any case must not be damaged.
1.	The transportation of materials shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the materials through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.
1.	Transportation of coal, to the extent if permitted by road, shall be carried out by covered trucks/conveyors. Effective control measures such as regular water sprinkling/rain gun/ Fog cannon /mist sprinkling etc., shall be carried out in critical areas prone to air pollution with higher level of particulate matter all through the coal transport roads, loading/unloading and transfer points. Fugitive dust emissions from all sources shall be controlled regularly. It shall be ensured that the ambient air quality parameters conform to the norms prescribed by the Central/State Pollution Control Board.
1.	Vehicular emissions shall be kept under control and regularly monitored. All the vehicles engaged in mining and allied activities shall operate only after obtaining ‘PUC’ certificate from the authorized pollution testing centres.
Corporate Environment Responsibility	
1.	Self environmental audit shall be conducted annually.
1.	Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
1.	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders.
Land Recalmation	
1.	Native tree species shall be selected and planted over areas affected by subsidence.
Mining Plan	
1.	Mining shall be carried out as per the approved mining plan (including Mine Closure Plan) abiding by mining laws and the relevant circulars issued by Directorate General Mines Safety (DGMS).
1.	Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable.
1.	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.
1.	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.
1.	No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).

Miscellaneous	
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently.
1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
1.	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	Concealing factual data or submission of false/fabricated data may result in revocation of this environmental clearance and attract action under the provisions of Environment (Protection) Act, 1986.
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Regional Office of MoEF & CC shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	The above conditions shall be enforced, inter-alia under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986, Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 and the Public Liability Insurance Act, 1991 along with their amendments and Rules and any other orders passed by the Hon'ble Supreme Court of India / High Courts and any other Court of Law relating to the subject matter.
1.	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours
1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities

	should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
Noise and Vibration monitoring and prevention	
1.	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.
Public hearing and Human health issues	
1.	PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius
1.	PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
1.	PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
1.	Adequate illumination shall be ensured in all mine locations (as per DGMS standards) and monitored.
1.	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
Statutory compliance	
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee.
1.	The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC.
1.	The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
1.	Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA Notification, 2006 and its amendments therein
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the Pollution Control Board, Assam.
Water quality monitoring and mitigation measures	
1.	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out

	once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
1.	The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.
1.	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.

3.12. Agenda Item No 12:

3.12.1. Details of the proposal

PATT LAND ORDINARY EARTH MINING PERMIT AREA AT TIKAR MOUZA by **BISWAJIT DAS** located at **KARIMGANJ,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/451481/2023	SEIAA.3669/2024	01/02/2024	Mining of minerals (1(a))

3.12.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :23/02/2024

Deliberations of SEAC 1 :

iscussions and deliberations is held.

committee after due deliberation and appraisal is of the opinion for allowing extraction of the **Ordinary** for the approved quantum of **60,124** cum in 2**(two)** Years**.** This is subject to the conditions that the nent shall have to strictly follow all terms and conditions laid down in the approved mining plan and also ct to the conditions that: (a) mining shall be confined and limited to the plot of area falling within the coordinates ; (b) mining has to be confined to a maximum depth of 2 (two) metres only from the non l surface area and (c) the area must be covered with shed nets to ensure that there is no dust pollution d the area and Water Canon shall have to be used for spraying water to suppress dust pollution.

3.12.3. Deliberations by the SEIAA in current meetings

a. There is no tree species in the land as mentioned in the letter by ACF Badarpur Circle Karimganj. The google map shows the area is covered by thick forest. As such DFO is requested to submit clarification about type of existing forest/plantation on the proposed site.
b. Legible copy of Jamabandi is to be submitted.
c. Non agriculture land certificate is required from concerned authority.

3.12.4. Recommendation of SEIAA

Deferred for ADS

3.13. Agenda Item No 13:

3.13.1. Details of the proposal

GOVT. PERMIT AREA OF CHII-II MINOR MINERAL UNIT (STONE) by **DFO CACHAR** located at **CACHAR,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/460824/2024	SEIAA.3665/2024	02/02/2024	Mining of minerals (1(a))

3.13.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :23/02/2024

Deliberations of SEAC 1 :

iscussions and deliberations is held.

Committee after due deliberation and appraisal is of the opinion for allowing extraction of the Minor al for a quantum of**58,562**cum of **Stone** @ **29,281** cu m in 2**(two)** Years**annually.** This is subject to the tions that the proponent shall have to strictly follow all terms and conditions laid down in the approved g plan and also subject to the conditions that: (a) mining shall be confined and limited to the area falling n the revised GPS coordinates ; (b) the active bank of the river is not disturbed / damaged because of g operation and transportation of mining materials and (c)the Proponent shall extract / harvest the ved quantity of minerals indicated herein with maximum mining depth of up to 2 (two) meters only from n-mined surface.

3.13.3. Deliberations by the SEIAA in current meetings

A joint verification report in regard of Demarcation is required from both DFO, Cachar and DFO, Dima Hasao.

3.13.4. Recommendation of SEIAA

Deferred for ADS

3.14. Agenda Item No 14:

3.14.1. Details of the proposal

Sand Gravel, Gravel & Sand Aie River Mahal at Dologaon by **MWIKHWM OWARY** located at **CHIRANG,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity**

			(Schedule Item)
SIA/AS/MIN/451492/2023	SEIAA 3670/2024	12/02/2024	Mining of minerals (1(a))

3.14.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :23/02/2024

Deliberations of SEAC 1 :

iscussions and deliberations is held.

Committee after due deliberation and appraisal is of the opinion for allowing extraction of the Minor al for a quantum of**5,999**cum of **Sand** and **4,998 cu m** of **Gravel and 7,000 cu m Sand-Gravel** in **)** Years**.** This is subject to the conditions that the proponent shall have to strictly follow all terms and tions laid down in the approved mining plan and also subject to the conditions that: (a) mining shall be ned and limited to the plot of area falling within the GPS coordinates ; (b) the active bank of the river is sturbed / damaged because of mining operation and transportation of mining materials. materials and Proponent shall extract / harvest the approved quantity of minerals indicated herein with maximum g depth of up to 2 (two) meters only from the non-mined surface.

3.14.3. Deliberations by the SEIAA in current meetings

EC is approved for **project area allotted 2.0Ha with a quantity of 5,999cum of Sand and 4,998 cu m of Gravel and 7,000 cu m Sand-Gravel in 2(two) Years** subject to the terms and conditions laid down in the approved mining plan and also subject to the following conditions that.

3.14.4. Recommendation of SEIAA

Approved

3.14.5. Details of Environment Conditions

3.14.5.1. Specific

Specific conditions by SEAC	
1.	i) The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. ii) The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geocoordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan. iii) CSR activities shall be carried out / undertaken by the Proponent and minimum 2% of the total project cost **(Rs 2.00 Lakh)** shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the near by existing school 1 and (one) village with due consultation with the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 2 (two) years of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report.
Specific conditions by SEIAA	
1.	• Mining shall be confined and limited to the area falling within the GPS coordinates.

	• The active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials. • Removal pf river bed materials deposited may be allowed from the deposits at R/B channel area of the river. • Activities in the proposed Mahal like digging Sand, Gravel, Stone, etc should be limited within the river bed. • In case of river bends, removal of river bed materials maybe allowed only from the convex (outward) bend area. • The natural course of river flow must not be disturbed/diverted/blocked while carrying out the excavation and removal of river bed materials. • While carrying out the excavation in the river bed and removal of river bed materials, It should be ensured that no damage of any kind occur to the existing structures of Water Resources Department. • While carrying out the excavation and removal of river bed materials, no damage should occur to any kind of F.C structure any public/Govt. property. • The removal of river bed materials may be allowed to cut along the present flowing channel and to be widened towards Right Bank for free flow of river water. • The authority reserves the right to stop extraction of sand and gravel from the river bed at any time without any notice thereof.

3.14.5.2. Standard

1(a)	**Mining of minerals**
Air quality monitoring and mitigation measure	
1.	The transportation of material shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the material through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.
1.	Vehicular emissions shall be kept under control and regularly monitored. All the vehicles engaged in mining and allied activities shall operate only after obtaining ‘PUC’ certificate from the authorized pollution testing centres.
1.	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
1.	Major approach roads should be properly maintained with dust suppression measures and the river bank in any case must not be damaged.
Corporate Environment Responsibility	
1.	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders.

1.	Self environmental audit shall be conducted annually.
1.	Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Land Recalmation	
1.	Native tree species shall be selected and planted over areas affected by subsidence.
Mining Plan	
1.	No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
1.	Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable.
1.	Mining shall be carried out as per the approved mining plan (including Mine Closure Plan) abiding by mining laws and the relevant circulars issued by Directorate General Mines Safety (DGMS).
1.	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.
1.	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.
1.	Mining shall be carried out as per the approved mining plan (including Mine Closure Plan) abiding by mining laws related to coal mining and the relevant circulars issued by Directorate General Mines Safety (DGMS).
Miscellaneous	
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently.
1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
1.	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining

	operations.
1.	The project authorities must strictly adhere to the stipulations made by the Pollution Control Board, Assam and the State Government.
1.	Concealing factual data or submission of false/fabricated data may result in revocation of this environmental clearance and attract action under the provisions of Environment (Protection) Act, 1986.
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	The above conditions shall be enforced, inter-alia under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986, Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 and the Public Liability Insurance Act, 1991 along with their amendments and Rules and any other orders passed by the Hon'ble Supreme Court of India / High Courts and any other Court of Law relating to the subject matter.
1.	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
Noise and Vibration monitoring and prevention	
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the MoEF & CC /RO on six-monthly basis.
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.
1.	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
Public hearing and Human health issues	
1.	PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
1.	PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius
1.	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient

	supply of drinking water for all the persons employed.
1.	PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
Statutory compliance	
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee.
1.	Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA Notification, 2006 and its amendments therein
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the Pollution Control Board, Assam.
1.	The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
Water quality monitoring and mitigation measures	
1.	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
1.	The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.
1.	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.

3.15. Agenda Item No 15:

3.15.1. Details of the proposal

Katirail Pt-I (Hilara Colony) Ordinary Earth Mining Permit Area by **ISPAKUL BARBHUIYA** located at **CACHAR,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**

SIA/AS/MIN/462431/2024	SEIAA.3671/2024	10/02/2024	Mining of minerals (1(a))

3.15.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :23/02/2024

Deliberations of SEAC 1 :

iscussions and deliberations is held.

:ommittee after due deliberation and appraisal is of the opinion for allowing extraction of the **Ordinary** ı for the approved quantum of**74,958** cum **@ 37,479** cu m, annually, in 2**(two)** Years**.** This is subject to ɔnditions that the proponent shall have to strictly follow all terms and conditions laid down in the ved mining plan and also subject to the conditions that: (a) mining shall be confined and limited to the f area falling within the GPS coordinates ; (b) mining has to be confined to a maximum depth of 2 (two) s only from the non mined surface area and (c) the area must be covered with shed nets to ensure that is no dust pollution around the area and Water Canon shall have to be used for spraying water to suppress ollution.

3.15.3. Deliberations by the SEIAA in current meetings

EC is approved for **project area allotted 0.36Ha with a quantity of 74,958cum @ 37,479cu m, annually, in 2(two) years** subject to the terms and conditions laid down in the approved mining plan and also subject to the following information required.

- The project proponent shall show the approach road to the proposed mine site from the nearest road on the map/Google Earth image.
- The project proponent shall submit the Special Power of Attorney regarding land lease issued by the concerned authority.
- The project proponent shall submit NOC from Gaon Panchyat with validity as the date is not mentioned.
- The project proponent shall submit clarification regarding JVR report having details of trees mentioned in the proposed site.

3.15.4. Recommendation of SEIAA

Approved-Subject to Submission of Information

3.15.5. Details of Environment Conditions

3.15.5.1. Specific

Specific conditions by SEAC	
1.	i) The DFO shall time to time conduct monitoring of the mining activity to ensure that the surrounding area is not polluted and precautions shall be taken to avert any kind of noise pollution and thereby disturbance to public, School going children. ii) The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of

	irregularities / illegalities during the mining period. iii) The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geocoordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan. iv) CSR activities shall be carried out / undertaken by the Proponent and minimum 2% of the total project cost **(Rs 2.00 Lakh)** shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the near by existing school 1 and (one) village with due consultation with the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 2 (two) years of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report.
Specific Conditions by SEIAA	
1.	Mining shall be confined and limited to the area falling within the GPS coordinates. The proponent shall extract the approved quantity of Ordinary Clay with maximum mining depth of up to 2 (two) meters only from the non-mined surface. The authority reserves the right to stop extraction of ordinary earth from the proposed mining area at any time without any notice thereof.

3.15.5.2. Standard

1(a)	**Mining of minerals**
Air quality monitoring and mitigation measure	
1.	
1.	Atleast 3 (three) ambient air quality monitoring stations shall be established in the core zone as well as in the buffer zone for monitoring of air pollutants. Location of the stations shall be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive receptors in consultation with the Pollution Control Board, Assam. Online ambient air quality monitoring station/stations may also be installed in addition to the regular air monitoring stations as per the requirement and/or in consultation with the PCBA.
1.	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
1.	Vehicular emissions shall be kept under control and regularly monitored. All the vehicles engaged in mining and allied activities shall operate only after obtaining ‘PUC’ certificate from the authorized pollution testing centres.
1.	The transportation of coal shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the coal through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.
1.	Major approach roads shall be black topped and properly maintained.
1.	The transportation of material shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the material through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.

Corporate Environment Responsibility	
1.	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders.
1.	Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
1.	Self environmental audit shall be conducted annually.
Land Recalmation	
1.	Native tree species shall be selected and planted over areas affected by subsidence.
Mining Plan	
1.	No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
1.	Mining shall be carried out as per the approved mining plan (including Mine Closure Plan) abiding by mining laws related to coal mining and the relevant circulars issued by Directorate General Mines Safety (DGMS).
1.	
1.	Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable.
1.	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.
1.	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.
Miscellaneous	
1.	The project authorities must strictly adhere to the stipulations made by the Pollution Control Board, Assam and the State Government.
1.	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently.
1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at

	environment clearance portal.
1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
1.	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	Concealing factual data or submission of false/fabricated data may result in revocation of this environmental clearance and attract action under the provisions of Environment (Protection) Act, 1986.
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	The above conditions shall be enforced, inter-alia under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986, Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 and the Public Liability Insurance Act, 1991 along with their amendments and Rules and any other orders passed by the Hon'ble Supreme Court of India / High Courts and any other Court of Law relating to the subject matter.
1.	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
Noise and Vibration monitoring and prevention	
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the MoEF & CC /RO on six-monthly basis.
1.	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.
Public hearing and Human health issues	

1.	PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius
1.	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
1.	PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
1.	PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
Statutory compliance	
1.	Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA Notification, 2006 and its amendments therein
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned Pollution Control Board, Assam.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee.
1.	The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC.
1.	The Environmental clearance shall be subject to orders of Hon’ble Supreme Court of India, Hon’ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
Water quality monitoring and mitigation measures	
1.	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.
1.	The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.
1.	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.

4. Any Other Item(s)

Subject: Grant of EC under the provision of the EIA Notification 2006-regarding.

Sir/Madam,

This is in reference to your application for Grant of EC under the provision of the EIA Notification 2006-regarding in respect of project Govt. Permit Area of Balti Clay / Silt Mahal submitted to Ministry vide proposal number SIA/AS/MIN/455587/2023 dated 14/12/2023.

2. The particulars of the proposal are as below :

(i) EC Identification No.	
(ii) File No.	SEIAA.3659/2024
(iii) Clearance Type	EC
(iv) Category	B2
(v) Project/Activity Included Schedule No.	1(a) Mining of minerals
(vii) Name of Project	Govt. Permit Area of Balti Clay / Silt Mahal
(viii) Name of Company/Organization	BAKSA FOREST DIVISION MUSHALPUR
(ix) Location of Project (District, State)	BAKSA, ASSAM
(x) Issuing Authority	SEIAA
(xii) Applicability of General Conditions	yes
(xiii) Applicability of Specific Conditions	yes

3. In view of the particulars given in the Para 1 above, the project proposal interalia including Form-1(Part A and B) were submitted to the Ministry for an appraisal by the State Environment Impact Assessment Authority(SEIAA) & State Expert Appraisal Committee (SEAC) in the Ministry under the provision of EIA notification 2006 and its subsequent amendments.

The above-mentioned proposal has been considered by State Environment Impact Assessment Authority (SEIAA) &

State Expert Appraisal Committee (SEAC) in the meeting held on 06/04/2024. The minutes of the meeting and all the Application and documents submitted (viz. Form-1 Part A and Part B) are available on PARIVESH portal which can be accessed by scanning the QR Code above.

The brief about configuration of plant/equipment, products and by products and salient features of the project along with environment settings, as submitted by the Project proponent in Form-1 (Part A and B) /EIA & EMP Reports/presented during SEIAA are annexed to this EC as Annexure (1).

The SEIAA, in its meeting held on 06/04/2024, based on information & clarifications provided by the project proponent and after detailed deliberations recommended the proposal for grant of EC under the provision of EIA Notification, 2006 and as amended thereof subject to stipulation of specific and general conditions as detailed in Annexure (2).

The SEIAA has examined the proposal in accordance with the Environment Impact Assessment (EIA) Notification, 2006 & further amendments thereto and after accepting the recommendations of the State Environment Impact Assessment Authority (SEIAA) & State Expert Appraisal Committee (SEAC) hereby decided to grant EC for instant proposal of Mr. Prabodh Kumar Brahma under the provisions of EIA Notification, 2006 and as amended thereof.

The Ministry reserves the right to stipulate additional conditions, if found necessary.

The EC to the aforementioned project is under provisions of EIA Notification, 2006. It does not tantamount to approvals/consent/permissions etc. required to be obtained under any other Act/Rule/regulation. The Project Proponent is under obligation to obtain approvals /clearances under any other Acts/ Regulations or Statutes, as applicable, to the project.

This issues with the approval of the Competent Authority.

The extraction of sand from the area within the limits of the GPS Co-ordinates as under:

Longitude Latitude

1. 91.642130^0 E 26.701770^0 N
2. 91.643570^0 E 26.702060^0 N
3. 91.643480^0 E 26.698370^0 N
4. 91.644457^0 E 26.698725^0 N

EC is approved for **project area allotted 4.88Ha with a quantity of 1,08, 740 cum of Clay for 2 (two) years @ 54,370cu.m annually as substantial quantum of mineral is required for the purposes of construction of a Medical College at Tamulpur area, subsequently informed by the concerned DFO** subject to the terms and conditions laid down in the approved mining plan and also the following conditions:

Copy To

1. The Joint Secretary, Ministry of Environment, Forest and Climate Change, Government of India, MOEF&CC, Indira Paryavaran Bhawan, Jorbagh Rd, New Delhi-110003.
2. The Secretary to the Govt. of Assam, Environment & Forest Department, Dispur, Guwahati-6 Cum Member Secretary, SEIAA, Assam for favour of kind information.
3. The P.C.C.F, HoFF, Govt. of Assam, Panjabari, Guwahati-37 for favour of kind information.
4. The Divisional Forest Officer, Baksa Forest Division, Mushalpur, Dist. Baksa, Assam for information & necessary action to ensure that all **Specific Conditions & General Condition** are complied with.
5. The Executive Engineer, Water Resource Division, Tamulpur, Assam for favour of kind information.
6. The Integrated Regional Office, Ministry of Environment, Forest & Climate Change, 4^{th} Floor, Housefed Building, G.S. Road, Rukminigaon, Guwahati-22 for kind information.

Annexure 1

Specific EC Conditions for (Mining Of Minerals)

1. Specific Condition By Seac

S. No	EC Conditions
1.1	i) The DFO shall comply with necessary formalities for transfer of the EC to the lessee with due NOC for filing application to the SEIAA before allowing mining so that the entire accountability in mining is vested on the lessee / Proponent with the same terms and conditions stipulated in the EC as per the EIA Notification, 2006. ii) The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. iii) The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geocoordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan. iv) CSR activities shall be carried out / undertaken by the Proponent and 2% of the total project cost (Rs 1.48 Lakh) shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the near by existing school 1 and (one) village with due consultation with the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st 2 (two) years of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report. v) Plantation activities shall be carried out / undertaken in any educational institution or Govt lands involving local NGOs, School / College students and an amount of Rs 5 (Five) Lakh shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the D]FO and label the plant species for the benefits of the villagers, common people and specially the school students. The recommended species of plants in the locality could be of species like Bakul (Mimosupselengi), Agor (Aquillaria malaccensis), Amlokhi (Phyllantus emblica), Hilikha (Terminalia chebula), Asoca (Saraca asoca), Bael (Aegle marmelos), Bokphul (Sesbania grandiflora), Mohaneem (Azedirachta indica), Jamun (Syzygium cuminii), Kordoi (Averrhoa carambola), Arjun (Terminalia arjuna), Sewali phul (Nyctanthes arbor tris tis), Giloi (Tinospora cordifoia),Ow Tenga (Dillenia indica), Thekera (Garcinia spp) etc. Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

2. Specific Conditions By Seiaa

S. No	EC Conditions
2.1	· Mining shall be confined and limited to the area falling within the GPS coordinates. · The active bank of the river should not be disturbed / damaged because of mining operation and transportation of mining materials. · The proponent is permitted to extract the approved quantity of Ordinary Clay with maximum mining depth of up to 2 (two) meters only from the non-mined surface. · Removal of River bed materials deposited may be allowed from mid channel area of the river. · In cage of river bends removal of river bed materials may be allowed only from the convex (outwards) bend. · While carrying out the excavation in the river bed and removal of materials, it should be ensured that no damage of any kind occur to existing structure. · The authority reserve the right to stop extraction of sand and gravel from the river bed at any time without any notice thereof.

Standard EC Conditions for (Mining of minerals)

1. Statutory Compliance

S. No	EC Conditions
1.1	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee.
1.2	The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
1.3	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.4	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.5	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned pollution Control Board, Assam.
1.6	The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC.
1.7	Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA Notification, 2006 and its amendments therein

2. Air Quality Monitoring And Mitigation Measure

S. No	EC Conditions
2.1	The transportation of coal shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the coal through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.
2.2	Atleast 3 (three) ambient air quality monitoring stations shall be established in the core zone as well as in the buffer zone for monitoring of air pollutants. Location of the stations shall be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive receptors in consultation with the Pollution Control Board, Assam. Online ambient air quality monitoring station/stations may also be installed in addition to the regular air monitoring stations as per the requirement and/or in consultation with the PCBA
2.3	Major approach roads should be properly maintained with dust suppression measures and the river bank in any case must not be damaged.
2.4	The transportation of material shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the material through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.

S. No	EC Conditions
2.5	Vehicular emissions shall be kept under control and regularly monitored. All the vehicles engaged in mining and allied activities shall operate only after obtaining 'PUC' certificate from the authorized pollution testing centres.
2.6	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
2.7	Post environmental closure third party monitoring by reputed instituted in air quality, water, land & soil etc shall be carried out and analysed with EMP measures at regular interval. A suitable recommendation in this regard, shall be furnished to IRO, MoEF&CC for compliance. The data used for analysis shall be obtained from continuos AQMS, site specific water regime. Also third party shall analyses the implementation of river diversion, meeting to the requirement of project report.

3. Water Quality Monitoring And Mitigation Measures

S. No	EC Conditions
3.1	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
3.2	The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.
3.3	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.

4. Noise And Vibration Monitoring And Prevention

S. No	EC Conditions
4.1	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.
4.2	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
4.3	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be

S. No	EC Conditions
	submitted to the MoEF & CC/ RO on six-monthly basis.

5. Mining Plan

S. No	EC Conditions
5.1	Mining shall be carried out as per the approved mining plan (including Mine Closure Plan) abiding by mining laws and the relevant circulars issued by Directorate General Mines Safety (DGMS).
5.2	No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
5.3	Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable.
5.4	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.
5.5	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.

6. Corporate Environment Responsibility

S. No	EC Conditions
6.1	Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
6.2	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders.
6.3	Self environmental audit shall be conducted annually.

7. Miscellaneous

S. No	EC Conditions
7.1	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
7.2	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least

S. No	EC Conditions
	in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently.
7.3	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
7.4	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
7.5	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
7.6	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
7.7	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
7.8	The project authorities must strictly adhere to the stipulations made by the Pollution Control Board, Assam and the State Government.
7.9	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
7.10	Concealing factual data or submission of false/fabricated data may result in revocation of this environmental clearance and attract action under the provisions of Environment (Protection) Act, 1986.
7.11	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
7.12	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
7.13	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
7.14	The above conditions shall be enforced, inter-alia under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986, Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 and the Public Liability Insurance Act, 1991 along with their amendments and Rules and any other orders passed by the Hon'ble Supreme Court of India / High Courts and any other Court of Law relating to the subject matter.

S. No	EC Conditions
7.15	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours

8. Land Recalmation

S. No	EC Conditions
8.1	Native tree species shall be selected and planted over areas affected by subsidence.

9. Public Hearing And Human Health Issues

S. No	EC Conditions
9.1	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
9.2	PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
9.3	PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
9.4	PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius

Project Details

1. Details of Project

1.1. Name of the Project	GOVT PERMIT AREA OF BARNADI SAND MAHAL 9
1.2. Project Proposal For	New
1.3. Project ID (Single Window Number)	SW/154754/2023
1.4. Description of Project	sand mining permit area

2. Details of the Company/Organization/User Agency making application

2.1. Legal Status of the Company/Organization/User Agency	State Government (Department/Autonomous body)
2.2. Name of the Company/ Organization/User agency	BAKSA FOREST DIVISION MUSHALPUR

Registered address

2.3. Address	vill: Mushalpur, Po: Mushalpur, Ps, Mushalpur,
2.4. Village /Town / City	MUSHALPUR
2.5. State	ASSAM
2.6. District	BAKSA
2.7. Pin Code	781372
2.8. E-mail address	dfobaksa@nic.in
2.9. Mobile number	xxxxxx7176

3. Details of the person making application

3.1. Name	PRABODH KUMAR BRAHMA
3.2. Designation	dcf

Correspondence address

3.3. Address	vill: Mushalpur, Po: Mushalpur, Ps, Mushalpur,
3.4. Village /Town / City	MUSHALPUR
3.5. State	ASSAM
3.6. District	BAKSA
3.7. Pin Code	781372
3.8. E-mail address	dfo-baksa@assam.gov.in
3.9. Mobile number	xxxxxx7176

Project Location

4. Location of the Project or Activity

4.1. Upload KML	BARNADI 9.kml
4.2. Whether the project/activity falling in the state/UT sharing international borders	NO

5. Shape of the Project	Non - Linear

Location Details

Remarks

N/A

6. Land Requirement (in Ha) of the project or activity

6.1. Nature of Land involved	
6.2. Non-Forest Land [A]	3.95
6.3. Forest Land [B]	0
6.4. Total Land [A+B]	3.95

Project Activity Cost

6. Project/Activity Cost

6.1. Total Cost of the Project at current price level (in Lakhs)	70 Amount in Words : **Seventy Lakh(s) Only**

7. Employment likely to be generated

7.1. During construction phase

Permanent employment

Temporary employment

7.2. During operational phase

Permanent employment

7.2.1. No. of permanent employment (No.s) [A]	15
7.2.2. Period of employment (No. of days) [B]	1000
7.2.3. No. of man-days [X]=[A]*[B]	15000

Temporary employment

7.2.4. Temporary / Contractual employment (No. of Man days) [Y]	1000
7.2.5. Total [X] +[Y]	16000

Others

8. Whether Rehabilitation and Resettlement (R&R) involved?	NO
9. Whether project area involves shifting of watercourse/road/rail/Transmission line/water pipeline, etc. required?	NO
10. Whether any alternative site(s) examined or part thereof for the non-site-specific component?	Not applicable as the project or activity is site specific

11. Whether there is any Government Order or Policy/ Court order relevant or restricting to the site?	NO
12. Whether there is any litigation pending against the project and/or land in which the project is proposed to be set up?	NO
13. Whether the proposal involves violation of Act/Rule/Regulation/Notification of Central/State Government?	NO

Application for ToR (Category A, B1, and B2 Violation)/EC (Category B2) - Form 1

Basic Information

1. Category of the Project/Activity

1.1. Name of the project proposal	GOVT PERMIT AREA OF BARNADI SAND MAHAL 9	
1.2. Type of Proposal	New	
1.3. Whether the Project Activity (Construction/ Operation) has been undertaken without obtaining **prior** Environmental Clearance under the provision of EIA Notification 1994/ 2006?	No	
1.4. Whether multiple items (Components) as per the notification involved in the proposal?	No	
1.4.1. Item No. as per schedule to EIA Notification, 2006	1(a) Mining of minerals	Non-Coal Mining (Minor Minerals- river bed mining)
Capacity	3.95	Ha
2. Whether project/activity attracts the General Condition specified in the Schedule of EIA Notification?	No	
3. Whether any Protected Areas Notified Under the Wild Life (Protection) Act, 1972 are located within 10 km of the project site	N/A	
4. Whether any Severely Polluted Areas as identified by the CPCB from time to time located in proximity to the project site	No	
5. Whether any Critically Polluted Areas as identified by the CPCB from time to time located in proximity to the project site	N/A	
6. Whether any Notified Eco-Sensitive area notified under Environmental (Protection) Act, 1986 located in proximity to the project site	N/A	
7. Whether any Inter-State Boundaries and International Boundaries located in proximity to the project site	N/A	
8. Whether any Eco-sensitive Zone notified/proposed to be notified under Environment (Protection) Act, 1986 located within 10 km of the project site	No	
9. Whether any forest land present within 10 km of the project site	No	
10. Category of the Project as per EIA Notification, 2006	B2	
10.1. Whether proposal is required to be appraised at Central level?	No	
11. Whether Proposal has interlinked / interdependent projects or activities?	No	
11.1. Reason thereof	NA	

12. Whether any Forest Land involved in the project or part thereof	No
13. Whether NBWL recommendation is required?	No

14. Land Acquisition Details

Type of Land	In case of non-forest land, please specify	Type of privately owned land	Type of land in terms of ownership	Supporting documents			Status of Land Acquisition
				Document Name	Remarks	Document	

Project Details

14. Details of CTE

14.1. Whether consent under Air & Water Act has been obtained from SPCB / UTPCC?	No
14.1.1. Reason thereof	NA
15. Whether the project/activity located in Notified Industrial Area?	No
16. Whether the project/activity located in CRZ or ICRZ area?	No
17. Whether the project proposed to be located in Territorial waters (Off-shore)	No
18. Whether project/activity attracts the Specific Condition specified in the Schedule of EIA Notification?	No

Product Details

19. Details of Products & By-products

Name of Product	Product / By Product	Quantity / Capacity	Unit	Mode of Transport / Transmission	Remarks
SAND	Product	3.95	Hectares (Ha)	Road	NA

20. Whether any other Environmental Sensitive area exists within 10 Km from the project/activity boundary?	No

Note : Others, interalia, includes areas protected under international conventions/ Area important or sensitive ecological reasons/ Sensitive species of flora or fauna/ Inland or coastal/Tourist places/ Defence installations / Densely populated areas/ Areas containing important, high quality, or scarce resources/ Areas susceptible to natural Hazards

21. Status of collection of baseline data	Not required as the proposal is under B2 category

Consultant Details

24. Whether QCI/NABET Accredited EIA Consultant engaged?	No

24.1. Reason for not engaging the Consultant	NA

Application for ToR (Category A, B1, and B2 Violation)/EC (Category B2) - Form 1

Project Details

1. Introduction of Project or Activity

1.1. Need for the project or activity and its importance to the country/region	REQUIREMENT OF SAND
1.2. Demand - Supply Gap and Domestic and export markets, if any	NA

2. Social Infrastructure

2.1. Readily available	0
2.2. Proposed to be developed	0

3. Connectivity to the project or activity

3.1. Nearest railway station and its distance (in Km)	RANGIA	60
3.2. Nearest Airport and its distance (in Km)	LGBI	220
3.3. Nearest Town/City/District head quarter and its distance (in Km)	TAMULPUR	10
4. Soil classification	RIVER BED	
5. Distance from the HFL of the river in m, if any	0	

6. Benefits of the project

6.1. Social benefits of project or activity	EMPLOYMENT GENERATION
6.2. Financial benefits of project or activity	SALARY

7. Project/ Activity Construction Status	Completed
7.1. Date of Start	16/02/2024
7.2. Likely date of completion	28/02/2024

Resource Utilization

8. Use of resources for construction or operation of the project

8.1. Whether requirement of water involved in the project?	No
8.2. Whether requirement of Minerals and/or fuels involved in the project?	No
8.3. Construction material	No
8.4. Timber	No
8.5. Electric Power:	No

8.6. Whether any other natural resources / other raw materials required?:	No
8.7. Whether any use of substances or materials, which are hazardous (as per MSIHC rules) to human health or the environment (flora, fauna, and water supplies) required?	No
8.8. Whether any resource efficiency / optimization / recycling and reuse envisaged in the project?	No

Physical Changes

9. Construction, operation or decommissioning of the Project involving actions, which will cause physical changes in the locality:

9.1. Whether any permanent or temporary change in land use, land cover or topography due to project activity?	No
9.2. Whether any clearance of existing vegetation due to project activity?	No
9.3. Whether any loss of native species or genetic diversity?	No
9.4. Whether any demolition works involved in project activity?	No
9.5. Whether any linear structures proposed for diversion or demolition due to project activity? (e.g. roads, transmission lines, rail line, pipeline, conveyor, etc.)	No
9.6. Whether any closure or diversion of existing transport routes or infrastructure due to project leading to changes in traffic movements?	No
9.7. Whether any closure or diversion of water bodies present in project area or realignment of water courses passing through project area?	No
9.8. Whether any dismantling or decommissioning or restoration works or reclamation works (Long-term/ short-term)?	No
9.9. Whether any construction works for temporary use for project activity?	No
9.10. Whether any cut and fill excavations proposed for the project activity?	No
9.11. Whether any underground works including tunnelling?	No
9.12. Whether any dredging involved in project?	No
9.13. Whether any offshore structures involved in project?	No

9.14. Whether any new road, rail, sea, airports, helipad, etc. during construction or operation?	No
9.15. Whether any construction of new linear structures? (e.g. transmission lines, pipelines, etc.)	No
9.16. Whether any Facilities for storage of goods or raw materials?	No
9.17. Whether any Facilities for long term/ permanent housing of operational workers/ staff?	No
9.18. Whether any Impoundment, damming, culverting, realignment or other changes to the hydrology of watercourses or aquifers?	No
9.19. Whether any Stream crossings, temporary and permanent?	No
9.20. Whether any influx of people to an area in either temporarily or permanently?	No
9.21. Whether any other information would like to submit?	No

Pollution Details

10. Release of pollutants to Air and Mitigation measures

10.1. Whether any probable air pollutants generated?	No
10.2. Other information, if any	NA

10.3. Generation of Noise & Vibration and mitigation measures

10.3.1. Whether any probable generation of Noise and vibration from the proposed project?	No
10.3.2. Whether any probable generation of Light and Heat?	No

10.4. Discharge of pollutants to water and mitigation measures

10.4.1. Whether any probable water pollutants generated?	No
10.5. Probable sources of water pollutant	No

Details of reuse / recycle of wastewater

Details	Qty / Capacity
10.6. Quantity of waste water generation per day (KLD)	0
10.7. Quantity of treated water proposed to use per day (KLD)	0
10.8. Quantity of treated water proposed to discharge outside the premises (KLD)	0

10.9. Purpose for which treated water is proposed to use	0
10.10. Whether it is proposed to opt/avail common off-site Sewage Treatment Plant (CSTP)/Effluent Treatment Plant (CETP) facility?	No
10.11. Whether it is proposed to setup on-site Sewage Treatment Plant (STP)/Effluent Treatment Plant (ETP) facility?	No
10.12. Whether the adequacy of the Sewage Treatment Plant (STP) or Effluent Treatment Plant certified by an independent expert?	No
10.12.1. Reasons thereof	0
10.13. Whether any other mitigation measures proposed?	No
10.14. Whether Dual Plumbing System proposed to be implemented?	No
10.14.1. Reasons thereof	0
10.15. Whether any discharge of treated effluent involved?	No

Water Requirements

11. Ground water intersection and water conservation measures:

11.1. Whether ground water table intersection involved in the project activities?	No
11.2. Area category from Groundwater availability perspective?	Safe
11.3. Whether Rainwater harvesting proposed	No
11.4. Whether any other water conservation measures proposed?	No
11.5. Whether the ZLD is proposed?	No

12. Greenbelt

12.1. Area proposed for green belt (in Ha)	0
12.2. Width of green belt (in m) along the boundaryof the project or activity	0
12.3. Percentage of the total area covered under green belt	0
12.4. Details of the species proposed for plantation	0
12.5. No. of tree saplings to be planted	0
12.6. Funds allocated for plantation in Lakhs.	0

Waste Generation

13. Production of wastes during construction or operation or decommissioning

13. Production of wastes during construction or operation or decommissioning

13.1. Whether any generation of Solid waste (domestic wastes)?	No
13.2. Whether any generation of plastic waste?	No
13.3. Whether any generation of e-waste?	No
13.4. Whether any generation of batteries waste?	No
13.5. Whether any generation of Bio-medical waste?	No
13.6. Whether any generation of hazardous wastes (as per Hazardous Waste Management Rules)?	No
13.7. Whether any generation of construction or demolition wastes?	No
13.8. Whether any generation of other wastes?	No
13.9. Whether any generation of surplus products?	No
13.10. Whether measures for waste minimization proposed?	No

Risk Assessment

14. Whether any risks associated with project activities which could affect human health or the environment, -

14.1. From explosions, spillages, fires etc. from storage, handling, use or production of hazardous substances?	No
14.2. From any other causes?	No
14.3. Could the project be affected by natural disasters causing environmental damage (e.g. floods, earthquakes, landslides, cloudburst etc)?	No
14.4. Changes in occurrence of disease or affect disease vectors (e.g. insect or water borne diseases)	No
14.5. Could project adversely affect the wellbeing of people in project area e.g. by changing living conditions?	No
14.6. Vulnerable groups of people who could be adversely affected by the project e.g. hospital patients, children, the elderly etc.	No
14.6.1. Has cumulative risk assessment been performed?	N/A
14.7. Whether any likely impacts of the proposed activity on the existing facilities adjacent to the proposed site due to generation of dust, smoke, odorous fumes or other hazardous gases?	No

15. Factors which should be considered (such as consequential development) which could lead to environmental effects or the potential for cumulative impacts with other existing or planned activities in the locality	
15.1. Whether lead to development of supportive facilities, ancillary development or development stimulated by the project which could have impact on the environment e.g.: Supportive infrastructure (roads, power supply, waste or waste water treatment, etc.); housing development; industries in supply chain and downstream; any other?	No
15.2. Whether lead to after-use of the site, which could have an impact on the environment? (e.g. mine void, dump sites, etc.)	No
15.3. Whether set a precedent for later developments?	No
15.4. Have cumulative effects due to proximity to other existing or planned projects with similar effects?	No
15.5. Whether lead to growth of alien species, if any?	No
15.6. Is there any threat of the project to the biodiversity (including displacement of fauna-both terrestrial and aquatic and avi-fauna or creation of barriers for their movement)?	No
15.7. Will the proposed project in any way result in the obstruction of a view, scenic amenity or landscapes?	No
15.8. Is there any impact on anthropological or archaeological sites or any important site feature in the vicinity of the proposed site have been considered?	No
15.9. Will the proposed project result in any changes to the demographic structure of local population?	No
15.10. Will the project cause adverse effect on local communities, disturbance to sacred sites or other cultural values?	No

16. Mining Proposals

16.1. Details of Letter of Intent (LoI) / Vesting order / Mining Lease

16.1.1. Date of issue of LoI/Vesting order/Minning Lease	21/01/2023
16.1.2. Validity of the LoI/Vesting order	20/01/2029
16.1.3. Lease Period	07/00
16.1.4. Date of expiry of lease	20/01/2029
16.1.5. Lease area (in Ha) as per LoI/Vesting order/Mining Lease	3.95
16.1.6. Production capacity (in MTPA) as per LoI / Vesting Order / Mining lease, if any prescribed	146095
16.1.7. Details of Lease renewal(s), if any	0
16.1.8. Other information, if any	0

16.1. Status of approval of Mining plan	Approved

17. Minerals to be mined

Name of Mineral	Classification	Production Capacity	Remarks
SAND	Minor	29219	NA

18. Details of Total excavation (RoM) including Topsoil, Overburden, Mining waste, Rejects, etc.

18.1. Total excavation in MTPA	29219
18.2. Total Excavation in M.Cu.m/Annum	0.0292
18.3. Enter stripping Ratio	00:00
18.4. Other information, if any	NA

19. Mineral Reserves

Name of Mineral	Proved Reserves	Indicated Reserves	Inferred Reserves	Mineable Reserves	Remarks
SAND	0.237	0.237	0.237	0.2	

20. Life of Mine (Years)

20.1. Life of the mine as per approved mining plan	05/00
20.2. Life of the mine as per total estimated reserves, if any	05/00
20.3. Other information, if any	NA

21. Type and method of Mining Method

21.1. Type of mining	Opencast
21.2. Method of mining	Manual
21.3. Other information, if any	NA

22. Type of blasting, if any, to be adopted

22.1. Type of blasting	NA
22.2. Mitigation measures for control of blast induced vibrations	NA
22.3. Other information, if any	NA

23. Whether it is proposed to install beneficiation plant/Coal washery within the mining lease area?	No

24. Whether it is proposed to install crusher within the mining lease area?	No

25. Dumping strategy

Description	Area in Ha	Maximum height in m	Remarks
External dump	0	0	0
Internal dump	0	0	0
Topsoil dump/ storage	0	0	0

26. Topsoil management

26.1. Total Topsoil excavated during the entire life of the mine (in Million Cubic Meter)	0.146
26.2. Utilization strategy of topsoil	CONSTRUCTION
26.3. Other information, if any	NA

27. Details of the Quarry/Mine Pit

27.1. Total Quarry Area (Ha)	3.95
27.2. Enter Area of final void (in Hectare)	3.95
27.3. Maximum Depth of final void (in meter)	3
27.4. Other information, if any	0

28. Details of Transportation

28.1. Mode of transportation upto pit head	TRUCK
28.2. Mode of transportation from pit head to siding/loading	TRUCK
28.3. Mode of transport from loading point to consumers	TRUCK
28.4. Other information, if any	TRUCK

29. Details of reclamation/post mining land use

29.1. Plantation area (ha)	3.95
29.2. Water body in Ha	3.95
29.3. Public use in Ha	0
29.4. Enter Other uses in Ha	0

30. Details of DSR; Cluster and Replenishment study

30.1. Whether approved DSR available	No
30.2. Whether the instant proposal is part of cluster	No

30.1. Whether road/river /seasonal nallah /irrigation canal passes through project site

Any diversion	No Object	Application for NOC has	NOC from the concerned	Proof of	Reason thereof (No Object Certificate obtained -	Reason thereof (NOC has

S.No.	Type of Road/Waterway	diversion is proposed	No Object Certificate obtained	for NOC has been submitted	concerned department or authority	Proof of application for NOC	obtained - Not Applicable)	(NOC has not been submitted)

Enclosures

24. Layout Plan showing the components of the project and green belt proposed; general location and specific location of the project along with coordinates	FINAL LAYOUT.pdf
25. Upload copy of Replenishment Study Report & Baseline Survey data	REPLENISHMENT STUDY REPORT.pdf Preview
26. Letter of Intent / Mining Lease	DFO TO DGM LETTER.pdf
27. Upload copy of District Survey Report	DFO TO DGM LETTER.pdf
28. Schematic representation of the feasibility drawings which give information for EIA purpose	SCHEMATIC DIAGRAM.pdf

8. Additional Information

S. No.	Document Name	Remark	Document
1	DFO TO SEIAA LETTER	DFO TO SEIAA LETTER	SEIAA LETTER.pdf
2	DOCUMENTS	DOCUMENTS	DOCUMENT.pdf
3	DFO TO DGM LETTER	DFO TO DGM LETTER	DFO TO DGM LETTER.pdf
4	APPROVED MINING PLAN	APPROVED MINING PLAN	APPROVED MINE PLAN.pdf
5	APPROVAL LETTER	APPROVAL LETTER	APPROVAL LETTER.pdf

Undertaking

19. ☑ I hereby give undertaking that the data and information given in the application and enclosures are true to be best of my knowledge and belief and I am aware that if any part of the data and information is found to be false or misleading at any stage, the project will be rejected and clearance given if any to the project will be revoked at our risk and cost. In addition to the above, I hearby give undertaking that no activity/construction/expansion has been taken up

19.1. Name	PRABODH KUMAR BRAHMA
19.2. Designation	dcf
19.3. Company	BAKSA FOREST DIVISION MUSHALPUR
19.4. Address	vill: Mushalpur, Po: Mushalpur, Ps, Mushalpur,
19.5. Date	09/02/2024

Government of India
Ministry of Environment, Forest and Climate Change
(Issued by the State Environment Impact Assessment Authority (SEIAA), ASSAM)
***

Minutes of 14th SEIAA Meeting State Environment Impact Assessment Authority meeting held from 14/05/2024 to 14/05/2024

Date: 21/05/2024

MoM ID: EC/MOM/SEIAA/201442/5/2024

Agenda ID: EC/AGENDA/SEIAA/201442/5/2024

Meeting Venue: Office of the Chief Engineer (EAP), PWRD, Govt. of Assam

Meeting Mode: Hybrid

Date & Time:

14/05/2024	11:00 AM	04:00 PM

1. Opening remarks

The Member Secretary, SEIAA welcomed the Chairman, SEIAA and the Member of regulatory body. She briefed the house about the agenda for the meeting for deliberation and to expedite disposal of the recommended proposals by SEAC, Assam.

2. Confirmation of the minutes of previous meeting

As per the agenda, the regulatory body duly reviewed the Minutes of the Meetings held on 19th April'2024.

3. Details of proposals considered by the committee

Day 1 -14/05/2024

3.1. Agenda Item No 1:

3.1.1. Details of the proposal

Choraikhosra P.P. Land Sand & Stone Mining Permit Area by **LACHIT BRAHMA** located at **CHIRANG,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/455533/2023	SEIAA.3666/2024	14/12/2023	Mining of minerals (1(a))

3.1.2. Deliberations by the committee in previous meetings

Date of SEIAA 1 :06/04/2024

Deliberations of SEIAA 1 :

Photograph furnished in the mining plan does not match with google map image enclosed by proposed mine in the KML file.

Date of SEAC 2 :23/02/2024

Deliberations of SEAC 2 :

iscussions and deliberations is held.

Committee after due deliberation and appraisal is of the opinion for allowing extraction of the Minor al for a quantum of**3,958**cum of **Sand** and **356 cu m** of Stone in 1**(one)** Year**.** This is subject to the tions that the proponent shall have to strictly follow all terms and conditions laid down in the approved g plan and also subject to the conditions that: (a) mining shall be confined and limited to the plot of area g within the GPS coordinates ; (b) the active bank of the river is not disturbed / damaged because of g operation and transportation of mining materials.

3.1.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 0.54Ha and mining area 0.27Ha with a quantity of 3,958cum of Sand and 356 cu m of Stone in 1(one) Year subject to the terms and conditions laid down in the approved mining plan.

3.1.4. Recommendation of SEIAA

Approved

3.1.5. Details of Environment Conditions

3.1.5.1. Specific

Specific conditions by SEAC	
1.	i) Consent to Establish (CTE) and Consent to Operate (CTO) shall be obtained as per the **provisions** of the Air Act 1981 ii) The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. iii) The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geocoordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan.

3.1.5.2. Standard

1(a)	**Mining of minerals**
Air quality monitoring and mitigation measure	

1.	Major approach roads shall be black topped and properly maintained.
1.	The transportation of material shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the material through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.
1.	Vehicular emissions shall be kept under control and regularly monitored. All the vehicles engaged in mining and allied activities shall operate only after obtaining 'PUC' certificate from the authorized pollution testing centres.
1.	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
Corporate Environment Responsibility	
1.	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders.
1.	
Land Recalmation	
1.	Native tree species shall be selected and planted over areas affected by subsidence.
Mining Plan	
1.	Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable.
1.	Mining shall be carried out as per the approved mining plan (including Mine Closure Plan) abiding by mining laws related to non coal mining and the relevant circulars issued by Directorate General Mines Safety (DGMS).
1.	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.
1.	No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
Miscellaneous	
1.	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently.
1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.

1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
1.	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
1.	The project authorities must strictly adhere to the stipulations made by the PCBA and the State Government.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	Concealing factual data or submission of false/fabricated data may result in revocation of this environmental clearance and attract action under the provisions of Environment (Protection) Act, 1986.
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	The above conditions shall be enforced, inter-alia under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986, Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 and the Public Liability Insurance Act, 1991 along with their amendments and Rules and any other orders passed by the Hon'ble Supreme Court of India / High Courts and any other Court of Law relating to the subject matter.
1.	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours
Noise and Vibration monitoring and prevention	
1.	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the MoEF & CC on six-monthly basis.
Public hearing and Human health issues	
1.	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.

1.	PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
1.	PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
1.	PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius
Statutory compliance	
1.	The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the PCBA.
1.	The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC.
1.	Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA Notification, 2006 and its amendments therein
1.	The project proponent shall obtain the necessary permission from the Central Ground Water Authority
Water quality monitoring and mitigation measures	
1.	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
1.	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.
1.	The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.

3.2. Agenda Item No 2:

3.2.1. Details of the proposal

Choraikhosra P.P. Land Sand & Stone Mining Permit Area by **MADA BASUMATARY** located at **CHIRANG,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity**

			(Schedule Item)
SIA/AS/MIN/457286/2023	SEIAA3700/2024	31/12/2023	Mining of minerals (1(a))

3.2.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :28/03/2024

Deliberations of SEAC 1 :

Necessary land documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The Joint Verification Report (JVR) with the Revenue and Forest Department is also placed for scrutiny. The NOC of the Water Resources' Department is also furnished. After due discussions and deliberations the Committee is of the opinion to allow extraction of the minor mineral with the approved quantity measuring **246** cu m of sand-gravel, **208** cu m of gravel and **492** cu m of **sand** in 6 (six) months only as the quantity of minor mineral is too meagre and the entire quantity could be extracted / harvested within the period by the Proponent instead of 2 (two) Years.

Decision: Recommended grant of the EC for 6(six) months.

3.2.3. Deliberations by the SEIAA in current meetings

Site Visit suggested by the SEIAA committee.

3.2.4. Recommendation of SEIAA

Deferred for Site Inspection

3.3. Agenda Item No 3:

3.3.1. Details of the proposal

PATTA LAND SAND MINING PERMIT AREA AT MODIBASTI by **ANJAN GOALA** located at **CACHAR,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/460176/2024	SEIAA3698/2024	29/01/2024	Mining of minerals (1(a))

3.3.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :28/03/2024

Deliberations of SEAC 1 :

Necessary land documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The Joint Verification Report (JVR) with the Revenue and Forest Department is also placed for scrutiny. After due discussions and deliberations the Committee is of the opinion to allow extraction of the minor mineral with the approved quantity of 4,392 cu m of sand in 1 (one) year as the quantity of minor mineral is too meagre and the entire quantity could be extracted / harvested within a period of 1(one) Year only by the Proponent instead of 2 (two) Years. This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan and also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates and (b) the Proponent shall extract the approved quantity of minerals indicated herein with maximum mining depth of up to 2 (two) meters only from the non-mined surface.

Decision: ***Recommended grant of the EC for 1(one) year.***

3.3.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 0.10Ha with a quantity of 4,392 cu m in 2 (two) years (as per the approved Mining Plan) subject to the terms and conditions laid down in the approved mining plan.

3.3.4. Recommendation of SEIAA

Approved

3.3.5. Details of Environment Conditions

3.3.5.1. Specific

SPECIFIC CONDITIONS BY SEAC	
1.	1. The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. 2. The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geocoordinates depicted there in on the pillars/posts, following the GPS coordinates mentioned in the approved mining plan.
Standard Conditions of Mining Minerals	
1.	**Air quality monitoring and mitigation measure** 1. Vehicular emissions shall be kept under control and regularly monitored. All the vehicles engaged in mining and allied activities shall operate only after obtaining 'PUC' certificate from the authorized pollution testing centres. 2. The transportation of materials shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the materials through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated. 3. Major approach roads should be properly maintained with dust suppression measures and

	the river bank in any case must not be damaged. 4. Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
2.	**Corporate Environment Responsibility** 1. Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out. 2. The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/ violation of the environmental/forest/ wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/ violation of the environmental/forest /wildlife norms/conditions and/or shareholders/stake holders.
3.	**Land Recalmation**
4.	**Mining Plan** 1. Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy. 2. No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927. 3. Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable. 4. No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC). **Miscellaneous** 1. The above conditions shall be enforced, inter-alia under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986, Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 and the Public Liability Insurance Act, 1991 along with their amendments and Rules and any other orders passed by the Hon'ble Supreme Court of India / High Courts and any other Court of Law relating to the subject matter. 2. The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours 3. The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by

prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently.

4. The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
5. The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
6. The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
7. The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
8. The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
9. No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
10. Concealing factual data or submission of false/fabricated data may result in revocation of this environmental clearance and attract action under the provisions of Environment (Protection) Act, 1986.
11. The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
12. The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
13. The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.

Noise and Vibration monitoring and prevention

1. Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
2. The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.

Public hearing and Human health issues

1. PP to take measure for installation of Renewable Energy sources in nearby area falling

within 10 km radius

2. PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
3. PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan.
4. Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.

Statutory compliance

1. The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee.
2. The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC.
3. The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
4. The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
5. The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
6. Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA Notification, 2006 and its amendments therein

Water quality monitoring and mitigation measures

1. Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
2. The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.
3. The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.

3.4. Agenda Item No 4:

3.4.1. Details of the proposal

Application for Expansion (additional 7 Nos. of Exploration & Appraisal wells & 5 Nos. of EPUs/QPUs) in earlier granted Environmental Clearance (EC) for the proposed "Onshore Oil & Gas Exploration, Appraisal & Early Production in AA-ONHP-2017/4 Hydrocarbon Block", Jorhat Dist., Assam. by **M/s Vedanta Limited(Division Cairn Oil & Gas)** located at **JORHAT,ASSAM**

Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/IND2/454761/2023	SEIAA.3711/2024	07/02/2024	Off-shore and onshore oil and gas exploration, development and production (1(b))

3.4.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :28/03/2024

Deliberations of SEAC 1 :

For the rest of the drill sites falling in non-forest area, namely NGJ-W 2, NGJN-SW 1, PP has clarified that land acquisition for drill site is in progress.

For the drill sites falling in reserve forest area, namely SP-1 NE, SP-1-East-2, SP-1-East-3 and SP-1-East-4, PP has clarified that the Stage-I forest clearance is yet to be accorded.

After due deliberation, discussion the Committee was of the considered opinion that EC be granted for the well location **#NGJN-W 1.**

3.4.3. Deliberations by the SEIAA in current meetings

EC is approved for the Well location named well location #NGJN-W 1, located at village Napam Borgaon, Mariani, Jorhat.

3.4.4. Recommendation of SEIAA

Approved

3.4.5. Details of Environment Conditions

3.4.5.1. Specific

Standard and Specific Conditions	
1.	**General Conditions:** 1. No further expansion or modifications in the plant, other than mentioned in the EIA Notification, 2006 and its amendments, shall be carried out without prior approval of the Ministry of Environment, Forest and Climate Change/SEIAA, as applicable. In case of deviations or alterations in the project proposal from those submitted to this Ministry for clearance, a fresh reference shall be made to the Ministry/SEIAA/SEAC, as applicable, to assess the adequacy of conditions imposed and to add additional environmental protection measures required, if any. 2. The energy source for lighting purpose shall be preferably LED based, or advanced having

preference in energy conservation and environment betterment.

3. The overall noise levels in and around the plant area shall be kept well within the standards by providing noise control measures including acoustic hoods, silencers, enclosures etc. on all sources of noise generation. The ambient noise levels shall conform to the standards prescribed under the Environment (Protection) Act, 1986 Rules, 1989 viz. 75 dBA (day time) and 70 dBA (night time).

4. The company shall undertake all relevant measures for improving the socio-economic conditions of the surrounding area. CER activities shall be undertaken by involving local villages and administration and shall be implemented. The company shall undertake eco-developmental measures including community welfare measures in the project area for the overall improvement of the environment.

5. The company shall earmark sufficient funds towards capital cost and recurring cost per annum to implement the conditions stipulated by the Ministry of Environment, Forest and Climate Change as well as the State Government along with the implementation schedule for all the conditions stipulated herein. The funds so earmarked for environment management/ pollution control measures shall not be diverted for any other purpose.

6. A copy of the clearance letter shall be sent by the project proponent to concerned Panchayat, Zilla Parishad/ Municipal Corporation, Urban local Body and the local NGO, if any, from whom suggestions/ representations, if any, were received while processing the proposal.

7. The project proponent shall also submit six monthly reports on the status of compliance of the stipulated Environmental Clearance conditions including results of monitored data (both in hard copies as well as by e-mail) to the respective Regional Office of MoEF&CC, the respective Zonal Office of CPCB and SPCB. A copy of Environmental Clearance and six monthly compliance status report shall be posted on the website of the company.

8. The environmental statement for each financial year ending 31st March in Form-V as is mandated shall be submitted to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently, shall also be put on the website of the company along with the status of compliance of environmental clearance conditions and shall also be sent to the respective Regional Offices of MoEF&CC by e-mail.

9. The project proponent shall inform the public that the project has been accorded environmental clearance by the Ministry and copies of the clearance letter are available with the SPCB/Committee and may also be seen at Website of the Ministry and at https://parivesh.nic.in/. This shall be advertised within seven days from the date of issue of the clearance letter, at least in two local newspapers that are widely circulated in the region of which one shall be in the vernacular language of the locality concerned and a copy of the same shall be forwarded to the concerned Regional Office of the Ministry.

10. The project authorities shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities and the date of start of the project.

Specific Conditions:

1. The company shall comply with all the environmental protection measures and safeguards proposed in the documents submitted to the Ministry. All the recommendations made in the EIA/EMP in respect of environmental management, and risk mitigation measures relating to the project shall be implemented.

2. Total fresh water requirement shall not exceed 39 m3/day will be met from groundwater. Prior permission shall be obtained from the concerned regulatory authority.

3. The project proponent will treat and reuse the treated water within the factory and no waste or treated water shall be discharged outside the premises. Mobile ETP coupled with RO shall be installed to reuse the treated water in drilling system. Size of the waste shall be equal to the hole volume+ volume of drill cutting and volume of discarded mud if any. Two feet free board may be left to accommodate rain water. There shall be separate storm water channel and rain water shall not be allowed to mix with waste water. Alternatively, if possible pit less

drilling be practiced instead of above.

4. Approach road shall be made pucca to minimize generation of suspended dust.

5. The project proponent shall make all arrangements for control of noise from the drilling activity. Acoustic enclosure shall be provided for the DG sets along with the adequate stack height as per CPCB guidelines.

6. The company shall construct the garland drain to prevent runoff of any oil containing waste into the nearby water bodies. Separate drainage system shall be created for oil contaminated and non-oil contaminated.

7. Drill cuttings separated from drilling fluid shall be adequately washed and disposed in HDPE lined pit. Waste mud shall be tested for hazardous contaminants and disposed according to HWMH Rules, 2016. No effluent/drilling mud shall be discharged/disposed off into nearby surface water bodies. The company shall comply with the guidelines for disposal of solid waste, drill cutting and drilling fluids for onshore drilling operation notified vide GSR.546(E) dated 30th August, 2005.

8. Oil spillage prevention and mitigation scheme shall be prepared. In case of oil spillage/ contamination, action plan shall be prepared to clean the site by adopting proven technology. The recyclable waste (oily sludge) and spent oil shall be disposed of to the authorized recyclers.

9. The project proponent shall take necessary measures to prevent fire hazards, containing oil spill and soil remediation as needed. At fixed installations or plants use of ground flare shall be explored. At the place of ground flaring, the overhead flaring stack with knockout drums shall be installed to minimize gaseous emissions during operation.

10. The project proponent shall develop a contingency plan for H2S release including all necessary aspects from evacuation to resumption of normal operations. The workers shall be provided with personal H2S detectors in locations of high risk of exposure along with self-containing breathing apparatus.

11. Blow Out Preventor system shall be installed to prevent well blowouts during drilling operations.

12. On completion of the project, necessary measures shall be taken for safe plugging of wells with secured enclosures to restore the drilling site to the original condition. The same shall be confirmed by the concerned regulatory authority from environment safety angle. In case of hydrocarbon not found economically viable, a full abandonment plan shall be implemented for the drilling site in accordance with the applicable DGH / Indian Petroleum Regulations.

13. As per the Ministry's OM dated 30.09.2020 superseding the OM dated 01.05.2018 regarding the Corporate Environmental Responsibility, and as per the action plan proposed by the project proponent to address the socio-economic and environmental issues in the study area, the project proponent, as committed, shall provide education funds in technical training centers/ support in nearby village's schools, support in health care facilities, drinking water supply and funds for miscellaneous activities like solar street lights, battery, solar panel etc., in the nearby villages. The action plan shall to be completed within time as proposed.

14. No lead acid batteries shall be utilized in the project/site.

15. Occupational health surveillance of the workers shall be carried out as per the prevailing Acts and Rules. All workers & employees shall be provided with required safety kits/mask for personal protection.

16. Oil content in the drill cuttings shall be monitored and report & shall sent to the Ministry's Regional Office.

17. The project proponent shall prepare operating manual in respect of all activities, which would cover all safety & environment related issues and measures to be taken for protection. One set of environmental manual shall be made available at the drilling site/ project site. Awareness shall be created at each level of the management. All the schedules and results of environmental monitoring shall be available at the project site office. Remote monitoring of site should be done.

18. PP shall sensitize and create awareness among the people working within the project area

as well as its surrounding area on the ban of Single Use Plastic in order to ensure the compliance of Notification published by MOEFCC on 12th August, 2021. A report along with photographs on the measures taken shall also be included in the six-monthly compliance report being submitted to concerned authority.

Specific Conditions by SEAC

A) CSR activities:

.

I) CSR activities shall be carried out in terms of the approved EMP and compliance of the shall be uploaded in the PARIVESH portal.

B) ECR (Environment Corporate Responsibility):

Green Belt:

I) The proponent shall develop Green Belt around the Wells comprising 33% of the area of the project area and shall ensure planting of indigenous species of plants as are prescribed. For the purpose, the concerned DFO (preferably Social Forestry Division) may be consulted to have the quality planting materials ready in advance in the Departmental Nursery and requisite fund for the purpose should be made available to the DFO in advance.

II) The recommended species of plants in the area could be of species like Nahor (*Mesua ferrea*), Siris (*Albizzia procera*), Hollock (*Terminalia myriocarpa*), Amlokhi (*Phyllanthus emblica*), Hilikha (*Terminalia chebula*),Jamun (*Syzygium cuminii*), Cham (*Artocarpus chaplasha*), Dimaru (*Ficus spp*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*), Bhomora (*Terminalia bellirica*) etc etc.

III) Density of plantations shall be **1,250** plants per Hectare and the Proponent is required to raise plantations in 33% of the area against the Well as prescribed.

IV) The proponent shall take all requisite measures to maintain natural environment in the oil fields and its surroundings are to be maintained in healthy and environment friendly conditions. All necessary measures and precautions must have to be taken by the proponent to prevent any probable / random oil spillage, discharge of effluents in the surroundings. Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

Recommendation: Recommended for **grant of the EC for well location #NGJN-W 1,** located at village Napam Borgaon, Mariani, Jorhat as indicated above.

3.5. Agenda Item No 5:

3.5.1. Details of the proposal

Boginadi Gravel MCA by **ASSAM MINERAL DEVELOPMENT CORPORATION LIMITED** located at **LAKHI MPUR,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/466539/2024	SEIAA.3095/2022	19/03/2024	Mining of minerals (1(a))

3.5.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :28/03/2024

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The consultant **Indian Mine Planners and Consultants** made detailed presentation in presence of the representative of the MD, AMDC Ltd. Due discussions and deliberations is held.

3.5.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 8.8Ha with a quantity of 52,500cu.m of Gravel in 5 (five) years as per the approved Mining Plan @ 10,500cu.m annually subject to the terms and conditions laid down in the approved mining plan.

3.5.4. Recommendation of SEIAA

Approved

3.5.5. Details of Environment Conditions

3.5.5.1. Specific

Specific Conditions by SEAC	
1.	(i) Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO. (ii) The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. (iii) The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan. (iv) Corporate Environment Responsibility (CER) activities shall be carried out/ undertaken by the Proponent and 2% of the total project cost amounting Rs 9.00 Lakh only, shall be carried out in terms of the Budget so approved including Toilet facility for both Male and Female members in the nearest village for an amount of Rs 7 Lakh out of the above total amount. Such activities carried out and complied with are to be uploaded in the PARIVESH portal. (v) The EMP Budget as earmarked and approved by the SEAC for the Environment Protection amounting to Rs 3.50 Lakh only as the Capital Cost and Rs .50 Lakh as recurring cost per year to be spent for the purposes it is approved. vii) The budget for the plantation activities (Green Belt development) shall be carried out / undertaken in Educational Institutions or Govt lands involving local NGOs, School / College students in 30% (2.9 ha) of the area or in areas preferably Dullung RF area which happen to be an elephant corridor located 4.5 km away from the project area. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature for plantations educational institutions, public places and of fodder species around the RF with the consultation of the DFO. The DFO shall identify the activities adequately, prepare a budget adequately (Rs 22 Lakh for plantation activities including maintenance) for the purposes and get the same executed / implemented within 1st 2 (two) years of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of

	the Half Yearly Compliance Report. The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Agor (*Aquillaria malaccensis*), Amlokhi (*Phyllantus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*), Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*), Jamun (*Syzygium cuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Gomari (*Gmelina arborea*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*), Cham Kothal (*Artocarpus chaplasha*) etc etc. Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.
General Condition by SEAC

The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal. 7. The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company. 8. The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.

	9. No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC). 10. Concealing factual data or submission of false/fabricated data may result in revocation of this environmental clearance and attract action under the provisions of Environment (Protection) Act, 1986. 11. The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory. 12. The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions. 13. The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
6.	**Noise and Vibration monitoring and prevention** 1. Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipment (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness program for users to be conducted. Progress in usage of such accessories to be monitored. 2. The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.
7.	**Public hearing and Human health issues** 1. PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius 2. PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required) 3. PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan. 4. Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
8.	**Statutory compliance** 1. The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee. 2. The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC. 3. The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.

	4. The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project 5. The project proponent shall obtain clearance from the National Board for Wildlife, if applicable. 6. Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA Notification, 2006 and its amendments therein
9.	**Water quality monitoring and mitigation measures** 1. Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office. 2. The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government. 3. The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.

3.6. Agenda Item No 6:

3.6.1. Details of the proposal

Drilling of 03 Exploratory Oil and Gas Wells in Block -19, North-East of Margherita town of Tinsukia, District of Assam by **JANAKIRAMAN** located at **TINSUKIA,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/IND2/455931/2024	SEIAA.3710/2024	12/02/2024	Off-shore and onshore oil and gas exploration, development and production (1(b))

3.6.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :28/03/2024

Deliberations of SEAC 1 :

Necessary applications / documents have been duly uploaded, Pre- Feasibilty Report (PFR) and the EMP are submitted by the proponent. Records are placed before the Committee for deliberation and appraisal.

PP has submitted land documents for the Well named **EC-D**, located at Ledo Gaon, Margherita, Dist: Tinsukia and clarified that land acquisition for this drill site is fully completed.

For the remaining **2 Wells**, namely **EC-G & EC-F**, land acquisition is still under process.

After due discussions and deliberations on the submissions made the Committee is of the opinion to recommend grant of the EC for the well location **EC-D.** Rest of the Wells will require clearance of the process of land acquisition based on which the same shall be considered accordingly.

Decision: Recommended for grant of the EC for **Well** named **EC-D.**

3.6.3. Deliberations by the SEIAA in current meetings

EC is approved for the Well location named well named EC-D.

3.6.4. Recommendation of SEIAA

Approved

3.6.5. Details of Environment Conditions

3.6.5.1. Specific

	Standard and Specific Conditions
1.	**General Conditions** 1. No further expansion or modifications in the plant, other than mentioned in the EIA Notification, 2006 and its amendments, shall be carried out without prior approval of the Ministry of Environment, Forest and Climate Change/SEIAA, as applicable. In case of deviations or alterations in the project proposal from those submitted to this Ministry for clearance, a fresh reference shall be made to the Ministry/SEIAA/SEAC, as applicable, to assess the adequacy of conditions imposed and to add additional environmental protection measures required, if any. 2. The energy source for lighting purpose shall be preferably LED based, or advanced having preference in energy conservation and environment betterment. 3. The overall noise levels in and around the plant area shall be kept well within the standards by providing noise control measures including acoustic hoods, silencers, enclosures etc. on all sources of noise generation. The ambient noise levels shall conform to the standards prescribed under the Environment (Protection) Act, 1986 Rules, 1989 viz. 75 dBA (day time) and 70 dBA (night time). 4. The company shall undertake all relevant measures for improving the socio-economic conditions of the surrounding area. CER activities shall be undertaken by involving local villages and administration and shall be implemented. The company shall undertake eco-developmental measures including community welfare measures in the project area for the overall improvement of the environment. 5. The company shall earmark sufficient funds towards capital cost and recurring cost per annum to implement the conditions stipulated by the Ministry of Environment, Forest and

Climate Change as well as the State Government along with the implementation schedule for all the conditions stipulated herein. The funds so earmarked for environment management / pollution control measures shall not be diverted for any other purpose.

6. A copy of the clearance letter shall be sent by the project proponent to concerned Panchayat, Zilla Parishad/ Municipal Corporation, Urban local Body and the local NGO, if any, from whom suggestions/ representations, if any, were received while processing the proposal.

7. The project proponent shall also submit six monthly reports on the status of compliance of the stipulated Environmental Clearance conditions including results of monitored data (both in hard copies as well as by e-mail) to the respective Regional Office of MoEF&CC, the respective Zonal Office of CPCB and SPCB. A copy of Environmental Clearance and six monthly compliance status report shall be posted on the website of the company.

8. The environmental statement for each financial year ending 31st March in Form-V as is mandated shall be submitted to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently, shall also be put on the website of the company along with the status of compliance of environmental clearance conditions and shall also be sent to the respective Regional Offices of MoEF & CC by e-mail.

9. The project proponent shall inform the public that the project has been accorded environmental clearance by the Ministry and copies of the clearance letter are available with the SPCB/Committee and may also be seen at Website of the Ministry and at https://parivesh.nic.in/. This shall be advertised within seven days from the date of issue of the clearance letter, at least in two local newspapers that are widely circulated in the region of which one shall be in the vernacular language of the locality concerned and a copy of the same shall be forwarded to the concerned Regional Office of the Ministry.

10. The project authorities shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities and the date of start of the project.

Specific Conditions

1. The company shall comply with all the environmental protection measures and safeguards proposed in the documents submitted to the Ministry. All the recommendations made in the EIA/EMP in respect of environmental management, and risk mitigation measures relating to the project shall be implemented.

2. Total fresh water requirement shall not exceed 39 m3/day will be met from groundwater. Prior permission shall be obtained from the concerned regulatory authority.

3. The project proponent will treat and reuse the treated water within the factory and no waste or treated water shall be discharged outside the premises. Mobile ETP coupled with RO shall be installed to reuse the treated water in drilling system. Size of the waste shall be equal to the hole volume+ volume of drill cutting and volume of discarded mud if any. Two feet free board may be left to accommodate rain water. There shall be separate storm water channel and rain water shall not be allowed to mix with waste water. Alternatively, if possible pit less drilling be practiced instead of above.

4. Approach road shall be made pucca to minimize generation of suspended dust.

5. The project proponent shall make all arrangements for control of noise from the drilling activity. Acoustic enclosure shall be provided for the DG sets along with the adequate stack height as per CPCB guidelines.

6. The company shall construct the garland drain to prevent runoff of any oil containing waste into the nearby water bodies. Separate drainage system shall be created for oil contaminated and non-oil contaminated.

7. Drill cuttings separated from drilling fluid shall be adequately washed and disposed in HDPE lined pit. Waste mud shall be tested for hazardous contaminants and disposed according to HWMH Rules, 2016. No effluent/drilling mud shall be discharged/disposed off into nearby surface water bodies. The company shall comply with the guidelines for disposal of solid waste, drill cutting and drilling fluids for onshore drilling operation notified vide GSR.546(E) dated 30th August, 2005.

8. Oil spillage prevention and mitigation scheme shall be prepared. In case of oil spillage/

	contamination, action plan shall be prepared to clean the site by adopting proven technology. The recyclable waste (oily sludge) and spent oil shall be disposed of to the authorized recyclers. 9. The project proponent shall take necessary measures to prevent fire hazards, containing oil spill and soil remediation as needed. At fixed installations or plants use of ground flare shall be explored. At the place of ground flaring, the overhead flaring stack with knockout drums shall be installed to minimize gaseous emissions during operation. 10. The project proponent shall develop a contingency plan for H2S release including all necessary aspects from evacuation to resumption of normal operations. The workers shall be provided with personal H2S detectors in locations of high risk of exposure along with self-containing breathing apparatus. 11. Blow Out Preventor system shall be installed to prevent well blowouts during drilling operations. 12. On completion of the project, necessary measures shall be taken for safe plugging of wells with secured enclosures to restore the drilling site to the original condition. The same shall be confirmed by the concerned regulatory authority from environment safety angle. In case of hydrocarbon not found economically viable, a full abandonment plan shall be implemented for the drilling site in accordance with the applicable DGH / Indian Petroleum Regulations. 13. As per the Ministry's OM dated 30.09.2020 superseding the OM dated 01.05.2018 regarding the Corporate Environmental Responsibility, and as per the action plan proposed by the project proponent to address the socio-economic and environmental issues in the study area, the project proponent, as committed, shall provide education funds in technical training centers/ support in nearby village's schools, support in health care facilities, drinking water supply and funds for miscellaneous activities like solar street lights, battery, solar panel etc., in the nearby villages. The action plan shall to be completed within time as proposed. 14. No lead acid batteries shall be utilized in the project/site. 15. Occupational health surveillance of the workers shall be carried out as per the prevailing Acts and Rules. All workers & employees shall be provided with required safety kits/mask for personal protection. 16. Oil content in the drill cuttings shall be monitored and report & shall sent to the Ministry's Regional Office. 17. The project proponent shall prepare operating manual in respect of all activities, which would cover all safety & environment related issues and measures to be taken for protection. One set of environmental manual shall be made available at the drilling site/ project site. Awareness shall be created at each level of the management. All the schedules and results of environmental monitoring shall be available at the project site office. Remote monitoring of site should be done. 18. PP shall sensitize and create awareness among the people working within the project area as well as its surrounding area on the ban of Single Use Plastic in order to ensure the compliance of Notification published by MOEFCC on 12th August, 2021. A report along with photographs on the measures taken shall also be included in the six-monthly compliance report being submitted to concerned authority.
Specific Conditions by SEAC	
1.	**A) CSR activities:** . I) CSR activities shall be carried out in terms of the approved EMP and compliance shall be uploaded in the PARIVESH portal. **B) ECR (Environment Corporate Responsibility)**: **Green Belt:** I) The proponent shall develop Green Belt around the Wells comprising 33% of the area of the

project area and shall ensure planting of indigenous species of plants as are prescribed. For the purpose, the concerned DFO may be consulted to have the quality planting materials ready in advance in the Departmental Nursery and requisite fund for the purpose should be made available to the DFO in time.

II) The recommended species of plants in the area could be of species like Nahor (*Mesua ferrea*), Dalchini (*Cinnamomum* spp), Hollock (*Terminalia myriocarpa*), Hilikha (*Terminalia chebula*), Jamun (*Syzygium cuminii*), Cham (*Artocarpus chaplasha*), Dimaru (*Ficus spp*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*), Som (*Machilus persea*) etc etc.

III) Density of plantations shall be **1,250** plants per Hectare and the Proponent is required to raise plantations in 33% of the area against the **Well** as prescribed.

IV) The proponent shall take all requisite measures to maintain natural environment in the oil fields and its surroundings are to be maintained in healthy and environment friendly conditions. All necessary measures and precautions must have to be taken by the proponent to prevent any probable / random oil spillage, discharge of effluents in the surroundings.
Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.
Recommendation: Recommended for **grant of the EC** for **Well** named **EC-D** as indicated above.

3.7. Agenda Item No 7:

3.7.1. Details of the proposal

DUDHKURI HILL GRANITE QUARRY-A PILOT PROJECT OF AMDCL ON GOVT. LAND by **ASSAM MI NERAL DEVELOPMENT CORPORATION LIMITED** located at **KAMRUP,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/467027/2024	SEIAA.3715/2024	22/03/2024	Mining of minerals (1(a))

3.7.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :28/03/2024

Deliberations of SEAC 1 :

All requisite documents are placed before the Committee for scrutiny and deliberation. Necessary documents submitted in support of the proposal is examined and appraised. The Managing Director, MMDC has made elaborate presentation before the Committee and enlightened the house about the importance of commercial exploitation of the commodity, which otherwise is being mis-utilised without knowing the efficacy of potential industrial use of the mineral in question thereby necessitating the need for a Pilot project for mining through the process of open cast manual mining.

The proposed mining area is a Govt land free from any encumbrances mainly covered with grass and weeds and sparsely covered with bamboo patches. It is also submitted that and prescribed in the mining plan that in terms of the Schedule of mining it is proposed to extract **@5,000 Cu m** in the **first 4** years (1st -4th) followed by **@6,000 Cu m** in the next **9 years (5th-13th)**; **@ 8,000 Cu m** in the next **6 years** (14th-19th) and the remaining quantity of **2,390 Cu m** in the **20th Yea**r.

It is revealed existence of an educational institution (**Thogopara** L.P School) nearby to the proposed mining site and also existence of Lampara village.

Decision: *Recommended for grant of EC*

3.7.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 4.95Ha with a quantity of 1,12,390cu.m Granite in 20 (twenty) years as per the approved Mining Plan @ 6,120cu.m annually subject to the terms and conditions laid down in the approved mining plan.

3.7.4. Recommendation of SEIAA

Approved

3.7.5. Details of Environment Conditions

3.7.5.1. Specific

Specific Conditions by SEAC	
1.	After due deliberation the Committee deemed it appropriate to invoke certain conditions in the EC as under: 1. Development of Green Belt is required to be completed around the periphery of the mining area covering at least **1.5 ha** with suitable species of plants, preferably of evergreen nature. However, it is suggested that the plant species to be planted which are being tolerant to the air / dust pollution should invariably be given priority. Preferred plant species, so suitable for the area shall be Kala Siris (*Albizzia lebbeck*), Kadam (*Neolamarckia cadamba*), Ow tenga *(Dillenia indica*), Thekera (*Garcinia pedunculata*), Cham (*Artocarpus chaplasha*), Bot gos (*Ficus benjamina*), Koros (*Pongamia pinnata*), Gomari (*Gmelina arborea*), Agor

	(*Aquillaria agallocha*), Sal (*Shorea robusta), Mahogoni (Swetenia mahgonii),* Daton / Sarua *(Streblus asper)* while local *Bamboo* species may also be planted around the area selectively in patches. etc etc. 2. The technology involved in mining should ensure environmental best practices to minimize impact on air pollution. 3. Disposal mechanism of various wastes shall need to be adequately dealt and addressed. 4. Use of Green Energy around the Project area shall be adhered to. 5. Environment Management Plan (EMP) is required to be complied with ensuring support by way of livelihood generation to nearby community. Budgetary allocation has to be made and expenditures incurred annually should be submitted as a half yearly compliance report. 6. For the purpose of the EMP budget indicating the activities under the CSR , ECR etc all the details with the proposed targets in physical terms showing financial expenditures are to be accordingly reflected for each year keeping in view the public demand / requirement with due compliance. Activities like educational facilities to children, drinking water facilities, use of solar lights, toilets, health check ups time to time, assistance in farming etc. An amount up to Rs 10 Lakh shall be spent on the CSR activities as per the needs and priority of the School students and villagers around the mining area. 7. In terms of the orders passed by the Hon'ble Apex Court of India in WP (C) No 114/2014 Common Cause and Ors vs Union of India and Ors, the Proponent shall RE-GRASS the mining area including the other adjoining area used for the purposes of mining activity and shall restore the land with plantation activities of fodder species, fruit bearing species, bamboo species etc etc.
General Condition by SEAC	
1.	
Standard Conditions of Mining Minerals	
1.	**<u>Miscellaneous</u>** 1. The above conditions shall be enforced, inter-alia under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986, Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 and the Public Liability Insurance Act, 1991 along with their amendments and Rules and any other orders passed by the Hon'ble Supreme Court of India / High Courts and any other Court of Law relating to the subject matter. 2. The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours 3. The project proponent shall make public the environmental clearance granted for their

	project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently. 4. The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt. 5. The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis. 6. The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal. 7. The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company. 8. The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations. 9. No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC). 10. Concealing factual data or submission of false/fabricated data may result in revocation of this environmental clearance and attract action under the provisions of Environment (Protection) Act, 1986. 11. The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory. 12. The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions. 13. The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
2.	**<u>Air quality monitoring and mitigation measure</u>** 1. Vehicular emissions shall be kept under control and regularly monitored. All the vehicles engaged in mining and allied activities shall operate only after obtaining 'PUC' certificate from the authorized pollution testing centres. 2. The transportation of materials shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the materials through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated. 3. Major approach roads should be properly maintained with dust suppression measures and the river bank in any case must not be damaged.

	4. Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
3.	**Mining Plan** 1. Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy. 2. No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927. 3. Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable. 4. No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
4.	**Corporate Environment Responsibility** 1. Self-environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out. 2. The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/ violation of the environmental/forest/ wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/ violation of the environmental/forest /wildlife norms/conditions and/or shareholders/stake holders.
5.	**Land Reclamation**
6.	**Noise and Vibration monitoring and prevention** 1. Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored. 2. The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.
7.	**Public hearing and Human health issues** 1. PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius 2. PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)

	3. PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan. 4. Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
8.	**Statutory compliance** 1. The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee. 2. The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC. 3. The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project. 4. The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project 5. The project proponent shall obtain clearance from the National Board for Wildlife, if applicable. 6. Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA Notification, 2006 and its amendments therein
9.	**Water quality monitoring and mitigation measures** 1. Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office. 2. The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government. 3. The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.

3.8. Agenda Item No 8:

3.8.1. Details of the proposal

Barak Sand Minor Mineral Unit No. 3 at Vill: Mohanpur Part I, P.O: Katirail, P.S: Katigorah by **ABHAY JAIN**

located at **CACHAR,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/457930/2024	SEIAA. 3420/2023	20/02/2024	Mining of minerals (1(a))

3.8.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :28/03/2024

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for scrutiny and appraisal. The report of the competent authority in the Water Resources' Department containing the restrictions and limitations in mining of the river bed dated 29.01.2024 whereby a distance of 80m from both sides of the river banks are to be left out of mining operations besides other conditions. The consultant Sri Debashis Sengupta representing the **Ultra Tech** made detailed presentation in presence of the representative of the Proponent. Due discussions and deliberations is held.

The Committee after due deliberation and appraisal is pleased to recommend extraction of quantity **@ 17,500** cum of **Sand** annually, for **3 (three)** Years only subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan and also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the revised GPS coordinates ; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials: (c) the Proponent strictly follow the instructions containing the restrictions of mining in the river beds as stipulated the Water Resources' Department and (d) the Proponent is permitted to extract the approved quantity of Sand and Gravel with maximum mining depth of up to 2 (two) meters only from the non-mined surface.

The Committee further is of the opinion that the Proponent shall undertake plantation in areas adjoining the river side or any other suitable area in consultation with the DFO concerned by indigenous species of plants of evergreen species preferably having aesthetic value, evergreen in nature, medicinal and commercial value.

Recommendation: *Recommended for grant of EC*

3.8.3. Deliberations by the SEIAA in current meetings

Site Visit suggested by the SEIAA committee.

3.8.4. Recommendation of SEIAA

Deferred for Site Inspection

3.9. Agenda Item No 9:

3.9.1. Details of the proposal

Proposed Cement and Cement Clinker manufacturing Unit [Cement 0.66 MTPA (OPC 0.132 MTPA, & PPC 0.5

28 MTPA) and Clinker 0.528 MTPA] at Debendranagar, Joom Basti, Badarpurghat, Dist-Karimganj, Assam by M/s Valley Strong Cement (Assam) Ltd. Regarding-Environmental Clearance by **VALLEY STRONG CEMENT S (ASSAM) LIMITED** located at **KARIMGANJ,ASSAM**

3.9.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :28/03/2024

Deliberations of SEAC 1 :

The project Proponent submitted all the relevant documents along with Half Yearly Compliance Report under cover of letter dated 03.11.2023 quoting the reasons of the delay in commissioning of the project beyond the control of the Proponent. The reasons as submitted are financial crisis, COVID-19 Pandemic, Economic Slowdown etc. The Form-6, duly filled in, has also been submitted together with the application. The inspection report of the site conducted by the Member Secretary, PCBA and the SEAC, Assam as submitted vide report dated 27.03.2024 is also placed. The recommendation with suggestions as special conditions are also discussed. The Committee have taken into consideration the factual position relating to the proposal at hand and also discussed the Memorandum containing the clarifications on the amendment of the EIA Notification 2006 with regard to validity of Environment Clearance and after due deliberation the Committee considered it to recommend for extension of validity of the EC up to **3rd Feb, 2026** in terms of the Office Memorandum No. **F.No. 1A3-22/28/2022-1A.111 (E 181584) dated 13.12.2022**.

Upon scrutiny of the material facts placed on record and the deliberations made, the Committe recommend for extension of the EC **up to 03.02.2026** in terms of the Office Memorandum N **F.No.1A3-22/28/2022-1A.111 [181584] Dated 13.12.2022** subject to fulfillment of condition besides the compliance of the stipulations made in the EC.

3.9.3. Deliberations by the SEIAA in current meetings

3.9.4. Recommendation of SEIAA

Deferred for Site Inspection

3.10. Agenda Item No 10:

3.10.1. Details of the proposal

Napani Sarthe Killing Gaon P.P. Land Stone Quarry by **KAMALSING INGJAI** located at **KARBI ANGLONG,A SSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**

SIA/AS/MIN/464199/2024	SEIAA3703/2024	27/02/2024	Mining of minerals (1(a))

3.10.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :28/03/2024

Deliberations of SEAC 1 :

Necessary land documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The non-agricultural land certificate in respect of the land is also furnished and placed for scrutiny. Detailed discussions and deliberations are held. The KML file relating to the project proposal in question is also examined.

After due discussions and deliberations the Committee is of the opinion that since an inspection of an area under a similar project near to the proposed mining area have already been conducted by a sub-Committee in the very recent past no further inspection of the area is warranted in as much as this proposal is for extraction of mineral from a patta land situated in a remote area. The Committee after due deliberation and appraisal is of the opinion for allowing extraction of the Minor Minerals for a quantum of **50,000** cu m of **stone** as per the approved mining plan **@ 25,000** cum of **stone,** annually.

Decision: Recommended for grant of EC

3.10.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 01.34Ha with a quantity of 50,000cu.m of stone for 2 (two) years as per the approved Mining Plan @ 25,000cu.m annually subject to the terms and conditions laid down in the approved mining plan.

3.10.4. Recommendation of SEIAA

Approved

3.10.5. Details of Environment Conditions

3.10.5.1. Specific

SPECIFIC CONDITIONS BY SEAC	
1.	1. This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan; 2. This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates and (b)the proponent shall extract the approved quantity of minerals indicated herein without proper permission from the competent authority regarding use of explosives as may require. 3. The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. 4. The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geocoordinates depicted there in on the pillars/posts, following the GPS coordinates mentioned in the approved mining plan. 5. Plantation activities shall be carried out / undertaken in the educational institutions and Community lands and an amount **of Rs 4 (Four)** Lakh shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen in nature under

	the guidance of the DFO and label the plant species for the benefits of the school students. 6. The recommended species of plants in the locality could be of species like Amlokhi (*Phyllantusemblica*), Hilikha (*Terminalia chebula*), Bael (*Aegle marmelos*), Jalphai (*Elaeocarpusfloribundus*),Arjun (*Terminalia arjuna*), Thekera (*Garcinia pedunculata, Garcinia morella*), Leteku (*Baccaurearammiflora*), Chandan (*Santalum album*), Sajina (*Moringaoleifera*) etc etc. Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.
Standard Conditions of Mining Minerals	
1.	**Mining Plan** 1. Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy. 2. No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions 3. of Indian Forest Act, 1927. 4. Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable. 5. No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
2.	**Land Reclamation**
3.	**Air quality monitoring and mitigation measure** 1. Vehicular emissions shall be kept under control and regularly monitored. All the vehicles engaged in mining and allied activities shall operate only after obtaining 'PUC' certificate from the authorized pollution testing centres. 2. The transportation of materials shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the materials through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated. 3. Major approach roads should be properly maintained with dust suppression measures and the river bank in any case must not be damaged. 4. Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
4.	**Noise and Vibration monitoring and prevention** 1. Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.

	2. The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.
5.	**Miscellaneous** 1. The above conditions shall be enforced, inter-alia under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986, Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 and the Public Liability Insurance Act, 1991 along with their amendments and Rules and any other orders passed by the Hon'ble Supreme Court of India / High Courts and any other Court of Law relating to the subject matter. 2. The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours 3. The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently. 4. The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt. 5. The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis. 6. The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal. 7. The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company. 8. The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations. 9. No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC). 10. Concealing factual data or submission of false/fabricated data may result in revocation of this environmental clearance and attract action under the provisions of Environment (Protection) Act, 1986.

	11. The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory. 12. The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions. 13. The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
6.	**Public hearing and Human health issues** 1. PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius 2. PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required) 3. PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan. 4. Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
7.	**Corporate Environment Responsibility** 1. Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out. 2. The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/ violation of the environmental/forest/ wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/ violation of the environmental/forest /wildlife norms/conditions and/or shareholders/stake holders.
8.	**Statutory compliance** 1. The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee. 2. The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC. 3. The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project. 4. The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project 5. The project proponent shall obtain clearance from the National Board for Wildlife, if applicable. 6. Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA

	Notification, 2006 and its amendments therein
9.	**Water quality monitoring and mitigation measures** 1. Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office. 2. The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government. 3. The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.

3.11. Agenda Item No 11:

3.11.1. Details of the proposal

BORKULOI-BOHA SAND MAHAL PART-I (REV. PORTION) ON KOPILI RIVER BED by **DIVISIONAL F OREST OFFICER** located at **NAGAON,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/453076/2023	SEIAA 3686/2024	01/03/2024	Mining of minerals (1(a))

3.11.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :28/03/2024

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The NOC from the Water Resources' Department is furnished. Due discussions and deliberations is held. The Committee after due deliberation and appraisal is of the opinion for allowing extraction of the Minor Mineral for a quantum of **27,000** cum of **San**d in 2 (two) Years @ **13,500** cum **annually.**

Decision: ***Recommended for grant of the EC***

3.11.3. Deliberations by the SEIAA in current meetings

The proposal is reverted back to the SEAC for showing school in 500mts radius of proposed mining site and there is no visible sand bars in the river above the water level.

3.11.4. Recommendation of SEIAA

Refer-Back to SEAC for Reconsideration

3.12. Agenda Item No 12:

3.12.1. Details of the proposal

M/S RAJEN BRICK FIELD MINING PERMIT AREA by **RAJEN LEKHARU** located at **DIBRUGARH,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/455196/2023	SEIAA 3709/2024	12/12/2023	Mining of minerals (1(a))

3.12.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :28/03/2024

Deliberations of SEAC 1 :

Necessary land documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The Joint Verification Report (JVR) with the Revenue and Forest Department is also placed for scrutiny. After due discussions and deliberations the Committee is of the opinion to allow extraction of the minor mineral with the approved quantity of 3,000 cu m of Ordinary Earth in 1 (one) year as the quantity of minor mineral is too meagre and the entire quantity could be extracted within a period of 1(one) Year only for use of Brick production by the Proponent instead of 2 (two) Years.

Decision: Recommended grant of the EC for 1(one) year.

3.12.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 0.52Ha with a quantity of 3,000 cu m in 2 (two) years (as per the approved Mining Plan) subject to the terms and conditions laid down in the approved mining plan.

3.12.4. Recommendation of SEIAA

Approved

3.12.5. Details of Environment Conditions

3.12.5.1. Specific

SPECIFIC CONDITIONS BY SEAC

1.	1. This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan; 2. This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates and (b) the Proponent shall extract the approved quantity of mineral indicated herein with maximum mining depth of up to 2 (two) meters only from the non-mined surface. 3. That the Proponent shall also invariably obtain the copy of latest CTE/ CTO from the PCB, Assam. 4. That the Proponent shall strictly follow the **Zigzag** methodology for production of bricks. 5. The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. 6. The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geocoordinates depicted there in on the pillars/posts, following the GPS coordinates mentioned in the approved mining plan. 7. The Proponent further must ensure raising Green Belt around the premises in consultation with the DFO for planting of suitable evergreen species of plants all along the periphery of the plot of land which need to be uploaded in the PARIVESH portal.

3.12.5.2. Standard

1(a)	**Mining of minerals**
Air quality monitoring and mitigation measure	
1.	Major approach roads shall be black topped and properly maintained.
1.	The transportation of coal shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the coal through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.
1.	Vehicular emissions shall be kept under control and regularly monitored. All the vehicles engaged in mining and allied activities shall operate only after obtaining ‘PUC’ certificate from the authorized pollution testing centres.
1.	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
Water quality monitoring and mitigation measures	
1.	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
1.	The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.
1.	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.

Noise and Vibration monitoring and prevention	
1.	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.
Mining Plan	
1.	Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable.
1.	No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
1.	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.
1.	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.
Land Recalmation	
1.	Native tree species shall be selected and planted over areas affected by subsidence.
Public hearing and Human health issues	
1.	PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
1.	PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius
1.	PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
1.	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
Statutory compliance	
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned

	State pollution Control Board/ Committee.
1.	The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC.
1.	Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA Notification, 2006 and its amendments therein
Corporate Environment Responsibility	
1.	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders.
1.	Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Miscellaneous	
1.	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently.
1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
1.	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	The above conditions shall be enforced, inter-alia under the provisions of the Water (Prevention & Control of

	Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986, Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 and the Public Liability Insurance Act, 1991 along with their amendments and Rules and any other orders passed by the Hon'ble Supreme Court of India / High Courts and any other Court of Law relating to the subject matter.
1.	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.

3.13. Agenda Item No 13:

3.13.1. Details of the proposal

"1 No. Podumoni Gaon P.P. Land Sand Mining Permit Area" by **PROSANTA BIVAR** located at **GOLAGHAT,ASSAM**			
Proposal For		Application for Validity Extension of EC- Form-6	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/456588/2023	SEIAA.1722/2021	27/12/2023	Mining of minerals (1(a))

3.13.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :23/02/2024

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. Due discussions and deliberations is held.

The Committee after due deliberation and appraisal is of the opinion for allowing extraction of the Minor Mineral for a quantum of **3,750** cum of **Sand** in **1(One)** year**.** This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan and also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the revised GPS coordinates and (b) the PP shall extract / harvest the approved quantity of minerals indicated herein with maximum mining depth of up to 2 (two) meters only from the non-mined surface.

3.13.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 01.22Ha with a quantity of 3,750 cu.m in 2 (two) years (as per the approved Mining Plan) subject to the terms and conditions laid down in the approved mining plan.

3.13.4. Recommendation of SEIAA

Approved

3.13.5. Details of Environment Conditions

3.13.5.1. Specific

Specific Conditions by SEAC	
1.	i) The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. ii) The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan. iii) Plantation activities shall be carried out / undertaken in any educational institution or Govt lands involving local NGOs, School / College students and an amount of **Rs 2 Lakh** (Two Lakh) only shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of Aesthetic value, Medicinal value, of Evergreen nature with the consultation of the DFO and label the plant species for the benefits the school students. Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.13.5.2. Standard

1(a)	**Mining of minerals**
Miscellaneous	
1.	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours
1.	The above conditions shall be enforced, inter-alia under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986, Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 and the Public Liability Insurance Act, 1991 along with their amendments and Rules and any other orders passed by the Hon'ble Supreme Court of India / High Courts and any other Court of Law relating to the subject matter.
1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	Concealing factual data or submission of false/fabricated data may result in revocation of this environmental clearance and attract action under the provisions of Environment (Protection) Act, 1986.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).

1.	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
1.	The project authorities must strictly adhere to the stipulations made by the Pollution Control Board, Assam and the State Government.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the Pollution Control Board, Assam as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
1.	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently.
Corporate Environment Responsibility	
1.	Self environmental audit shall be conducted annually.
1.	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders.
Public hearing and Human health issues	
1.	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
1.	PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
1.	PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
1.	PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius
Land Recalmation	
1.	Native tree species shall be selected and planted over areas affected by subsidence.
Mining Plan	
1.	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use

	of renewable energy.
1.	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.
1.	Mining shall be carried out as per the approved mining plan (including Mine Closure Plan) abiding by mining laws related to non coal mining and the relevant circulars issued by Directorate General Mines Safety (DGMS).
1.	Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable.
1.	No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
Noise and Vibration monitoring and prevention	
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the MoEF & CC/ RO on six-monthly basis.
1.	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
Air quality monitoring and mitigation measure	
1.	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
1.	Vehicular emissions shall be kept under control and regularly monitored. All the vehicles engaged in mining and allied activities shall operate only after obtaining ‘PUC’ certificate from the authorized pollution testing centres.
1.	The transportation of material shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the material through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.
1.	Major approach roads shall be black topped and properly maintained.
Statutory compliance	
1.	Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA Notification, 2006 and its amendments therein
1.	The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned Pollution Control Board, Assam.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in

	case of the diversion of forest land for non-forest purpose involved in the project.
1.	The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
Water quality monitoring and mitigation measures	
1.	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
1.	The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.
1.	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.

3.14. Agenda Item No 14:

3.14.1. Details of the proposal

Dikrong Sand & Gravel Mining Project by **DIVISIONAL FOREST OFFICE** located at **LAKHIMPUR,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/456798/2023	SEIAA. 3436/2023	01/01/2024	Mining of minerals (1(a))

3.14.2. Deliberations by the committee in previous meetings

Date of SEIAA 1 :19/04/2024

Deliberations of SEIAA 1 :

The project proponent required to furnish NOC from concerned Water Resources Department, Govt. of Assam.

Date of SEAC 2 :23/02/2024

Deliberations of SEAC 2 :

Necessary documents submitted in support of the proposal, is placed before the Committee for examination and appraisal. The consultant **Cognizance Research India Private Ltd** made detailed presentation. Due discussions and deliberations is held.

The Committee after due deliberation and appraisal is pleased to recommend extraction of quantity **@ 20,000** cum of **Sand** and @ **27,000** cu m of **Gravel**, annually, for 5 **(five) Years** only subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan and also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the revised GPS coordinates ; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials and (c) the Proponent is permitted to extract the approved quantity of Sand and Gravel with maximum mining depth of up to 2 (two) meters only from the non-mined surface.

3.14.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 10.00Ha with a quantity of 2,36,848.20cu.m of Sand and Gravel in 5 (five) years as per the approved Mining Plan @ 20,000cum Sand and @ 27,369.64cum Gravel, annually subject to the terms and conditions laid down in the approved mining plan.

3.14.4. Recommendation of SEIAA

Approved

3.14.5. Details of Environment Conditions

3.14.5.1. Specific

Specific Conditions by SEAC	
1.	i) The DFO shall comply with necessary formalities for transfer of the EC to the lessee with due NOC for filing application to the SEIAA before allowing mining so that the entire accountability in mining is vested on the lessee / Proponent with the same terms and conditions stipulated in the EC as per the EIA Notification, 2006. ii) Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO. iii) The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. iv) The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan. v) Corporate Environment Responsibility (CER) activities shall be carried out / undertaken by the Proponent and 2% of the total project cost (**Rs 13.84** Lakh) only, shall be done as approved. Such activities carried out and complied with are to be uploaded in the PARIVESH portal. vi) The budget to be earmarked for the Environment Protection approved by the SEAC amounting to **Rs 2.00 Lakh** only as the Capital Cost and **Rs 3.70 Lakh** as recurring cost per year. vii) Plantation activities shall be carried out / undertaken in any Educational Institution or Govt lands involving local NGOs, School / College students in **30% (3 Ha)** of the area. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people

	and specially the school students. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st 2 (two) years of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report. The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Agor (*Aquillaria malaccensis*), Amlokhi (*Phyllantus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*), Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*), Mohaneem (*Azedirachta indica*), Jamun (*Syzygium cuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Sewali phul (*Nyctanthes arbor tris tis*), Giloi (*Tinospora cordiflia*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*) etc etc. Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.14.5.2. Standard

1(a)	**Mining of minerals**
Miscellaneous	
1.	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours
1.	The above conditions shall be enforced, inter-alia under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986, Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 and the Public Liability Insurance Act, 1991 along with their amendments and Rules and any other orders passed by the Hon'ble Supreme Court of India / High Courts and any other Court of Law relating to the subject matter.
1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	Concealing factual data or submission of false/fabricated data may result in revocation of this environmental clearance and attract action under the provisions of Environment (Protection) Act, 1986.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The project authorities must strictly adhere to the stipulations made by the Pollution Control Board, Assam and the State Government.
1.	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as

	amended subsequently and put on the website of the company.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
1.	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently.
Corporate Environment Responsibility	
1.	Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
1.	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders.
Public hearing and Human health issues	
1.	PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius
1.	PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
1.	PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
1.	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
Land Recalmation	
1.	Native tree species shall be selected and planted over areas affected by subsidence.
Mining Plan	
1.	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.
1.	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.
1.	Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate

	legislations made there-under as applicable.
1.	No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
Noise and Vibration monitoring and prevention	
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the MoEF & CC /RO on six-monthly basis.
1.	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
Air quality monitoring and mitigation measure	
1.	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
1.	Vehicular emissions shall be kept under control and regularly monitored. All the vehicles engaged in mining and allied activities shall operate only after obtaining ‘PUC’ certificate from the authorized pollution testing centres.
1.	The transportation of material shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the material through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.
1.	Major approach roads shall be black topped and properly maintained.
Statutory compliance	
1.	Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA Notification, 2006 and its amendments therein
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the Pollution Control Board, Assam.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The Environmental clearance shall be subject to orders of Hon’ble Supreme Court of India, Hon’ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
1.	The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC.
Water quality monitoring and mitigation measures	
1.	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.

1.	The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.
1.	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.

3.15. Agenda Item No 15:

3.15.1. Details of the proposal

GOVT PERMIT AREA OF BARNADI SAND MAHAL 9 by **BAKSA FOREST DIVISION MUSHALPUR** located at **BAKSA,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/462301/2024	SEIAA 3688/2024	09/02/2024	Mining of minerals (1(a))

3.15.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :28/03/2024

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The NOC from the Water Resources' Department is furnished. The Committee after due deliberation and appraisal is of the opinion for allowing extraction of the Minor Mineral for a quantum of **1,46,095** cum of **San**d in 5 (five) Years @ **29,219** cum, annually. Due discussions and deliberations is held. The Committee after due deliberation and appraisal is of the opinion for allowing extraction of the Minor Mineral for a quantum of **1,46,095** cum of **San**d in 5 (five) Years @ **29,219** cum, annually. This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan and also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates ; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials and (c)the Proponent shall extract / harvest the approved quantity of minerals indicated herein with maximum mining depth of up to 2 (two) meters only from the non-mined surface.

Recommendation: ***Recommended for grant of the EC for 5(five) Years.***

3.15.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 04.98 Ha and mining area 3.95Ha with a quantity of 1,46,095 cum of Sand in 5 (five) Years @ 29,219 cum, annually subject to the terms and conditions laid down in the approved mining plan.

3.15.4. Recommendation of SEIAA

Approved

3.15.5. Details of Environment Conditions

3.15.5.1. Specific

SPECIFIC CONDITIONS BY SEAC	
1.	i) Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF& CC for non manual extraction which need to be adhered to by the concerned DFO. ii) The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. iii) The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geocoordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan. iv) CSR activities shall be carried out / undertaken by the Proponent and 2% of the minimum total project cost **(Rs 4.00 Lakh)** shall be earmarked for the purposes. Necessary drinking water facilities and provision for solar lights shall be made in the near by existing village. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 2 (two) years time of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report. v) Plantation activities shall be carried out / undertaken in one of the educational institutions and an amount **of Rs 3(three)** Lakh shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen in nature under the guidance of the DFO and label the plant species for the benefits of the school students. The recommended species of plants in the locality could be of species like Amlokhi (*Phyllantusemblica*), Hilikha (*Terminalia chebula*), Bael (*Aegle marmelos*), Jalphai (*Elaeocarpusfloribundus*),Arjun (*Terminalia arjuna*), Thekera (*Garcinia pedunculata, Garcinia morella*), Leteku (*Baccaurearammiflora*), Siris (*Albizziaprocera*), Jamun (*Syzygiumcuminii*) , *Khair (Acacia Catechu) etc* etc. Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.
Standard Conditions of Mining Minerals	
1.	**<u>Public hearing and Human health issues</u>** 1. PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius 2. PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required) 3. PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan. 4. Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
2.	**<u>Miscellaneous</u>** 1. The above conditions shall be enforced, inter-alia under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution)

Act, 1981, the Environment (Protection) Act, 1986, Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 and the Public Liability Insurance Act, 1991 along with their amendments and Rules and any other orders passed by the Hon'ble Supreme Court of India / High Courts and any other Court of Law relating to the subject matter.

2. The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours
3. The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently.
4. The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
5. The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
6. The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
7. The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
8. The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
9. No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
10. Concealing factual data or submission of false/fabricated data may result in revocation of this environmental clearance and attract action under the provisions of Environment (Protection) Act, 1986.
11. The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
12. The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
13. The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the

	Regional Office by furnishing the requisite data / information/monitoring reports.
3.	**Air quality monitoring and mitigation measure** 1. Vehicular emissions shall be kept under control and regularly monitored. All the vehicles engaged in mining and allied activities shall operate only after obtaining 'PUC' certificate from the authorized pollution testing centres. 2. The transportation of materials shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the materials through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated. 3. Major approach roads should be properly maintained with dust suppression measures and the river bank in any case must not be damaged. 4. Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
4.	**Land Recalmation**
5.	**Water quality monitoring and mitigation measures** 1. Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office. 2. The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government. 3. The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.
6.	**Corporate Environment Responsibility** 1. Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out. 2. The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/ violation of the environmental/forest/ wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/ violation of the environmental/forest /wildlife norms/conditions and/or shareholders/stake holders.

7.	**Mining Plan** 1. Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy. 2. No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927. 3. Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable. 4. No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
8.	**Noise and Vibration monitoring and prevention** 1. Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored. 2. The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.
9.	**Statutory compliance** 1. The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee. 2. The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC. 3. The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project. 4. The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project 5. The project proponent shall obtain clearance from the National Board for Wildlife, if applicable. 6. Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA Notification, 2006 and its amendments therein

3.16. Agenda Item No 16:

3.16.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :28/03/2024

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The NOC from the Water Resources' Department is furnished. Due discussions and deliberations is held. It is opined that since the quantity **4,500 cu m** is too meagre the entire quantity could be extracted / harvested within a period of 1(one) Year only by the Proponent. The Committee after due deliberation and appraisal is of the opinion for allowing extraction of the Minor Mineral for a quantum o f **4,500** cum of **San**d in1 (one) Year only instead of 2 (two) Years @ **2**,**250**cu m **annually.**

Recommendation: ***Recommended for grant of EC for a period of 1(one) Year only.***

3.16.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 0.37Ha with a quantity of 4,500cu.m of Sand in 2 (two) years (as per the approved Mining Plan) @ 2,250cum, annually subject to the terms and conditions laid down in the approved mining plan.

3.16.4. Recommendation of SEIAA

Approved

3.16.5. Details of Environment Conditions

3.16.5.1. Specific

SPECIFIC CONDITIONS BY SEAC	
1.	i) Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO. ii) The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. iii) The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars/posts, following the GPS coordinates mentioned in the approved mining plan.
GENERAL CONDITIONS BY SEAC	

1.	**1.** This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan; **2.** This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials and (c)the Proponent shall extract / harvest the approved quantity of minerals indicated herein with maximum mining depth of up to 2 (two) meters only from the non-mined surface.
Standard Conditions of Mining Minerals	
1.	**<u>Noise and Vibration monitoring and prevention</u>** 1. Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored. 2. The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.
2.	**<u>Air quality monitoring and mitigation measure</u>** 1. Vehicular emissions shall be kept under control and regularly monitored. All the vehicles engaged in mining and allied activities shall operate only after obtaining 'PUC' certificate from the authorized pollution testing centres. 2. The transportation of materials shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the materials through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated. 3. Major approach roads should be properly maintained with dust suppression measures and the river bank in any case must not be damaged. 4. Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
3.	**<u>Public hearing and Human health issues</u>** 1. PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius 2. PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required) 3. PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan. 4. Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.

4.	**Water quality monitoring and mitigation measures** 1. Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office. 2. The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government. 3. The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.
5.	**Corporate Environment Responsibility** 1. Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out. 2. The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/ violation of the environmental/forest/ wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/ violation of the environmental/forest /wildlife norms/conditions and/or shareholders/stake holders.
6.	**Statutory compliance** 1. The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee. 2. The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC. 3. The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project. 4. The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project 5. The project proponent shall obtain clearance from the National Board for Wildlife, if applicable. 6. Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA Notification, 2006 and its amendments therein
7.	**Mining Plan**

	1. Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy. 2. No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927. 3. Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable. 4. No change in mining method i.e. UG to OC, calendar program and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
8.	**Miscellaneous** 1. The above conditions shall be enforced, inter-alia under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986, Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 and the Public Liability Insurance Act, 1991 along with their amendments and Rules and any other orders passed by the Hon'ble Supreme Court of India / High Courts and any other Court of Law relating to the subject matter. 2. The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours 3. The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently. 4. The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt. 5. The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis. 6. The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal. 7. The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of

	the company. 8. The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations. 9. No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC). 10. Concealing factual data or submission of false/fabricated data may result in revocation of this environmental clearance and attract action under the provisions of Environment (Protection) Act, 1986. 11. The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory. 12. The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions. 13. The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
9.	**Land Reclamation**

3.17. Agenda Item No 17:

3.17.1. Details of the proposal

Choto Malgaon Part-II P.P. Land Ordinary Earth Mining Permit Area by **MANSING BASUMATARY** located at **KOKRAJHAR,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/460382/2024	SEIAA 3706/2024	02/03/2024	Mining of minerals (1(a))

3.17.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :28/03/2024

Deliberations of SEAC 1 :

Necessary land documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The Joint Verification Report (JVR) with the Revenue and Forest Department is also placed for scrutiny. After due discussions and deliberations the Committee is of the opinion to allow extraction of the minor mineral with the approved quantity of 6,996 cu m of Ordinary Earth in 1 (one) year as the quantity of minor mineral is too meagre and the entire quantity could be extracted within a period of 1(one) Year only by the Proponent instead of 2 (two) Years. This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan and also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates and (b) the Proponent shall extract the approved quantity of mineral indicated herein with maximum mining depth of up to 2 (two) meters only from the non-mined surface.

Decision: Recommended grant of the EC for 1(one) year.

3.17.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 0.64Ha with a quantity of 6,996 cu m in 2 (two) years as per approved mining plan subject to the terms and conditions laid down in the approved mining plan.

3.17.4. Recommendation of SEIAA

Approved

3.17.5. Details of Environment Conditions

3.17.5.1. Specific

SPECIFIC CONDITIONS BY SEAC	
1.	1. The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. 2. The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo coordinates depicted there in on the pillars/posts, following the GPS coordinates mentioned in the approved mining plan.
Standard Conditions of Mining Minerals	
1.	**<u>Miscellaneous</u>** 1. 3.18. Agenda Item No 18:

3.18.1. Details of the proposal

Construction of Proposed B+G+18 Residential cum Commercial Building, Garchuk, Guwahati, Assam by **UTTA RAYAN DEVELOPERS PRIVATE LIMITED** located at **KAMRUP METRO,ASSAM**			
Proposal For		Transfer of EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/INFRA2/469985/2024	SEIAA. 3534/2023	19/04/2024	Building / Construction (8(a))

3.18.2. Deliberations by the committee in previous meetings

N/A

3.18.3. Deliberations by the SEIAA in current meetings

Transfer of EC is approved. Earlier EC is granted in the name of M/S Agarwalla Brothers, as per the proponent applied for transfer the Environment Clearance in the name of M/S Uttarayan Developers Pvt. Ltd. Accordingly all necessary documents are submitted by the Project Proponent in Parivesh Portal.

3.18.4. Recommendation of SEIAA

Approved

3.18.5. Details of Environment Conditions

3.18.5.1. Specific

Specific Condition by SEIAA	
1.	All the other terms and conditions mentioned in the EC letter dated 04/04/2024 shall remains the same.

3.19. Agenda Item No 19:

3.19.1. Details of the proposal

Expansion of Commercial cum Residential Project "Galaxy Mixed Use Development" at Village- Barsajai, Mouza- Beltola, Guwahati, Assam by M/s Galaxy Infra Creations Pvt. Ltd. by **GALAXY INFRA CREATIONS PRIVATE LIMITED** located at **KAMRUP METRO,ASSAM**			
Proposal For		Application for Corrigendum	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**

3.19.2. Deliberations by the committee in previous meetings

N/A

3.19.3. Deliberations by the SEIAA in current meetings

Corrigendum of EC is approved for the correction of the dag no is 3514(N) instead of 3414(N).

3.19.4. Recommendation of SEIAA

Approved

3.19.5. Details of Environment Conditions

3.19.5.1. Specific

Specific condition by SEIAA	
1.	All the other terms and conditions mentioned in the EC letter dated 04/04/2024 shall remains the same.

3.20. Agenda Item No 20:

3.20.1. Details of the proposal

Application for Expansion (additional 4 nos. of E&A wells & 4 nos. of EPUs/QPUs) in "Onshore Oil & Gas Expl oration, Appraisal & Early Production in AAONHP-2017/3 Hydrocarbon Block", Tinsukia District, Assam by **M/s Vedanta Limited(Division Cairn Oil & Gas)** located at **TINSUKIA,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/IND2/454808/ 2023	SEIAA. 3712/2024	07/02/2024	Off-shore and onshore oil and gas explorat ion, development and production (1(b))

3.20.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :28/03/2024

Deliberations of SEAC 1 :

PP has submitted land documents for well name **Jagun North-1**, located at village Tikri Block, Margherita, Tinsukia and clarified that land acquisition for this drill site is fully completed. Due discussions and deliberations are held.

After deliberation the Committee is of the considered view that EC be granted for the Well location named **Jagun North-1.**

3.20.3. Deliberations by the SEIAA in current meetings

EC is approved for the Well location named **Jagun North-1** located at village Tikri Block, Margherita, Tinsukia.

3.20.4. Recommendation of SEIAA

Approved

3.20.5. Details of Environment Conditions

3.20.5.1. Specific

	Standard and Specific Conditions
1.	**General Conditions:** 1. No further expansion or modifications in the plant, other than mentioned in the EIA Notification, 2006 and its amendments, shall be carried out without prior approval of the Ministry of Environment, Forest and Climate Change/SEIAA, as applicable. In case of deviations or alterations in the project proposal from those submitted to this Ministry for clearance, a fresh reference shall be made to the Ministry/SEIAA/SEAC, as applicable, to assess the adequacy of conditions imposed and to add additional environmental protection measures required, if any. 2. The energy source for lighting purpose shall be preferably LED based, or advanced having preference in energy conservation and environment betterment. 3. The overall noise levels in and around the plant area shall be kept well within the standards by providing noise control measures including acoustic hoods, silencers, enclosures etc. on all sources of noise generation. The ambient noise levels shall conform to the standards prescribed under the Environment (Protection) Act, 1986 Rules, 1989 viz. 75 dBA (day time) and 70 dBA (night time). 4. The company shall undertake all relevant measures for improving the socio-economic conditions of the surrounding area. CER activities shall be undertaken by involving local villages and administration and shall be implemented. The company shall undertake eco-developmental measures including community welfare measures in the project area for the overall improvement of the environment. 5. The company shall earmark sufficient funds towards capital cost and recurring cost per annum to implement the conditions stipulated by the Ministry of Environment, Forest and Climate Change as well as the State Government along with the implementation schedule for all the conditions stipulated herein. The funds so earmarked for environment management/ pollution control measures shall not be diverted for any other purpose. 6. A copy of the clearance letter shall be sent by the project proponent to concerned Panchayat, Zilla Parishad / Municipal Corporation, Urban local Body and the local NGO, if any, from whom suggestions/ representations, if any, were received while processing the proposal. 7. The project proponent shall also submit six monthly reports on the status of compliance of the stipulated Environmental Clearance conditions including results of monitored data (both in hard copies as well as by e-mail) to the respective Regional Office of MoEF & CC, the respective Zonal Office of CPCB and SPCB. A copy of Environmental Clearance and six monthly compliance status report shall be posted on the website of the company. 8. The environmental statement for each financial year ending 31st March in Form-V as is mandated shall be submitted to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently, shall also be put on the website of the company along with the status of compliance of environmental clearance conditions and shall also be sent to the respective Regional Offices of MoEF & CC by e-mail. 9. The project proponent shall inform the public that the project has been accorded environmental clearance by the Ministry and copies of the clearance letter are available with the SPCB/Committee and may also be seen at Website of the Ministry and at https://parivesh.nic.in/. This shall be advertised within seven days from the date of issue of the clearance letter, at least in two local newspapers that are widely circulated in the region of which one shall be in the vernacular language of the locality concerned and a copy of the same shall be forwarded to the concerned Regional Office of the Ministry. 10. The project authorities shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities and the date of start of the project. **<u>Specific Conditions</u>**

1. The company shall comply with all the environmental protection measures and safeguards proposed in the documents submitted to the Ministry. All the recommendations made in the EIA/EMP in respect of environmental management, and risk mitigation measures relating to the project shall be implemented.
2. Total fresh water requirement shall not exceed 39 m3/day will be met from groundwater. Prior permission shall be obtained from the concerned regulatory authority.
3. The project proponent will treat and reuse the treated water within the factory and no waste or treated water shall be discharged outside the premises. Mobile ETP coupled with RO shall be installed to reuse the treated water in drilling system. Size of the waste shall be equal to the hole volume+ volume of drill cutting and volume of discarded mud if any. Two feet free board may be left to accommodate rain water. There shall be separate storm water channel and rain water shall not be allowed to mix with waste water. Alternatively, if possible pit less drilling be practiced instead of above.
4. Approach road shall be made pucca to minimize generation of suspended dust.
5. The project proponent shall make all arrangements for control of noise from the drilling activity. Acoustic enclosure shall be provided for the DG sets along with the adequate stack height as per CPCB guidelines.
6. The company shall construct the garland drain to prevent runoff of any oil containing waste into the nearby water bodies. Separate drainage system shall be created for oil contaminated and non-oil contaminated.
7. Drill cuttings separated from drilling fluid shall be adequately washed and disposed in HDPE lined pit. Waste mud shall be tested for hazardous contaminants and disposed according to HWMH Rules, 2016. No effluent/drilling mud shall be discharged/disposed off into nearby surface water bodies. The company shall comply with the guidelines for disposal of solid waste, drill cutting and drilling fluids for onshore drilling operation notified vide GSR.546(E) dated 30th August, 2005.
8. Oil spillage prevention and mitigation scheme shall be prepared. In case of oil spillage/ contamination, action plan shall be prepared to clean the site by adopting proven technology. The recyclable waste (oily sludge) and spent oil shall be disposed of to the authorized recyclers.
9. The project proponent shall take necessary measures to prevent fire hazards, containing oil spill and soil remediation as needed. At fixed installations or plants use of ground flare shall be explored. At the place of ground flaring, the overhead flaring stack with knockout drums shall be installed to minimize gaseous emissions during operation.
10. The project proponent shall develop a contingency plan for H2S release including all necessary aspects from evacuation to resumption of normal operations. The workers shall be provided with personal H2S detectors in locations of high risk of exposure along with self-containing breathing apparatus.
11. Blow Out Preventor system shall be installed to prevent well blowouts during drilling operations.
12. On completion of the project, necessary measures shall be taken for safe plugging of wells with secured enclosures to restore the drilling site to the original condition. The same shall be confirmed by the concerned regulatory authority from environment safety angle. In case of hydrocarbon not found economically viable, a full abandonment plan shall be implemented for the drilling site in accordance with the applicable DGH / Indian Petroleum Regulations.
13. As per the Ministry's OM dated 30.09.2020 superseding the OM dated 01.05.2018 regarding the Corporate Environmental Responsibility, and as per the action plan proposed by the project proponent to address the socio-economic and environmental issues in the study area, the project proponent, as committed, shall provide education funds in technical training centers/ support in nearby village's schools, support in health care facilities, drinking water supply and funds for miscellaneous activities like solar street lights, battery, solar panel etc., in the nearby villages. The action plan shall to be completed within time as proposed.
14. No lead acid batteries shall be utilized in the project/site.

15. Occupational health surveillance of the workers shall be carried out as per the prevailing Acts and Rules. All workers & employees shall be provided with required safety kits/mask for personal protection.

16. Oil content in the drill cuttings shall be monitored and report & shall sent to the Ministry's Regional Office.

17. The project proponent shall prepare operating manual in respect of all activities, which would cover all safety & environment related issues and measures to be taken for protection. One set of environmental manual shall be made available at the drilling site/ project site. Awareness shall be created at each level of the management. All the schedules and results of environmental monitoring shall be available at the project site office. Remote monitoring of site should be done.

18. PP shall sensitize and create awareness among the people working within the project area as well as its surrounding area on the ban of Single Use Plastic in order to ensure the compliance of Notification published by MOEFCC on 12th August, 2021. A report along with photographs on the measures taken shall also be included in the six-monthly compliance report being submitted to concerned authority.

.

I) CSR activities shall be carried out in terms of the approved EMP and compliance of the shall be uploaded in the PARIVESH portal.

B)ECR (Environment Corporate Responsibility**)**:

Green Belt:

I)The proponent shall develop Green Belt around the Wells comprising 33% of the area of the project area and shall ensure planting of indigenous species of plants as are prescribed. For the purpose, the concerned DFO (preferably Social Forestry Division) may be consulted to have the quality planting materials ready in advance in the Departmental Nursery and requisite fund for the purpose should be made available to the DFO in advance.

II) The recommended species of plants in the area could be of species like Nahor (*Mesua ferrea*), Siris (*Albizzia procera*), Hollock (*Terminalia myriocarpa*), Amlokhi (*Phyllanthus emblica*), Hilikha (*Terminalia chebula*), Jamun (*Syzygiumcuminii*), Bhomora (*Terminalia bellirica*), Cham (*Artocarpus chaplasha*), Dimaru (*Ficusspp*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*) etc etc.

III) Density of plantations shall be 1,250 plants per Hectare and the Proponent is required to raise plantations in 33% of the area against the Well as prescribed.

IV) The proponent shall take all requisite measures to maintain natural environment in the oil fields and its surroundings are to be maintained in healthy and environment friendly conditions. All necessary measures and precautions must have to be taken by the proponent to prevent any probable / random oil spillage, discharge of effluents in the surroundings.

Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

Recommendation: Recommended for grant of the EC for **Well** location **Jagun North-1**, located at village Tikri Block, Margherita, Tinsukia.

Subject: Grant of EC under the provision of the EIA Notification 2006-regarding.

Sir/Madam,

This is in reference to your application for Grant of EC under the provision of the EIA Notification 2006-regarding in respect of project GOVT PERMIT AREA OF BARNADI SAND MAHAL 9 submitted to State Environment Impact Assessment Authority(SEIAA) & State Expert Appraisal Committee (SEAC) vide proposal number SIA/AS/MIN/462301/2024 dated 09/02/2024.

2. The particulars of the proposal are as below :

(i) EC Identification No.	EC24C0107AS5864926N
(ii) File No.	SEIAA 3688/2024
(iii) Clearance Type	EC
(iv) Category	B2
(v) Project/Activity Included Schedule No.	1(a) Mining of minerals
(vii) Name of Project	GOVT PERMIT AREA OF BARNADI SAND MAHAL 9
(viii) Name of Company/Organization	BAKSA FOREST DIVISION MUSHALPUR
(ix) Location of Project (District, State)	BAKSA, ASSAM
(x) Issuing Authority	SEIAA
(xii) Applicability of General Conditions	yes
(xiii) Applicability of Specific Conditions	yes

In view of the particulars given in the Para 1 above, the project proposal interalia including Form-1(Part A and B) were submitted to the Ministry for an appraisal by the State Environment Impact Assessment Authority(SEIAA) & State Expert Appraisal Committee (SEAC) in the Ministry under the provision of EIA notification 2006 and its subsequent amendments.

The above-mentioned proposal has been considered by State Environment Impact Assessment Authority (SEIAA) & State

Expert Appraisal Committee (SEAC) in the meeting held on 06/04/2024. The minutes of the meeting and all the Application and documents submitted (viz. Form-1 Part A and Part B) are available on PARIVESH portal which can be accessed by scanning the QR Code above.

The brief about configuration of plant/equipment, products and by products and salient features of the project along with environment settings, as submitted by the Project proponent in Form-1 (Part A and B) /EIA & EMP Reports/presented during SEIAA are annexed to this EC as Annexure (1).

The SEIAA, in its meeting held on 06/04/2024, based on information & clarifications provided by the project proponent and after detailed deliberations recommended the proposal for grant of EC under the provision of EIA Notification, 2006 and as amended thereof subject to stipulation of specific and general conditions as detailed in Annexure (2).

The SEIAA has examined the proposal in accordance with the Environment Impact Assessment (EIA) Notification, 2006 & further amendments thereto and after accepting the recommendations of the State Environment Impact Assessment Authority (SEIAA) & State Expert Appraisal Committee (SEAC) hereby decided to grant EC for instant proposal of Divisional Forest Division, Baksa, Assam under the provisions of EIA Notification, 2006 and as amended thereof.

The Ministry reserves the right to stipulate additional conditions, if found necessary.

The EC to the aforementioned project is under provisions of EIA Notification, 2006. It does not tantamount to approvals/consent/permissions etc. required to be obtained under any other Act/Rule/regulation. The Project Proponent is under obligation to obtain approvals /clearances under any other Acts/ Regulations or Statutes, as applicable, to the project.

This issues with the approval of the Competent Authority.

The extraction of sand from the area within the limits of the GPS Co-ordinates as under:

Longitude Latitude

1. $91^0$40'12.284" E $26^0$37'52.499" N
2. $91^0$40'10.375" E $26^0$37'46.813" N
3. $91^0$40'0.278" E $26^0$37'47.043" N
4. $91^0$40'2.924" E $26^0$37'53.185" N

EC is approved for project area allotted 04.98 Ha and mining area 3.95Ha with a quantity of 1,46,095cu.m of Sand in 5 (five) Years @ 29,219cu.m annually subject to the terms and conditions laid down in the approved mining plan.

Copy To

1. The Joint Secretary, Ministry of Environment, Forest and Climate Change, Government of India, MOEF&CC, Indira Paryavaran Bhawan, Jorbagh Rd, New Delhi-110003.
2. The Secretary to the Govt. of Assam, Environment & Forest Department, Dispur, Guwahati-6 Cum Member Secretary, SEIAA, Assam for favour of kind information.
3. The P.C.C.F, HoFF, Govt. of Assam, Panjabari, Guwahati-37 for favour of kind information.
4. The Divisional Forest Officer, Baksa Forest Division, Mushalpur, Dist. Baksa, Assam for information & necessary action to ensure that all **Specific Conditions & General Condition** are complied with.
5. The Integrated Regional Office, Ministry of Environment, Forest & Climate Change, 4th Floor, Housefed Building, G.S. Road, Rukminigaon, Guwahati-22 for kind information.
6. Office Copy.

Annexure 1

Specific EC Conditions for (Mining Of Minerals)

1. Specific Conditions By Seac

S. No	EC Conditions
1.1	i) Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF& CC for non manual extraction which need to be adhered to by the concerned DFO. ii) The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. iii) The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geocoordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan. iv) CSR activities shall be carried out / undertaken by the Proponent and 2% of the minimum total project cost **(Rs 4.00 Lakh)** shall be earmarked for the purposes. Necessary drinking water facilities and provision for solar lights shall be made in the near by existing village. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 2 (two) years time of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report. v) Plantation activities shall be carried out / undertaken in one of the educational institutions and an amount **of Rs 3(three)** Lakh shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen in nature under the guidance of the DFO and label the plant species for the benefits of the school students. The recommended species of plants in the locality could be of species like Amlokhi (*Phyllantusemblica*), Hilikha (*Terminalia chebula*), Bael (*Aegle marmelos*), Jalphai (*Elaeocarpusfloribundus*),Arjun (*Terminalia arjuna*), Thekera (*Garcinia pedunculata, Garcinia morella*), Leteku (*Baccaurearammiflora*), Siris (*Albizziaprocera*), Jamun (*Syzygiumcuminii*) , *Khair (Acacia Catechu) etc* etc. Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

2. Standard Conditions Of Mining Minerals

S. No	EC Conditions
2.1	**<u>Public hearing and Human health issues</u>** 1. PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius 2. PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required) 3. PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan. 4. Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
2.2	**<u>Miscellaneous</u>** 1. The above conditions shall be enforced, inter-alia under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986, Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 and the Public Liability Insurance Act, 1991 along with their amendments and Rules and any other orders passed by the Hon'ble Supreme Court of India / High Courts and any other Court of Law relating to the subject matter. 2. The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by

S. No	EC Conditions
	orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours 3. The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently. 4. The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt. 5. The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis. 6. The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal. 7. The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company. 8. The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations. 9. No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC). 10. Concealing factual data or submission of false/fabricated data may result in revocation of this environmental clearance and attract action under the provisions of Environment (Protection) Act, 1986. 11. The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory. 12. The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions. 13. The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
2.3	**<u>Air quality monitoring and mitigation measure</u>** 1. Vehicular emissions shall be kept under control and regularly monitored. All the vehicles engaged in mining and allied activities shall operate only after obtaining 'PUC' certificate from the authorized pollution testing centres. 2. The transportation of materials shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the materials through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated. 3. Major approach roads should be properly maintained with dust suppression measures and the river bank in any case must not be damaged. 4. Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
2.4	**Land Reclamation** 1. Native tree species shall be selected and planted over areas affected by subsidence.
2.5	**<u>Water quality monitoring and mitigation measures</u>**

S. No	EC Conditions
	1. Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office. 2. The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government. 3. The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.
2.6	**Corporate Environment Responsibility** 1. Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out. 2. The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/ violation of the environmental/forest/ wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/ violation of the environmental/forest /wildlife norms/conditions and/or shareholders/stake holders.
2.7	**Mining Plan** 1. Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy. 2. No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927. 3. Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable. 4. No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
2.8	**Noise and Vibration monitoring and prevention** 1. Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored. 2. The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.
2.9	**Statutory compliance** 1. The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee. 2. The maximum production or peak production at any given time shall not exceed the limit as prescribed in the EC.

S. No	EC Conditions
	3. The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project. 4. The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project 5. The project proponent shall obtain clearance from the National Board for Wildlife, if applicable. 6. Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA Notification, 2006 and its amendments therein

Project Details

1. Details of Project

1.1. Name of the Project	GOVT. PERMIT AREA OF BARNADI SAND MAHAL NO-8
1.2. Project Proposal For	New
1.3. Project ID (Single Window Number)	SW/176982/2024
1.4. Description of Project	SAND MINING CONTRACT AREA

2. Details of the Company/Organization/User Agency making application

2.1. Legal Status of the Company/Organization/User Agency	State Government (Department/Autonomous body)
2.2. Name of the Company/ Organization/User agency	BAKSA FOREST DIVISION MUSHALPUR

Registered address

2.3. Address	vill: Mushalpur, Po: Mushalpur, Ps, Mushalpur,
2.4. Village /Town / City	MUSHALPUR
2.5. State	ASSAM
2.6. District	BAKSA
2.7. Pin Code	781372
2.8. E-mail address	dfobaksa@nic.in
2.9. Mobile number	xxxxxx7176

3. Details of the person making application

3.1. Name	PRABODH KUMAR BRAHMA
3.2. Designation	DCF

Correspondence address

3.3. Address	vill: Mushalpur, Po: Mushalpur, Ps, Mushalpur,
3.4. Village /Town / City	MUSHALPUR
3.5. State	ASSAM
3.6. District	BAKSA
3.7. Pin Code	781372
3.8. E-mail address	dfo-baksa@assam.gov.in
3.9. Mobile number	xxxxxx7176

Project Location

4. Location of the Project or Activity

4.1. Upload KML	Barnadi 8.kml
4.2. Whether the project/activity falling in the state/UT sharing international borders	NO

5. Shape of the Project	Linear

Location Details

Toposheet No	State/UT	District	Sub District	Village	Plot/Survey/Khasra No.
G46H10	ASSAM	Tamulpur	Goreswar (Pt)	BETAGAON	
G46H10	ASSAM	Tamulpur	Tamulpur	SARULISIHA	

Remarks
N/A

6. Land Requirement (in Ha) of the project or activity

6.1. Nature of Land involved	
6.2. Non-Forest Land [A]	4.98
6.3. Forest Land [B]	0
6.4. Total Land [A+B]	4.98

Project Activity Cost

6. Project/Activity Cost

6.1. Total Cost of the Project at current price level (in Lakhs)	100 Amount in Words : **One Hundred Lakh(s) Only**

7. Employment likely to be generated

7.1. During construction phase

Permanent employment

Temporary employment

7.2. During operational phase

Permanent employment

7.2.1. No. of permanent employment (No.s) [A]	15
7.2.2. Period of employment (No. of days) [B]	1000
7.2.3. No. of man-days [X]=[A]*[B]	15000

Temporary employment

7.2.4. Temporary / Contractual employment (No. of Man days) [Y]	1000
7.2.5. Total [X] +[Y]	16000

Others

8. Whether Rehabilitation and Resettlement (R&R) involved?	NO
9. Whether project area involves shifting of watercourse/road/rail/Transmission line/water pipeline, etc. required?	NO
10. Whether any alternative site(s) examined or part thereof for the non-site-specific component?	Not applicable as the project or activity is site specific

11. Whether there is any Government Order or Policy/ Court order relevant or restricting to the site?	NO
12. Whether there is any litigation pending against the project and/or land in which the project is proposed to be set up?	NO
13. Whether the proposal involves violation of Act/Rule/Regulation/Notification of Central/State Government?	NO

Application for ToR (Category A, B1, and B2 Violation)/EC (Category B2) - Form 1

Basic Information

1. Category of the Project/Activity

1.1. Name of the project proposal	GOVT. PERMIT AREA OF BARNADI SAND MAHAL NO-8	
1.2. Type of Proposal	New	
1.3. Whether the Project Activity (Construction/ Operation) has been undertaken without obtaining **prior** Environmental Clearance under the provision of EIA Notification 1994/ 2006?	No	
1.4. Whether multiple items (Components) as per the notification involved in the proposal?	No	
1.4.1. Item No. as per schedule to EIA Notification, 2006	1(a) Mining of minerals	Non-Coal Mining (Minor Minerals- river bed mining)
Capacity	4.98	Ha

2. Whether project/activity attracts the General Condition specified in the Schedule of EIA Notification?	No
3. Whether any Protected Areas Notified Under the Wild Life (Protection) Act, 1972 are located within 10 km of the project site	N/A
4. Whether any Severely Polluted Areas as identified by the CPCB from time to time located in proximity to the project site	No
5. Whether any Critically Polluted Areas as identified by the CPCB from time to time located in proximity to the project site	N/A
6. Whether any Notified Eco-Sensitive area notified under Environmental (Protection) Act, 1986 located in proximity to the project site	N/A
7. Whether any Inter-State Boundaries and International Boundaries located in proximity to the project site	N/A
8. Whether any Eco-sensitive Zone notified/proposed to be notified under Environment (Protection) Act, 1986 located within 10 km of the project site	No
9. Whether any forest land present within 10 km of the project site	No
10. Category of the Project as per EIA Notification, 2006	B2
10.1. Whether proposal is required to be appraised at Central level?	No
11. Whether Proposal has interlinked / interdependent projects or activities?	No
11.1. Reason thereof	0

12. Whether any Forest Land involved in the project or part thereof	No
13. Whether NBWL recommendation is required?	No

14. Land Acquisition Details

Type of Land	In case of non-forest land, please specify	Type of privately owned land	Type of land in terms of ownership	Supporting documents			Status of Land Acquisition
				Document Name	Remarks	Document	

Project Details

14. Details of CTE

14.1. Whether consent under Air & Water Act has been obtained from SPCB / UTPCC?	No
14.1.1. Reason thereof	0
15. Whether the project/activity located in Notified Industrial Area?	No
16. Whether the project/activity located in CRZ or ICRZ area?	No
17. Whether the project proposed to be located in Territorial waters (Off-shore)	No
18. Whether project/activity attracts the Specific Condition specified in the Schedule of EIA Notification?	No

Product Details

19. Details of Products & By-products

Name of Product	Product / By Product	Quantity / Capacity	Unit	Mode of Transport / Transmission	Remarks
SAND	Product	4.98	Hectares (Ha)	Road	0

20. Whether any other Environmental Sensitive area exists within 10 Km from the project/activity boundary?	No

Note : Others, interalia, includes areas protected under international conventions/ Area important or sensitive ecological reasons/ Sensitive species of flora or fauna/ Inland or coastal/Tourist places/ Defence installations / Densely populated areas/ Areas containing important, high quality, or scarce resources/ Areas susceptible to natural Hazards

21. Status of collection of baseline data	Not required as the proposal is under B2 category

Consultant Details

24. Whether QCI/NABET Accredited EIA Consultant engaged?	No

24.1. Reason for not engaging the Consultant	NA

Application for ToR (Category A, B1, and B2 Violation)/EC (Category B2) - Form 1

Project Details

1. Introduction of Project or Activity

1.1. Need for the project or activity and its importance to the country/region	REQUIREMENT OF SAND
1.2. Demand - Supply Gap and Domestic and export markets, if any	0

2. Social Infrastructure

2.1. Readily available	0
2.2. Proposed to be developed	0

3. Connectivity to the project or activity

3.1. Nearest railway station and its distance (in Km)	RANGIA	35
3.2. Nearest Airport and its distance (in Km)	LGBI	120
3.3. Nearest Town/City/District head quarter and its distance (in Km)	MUSHALPUR	15
4. Soil classification	RIVER BED	
5. Distance from the HFL of the river in m, if any	0	

6. Benefits of the project

6.1. Social benefits of project or activity	EMPLOYMENT GENERATION
6.2. Financial benefits of project or activity	SALARY

7. Project/ Activity Construction Status	Completed
7.1. Date of Start	03/04/2024
7.2. Likely date of completion	12/04/2024

Resource Utilization

8. Use of resources for construction or operation of the project

8.1. Whether requirement of water involved in the project?	No
8.2. Whether requirement of Minerals and/or fuels involved in the project?	No
8.3. Construction material	No
8.4. Timber	No
8.5. Electric Power:	No

8.6. Whether any other natural resources / other raw materials required?:	No
8.7. Whether any use of substances or materials, which are hazardous (as per MSIHC rules) to human health or the environment (flora, fauna, and water supplies) required?	No
8.8. Whether any resource efficiency / optimization / recycling and reuse envisaged in the project?	No

Physical Changes

9. Construction, operation or decommissioning of the Project involving actions, which will cause physical changes in the locality:

9.1. Whether any permanent or temporary change in land use, land cover or topography due to project activity?	No
9.2. Whether any clearance of existing vegetation due to project activity?	No
9.3. Whether any loss of native species or genetic diversity?	No
9.4. Whether any demolition works involved in project activity?	No
9.5. Whether any linear structures proposed for diversion or demolition due to project activity? (e.g. roads, transmission lines, rail line, pipeline, conveyor, etc.)	No
9.6. Whether any closure or diversion of existing transport routes or infrastructure due to project leading to changes in traffic movements?	No
9.7. Whether any closure or diversion of water bodies present in project area or realignment of water courses passing through project area?	No
9.8. Whether any dismantling or decommissioning or restoration works or reclamation works (Long-term/ short-term)?	No
9.9. Whether any construction works for temporary use for project activity?	No
9.10. Whether any cut and fill excavations proposed for the project activity?	No
9.11. Whether any underground works including tunnelling?	No
9.12. Whether any dredging involved in project?	No
9.13. Whether any offshore structures involved in project?	No

9.14. Whether any new road, rail, sea, airports, helipad, etc. during construction or operation?	No
9.15. Whether any construction of new linear structures? (e.g. transmission lines, pipelines, etc.)	No
9.16. Whether any Facilities for storage of goods or raw materials?	No
9.17. Whether any Facilities for long term/ permanent housing of operational workers/ staff?	No
9.18. Whether any Impoundment, damming, culverting, realignment or other changes to the hydrology of watercourses or aquifers?	No
9.19. Whether any Stream crossings, temporary and permanent?	No
9.20. Whether any influx of people to an area in either temporarily or permanently?	No
9.21. Whether any other information would like to submit?	No

ollution Details

10. Release of pollutants to Air and Mitigation measures

10.1. Whether any probable air pollutants generated?	No
10.2. Other information, if any	0

10.3. Generation of Noise & Vibration and mitigation measures

10.3.1. Whether any probable generation of Noise and vibration from the proposed project?	No
10.3.2. Whether any probable generation of Light and Heat?	No

10.4. Discharge of pollutants to water and mitigation measures

10.4.1. Whether any probable water pollutants generated?	No
10.5. Probable sources of water pollutant	No

Details of reuse / recycle of wastewater

Details	Qty / Capacity
10.6. Quantity of waste water generation per day (KLD)	0
10.7. Quantity of treated water proposed to use per day (KLD)	0
10.8. Quantity of treated water proposed to discharge outside the premises (KLD)	0

10.9. Purpose for which treated water is proposed to use	0
10.10. Whether it is proposed to opt/avail common off-site Sewage Treatment Plant (CSTP)/Effluent Treatment Plant (CETP) facility?	No
10.11. Whether it is proposed to setup on-site Sewage Treatment Plant (STP)/Effluent Treatment Plant (ETP) facility?	No
10.12. Whether the adequacy of the Sewage Treatment Plant (STP) or Effluent Treatment Plant certified by an independent expert?	No
10.12.1. Reasons thereof	0
10.13. Whether any other mitigation measures proposed?	No
10.14. Whether Dual Plumbing System proposed to be implemented?	No
10.14.1. Reasons thereof	0
10.15. Whether any discharge of treated effluent involved?	No

Water Requirements

11. Ground water intersection and water conservation measures:

11.1. Whether ground water table intersection involved in the project activities?	No
11.2. Area category from Groundwater availability perspective?	Safe
11.3. Whether Rainwater harvesting proposed	No
11.4. Whether any other water conservation measures proposed?	No
11.5. Whether the ZLD is proposed?	No

2. Greenbelt

12.1. Area proposed for green belt (in Ha)	0
12.2. Width of green belt (in m) along the boundaryof the project or activity	0
12.3. Percentage of the total area covered under green belt	0
12.4. Details of the species proposed for plantation	0
12.5. No. of tree saplings to be planted	0
12.6. Funds allocated for plantation in Lakhs.	0

Waste Generation

13. Production of wastes during construction or operation or decommissioning

13. Production of wastes during construction or operation or decommissioning

13.1. Whether any generation of Solid waste (domestic wastes)?	No
13.2. Whether any generation of plastic waste?	No
13.3. Whether any generation of e-waste?	No
13.4. Whether any generation of batteries waste?	No
13.5. Whether any generation of Bio-medical waste?	No
13.6. Whether any generation of hazardous wastes (as per Hazardous Waste Management Rules)?	No
13.7. Whether any generation of construction or demolition wastes?	No
13.8. Whether any generation of other wastes?	No
13.9. Whether any generation of surplus products?	No
13.10. Whether measures for waste minimization proposed?	No

Risk Assessment

14. Whether any risks associated with project activities which could affect human health or the environment, -

14.1. From explosions, spillages, fires etc. from storage, handling, use or production of hazardous substances?	No
14.2. From any other causes?	No
14.3. Could the project be affected by natural disasters causing environmental damage (e.g. floods, earthquakes, landslides, cloudburst etc)?	No
14.4. Changes in occurrence of disease or affect disease vectors (e.g. insect or water borne diseases)	No
14.5. Could project adversely affect the wellbeing of people in project area e.g. by changing living conditions?	No
14.6. Vulnerable groups of people who could be adversely affected by the project e.g. hospital patients, children, the elderly etc.	No
14.6.1. Has cumulative risk assessment been performed?	N/A
14.7. Whether any likely impacts of the proposed activity on the existing facilities adjacent to the proposed site due to generation of dust, smoke, odorous fumes or other hazardous gases?	No

15. Factors which should be considered (such as consequential development) which could lead to environmental effects or the potential for cumulative impacts with other existing or planned activities in the locality	
15.1. Whether lead to development of supportive facilities, ancillary development or development stimulated by the project which could have impact on the environment e.g.: Supportive infrastructure (roads, power supply, waste or waste water treatment, etc.); housing development; industries in supply chain and downstream; any other?	No
15.2. Whether lead to after-use of the site, which could have an impact on the environment? (e.g. mine void, dump sites, etc.)	No
15.3. Whether set a precedent for later developments?	No
15.4. Have cumulative effects due to proximity to other existing or planned projects with similar effects?	No
15.5. Whether lead to growth of alien species, if any?	No
15.6. Is there any threat of the project to the biodiversity (including displacement of fauna-both terrestrial and aquatic and avi-fauna or creation of barriers for their movement)?	No
15.7. Will the proposed project in any way result in the obstruction of a view, scenic amenity or landscapes?	No
15.8. Is there any impact on anthropological or archaeological sites or any important site feature in the vicinity of the proposed site have been considered?	No
15.9. Will the proposed project result in any changes to the demographic structure of local population?	No
15.10. Will the project cause adverse effect on local communities, disturbance to sacred sites or other cultural values?	No

6. Mining Proposals

16.1. Details of Letter of Intent (LoI) / Vesting order / Mining Lease

16.1.1. Date of issue of LoI/Vesting order/Minning Lease	18/08/2023
16.1.2. Validity of the LoI/Vesting order	07/08/2028
16.1.3. Lease Period	05/00
16.1.4. Date of expiry of lease	07/08/2028
16.1.5. Lease area (in Ha) as per LoI/Vesting order/Mining Lease	4.98
16.1.6. Production capacity (in MTPA) as per LoI / Vesting Order / Mining lease, if any prescribed	22103
16.1.7. Details of Lease renewal(s), if any	0
16.1.8. Other information, if any	0

16.1. Status of approval of Mining plan	Approved

17. Minerals to be mined

Name of Mineral	Classification	Production Capacity	Remarks
sand	Minor	0	0

18. Details of Total excavation (RoM) including Topsoil, Overburden, Mining waste, Rejects, etc.

18.1. Total excavation in MTPA	22103
18.2. Total Excavation in M.Cu.m/Annum	0.0221
18.3. Enter stripping Ratio	00:00
18.4. Other information, if any	0

19. Mineral Reserves

Name of Mineral	Proved Reserves	Indicated Reserves	Inferred Reserves	Mineable Reserves	Remarks
sand	0.224	0.224	0.224	0.2	

20. Life of Mine (Years)

20.1. Life of the mine as per approved mining plan	05/00
20.2. Life of the mine as per total estimated reserves, if any	05/00
20.3. Other information, if any	0

21. Type and method of Mining Method

21.1. Type of mining	Opencast
21.2. Method of mining	Manual
21.3. Other information, if any	0

22. Type of blasting, if any, to be adopted

22.1. Type of blasting	0
22.2. Mitigation measures for control of blast induced vibrations	0
22.3. Other information, if any	0

23. Whether it is proposed to install beneficiation plant/Coal washery within the mining lease area?	No
24. Whether it is proposed to install crusher within the mining lease area?	No

25. Dumping strategy

Description	Area in Ha	Maximum height in m	Remarks
External dump	0	0	0
Internal dump	0	0	0
Topsoil dump/ storage	0	0	0

26. Topsoil management

26.1. Total Topsoil excavated during the entire life of the mine (in Million Cubic Meter)	0.1105
26.2. Utilization strategy of topsoil	filling and other construction
26.3. Other information, if any	0

27. Details of the Quarry/Mine Pit

27.1. Total Quarry Area (Ha)	4.98
27.2. Enter Area of final void (in Hectare)	4.98
27.3. Maximum Depth of final void (in meter)	3
27.4. Other information, if any	0

28. Details of Transportation

28.1. Mode of transportation upto pit head	truck
28.2. Mode of transportation from pit head to siding/loading	truck
28.3. Mode of transport from loading point to consumers	truck
28.4. Other information, if any	truck

29. Details of reclamation/post mining land use

29.1. Plantation area (ha)	0
29.2. Water body in Ha	4.98
29.3. Public use in Ha	0
29.4. Enter Other uses in Ha	0

30. Details of DSR; Cluster and Replenishment study

30.1. Whether approved DSR available	No
30.2. Whether the instant proposal is part of cluster	No

30.1. Whether road/river /seasonal nallah /irrigation canal passes through project site

Any diversion	No Object	Application for NOC has	NOC from the concerned	Proof of	Reason thereof (No Object Certificate obtained -	Reason thereof (NOC has

S.No.	Type of Road/Waterway	diversion is proposed	No Object Certificate obtained	for NOC has been submitted	concerned department or authority	Proof of application for NOC	obtained - Not Applicable)	(NOC has not been submitted)

Enclosures

24. Layout Plan showing the components of the project and green belt proposed; general location and specific location of the project along with coordinates	FINAL LAYOUT.pdf
25. Upload copy of Replenishment Study Report & Baseline Survey data	REPLENISHMENT STUDY REPORT.pdf Preview
26. Letter of Intent / Mining Lease	DFO TO DGM LETTER.pdf
27. Upload copy of District Survey Report	DFO TO DGM LETTER.pdf
28. Schematic representation of the feasibility drawings which give information for EIA purpose	SCHEMATIC DIAGRAM.pdf

8. Additional Information

Government of India
Ministry of Environment, Forest and Climate Change
(Issued by the State Environment Impact Assessment Authority (SEIAA), ASSAM)
***

Minutes of 15th SEIAA Meeting State Environment Impact Assessment Authority meeting held from 31/05/2024 to 31/05/2024

Date: 31/05/2024

MoM ID:	EC/MOM/SEIAA/119931/5/2024
Agenda ID:	EC/AGENDA/SEIAA/119931/5/2024
Meeting Venue:	Conference Hall of Pollution Control Board, Assam, 3rd floor
Meeting Mode:	Hybrid
Date & Time:	

31/05/2024	02:00 PM	05:00 PM

1. Opening remarks

The Member Secretary, SEIAA welcomed the Chairman, SEIAA and the Member of regulatory body. She briefed the house about the agenda for the meeting for deliberation and to expedite disposal of the recommended proposals by SEAC, Assam.

2. Confirmation of the minutes of previous meeting

As per the agenda, the regulatory body duly reviewed the Minutes of the Meetings held on 14th May, 2024.

3. Details of proposals considered by the committee

Day 1 -31/05/2024

3.1. Agenda Item No 1:

3.1.1. Details of the proposal

2.97 Ha Gomari Nala Sand, Gravel & Boulder Mining Permit Area by **PRANJAL ROY** located at **LAKHIMPUR,ASSAM**

Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/455966/2023	SEIAA3646/2024	18/12/2023	Mining of minerals (1(a))

3.1.2. Deliberations by the committee in previous meetings

Date of SEIAA 1 :06/04/2024

Deliberations of SEIAA 1 :

The approach road to the proposed mining site from the nearest road need to be properly shown in the map.

Date of SEAC 2 :30/01/2024

Deliberations of SEAC 2 :

Due discussions and deliberations is held by the SEAC. The Committee after having been satisfied with the documents as furnished from the competent authority and after due deliberation and appraisal is pleased to recommend for grant of the EC by the SEIAA for a quantity of recommended quantity of **12,704** cu m Sand; **15,761** cu m Gravel and **15,475** cu m Boulder in **2 (two)** years as per the approved Mining Plan (**@** 6,350 cum **Sand;** 7,880 cu m **Gravel** and 7,735 cu m **Stone,** annually**)**.This is subject to the conditions that the project Proponent shall have to strictly follow all the terms and conditions laid down in the approved mining plan and also with the conditions that: (a) mining shall be confined and limited to the area falling within GPS coordinates; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials and (c)the Proponent is permitted to extract the approved quantity of river bed Sand with maximum mining depth of up to 2(two) mtrs from the non-mined surface.

3.1.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 2.97 Ha with quantity of 12,704 cu m Sand; 15,761 cu m Gravel and 15,475 cu m Boulder in 2 (two) years as per the approved Mining Plan (@ 6,350 cum Sand; 7,880 cu m Gravel and 7,735 cu m Stone, annually) subject to the terms and conditions laid down by SEAC.

3.1.4. Recommendation of SEIAA

Approved

3.1.5. Details of Environment Conditions

3.1.5.1. Specific

Specific conditions by SEAC	
1.	This is subject to the conditions that the project Proponent shall have to strictly follow all the terms and conditions laid down in the approved mining plan and also with the conditions that: (a) mining shall be confined and limited to the area falling within GPS coordinates; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials and (c)the Proponent is permitted to extract the approved quantity of river bed Sand with maximum mining depth of up to 2(two) mtrs from the non-mined surface.

	The Committee after having been satisfied with the documents as furnished from the competent authority and after due deliberation and appraisal is pleased to recommend for grant of the EC by the SEIAA for a quantity of recommended quantity of **12,704** cu m Sand; **15,761** cu m Gravel and **15,475** cu m Boulder in **2 (two)** years as per the approved Mining Plan (**@** 6,350 cum **Sand;** 7,880 cu m **Gravel** and 7,735 cu m **Stone,** annually**)**.This is subject to the conditions that the project Proponent shall have to strictly follow all the terms and conditions laid down in the approved mining plan and also with the conditions that: (a) mining shall be confined and limited to the area falling within GPS coordinates; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials and (c)the Proponent is permitted to extract the approved quantity of river bed Sand with maximum mining depth of up to 2(two) mtrs from the non-mined surface. It is further required that for mining in river beds and in flood plains the Consent to Establish / Consent to Operate (CTE / CTO) are essentially required to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction. It is also stressed upon by the Committee that as a part of the Corporate Environment Responsibility (CER) the Proponent shall under take plantation activities in the nearby Institutions, Public places, Graveyards etc involving local youths, NGOs etc with evergreen species of plants having aesthetic value, medicinal value. Efforts should also be made to label the plant species as far as practicable in Scientific parlance and vernacular language. The fund so required (2% of the project cost) may be earmarked for the purpose and put at the disposal of the DFO concerned in advance for necessary activity timely in planting season. The Divisional Forest Officer, Lakhimpur Division shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. Further, DFO is to ensure that mining be allowed only within the approved mining site and not beyond the limit of the same. Accordingly, DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan.

3.1.5.2. Standard

1(a)	**Mining of minerals**
Air quality monitoring and mitigation measure	
1.	Adequate ambient air quality monitoring stations shall be established in the core zone as well as in the buffer zone for monitoring of air pollutants. Location of the stations shall be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive receptors in consultation with the State Pollution Control Board. Online ambient air quality monitoring station/stations may also be installed in addition to the regular air monitoring stations as per the requirement and/or in consultation with the SPCB
1.	Major approach roads shall be properly maintained with dust suppression measures and the river bank in any case must not be damaged.
1.	The transportation of materials shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the materials through the existing road passing through any village shall be

	avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.
1.	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
Corporate Environment Responsibility	
1.	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders.
1.	Self environmental audit shall be conducted annually.
Land Recalmation	
1.	Native tree species shall be selected and planted over areas affected by subsidence.
Mining Plan	
1.	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.
1.	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.
1.	No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
Miscellaneous	
1.	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent’s website permanently.
1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
1.	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.

1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Regional Office of MoEF & CC shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours
Noise and Vibration monitoring and prevention	
1.	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.
Public hearing and Human health issues	
1.	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
1.	PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
1.	PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
1.	PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius
Statutory compliance	
1.	The Environmental clearance shall be subject to orders of Hon’ble Supreme Court of India, Hon’ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.

1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the Pollution Control Board Assam.
1.	Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA Notification, 2006 and its amendments therein
Water quality monitoring and mitigation measures	
1.	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
1.	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.
1.	The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.

3.2. Agenda Item No 2:

3.2.1. Details of the proposal

GOVT. PERMIT AREA OF CHII-II MINOR MINERAL UNIT (STONE) by **DFO CACHAR** located at **CACHAR,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/460824/2024	SEIAA.3665/2024	02/02/2024	Mining of minerals (1(a))

3.2.2. Deliberations by the committee in previous meetings

Date of SEIAA 1 :06/04/2024

Deliberations of SEIAA 1 :

A joint verification report in regard of Demarcation is required from both DFO, Cachar and DFO, Dima Hasao.

Date of SEAC 2 :23/02/2024

Deliberations of SEAC 2 :

iscussions and deliberations is held.

Committee after due deliberation and appraisal is of the opinion for allowing extraction of the Minor al for a quantum of**58,562**cum of **Stone** @ **29,281** cu m in 2**(two)** Years**annually.** This is subject to the tions that the proponent shall have to strictly follow all terms and conditions laid down in the approved g plan and also subject to the conditions that: (a) mining shall be confined and limited to the area falling n the revised GPS coordinates ; (b) the active bank of the river is not disturbed / damaged because of g operation and transportation of mining materials and (c)the Proponent shall extract / harvest the ved quantity of minerals indicated herein with maximum mining depth of up to 2 (two) meters only from n-mined surface.

3.2.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 02.00 Ha with the recommended quantity of 58,562 cu.m of Stone in 2 (two) years as per the approved Mining Plan @ 29,281 cum annually subject to the terms and conditions laid down by the SEAC.

3.2.4. Recommendation of SEIAA

Approved

3.2.5. Details of Environment Conditions

3.2.5.1. Specific

Specific conditions by SEAC	
1.	i) The DFO shall comply with necessary formalities for transfer of the EC to the lessee with due NOC for filing application to the SEIAA before allowing mining so that the entire accountability in mining is vested on the Lessee / Proponent with the same terms and conditions stipulated in the EC as per the EIA Notification, 2006. ii) Consent to Establish (CTE) and Consent to Operate (CTO) shall be obtained by the Proponent from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which will be adhered to by the concerned DFO. iii) The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. iv) The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geocoordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan. V) CSR activities shall be carried out / undertaken by the Proponent and minimum 2% of the total project cost **(Rs 2.00 Lakh)** shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the near by existing school 1 and (one) village with due consultation with the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 2 (two) years of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report. Vi) Plantation activities shall be carried out / undertaken in any educational institution or Govt lands involving local NGOs, School / College students and an amount of **Rs 3 (Three) Lakh** shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of Aesthetic value, Medicinal value, Evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students.

3.2.5.2. Standard

1(a)	**Mining of minerals**
Air quality monitoring and mitigation measure	
1.	Atleast 3 (three) ambient air quality monitoring stations shall be established in the core zone as well as in the buffer zone for monitoring of air pollutants. Location of the stations shall be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive receptors in consultation with the Pollution Control Board, Assam. Online ambient air quality monitoring station/stations may also be installed in addition to the regular air monitoring stations as per the requirement and/or in consultation with the PCBA
1.	Major approach roads shall be black topped and properly maintained.
1.	The transportation of material shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the material through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.
1.	Vehicular emissions shall be kept under control and regularly monitored. All the vehicles engaged in mining and allied activities shall operate only after obtaining ‘PUC’ certificate from the authorized pollution testing centres.
1.	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
1.	Post environmental closure third party monitoring by reputed instituted in air quality, water, land & soil etc shall be carried out and analysed with EMP measures at regular interval. A suitable recommendation in this regard, shall be furnished to IRO, MoEF&CC for compliance. The data used for analysis shall be obtained from continuos AQMS, site specific water regime. Also third party shall analyses the implementation of river diversion, meeting to the requirement of project report.
Corporate Environment Responsibility	
1.	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders.
1.	Self environmental audit shall be conducted annually.
Land Recalmation	
1.	Native tree species shall be selected and planted over areas affected by subsidence.
Mining Plan	
1.	Mining shall be carried out as per the approved mining plan (including Mine Closure Plan) abiding by mining laws related to non coal mining and the relevant circulars issued by Directorate General Mines Safety (DGMS).
1.	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.
1.	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use

	of renewable energy.
1.	No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
Miscellaneous	
1.	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently.
1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
1.	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
1.	The project authorities must strictly adhere to the stipulations made by the Pollution Control Board, Assam.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	The above conditions shall be enforced, inter-alia under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986, Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 and the Public Liability Insurance Act, 1991 along with their amendments and Rules and any other orders passed by the Hon'ble Supreme Court of India / High Courts and any other Court of Law relating to the subject matter.
1.	Persons of nearby villages shall be given training on livelihood and skill development to make them employable with its proper records.
1.	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the

	biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours
Noise and Vibration monitoring and prevention	
1.	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the MoEF & CC /RO on six-monthly basis.
Public hearing and Human health issues	
1.	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
1.	PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
1.	PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
1.	PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius
Statutory compliance	
1.	The Environmental clearance shall be subject to orders of Hon’ble Supreme Court of India, Hon’ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the Pollution Control Board, Assam.
1.	Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA Notification, 2006 and its amendments therein
Water quality monitoring and mitigation measures	
1.	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
1.	The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.

1.	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.

3.3. Agenda Item No 3:

3.3.1. Details of the proposal

Residential cum Commercial Project by M/s Achyut Builders by **ACHYUT BUILDERS** located at **KAMRUP METRO,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/INFRA2/459826/2024	SEIAA 3676/2024	05/02/2024	Building / Construction (8(a))

3.3.2. Deliberations by the committee in previous meetings

Date of SEIAA 1 :19/04/2024

Deliberations of SEIAA 1 :

The SEIAA committee suggest a Site visit.

Date of SEAC 2 :23/02/2024

Deliberations of SEAC 2 :

The consultant Grass Roots Research And Creation India (P) Ltd on behalf of the Project Proponent has made a presentation before the Committee. Requisite documents requiring clearances from the statutory bodies are uploaded including the EMP, Wastewater Management details, Solid Waste Management Plan, E-waste details, Rain Water Harvesting (RWH) system, Drainage plan, Parking Plan, Disaster Management Plan etc etc.

Distances of the Project from the boundary of the Protected Areas (PAs) namely Amsung Wildlife Sanctuary is **9.8** km. It is clarified by the Proponent that there is no bar on construction as the plot is beyond the boundary of the respective Eco Sensitive Zone.

The Committee deliberated upon the matter and also discussed on each of the relevant issues after presentation and under consideration.

3.3.3. Deliberations by the SEIAA in current meetings

EC is approved for the total built up area of the proposed residential complex is 21,439.96 Sqm while the Plot area is 3743.36 Sqm. Since the built up area is more than 20,000 sqm so the project is falling under Schedule 8(a) category in terms of the EIA Notification, 2006. The project facilities includes Residential Dwelling units 100 nos, Commercial area and Community facility. Total estimated population to be housed in the project is 731 persons. The proposed Green Belt to be established is earmarked with an area of 342 Sqm. Project cost is estimated at Rs 48.16 Crore subject to terms and conditions laid down by SEAC.

3.3.4. Recommendation of SEIAA

Approved

3.3.5. Details of Environment Conditions

3.3.5.1. Specific

	Standard & Specific Conditions
1.	Air quality monitoring and preservation 1. Notification GSR 94(E) dated 25.01.2018 of MoEF&CC regarding Mandatory Implementation of Dust Mitigation Measures for Construction and Demolition Activities for projects requiring Environmental Clearance shall be complied with. 2. A management plan shall be drawn up and implemented to contain the current exceedance in ambient air quality at the site. 3. The project proponent shall install system to carryout Ambient Air Quality monitoring for common/criterion parameters relevant to the main pollutants released (e.g. PM10 and PM2.5) covering upwind and downwind directions during the construction period. 4. Diesel power generating sets proposed as source of backup power should be of enclosed type and conform to rules made under the Environment (Protection) Act, 1986. The height of stack of DG sets should be equal to the height needed for the combined capacity of all proposed DG sets. Use of low sulphur diesel. The location of the DG sets may be decided with in consultation with State Pollution Control Board. 5. Construction site shall be adequately barricaded before the construction begins. Dust, smoke & other air pollution prevention measures shall be provided for the building as well as the site. These measures shall include screens for the building under construction, continuous dust/ wind breaking walls all around the site (at least 3-meter height). Plastic/tarpaulin sheet covers shall be provided for vehicles bringing in sand, cement, murram and other construction materials prone to causing dust pollution at the site as well as taking out debris from the site. 6. Sand, murram, loose soil, cement, stored on site shall be covered adequately so as to prevent dust pollution. 7. Wet jet shall be provided for grinding and stone cutting. 8. Unpaved surfaces and loose soil shall be adequately sprinkled with water to suppress dust. 9. All construction and demolition debris shall be stored at the site (and not dumped on the roads or open spaces outside) before they are properly disposed. All demolition and construction waste shall be managed as per the provisions of the Construction and Demolition Waste Management Rules 2016. 10. The diesel generator sets to be used during construction phase shall be low sulphur diesel type and shall conform to Environmental (Protection) prescribed for air and noise emission standards. 11. The gaseous emissions from DG set shall be dispersed through adequate stack height as per CPCB standards. Acoustic enclosure shall be provided to the DG sets to mitigate the noise pollution. Low sulphur diesel shall be used. The location of the DG set and exhaust pipe height shall be as per the provisions of the Central Pollution Control Board (CPCB) norms. 12. For indoor air quality the ventilation provisions as per National Building Code of India. Energy Conservation measures 13. Compliance with the Energy Conservation Building Code (ECBC) of Bureau of Energy Efficiency shall be ensured. Buildings in the States which have notified their own ECBC, shall comply with the State ECBC.

14. Outdoor and common area lighting shall be LED.

15. Concept of passive solar design that minimize energy consumption in buildings by using design elements, such as building orientation, landscaping, efficient building envelope, appropriate fenestration, increased day lighting design and thermal mass etc. shall be incorporated in the building design. Wall, window, and roof u-values shall be as per ECBC specifications.

16. Energy conservation measures like installation of CFLs / LED for the lighting the area outside the building should be integral part of the project design and should be in place before project commissioning.

17. Solar, wind or other Renewable Energy shall be installed to meet electricity generation equivalent to 1% of the demand load or as per the state level/ local building bye-laws requirement, whichever is higher.

18. Solar power shall be used for lighting in the apartment to reduce the power load on grid. Separate electric meter shall be installed for solar power. Solar water heating shall be provided to meet 20% of the hot water demand of the commercial and institutional building or as per the requirement of the local building bye-laws, whichever is higher. Residential buildings are also recommended to meet its hot water demand from solar water heaters, as far as possible.

- Green Cover

19. No tree can be felled / transplanted unless exigencies demand. Where absolutely necessary, tree felling shall be with prior permission from the concerned SEAC/Regulatory authority. Old trees should be retained based on girth and age classification as may be prescribed by the SEAC / Forest Department. Plantations to be ensured species (cut) to species (planted) as shall be prescribed by the SEAC.

20. A minimum of 1 tree (depending upon the species of plant) for every 80 sqm of land should be planted and maintained. The existing trees will be counted for this purpose. The landscape planning should include plantation of native species (as shall be prescribed by the SEAC). The species with heavy foliage, broad leaves and wide canopy cover are desirable. Water intensive and/or invasive species should not be used for landscaping.

21. Where the trees need to be cut with prior permission from the concerned local Authority, compensatory plantation in the ratio of 1:10 (i.e. planting of 10 trees for every 1 tree that is cut) shall be done and maintained. Plantations to be ensured species (cut) to species (planted). Area for green belt development shall be provided as per the details provided in the project document.

22. Topsoil should be stripped to a depth of 20 cm from the areas proposed for buildings, roads, paved areas, and external services. It should be stockpiled appropriately in designated areas and reapplied during plantation of the proposed vegetation on site.

Human health issues

23. All workers working at the construction site and involved in loading, unloading, carriage of construction material and construction debris or working in any area with dust pollution shall be provided with dust mask.

24. For indoor air quality the ventilation provisions as per National Building Code of India.

25. Emergency preparedness plan based on the Hazard identification and Risk Assessment (HIRA) and Disaster Management Plan shall be implemented.

26. Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, creche etc. The housing may be in the form of temporary

structures to be removed after the completion of the project.

27. Occupational health surveillance of the workers shall be done on a regular basis.

28. A First Aid Room shall be provided in the project both during construction and operations of the project.

Miscellaneous

29. The project proponent shall prominently advertise it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days indicating that the project has been accorded environment clearance and the details of MoEF & CC/SEIAA website where it is displayed.

30. Environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.

31. The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.

32. The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.

33. The company shall have a well laid down environmental policy duly approved by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders. The copy of the board resolution in this regard shall be submitted to the MoEF & CC as a part of six-monthly report.

34. A separate Environmental Cell both at the project and company head quarter level, with qualified personnel shall be set up under the control of senior Executive, who will directly report to the head of the organization.

35. Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the Six Monthly Compliance Report.

36. The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.

37. The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.

38. The project authorities must strictly adhere to the stipulations made by the State Pollution

Control Board and the State Government.

39. The project proponent shall abide by all the commitments and recommendations made in the EIA/EMP report and also that during their presentation to the State Expert Appraisal Committee (SEAC).

40. No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forest and Climate Change (MoEF&CC).

41. Concealing factual data or submission of false/fabricated data may result in revocation of this environmental clearance and attract action under the provisions of Environment (Protection) Act, 1986.

42. The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.

43. The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.

44. The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.

45. The above conditions shall be enforced, *inter alia* under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986, Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016, and the Public Liability Insurance Act, 1991 along with their amendments and Rules and any other orders passed by the Hon'ble Supreme Court of India / High Courts/ Hon'ble Green Tribunal and any other Court of Law relating to the subject matter.

46. Any appeal against this EC shall lie with the National Green Tribunal, if preferred, within a period of 30 (thirty) days as prescribed under Section 16 of the National Green Tribunal Act, 2010.

Noise monitoring and prevention

47. Ambient noise levels shall conform to residential area/commercial area/industrial area/silence zone both during day and night as per Noise Pollution (Control and Regulation) Rules, 2000. Incremental pollution loads on the ambient air and noise quality shall be closely monitored during construction phase. Adequate measures shall be made to reduce ambient air and noise level during construction phase, so as to conform to the stipulated standards by PCBA.

48. Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six-monthly compliance report.

49. Acoustic enclosures for DG sets, noise barriers for ground-run bays, ear plugs for operating personnel shall be implemented as mitigation measures for noise impact due to ground sources.

Specific Conditions

50. Recommendations of mitigation measures from possible accident shall be implemented based on Risk Assessment studies conducted for worst case scenarios using latest techniques.

Statutory compliance

51. The project proponent shall obtain all necessary clearance/ permission from all relevant

agencies including town planning authority before commencement of work. All the construction shall be done in accordance with the local building bye laws.

52. The approval of the Competent Authority shall be obtained for structural safety of buildings due to earthquakes, adequacy of firefighting equipment etc. as per National Building Code including protection measures from lightening etc.

53. The project proponent shall obtain Forest Clearance under the provisions of the Forest (Conservation) Act, 1980, in case of the diversion of forest land for non-forest purpose involved in the project.

54. The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.

55. The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State Pollution Control Board/ Committee.

56. The project proponent shall obtain the necessary permission for drawl of ground water / surface water required for the project from the competent authority.

57. A certificate of adequacy of available power from the agency supplying power to the project along with the load allowed for the project should be obtained.

58. All other statutory clearances such as the approvals for storage of diesel from Chief Controller of Explosives, Fire Department, Civil Aviation Department shall be obtained, as applicable, by project proponents from the respective competent authorities.

59. The provisions of the Solid Waste Management Rules, 2016, e-Waste (Management) Rules, 2016, and the Plastics Waste Management Rules, 2016, shall be followed.

60. The project proponent shall follow the ECBC/ECBC-R prescribed by Bureau of Energy Efficiency, Ministry of Power strictly.

Transport

61. A comprehensive mobility plan, as per MoUD best practices guidelines (URDPFI), shall be prepared to include motorized, non-motorized, public, and private networks. Road should be designed with due consideration for environment, and safety of users. The road system can be designed with these basic criteria. a. Hierarchy of roads with proper segregation of vehicular and pedestrian traffic. b. Traffic calming measures. c. Proper design of entry and exit points. d. Parking norms as per local regulation.

62. Vehicles hired for bringing construction material to the site should be in good condition and should have a pollution check certificate and should conform to applicable air and noise emission standards be operated only during non-peak hours.

Waste Management

63. A certificate from the competent authority handling municipal solid wastes, indicating the existing civic capacities of handling and their adequacy to cater to the M.S.W. generated from project shall be obtained.

64. Disposal of muck during construction phase shall not create any adverse effect on the neighbouring communities and be disposed taking the necessary precautions for general safety and health aspects of people, only in approved sites with the approval of competent authority.

65. Separate wet and dry bins must be provided in each unit and at the ground level for facilitating segregation of waste. Solid waste shall be segregated into wet garbage and inert materials.

66. Organic waste compost/Vermiculture pit/Organic Waste Converter within the premises with a minimum capacity of 0.3 kg /person/day must be installed.

67. All non-biodegradable waste shall be handed over to authorized recyclers for which a written tie up must be done with the authorized recyclers.

68. Any hazardous waste generated during construction phase, shall be disposed off as per

applicable rules and norms with necessary approvals of the State Pollution Control Board.

69. Use of environment friendly materials in bricks, blocks and other construction materials, shall be required for at least 20% of the construction material quantity. These include Fly Ash bricks, hollow bricks, AACs, Fly Ash Lime Gypsum blocks, Compressed earth blocks, and other environment friendly materials.

70. Fly ash should be used as building material in the construction as per the provision of Fly Ash Notification of September, 1999 and amended as on 27th August, 2003 and 25th January, 2016. Ready mixed concrete must be used in building construction.

71. Any wastes from construction and demolition activities related thereto shall be managed so as to strictly conform to the Construction and Demolition Waste Management Rules, 2016.

72. Used CFLs and TFLs should be properly collected and disposed off/sent for recycling as per the prevailing guidelines/ rules of the regulatory authority to avoid mercury contamination.

Water quality monitoring and preservation

73. The natural drain system should be maintained for ensuring unrestricted flow of water. No construction shall be allowed to obstruct the natural drainage through the site, on wetland and water bodies. Check dams, bio-swales, landscape, and other sustainable urban drainage systems (SUDS) are allowed for maintaining the drainage pattern and to harvest rain water.

74. Buildings shall be designed to follow the natural topography as much as possible. Minimum cutting and filling should be done.

75. Total fresh water use shall not exceed the proposed requirement as provided in the project details.

76. The quantity of fresh water usage, water recycling and rainwater harvesting shall be measured and recorded to monitor the water balance as projected by the project proponent. The record shall be submitted to the Regional Office, MoEF&CC along with six monthly Monitoring reports.

77. A certificate shall be obtained from the local body supplying water, specifying the total annual water availability with the local authority, the quantity of water already committed, the quantity of water allotted to the project under consideration and the balance water available. This should be specified separately for ground water and surface water sources, ensuring that there is no impact on other users.

78. At least 20% of the open spaces as required by the local building bye-laws shall be pervious. Use of Grass pavers, paver blocks with at least 50% opening, landscape etc. would be considered as pervious surface.

79. Installation of dual pipe plumbing for supplying fresh water for drinking, cooking and bathing etc and other for supply of recycled water for flushing, landscape irrigation, car washing, thermal cooling, conditioning etc. shall be done.

80. Use of water saving devices/fixtures (viz. low flow flushing systems; use of low flow faucets tap aerators etc) for water conservation shall be incorporated in the building plan.

81. Separation of grey and black water should be done by the use of dual plumbing system. In case of single stack system separate recirculation lines for flushing by giving dual plumbing system be done.

82. Water demand during construction should be reduced by use of pre-mixed concrete, curing agents and other best practices referred.

83. The local bye-law provisions on rain water harvesting should be followed. If local bye-law provision is not available, adequate provision for storage and recharge should be followed as per the Ministry of Urban Development Model Building Byelaws, 2016. Rain water harvesting recharge pits/storage tanks shall be provided for ground water recharging as per the CGWB norms.

84. A rain water harvesting plan needs to be designed where the recharge bores of minimum one recharge bore per 5,000 square meters of built up area and storage capacity of minimum one day of total fresh water requirement shall be provided. In areas where ground water recharge is not feasible, the rain water should be harvested and stored for reuse. The ground

water shall not be withdrawn without approval from the Competent Authority.

85. All recharge should be limited to shallow aquifer.

86. No ground water shall be used during construction phase of the project.

87. Any ground water de-watering should be properly managed and shall conform to the approvals and the guidelines of the CGWA in the matter. Formal approval shall be taken from the CGWA for any ground water abstraction or de-watering.

88. Sewage shall be treated in the STP with tertiary treatment. The treated effluent from STP shall be recycled/re-used for flushing, AC make up water and gardening. As proposed, no treated water shall be disposed in to municipal drain.

89. No sewage or untreated effluent water would be discharged through storm water drains.

90. Onsite sewage treatment of capacity of treating 100% waste water to be installed. The installation of the Sewage Treatment Plant (STP) shall be certified by an independent expert and a report in this regard shall be submitted to the Ministry before the project is commissioned for operation. Treated waste water shall be reused on site for landscape, flushing, cooling tower, and other end-uses. Excess treated water shall be discharged as per statutory norms notified by Ministry of Environment, Forest and Climate Change. Natural treatment systems shall be promoted.

91. Periodical monitoring of water quality of treated sewage shall be conducted. Necessary measures should be made to mitigate the odour problem from STP.

92. Sludge from the onsite sewage treatment, including septic tanks, shall be collected, conveyed and disposed as per the Ministry of Urban Development, Central Public Health and Environmental Engineering Organization (CPHEEO) Manual on Sewerage and Sewage Treatment Systems, 2013.

A detailed traffic management and traffic decongestion plan shall be drawn up to ensure that the current level of service of the roads within a 05 kms radius of the project is maintained and improved upon after the implementation of the project. This plan should be based on cumulative impact of all development and increased habitation being carried out or proposed to be carried out by the project or other agencies in this 05 Kms radius of the site in different scenarios of space and time and the traffic management plan shall be duly validated and certified by the State Urban Development department and the P.W.D./ competent authority for road augmentation and shall also have their consent to the implementation of components of the plan which involve the participation of these departments.

Special Conditions:

i) The Proponent shall undertake greenery around the premises where in the inmates could feel the benefits by raising plants of indigenous species, preferably of evergreen in nature having religious importance, health benefits having medicinal importance as also being of aesthetic value etc.

It was suggested by the committee that the plant species preferably be are of Bael (*Aegle marmelos*), Giloy (*Tinospora cordifolia*), Bakul (*Mimosups elengi*), Nahor (*Mesua ferrea*), Ashoka (*Saraca asoca*), Kanchan (*Bauhinia purpurea*), Rudrakhya (*Elaeocarps ganitrus*), Kadamba (*Neolamarckia cadamaba*), Joba (*Hibiscus rosa sinensis*), Sonaru (*Cassia fistula*), Putranjiba (*Putranjiva roxburghii*), Tezpatta (*Cinamomum tamala*), Dalchini (*Cinamomum zeylanicum*), Sewali phul (*Nyctanthes arbor tris tis*), Money plant (*Araceae* member), *Sanseviera zelanica*, indigenous flowering plant species of herbs and shrubs like Kamini Kusum (*Murraya paniculata*), Aparajita (*Clitorea ternatea*), Narasingha (*Murraya koengii*) etc etc.

The Committee suggested that the numbers of plants should not be restricted to the stipulations and the same should invariably be increased accordingly comprising of herbs, shrubs, climbers and trees, etc with touch of religious utility of flowering plants and effort to garner support from the inmates for future maintenance with their active support, particularly school going children. Efforts need to be put to get the plants with their scientific names, local names properly labeled showing medicinal value for appreciation by the inmates.

ii) The Committee felt it expedient that the proponent shall make provision for a *YOGA Hall* (Yoga

	Centre for the inmates specially for the Children, the Women and as well for the *elderly* inmates) wherein a trained personnel in Yoga could come to train the inmates adequately for a healthy living. iii) The Proponent shall comply the of conditions of Indian Green Building Council (IGBC) or *GRIHA* (Green Rating for Integrated Habitat Assessment) / LEEDS (Leadership in Energy and Environmental Development Systems). iv) Further, the STP is to be managed by the project Proponent for the period even after handing over the projects to the stakeholders. The PP shall have AMC with the STP provider for operation and maintenance for a period of at least 10 years at the initial / 1st instance and their maintenance shall be ensured by the PCB, Assam. v) Certificate from the Central Ground Water Authority for use of water in the Operational phase needs to be obtained by the Proponent. vi) The Proponent shall arrange for centralized AC with exhaust at the roof top of the Commercial Building. vii) The cost earmarked for the environmental safeguards contained in the Environment Management Plan (EMP), as approved against the Environment Management Plan, amounting to Rs 24.39 Lakh as Capital Cost and Rs 15.21 Lakh as recurring cost per year against each of the components shall have to be utilized and shall not be diverted for any other purposes and year wise expenditures both in constructional and operational phases shall be reported to the PCB, Assam & SEIAA, the Regional Office, MoEF&CC, GoI, Guwahati along with the break up of expenditures for record and monitoring. viii) The PP shall obtain Consent to establish (CTE) and Consent to operate (CTO) from Pollution Control Board, Assam under the provisions of the Water Act, 1974 and Air Act, 1981, as applicable before starting of the construction activities and during the construction activities respectively.

3.4. Agenda Item No 4:

3.4.1. Details of the proposal

Proposed Cement Plant of 600 TPD Capacity (Clinker 400 TPD and Grinding 600 TPD), at P.P NO. 190, Dag No. 50 & P.P. No. 192, Dag No. 52 Situated at Village Kokdanglanso, Langri Kissam, PO & PS Diyungbra, Dist. Dima Hasao, Assam, Pin-782448 by M/s. Gold Strong Industries LLP by **GOLD STRONG INDUSTRIES LLP** located at **KAMRUP METRO,ASSAM**			
Proposal For		Fresh ToR	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/IND1/456653/2023	SEIAA3674/2024	07/02/2024	Cement plants (3(b))

3.4.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :30/04/2024

Deliberations of SEAC 1 :

The proposal was discussed in the 6th SEAC Meeting (2nd sitting) held on 23.02.2024 and after due deliberation on the presentation made by the consultant in presence of the project Proponent it was unanimously decided to conduct a site inspection of the area as to appreciate the likely impact on the surrounding environment by a sub-Committee of the SEAC as envisaged under paragraph 5(d) of the Environment Clearance Regulation, 2006. Field visit report is submitted and uploaded in Parivesh portal. The field report of the sub-Committee is placed for discussion and appraisal by the SEAC and summarised as under:

"Observations:

i) The location of the site is found to be an open land. The distance of the site from the nearby landmarks, viz., Panimur Water Fall (3km), Power House of LKHEP (6km), Lower Kapili Hydro Electric Project dam (10km), Dalmia Cement (North East) Limited (25km Approx), etc., are shown in the Google Earth Map annexed herewith.

ii) Not any construction activity has been started by the PP.

iii) Clearing of the site is partially completed. Fencing of the project site is not yet started.

estions:

i) Detailed contour survey. *Ortho-mosaic* map to be generated and all drainage channel marked.

ii) All drainage channels leading towards the Kopili river should have sediment pits followed by constructed wetlands so that clean water flows into the river.

iii) The peripheral plantation should be hedge forming.

iv) Plantation of bio indicators for bio monitoring of air pollution level.

Nature based sewage treatment systems which has lesser energy footprint and more reliable should be resorted to……**"**

After due deliberation the Committee deemed it appropriate to invoke certain conditions in the ToR in addition to the suggestions made by the sub-Committee as under

Decision: Recommend issue of ToR by the SEIAA

Date of SEAC 2 :23/02/2024

Deliberations of SEAC 2 :

The proponent has made a presentation before the Committee and ***sub-committee is constituted for field visit.*** The sub-committee will inspect the proposed site to assess the existing environmental status and the probable impact on the natural environment in the surroundings including the impact on ecosystem services. The sub-committee is requested to submit their detail site inspection report with specific suggestion, findings observation for according approval for issuance of the E.C. by the SEIAA.

3.4.3. Deliberations by the SEIAA in current meetings

Approved the ToR for Cement Plant of 600 TPD Capacity (Clinker 400 TPD and Grinding 600 TPD), at P.P NO. 190, Dag No. 50 & P.P. No. 192, Dag No. 52 Situated at Village Kokdanglanso, Langri Kissam, PO & PS Diyungbra, Dist- Dima Hasao, Assam with a proposed project cost of Rs 35.50 Crore subject to the terms and condition laid down by SEAC.

3.4.4. Recommendation of SEIAA

Approved

3.4.5. Details of Terms of Reference

3.4.5.1. Specific

Specific condition by SEIAA	
1.	Piezometric study of ground water for categorization of seasonal fluctuation of ground water.

3.4.5.2. Standard

3(b)	**Cement plants**
Preliminary requirements	
1.	EIA/EMP report cover page shall consists of project title with location, applicable schedule of the EIA Notification, 2006, ToR letter No. with date, study period along with EIA consultant & laboratory details with QCI/NABET/NABL accreditation certificate detail.
1.	Besides, following points shall be compiled as per QCI/NABET norms: a. Disclaimer by the EIA consultant. b. Declaration by the Functional Area Experts contributed to the EIA study and declaration by the head of the accredited consultant organization/authorized person. c. Undertaking by the project proponent owning the contents (information and data) of the EIA/EMP report. d. Undertaking by the EIA consultant regarding compliance of ToR issued by MoEF&CC. e. Consultant shall submit the Plagiarism Certificate for the EIA/EMP Report.
Executive Summary	
1.	Table of Contents of the EIA report including list of tables/figures/annexures/abbreviations/symbols/notations.
1.	Point wise compliance to the ToR issued by MoEF&CC.
1.	Name of the project along with applicable schedule and category as per EIA, 2006.
1.	Location and accessibility
1.	Resource requirements (Land; water; fuel; manpower)
1.	Operational activity
1.	Key pollution concerns
1.	Ambient air quality
1.	Ambient Noise quality
1.	Traffic study
1.	Surface water quality
1.	Ground water quality
1.	Soil quality
1.	Biological Environment

1.	Land use
1.	Socio-economic environment
1.	Impact on ambient air quality
1.	Impact on ambient noise quality
1.	Impact on road and traffic
1.	Impact on surface water resource and quality
1.	Impact on ground water resource and quality
1.	Impact on terrestrial and aquatic habitat
1.	Impact on socio-economic environment
1.	null
1.	Ambient air, noise, water and soil quality
1.	Noise quality management plan
1.	Emission and discharge from the plant
1.	Green Belt
1.	Social Parameters
1.	Risk assessment
1.	Public consultation
1.	Action plan to address the issues raised during public consultation as per MoEF&CC O.M. dated 30/09/2020
1.	null
1.	Air quality management plan
1.	Noise quality management plan
1.	Solid and hazardous waste management plan
1.	Effluent management plan
1.	Storm water management plan
1.	Occupational health and safety management plan
1.	Green belt development plan
1.	Socio-economic management plan

1.	Project cost and EMP implementation budget.
Introduction	
1.	Background about the project
1.	Need of the project
1.	Purpose of the EIA study
1.	Scope of the EIA study
Project description	
1.	Location of the project site covering village, Taluka/Tehsil, District and State.
1.	Site accessibility
1.	A digital toposheet in pdf or shape file compatible to google earth of the study area of radius of 10km and site location preferably on 1:50,000 scale. (including all eco-sensitive areas and environmentally sensitive places).
1.	Latest High-resolution satellite image data having 1 m - 5 m spatial resolution like quickbird, Ikonos, IRS P-6 pan sharpened etc., along with delineation of plant boundary co-ordinates. Area must include at least 100 m all around the project location.
1.	Environment settings of the site and its surrounding along with map.
1.	A list of major industries with name, products and distance from plant site within study area (10km radius) and the location of the industries shall be depicted in the study area map.
1.	In case if the project site is in vicinity of the water body, 50 meters from the edge of the water body towards the site shall be treated as no development/construction zone. If it's near the wetland, Guidelines for implementing Wetlands (Conservation and Management) Rules, 2017 may be followed.
1.	In case if the project site is in vicinity of the river, the industry shall not be located within the river flood plain corresponding to one in 25 years flood, as certified by concerned District Magistrate/Executive Engineer from State Water Resources Department (or) any other officer authorized by the State Government for this purpose as per the provisions contained in the MoEF&CC Office Memorandum dated 14/02/2022.
1.	In case of canal/ nala/ seasonal drain and any other water body passing through project site, the PP shall submit the suitable steps /conservation plan/mitigation measures along with contouring, Run -off calculations, disposal etc. A robust and full proof Drainage Conservation scheme to protect the natural drainage/water bodies and its flow parameters; along with Soil conservation scheme and multiple Erosion control measures shall be provided in the report.
1.	Type of land, land use of the project site needs to be submitted.
1.	Status of acquisition of land. If acquisition is not complete, stage of the acquisition process as per the MoEF&CC O.M. dated 7/10/2014 shall be furnished.
1.	Project proponent shall prepare Engineering layout plan showing all internal roads minimum 6 m width and 9 m turning radius for smooth traffic flow inside including fire tender as per NBC. Road network shall connect all service areas in layout. This drawing shall include area statement showing plot area, area under roads, parking, green belt with calculations and % with respect to plot area of project site and proper indexing. If located within an Industrial area/Estate/Complex, layout of Industrial Area indicating location of unit within the Industrial area/Estate.

1.	Project proponent shall submit contour map of project site along with drainage disposal system with calculations and drawings supported with proper indexing including Rain Water Harvesting details with calculations mentioning about GW recharge along with relevant drawing.
1.	A detailed report covering all aspects of Fire Safety Management and Fire Emergency Plan shall be submitted.
1.	Details of drone survey for the site, needs to be included in report and presented before the EAC during appraisal of the project.
1.	Status of Forest Clearance for the use of forest land shall be submitted.
1.	Copy of application submitted for clearance under the Wildlife (Protection) Act, 1972, to the Standing Committee of the National Board for Wildlife if the project site located within notified Eco-Sensitive Zone, 10 km radius of national park/sanctuary wherein final ESZ notification is not in place as per MoEF&CC Office Memorandum dated 8/8/2019.
1.	The projects to be located within 10 km of the National Parks, Sanctuaries, Biosphere Reserves, Migratory Corridors of Wild Animals, Eco-sensitive Zone and Eco-sensitive areas, the project proponent shall submit the map duly authenticated by Divisional Forest Officer showing the distance between the project site and the said areas.
1.	Wildlife Conservation Plan duly authenticated by the Competent Authority of the State Government for conservation of Schedule I fauna along with budget and action plan, if any exists in the study area.
1.	Products with capacities in Tons per Annum for the proposed project.
1.	If expansion project, status of implementation of existing project, details of existing/proposed products with production capacities in Tons per Annum.
1.	Site preparatory activities.
1.	List of raw materials required and their source along with mode of transportation.
1.	Other than raw materials, other chemicals and materials required with quantities and storage capacities.
1.	Manufacturing process details along with process flow diagram of proposed units.
1.	Consolidated materials and energy balance for the project.
1.	Total requirement of surface/ ground water and power with their respective sources, status of approval.
1.	Water balance diagram
1.	Details of Emission, effluents, hazardous waste generation and mode of disposal during construction as well as operation phase.
1.	Man-power requirement.
1.	Cost of project and scheduled time of completion.
1.	In case of expansion projects, project proponent shall submit structural stability certificate showing whether existing structure withstand for proposed expansion activity.
1.	Brief on present status of compliance (Expansion/modernization proposals) a. Cumulative Environment Impact Assessment for the existing as well as the proposed expansion/modernization shall be carried out. b. Cumulative Impact Assessment need to be carried out by greenfield projects considering the nearby industries. c. In case of

ground water drawl for the existing unit, action plan for phasing out of ground water abstraction in next two years except for domestic purposes and shall switch over to 100 % use of surface water from nearby source. d. Copy of all the Environment Clearance(s) including Amendments/validity of extension/transfer of EC, there to obtained for the project from MoEF&CC/SEIAA shall be attached as Annexures. A Certified Compliance Report (CCR) of the Integrated Regional Office of the Ministry of Environment, Forest and Climate Change/ or concerned authority as per OM No. IA3-22/10/2022-IA.III [E 1772581], dated 8th June, 2022 on the status of compliance of conditions stipulated in all the existing environment clearances including amendments shall be provided. A Certified Compliance Report (CCR) issued by the concerned Authority shall be valid for a period of one year from the date of inspection. e. In case the existing project has not obtained Environment Clearance, reasons for not taking EC under the provisions of the EIA Notification 1994 and/or EIA Notification 2006 shall be provided. A proper justification needs to be submitted along with documentary proof. Copies of Consent to Establish/No Objection Certificate and Consent to Operate (in case of units operating prior to EIA Notification 1994 or 2006, CTE and CTO of FY 2005-2006) obtained from the SPCB shall be submitted. Further, compliance report to the conditions of CTO from the Regional Office of the SPCB shall be submitted, as per OM No. IA3-22/10/2022-IA.III [E 1772581], dated 8th June, 2022. CCR on CTO conditions issued by the concerned SPCBs/PCCs shall be valid for a period of one year from the date of inspection of the project.

Description of the Environment

1. Study period

1. Approach and methodology for data collection as furnished below

Attributes	Sampling		Remarks
	Network	Frequency	
Air Environment			
Micro-Meteorological • Wind speed (Hourly) • Wind direction • Dry bulb temperature • Wet bulb temperature • Relative humidity • Rainfall • Solar radiation • Cloud cover • Environmental • Lapse Rate	Minimum 1 site in the project impact area	hourly continuous	IS 5182 Part 1-20 • Site specific primary data is essential • Secondary data from IMD, New Delhi • CPCB guidelines to be considered.
Pollutants • PM10 • SO2 • NOx • CO • HC • Other parameters relevant to the project and topography of the area	At least 8-12 locations	As per National Ambient Air Quality Standards,CPCB Notification.	• Sampling as per CPCB guidelines • Collection of AAQ data (except in monsoon season) • Locations of various stations for different parameters should be related to the characteristic properties of the parameters. • The monitoring stations shall be based on the NAAQM standards

			as per GSR 826(E) dated 16/11/2009 and take into account the predominant wind direction, population zone and sensitive receptors including reserved forests, • Raw data of all AAQ measurement for 12 weeks of all stations as per frequency given in the NAAQM Notification of 16/11/2009 along with min., max., average and 98% values for each of the AAQ parameters from data of all AAQ stations should be provided as an annexure to the EIA Report.
Noise			
Hourly equivalent noise levels	At least 8-12 locations	s per CPCB norms	
Water			
Parameters for water quality • pH, temp, turbidity, magnesium hardness, total alkalinity, chloride, sulphate, nitrate, fluoride, sodium, potassium, salinity • Total nitrogen, total phosphorus, DO, BOD, COD, Phenol • Heavy metals • Total coliforms, faecal coliforms • Phyto plankton • Zoo plankton	Samples for water quality should be collected and analyzed as per: • IS: 2488 (Part 1-5) methods for sampling and testing of Industrial effluents • Standard methods for examination of water and wastewater analysis published by American Public Health Association		
For River Bodies • Total Carbon • pH • Dissolved Oxygen • Biological Oxygen Demand • Free NH4 • Boron	Surface water quality of the nearest River (60m upstream and downstream) and other surface water bodies	• Yield of water sources to be measured during critical season • Standard methodology for collection of surface water (BIS standards)	

• Sodium Absorption Ratio • ElectricalConductivity		
For Ground Water	Ground water monitoring data should be collected at minimum of 8 locations (from existing wells /tube wells/existing current records) from the study area and shall be included.	
Traffic Study		
Type of vehicles • Frequency of vehicles for transportation of materials • Additional traffic due to proposed project	Land Environment	
Soil • Particle size distribution • Texture • pH • Electrical conductivity • Cation exchange capacity • Alkali metals • Sodium Absorption Ratio (SAR • Permeability Water holding capacity • Porosity	Soil samples be collected as per BIS specifications	
Land use/Landscape • Location code • Total project area • Topography • Drainage (natural) Cultivated, forest,plantations, water bodies, roads and settlements		
Biological Environment		
1. Aquatic • Primary productivity • Aquatic weeds • Enumeration of phyto plankton, zoo plankton and benthos • Fisheries Diversity indices • Trophic levels • Rare and endangered	• Detailed description of flora and fauna (terrestrial and aquatic) existing in the study area shall be given with special reference to rare, endemic and endangered species. Indicator species which indicate ecological and environment degradation should be identified and included to clearly state whether the proposed project would result in to any adverse effect on any species. • Samples to collect from upstream and downstream of discharge point, nearby tributaries at downstream, and also from dug wells close to activity site. • For forest studies, direction of wind should be considered while	

species • Marine Parks/ Sanctuaries/ closed areas /coastal regulation zone (CRZ) 2. Terrestrial • Vegetation-species list, economic importance, forest produce,medicinal value • Importance value index (IVI) of trees • Fauna • Avi fauna • Rare and endangered species • Sanctuaries / National park / Biosphere reserve • Migratory routes	selecting forests. • Secondary data to collect from Government offices, NGOs, published literature.
socio-economic	
Demographic structure • Infrastructure resource base • Economic resource base • Health status:Morbidity pattern • Cultural and aesthetic attributes. • Education	Socio-economic survey is based on proportionate, stratified and random sampling method. • Primary data collection through questionnaire • Secondary data from census records, statistical hard books, topo sheets, health records and relevant official records available with Govt. agencies

Approach and methodology for data collection as furnished below

Attributes	**Sampling**		**Remarks**
	Network	Frequency

1.	Action plan for e-waste management.
1.	Action plan for plastic waste management, considering the Plastic Waste Management Rules 2016.
1.	Action plan for construction and demolition waste management.
1.	Effluent management plan
1.	Storm water management plan
1.	Rain water harvesting plan
1.	Plan for maximum usage of waste water/treated water in the Unit
1.	Occupational health and safety management plan
1.	Green belt development plan: An action plan for Green Belt development consisting of 3 tiers of plantations of native species all along the periphery of the project of adequate width shall be raised in 33% of total area with a tree density shall not less than 2500 per ha within a time frame of one year shall be submitted. Survival rate of green belt shall be monitored on periodic basis to ensure that survival rate not be less than 80 %.
1.	Socio-economic management plan
1.	Wildlife conservation plan (In case of presence of schedule I species)
1.	Total capital cost and recurring cost/annum for environment pollution control measures shall be included.
1.	Explore possibilities for recycling and reusing of treated water in the unit to reduce the freshwater demand and waste disposal.
1.	An Action Plan for improving the house-keeping activities in the raw material handling area need to be submitted
1.	Action plan for the stock piles with impervious floor, provision of garland drains and catch pits to trap run off material shall be submitted.
1.	Action plan to limit the dust emission from all the stacks below 30 mg/Nm3 shall be furnished.
1.	Action plan for fugitive emission control in the plant premises shall be provided.
Conclusion of the EIA study	
1.	null
In addition to the above, any litigation pending against the project and/or any direction/order passed by any Court of Law against the project, if so, details thereof shall also be included. Has the unit received any notice under the Section 5 of Environment (Protection) Act, 1986 or relevant Sections of Air and Water Acts? If so, details thereof and compliance/ATR to the notice(s) and present status of the case.	
1.	null
Air cooled condensors shall be used in the power plant.	
1.	null
Details of Dry Ash handling system along with supplementary coal handling system shall be submitted.	

1.	null
Plan for transportation of coal shall be submitted.	
1.	null
Plan along with technical details of SCR shall be submitted.	
1.	null
In case of expansion project, Status of Ash Utilization of previous years (up to 5 years), action plan for 100% ash utilization along with timeline need to be submitted	
1.	null
null	
1.	Limestone and coal linkage documents along with the status of environment clearance of limestone and coal mines.
1.	Quantum of production of coal and limestone from coal & limestone mines and the projects they cater to;
1.	Present land use shall be prepared based on satellite imagery. High-resolution satellite image data having 1m-5m spatial resolution like quickbird, Ikonos, IRS P-6 pan sharpened etc. for the 10 Km radius area from proposed site. The same shall be used for land used/land-cover mapping of the area.
1.	If the raw materials used have trace elements, an environment management plan shall also be included.
1.	Plan for the implementation of the recommendations made for the cement plants in the Corporate Responsibility for Environmental Protection (CREP) guidelines shall be prepared.
1.	Energy consumption per ton of clinker and cement grinding
1.	Provision of waste heat recovery boiler
1.	Arrangement for co-processing of hazardous waste in cement plant.
1.	Provision of Alternate fuels.
1.	Details of Implementation of Fly Ash Management Rules
1.	Emission/Effluent norms as per GSR 496 (E) dated 9/5/2016 [EPA Rules 1986].
1.	Action plan for the stock piles with impervious floor, provision of garland drains and catch pits to trap run off material shall be submitted.
1.	Action plan to limit the particulate matter emission from all the stacks below 30 mg/Nm3 shall be furnished.
1.	PP shall explore the possibility of plastic waste utilization in the Plant/Unit process.
1.	Action plan for 100 % solid waste utilization shall be submitted.
1.	PM (PM10 and P2.5) present in the ambient air must be analysed for source analysis – natural dust/RSPM generated from plant operations (trace elements) of PM10 to be carried over.

3.5. Agenda Item No 5:

3.5.1. Details of the proposal

PATTA LAND ORDINARY EARTH AND STONE MINING PERMIT AREA AT PAMOHI/ MOINAKHURUNG VILLAGE by **HIRAK GOGOI** located at **KAMRUP METRO,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/454404/2023	SEIAA.3673/2024	12/02/2024	Mining of minerals (1(a))

3.5.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :30/04/2024

Deliberations of SEAC 1 :

Necessary land documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The Joint Verification Report (JVR) with the Revenue and Forest Department is also placed for scrutiny. It reveals from the report that the proposed mining area is adjacent to the Rani RF (5 mtr away from the boundary). Drone images furnished by the Proponent is also placed before the Committee. After due discussions and deliberations the Committee was of the opinion to have an inspection of the site by a sub-Committee and to furnish a report showing the status of the proposed area and the remedial measures to be taken for averting air pollution due to excavation work / mining in the area. A sub-Committee was constituted accordingly on 29.02.2024 and the said sub-Committee conducted the site verification on 09.03.2024 in presence of the project Proponent. The report dated 25.03.2024 submitted to this effect is also placed for perusal by the Committee.

On perusal of the report it is suggested to follow the guidelines annexed to the report and also to take precaution for safety of the Godown existing near to the proposed area. It is also suggested not to use blasting explosives while disintegrating the rock. There has to be demarcation of the entire proposed area with concrete pillars with proper safety measures to prevent any debris falling in the neighbours' dwelling premises, preferably with high strength iron net.

After due deliberation the Committee is of the opinion to allow mining in the proposed approved area under constant monitoring of the Forest Department following the terms and conditions explained above.

Date of SEAC 2 :23/02/2024

Deliberations of SEAC 2 :

As decided in the meeting a field enquiry by a sub-committee is suggested

3.5.3. Deliberations by the SEIAA in current meetings

A map with the mine site and the Rani Reserve Forest boundary to be endorsed by the concerned DFO is to be submit.

3.5.4. Recommendation of SEIAA

Deferred for ADS

3.6. Agenda Item No 6:

3.6.1. Details of the proposal

Residential Building "Shreeja Paradise" by **SHREEJA BUILDCON LLP** located at **KAMRUP METRO,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/INFRA2/455649/2023	SEIAA.3675/2024	14/02/2024	Building / Construction (8(a))

3.6.2. Deliberations by the committee in previous meetings

Date of SEIAA 1 :19/04/2024

Deliberations of SEIAA 1 :

The SEIAA committee suggest a Site visit.

Date of SEAC 2 :23/02/2024

Deliberations of SEAC 2 :

The consultant OCEAO-ENVIRO on behalf of the project Proponent has made a presentation before the Committee. Requisite documents requiring clearances from the statutory bodies are uploaded including the EMP, Waste Water Management details, Solid Waste Management Plan, E-waste generation details, Rain Water Harvesting (RWH) system, Drainage plan, Parking Plan, Disaster Management Plan etc etc

Distances of the Project from the boundary of the Protected Areas (PAs) namely Amsung Wildlife Sanctuary is **2.0** km. It is clarified by the Proponent that there is no bar on construction as the plot is beyond the boundary of the respective Eco Sensitive Zone.

The Committee deliberated upon the matter and also discussed on each of the relevant issues after presentation and under consideration.

3.6.3. Deliberations by the SEIAA in current meetings

EC is approved for the total built up area of the proposed residential complex is 20,777.33 Sqm while the Plot area is 5230.12 Sqm. It is a project, construction of which got started way back in 2019 while the built up area was less than the prescribed ceiling of 20,000 Sqm not requiring prior EC. However, with subsequent modifications in Building Plan the threshold limit of the built up area has become more and, therefore, falling under Schedule 8(a) under Category-B of the EIA Notification, 2006. Total estimated population to be housed in the project is 872 persons. The proposed Green Belt to be established is earmarked with an area of 1569.00 Sq m. Project cost is estimated at Rs 42.33 Crore subject to terms and conditions laid down by SEAC

3.6.4. Recommendation of SEIAA

Approved

3.6.5. Details of Environment Conditions

3.6.5.1. Specific

Specific Conditions by SEAC	
1.	**i)** The Proponent shall develop greenery around the premises wherein the inmates could feel the benefits by raising plants of indigenous species, preferably of evergreen in nature having religious importance, health benefits having medicinal importance as also being of aesthetic value etc. It was suggested by the Committee that the plant species preferably be are of Bael (*Aegle marmelos*), Giloy (*Tinospora cordifolia*), Bakul (*Mimosups elengi*), Nahor (*Mesua ferrea*), Ashoka (S*araca asoca*), Kanchan (*Bauhinia purpurea*), Rudrakhya (*Elaeocarps ganitrus*), Kadamba (*Neolamarckia cadamaba*), Joba (*Hibiscus rosa sinensis*), Sonaru (*Cassia fistula*), Putranjiba (*Putranjiva roxburghii*), Tezpatta (*Cinamomum tamala*), Dalchini (*Cinamomum zeylanicum*), Sewali phul (*Nyctanthes arbor tris tis*), Money plant (*Araceae* member), *Sanseviera zelanica*, indigenous flowering plant species of herbs and shrubs like Kamini Kusum (*Murraya paniculata*), Aparajita (*Clitorea ternatea*), Narasingha (*Murraya koengii*) etc etc. The Committee suggested that the numbers of plants should not be restricted to the stipulations and the same should invariably be increased accordingly comprising of herbs, shrubs, climbers and trees, etc with touch of religious utility of flowering plants and effort to garner support from the inmates for future maintenance with their active support, particularly school going children. Efforts need to be put to get the plants with their scientific names, local names properly labeled showing medicinal value for appreciation by the inmates. ii) The Committee felt it expedient that the proponent shall make provision for a ***YOGA Hall*** (Yoga Centre for the inmates specially for the Children, the Women and as well for the ***elderly*** inmates) wherein a trained personnel in Yoga could come to train the inmates adequately for a healthy living. iii) The Proponent shall comply the of conditions of Indian Green Building Council (IGBC) or *GRIHA* (Green Rating for Integrated Habitat Assessment) / LEEDS (Leadership in Energy and Environmental Development Systems). iv) Further, the STP is to be managed by the project Proponent for the period even after handing over the projects to the stakeholders. The PP shall have AMC with the STP provider for operation and maintenance for a period of at least 10 years at the initial / 1st instance and their maintenance shall be ensured by the PCB, Assam. v) Certificate from the Central Ground Water Authority for use of water in the Operational phase needs to be obtained by the Proponent. vi) The PP shall obtain Consent to establish (CTE) and Consent to operate (CTO) from Pollution Control Board, Assam under the provisions of the Water Act, 1974 and Air Act, 1981, as applicable vi) The cost earmarked for the environmental safeguards contained in the Environment Management Plan (EMP), as approved, amounting to **Rs 108.00** Lakh as Capital Cost and **Rs 14.00** Lakh as recurring cost per year against each of the components shall have to be utilized and shall not be diverted for any other purposes and year wise expenditures both in constructional and operational phases shall be reported to the PCB, Assam & SEIAA, the Regional Office, MoEF&CC, GoI, Guwahati along with the break up of expenditures for record and monitoring.
SPECIFIC CONDITIONS BY SEIAA	
1.	A new analytical Report of Fluoride content in the bore hole water to be furnished with the 1st six monthly compliance report

3.6.5.2. Standard

8(a)	**Building / Construction**
Statutory compliance	

1.	The project proponent shall obtain all necessary clearance/ permission from all relevant agencies including town planning authority before commencement of work. All the construction shall be done in accordance with the local building byelaws.
1.	The approval of the Competent Authority shall be obtained for structural safety of buildings due to earthquakes, adequacy of firefighting equipment etc. as per National Building Code including protection measures from lightening etc.
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1980, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State Pollution Control Board/ Committee.
1.	The project proponent shall obtain the necessary permission for drawl of ground water / surface water required for the project from the competent authority.
1.	A certificate of adequacy of available power from the agency supplying power to the project along with the load allowed for the project should be obtained.
1.	All other statutory clearances such as the approvals for storage of diesel from Chief Controller of Explosives, Fire Department, Civil Aviation Department shall be obtained, as applicable, by project proponents from the respective competent authorities.
1.	The provisions of the Solid Waste Management Rules, 2016, e-Waste (Management) Rules, 2016, and the Plastics Waste Management Rules, 2016, shall be followed.
1.	The project proponent shall follow the ECBC/ECBC-R prescribed by Bureau of Energy Efficiency, Ministry of Power strictly.
Air quality monitoring and preservation	
1.	Notification GSR 94(E) dated 25.01.2018 of MoEF&CC regarding Mandatory Implementation of Dust Mitigation Measures for Construction and Demolition Activities for projects requiring Environmental Clearance shall be complied with.
1.	A management plan shall be drawn up and implemented to contain the current exceedance in ambient air quality at the site.
1.	The project proponent shall install system to carryout Ambient Air Quality monitoring for common/criterion parameters relevant to the main pollutants released (e.g. PM10 and PM2.5) covering upwind and downwind directions during the construction period.
1.	Diesel power generating sets proposed as source of backup power should be of enclosed type and conform to rules made under the Environment (Protection) Act, 1986. The height of stack of DG sets should be equal to the height needed for the combined capacity of all proposed DG sets. Use of low sulphur diesel. The location of the DG sets may be decided with in consultation with State Pollution Control Board.
1.	Construction site shall be adequately barricaded before the construction begins. Dust, smoke & other air pollution prevention measures shall be provided for the building as well as the site. These measures shall include screens for the building under construction, continuous dust/ wind breaking walls all around the site (at least 3-meter height). Plastic/tarpaulin sheet covers shall be provided for vehicles bringing in sand, cement, murram and other construction materials prone to causing dust pollution at the site as well as taking out debris from the site.

1.	Sand, murram, loose soil, cement, stored on site shall be covered adequately so as to prevent dust pollution.
1.	Wet jet shall be provided for grinding and stone cutting.
1.	Unpaved surfaces and loose soil shall be adequately sprinkled with water to suppress dust.
1.	All construction and demolition debris shall be stored at the site (and not dumped on the roads or open spaces outside) before they are properly disposed. All demolition and construction waste shall be managed as per the provisions of the Construction and Demolition Waste Management Rules 2016.
1.	The diesel generator sets to be used during construction phase shall be low sulphur diesel type and shall conform to Environmental (Protection) prescribed for air and noise emission standards.
1.	The gaseous emissions from DG set shall be dispersed through adequate stack height as per CPCB standards. Acoustic enclosure shall be provided to the DG sets to mitigate the noise pollution. Low sulphur diesel shall be used. The location of the DG set and exhaust pipe height shall be as per the provisions of the Central Pollution Control Board (CPCB) norms.
1.	For indoor air quality the ventilation provisions as per National Building Code of India.
Water quality monitoring and preservation	
1.	The natural drain system should be maintained for ensuring unrestricted flow of water. No construction shall be allowed to obstruct the natural drainage through the site, on wetland and water bodies. Check dams, bio-swales, landscape, and other sustainable urban drainage systems (SUDS) are allowed for maintaining the drainage pattern and to harvest rain water.
1.	Buildings shall be designed to follow the natural topography as much as possible. Minimum cutting and filling should be done.
1.	Total fresh water use shall not exceed the proposed requirement as provided in the project details.
1.	The quantity of fresh water usage, water recycling and rainwater harvesting shall be measured and recorded to monitor the water balance as projected by the project proponent. The record shall be submitted to the Regional Office, MoEF&CC along with six monthly Monitoring reports.
1.	A certificate shall be obtained from the local body supplying water, specifying the total annual water availability with the local authority, the quantity of water already committed, the quantity of water allotted to the project under consideration and the balance water available. This should be specified separately for ground water and surface water sources, ensuring that there is no impact on other users.
1.	At least 20% of the open spaces as required by the local building bye-laws shall be pervious. Use of Grass pavers, paver blocks with at least 50% opening, landscape etc. would be considered as pervious surface.
1.	Installation of dual pipe plumbing for supplying fresh water for drinking, cooking and bathing etc and other for supply of recycled water for flushing, landscape irrigation, car washing, thermal cooling, conditioning etc. shall be done.
1.	Use of water saving devices/fixtures (viz. low flow flushing systems; use of low flow faucets tap aerators etc) for water conservation shall be incorporated in the building plan.
1.	Separation of grey and black water should be done by the use of dual plumbing system. In case of single stack system separate recirculation lines for flushing by giving dual plumbing system be done.
1.	Water demand during construction should be reduced by use of pre-mixed concrete, curing agents and other best practices referred.

1.	The local bye-law provisions on rain water harvesting should be followed. If local bye-law provision is not available, adequate provision for storage and recharge should be followed as per the Ministry of Urban Development Model Building Byelaws, 2016. Rain water harvesting recharge pits/storage tanks shall be provided for ground water recharging as per the CGWB norms.
1.	A rain water harvesting plan needs to be designed where the recharge bores of minimum one recharge bore per 5,000 square meters of built up area and storage capacity of minimum one day of total fresh water requirement shall be provided. In areas where ground water recharge is not feasible, the rain water should be harvested and stored for reuse. The ground water shall not be withdrawn without approval from the Competent Authority.
1.	All recharge should be limited to shallow aquifer.
1.	No ground water shall be used during construction phase of the project.
1.	Any ground water dewatering should be properly managed and shall conform to the approvals and the guidelines of the CGWA in the matter. Formal approval shall be taken from the CGWA for any ground water abstraction or dewatering.
1.	Sewage shall be treated in the STP with tertiary treatment. The treated effluent from STP shall be recycled/re-used for flushing, AC make up water and gardening. As proposed, no treated water shall be disposed in to municipal drain.
1.	No sewage or untreated effluent water would be discharged through storm water drains.
1.	Onsite sewage treatment of capacity of treating 100% waste water to be installed. The installation of the Sewage Treatment Plant (STP) shall be certified by an independent expert and a report in this regard shall be submitted to the Ministry before the project is commissioned for operation. Treated waste water shall be reused on site for landscape, flushing, cooling tower, and other end-uses. Excess treated water shall be discharged as per statutory norms notified by Ministry of Environment, Forest and Climate Change. Natural treatment systems shall be promoted.
1.	Periodical monitoring of water quality of treated sewage shall be conducted. Necessary measures should be made to mitigate the odour problem from STP.
1.	Sludge from the onsite sewage treatment, including septic tanks, shall be collected, conveyed and disposed as per the Ministry of Urban Development, Central Public Health and Environmental Engineering Organization (CPHEEO) Manual on Sewerage and Sewage Treatment Systems, 2013.
Noise monitoring and prevention	
1.	Ambient noise levels shall conform to residential area/commercial area/industrial area/silence zone both during day and night as per Noise Pollution (Control and Regulation) Rules, 2000. Incremental pollution loads on the ambient air and noise quality shall be closely monitored during construction phase. Adequate measures shall be made to reduce ambient air and noise level during construction phase, so as to conform to the stipulated standards by CPCB / SPCB.
1.	Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six-monthly compliance report.
1.	Acoustic enclosures for DG sets, noise barriers for ground-run bays, ear plugs for operating personnel shall be implemented as mitigation measures for noise impact due to ground sources.
Energy Conservation measures	
1.	Compliance with the Energy Conservation Building Code (ECBC) of Bureau of Energy Efficiency shall be ensured. Buildings in the States which have notified their own ECBC, shall comply with the State ECBC.

1.	Outdoor and common area lighting shall be LED.
1.	Concept of passive solar design that minimize energy consumption in buildings by using design elements, such as building orientation, landscaping, efficient building envelope, appropriate fenestration, increased day lighting design and thermal mass etc. shall be incorporated in the building design. Wall, window, and roof u-values shall be as per ECBC specifications.
1.	Energy conservation measures like installation of CFLs/ LED for the lighting the area outside the building should be integral part of the project design and should be in place before project commissioning.
1.	Solar, wind or other Renewable Energy shall be installed to meet electricity generation equivalent to 1% of the demand load or as per the state level/ local building bye-laws requirement, whichever is higher.
1.	Solar power shall be used for lighting in the apartment to reduce the power load on grid. Separate electric meter shall be installed for solar power. Solar water heating shall be provided to meet 20% of the hot water demand of the commercial and institutional building or as per the requirement of the local building bye-laws, whichever is higher. Residential buildings are also recommended to meet its hot water demand from solar water heaters, as far as possible.
Waste Management	
1.	A certificate from the competent authority handling municipal solid wastes, indicating the existing civic capacities of handling and their adequacy to cater to the M.S.W. generated from project shall be obtained.
1.	Disposal of muck during construction phase shall not create any adverse effect on the neighbouring communities and be disposed taking the necessary precautions for general safety and health aspects of people, only in approved sites with the approval of competent authority.
1.	Separate wet and dry bins must be provided in each unit and at the ground level for facilitating segregation of waste. Solid waste shall be segregated into wet garbage and inert materials.
1.	Organic waste compost/Vermiculture pit/Organic Waste Converter within the premises with a minimum capacity of 0.3 kg /person/day must be installed.
1.	All non-biodegradable waste shall be handed over to authorized recyclers for which a written tie up must be done with the authorized recyclers.
1.	Any hazardous waste generated during construction phase, shall be disposed off as per applicable rules and norms with necessary approvals of the State Pollution Control Board.
1.	Use of environment friendly materials in bricks, blocks and other construction materials, shall be required for at least 20% of the construction material quantity. These include Fly Ash bricks, hollow bricks, AACs, Fly Ash Lime Gypsum blocks, Compressed earth blocks, and other environment friendly materials.
1.	Fly ash should be used as building material in the construction as per the provision of Fly Ash Notification of September, 1999 and amended as on 27th August, 2003 and 25th January, 2016. Ready mixed concrete must be used in building construction.
1.	Any wastes from construction and demolition activities related thereto shall be managed so as to strictly conform to the Construction and Demolition Waste Management Rules, 2016.
1.	Used CFLs and TFLs should be properly collected and disposed off/sent for recycling as per the prevailing guidelines/ rules of the regulatory authority to avoid mercury contamination.
Green Cover	
1.	No tree can be felled/transplant unless exigencies demand. Where absolutely necessary, tree felling shall be with

	prior permission from the concerned regulatory authority. Old trees should be retained based on girth and age regulations as may be prescribed by the Forest Department. Plantations to be ensured species (cut) to species (planted).
1.	A minimum of 1 tree for every 80 sqm of land should be planted and maintained. The existing trees will be counted for this purpose. The landscape planning should include plantation of native species. The species with heavy foliage, broad leaves and wide canopy cover are desirable. Water intensive and/or invasive species should not be used for landscaping.
1.	Where the trees need to be cut with prior permission from the concerned local Authority, compensatory plantation in the ratio of 1:10 (i.e. planting of 10 trees for every 1 tree that is cut) shall be done and maintained. Plantations to be ensured species (cut) to species (planted). Area for green belt development shall be provided as per the details provided in the project document.
1.	Topsoil should be stripped to a depth of 20 cm from the areas proposed for buildings, roads, paved areas, and external services. It should be stockpiled appropriately in designated areas and reapplied during plantation of the proposed vegetation on site.
Transport	
1.	A comprehensive mobility plan, as per MoUD best practices guidelines (URDPFI), shall be prepared to include motorized, non-motorized, public, and private networks. Road should be designed with due consideration for environment, and safety of users. The road system can be designed with these basic criteria. a. Hierarchy of roads with proper segregation of vehicular and pedestrian traffic. b. Traffic calming measures. c. Proper design of entry and exit points. d. Parking norms as per local regulation.
1.	Vehicles hired for bringing construction material to the site should be in good condition and should have a pollution check certificate and should conform to applicable air and noise emission standards be operated only during non-peak hours.
null	
1.	A detailed traffic management and traffic decongestion plan shall be drawn up to ensure that the current level of service of the roads within a 05 kms radius of the project is maintained and improved upon after the implementation of the project. This plan should be based on cumulative impact of all development and increased habitation being carried out or proposed to be carried out by the project or other agencies in this 05 Kms radius of the site in different scenarios of space and time and the traffic management plan shall be duly validated and certified by the State Urban Development department and the P.W.D./ competent authority for road augmentation and shall also have their consent to the implementation of components of the plan which involve the participation of these departments.
Human health issues	
1.	All workers working at the construction site and involved in loading, unloading, carriage of construction material and construction debris or working in any area with dust pollution shall be provided with dust mask.
1.	For indoor air quality the ventilation provisions as per National Building Code of India.
1.	Emergency preparedness plan based on the Hazard identification and Risk Assessment (HIRA) and Disaster Management Plan shall be implemented.
1.	Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, crèche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.
1.	Occupational health surveillance of the workers shall be done on a regular basis.

1.	A First Aid Room shall be provided in the project both during construction and operations of the project.
Miscellaneous	
1.	The project proponent shall prominently advertise it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days indicating that the project has been accorded environment clearance and the details of MoEFCC/SEIAA website where it is displayed.
1.	ii. environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The company shall have a well laid down environmental policy duly approved by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders. The copy of the board resolution in this regard shall be submitted to the MoEF&CC as a part of six-monthly report.
1.	A separate Environmental Cell both at the project and company head quarter level, with qualified personnel shall be set up under the control of senior Executive, who will directly report to the head of the organization.
1.	Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the Six Monthly Compliance Report
1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
1.	The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	The project proponent shall abide by all the commitments and recommendations made in the EIA/EMP reportand also that during their presentation to the Expert Appraisal Committee.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forest and Climate Change (MoEF&CC).
1.	Concealing factual data or submission of false/fabricated data may result in revocation of this environmental clearance and attract action under the provisions of Environment (Protection) Act, 1986.
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.

1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	The above conditions shall be enforced, inter-alia under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986, Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016, and the Public Liability Insurance Act, 1991 along with their amendments and Rules and any other orders passed by the Hon'ble Supreme Court of India / High Courts and any other Court of Law relating to the subject matter.
1.	Any appeal against this EC shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.
Specific Conditions	
1.	Recommendations of mitigation measures from possible accident shall be implemented based on Risk Assessment studies conducted for worst case scenarios using latest techniques.

3.7. Agenda Item No 7:

3.7.1. Details of the proposal

Malgaon P.P. Land Brick Earth Mining Permit Area by **CHITTA PAUL** located at **KOKRAJHAR,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/463104/2024	SEIAA3744/2024	28/03/2024	Mining of minerals (1(a))

3.7.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :30/04/2024

Deliberations of SEAC 1 :

Necessary land documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The Joint Verification Report (JVR) with the Revenue and Forest Department is also placed for scrutiny. The non-agricultural land certificate, the non-encumbrance certificate are also placed. After due discussions and deliberations the Committee is of the opinion to allow extraction of the brick earth with the approved quantity of **3,170** cu.m in 1 (one) year for use of Brick production by the Proponent.

Decision: Recommended grant of the EC for 1 (one) year.

3.7.3. Deliberations by the SEIAA in current meetings

EC is approved with the mining area of 0.29 ha measuring 3,170 cu m in 1 (one) year with terms and conditions laid down by SEAC

3.7.4. Recommendation of SEIAA

Approved

3.7.5. Details of Environment Conditions

3.7.5.1. Specific

SPECIFIC CONDITIONS BY SEAC	
1.	1. This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan; 2. This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates and (b) the Proponent shall extract the approved quantity of mineral indicated herein with maximum mining depth of up to 2 (two) meters only from the non-mined surface. 3. That the Proponent shall also invariably obtain the copy of latest CTE/CTO from the PCB, Assam. 4. That the Proponent shall strictly follow the **Zigzag** Technology for production of bricks. 5. The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. 6. The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geocoordinates depicted there in on the pillars/posts, following the GPS coordinates mentioned in the approved mining plan. 7. The Proponent further must ensure raising Green Belt around the premises in consultation with the DFO for planting of suitable evergreen species of plants all along the periphery of the plot of land which need to be uploaded in the PARIVESH portal.
STANDARD CONDITIONS	
1.	**<u>Air quality monitoring and mitigation measure</u>** 1. Vehicular emissions shall be kept under control and regularly monitored. All the vehicles engaged in mining and allied activities shall operate only after obtaining 'PUC' certificate from the authorized pollution testing centres. 2. The transportation of materials shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the materials through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated. 3. Major approach roads should be properly maintained with dust suppression measures and the river bank in any case must not be damaged. 4. Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan. **<u>Corporate Environment Responsibility</u>** Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out. The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/ violation of the environmental/forest/

wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/ violation of the environmental/forest /wildlife norms/conditions and/or shareholders/stake holders.

-

Land Recalmation

Native tree species shall be selected and planted over areas affected by subsidence.

Mining Plan

Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.

No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927. 1. Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable.

No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).

Miscellaneous

1. The above conditions shall be enforced, inter-alia under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986, Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 and the Public Liability Insurance Act, 1991 along with their amendments and Rules and any other orders passed by the Hon'ble Supreme Court of India / High Courts and any other Court of Law relating to the subject matter.
2. The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours
3. The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
4. The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent’s website permanently.
5. The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
6. The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
7. The project proponent shall submit six-monthly reports on the status of the compliance of the

stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.

8. The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
9. The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
10. No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC). 1. Concealing factual data or submission of false/fabricated data may result in revocation of this environmental clearance and attract action under the provisions of Environment (Protection) Act, 1986.
11. The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
12. The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
13. The Regional Office of MoEF & CC shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.

Noise and Vibration monitoring and prevention

1. Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
2. The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.

Public hearing and Human health issues

PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius

PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)

PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan.

Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed. Statutory compliance

Statutory compliance

1. The Environmental clearance shall be subject to orders of Hon’ble Supreme Court of India, Hon’ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
2. The project proponent shall obtain Consent to Establish / Operate under the provisions of Air

(Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the Pollution Control Board, Assam.

3. The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
4. The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
5. Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA Notification, 2006 and its amendments therein

Water quality monitoring and mitigation measures

1. Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
2. The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.
3. The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.

3.8. Agenda Item No 8:

3.8.1. Details of the proposal

Jalabila Mahal (Sand) by **DIVISIONAL FOREST OFFICER** located at **KOKRAJHAR,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/467660/2024	SEIAA.3741/2024	29/03/2024	Mining of minerals (1(a))

3.8.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :30/04/2024

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. It reveals sufficient quantity of minor mineral available in the proposed area.

The Committee considered it appropriate to recommend the grant of EC by the SEIAA allowing extraction and harvesting of minor mineral in 2 (two) years time with the quantity of 24,000 Cu M @ 12,000 Cu M of Sand, annually.

The Committee also is of the opinion to urge for taking requisite steps to conduct preparation of the District Survey Report (DSR) for the District by the DFO in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC.

Decision: ***Recommended for grant of EC for 2 (two) years***

3.8.3. Deliberations by the SEIAA in current meetings

EC is approved with mining area 04.53 ha with the recommended quantity of 24,000 Cu M of Sand in 5 (five) years as per the approved Mining Plan with the proposed quantities of @ 4,800 Cu M Sand, annually as per terms and conditions laid down by SEAC.

3.8.4. Recommendation of SEIAA

Approved

3.8.5. Details of Environment Conditions

3.8.5.1. Specific

SPECIFIC CONDITIONS BY SEAC	
1.	(i) Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO. (ii) The DFO shall comply with necessary formalities for transfer of the EC to the lessee with due NOC for filing application to the SEIAA before allowing mining so that the entire accountability in mining is vested on the lessee / Proponent with the same terms and conditions stipulated in the EC as per the EIA Notification, 2006. (iii) The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. (iv) The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geocoordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan. (v) CSR activities shall be carried out / undertaken by the Proponent and 2% of the total project cost **Rs 1.50** Lakh shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the near by village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st year of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report. (vi) Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands involving local NGOs, School / College students and an amount of **Rs 1.50** Lakh shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic,

	medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Amlokhi (*Phyllantus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*), Bael (*Aegle marmelos*), Mohaneem(*Azedirachta indica*), Jamun (*Syzygium cuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*) etc etc. Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

SIA/AS/MIN/467673/2024	SEIAA 3742/2024	29/03/2024	Mining of minerals (1(a))

3.9.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :30/04/2024

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized.

The Committee considered it appropriate to recommend the grant of EC by the SEIAA allowing extraction and harvesting of minor mineral in 5 (five) years time with the quantity of **52,000** Cu M of sand and **13,000** of gravel in **5 (five)** years as per the approved Mining Plan with the proposed quantities of **@ 10,400** Cu M sand and **@ 2,600** Cu M gravel, annually.

The Committee is also of the opinion to urge for taking requisite steps to conduct preparation of the District Survey Report (DSR) for the District by the DFO in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC. The Proponent, DFO shall submit report as to how many cases of mining are transferred to the actual Lessee by way of transfer of ECs and also to submit the half yearly Compliance Reports for those cases.

Decision: Recommended for grant of EC for 5 (five) years

3.9.3. Deliberations by the SEIAA in current meetings

EC is approved for the **area** allotted 04.10 ha with the recommended quantity of 52,000 Cu M of sand and 13,000 of gravel in 5 (five) years as per the approved Mining Plan with the proposed quantities of @ 10,400 Cu M sand and @ 2,600 Cu M gravel, annually subject to the terms & condition laid down by the SEAC.

3.9.4. Recommendation of SEIAA

Approved

Miscellaneous

1. The above conditions shall be enforced, inter-alia under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986, Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 and the Public Liability Insurance Act, 1991 along with their amendments and Rules and any other orders passed by the Hon'ble Supreme Court of India / High Courts and any other Court of Law relating to the subject matter.
2. The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours
3. The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
4. The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent’s website permanently.

5. The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
6. The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
7. The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
8. The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
9. The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
10. No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC). 1. Concealing factual data or submission of false/fabricated data may result in revocation of this environmental clearance and attract action under the provisions of Environment (Protection) Act, 1986.
11. The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
12. The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
13. The Regional Office of MoEF & CC shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.

Noise and Vibration monitoring and prevention

1. Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
2. The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.

Public hearing and Human health issues

1. PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius
2. PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
3. PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan.
4. Effective arrangement shall be made to provide and maintain at suitable points conveniently

situated, a sufficient supply of drinking water for all the persons employed. Statutory compliance

Statutory compliance

1. The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
2. The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the Pollution Control Board, Assam.
3. The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
4. The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
5. Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA Notification, 2006 and its amendments therein

Water quality monitoring and mitigation measures

1. Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
2. The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.
3. The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.

3.10. Agenda Item No 10:

3.10.1. Details of the proposal

GOVT. PERMIT AREA OF BARNADI SAND MAHAL NO-8 by **BAKSA FOREST DIVISION MUSHALPUR** l ocated at **BAKSA,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/468098/2024	SEIAA3730/2024	02/04/2024	Mining of minerals (1(a))

3.10.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :30/04/2024

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. Due deliberations and discussions are held.

The Committee considered it appropriate to recommend the grant of EC by the SEIAA allowing extraction and harvesting of minor mineral in five years time with the quantity of **1,10,000 Cu M @ 22,000** Cu M, annually, subject to the conditions that:

The Committee is of the opinion to have details of the ECs so transferred in respect of the Lessee during last 3 (three) financial years with the mandatory half yearly compliance reports as a part of the process of sustainable mining in the district.

The Committee also is of the opinion to urge for taking requisite steps for conduct and preparation of the District Survey Report (DSR) for mining of minor minerals of the District by the DFO in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or river bed mining and mining of other minor minerals following the guidelines issued by the MoEF and CC.

Decisions taken**: Recommended for grant of the EC for 5 (five) years**

3.10.3. Deliberations by the SEIAA in current meetings

EC is approved for allotted area 04.98 ha with the recommended quantity of 1,10,515 Cu M of Sand in 5 (five) years as per the approved Mining Plan @ 22,103 Cu M, annually with terms and conditions laid down by SEAC.

3.10.4. Recommendation of SEIAA

Approved

3.10.5. Details of Environment Conditions

3.10.5.1. Specific

STANDARD CONDITIONS	
1.	**<u>Air quality monitoring and mitigation measure</u>** 1. Vehicular emissions shall be kept under control and regularly monitored. All the vehicles engaged in mining and allied activities shall operate only after obtaining 'PUC' certificate from the authorized pollution testing centres. 2. The transportation of materials shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the materials through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated. 3. Major approach roads should be properly maintained with dust suppression measures and the river bank in any case must not be damaged.

4. Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.

Corporate Environment Responsibility

Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.

The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/ violation of the environmental/forest/ wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/ violation of the environmental/forest /wildlife norms/conditions and/or shareholders/stake holders.

-

Land Recalmation

Native tree species shall be selected and planted over areas affected by subsidence.

Mining Plan

Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.

No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927. 1. Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable.

No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).

Miscellaneous

1. The above conditions shall be enforced, inter-alia under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986, Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 and the Public Liability Insurance Act, 1991 along with their amendments and Rules and any other orders passed by the Hon'ble Supreme Court of India / High Courts and any other Court of Law relating to the subject matter.
2. The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours
3. The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
4. The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent’s

website permanently.

5. The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
6. The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
7. The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
8. The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
9. The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
10. No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC). 1. Concealing factual data or submission of false/fabricated data may result in revocation of this environmental clearance and attract action under the provisions of Environment (Protection) Act, 1986.
11. The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
12. The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
13. The Regional Office of MoEF & CC shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.

Noise and Vibration monitoring and prevention

1. Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
2. The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.

Public hearing and Human health issues

PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius

PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)

PP is asked to also identify the rural areas for installation of solar light with its maintenance within the

	study area of 10 km radius buffer zone with time bound action plan. Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed. Statutory compliance **Statutory compliance** 1. The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project 2. The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the Pollution Control Board, Assam. 3. The project proponent shall obtain clearance from the National Board for Wildlife, if applicable. 4. The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project. 5. Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA Notification, 2006 and its amendments therein **Water quality monitoring and mitigation measures** 1. Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office. 2. The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government. **3.** The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.
GENERAL CONDITIONS BY SEAC	
1.	**1.** This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan; **2.** This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates ; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials and (c)the Proponent shall extract / harvest the approved quantity of minerals indicated herein with maximum mining depth of up to 2 (two) meters only from the non-mined surface.
SPECIFIC CONDITIONS BY SEAC	
1.	i) The DFO shall comply with necessary formalities for transfer of the EC to the

lessee with due NOC for filing application to the SEIAA before allowing mining so that the entire accountability in mining is vested on the lessee / Proponent with the same terms and conditions stipulated in the EC as per the EIA Notification, 2006.

ii) Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO.

iii) The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period.

iv) The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geocoordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan.

v) CSR activities shall be carried out / undertaken by the Proponent and 2% of the total project cost Rs 5.00 Lakh shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the near by village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st two (2) years of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report.

vi) Plantation activities shall be carried out / undertaken in any educational institution or Govt lands involving local NGOs, School/ College students and an amount of Rs 5.00 (Five) Lakh shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students.

The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Agor (*Aquillaria malaccensis*), Amlokhi (*Phyllantus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*), Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*), Mohaneem (*Azedirachta indica*), Jamun (*Syzygium cuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Khair (*Acacia catechu*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*) etc etc.

Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.11. Agenda Item No 11:

3.11.1. Details of the proposal

BONGARA VILLAGE KP LAND EARTH MINING PERMIT AREA by **GOLAK KALITA** located at **KAMRU P METRO,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/462659/2024	SEIAA.3742/2024	03/04/2024	Mining of minerals (1(a))

3.11.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :30/04/2024

Deliberations of SEAC 1 :

Necessary land documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The Joint Verification Report (JVR) with the Revenue and Forest Department is also placed for scrutiny. After due discussions and deliberations the Committee is of the opinion to allow extraction of the minor mineral with the approved quantity of **3,416** cu m of Ordinary Earth in **1 (one)** year.

Decision: Recommended grant of the EC for 1(one) year.

3.11.3. Deliberations by the SEIAA in current meetings

Uploaded JVR is not legible. A fresh JVR need to be furnished with whether it is agricultural land or not.

3.11.4. Recommendation of SEIAA

Deferred for ADS

3.12. Agenda Item No 12:

3.12.1. Details of the proposal

Bolakuchi P.P. Land Ordinary Clay Mining Permit Area by **GIRISH DEKA** located at **NALBARI,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**

5. The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
6. The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
7. The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
8. The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment

(Protection) Rules, 1986, as amended subsequently and put on the website of the company.

9. The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
10. No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC). 1. Concealing factual data or submission of false/fabricated data may result in revocation of this environmental clearance and attract action under the provisions of Environment (Protection) Act, 1986.
11. The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
12. The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
13. The Regional Office of MoEF & CC shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.

Noise and Vibration monitoring and prevention

1. Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
2. The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.

Public hearing and Human health issues

1. PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius
2. PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
3. PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan.
4. Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed. Statutory compliance

Statutory compliance

1. The Environmental clearance shall be subject to orders of Hon’ble Supreme Court of India, Hon’ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
2. The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the Pollution Control Board, Assam.
3. The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
4. The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved

	in the project. 5. Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA Notification, 2006 and its amendments therein **<u>Water quality monitoring and mitigation measures</u>** 1. Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office. 2. The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government. **3.** The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.

3.13. Agenda Item No 13:

3.13.1. Details of the proposal

HELAGOG PATTA LAND EARTH, STONE & QUARTZITE MINING AREA by **ASSAM MINERAL DEVEL OPMENT CORPORATION LIMITED** located at **KAMRUP METRO,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/469021/2024	SEIAA.3742/2024	11/04/2024	Mining of minerals (1(a))

3.13.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :30/04/2024

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized.

The Committee considered it appropriate to recommend the grant of EC by the SEIAA allowing extraction of mineral in 3 (three) years time with the with the recommended quantity of **6,042** Cu M of ordinary earth; **21,143** of stone and **286** Cu M of Quartzite as per the approved Mining Plan.

The Committee is also of the opinion to urge for taking requisite steps to conduct preparation of the District Survey Report (DSR) for the District by the Director, Geology and Mining in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC.

Decision: ***Recommended for grant of EC for 3 (three) years***

3.13.3. Deliberations by the SEIAA in current meetings

EC is approved with allotted area 0.88 ha with the recommended quantity of 6,042 Cu M of ordinary earth; 21,143 of stone and 286 Cu M of Quartzite in 7 (seven) years as per the approved Mining Plan with terms and conditions laid down by SEAC.

3.13.4. Recommendation of SEIAA

Approved

3.13.5. Details of Environment Conditions

3.13.5.1. Specific

GENERAL CONDITIONS BY SEAC	
1.	1. This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan; 2. This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates; (b) the Proponent shall extract the approved quantity of minerals indicated herein with maximum mining depth of up to 2 (two) meters only from the non-mined surface; (c) no-explosives shall be used without prior permission of the competent authority for extraction of stone from the proposed mining area.
SPECIFIC CONDITIONS BY SEAC	
1.	(i) The Divisional Forest Officer, Kamrup East Division shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. (ii) The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geocoordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan. (iii) CSR activities shall be carried out / undertaken by the Proponent and 2% of the total project cost Rs 3.00 Lakh shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the nearby village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st year of allowing mining in the area and the proponent shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report. (iv) Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands involving local NGOs, School / College students and an amount of Rs 3.00 Lakh shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Nahor (*Mesua ferrea*), Amlokhi (*Phyllantus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*), Bael (*Aegle marmelos*), Mohaneem(*Azedirachta indica*), Jamun (*Syzygium cuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*) etc etc. Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

STANDARD CONDITIONS

Air quality monitoring and mitigation measure

1. Vehicular emissions shall be kept under control and regularly monitored. All the vehicles engaged in mining and allied activities shall operate only after obtaining 'PUC' certificate from the authorized pollution testing centres.
2. The transportation of materials shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the materials through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.
3. Major approach roads should be properly maintained with dust suppression measures and the river bank in any case must not be damaged.
4. Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.

Corporate Environment Responsibility

Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.

The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/ violation of the environmental/forest/ wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/ violation of the environmental/forest /wildlife norms/conditions and/or shareholders/stake holders.

1. -

Land Recalmation

Native tree species shall be selected and planted over areas affected by subsidence.

Mining Plan

Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.

No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927. 1. Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable.

No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).

Miscellaneous

1. The above conditions shall be enforced, inter-alia under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986, Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 and the Public Liability Insurance Act, 1991 along with their amendments and Rules and any other orders passed by the Hon'ble Supreme Court of India / High Courts and any other Court of Law relating to the subject matter.
2. The illumination and sound at night at project sites disturb the villages in respect of both human

and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours

3. The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
4. The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently.
5. The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
6. The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
7. The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
8. The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
9. The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
10. No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC). 1. Concealing factual data or submission of false/fabricated data may result in revocation of this environmental clearance and attract action under the provisions of Environment (Protection) Act, 1986.
11. The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
12. The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
13. The Regional Office of MoEF & CC shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.

Noise and Vibration monitoring and prevention

1. Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.

2. The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.

Public hearing and Human health issues

PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius

PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)

PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan.

Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed. Statutory compliance

Statutory compliance

1. The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
2. The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the Pollution Control Board, Assam.
3. The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
4. The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
5. Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA Notification, 2006 and its amendments therein

Water quality monitoring and mitigation measures

1. Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
2. The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.
3. The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.

3.14. Agenda Item No 14:

3.14.1. Details of the proposal

KHARGHULI (CHAPAIDANG) GAON ORDINARY EARTH MINING PERMIT AREA by **LAKHYA DHAR BORO** located at **KAMRUP METRO,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/469729/2024	SEIAA3747/2024	18/04/2024	Mining of minerals (1(a))

3.14.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :30/04/2024

Deliberations of SEAC 1 :

Necessary land documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The Joint Verification Report (JVR) with the Revenue and Forest Department is also placed for scrutiny. After due discussions and deliberations the Committee is of the opinion to allow extraction of ordinary earth measuring **1,990 Cu M** of in 1 **(one)** year only.

Decision: Recommended grant of the EC allowing extraction of 1,990 Cu M of Ordinary Earth for 1 (one) year.

3.14.3. Deliberations by the SEIAA in current meetings

EC is approved for the area allotted 0.035 ha for mining of Ordinary Earth measuring 1,994 Cu M in 1 (one) year subject to the terms & condition laid down by the SEAC.

3.14.4. Recommendation of SEIAA

Approved

3.14.5. Details of Environment Conditions

3.14.5.1. Specific

SPECIFIC CONDITIONS BY SEAC	
1.	1. This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan. 2. This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates; (b)the Proponent shall extract the approved quantity of ordinary earth indicated herein with maximum mining depth of up to 2(two) meters only from the non-mined surface; (c) to demarcate the excavation setting out plan with reference coordinates and levels; (d) to start the excavation from one end and proceed to another end in layers such as one metre depth layers; (e) if the excavation depth exceeds 2.0 m depth, it is necessary to protect the sides of the excavation by driving sheet piles or soldier piles. The vertical members to protect the excavation is to be driven first followed by horizontal members; (f) stack the soil away from the

	excavation edge to prevent soil collapsing to the excavated area; (g) that the excavation shall not be allowed to go below the level of land adjacent to the area in question and (h) proper barrier with green shed nets must have to be erected to prevent dust pollution, air pollution. The project Proponent accordingly shall submit an undertaking whereby he has to obtain the earth cutting permission from the District Commissioner, Kamrup and to submit the same to the DFO concerned. 3. The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. 4. The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geocoordinates depicted there in on the pillars/posts, following the GPS coordinates mentioned in the approved mining plan.
Standard Conditions of Mining Minerals

Subject: Grant of EC under the provision of the EIA Notification 2006-regarding.

Sir/Madam,

This is in reference to your application for Grant of EC under the provision of the EIA Notification 2006-regarding in respect of project GOVT. PERMIT AREA OF BARNADI SAND MAHAL NO-8 submitted to State Environment Impact Assessment Authority (SEIAA) & State Expert Appraisal Committee (SEAC) vide proposal number SIA/AS/MIN/468098/2024 dated 02/04/2024.

2. The particulars of the proposal are as below :

(i) EC Identification No.	EC24C0107AS5201627N
(ii) File No.	SEIAA3730/2024
(iii) Clearance Type	EC
(iv) Category	B2
(v) Project/Activity Included Schedule No.	1(a) Mining of minerals
(vii) Name of Project	GOVT. PERMIT AREA OF BARNADI SAND MAHAL NO-8
(viii) Name of Company/Organization	BAKSA FOREST DIVISION MUSHALPUR
(ix) Location of Project (District, State)	BAKSA, ASSAM
(x) Issuing Authority	SEIAA
(xii) Applicability of General Conditions	yes
(xiii) Applicability of Specific Conditions	yes

In view of the particulars given in the Para 1 above, the project proposal interalia including Form-1(Part A and B) were submitted to the Ministry for an appraisal by the State Environment Impact Assessment Authority(SEIAA) & State Expert Appraisal Committee (SEAC) in the Ministry under the provision of EIA notification 2006 and its subsequent amendments.

The above-mentioned proposal has been considered by State Environment Impact Assessment Authority (SEIAA) & State

Expert Appraisal Committee (SEAC) in the meeting held on 06/04/2024. The minutes of the meeting and all the Application and documents submitted (viz. Form-1 Part A and Part B) are available on PARIVESH portal which can be accessed by scanning the QR Code above.

The brief about configuration of plant/equipment, products and by products and salient features of the project along with environment settings, as submitted by the Project proponent in Form-1 (Part A and B) /EIA & EMP Reports/presented during SEIAA are annexed to this EC as Annexure (1).

The SEIAA, in its meeting held on 06/04/2024, based on information & clarifications provided by the project proponent and after detailed deliberations recommended the proposal for grant of EC under the provision of EIA Notification, 2006 and as amended thereof subject to stipulation of specific and general conditions as detailed in Annexure (2).

The SEIAA has examined the proposal in accordance with the Environment Impact Assessment (EIA) Notification, 2006 & further amendments thereto and after accepting the recommendations of the State Environment Impact Assessment Authority (SEIAA) & State Expert Appraisal Committee (SEAC) hereby decided to grant EC for instant proposal of D ivisional Forest Officer, Baksa Forest Division under the provisions of EIA Notification, 2006 and as amended thereof.

The Ministry reserves the right to stipulate additional conditions, if found necessary.

The EC to the aforementioned project is under provisions of EIA Notification, 2006. It does not tantamount to approvals/consent/permissions etc. required to be obtained under any other Act/Rule/regulation. The Project Proponent is under obligation to obtain approvals /clearances under any other Acts/ Regulations or Statutes, as applicable, to the project.

This issues with the approval of the Competent Authority.

The extraction of stone from the area within the limits of the GPS Co-ordinates as under:

Longitude Latitude

1. 91.669224^0 E 26.63682^0 N
2. 91.668527^0 E 26.63525^0 N
3. 91.670069^0 E 26.63432^0 N
4. 91.671839^0 E 26.63613^0 N

EC is approved for project area allotted 04.98ha with the recommended quantity of 1,10,515Cu M of Sand in 5 (five) years as per the approved Mining Plan @ 22,103 Cu M, annually subject to the terms and conditions laid down in the approved mining plan.

1. The Joint Secretary, Ministry of Environment, Forest and Climate Change, Government of India, MOEF&CC, Indira Paryavaran Bhawan, Jorbagh Rd, New Delhi-110003.
2. The Secretary to the Govt. of Assam, Environment & Forest Department, Dispur, Guwahati-6 Cum Member Secretary, SEIAA, Assam for favour of kind information.
3. The P.C.C.F, HoFF, Govt. of Assam, Panjabari, Guwahati-37 for favour of kind information.
4. The Divisional Forest Officer, Baksa Forest Division, Mushalpur, Dist. Baksa, BTR, Assam for information & necessary action to ensure that all **Specific Conditions & General Condition** are complied with.
5. The Integrated Regional Office, Ministry of Environment, Forest & Climate Change, 4th Floor, Housefed Building, G.S. Road, Rukminigaon, Guwahati-22 for kind information.
6. Office Copy.

Annexure 1

Specific EC Conditions for (Mining Of Minerals)

1. General Conditions By Seac

S. No	EC Conditions
1.1	**1.** This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan; **2.** This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates ; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials and (c)the Proponent shall extract / harvest the approved quantity of minerals indicated herein with maximum mining depth of up to 2 (two) meters only from the non-mined surface.

2. Specific Conditions By Seac

S. No	EC Conditions
2.1	i) The DFO shall comply with necessary formalities for transfer of the EC to the lessee with due NOC for filing application to the SEIAA before allowing mining so that the entire accountability in mining is vested on the lessee / Proponent with the same terms and conditions stipulated in the EC as per the EIA Notification, 2006. **ii)** Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO. **iii)** The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. **iv)** The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geocoordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan. **v)** CSR activities shall be carried out / undertaken by the Proponent and 2% of the total project cost Rs 5.00 Lakh shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the near by village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st two (2) years of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report. **vi)** Plantation activities shall be carried out / undertaken in any educational institution or Govt lands involving local NGOs, School/ College students and an amount of Rs 5.00 (Five) Lakh shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Agor (*Aquillaria malaccensis*), Amlokhi (*Phyllantus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*), Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*), Mohaneem (*Azedirachta indica*), Jamun (*Syzygium cuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Khair (*Acacia catechu*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*) etc etc. Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3. Standard Conditions

S. No	EC Conditions
3.1	**<u>Air quality monitoring and mitigation measure</u>** 1. Vehicular emissions shall be kept under control and regularly monitored. All the vehicles

S. No	EC Conditions
	engaged in mining and allied activities shall operate only after obtaining 'PUC' certificate from the authorized pollution testing centres. 2. The transportation of materials shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the materials through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated. 3. Major approach roads should be properly maintained with dust suppression measures and the river bank in any case must not be damaged. 4. Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan. **Corporate Environment Responsibility** 1. Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out. 2. The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/ violation of the environmental/forest/ wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/ violation of the environmental/forest /wildlife norms/conditions and/or shareholders/stake holders. **Land Recalmation** 1. Native tree species shall be selected and planted over areas affected by subsidence. **Mining Plan** 1. Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy. 2. No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927. 1. Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable. 3. No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC). **Miscellaneous** 1. The above conditions shall be enforced, inter-alia under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986, Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 and the Public Liability Insurance Act, 1991 along with their amendments and Rules and any other orders passed by the Hon'ble Supreme Court of India / High Courts and any other Court of Law relating to the subject matter. 2. The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours 3. The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government. 4. The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently.

S. No	EC Conditions
	5. The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt. 6. The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis. 7. The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal. 8. The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company. 9. The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations. 10. No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC). 1. Concealing factual data or submission of false/fabricated data may result in revocation of this environmental clearance and attract action under the provisions of Environment (Protection) Act, 1986. 11. The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory. 12. The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions. 13. The Regional Office of MoEF & CC shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports. **Noise and Vibration monitoring and prevention** 1. Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored. 2. The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis. **Public hearing and Human health issues** 1. PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius 2. PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required) 3. PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan. 4. Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed. Statutory compliance **Statutory compliance** 1. The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project 2. The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the Pollution Control Board, Assam. 3. The project proponent shall obtain clearance from the National Board for Wildlife, if applicable. 4. The project proponent shall obtain forest clearance under the provisions of Forest (Conservation)

S. No	EC Conditions
	Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project. 5. Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA Notification, 2006 and its amendments therein **<u>Water quality monitoring and mitigation measures</u>** 1. Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office. 2. The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government. **3.** The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.

Proposal Details

Proposal No.:
SIA/AS/MIN/486219/2024
Single Window No.:
SW/195936/2024
CAF No.:
CAF/180875/2024
Project Name:
GOVT. PERMIT AREA OF KELENG CHOCK A
State:
ASSAM
Proposal For:
Fresh EC
Activity:
1(a) Mining of minerals
Sector:
MIN
Application For:
Application for ToR (Category A, B1, and B2 Violation)/EC (Category B2) - Form 1
Date of Submission:
06/07/2024
State File No.:
SEAC/ SEIAA. 3884/2024

Common Application Form

Project Details

1. Details of Project

1.1. Name of the Project	GOVT. PERMIT AREA OF KELENG CHOCK A
1.2. Project Proposal For	New
1.3. Project ID (Single Window Number)	SW/195936/2024
1.4. Description of Project	ORDINARY CLAY/SILT MINING PERMIT AREA

2. Details of the Company/Organization/User Agency making application

2.1. Legal Status of the Company/Organization/User Agency	State Government (Department/Autonomous body)
2.2. Name of the Company/ Organization/User agency	BAKSA FOREST DIVISION MUSHALPUR

Registered address

2.3. Address	vill: Mushalpur, Po: Mushalpur, Ps, Mushalpur,
2.4. Village /Town / City	MUSHALPUR
2.5. State	ASSAM
2.6. District	BAKSA
2.7. Pin Code	781372
2.8. E-mail address	dfobaksa@nic.in
2.9. Mobile number	xxxxxx7176

3. Details of the person making application

3.1. Name	PRABODH KUMAR BRAHMA
3.2. Designation	DCF

Correspondence address

3.3. Address	vill: Mushalpur, Po: Mushalpur, Ps, Mushalpur,
3.4. State	ASSAM
3.5. District	BAKSA
3.6. Pin Code	781372
3.7. E-mail address	dfo-baksa@assam.gov.in
3.8. Mobile number	xxxxxx7176

Project Location

4. Location of the Project or Activity

4.1. Upload KML	AOI.kml
4.2. Whether the project/activity falling in the state/UT sharing international borders	NO
5. Shape of the Project	Non - Linear

Location Details

Toposheet No	State/UT	District	Sub District	Village	Plot/Survey/Khasra No.
G46H10	ASSAM	Tamulpur	Goreswar (Pt)	HARIZORA	
G46H10	ASSAM	Tamulpur	Goreswar (Pt)	NIJ KAURBAHA	

Remarks

N/A

6. Land Requirement (in Ha) of the project or activity

6.1. Nature of Land involved	
6.2. Non-Forest Land [A]	4.9
6.3. Forest Land [B]	0
6.4. Total Land [A+B]	4.9

Project Activity Cost

6. Project/Activity Cost

6.1. Total Cost of the Project at current price level (in Lakhs)	100 Amount in Words : **One Hundred Lakh(s) Only**

7. Employment likely to be generated

7.1. During construction phase

Permanent employment

Temporary employment

7.2. During operational phase

Permanent employment

7.2.1. No. of permanent employment (No.s) [A]	10
7.2.2. Period of employment (No. of days) [B]	400
7.2.3. No. of man-days [X]=[A]*[B]	4000

Temporary employment

7.2.4. Temporary / Contractual employment (No. of Man days) [Y]	400
7.2.5. Total [X] +[Y]	4400

Others

8. Whether Rehabilitation and Resettlement (R&R) involved?	NO
9. Whether project area involves shifting of watercourse/road/rail/Transmission line/water pipeline, etc. required?	NO
10. Whether any alternative site(s) examined or part thereof for the non-site-specific component?	Not applicable as the project or activity is site specific
11. Whether there is any Government Order or Policy/ Court order relevant or restricting to the site?	NO

order relevant or restricting to the site?

12. Whether there is any litigation pending against the project and/or land in which the project is proposed to be set up?	NO
13. Whether the proposal involves violation of Act/Rule/Regulation/Notification of Central/State Government?	NO

Application for ToR (Category A, B1, and B2 Violation)/EC (Category B2) - Form 1

Basic Information

1. Category of the Project/Activity

1.1. Name of the project proposal	GOVT. PERMIT AREA OF KELENG CHOCK A	
1.2. Type of Proposal	New	
1.3. Whether the Project Activity (Construction/ Operation) has been undertaken without obtaining **prior** Environmental Clearance under the provision of EIA Notification 1994/ 2006?	No	
1.4. Whether multiple items (Components) as per the notification involved in the proposal?	No	
1.4.1. Item No. as per schedule to EIA Notification, 2006	1(a) Mining of minerals	Non-Coal Mining (Minor Minerals- river bed mining)
Capacity	4.9	Ha
2. Whether project/activity attracts the General Condition specified in the Schedule of EIA Notification?	No	
3. Whether any Protected Areas Notified Under the Wild Life (Protection) Act, 1972 are located within 10 km of the project site	N/A	
4. Whether any Severely Polluted Areas as identified by the CPCB from time to time located in proximity to the project site	No	
5. Whether any Critically Polluted Areas as identified by the CPCB from time to time located in proximity to the project site	N/A	
6. Whether any Notified Eco-Sensitive area notified under Environmental (Protection) Act, 1986 located in proximity to the project site	N/A	
7. Whether any Inter-State Boundaries and International Boundaries located in proximity to the project site	N/A	
8. Whether any Eco-sensitive Zone notified/proposed to be notified under Environment (Protection) Act, 1986 located within 10 km of the project site	No	
9. Whether any forest land present within 10 km of the project site	No	
10. Category of the Project as per EIA Notification, 2006	B2	
10.1. Whether proposal is required to be appraised at Central level?	No	
11. Whether Proposal has interlinked / interdependent projects or activities?	No	
11.1. Reason thereof	0	

12. Whether any Forest Land involved in the project or part thereof	No
13. Whether NBWL recommendation is required?	No

14. Land Acquisition Details

Type of Land	In case of non-forest land, please specify	Type of privately owned land	Type of land in terms of ownership	Supporting documents			Status of Land Acquisition
				Document Name	Remarks	Document	

Project Details

14. Details of CTE

14.1. Whether consent under Air & Water Act has been obtained from SPCB / UTPCC?	No
14.1.1. Reason thereof	0
15. Whether the project/activity located in Notified Industrial Area?	No
16. Whether the project/activity located in CRZ or ICRZ area?	No
17. Whether the project proposed to be located in Territorial waters (Off-shore)	No
18. Whether project/activity attracts the Specific Condition specified in the Schedule of EIA Notification?	No

Product Details

19. Details of Products & By-products

Name of Product	Product / By Product	Quantity / Capacity	Unit	Mode of Transport / Transmission	Remarks
CLAY/SILT	Product	4.9	Hectares (Ha)	Road	0

20. Whether any other Environmental Sensitive area exists within 10 Km from the project/activity boundary?	No

Note : Others, interalia, includes areas protected under international conventions/ Area important or sensitive ecological reasons/ Sensitive species of flora or fauna/ Inland or coastal/Tourist places/ Defence installations / Densely populated areas/ Areas containing important, high quality, or scarce resources/ Areas susceptible to natural Hazards

21. Status of collection of baseline data	Not required as the proposal is under B2 category

Consultant Details

24. Whether QCI/NABET Accredited EIA Consultant engaged?	No

24.1. Reason for not engaging the Consultant	NA

Application for ToR (Category A, B1, and B2 Violation)/EC (Category B2) - Form 1

Project Details

1. Introduction of Project or Activity

1.1. Need for the project or activity and its importance to the country/region	REQUIREMENT OF CLA/SILT	
1.2. Demand - Supply Gap and Domestic and export markets, if any	N/A	

2. Social Infrastructure

2.1. Readily available	NA	
2.2. Proposed to be developed	NA	

3. Connectivity to the project or activity

3.1. Nearest railway station and its distance (in Km)	RANGIA	45
3.2. Nearest Airport and its distance (in Km)	LGBI	75
3.3. Nearest Town/City/District head quarter and its distance (in Km)	MUSHALPUR	30
4. Soil classification	RIVER BED	
5. Distance from the HFL of the river in m, if any	0	

6. Benefits of the project

6.1. Social benefits of project or activity	EMPLOYMENT GENERATION
6.2. Financial benefits of project or activity	SALARY FOR THE EMPLOYEES

7. Project/ Activity Construction Status	Completed
7.1. Date of Start	01/07/2024
7.2. Likely date of completion	04/07/2024

Resource Utilization

8. Use of resources for construction or operation of the project

8.1. Whether requirement of water involved in the project?	No
8.2. Whether requirement of Minerals and/or fuels involved in the project?	No
8.3. Construction material	No
8.4. Timber	No
8.5. Electric Power:	No

8.6. Whether any other natural resources / other raw materials required?:	No
8.7. Whether any use of substances or materials, which are hazardous (as per MSIHC rules) to human health or the environment (flora, fauna, and water supplies) required?	No
8.8. Whether any resource efficiency / optimization / recycling and reuse envisaged in the project?	No

Physical Changes

9. Construction, operation or decommissioning of the Project involving actions, which will cause physical changes in the locality:

9.1. Whether any permanent or temporary change in land use, land cover or topography due to project activity?	No
9.2. Whether any clearance of existing vegetation due to project activity?	No
9.3. Whether any loss of native species or genetic diversity?	No
9.4. Whether any demolition works involved in project activity?	No
9.5. Whether any linear structures proposed for diversion or demolition due to project activity? (e.g. roads, transmission lines, rail line, pipeline, conveyor, etc.)	No
9.6. Whether any closure or diversion of existing transport routes or infrastructure due to project leading to changes in traffic movements?	No
9.7. Whether any closure or diversion of water bodies present in project area or realignment of water courses passing through project area?	No
9.8. Whether any dismantling or decommissioning or restoration works or reclamation works (Long-term/ short-term)?	No
9.9. Whether any construction works for temporary use for project activity?	No
9.10. Whether any cut and fill excavations proposed for the project activity?	No
9.11. Whether any underground works including tunnelling?	No
9.12. Whether any dredging involved in project?	No
9.13. Whether any offshore structures involved in project?	No

9.14. Whether any new road, rail, sea, airports, helipad, etc. during construction or operation?	No
9.15. Whether any construction of new linear structures? (e.g. transmission lines, pipelines, etc.)	No
9.16. Whether any Facilities for storage of goods or raw materials?	No
9.17. Whether any Facilities for long term/ permanent housing of operational workers/ staff?	No
9.18. Whether any Impoundment, damming, culverting, realignment or other changes to the hydrology of watercourses or aquifers?	No
9.19. Whether any Stream crossings, temporary and permanent?	No
9.20. Whether any Influx of people to an area in either temporarily or permanently?	No
9.21. Whether any other information would like to submit?	No

Pollution Details

10. Release of pollutants to Air and Mitigation measures

10.1. Whether any probable air pollutants generated?	No
10.2. Other information, if any	NA

10.3. Generation of Noise & Vibration and mitigation measures

10.3.1. Whether any probable generation of Noise and vibration from the proposed project?	No
10.3.2. Whether any probable generation of Light and Heat?	No

10.4. Discharge of pollutants to water and mitigation measures

10.4.1. Whether any probable water pollutants generated?	No
10.5. Probable sources of water pollutant	No

Details of reuse / recycle of wastewater

Details	Qty / Capacity
10.6. Quantity of waste water generation per day (KLD)	0
10.7. Quantity of treated water proposed to use per day (KLD)	0
10.8. Quantity of treated water proposed to discharge outside the premises (KLD)	0

10.9. Purpose for which treated water is proposed to use	0
10.10. Whether it is proposed to opt/avail common off-site Sewage Treatment Plant (CSTP)/Effluent Treatment Plant (CETP) facility?	No
10.11. Whether it is proposed to setup on-site Sewage Treatment Plant (STP)/Effluent Treatment Plant (ETP) facility?	No
10.12. Whether the adequacy of the Sewage Treatment Plant (STP) or Effluent Treatment Plant certified by an independent expert?	No
10.12.1. Reasons thereof	0
10.13. Whether any other mitigation measures proposed?	No
10.14. Whether Dual Plumbing System proposed to be implemented?	No
10.14.1. Reasons thereof	0
10.15. Whether any discharge of treated effluent involved?	No

Water Requirements

11. Ground water intersection and water conservation measures:

11.1. Whether ground water table intersection involved in the project activities?	No
11.2. Area category from Groundwater availability perspective?	Safe
11.3. Whether Rainwater harvesting proposed	No
11.4. Whether any other water conservation measures proposed?	No
11.5. Whether the ZLD is proposed?	No

12. Greenbelt

12.1. Area proposed for green belt (in Ha)	0
12.2. Width of green belt (in m) along the boundaryof the project or activity	0
12.3. Percentage of the total area covered under green belt	0
12.4. Details of the species proposed for plantation	0
12.5. No. of tree saplings to be planted	0
12.6. Funds allocated for plantation in Lakhs.	0

Waste Generation

13. Production of wastes during construction or operation or decommissioning

13. Production of wastes during construction or operation or decommissioning

13.1. Whether any generation of Solid waste (domestic wastes)?	No
13.2. Whether any generation of plastic waste?	No
13.3. Whether any generation of e-waste?	No
13.4. Whether any generation of batteries waste?	No
13.5. Whether any generation of Bio-medical waste?	No
13.6. Whether any generation of hazardous wastes (as per Hazardous Waste Management Rules)?	No
13.7. Whether any generation of construction or demolition wastes?	No
13.8. Whether any generation of other wastes?	No
13.9. Whether any generation of surplus products?	No
13.10. Whether measures for waste minimization proposed?	No

Risk Assessment

14. Whether any risks associated with project activities which could affect human health or the environment, -

14.1. From explosions, spillages, fires etc. from storage, handling, use or production of hazardous substances?	No
14.2. From any other causes?	No
14.3. Could the project be affected by natural disasters causing environmental damage (e.g. floods, earthquakes, landslides, cloudburst etc)?	No
14.4. Changes in occurrence of disease or affect disease vectors (e.g. insect or water borne diseases)	No
14.5. Could project adversely affect the wellbeing of people in project area e.g. by changing living conditions?	No
14.6. Vulnerable groups of people who could be adversely affected by the project e.g. hospital patients, children, the elderly etc.	No
14.6.1. Has cumulative risk assessment been performed?	N/A
14.7. Whether any likely impacts of the proposed activity on the existing facilities adjacent to the proposed site due to generation of dust, smoke, odorous fumes or other hazardous gases?	No

15. Factors which should be considered (such as consequential development) which could lead to environmental effects or the potential for cumulative impacts with other existing or planned activities in the locality	
15.1. Whether lead to development of supportive facilities, ancillary development or development stimulated by the project which could have impact on the environment e.g.: Supportive infrastructure (roads, power supply, waste or waste water treatment, etc.); housing development; industries in supply chain and downstream; any other?	No
15.2. Whether lead to after-use of the site, which could have an impact on the environment? (e.g. mine void, dump sites, etc.)	No
15.3. Whether set a precedent for later developments?	No
15.4. Have cumulative effects due to proximity to other existing or planned projects with similar effects?	No
15.5. Whether lead to growth of alien species, if any?	No
15.6. Is there any threat of the project to the biodiversity (including displacement of fauna-both terrestrial and aquatic and avi-fauna or creation of barriers for their movement)?	No
15.7. Will the proposed project in any way result in the obstruction of a view, scenic amenity or landscapes?	No
15.8. Is there any impact on anthropological or archaeological sites or any important site feature in the vicinity of the proposed site have been considered?	No
15.9. Will the proposed project result in any changes to the demographic structure of local population?	No
15.10. Will the project cause adverse effect on local communities, disturbance to sacred sites or other cultural values?	No

6. Mining Proposals

16.1. Details of Letter of Intent (LoI) / Vesting order / Mining Lease

16.1.1. Date of issue of LoI/Vesting order/Minning Lease	17/11/2023
16.1.2. Validity of the LoI/Vesting order	16/11/2025
16.1.3. Lease Period	02/00
16.1.4. Date of expiry of lease	11/11/2025
16.1.5. Lease area (in Ha) as per LoI/Vesting order/Mining Lease	4.9
16.1.6. Production capacity (in MTPA) as per LoI / Vesting Order / Mining lease, if any prescribed	108740
16.1.7. Details of Lease renewal(s), if any	0
16.1.8. Other information, if any	0

16.1. Status of approval of Mining plan	Approved

17. Minerals to be mined

Name of Mineral	Classification	Production Capacity	Remarks
CLAY/SILT	Minor	108740	0

18. Details of Total excavation (RoM) including Topsoil, Overburden, Mining waste, Rejects, etc.

18.1. Total excavation in MTPA	108740
18.2. Total Excavation in M.Cu.m/Annum	0.108
18.3. Enter stripping Ratio	00:00
18.4. Other information, if any	0

9. Mineral Reserves

Name of Mineral	Proved Reserves	Indicated Reserves	Inferred Reserves	Mineable Reserves	Remarks
CLAY/SILT	0.22	0.22	0.22	0.198	

20. Life of Mine (Years)

20.1. Life of the mine as per approved mining plan	02/00
20.2. Life of the mine as per total estimated reserves, if any	02/00
20.3. Other information, if any	0

21. Type and method of Mining Method

21.1. Type of mining	Opencast
21.2. Method of mining	Manual
21.3. Other information, if any	0

22. Type of blasting, if any, to be adopted

22.1. Type of blasting	0
22.2. Mitigation measures for control of blast induced vibrations	0
22.3. Other information, if any	0

23. Whether it is proposed to install beneficiation plant/Coal washery within the mining lease area?	No

24. Whether it is proposed to install crusher within the mining lease area?	No

25. Dumping strategy

Description	Area in Ha	Maximum height in m	Remarks
External dump	0	0	0
Internal dump	0	0	0
Topsoil dump/ storage	0	0	0

Minutes of 38th SEIAA Meeting State Environment Impact Assessment Authority meeting held from 13/05/2025 to 13/05/2025

Date: 21/05/2025

MoM ID: EC/MOM/SEIAA/521401/5/2025

Agenda ID: EC/AGENDA/SEIAA/521401/5/2025

Meeting Venue: Conference Hall, 3rd Floor, Pollution Control Board, Assam

Meeting Mode: Physical

Date & Time:

13/05/2025	11:00 AM	04:30 PM

1. Opening remarks

The Member Secretary, SEIAA welcomed the Chairman, SEIAA and the Member of the regulatory body. She briefed the house about the agenda for the meeting for deliberation and to expedite disposal of the recommended proposals by SEAC, Assam.

2. Confirmation of the minutes of previous meeting

As per the agenda, the regulatory body duly reviewed the Minutes of the 28th SEIAA Meetings held on 25/04/2025.

3. Details of proposals considered by the committee

Day 1 -13/05/2025

3.1. Agenda Item No 1:

3.1.1. Details of the proposal

"SANKOSH KHOKSAGURI NO 2 STONE MAHAL" ON SONKOSH RIVER BED by **JANDU CONSTRUCTION INDIA PRIVATE LIMITED** located at **KOKRAJHAR,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/529091/2025	SEAC/SEIAA.4049/2025	12/03/2025	Mining of minerals (1(a))

3.1.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :05/04/2025

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. Due deliberations and discussions are held.

The Committee urged the DFO for taking requisite steps to complete the preparation of the final District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG'2016 and EMGSM'2020} and to place the same for evaluation and appraisal by the SEAC for further approval by the competent authority. It is pertinent to mention that the *evaluation* and *appraisal* of the draft DSR for the district has been done by the SEAC and communicated with its observations for further necessary compliance of the deficiencies in terms of the guidelines as stipulated.

It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the development of infrastructure in progress specially to strengthen the road connectivity in the interior areas of the district and also other developmental works requiring restoration after the ravages of flood in the whole state which is a *sine qua non* for overall development and economic growth of the state while the impact on environment also require due diligence and consideration with proper safeguards.

It is further appreciated that the important stakeholders like the Registered Qualified Person (RQP), Geologist from the Department of Geology and Mining, the Forest official, the official from the Water Resource Department are actively involved in the process for recommending mining in the area by way of consultation including site inspection before appraisal by the SEAC.

The Committee deem it appropriate to recommend the grant of the EC by the SEIAA allowing extraction of minor mineral for **6 (Six) months** only as recommended in the mining plan, with the quantity of quantity of **@ 23,360 Cu M Boulder;@ 6,50 Cu M Sand-Gravel and @ 4,50 Cu M Sand** with an observation that the DFO, Kachugaon shall submit the approved DSR from the competent authority for further consideration of the balance quantity for the project allowing mining by the Proponent within **a period of 3 (three) months** and to ensure that the area in question is **accordingly reflected in the final DSR**.

Decision: Recommended for grant of EC for **6 (Six) months** only allowing extraction of **@ 23,360 Cu M Boulder;@ 6,50 Cu M Sand-Gravel and @ 4,50 Cu M Sand** minerals**.**

3.1.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 4.83Ha with a quantity of @ 23,360 Cu M Boulder; @ 6,50 Cu M Sand-Gravel and @ 4,50 Cu M Sand minerals in 6 (Six) months subjected to the terms and conditions laid down by SEAC and that the area in question is to be reflected in the approved final DSR.

3.1.4. Recommendation of SEIAA

Approved

3.1.5. Details of Environment Conditions

3.1.5.1. Specific

Specific Conditions by SEAC

1.	The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period.
2.	The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan before allowing mining as bounden on the PP.
3.	No mechanized machinery shall be allowed to be used for excavation of mineral from river bed and only on exceptional cases the DFO may permit use of JCB for loading and unloading of mineral in vehicles.
4.	CER activities shall be carried out / undertaken by the Proponent with the minimum cost of Rs 2,00,000.00 (Two Lakh) only shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the nearby village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 3 (three) months of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report (HCR) as mandated to be uploaded by the project Proponent in terms of the OM No IA3-22/1/2022-IA.III Dated 14.06.2024 in pursuance of the EIA Notification 2006.
5.	Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands adjoining the mining area involving local NGOs, School / College students and an amount of Rs 2.00(Two) Lakh shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. The DFO shall get the same executed / implemented within 3 (three) months of allowing mining in the area and shall upload the reports in PARIVESH 2.0 portal which shall form part of the Half Yearly Compliance Report (HCR) as mandated to be uploaded by the project Proponent in terms of the OM No IA3-22/1/2022-IA.III Dated 14.06.2024 in pursuance of the EIA Notification 2006.
6.	The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Amlokhi (*Phyllanthus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saracaasoca*),Bael (*Aegle marmelos*), Jamun (*Syzygiumcuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpusintegrifolia*), Sissoo (*Dalbergia sissoo*), Khair (*Acacia catechu*), Ajhar (*Lagerstroemia speciosa*), Ow Tenga (*Dilleniaindica*), Thekera (*Garcinia spp*) etc etc.
7.	Half Yearly Compliance Reports (HCR) are mandatory on the part of project Proponent which need to be uploaded on or before 1st June and 1st December of the calendar year in PARIVESH 2.0 portal and no activity shall be permitted by the DFO without HCR.
8.	Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.
9.	Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO.
General Conditions by SEAC	

1.	This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan;
2.	This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials; (c) the Proponent shall extract the approved quantity of minerals indicated herein with maximum mining depth of up to 1(one) meter only from the non-mined surface and (d) the DFO shall place the final DSR for further evaluation and appraisal by the SEAC and for approval by the SEIAA and on the basis of the approved DSR the Proponent may come forward for the balance quantity remaining if found permissible for mining.
3.	The quantities of minor mineral allowed for extraction in terms of the approved Mining Plan shall not be exceeded by the Proponent.
4.	The Orders of the Hon'ble Apex Court, the NGT (Eastern Bench), Kolkata; the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} shall be followed by the Proponent.

3.1.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	This Environmental Clearance (EC) is subject to orders/ judgment of Honble Supreme Court of India, Honble High Court, Honble NGT and any other Court of Law, Common Cause Conditions as may be applicable.
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State Pollution Control Board/ Committee.
Statutory compliance	
1.	The Project Proponent shall inform the MoEF&CC for any change in ownership of the mining lease. In case there is any change in ownership or mining lease is transferred. PP needs to apply for transfer of EC as per provisions of the para 11 of EIA Notification, 2006 as amended from time to time.
1.	State Pollution Control Board/Committee shall be responsible for display of this EC letter at its Regional office, District Industries Centre and Collector's office/ Tehsildar's Office for 30 days.
1.	The State Government concerned shall ensure that mining operation shall not be commenced till the entire compensation levied, if any, for illegal mining paid by the Project Proponent through their respective Department of Mining & Geology in strict compliance of Judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India & Ors.

1.	The Project proponent complies with all the statutory requirements and judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India &Ors before commencing the mining operations.
1.	The Project Proponent shall follow the mitigation measures provided in MoEFCC's Office Memorandum No. Z-11013/57/2014-IA.II (M), dated 29th October, 2014, titled "Impact of mining activities on Habitations-Issues related to the mining Projects wherein Habitations and villages are the part of mine lease areas or Habitations and villages are surrounded by the mine lease area."
1.	A copy of EC letter will be marked to concerned Panchayat / local NGO etc. if any, from whom suggestion / representation has been received while processing the proposal.
Air quality monitoring and preservation	
1.	The project proponent shall submit monthly summary report of continuous stack emission and air quality monitoring and results of manual stack monitoring and manual monitoring of air quality /fugitive emissions to Regional Office of MoEF&CC, Zonal office of CPCB and Regional Office of SPCB along with six-monthly monitoring report.
1.	The project proponent use leak proof trucks/dumpers carrying ore and other raw materials and cover them with tarpaulin.
1.	Design the ventilation system for adequate air changes as per ACGIH document for all tunnels, motor houses, Oil Cellars.
Air quality monitoring and preservation	
1.	Appropriate Air Pollution Control (APC) system shall be provided for all the dust generating points including fugitive dust from all vulnerable sources, so as to comply prescribed stack emission and fugitive emission standards.
Air quality monitoring and preservation	
1.	Effective safeguard measures for prevention of dust generation and subsequent suppression (like regular water sprinkling, metalled road construction etc.) shall be carried out in areas prone to air pollution wherein high levels of PM10 and PM2.5 are evident such as haul road, loading and unloading point and transfer points. The Fugitive dust emissions from all sources shall be regularly controlled by installation of required equipments/ machineries and preventive maintenance. Use of suitable water-soluble chemical dust suppressing agents may be explored for better effectiveness of dust control system. It shall be ensured that air pollution level conform to the standards prescribed by the MoEFCC/ Central Pollution Control Board.
Water quality monitoring and preservation	
1.	Project Proponent shall regularly monitor and maintain records w.r.t. ground water level and quality in and around the mine lease by establishing a network of existing wells as well as new piezo-meter installations during the mining operation in consultation with Central Ground Water Authority/ State Ground Water Department. The Report on changes in Ground water level and quality shall be submitted on six-monthly basis to the Regional Office of the Ministry, CGWA and State Groundwater Department / State Pollution Control Board.
Water quality monitoring and preservation	
1.	In case, immediate mining scheme envisages intersection of ground water table, then Environmental Clearance shall become operational only after receiving formal clearance from CGWA. In case, mining operation involves intersection of ground water table at a later stage, then PP shall ensure that prior approval from CGWA and MoEFCC is in place before such mining operations. The permission for intersection of ground water table shall essentially be based on detailed hydro-geological study of the area.

1.	The Project Proponent shall undertake regular monitoring of natural water course/ water resources/ springs and perennial nallahs existing/ flowing in and around the mine lease including upstream and downstream. Sufficient number of gullies shall be provided at appropriate places within the lease for management of water. The parameters to be monitored shall include their water quality vis-à-vis suitability for usage as per CPCB criteria and flow rate. It shall be ensured that no obstruction and/ or alteration be made to water bodies during mining operations without justification and prior approval of MoEFCC. The monitoring of water courses/ bodies existing in lease area shall be carried out four times in a year viz. pre- monsoon (April May), monsoon (August), post-monsoon (November) and winter (January) and the record of monitored data may be sent regularly to Ministry of Environment, Forest and Climate Change and its Regional Office, Central Ground Water Authority and Regional Director, Central Ground Water Board, State Pollution Control Board and Central Pollution Control Board. Clearly showing the trend analysis on six-monthly basis.
Noise and vibration monitoring and prevention	
1.	The peak particle velocity at 500m distance or within the nearest habitation, whichever is closer shall be monitored periodically as per applicable DGMS guidelines.
Noise monitoring and prevention	
1.	Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six-monthly compliance report.
Noise and vibration monitoring and prevention	
1.	The Project Proponent shall take measures for control of noise levels below 85 dBA in the work environment. The workers engaged in operations of HEMM, etc. should be provided with ear plugs /muffs. All personnel including laborers working in dusty areas shall be provided with protective respiratory devices along with adequate training, awareness and information on safety and health aspects. The PP shall be held responsible in case it has been found that workers/ personals/ laborers are working without personal protective equipment.
Mining plan	
1.	The Project Proponent shall adhere to approved mining plan, inter alia, including, total excavation (quantum of mineral, waste, over burden, inter burden and top soil etc.); mining technology; lease area; scope of working (method of mining, overburden & dump management, O.B& dump mining, mineral transportation mode, ultimate depth of mining, concurrent reclamation and reclamation at mine closure; land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life; etc.).
Mining plan	
1.	The land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life shall be governed as per the approved Mining Plan. The excavation vis-à-vis backfilling in the mine lease area and corresponding afforestation to be raised in the reclaimed area shall be governed as per approved mining plan. PP shall ensure the monitoring and management of rehabilitated areas until the vegetation becomes self-sustaining. The compliance status shall be submitted half-yearly to the MoEFCC and its concerned Regional Office.
Waste management	
1.	The waste oil, grease and other hazardous waste shall be disposed of as per the Hazardous & Other waste (Management & Transboundary Movement) Rules, 2016.
1.	Kitchen waste shall be composted or converted to biogas for further use.(to be decided on case to case basis depending on type and size of plant)
Land reclamation	
1.	Check dams of appropriate size, gradient and length shall be constructed around mine pit and OB dumps to

	prevent storm run-off and sediment flow into adjoining water bodies. A safety margin of 50% shall be kept for designing of sump structures over and above peak rainfall (based on 50 years data) and maximum discharge in the mine and its adjoining area which shall also help in providing adequate retention time period thereby allowing proper settling of sediments/ silt material. The sedimentation pits/ sumps shall be constructed at the corners of the garland drains.
Land reclamation	
1.	The Overburden (O.B.), waste and topsoil generated during the mining operations shall be stacked at earmarked OB dump site(s) only and it should not be kept active for a long period of time. The physical parameters of the OB / waste dumps / topsoil dump like height, width and angle of slope shall be governed as per the approved Mining Plan and the guidelines/circulars issued by D.G.M.S. The topsoil shall be used for land reclamation and plantation.
1.	The slope of dumps shall be vegetated in scientific manner with suitable native species to maintain the slope stability, prevent erosion and surface run off. The selection of local species regulates local climatic parameters and help in adaptation of plant species to the microclimate. The gullies formed on slopes should be adequately taken care of as it impacts the overall stability of dumps. The dump mass should be consolidated with the help of dozer/ compactors thereby ensuring proper filling/ leveling of dump mass. In critical areas, use of geo textiles/ geo-membranes / clay liners / Bentonite etc. shall be undertaken for stabilization of the dump.
Green Belt and EMP	
1.	The project proponent shall prepare GHG emissions inventory for the plant and shall submit the programme for reduction of the same including carbon sequestration including plantation.
Transportation	
1.	No Transportation of the minerals shall be allowed in case of roads passing through villages/ habitations. In such cases, PP shall construct a ‘bypass’ road for the purpose of transportation of the minerals leaving an adequate gap (say at least 200 meters) so that the adverse impact of sound and dust along with chances of accidents could be mitigated. All costs resulting from widening and strengthening of existing public road network shall be borne by the PP in consultation with nodal State Govt. Department. Transportation of minerals through road movement in case of existing village/ rural roads shall be allowed in consultation with nodal State Govt. Department only after required strengthening such that the carrying capacity of roads is increased to handle the traffic load. The pollution due to transportation load on the environment will be effectively controlled and water sprinkling will also be done regularly. Vehicular emissions shall be kept under control and regularly monitored. Project should obtain Pollution Under Control (PUC) certificate for all the vehicles from authorized pollution testing centers. [If applicable in case of road transport].
Public hearing and Human health issues	
1.	The project proponent shall carry out heat stress analysis for the workmen who work in high temperature work zone and provide Personal Protection Equipment (PPE) as per the norms of Factory Act.
1.	Occupational health surveillance of the workers shall be done on a regular basis and records maintained as per the Factories Act.
Public hearing and Human health issues	
1.	Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, creche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.
Green Belt	
1.	The Project Proponent shall develop greenbelt in 7.5m wide safety zone all along the mine lease boundary as per the guidelines of CPCB in order to arrest pollution emanating from mining operations within the lease. The whole

	Green belt shall be developed within first 5 years starting from windward side of the active mining area. The development of greenbelt shall be governed as per the EC granted by the Ministry irrespective of the stipulation made in approved mine plan.
Corporate Environment Responsibility	
1.	Self-environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Corporate Environment Responsibility	
1.	All the recommendations made in the Charter on Corporate Responsibility for Environment Protection (CREP) for the Mineral Beneficiation plants shall be implemented.
Corporate Environment Responsibility	
1.	Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the Six Monthly Compliance Report.
Miscellaneous	
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	The Project Authorities should inform to the Regional Office regarding date of financial closures and final approval of the project by the concerned authorities and the date of start of land development work.
1.	The Ministry or any other competent authority may alter/modify the above conditions or stipulate any further condition in the interest of environment protection.
1.	Concealing factual data failure to comply with any or submission of false/ fabricated data and of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act, 1986.
Miscellaneous	
1.	The project proponent shall monitor the criteria pollutants level namely; PM10, S02, NOx (ambient levels as well as stack emissions) or critical sectoral parameters, indicated for the projects and display the same at a convenient location for disclosure to the public and put on the website of the company.
1.	The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.
Miscellaneous	
1.	44) The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.

1.	The project proponent shall abide by all the commitments and recommendations made in the EIA/EMP report, commitment made during Public Hearing and also that during their presentation to the Expert Appraisal Committee.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The concerned Regional Office of the MoEF&CC shall randomly monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the MoEF&CC officer(s) by furnishing the requisite data / information / monitoring reports.
1.	The Project Proponent shall prepare digital map (land use & land cover) of the entire lease area once in five years purpose of monitoring land use pattern and submit a report to concerned Regional Office of the MoEF&CC.
1.	In pursuant to Ministrys O.M No 22-34/2018-IA.III dated 16.01.2020 to comply with the direction made by Honble Supreme Court on 8.01.2020 in W.P. (Civil) No 114/2014 in the matter Common Cause vs Union of India, the mining lease holder shall after ceasing mining operations, undertake regrassing the mining area and any other area which may have been disturbed due to other mining activities and restore the land to a condition which is fit for growth of fodder, flora, fauna etc.

3.2. Agenda Item No 2:

3.2.1. Details of the proposal

BHOGDOI RIVER SAND MPA (MURMURIA) by **CHITRA RANJAN NEOG** located at **JORHAT,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/525099/2025	SEAC/SEIAA.4044/2025	13/03/2025	Mining of minerals (1(a))

3.2.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :05/04/2025

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. It reveals that **an wooden bridge exist at a distance of approx 98 mtrs** near to the proposed mining area. Due deliberations and discussions are held.

The Committee is of the opinion to urge the DFO for taking requisite steps to complete the preparation of the final District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG'2016 and EMGSM'2020} and to place the same for evaluation and appraisal by the SEAC for further approval by the competent authority. It is pertinent to mention that the *pre appraisal* of the draft DSR for the district has already been done by the SEAC and communicated with its observations for necessary corrections and compliance of the guidelines as stipulated.

The Committee deem it appropriate to note with an observation that the DFO, Jorhat shall submit the approved DSR from the competent authority for consideration of the quantity for the project allowing mining by the Proponent keeping in mind the environmental sensitivity of the proposed mining area within a period of 3 (three) months and to ensure that the permissible area in question is accordingly reflected in the final DSR.

This is necessitated in view of the process of development works being undertaken for the **Construction of town Hall** as has been communicated by the concerned competent authority.

Decision: Recommended for grant of EC for **1 (one) year** only for **5,000 Cu M of Sand.**

3.2.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 3.10Ha and Mining area 2.33ha with a quantity of 5,000 Cu M of Sand in 1 (One) year subjected to the terms and conditions laid down by SEAC and that the area in question is to be reflected in the approved final DSR.

3.2.4. Recommendation of SEIAA

Approved

3.2.5. Details of Environment Conditions

3.2.5.1. Specific

General conditions by SEAC	
1.	This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials; (c) the Proponent shall extract the approved quantity of minerals indicated herein with maximum mining depth of up to 1(one) meter only from the non-mined surface and (d) the DFO shall place the final DSR for further evaluation and appraisal by the SEAC and on the basis of the approved DSR the Proponent may come forward for the balance quantity remaining as may be found permissible for mining.
2.	The quantities of minor mineral allowed for extraction, annually, in terms of the approved DSR shall not be exceeded by the Proponent.

3.	The Orders of the Hon'ble Apex Court, the NGT (Eastern Bench), Kolkata; the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} shall be followed by the Proponent.
4.	This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan;
Specific conditions by SEAC	
1.	Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO.
2.	The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period.
3.	The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan before allowing mining as bounden on the PP.
4.	No mechanized machinery shall be allowed to be used for excavation of mineral from river bed and only on exceptional cases the DFO may permit use of JCB for loading and unloading of mineral in vehicles.
5.	CER activities shall be carried out / undertaken by the Proponent and 2% of the total project cost Rs 20,000.00 (Twenty Thousand) only shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the nearby village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 3 (three) months of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report (HCR) as mandated to be uploaded by the project Proponent in terms of the OM No IA3-22/1/2022-IA.III Dated 14.06.2024 in pursuance of the EIA Notification 2006.
6.	Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands adjoining the mining area involving local NGOs, School / College students and an amount of Rs 20,000 (Twenty Thousand) shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. The DFO shall get the same executed / implemented within 3 (three) months of allowing mining in the area and shall upload the reports in PARIVESH 2.0 portal which shall form part of the Half Yearly Compliance Report (HCR) as mandated to be uploaded by the project Proponent in terms of the OM No IA3-22/1/2022-IA.III Dated 14.06.2024 in pursuance of the EIA Notification 2006.
7.	The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Amlokhi (*Phyllanthus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saracaasoca*),Bael (*Aegle marmelos*), Jamun (*Syzygiumcuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpusintegrifolia*), Ow Tenga (*Dilleniaindica*), Thekera (*Garcinia spp*) etc etc.

8.	Half Yearly Compliance Reports (HCR) are mandatory on the part of project Proponent which need to be uploaded on or before 1st June and 1st December of the calendar year in PARIVESH 2.0 portal and no activity shall be permitted by the DFO without HCR.
9.	Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.2.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	This Environmental Clearance (EC) is subject to orders/ judgment of Honble Supreme Court of India, Honble High Court, Honble NGT and any other Court of Law, Common Cause Conditions as may be applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State Pollution Control Board/ Committee.
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
Statutory compliance	
1.	State Pollution Control Board/Committee shall be responsible for display of this EC letter at its Regional office, District Industries Centre and Collector's office/ Tehsildar's Office for 30 days.
1.	The Project Proponent shall inform the MoEF&CC for any change in ownership of the mining lease. In case there is any change in ownership or mining lease is transferred. PP needs to apply for transfer of EC as per provisions of the para 11 of EIA Notification, 2006 as amended from time to time.
1.	The Project proponent complies with all the statutory requirements and judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India &Ors before commencing the mining operations.
1.	The State Government concerned shall ensure that mining operation shall not be commenced till the entire compensation levied, if any, for illegal mining paid by the Project Proponent through their respective Department of Mining & Geology in strict compliance of Judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India & Ors.
1.	The Project Proponent shall follow the mitigation measures provided in MoEFCC's Office Memorandum No. Z-11013/57/2014-IA.II (M), dated 29th October, 2014, titled "Impact of mining activities on Habitations-Issues related to the mining Projects wherein Habitations and villages are the part of mine lease areas or Habitations and villages are surrounded by the mine lease area."
1.	A copy of EC letter will be marked to concerned Panchayat / local NGO etc. if any, from whom suggestion / representation has been received while processing the proposal.
Air quality monitoring and preservation	
1.	The project proponent shall submit monthly summary report of continuous stack emission and air quality monitoring and results of manual stack monitoring and manual monitoring of air quality /fugitive emissions to

	Regional Office of MoEF&CC, Zonal office of CPCB and Regional Office of SPCB along with six-monthly monitoring report.
1.	The project proponent use leak proof trucks/dumpers carrying ore and other raw materials and cover them with tarpaulin.
1.	Design the ventilation system for adequate air changes as per ACGIH document for all tunnels, motor houses, Oil Cellars.
Air quality monitoring and preservation	
1.	Appropriate Air Pollution Control (APC) system shall be provided for all the dust generating points including fugitive dust from all vulnerable sources, so as to comply prescribed stack emission and fugitive emission standards.
Air quality monitoring and preservation	
1.	Effective safeguard measures for prevention of dust generation and subsequent suppression (like regular water sprinkling, metalled road construction etc.) shall be carried out in areas prone to air pollution wherein high levels of PM10 and PM2.5 are evident such as haul road, loading and unloading point and transfer points. The Fugitive dust emissions from all sources shall be regularly controlled by installation of required equipments/ machineries and preventive maintenance. Use of suitable water-soluble chemical dust suppressing agents may be explored for better effectiveness of dust control system. It shall be ensured that air pollution level conform to the standards prescribed by the MoEFCC/ Central Pollution Control Board.
Water quality monitoring and preservation	
1.	Project Proponent shall regularly monitor and maintain records w.r.t. ground water level and quality in and around the mine lease by establishing a network of existing wells as well as new piezo-meter installations during the mining operation in consultation with Central Ground Water Authority/ State Ground Water Department. The Report on changes in Ground water level and quality shall be submitted on six-monthly basis to the Regional Office of the Ministry, CGWA and State Groundwater Department / State Pollution Control Board.
Water quality monitoring and preservation	
1.	The Project Proponent shall undertake regular monitoring of natural water course/ water resources/ springs and perennial nallahs existing/ flowing in and around the mine lease including upstream and downstream. Sufficient number of gullies shall be provided at appropriate places within the lease for management of water. The parameters to be monitored shall include their water quality vis-à-vis suitability for usage as per CPCB criteria and flow rate. It shall be ensured that no obstruction and/ or alteration be made to water bodies during mining operations without justification and prior approval of MoEFCC. The monitoring of water courses/ bodies existing in lease area shall be carried out four times in a year viz. pre- monsoon (April May), monsoon (August), post-monsoon (November) and winter (January) and the record of monitored data may be sent regularly to Ministry of Environment, Forest and Climate Change and its Regional Office, Central Ground Water Authority and Regional Director, Central Ground Water Board, State Pollution Control Board and Central Pollution Control Board. Clearly showing the trend analysis on six-monthly basis.
1.	In case, immediate mining scheme envisages intersection of ground water table, then Environmental Clearance shall become operational only after receiving formal clearance from CGWA. In case, mining operation involves intersection of ground water table at a later stage, then PP shall ensure that prior approval from CGWA and MoEFCC is in place before such mining operations. The permission for intersection of ground water table shall essentially be based on detailed hydro-geological study of the area.
Noise and vibration monitoring and prevention	
1.	The peak particle velocity at 500m distance or within the nearest habitation, whichever is closer shall be monitored periodically as per applicable DGMS guidelines.

Noise monitoring and prevention	
1.	Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six-monthly compliance report.
Noise and vibration monitoring and prevention	
1.	The Project Proponent shall take measures for control of noise levels below 85 dBA in the work environment. The workers engaged in operations of HEMM, etc. should be provided with ear plugs /muffs. All personnel including laborers working in dusty areas shall be provided with protective respiratory devices along with adequate training, awareness and information on safety and health aspects. The PP shall be held responsible in case it has been found that workers/ personals/ laborers are working without personal protective equipment.
Mining plan	
1.	The Project Proponent shall adhere to approved mining plan, inter alia, including, total excavation (quantum of mineral, waste, over burden, inter burden and top soil etc.); mining technology; lease area; scope of working (method of mining, overburden & dump management, O.B& dump mining, mineral transportation mode, ultimate depth of mining, concurrent reclamation and reclamation at mine closure; land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life; etc.).
Mining plan	
1.	The land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life shall be governed as per the approved Mining Plan. The excavation vis-à-vis backfilling in the mine lease area and corresponding afforestation to be raised in the reclaimed area shall be governed as per approved mining plan. PP shall ensure the monitoring and management of rehabilitated areas until the vegetation becomes self-sustaining. The compliance status shall be submitted half-yearly to the MoEFCC and its concerned Regional Office.
Waste management	
1.	Kitchen waste shall be composted or converted to biogas for further use.(to be decided on case to case basis depending on type and size of plant)
1.	The waste oil, grease and other hazardous waste shall be disposed of as per the Hazardous & Other waste (Management & Transboundary Movement) Rules, 2016.
Land reclamation	
1.	Check dams of appropriate size, gradient and length shall be constructed around mine pit and OB dumps to prevent storm run-off and sediment flow into adjoining water bodies. A safety margin of 50% shall be kept for designing of sump structures over and above peak rainfall (based on 50 years data) and maximum discharge in the mine and its adjoining area which shall also help in providing adequate retention time period thereby allowing proper settling of sediments/ silt material. The sedimentation pits/ sumps shall be constructed at the corners of the garland drains.
Land reclamation	
1.	The slope of dumps shall be vegetated in scientific manner with suitable native species to maintain the slope stability, prevent erosion and surface run off. The selection of local species regulates local climatic parameters and help in adaptation of plant species to the microclimate. The gullies formed on slopes should be adequately taken care of as it impacts the overall stability of dumps. The dump mass should be consolidated with the help of dozer/ compactors thereby ensuring proper filling/ leveling of dump mass. In critical areas, use of geo textiles/ geo-membranes / clay liners / Bentonite etc. shall be undertaken for stabilization of the dump.
1.	The Overburden (O.B.), waste and topsoil generated during the mining operations shall be stacked at earmarked OB dump site(s) only and it should not be kept active for a long period of time. The physical parameters of the

	OB / waste dumps / topsoil dump like height, width and angle of slope shall be governed as per the approved Mining Plan and the guidelines/circulars issued by D.G.M.S. The topsoil shall be used for land reclamation and plantation.
Green Belt and EMP	
1.	The project proponent shall prepare GHG emissions inventory for the plant and shall submit the programme for reduction of the same including carbon sequestration including plantation.
Transportation	
1.	No Transportation of the minerals shall be allowed in case of roads passing through villages/ habitations. In such cases, PP shall construct a 'bypass' road for the purpose of transportation of the minerals leaving an adequate gap (say at least 200 meters) so that the adverse impact of sound and dust along with chances of accidents could be mitigated. All costs resulting from widening and strengthening of existing public road network shall be borne by the PP in consultation with nodal State Govt. Department. Transportation of minerals through road movement in case of existing village/ rural roads shall be allowed in consultation with nodal State Govt. Department only after required strengthening such that the carrying capacity of roads is increased to handle the traffic load. The pollution due to transportation load on the environment will be effectively controlled and water sprinkling will also be done regularly. Vehicular emissions shall be kept under control and regularly monitored. Project should obtain Pollution Under Control (PUC) certificate for all the vehicles from authorized pollution testing centers. [If applicable in case of road transport].
Public hearing and Human health issues	
1.	Occupational health surveillance of the workers shall be done on a regular basis and records maintained as per the Factories Act.
1.	The project proponent shall carry out heat stress analysis for the workmen who work in high temperature work zone and provide Personal Protection Equipment (PPE) as per the norms of Factory Act.
Public hearing and Human health issues	
1.	Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, creche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.
Green Belt	
1.	The Project Proponent shall develop greenbelt in 7.5m wide safety zone all along the mine lease boundary as per the guidelines of CPCB in order to arrest pollution emanating from mining operations within the lease. The whole Green belt shall be developed within first 5 years starting from windward side of the active mining area. The development of greenbelt shall be governed as per the EC granted by the Ministry irrespective of the stipulation made in approved mine plan.
Corporate Environment Responsibility	
1.	Self-environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Corporate Environment Responsibility	
1.	All the recommendations made in the Charter on Corporate Responsibility for Environment Protection (CREP) for the Mineral Beneficiation plants shall be implemented.
Corporate Environment Responsibility	

1.	The Project Proponent shall submit the time- bound action plan to the concerned regional office of the Ministry within 6 months from the date of issuance of environmental clearance for undertaking the activities committed during public consultation by the project proponent and as discussed by the EAC, in terms of the provisions of the MoEF&CC Office Memorandum No.22-65/2017-IA.III dated 30 September, 2020. The action plan shall be implemented within three years of commencement of the project.
1.	Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the Six Monthly Compliance Report.
Miscellaneous	
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	Concealing factual data failure to comply with any or submission of false/ fabricated data and of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act, 1986.
1.	The Ministry or any other competent authority may alter/modify the above conditions or stipulate any further condition in the interest of environment protection.
1.	The above conditions will be enforced inter-alia, under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986 and the Public Liability Insurance Act, 1991 along with their amendments and rules made there under and also any other orders passed by the Hon'ble Supreme Court of India/High Court and any other Court of Law relating to the subject matter.
1.	The Project Authorities should inform to the Regional Office regarding date of financial closures and final approval of the project by the concerned authorities and the date of start of land development work.
Miscellaneous	
1.	The project proponent shall monitor the criteria pollutants level namely; PM10, S02, NOx (ambient levels as well as stack emissions) or critical sectoral parameters, indicated for the projects and display the same at a convenient location for disclosure to the public and put on the website of the company.
1.	The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.
Miscellaneous	
1.	44) The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall abide by all the commitments and recommendations made in the EIA/EMP report, commitment made during Public Hearing and also that during their presentation to the Expert Appraisal Committee.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at

	environment clearance portal.
1.	The concerned Regional Office of the MoEF&CC shall randomly monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the MoEF&CC officer(s) by furnishing the requisite data / information / monitoring reports.
1.	The Project Proponent shall prepare digital map (land use & land cover) of the entire lease area once in five years purpose of monitoring land use pattern and submit a report to concerned Regional Office of the MoEF&CC.
1.	Any appeal against this environmental clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.
1.	In pursuant to Ministrys O.M No 22-34/2018-IA.III dated 16.01.2020 to comply with the direction made by Honble Supreme Court on 8.01.2020 in W.P. (Civil) No 114/2014 in the matter Common Cause vs Union of India, the mining lease holder shall after ceasing mining operations, undertake regrassing the mining area and any other area which may have been disturbed due to other mining activities and restore the land to a condition which is fit for growth of fodder, flora, fauna etc.

3.3. Agenda Item No 3:

3.3.1. Details of the proposal

Charuabakra Jungle Block Ordinary Earth Mining Permit Area No-IV (Govt. Khas Land) by **BILASIPURA GU WAHATI PRIVATE LIMITED** located at **DHUBRI,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/529308/2025	SEAC/SEIAA.4045/2025	13/03/2025	Mining of minerals (1(a))

3.3.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :05/04/2025

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. Due deliberations and discussions are held.

The Committee is of the considered opinion that the DFO has taken requisite steps to complete the preparation of the final District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG'2016 and EMGSM'2020} and had placed the final DSR for evaluation and appraisal by the SEAC and further approval by the competent authority.

It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the development of infrastructure in progress specially to strengthen the road connectivity in the interior areas of the district and also other developmental works requiring restoration after the ravages of flood in the whole state which is a *sine qua non* for overall development and economic growth of the state while the impact on environment also require due diligence and consideration with proper safeguards. It is further appreciated that the important stakeholders like the Registered Qualified Person (RQP), Geologist from the Department of Geology and Mining, the Forest official, the official from the Revenue Department are actively involved in the process for recommending mining in the area by way of consultation including site inspection before appraisal by the SEAC.

The Committee deem it appropriate to recommend the grant of the EC by the SEIAA allowing extraction of minor mineral in 6 (Six) months only with the quantity measuring3,960 Cu M of ordinary earth.

This is necessitated in view of the process of development works being **NHIDCL work**, Govt. of India has been communicated by the concerned competent authority.

Decision: Recommended for grant of EC for **6 (Six) months** only for **3,960 Cu M of ordinary earth.**

3.3.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 0.33Ha with a quantity of 3,960 Cu M of ordinary earth for 6 (six) months subjected to the terms and conditions laid down by SEAC and that the area in question is to be reflected in the approved final DSR.

3.3.4. Recommendation of SEIAA

Approved

3.3.5. Details of Environment Conditions

3.3.5.1. Specific

General conditions by SEAC	
1.	This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials; (c) the Proponent shall extract the approved quantity of minerals indicated herein with maximum mining depth of up to 1(one) meters only from the non-mined surface.
2.	The quantities of minor mineral allowed for extraction, annually, in terms of the approved DSR shall not be exceeded by the Proponent.

3.	The Orders of the Hon'ble Apex Court, the NGT (Eastern Bench), Kolkata; the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} shall be followed by the Proponent.
4.	This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan;
Specific conditions by SEAC	
1.	Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO.
2.	The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period.
3.	The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan before allowing mining as bounden on the PP.
4.	No mechanized machinery shall be allowed to be used for excavation of mineral from river bed and only on exceptional cases the DFO may permit use of JCB for loading and unloading of mineral in vehicles.
5.	CER activities shall be carried out / undertaken by the Proponent the total project cost Rs 1,00000.00 (One Lakh) only shall be earmarked for the purposes. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 3 (three) months of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report (HCR) as mandated to be uploaded by the project Proponent in terms of the OM No IA3-22/1/2022-IA.III Dated 14.06.2024 in pursuance of the EIA Notification 2006.
6.	Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands adjoining the mining area involving local NGOs, School / College students and the amount shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. The DFO shall get the same executed / implemented within 3 (three) months of allowing mining in the area and shall upload the reports in PARIVESH 2.0 portal which shall form part of the Half Yearly Compliance Report (HCR) as mandated to be uploaded by the project Proponent in terms of the OM No IA3-22/1/2022-IA.III Dated 14.06.2024 in pursuance of the EIA Notification 2006.
7.	The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Amlokhi (*Phyllanthus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saracaasoca*),Bael (*Aegle marmelos*), Jamun (*Syzygiumcuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpusintegrifolia*), Ow Tenga (*Dilleniaindica*), Thekera (*Garcinia spp*) etc etc.
8.	Half Yearly Compliance Reports (HCR) are mandatory on the part of project Proponent which need to be uploaded on or before 1st June and 1st December of the calendar year in PARIVESH 2.0

	portal and no activity shall be permitted by the DFO without HCR.
9.	Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.3.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State Pollution Control Board/ Committee.
1.	This Environmental Clearance (EC) is subject to orders/ judgment of Honble Supreme Court of India, Honble High Court, Honble NGT and any other Court of Law, Common Cause Conditions as may be applicable.
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
Statutory compliance	
1.	A copy of EC letter will be marked to concerned Panchayat / local NGO etc. if any, from whom suggestion / representation has been received while processing the proposal.
1.	The Project proponent complies with all the statutory requirements and judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India &Ors before commencing the mining operations.
1.	State Pollution Control Board/Committee shall be responsible for display of this EC letter at its Regional office, District Industries Centre and Collector's office/ Tehsildar's Office for 30 days.
1.	The Project Proponent shall inform the MoEF&CC for any change in ownership of the mining lease. In case there is any change in ownership or mining lease is transferred. PP needs to apply for transfer of EC as per provisions of the para 11 of EIA Notification, 2006 as amended from time to time.
1.	The Project Proponent shall follow the mitigation measures provided in MoEFCC's Office Memorandum No. Z-11013/57/2014-IA.II (M), dated 29th October, 2014, titled "Impact of mining activities on Habitations-Issues related to the mining Projects wherein Habitations and villages are the part of mine lease areas or Habitations and villages are surrounded by the mine lease area."
1.	The State Government concerned shall ensure that mining operation shall not be commenced till the entire compensation levied, if any, for illegal mining paid by the Project Proponent through their respective Department of Mining & Geology in strict compliance of Judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India & Ors.
Air quality monitoring and preservation	
1.	The project proponent shall submit monthly summary report of continuous stack emission and air quality monitoring and results of manual stack monitoring and manual monitoring of air quality /fugitive emissions to Regional Office of MoEF&CC, Zonal office of CPCB and Regional Office of SPCB along with six-monthly monitoring report.

1.	The project proponent use leak proof trucks/dumpers carrying ore and other raw materials and cover them with tarpaulin.
1.	Design the ventilation system for adequate air changes as per ACGIH document for all tunnels, motor houses, Oil Cellars.
Air quality monitoring and preservation	
1.	Appropriate Air Pollution Control (APC) system shall be provided for all the dust generating points including fugitive dust from all vulnerable sources, so as to comply prescribed stack emission and fugitive emission standards.
Air quality monitoring and preservation	
1.	Effective safeguard measures for prevention of dust generation and subsequent suppression (like regular water sprinkling, metalled road construction etc.) shall be carried out in areas prone to air pollution wherein high levels of PM10 and PM2.5 are evident such as haul road, loading and unloading point and transfer points. The Fugitive dust emissions from all sources shall be regularly controlled by installation of required equipments/ machineries and preventive maintenance. Use of suitable water-soluble chemical dust suppressing agents may be explored for better effectiveness of dust control system. It shall be ensured that air pollution level conform to the standards prescribed by the MoEFCC/ Central Pollution Control Board.
Water quality monitoring and preservation	
1.	Project Proponent shall regularly monitor and maintain records w.r.t. ground water level and quality in and around the mine lease by establishing a network of existing wells as well as new piezo-meter installations during the mining operation in consultation with Central Ground Water Authority/ State Ground Water Department. The Report on changes in Ground water level and quality shall be submitted on six-monthly basis to the Regional Office of the Ministry, CGWA and State Groundwater Department / State Pollution Control Board.
Water quality monitoring and preservation	
1.	The Project Proponent shall undertake regular monitoring of natural water course/ water resources/ springs and perennial nallahs existing/ flowing in and around the mine lease including upstream and downstream. Sufficient number of gullies shall be provided at appropriate places within the lease for management of water. The parameters to be monitored shall include their water quality vis-à-vis suitability for usage as per CPCB criteria and flow rate. It shall be ensured that no obstruction and/ or alteration be made to water bodies during mining operations without justification and prior approval of MoEFCC. The monitoring of water courses/ bodies existing in lease area shall be carried out four times in a year viz. pre- monsoon (April May), monsoon (August), post-monsoon (November) and winter (January) and the record of monitored data may be sent regularly to Ministry of Environment, Forest and Climate Change and its Regional Office, Central Ground Water Authority and Regional Director, Central Ground Water Board, State Pollution Control Board and Central Pollution Control Board. Clearly showing the trend analysis on six-monthly basis.
1.	In case, immediate mining scheme envisages intersection of ground water table, then Environmental Clearance shall become operational only after receiving formal clearance from CGWA. In case, mining operation involves intersection of ground water table at a later stage, then PP shall ensure that prior approval from CGWA and MoEFCC is in place before such mining operations. The permission for intersection of ground water table shall essentially be based on detailed hydro-geological study of the area.
Noise and vibration monitoring and prevention	
1.	The peak particle velocity at 500m distance or within the nearest habitation, whichever is closer shall be monitored periodically as per applicable DGMS guidelines.
Noise monitoring and prevention	
1.	Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to

	Regional Officer of the Ministry as a part of six-monthly compliance report.
Noise and vibration monitoring and prevention	
1.	The Project Proponent shall take measures for control of noise levels below 85 dBA in the work environment. The workers engaged in operations of HEMM, etc. should be provided with ear plugs /muffs. All personnel including laborers working in dusty areas shall be provided with protective respiratory devices along with adequate training, awareness and information on safety and health aspects. The PP shall be held responsible in case it has been found that workers/ personals/ laborers are working without personal protective equipment.
Mining plan	
1.	The Project Proponent shall adhere to approved mining plan, inter alia, including, total excavation (quantum of mineral, waste, over burden, inter burden and top soil etc.); mining technology; lease area; scope of working (method of mining, overburden & dump management, O.B& dump mining, mineral transportation mode, ultimate depth of mining, concurrent reclamation and reclamation at mine closure; land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life; etc.).
Mining plan	
1.	The land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life shall be governed as per the approved Mining Plan. The excavation vis-à-vis backfilling in the mine lease area and corresponding afforestation to be raised in the reclaimed area shall be governed as per approved mining plan. PP shall ensure the monitoring and management of rehabilitated areas until the vegetation becomes self-sustaining. The compliance status shall be submitted half-yearly to the MoEFCC and its concerned Regional Office.
Waste management	
1.	The waste oil, grease and other hazardous waste shall be disposed of as per the Hazardous & Other waste (Management & Transboundary Movement) Rules, 2016.
1.	Kitchen waste shall be composted or converted to biogas for further use.(to be decided on case to case basis depending on type and size of plant)
Land reclamation	
1.	Check dams of appropriate size, gradient and length shall be constructed around mine pit and OB dumps to prevent storm run-off and sediment flow into adjoining water bodies. A safety margin of 50% shall be kept for designing of sump structures over and above peak rainfall (based on 50 years data) and maximum discharge in the mine and its adjoining area which shall also help in providing adequate retention time period thereby allowing proper settling of sediments/ silt material. The sedimentation pits/ sumps shall be constructed at the corners of the garland drains.
Land reclamation	
1.	The slope of dumps shall be vegetated in scientific manner with suitable native species to maintain the slope stability, prevent erosion and surface run off. The selection of local species regulates local climatic parameters and help in adaptation of plant species to the microclimate. The gullies formed on slopes should be adequately taken care of as it impacts the overall stability of dumps. The dump mass should be consolidated with the help of dozer/ compactors thereby ensuring proper filling/ leveling of dump mass. In critical areas, use of geo textiles/ geo-membranes / clay liners / Bentonite etc. shall be undertaken for stabilization of the dump.
1.	The Overburden (O.B.), waste and topsoil generated during the mining operations shall be stacked at earmarked OB dump site(s) only and it should not be kept active for a long period of time. The physical parameters of the OB / waste dumps / topsoil dump like height, width and angle of slope shall be governed as per the approved Mining Plan and the guidelines/circulars issued by D.G.M.S. The topsoil shall be used for land reclamation and plantation.

Green Belt and EMP	
1.	The project proponent shall prepare GHG emissions inventory for the plant and shall submit the programme for reduction of the same including carbon sequestration including plantation.
Transportation	
1.	No Transportation of the minerals shall be allowed in case of roads passing through villages/ habitations. In such cases, PP shall construct a 'bypass' road for the purpose of transportation of the minerals leaving an adequate gap (say at least 200 meters) so that the adverse impact of sound and dust along with chances of accidents could be mitigated. All costs resulting from widening and strengthening of existing public road network shall be borne by the PP in consultation with nodal State Govt. Department. Transportation of minerals through road movement in case of existing village/ rural roads shall be allowed in consultation with nodal State Govt. Department only after required strengthening such that the carrying capacity of roads is increased to handle the traffic load. The pollution due to transportation load on the environment will be effectively controlled and water sprinkling will also be done regularly. Vehicular emissions shall be kept under control and regularly monitored. Project should obtain Pollution Under Control (PUC) certificate for all the vehicles from authorized pollution testing centers. [If applicable in case of road transport].
Public hearing and Human health issues	
1.	Occupational health surveillance of the workers shall be done on a regular basis and records maintained as per the Factories Act.
1.	The project proponent shall carry out heat stress analysis for the workmen who work in high temperature work zone and provide Personal Protection Equipment (PPE) as per the norms of Factory Act.
Public hearing and Human health issues	
1.	Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, creche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.
Green Belt	
1.	The Project Proponent shall develop greenbelt in 7.5m wide safety zone all along the mine lease boundary as per the guidelines of CPCB in order to arrest pollution emanating from mining operations within the lease. The whole Green belt shall be developed within first 5 years starting from windward side of the active mining area. The development of greenbelt shall be governed as per the EC granted by the Ministry irrespective of the stipulation made in approved mine plan.
Corporate Environment Responsibility	
1.	Self-environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Corporate Environment Responsibility	
1.	All the recommendations made in the Charter on Corporate Responsibility for Environment Protection (CREP) for the Mineral Beneficiation plants shall be implemented.
Corporate Environment Responsibility	
1.	Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with

	the Six Monthly Compliance Report.
1.	The Project Proponent shall submit the time- bound action plan to the concerned regional office of the Ministry within 6 months from the date of issuance of environmental clearance for undertaking the activities committed during public consultation by the project proponent and as discussed by the EAC, in terms of the provisions of the MoEF&CC Office Memorandum No.22-65/2017-IA.III dated 30 September, 2020. The action plan shall be implemented within three years of commencement of the project.
Miscellaneous	
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	Concealing factual data failure to comply with any or submission of false/ fabricated data and of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act, 1986.
1.	The above conditions will be enforced inter-alia, under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986 and the Public Liability Insurance Act, 1991 along with their amendments and rules made there under and also any other orders passed by the Hon'ble Supreme Court of India/High Court and any other Court of Law relating to the subject matter.
1.	The Ministry or any other competent authority may alter/modify the above conditions or stipulate any further condition in the interest of environment protection.
1.	The Project Authorities should inform to the Regional Office regarding date of financial closures and final approval of the project by the concerned authorities and the date of start of land development work.
Miscellaneous	
1.	The project proponent shall monitor the criteria pollutants level namely; PM10, S02, NOx (ambient levels as well as stack emissions) or critical sectoral parameters, indicated for the projects and display the same at a convenient location for disclosure to the public and put on the website of the company.
1.	The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.
Miscellaneous	
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The project proponent shall abide by all the commitments and recommendations made in the EIA/EMP report, commitment made during Public Hearing and also that during their presentation to the Expert Appraisal Committee.
1.	44) The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The concerned Regional Office of the MoEF&CC shall randomly monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the MoEF&CC officer(s) by furnishing the

	requisite data / information / monitoring reports.
1.	The Project Proponent shall prepare digital map (land use & land cover) of the entire lease area once in five years purpose of monitoring land use pattern and submit a report to concerned Regional Office of the MoEF&CC.
1.	Any appeal against this environmental clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.
1.	In pursuant to Ministrys O.M No 22-34/2018-IA.III dated 16.01.2020 to comply with the direction made by Honble Supreme Court on 8.01.2020 in W.P. (Civil) No 114/2014 in the matter Common Cause vs Union of India, the mining lease holder shall after ceasing mining operations, undertake regrassing the mining area and any other area which may have been disturbed due to other mining activities and restore the land to a condition which is fit for growth of fodder, flora, fauna etc.

3.4. Agenda Item No 4:

3.4.1. Details of the proposal

Charuabakra Jungle Block Ordinary Earth Mining Permit Area No-V (Govt. Khas Land) by **BILASIPURA GU WAHATI PRIVATE LIMITED** located at **DHUBRI,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/529371/2025	SEAC/SEIAA.4046/2025	13/03/2025	Mining of minerals (1(a))

3.4.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :05/04/2025

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. Due deliberations and discussions are held.

The Committee is of the considered opinion that the DFO has taken requisite steps to complete the preparation of the final District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG'2016 and EMGSM'2020} and had placed the final DSR for evaluation and appraisal by the SEAC and further approval by the competent authority.

It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the development of infrastructure in progress specially to strengthen the road connectivity in the interior areas of the district and also other developmental works requiring restoration after the ravages of flood in the whole state which is a *sine qua non* for overall development and economic growth of the state while the impact on environment also require due diligence and consideration with proper safeguards. It is further appreciated that the important stakeholders like the Registered Qualified Person (RQP), Geologist from the Department of Geology and Mining, the Forest official, the official from the Revenue Department are actively involved in the process for recommending mining in the area by way of consultation including site inspection before appraisal by the SEAC.

The Committee deem it appropriate to recommend the grant of the EC by the SEIAA allowing extraction of minor mineral for 1 (one) year, as recommended in the mining plan, with the quantity of quantity of 7,920 Cu M of Ordinary Earth.

This is necessitated in view of the process of development works being **NHIDCL work**, Govt. of India as has been communicated by the concerned competent authority.

Decision: Recommended for grant of EC for **1 (one) year** only for **7,920 Cu M of Ordinary Earth**.

3.4.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 0.66Ha with a quantity of 7,920Cu M of ordinary earth for 6 (six) months subjected to the terms and conditions laid down by SEAC and that the area in question is to be reflected in the approved final DSR.

3.4.4. Recommendation of SEIAA

Approved

3.4.5. Details of Environment Conditions

3.4.5.1. Specific

General conditions by SEAC	
1.	This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials; (c) the Proponent shall extract the approved quantity of minerals indicated herein with maximum mining depth of up to 1(one) meters only from the non-mined surface.
2.	The Orders of the Hon'ble Apex Court, the NGT (Eastern Bench), Kolkata; the Principal Bench of

	the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} shall be followed by the Proponent.
3.	This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan;
specific conditions by SEAC	
1.	Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO.
2.	The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period.
3.	The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan before allowing mining as bounden on the PP.
4.	No mechanized machinery shall be allowed to be used for excavation of mineral from river bed and only on exceptional cases the DFO may permit use of JCB for loading and unloading of mineral in vehicles.
5.	CER activities shall be carried out / undertaken by the Proponent and an amount of Rs 50,000.00 (Fifty Thousand) only, shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the nearby village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 3 (three) months of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report (HCR) as mandated to be uploaded by the project Proponent in terms of the OM No IA3-22/1/2022-IA.III Dated 14.06.2024 in pursuance of the EIA Notification 2006.
6.	Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands adjoining the mining area involving local NGOs, School / College students and an amount of Rs 1.00 (One) Lakh shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. The DFO shall get the same executed / implemented within 3 (three) months of allowing mining in the area and shall upload the reports in PARIVESH 2.0 portal which shall form part of the Half Yearly Compliance Report (HCR) as mandated to be uploaded by the project Proponent in terms of the OM No IA3-22/1/2022-IA.III Dated 14.06.2024 in pursuance of the EIA Notification 2006.
7.	The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Amlokhi (*Phyllanthus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saracaasoca*),Bael (*Aegle marmelos*), Jamun (*Syzygiumcuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpusintegrifolia*), Ow Tenga (*Dilleniaindica*), Thekera (*Garcinia spp*) etc etc.

8.	Half Yearly Compliance Reports (HCR) are mandatory on the part of project Proponent which need to be uploaded on or before 1st June and 1st December of the calendar year in PARIVESH 2.0 portal and no activity shall be permitted by the DFO without HCR.
9.	Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.4.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State Pollution Control Board/ Committee.
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	This Environmental Clearance (EC) is subject to orders/ judgment of Honble Supreme Court of India, Honble High Court, Honble NGT and any other Court of Law, Common Cause Conditions as may be applicable.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
Statutory compliance	
1.	A copy of EC letter will be marked to concerned Panchayat / local NGO etc. if any, from whom suggestion / representation has been received while processing the proposal.
1.	The Project proponent complies with all the statutory requirements and judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India &Ors before commencing the mining operations.
1.	The Project Proponent shall follow the mitigation measures provided in MoEFCC's Office Memorandum No. Z-11013/57/2014-IA.II (M), dated 29th October, 2014, titled "Impact of mining activities on Habitations-Issues related to the mining Projects wherein Habitations and villages are the part of mine lease areas or Habitations and villages are surrounded by the mine lease area."
1.	The State Government concerned shall ensure that mining operation shall not be commenced till the entire compensation levied, if any, for illegal mining paid by the Project Proponent through their respective Department of Mining & Geology in strict compliance of Judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India & Ors.
1.	State Pollution Control Board/Committee shall be responsible for display of this EC letter at its Regional office, District Industries Centre and Collector's office/ Tehsildar's Office for 30 days.
1.	The Project Proponent shall inform the MoEF&CC for any change in ownership of the mining lease. In case there is any change in ownership or mining lease is transferred. PP needs to apply for transfer of EC as per provisions of the para 11 of EIA Notification, 2006 as amended from time to time.
Air quality monitoring and preservation	
1.	Design the ventilation system for adequate air changes as per ACGIH document for all tunnels, motor houses, Oil Cellars.

1.	The project proponent use leak proof trucks/dumpers carrying ore and other raw materials and cover them with tarpaulin.
1.	The project proponent shall submit monthly summary report of continuous stack emission and air quality monitoring and results of manual stack monitoring and manual monitoring of air quality /fugitive emissions to Regional Office of MoEF&CC, Zonal office of CPCB and Regional Office of SPCB along with six-monthly monitoring report.
Air quality monitoring and preservation	
1.	Appropriate Air Pollution Control (APC) system shall be provided for all the dust generating points including fugitive dust from all vulnerable sources, so as to comply prescribed stack emission and fugitive emission standards.
Air quality monitoring and preservation	
1.	Effective safeguard measures for prevention of dust generation and subsequent suppression (like regular water sprinkling, metalled road construction etc.) shall be carried out in areas prone to air pollution wherein high levels of PM10 and PM2.5 are evident such as haul road, loading and unloading point and transfer points. The Fugitive dust emissions from all sources shall be regularly controlled by installation of required equipments/ machineries and preventive maintenance. Use of suitable water-soluble chemical dust suppressing agents may be explored for better effectiveness of dust control system. It shall be ensured that air pollution level conform to the standards prescribed by the MoEFCC/ Central Pollution Control Board.
Water quality monitoring and preservation	
1.	Project Proponent shall regularly monitor and maintain records w.r.t. ground water level and quality in and around the mine lease by establishing a network of existing wells as well as new piezo-meter installations during the mining operation in consultation with Central Ground Water Authority/ State Ground Water Department. The Report on changes in Ground water level and quality shall be submitted on six-monthly basis to the Regional Office of the Ministry, CGWA and State Groundwater Department / State Pollution Control Board.
Water quality monitoring and preservation	
1.	The Project Proponent shall undertake regular monitoring of natural water course/ water resources/ springs and perennial nallahs existing/ flowing in and around the mine lease including upstream and downstream. Sufficient number of gullies shall be provided at appropriate places within the lease for management of water. The parameters to be monitored shall include their water quality vis-à-vis suitability for usage as per CPCB criteria and flow rate. It shall be ensured that no obstruction and/ or alteration be made to water bodies during mining operations without justification and prior approval of MoEFCC. The monitoring of water courses/ bodies existing in lease area shall be carried out four times in a year viz. pre- monsoon (April May), monsoon (August), post-monsoon (November) and winter (January) and the record of monitored data may be sent regularly to Ministry of Environment, Forest and Climate Change and its Regional Office, Central Ground Water Authority and Regional Director, Central Ground Water Board, State Pollution Control Board and Central Pollution Control Board. Clearly showing the trend analysis on six-monthly basis.
1.	In case, immediate mining scheme envisages intersection of ground water table, then Environmental Clearance shall become operational only after receiving formal clearance from CGWA. In case, mining operation involves intersection of ground water table at a later stage, then PP shall ensure that prior approval from CGWA and MoEFCC is in place before such mining operations. The permission for intersection of ground water table shall essentially be based on detailed hydro-geological study of the area.
Noise and vibration monitoring and prevention	
1.	The peak particle velocity at 500m distance or within the nearest habitation, whichever is closer shall be monitored periodically as per applicable DGMS guidelines.
Noise monitoring and prevention	

1.	Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six-monthly compliance report.
Noise and vibration monitoring and prevention	
1.	The Project Proponent shall take measures for control of noise levels below 85 dBA in the work environment. The workers engaged in operations of HEMM, etc. should be provided with ear plugs /muffs. All personnel including laborers working in dusty areas shall be provided with protective respiratory devices along with adequate training, awareness and information on safety and health aspects. The PP shall be held responsible in case it has been found that workers/ personals/ laborers are working without personal protective equipment.
Mining plan	
1.	The Project Proponent shall adhere to approved mining plan, inter alia, including, total excavation (quantum of mineral, waste, over burden, inter burden and top soil etc.); mining technology; lease area; scope of working (method of mining, overburden & dump management, O.B& dump mining, mineral transportation mode, ultimate depth of mining, concurrent reclamation and reclamation at mine closure; land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life; etc.).
Mining plan	
1.	The land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life shall be governed as per the approved Mining Plan. The excavation vis-à-vis backfilling in the mine lease area and corresponding afforestation to be raised in the reclaimed area shall be governed as per approved mining plan. PP shall ensure the monitoring and management of rehabilitated areas until the vegetation becomes self-sustaining. The compliance status shall be submitted half-yearly to the MoEFCC and its concerned Regional Office.
Waste management	
1.	The waste oil, grease and other hazardous waste shall be disposed of as per the Hazardous & Other waste (Management & Transboundary Movement) Rules, 2016.
1.	Kitchen waste shall be composted or converted to biogas for further use.(to be decided on case to case basis depending on type and size of plant)
Land reclamation	
1.	Check dams of appropriate size, gradient and length shall be constructed around mine pit and OB dumps to prevent storm run-off and sediment flow into adjoining water bodies. A safety margin of 50% shall be kept for designing of sump structures over and above peak rainfall (based on 50 years data) and maximum discharge in the mine and its adjoining area which shall also help in providing adequate retention time period thereby allowing proper settling of sediments/ silt material. The sedimentation pits/ sumps shall be constructed at the corners of the garland drains.
Land reclamation	
1.	The slope of dumps shall be vegetated in scientific manner with suitable native species to maintain the slope stability, prevent erosion and surface run off. The selection of local species regulates local climatic parameters and help in adaptation of plant species to the microclimate. The gullies formed on slopes should be adequately taken care of as it impacts the overall stability of dumps. The dump mass should be consolidated with the help of dozer/ compactors thereby ensuring proper filling/ leveling of dump mass. In critical areas, use of geo textiles/ geo-membranes / clay liners / Bentonite etc. shall be undertaken for stabilization of the dump.
1.	The Overburden (O.B.), waste and topsoil generated during the mining operations shall be stacked at earmarked OB dump site(s) only and it should not be kept active for a long period of time. The physical parameters of the OB / waste dumps / topsoil dump like height, width and angle of slope shall be governed as per the approved Mining Plan and the guidelines/circulars issued by D.G.M.S. The topsoil shall be used for land reclamation and plantation.

Green Belt and EMP	
1.	The project proponent shall prepare GHG emissions inventory for the plant and shall submit the programme for reduction of the same including carbon sequestration including plantation.
Transportation	
1.	No Transportation of the minerals shall be allowed in case of roads passing through villages/ habitations. In such cases, PP shall construct a 'bypass' road for the purpose of transportation of the minerals leaving an adequate gap (say at least 200 meters) so that the adverse impact of sound and dust along with chances of accidents could be mitigated. All costs resulting from widening and strengthening of existing public road network shall be borne by the PP in consultation with nodal State Govt. Department. Transportation of minerals through road movement in case of existing village/ rural roads shall be allowed in consultation with nodal State Govt. Department only after required strengthening such that the carrying capacity of roads is increased to handle the traffic load. The pollution due to transportation load on the environment will be effectively controlled and water sprinkling will also be done regularly. Vehicular emissions shall be kept under control and regularly monitored. Project should obtain Pollution Under Control (PUC) certificate for all the vehicles from authorized pollution testing centers. [If applicable in case of road transport].
Public hearing and Human health issues	
1.	Occupational health surveillance of the workers shall be done on a regular basis and records maintained as per the Factories Act.
1.	The project proponent shall carry out heat stress analysis for the workmen who work in high temperature work zone and provide Personal Protection Equipment (PPE) as per the norms of Factory Act.
Public hearing and Human health issues	
1.	Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, creche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.
Green Belt	
1.	The Project Proponent shall develop greenbelt in 7.5m wide safety zone all along the mine lease boundary as per the guidelines of CPCB in order to arrest pollution emanating from mining operations within the lease. The whole Green belt shall be developed within first 5 years starting from windward side of the active mining area. The development of greenbelt shall be governed as per the EC granted by the Ministry irrespective of the stipulation made in approved mine plan.
Corporate Environment Responsibility	
1.	Self-environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Corporate Environment Responsibility	
1.	All the recommendations made in the Charter on Corporate Responsibility for Environment Protection (CREP) for the Mineral Beneficiation plants shall be implemented.
Corporate Environment Responsibility	
1.	The Project Proponent shall submit the time- bound action plan to the concerned regional office of the Ministry within 6 months from the date of issuance of environmental clearance for undertaking the activities committed during public consultation by the project proponent and as discussed by the EAC, in terms of the provisions of the MoEF&CC Office Memorandum No.22-65/2017-IA.III dated 30 September, 2020. The action plan shall be

	implemented within three years of commencement of the project.
1.	Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the Six Monthly Compliance Report.
Miscellaneous	
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	The Project Authorities should inform to the Regional Office regarding date of financial closures and final approval of the project by the concerned authorities and the date of start of land development work.
1.	The Ministry or any other competent authority may alter/modify the above conditions or stipulate any further condition in the interest of environment protection.
1.	The above conditions will be enforced inter-alia, under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986 and the Public Liability Insurance Act, 1991 along with their amendments and rules made there under and also any other orders passed by the Hon'ble Supreme Court of India/High Court and any other Court of Law relating to the subject matter.
1.	Concealing factual data failure to comply with any or submission of false/ fabricated data and of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act, 1986.
Miscellaneous	
1.	The project proponent shall monitor the criteria pollutants level namely; PM10, S02, NOx (ambient levels as well as stack emissions) or critical sectoral parameters, indicated for the projects and display the same at a convenient location for disclosure to the public and put on the website of the company.
1.	The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.
Miscellaneous	
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The project proponent shall abide by all the commitments and recommendations made in the EIA/EMP report, commitment made during Public Hearing and also that during their presentation to the Expert Appraisal Committee.
1.	44) The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	Any appeal against this environmental clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.

1.	In pursuant to Ministrys O.M No 22-34/2018-IA.III dated 16.01.2020 to comply with the direction made by Honble Supreme Court on 8.01.2020 in W.P. (Civil) No 114/2014 in the matter Common Cause vs Union of India, the mining lease holder shall after ceasing mining operations, undertake regrassing the mining area and any other area which may have been disturbed due to other mining activities and restore the land to a condition which is fit for growth of fodder, flora, fauna etc.
1.	The concerned Regional Office of the MoEF&CC shall randomly monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the MoEF&CC officer(s) by furnishing the requisite data / information / monitoring reports.
1.	The Project Proponent shall prepare digital map (land use & land cover) of the entire lease area once in five years purpose of monitoring land use pattern and submit a report to concerned Regional Office of the MoEF&CC.

3.5. Agenda Item No 5:

3.5.1. Details of the proposal

GOVT. KHAS LAND EARTH MINING PERMIT AREA AT DAKHIN HATIKHIRA MOUZA by **MKC INFR ASTRUCTURE LIMITED** located at **KARIMGANJ,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/529828/2025	SEAC/SEIAA.4043/2025	17/03/2025	Mining of minerals (1(a))

3.5.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :05/04/2025

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. Due deliberations and discussions are held.

The Committee is of the opinion to urge the DFO for taking requisite steps to complete the preparation of the final District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG'2016 and EMGSM'2020} and place the same for evaluation and appraisal by the SEAC and further approval by the competent authority.

It is pertinent to mention that the *pre appraisal* of the draft DSR for the district has already been done by the SEAC and communicated with its observations for necessary corrections and compliance of the guidelines as stipulated. It is also noted that for some of the area of the district falling under the territorial jurisdiction of the Cachar Division the final DSR had already been submitted and considered for recommendation to the SEIAA for approval.

It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the development of infrastructure in progress specially to strengthen the road connectivity in the interior areas of the district connecting the neighbouring states of the region and also other developmental works requiring restoration after the ravages of flood in the whole state which is a *sine qua non* for overall development and economic growth of the state while the impact on environment also require due diligence and consideration with proper safeguards.

It is further appreciated that the important stakeholders like the Registered Qualified Person (RQP), Geologist from the Department of Geology and Mining, the Forest official, the official from the Revenue Department are actively involved in the process for recommending mining in the area by way of consultation including site inspection before appraisal by the SEAC.

The Committee deem it appropriate to recommend the grant of the EC by the SEIAA allowing extraction of minor mineral for 1(one) year, as recommended in the mining plan with the quantity measuring 61,250 Cu M of Earth with an observation that the DFO, Karimganj shall submit the approved DSR from the competent authority for further consideration of the balance quantity for the project allowing mining by the Proponent within a period of 3 (three) months and to ensure that the area in question is accordingly reflected in the final DSR.

This is necessitated in view of the process of development works being undertaken by the **NHIDCL work**, Govt of India as has been communicated by the concerned competent authority.

Decision: Recommended for grant of EC for **1 (one) year** only for **61,250 Cu M of Earth.**

3.5.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 4.11Ha with a quantity of 61,250Cu M of ordinary earth for 1 (one) year subjected to the terms and conditions laid down by SEAC and that the area in question is to be reflected in the approved final DSR.

3.5.4. Recommendation of SEIAA

Approved

3.5.5. Details of Environment Conditions

3.5.5.1. Specific

General conditions by SEAC

1.	This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates and (b) the Proponent shall extract the approved quantity of mineral indicated herein with maximum mining depth of up to 1 (one) meter only from the non-mined surface area.
2.	The quantities of minor mineral allowed for extraction in terms of the approved Mining Plan shall not be exceeded by the Proponent.
3.	The Orders of the Hon'ble Apex Court, the NGT (Eastern Bench), Kolkata; the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} shall be followed by the Proponent.
4.	This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan and the approved DSR for the district.
Specific conditions by SEAC	
1.	The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period.
2.	The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan before allowing mining as bounden on the Proponent.
3.	No mechanized machinery shall be allowed to be used for excavation of mineral from river bed and only on exceptional cases the DFO may permit use of JCB for loading and unloading of mineral in vehicles.
4.	CER activities shall be carried out / undertaken by the Proponent and 2% of the total project cost Rs 1,00,000.00 (One Lakh) only shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the nearby village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 3 (three) months of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report (HCR) as mandated to be uploaded by the project Proponent in terms of the OM No IA3-22/1/2022-IA.III Dated 14.06.2024 in pursuance of the EIA Notification 2006.
5.	Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands adjoining the mining area involving local NGOs, School / College students and an amount of Rs 2.00 (Two) Lakh shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with due consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. The DFO shall get the same executed / implemented within 3 (three) months of allowing mining in the area and shall upload the reports in PARIVESH 2.0 portal which shall form part of the Half Yearly Compliance Report (HCR) as mandated to be uploaded by the project Proponent in terms of the OM No IA3-22/1/2022-IA.III Dated 14.06.2024 in pursuance of the EIA Notification 2006.

6.	The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Amlokhi (*Phyllanthus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saracaasoca*),Bael (*Aegle marmelos*), Jamun (*Syzygiumcuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpusintegrifolia*), Ow Tenga (*Dilleniaindica*), Thekera (*Garcinia spp*) etc etc.
7.	Half Yearly Compliance Reports (HCR) are mandatory on the part of project Proponent which need to be uploaded on or before 1st June and 1st December of the calendar year in PARIVESH 2.0 portal and no activity shall be permitted by the DFO without HCR.
8.	Methods of excavation: 1. Demarcate the excavation setting out plan with reference co-ordinates and levels. Please note that the survey bench marks are away from the excavation in order to prevent the damage to markers and to maintain accuracy. 2. Start the excavation from one end and proceed to another end in layers such as one meter depth layers. 3. If the excavation depth exceeds 2.0 mtrs, it is necessary to protect the sides of excavation by driving sheet piles or soldier piles or timber shoring with strutting. The vertical members to protect the excavation is to be driven first followed by horizontal members. 4. The other option is to provide slope not less than1:1.5 with intermediate berms and the slopes have to be protected by planting grass / herbs (vegetative cover) etc. 5. After the completion of excavation 0.5 m below the first strut level, install the first strut as per the drawings. The procedure may be repeated till the bottom of excavation. 6. If the excavation is deep, it is better to provide long arm excavators to reach the required level. 7. Stack the soil away from the excavation edge to prevent soil collapsing to the excavation area. 8. In case of soil disposal, appoint marshall to guide the machinery movement. 9. Appoint signal man if the excavation is done by a mini excavator followed by soil disposal by another excavator. 10. Provision for drainage is to be made with sufficient pumps and collecting point. 11. If there is ground water percolating to excavation, please inform the Consultant and find out suitable preventive measures. 12. All the excavation area is to be barricaded with GI hand railing and sign boards such as "deep excavation is in progress, stay away" to be displayed in local languages which can understand by workers easily. 13. Sufficient flood lights have to be provided at regular intervals. 14. In case of over excavation, fill the extra depth with PCC. 15. After the completion of excavation inform the Engineer to visit the site for checking.
9.	Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH 2.0 portal.

3.5.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	This Environmental Clearance (EC) is subject to orders/ judgment of Honble Supreme Court of India, Honble High Court, Honble NGT and any other Court of Law, Common Cause Conditions as may be applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State Pollution Control Board/ Committee.
Statutory compliance	

1.	The State Government concerned shall ensure that mining operation shall not be commenced till the entire compensation levied, if any, for illegal mining paid by the Project Proponent through their respective Department of Mining & Geology in strict compliance of Judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India & Ors.
1.	State Pollution Control Board/Committee shall be responsible for display of this EC letter at its Regional office, District Industries Centre and Collector's office/ Tehsildar's Office for 30 days.
1.	A copy of EC letter will be marked to concerned Panchayat / local NGO etc. if any, from whom suggestion / representation has been received while processing the proposal.
1.	The Project Proponent shall follow the mitigation measures provided in MoEFCC's Office Memorandum No. Z-11013/57/2014-IA.II (M), dated 29th October, 2014, titled "Impact of mining activities on Habitations-Issues related to the mining Projects wherein Habitations and villages are the part of mine lease areas or Habitations and villages are surrounded by the mine lease area."
1.	The Project Proponent shall inform the MoEF&CC for any change in ownership of the mining lease. In case there is any change in ownership or mining lease is transferred. PP needs to apply for transfer of EC as per provisions of the para 11 of EIA Notification, 2006 as amended from time to time.
1.	The Project proponent complies with all the statutory requirements and judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India &Ors before commencing the mining operations.
Air quality monitoring and preservation	
1.	The project proponent shall submit monthly summary report of continuous stack emission and air quality monitoring and results of manual stack monitoring and manual monitoring of air quality /fugitive emissions to Regional Office of MoEF&CC, Zonal office of CPCB and Regional Office of SPCB along with six-monthly monitoring report.
1.	Design the ventilation system for adequate air changes as per ACGIH document for all tunnels, motor houses, Oil Cellars.
1.	The project proponent use leak proof trucks/dumpers carrying ore and other raw materials and cover them with tarpaulin.
Air quality monitoring and preservation	
1.	Appropriate Air Pollution Control (APC) system shall be provided for all the dust generating points including fugitive dust from all vulnerable sources, so as to comply prescribed stack emission and fugitive emission standards.
Air quality monitoring and preservation	
1.	Effective safeguard measures for prevention of dust generation and subsequent suppression (like regular water sprinkling, metalled road construction etc.) shall be carried out in areas prone to air pollution wherein high levels of PM10 and PM2.5 are evident such as haul road, loading and unloading point and transfer points. The Fugitive dust emissions from all sources shall be regularly controlled by installation of required equipments/ machineries and preventive maintenance. Use of suitable water-soluble chemical dust suppressing agents may be explored for better effectiveness of dust control system. It shall be ensured that air pollution level conform to the standards prescribed by the MoEFCC/ Central Pollution Control Board.
Water quality monitoring and preservation	
1.	Project Proponent shall regularly monitor and maintain records w.r.t. ground water level and quality in and around the mine lease by establishing a network of existing wells as well as new piezo-meter installations during the

	mining operation in consultation with Central Ground Water Authority/ State Ground Water Department. The Report on changes in Ground water level and quality shall be submitted on six-monthly basis to the Regional Office of the Ministry, CGWA and State Groundwater Department / State Pollution Control Board.
Water quality monitoring and preservation	
1.	In case, immediate mining scheme envisages intersection of ground water table, then Environmental Clearance shall become operational only after receiving formal clearance from CGWA. In case, mining operation involves intersection of ground water table at a later stage, then PP shall ensure that prior approval from CGWA and MoEFCC is in place before such mining operations. The permission for intersection of ground water table shall essentially be based on detailed hydro-geological study of the area.
1.	The Project Proponent shall undertake regular monitoring of natural water course/ water resources/ springs and perennial nallahs existing/ flowing in and around the mine lease including upstream and downstream. Sufficient number of gullies shall be provided at appropriate places within the lease for management of water. The parameters to be monitored shall include their water quality vis-à-vis suitability for usage as per CPCB criteria and flow rate. It shall be ensured that no obstruction and/ or alteration be made to water bodies during mining operations without justification and prior approval of MoEFCC. The monitoring of water courses/ bodies existing in lease area shall be carried out four times in a year viz. pre- monsoon (April May), monsoon (August), post-monsoon (November) and winter (January) and the record of monitored data may be sent regularly to Ministry of Environment, Forest and Climate Change and its Regional Office, Central Ground Water Authority and Regional Director, Central Ground Water Board, State Pollution Control Board and Central Pollution Control Board. Clearly showing the trend analysis on six-monthly basis.
Noise and vibration monitoring and prevention	
1.	The peak particle velocity at 500m distance or within the nearest habitation, whichever is closer shall be monitored periodically as per applicable DGMS guidelines.
Noise monitoring and prevention	
1.	Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six-monthly compliance report.
Noise and vibration monitoring and prevention	
1.	The Project Proponent shall take measures for control of noise levels below 85 dBA in the work environment. The workers engaged in operations of HEMM, etc. should be provided with ear plugs /muffs. All personnel including laborers working in dusty areas shall be provided with protective respiratory devices along with adequate training, awareness and information on safety and health aspects. The PP shall be held responsible in case it has been found that workers/ personals/ laborers are working without personal protective equipment.
Mining plan	
1.	The Project Proponent shall adhere to approved mining plan, inter alia, including, total excavation (quantum of mineral, waste, over burden, inter burden and top soil etc.); mining technology; lease area; scope of working (method of mining, overburden & dump management, O.B& dump mining, mineral transportation mode, ultimate depth of mining, concurrent reclamation and reclamation at mine closure; land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life; etc.).
Mining plan	
1.	The land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life shall be governed as per the approved Mining Plan. The excavation vis-à-vis backfilling in the mine lease area and corresponding afforestation to be raised in the reclaimed area shall be governed as per approved mining plan. PP shall ensure the monitoring and management of rehabilitated areas until the vegetation becomes self-sustaining. The compliance status shall be submitted half-yearly to the MoEFCC and its concerned Regional Office.

Waste management	
1.	The waste oil, grease and other hazardous waste shall be disposed of as per the Hazardous & Other waste (Management & Transboundary Movement) Rules, 2016.
1.	Kitchen waste shall be composted or converted to biogas for further use.(to be decided on case to case basis depending on type and size of plant)
Land reclamation	
1.	Check dams of appropriate size, gradient and length shall be constructed around mine pit and OB dumps to prevent storm run-off and sediment flow into adjoining water bodies. A safety margin of 50% shall be kept for designing of sump structures over and above peak rainfall (based on 50 years data) and maximum discharge in the mine and its adjoining area which shall also help in providing adequate retention time period thereby allowing proper settling of sediments/ silt material. The sedimentation pits/ sumps shall be constructed at the corners of the garland drains.
Land reclamation	
1.	The slope of dumps shall be vegetated in scientific manner with suitable native species to maintain the slope stability, prevent erosion and surface run off. The selection of local species regulates local climatic parameters and help in adaptation of plant species to the microclimate. The gullies formed on slopes should be adequately taken care of as it impacts the overall stability of dumps. The dump mass should be consolidated with the help of dozer/ compactors thereby ensuring proper filling/ leveling of dump mass. In critical areas, use of geo textiles/ geo-membranes / clay liners / Bentonite etc. shall be undertaken for stabilization of the dump.
1.	The Overburden (O.B.), waste and topsoil generated during the mining operations shall be stacked at earmarked OB dump site(s) only and it should not be kept active for a long period of time. The physical parameters of the OB / waste dumps / topsoil dump like height, width and angle of slope shall be governed as per the approved Mining Plan and the guidelines/circulars issued by D.G.M.S. The topsoil shall be used for land reclamation and plantation.
Green Belt and EMP	
1.	The project proponent shall prepare GHG emissions inventory for the plant and shall submit the programme for reduction of the same including carbon sequestration including plantation.
Transportation	
1.	No Transportation of the minerals shall be allowed in case of roads passing through villages/ habitations. In such cases, PP shall construct a ‘bypass’ road for the purpose of transportation of the minerals leaving an adequate gap (say at least 200 meters) so that the adverse impact of sound and dust along with chances of accidents could be mitigated. All costs resulting from widening and strengthening of existing public road network shall be borne by the PP in consultation with nodal State Govt. Department. Transportation of minerals through road movement in case of existing village/ rural roads shall be allowed in consultation with nodal State Govt. Department only after required strengthening such that the carrying capacity of roads is increased to handle the traffic load. The pollution due to transportation load on the environment will be effectively controlled and water sprinkling will also be done regularly. Vehicular emissions shall be kept under control and regularly monitored. Project should obtain Pollution Under Control (PUC) certificate for all the vehicles from authorized pollution testing centers. [If applicable in case of road transport].
Public hearing and Human health issues	
1.	The project proponent shall carry out heat stress analysis for the workmen who work in high temperature work zone and provide Personal Protection Equipment (PPE) as per the norms of Factory Act.
1.	Occupational health surveillance of the workers shall be done on a regular basis and records maintained as per the Factories Act.

Public hearing and Human health issues	
1.	Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, creche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.
Green Belt	
1.	The Project Proponent shall develop greenbelt in 7.5m wide safety zone all along the mine lease boundary as per the guidelines of CPCB in order to arrest pollution emanating from mining operations within the lease. The whole Green belt shall be developed within first 5 years starting from windward side of the active mining area. The development of greenbelt shall be governed as per the EC granted by the Ministry irrespective of the stipulation made in approved mine plan.
Corporate Environment Responsibility	
1.	Self-environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Corporate Environment Responsibility	
1.	All the recommendations made in the Charter on Corporate Responsibility for Environment Protection (CREP) for the Mineral Beneficiation plants shall be implemented.
Corporate Environment Responsibility	
1.	The Project Proponent shall submit the time- bound action plan to the concerned regional office of the Ministry within 6 months from the date of issuance of environmental clearance for undertaking the activities committed during public consultation by the project proponent and as discussed by the EAC, in terms of the provisions of the MoEF&CC Office Memorandum No.22-65/2017-IA.III dated 30 September, 2020. The action plan shall be implemented within three years of commencement of the project.
1.	Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the Six Monthly Compliance Report.
Miscellaneous	
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	Concealing factual data failure to comply with any or submission of false/ fabricated data and of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act, 1986.
1.	The Project Authorities should inform to the Regional Office regarding date of financial closures and final approval of the project by the concerned authorities and the date of start of land development work.
1.	The Ministry or any other competent authority may alter/modify the above conditions or stipulate any further condition in the interest of environment protection.
1.	The above conditions will be enforced inter-alia, under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986 and the Public Liability Insurance Act, 1991 along with their amendments and rules made there under and also any other orders passed by the Hon’ble Supreme Court of India/High Court and any other Court of Law

	relating to the subject matter.
Miscellaneous	
1.	The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.
1.	The project proponent shall monitor the criteria pollutants level namely; PM10, S02, NOx (ambient levels as well as stack emissions) or critical sectoral parameters, indicated for the projects and display the same at a convenient location for disclosure to the public and put on the website of the company.
Miscellaneous	
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	44) The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall abide by all the commitments and recommendations made in the EIA/EMP report, commitment made during Public Hearing and also that during their presentation to the Expert Appraisal Committee.
1.	The concerned Regional Office of the MoEF&CC shall randomly monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the MoEF&CC officer(s) by furnishing the requisite data / information / monitoring reports.
1.	The Project Proponent shall prepare digital map (land use & land cover) of the entire lease area once in five years purpose of monitoring land use pattern and submit a report to concerned Regional Office of the MoEF&CC.
1.	In pursuant to Ministrys O.M No 22-34/2018-IA.III dated 16.01.2020 to comply with the direction made by Honble Supreme Court on 8.01.2020 in W.P. (Civil) No 114/2014 in the matter Common Cause vs Union of India, the mining lease holder shall after ceasing mining operations, undertake regrassing the mining area and any other area which may have been disturbed due to other mining activities and restore the land to a condition which is fit for growth of fodder, flora, fauna etc.
1.	Any appeal against this environmental clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.

3.6. Agenda Item No 6:

3.6.1. Details of the proposal

Charuabakra Jungle Block Ordinary Earth Mining Permit Area No-I (Govt. Khas Land) by **BILASIPURA GU WAHATI PRIVATE LIMITED** located at **KAMRUP METRO,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**

SIA/AS/MIN/527287/2025	SEAC/SEIAA.4048/2025	17/03/2025	Mining of minerals (1(a))

3.6.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :05/04/2025

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. Due deliberations and discussions are held.

The Committee is of the considered opinion that the DFO has taken requisite steps to complete the preparation of the final District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG'2016 and EMGSM'2020} and had placed the final DSR for evaluation and appraisal by the SEAC and further approval by the competent authority.

It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the development of infrastructure in progress specially to strengthen the road connectivity in the interior areas of the district and also other developmental works requiring restoration after the ravages of flood in the whole state which is a *sine qua non* for overall development and economic growth of the state while the impact on environment also require due diligence and consideration with proper safeguards. It is further appreciated that the important stakeholders like the Registered Qualified Person (RQP), Geologist from the Department of Geology and Mining, the Forest official, the official from the Revenue Department are actively involved in the process for recommending mining in the area by way of consultation including site inspection before appraisal by the SEAC.

The Committee deem it appropriate to recommend the grant of the EC by the SEIAA allowing extraction of minor mineral for 6 (Six) months only with the quantity of minor mineral measuring 3,720 Cu M of Ordinary Earth.

This is necessitated in view of the process of development works being undertaken by the NHIDCL Work, Govt of India as has been communicated by the concerned competent authority.

Decision: Recommended for grant of EC for **6 (Six) months** only measuring **3,720 Cu M of Ordinary Earth.**

3.6.3. Deliberations by the SEIAA in current meetings

Need to clarify the proposed area located Dhubri or Kamrup (M).

3.6.4. Recommendation of SEIAA

Deferred for ADS

3.7. Agenda Item No 7:

3.7.1. Details of the proposal

Dudhnath Hill Village River Silt Mining Permit Area No-3 (Govt. Khas Land) by **BILASIPURA GUWAHATI P RIVATE LIMITED** located at **DHUBRI,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**

SIA/AS/MIN/527276/2025	SEAC/SEIAA.4047/2025	17/03/2025	Mining of minerals (1(a))

3.7.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :05/04/2025

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. Due deliberations and discussions are held.

The Committee is of the considered opinion that the DFO has taken requisite steps to complete the preparation of the final District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG'2016 and EMGSM'2020} and had placed the final DSR for evaluation and appraisal by the SEAC and further approval by the competent authority.

It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the development of infrastructure in progress specially to strengthen the road connectivity in the interior areas of the district and also other developmental works requiring restoration after the ravages of flood in the whole state which is a *sine qua non* for overall development and economic growth of the state while the impact on environment also require due diligence and consideration with proper safeguards. It is further appreciated that the important stakeholders like the Registered Qualified Person (RQP), Geologist from the Department of Geology and Mining, the Forest official, the official from the Revenue Department are actively involved in the process for recommending mining in the area by way of consultation including site inspection before appraisal by the SEAC.

The Committee deem it appropriate to recommend the grant of the EC by the SEIAA allowing extraction of minor mineral for 1 (one) year only with the quantity of minor mineral measuring 23,760 Cu M of Silt.

This is necessitated in view of the process of development works being undertaken by the **NHIDCL**, a Govt of India Undertaking as has been communicated by the concerned competent authority.

Decision: Recommended for grant of EC for **1 (one) year** for **23,760 Cu M of Silt.**

3.7.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 1.98Ha with a quantity of 11,880Cu M of Silt for 6 (six) months subjected to the terms and conditions laid down by SEAC and that the area in question is to be reflected in the approved final DSR.

3.7.4. Recommendation of SEIAA

Approved

3.7.5. Details of Environment Conditions

3.7.5.1. Specific

General conditions by SEAC	
1.	This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates; (b) the active bank of the river is not disturbed / damaged because of mining operation and

	transportation of mining materials; (c) the Proponent shall extract the approved quantity of minerals indicated herein with maximum mining depth of up to 1(one) meter only from the non-mined surface.
2.	The Orders of the Hon'ble Apex Court, the NGT (Eastern Bench), Kolkata; the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} shall be followed by the Proponent.
3.	This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan;
Specific conditions by SEAC	
1.	Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO.
2.	The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period.
3.	The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan before allowing mining as bounden on the PP.
4.	No mechanized machinery shall be allowed to be used for excavation of mineral from river bed and only on exceptional cases the DFO may permit use of JCB for loading and unloading of mineral in vehicles.
5.	CER activities shall be carried out / undertaken by the Proponent with the total project cost of Rs 1,00,000.00 (One lakh) only, shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the nearby village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 3 (three) months of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report (HCR) as mandated to be uploaded by the project Proponent in terms of the OM No IA3-22/1/2022-IA.III Dated 14.06.2024 in pursuance of the EIA Notification 2006.
6.	Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands adjoining the mining area involving local NGOs, School / College students and an amount of Rs 2.00 (two) Lakh shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. The DFO shall get the same executed / implemented within 3 (three) months of allowing mining in the area and shall upload the reports in PARIVESH 2.0 portal which shall form part of the Half Yearly Compliance Report (HCR) as mandated to be uploaded by the project Proponent in terms of the OM No IA3-22/1/2022-IA.III Dated 14.06.2024 in pursuance of the EIA Notification 2006.

7.	The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Amlokhi (*Phyllanthus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saracaasoca*),Bael (*Aegle marmelos*), Jamun (*Syzygiumcuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpusintegrifolia*), Ow Tenga (*Dilleniaindica*), Thekera (*Garcinia spp*) etc etc.
8.	Half Yearly Compliance Reports (HCR) are mandatory on the part of project Proponent which need to be uploaded on or before 1st June and 1st December of the calendar year in PARIVESH 2.0 portal and no activity shall be permitted by the DFO without HCR.
9.	Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH 2.0 portal.

3.7.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State Pollution Control Board/ Committee.
1.	This Environmental Clearance (EC) is subject to orders/ judgment of Honble Supreme Court of India, Honble High Court, Honble NGT and any other Court of Law, Common Cause Conditions as may be applicable.
Statutory compliance	
1.	A copy of EC letter will be marked to concerned Panchayat / local NGO etc. if any, from whom suggestion / representation has been received while processing the proposal.
1.	The Project Proponent shall inform the MoEF&CC for any change in ownership of the mining lease. In case there is any change in ownership or mining lease is transferred. PP needs to apply for transfer of EC as per provisions of the para 11 of EIA Notification, 2006 as amended from time to time.
1.	The Project proponent complies with all the statutory requirements and judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India &Ors before commencing the mining operations.
1.	State Pollution Control Board/Committee shall be responsible for display of this EC letter at its Regional office, District Industries Centre and Collector's office/ Tehsildar's Office for 30 days.
1.	The State Government concerned shall ensure that mining operation shall not be commenced till the entire compensation levied, if any, for illegal mining paid by the Project Proponent through their respective Department of Mining & Geology in strict compliance of Judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India & Ors.
1.	The Project Proponent shall follow the mitigation measures provided in MoEFCC's Office Memorandum No. Z-11013/57/2014-IA.II (M), dated 29th October, 2014, titled "Impact of mining activities on Habitations-Issues related to the mining Projects wherein Habitations and villages are the part of mine lease areas or Habitations and villages are surrounded by the mine lease area."

Air quality monitoring and preservation	
1.	The project proponent use leak proof trucks/dumpers carrying ore and other raw materials and cover them with tarpaulin.
1.	The project proponent shall submit monthly summary report of continuous stack emission and air quality monitoring and results of manual stack monitoring and manual monitoring of air quality /fugitive emissions to Regional Office of MoEF&CC, Zonal office of CPCB and Regional Office of SPCB along with six-monthly monitoring report.
1.	Design the ventilation system for adequate air changes as per ACGIH document for all tunnels, motor houses, Oil Cellars.
Air quality monitoring and preservation	
1.	Appropriate Air Pollution Control (APC) system shall be provided for all the dust generating points including fugitive dust from all vulnerable sources, so as to comply prescribed stack emission and fugitive emission standards.
Air quality monitoring and preservation	
1.	Effective safeguard measures for prevention of dust generation and subsequent suppression (like regular water sprinkling, metalled road construction etc.) shall be carried out in areas prone to air pollution wherein high levels of PM10 and PM2.5 are evident such as haul road, loading and unloading point and transfer points. The Fugitive dust emissions from all sources shall be regularly controlled by installation of required equipments/ machineries and preventive maintenance. Use of suitable water-soluble chemical dust suppressing agents may be explored for better effectiveness of dust control system. It shall be ensured that air pollution level conform to the standards prescribed by the MoEFCC/ Central Pollution Control Board.
Water quality monitoring and preservation	
1.	Project Proponent shall regularly monitor and maintain records w.r.t. ground water level and quality in and around the mine lease by establishing a network of existing wells as well as new piezo-meter installations during the mining operation in consultation with Central Ground Water Authority/ State Ground Water Department. The Report on changes in Ground water level and quality shall be submitted on six-monthly basis to the Regional Office of the Ministry, CGWA and State Groundwater Department / State Pollution Control Board.
Water quality monitoring and preservation	
1.	In case, immediate mining scheme envisages intersection of ground water table, then Environmental Clearance shall become operational only after receiving formal clearance from CGWA. In case, mining operation involves intersection of ground water table at a later stage, then PP shall ensure that prior approval from CGWA and MoEFCC is in place before such mining operations. The permission for intersection of ground water table shall essentially be based on detailed hydro-geological study of the area.
1.	The Project Proponent shall undertake regular monitoring of natural water course/ water resources/ springs and perennial nallahs existing/ flowing in and around the mine lease including upstream and downstream. Sufficient number of gullies shall be provided at appropriate places within the lease for management of water. The parameters to be monitored shall include their water quality vis-à-vis suitability for usage as per CPCB criteria and flow rate. It shall be ensured that no obstruction and/ or alteration be made to water bodies during mining operations without justification and prior approval of MoEFCC. The monitoring of water courses/ bodies existing in lease area shall be carried out four times in a year viz. pre- monsoon (April May), monsoon (August), post-monsoon (November) and winter (January) and the record of monitored data may be sent regularly to Ministry of Environment, Forest and Climate Change and its Regional Office, Central Ground Water Authority and Regional Director, Central Ground Water Board, State Pollution Control Board and Central Pollution Control Board. Clearly showing the trend analysis on six-monthly basis.
Noise and vibration monitoring and prevention	

1.	The peak particle velocity at 500m distance or within the nearest habitation, whichever is closer shall be monitored periodically as per applicable DGMS guidelines.
Noise monitoring and prevention	
1.	Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six-monthly compliance report.
Noise and vibration monitoring and prevention	
1.	The Project Proponent shall take measures for control of noise levels below 85 dBA in the work environment. The workers engaged in operations of HEMM, etc. should be provided with ear plugs /muffs. All personnel including laborers working in dusty areas shall be provided with protective respiratory devices along with adequate training, awareness and information on safety and health aspects. The PP shall be held responsible in case it has been found that workers/ personals/ laborers are working without personal protective equipment.
Mining plan	
1.	The Project Proponent shall adhere to approved mining plan, inter alia, including, total excavation (quantum of mineral, waste, over burden, inter burden and top soil etc.); mining technology; lease area; scope of working (method of mining, overburden & dump management, O.B& dump mining, mineral transportation mode, ultimate depth of mining, concurrent reclamation and reclamation at mine closure; land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life; etc.).
Mining plan	
1.	The land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life shall be governed as per the approved Mining Plan. The excavation vis-à-vis backfilling in the mine lease area and corresponding afforestation to be raised in the reclaimed area shall be governed as per approved mining plan. PP shall ensure the monitoring and management of rehabilitated areas until the vegetation becomes self-sustaining. The compliance status shall be submitted half-yearly to the MoEFCC and its concerned Regional Office.
Waste management	
1.	The waste oil, grease and other hazardous waste shall be disposed of as per the Hazardous & Other waste (Management & Transboundary Movement) Rules, 2016.
1.	Kitchen waste shall be composted or converted to biogas for further use.(to be decided on case to case basis depending on type and size of plant)
Land reclamation	
1.	Check dams of appropriate size, gradient and length shall be constructed around mine pit and OB dumps to prevent storm run-off and sediment flow into adjoining water bodies. A safety margin of 50% shall be kept for designing of sump structures over and above peak rainfall (based on 50 years data) and maximum discharge in the mine and its adjoining area which shall also help in providing adequate retention time period thereby allowing proper settling of sediments/ silt material. The sedimentation pits/ sumps shall be constructed at the corners of the garland drains.
Land reclamation	
1.	The Overburden (O.B.), waste and topsoil generated during the mining operations shall be stacked at earmarked OB dump site(s) only and it should not be kept active for a long period of time. The physical parameters of the OB / waste dumps / topsoil dump like height, width and angle of slope shall be governed as per the approved Mining Plan and the guidelines/circulars issued by D.G.M.S. The topsoil shall be used for land reclamation and plantation.

1.	The slope of dumps shall be vegetated in scientific manner with suitable native species to maintain the slope stability, prevent erosion and surface run off. The selection of local species regulates local climatic parameters and help in adaptation of plant species to the microclimate. The gullies formed on slopes should be adequately taken care of as it impacts the overall stability of dumps. The dump mass should be consolidated with the help of dozer/ compactors thereby ensuring proper filling/ leveling of dump mass. In critical areas, use of geo textiles/ geo-membranes / clay liners / Bentonite etc. shall be undertaken for stabilization of the dump.
Green Belt and EMP	
1.	The project proponent shall prepare GHG emissions inventory for the plant and shall submit the programme for reduction of the same including carbon sequestration including plantation.
Transportation	
1.	No Transportation of the minerals shall be allowed in case of roads passing through villages/ habitations. In such cases, PP shall construct a 'bypass' road for the purpose of transportation of the minerals leaving an adequate gap (say at least 200 meters) so that the adverse impact of sound and dust along with chances of accidents could be mitigated. All costs resulting from widening and strengthening of existing public road network shall be borne by the PP in consultation with nodal State Govt. Department. Transportation of minerals through road movement in case of existing village/ rural roads shall be allowed in consultation with nodal State Govt. Department only after required strengthening such that the carrying capacity of roads is increased to handle the traffic load. The pollution due to transportation load on the environment will be effectively controlled and water sprinkling will also be done regularly. Vehicular emissions shall be kept under control and regularly monitored. Project should obtain Pollution Under Control (PUC) certificate for all the vehicles from authorized pollution testing centers. [If applicable in case of road transport].
Public hearing and Human health issues	
1.	Occupational health surveillance of the workers shall be done on a regular basis and records maintained as per the Factories Act.
1.	The project proponent shall carry out heat stress analysis for the workmen who work in high temperature work zone and provide Personal Protection Equipment (PPE) as per the norms of Factory Act.
Public hearing and Human health issues	
1.	Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, creche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.
Green Belt	
1.	The Project Proponent shall develop greenbelt in 7.5m wide safety zone all along the mine lease boundary as per the guidelines of CPCB in order to arrest pollution emanating from mining operations within the lease. The whole Green belt shall be developed within first 5 years starting from windward side of the active mining area. The development of greenbelt shall be governed as per the EC granted by the Ministry irrespective of the stipulation made in approved mine plan.
Corporate Environment Responsibility	
1.	Self-environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Corporate Environment Responsibility	
1.	All the recommendations made in the Charter on Corporate Responsibility for Environment Protection (CREP) for the Mineral Beneficiation plants shall be implemented.

Corporate Environment Responsibility	
1.	The Project Proponent shall submit the time- bound action plan to the concerned regional office of the Ministry within 6 months from the date of issuance of environmental clearance for undertaking the activities committed during public consultation by the project proponent and as discussed by the EAC, in terms of the provisions of the MoEF&CC Office Memorandum No.22-65/2017-IA.III dated 30 September, 2020. The action plan shall be implemented within three years of commencement of the project.
1.	Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the Six Monthly Compliance Report.
Miscellaneous	
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	The Ministry or any other competent authority may alter/modify the above conditions or stipulate any further condition in the interest of environment protection.
1.	The Project Authorities should inform to the Regional Office regarding date of financial closures and final approval of the project by the concerned authorities and the date of start of land development work.
1.	Concealing factual data failure to comply with any or submission of false/ fabricated data and of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act, 1986.
1.	The above conditions will be enforced inter-alia, under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986 and the Public Liability Insurance Act, 1991 along with their amendments and rules made there under and also any other orders passed by the Hon'ble Supreme Court of India/High Court and any other Court of Law relating to the subject matter.
Miscellaneous	
1.	The project proponent shall monitor the criteria pollutants level namely; PM10, S02, NOx (ambient levels as well as stack emissions) or critical sectoral parameters, indicated for the projects and display the same at a convenient location for disclosure to the public and put on the website of the company.
1.	The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.
Miscellaneous	
1.	The project proponent shall abide by all the commitments and recommendations made in the EIA/EMP report, commitment made during Public Hearing and also that during their presentation to the Expert Appraisal Committee.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	44) The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.

1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	Any appeal against this environmental clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.
1.	In pursuant to Ministrys O.M No 22-34/2018-IA.III dated 16.01.2020 to comply with the direction made by Honble Supreme Court on 8.01.2020 in W.P. (Civil) No 114/2014 in the matter Common Cause vs Union of India, the mining lease holder shall after ceasing mining operations, undertake regrassing the mining area and any other area which may have been disturbed due to other mining activities and restore the land to a condition which is fit for growth of fodder, flora, fauna etc.
1.	The Project Proponent shall prepare digital map (land use & land cover) of the entire lease area once in five years purpose of monitoring land use pattern and submit a report to concerned Regional Office of the MoEF&CC.
1.	The concerned Regional Office of the MoEF&CC shall randomly monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the MoEF&CC officer(s) by furnishing the requisite data / information / monitoring reports.

3.8. Agenda Item No 8:

3.8.1. Details of the proposal

SAND GRAVEL AND BOULDER MINING PERMIT AREA AT DIKRENGMA AREA OF DIYUNG RIVER by **dima hasao forest division(west)** located at **DIMA HASAO,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/525850/2025	SEAC/SEIAA.4021/2025	26/02/2025	Mining of minerals (1(a))

3.8.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :07/03/2025

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized.

Due deliberations and discussions are held. The Committee is of the opinion that the DFO has taken requisite steps to complete the preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} and placed the same for appraisal and final approval by the competent authority. It is pertinent to mention that *Evaluation* and *Appraisal* of the final DSR for the district has already been done by the SEAC & SEIAA, Assam.

It is revealed that the instant proposal is not included in the approved DSR of the district showing the quantity allotted for mining. Further, the approved copy of the DSR for the district is yet to be placed in public domain as required by the competent authority and the SEAC urge the DFO to do the needful immediately. In view of the above scenario the Committee is of the opinion that the DFO shall make a presentation of the same after inclusion of the instant proposal in the district DSR with the permissible quantity of minor minerals in question in terms of the guidelines followed.

It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the development of infrastructure in progress specially to strengthen the road connectivity in the remote and interior areas of the district and also other developmental works requiring urgent restoration after the ravages of flash flood in the whole district disrupting connectivity with rest part of the state and also vital link with neighbouring state which is a *sine qua non* for overall development and economic growth of the state while the impact on environment also require due diligence and consideration with proper safeguards. It is further appreciated that the important stakeholders like the Registered Qualified Person (RQP), Geologist from the Department of Geology and Mining, the Forest official, the official from the Water Resource Department are actively involved in the process for recommending mining in the area by way of consultation including site inspection before appraisal by the SEAC.

The Committee deem it appropriate to recommend the grant of the EC by the SEIAA allowing extraction of minor mineral for 1(one) year, as recommended in the mining plan, with the quantity measuring **15,000 Cu M** of **Sand-Gravel** and **10,000 CuM** of **Boulder** with an observation that the DFOshall submit the approved DSR from the competent authority for further consideration of the balance quantity for the project allowing mining within a period of 3 (three) months and to ensure that the area in question is accordingly reflected in the final DSR.

Decision: Recommended for grant of EC for **1 (one)** year only for **15,000 Cu M** of **Sand-Gravel** and **10,000 CuM** of **Boulder** mineral.

Date of SEIAA 2 :25/03/2025

Deliberations of SEIAA 2 :

As the Area is not reflected in the Approved DSR, kindly re-examined the proposal.

Date of SEAC 3 :05/04/2025

Deliberations of SEAC 3 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. Due deliberations and discussions are held. The Committee is of the opinion that the DFO has taken requisite steps to complete the preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} and placed the same for appraisal and final approval by the competent authority.

It is pertinent to mention that Evaluation and Appraisal of the final DSR for the district has already been done by the SEAC & SEIAA, Assam. It is revealed that the instant proposal is not included in the approved DSR of the district showing the quantity allotted for mining. Further, the approved copy of the DSR for the district is yet to be placed in public domain as required by the competent authority and the SEAC urge the DFO to do the needful immediately. In view of the above scenario the Committee is of the opinion that the DFO shall make a presentation of the same after inclusion of the instant proposal in the district DSR with the permissible quantity of minor minerals in question in terms of the guidelines followed. It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the development of infrastructure in progress specially to strengthen the road connectivity in the remote and interior areas of the district and also other developmental works requiring urgent restoration after the ravages of flash flood in the whole district disrupting connectivity with rest part of the state and also vital link with neighbouring state which is a sine qua non for overall development and economic growth of the state while the impact on environment also require due diligence and consideration with proper safeguards. It is further appreciated that the important stakeholders like the Registered Qualified Person (RQP), Geologist from the Department of Geology and Mining, the Forest official, the official from the Water Resource Department are actively involved in the process for recommending mining in the area by way of consultation including site inspection before appraisal by the SEAC.

The Committee deem it appropriate to recommend the grant of the EC by the SEIAA allowing extraction of minor mineral for 1(one) year, as recommended in the mining plan, with the quantity measuring 15,000 Cu M of Sand-Gravel and 10,000 CuM of Boulder with an observation that the DFO shall submit the approved DSR from the competent authority for further consideration of the balance quantity for the project allowing mining within a period of 3 (three) months and to ensure that the area in question is accordingly reflected in the final DSR.

Decision:

Recommended for grant of EC for 1 (one) year only for 1**5,000 Cu M** of Sand-Gravel and **10,000 Cu M** of Boulder mineral.

3.8.3. Deliberations by the SEIAA in current meetings

As per the Notification no S.O. 3611 (E) dated 25th July, 2018 proposal is refer-back to SEAC.

3.8.4. Recommendation of SEIAA

Refer-Back to SEAC for Reconsideration

3.9. Agenda Item No 9:

3.9.1. Details of the proposal

1 NO TEGHERIA VILLAGE ORDINARY EARTH MINING PERMIT AREA by **MRIDUL BORO** located at **K AMRUP METRO,ASSAM**

Proposal For		Application for Validity Extension of EC- Form-6	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/516039/2025	SEAC/SEIAA.4042/2025	06/03/2025	Mining of minerals (1(a))

3.9.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :05/04/2025

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized and found correct. Due deliberations and discussions are held.

The Committee found that as the Mining Plan is expiring on **28.04.2025**, the project Proponent has to come for a proposal with re validated Mining Plan approved by the DGM.

The Committee deem it appropriate not to recommend the grant of the EC by the SEIAA.

Decision: Not recommended for extension of EC.

3.9.3. Deliberations by the SEIAA in current meetings

EC is rejected as SEAC has not recommended.

3.9.4. Recommendation of SEIAA

Reject

3.10. Agenda Item No 10:

3.10.1. Details of the proposal

Onshore Oil & Gas Exploration Drilling & Testing in OALP Block AA-ONHP-2017/12 under Tinsukia District i n the State of Assam. by **OIL INDIA LIMITED** located at **TINSUKIA,ASSAM**

Proposal For		Fresh EC	
Proposal No	**File No**	**Submission D ate**	**Activity (Schedule Item)**
SIA/AS/IND2/517970/2025	SEAC/SEIAA.4039/2025	11/03/2025	Off-shore and onshore oil and gas exploration, dev elopment and production (1(b))

3.10.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :05/04/2025

Deliberations of SEAC 1 :

The proposal requesting grant of EC for **Onshore Oil & Gas Exploration Drilling & Testing in OALP Block AA-ONHP-2017/12** is placed before the Hon'ble Committee for appraisal and deliberation. The proposal is submitted for the EC in respect of the location **OWMA** along with the project brief, EMP, Land use and land cover map of the location including other requisite documents submitted for further necessary action. Scrutinized the documents submitted by the project Proponent in support of the proposal. Senior Officers of Oil India Limited representing the project Proponent has made the detailed presentation with clarification as to the status as on date about the project at hand.

The Proponent, OIL has subsequently submitted the following documents vide letter dated **11.04.2025.**

1. Request letter to DFO, Doomdooma Division vide letter dated **11.04.2025** to provide aerial distance of proposed drilling location from the nearest NP/ WLS/ESZ or any protected area.
2. Jamabandi copy of Land for Patta no 220, 221 and 222 is submitted.

As the area is falling under non forest i.e PP land, the land acquisition by the Proponent is required to be submitted in due course.

Undertaking of land purchase by OIL dated 9.01.2025 is uploaded.

The PP has informed that after completion of the land procurement process, OIL will provide all relevant details of the acquired land, including ownership documents and other necessary information, to the competent authority as required under the applicable rules and regulations.

Decision:

After due deliberation, discussion and due diligence in the matter the Committee is of the considered opinion that EC be granted for the Well location "**OWMA"** subject to **submission of the required Land documents** in due course after completion due formalities and shall comply with specific conditions as prescribed by the SEAC**.**

Recommendation: Recommended for **grant of the EC for well location "OWMA",** falling in the Non Forest Patta land.

3.10.3. Deliberations by the SEIAA in current meetings

EC is approved for well location "OWMA", for Onshore Oil & Gas Exploration Drilling & Testing in OALP Block AA-ONHP-2017/12 under Tinsukia District in the State of Assam GPS location of the Well is 27°31'40.68"N, 95°38'15.04"E. **As the location of the Project OWMA is falling in the Revenue land the EC is approved subject to submission of the land acquisition**.

3.10.4. Recommendation of SEIAA

Approved

3.10.5. Details of Environment Conditions

3.10.5.1. Specific

SPECIFIC CONDITIONS BY SEAC	
1.	CER activities shall be carried out in terms of the approved EMP and compliance of the same shall be uploaded in the PARIVESH 2.0 portal. CER (Corporate Environment Responsibility):

	Green Belt: The proponent shall develop Green Belt around the Wells comprising 10% of the area of the project area and shall ensure planting of indigenous species of plants as are prescribed. For the purpose, the concerned DFO may be consulted to have the quality planting materials ready in advance in the Departmental Nursery and requisite fund for the purpose should be made available to the DFO in advance for raising of minimum of 1,500 poly-pot saplings.
2.	The recommended species of plants in the area could be of species like Nahor (*Mesua ferrea*), Siris (*Albizzia procera*), Hollock (*Terminalia myriocarpa*), Amlokhi (*Phyllanthusemblica*), Hilikha (*Terminalia chebula*),Jamun (*Syzygiumcuminii*), Cham (*Artocarpus chaplasha*), Dimaru (*Ficus spp*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*), Bhomora (*Terminalia bellirica*) etc etc. Density of plantations shall be 1,250 plants per Hectare and the Proponent is required to raise plantations covering an area measuring 33% of the project area against the Well as prescribed.
3.	To cover the prescribed area under plantation, educational institution, Govt lands around the project area may be selected and local NGOs, Students, Villagers may be involved in plantation activities and the preferred species of plants may be fruit bearing, of medicinal value and aesthetic in nature.
4.	The proponent shall take all requisite measures to maintain natural environment in the oil fields and its surroundings are to be maintained in healthy and environment friendly conditions. All necessary measures and precautions must have to be taken by the proponent to prevent any probable / random oil spillage, discharge of effluents in the surroundings.
5.	As a part of the CER activity the Proponent shall undertake to provide a vehicle as may be suitable for carriage of corpse to cremation ground in a prominent populous city of Assam, coined as *Swarga Rath,* for use by the marginal people, deceased family in distress.
6.	Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.10.5.2. Standard

1(b)	**Off-shore and onshore oil and gas exploration, development and production**
Specific Conditions	
1.	The company shall comply with all the environmental protection measures and safeguards proposed in the documents submitted to the Ministry. All the recommendations made in the EIA/EMP in respect of environmental management, and risk mitigation measures relating to the project shall be implemented.
1.	No pipelines or its part shall be laid in the Forest land/Protected Area without prior permission/approval from the Competent Authority.
1.	Total fresh water requirement shall not exceed 39 m3/day will be met from groundwater. Prior permission shall be obtained from the concerned regulatory authority.
1.	The project proponent will treat and reuse the treated water within the factory and no waste or treated water shall be discharged outside the premises. Mobile ETP coupled with RO shall be installed to reuse the treated water in drilling system. Size of the waste shall be equal to the hole volume+ volume of drill cutting and volume of discarded mud if any. Two feet free board may be left to accommodate rain water. There shall be separate storm water channel and rain water shall not be allowed to mix with waste water. Alternatively, if possible pit less drilling be practiced instead of above.

1.	During production, storage and handling, the fugitive emission of methane, if any, shall be monitored using Infra-red camera/ appropriate technology.
1.	The project proponent also to ensure trapping/storing of the CO2 generated, if any, during the process and handling.
1.	Approach road shall be made pucca to minimize generation of suspended dust.
1.	The project proponent shall make all arrangements for control of noise from the drilling activity. Acoustic enclosure shall be provided for the DG sets along with the adequate stack height as per CPCB guidelines.
1.	The company shall construct the garland drain to prevent runoff of any oil containing waste into the nearby water bodies. Separate drainage system shall be created for oil contaminated and non-oil contaminated.
1.	Drill cuttings separated from drilling fluid shall be adequately washed and disposed in HDPE lined pit. Waste mud shall be tested for hazardous contaminants and disposed according to HWMH Rules, 2016. No effluent/drilling mud shall be discharged/disposed off into nearby surface water bodies. The company shall comply with the guidelines for disposal of solid waste, drill cutting and drilling fluids for onshore drilling operation notified vide GSR.546(E) dated 30th August, 2005.
1.	Oil spillage prevention and mitigation scheme shall be prepared. In case of oil spillage/ contamination, action plan shall be prepared to clean the site by adopting proven technology. The recyclable waste (oily sludge) and spent oil shall be disposed of to the authorized recyclers.
1.	The project proponent shall take necessary measures to prevent fire hazards, containing oil spill and soil remediation as needed. At fixed installations or plants use of ground flare shall be explored. At the place of ground flaring, the overhead flaring stack with knockout drums shall be installed to minimize gaseous emissions during operation.
1.	The project proponent shall develop a contingency plan for H2S release including all necessary aspects from evacuation to resumption of normal operations. The workers shall be provided with personal H2S detectors in locations of high risk of exposure along with self-containing breathing apparatus.
1.	Blow Out Preventer system shall be installed to prevent well blowouts during drilling operations.
1.	On completion of the project, necessary measures shall be taken for safe plugging of wells with secured enclosures to restore the drilling site to the original condition. The same shall be confirmed by the concerned regulatory authority from environment safety angle. In case of hydrocarbon not found economically viable, a full abandonment plan shall be implemented for the drilling site in accordance with the applicable DGH / Indian Petroleum Regulations.
1.	As per the Ministry's OM dated 30.09.2020 superseding the OM dated 01.05.2018 regarding the Corporate Environmental Responsibility, and as per the action plan proposed by the project proponent to address the socio-economic and environmental issues in the study area, the project proponent, as committed, shall provide education funds in technical training centers/ support in nearby village's schools, support in health care facilities, drinking water supply and funds for miscellaneous activities like solar street lights, battery, solar panel etc., in the nearby villages. The action plan shall to be completed within time as proposed.
1.	No lead acid batteries shall be utilized in the project/site.
1.	Occupational health surveillance of the workers shall be carried out as per the prevailing Acts and Rules. All workers & employees shall be provided with required safety kits/mask for personal protection.
1.	Oil content in the drill cuttings shall be monitored and report & shall sent to the Ministry's Regional Office.
1.	The project proponent shall prepare operating manual in respect of all activities, which would cover all safety & environment related issues and measures to be taken for protection. One set of environmental manual shall be

	made available at the drilling site/ project site. Awareness shall be created at each level of the management. All the schedules and results of environmental monitoring shall be available at the project site office. Remote monitoring of site should be done.
1.	PP shall sensitize and create awareness among the people working within the project area as well as its surrounding area on the ban of Single Use Plastic in order to ensure the compliance of Notification published by MOEFCC on 12th August, 2021. A report along with photographs on the measures taken shall also be included in the six-monthly compliance report being submitted to concerned authority.
General Conditions	
1.	No further expansion or modifications in the plant, other than mentioned in the EIA Notification, 2006 and its amendments, shall be carried out without prior approval of the Ministry of Environment, Forest and Climate Change/SEIAA, as applicable. In case of deviations or alterations in the project proposal from those submitted to this Ministry for clearance, a fresh reference shall be made to the Ministry/SEIAA, as applicable, to assess the adequacy of conditions imposed and to add additional environmental protection measures required, if any.
1.	The energy source for lighting purpose shall be preferably LED based, or advanced having preference in energy conservation and environment betterment.
1.	The overall noise levels in and around the plant area shall be kept well within the standards by providing noise control measures including acoustic hoods, silencers, enclosures etc. on all sources of noise generation. The ambient noise levels shall conform to the standards prescribed under the Environment (Protection) Act, 1986 Rules, 1989 viz. 75 dBA (day time) and 70 dBA (night time).
1.	The company shall undertake all relevant measures for improving the socio-economic conditions of the surrounding area. CER activities shall be undertaken by involving local villages and administration and shall be implemented. The company shall undertake eco-developmental measures including community welfare measures in the project area for the overall improvement of the environment.
1.	The company shall earmark sufficient funds towards capital cost and recurring cost per annum to implement the conditions stipulated by the Ministry of Environment, Forest and Climate Change as well as the State Government along with the implementation schedule for all the conditions stipulated herein. The funds so earmarked for environment management/ pollution control measures shall not be diverted for any other purpose.
1.	A copy of the clearance letter shall be sent by the project proponent to concerned Panchayat, Zilla Parishad/Municipal Corporation, Urban local Body and the local NGO, if any, from whom suggestions/ representations, if any, were received while processing the proposal.
1.	The project proponent shall also submit six monthly reports on the status of compliance of the stipulated Environmental Clearance conditions including results of monitored data (both in hard copies as well as by e-mail) to the respective Regional Office of MoEF&CC, the respective Zonal Office of CPCB and SPCB. A copy of Environmental Clearance and six monthly compliance status report shall be posted on the website of the company.
1.	The environmental statement for each financial year ending 31st March in Form-V as is mandated shall be submitted to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently, shall also be put on the website of the company along with the status of compliance of environmental clearance conditions and shall also be sent to the respective Regional Offices of MoEF&CC by e-mail.
1.	The project proponent shall inform the public that the project has been accorded environmental clearance by the Ministry and copies of the clearance letter are available with the SPCB/Committee and may also be seen at Website of the Ministry and at https://parivesh.nic.in/. This shall be advertised within seven days from the date of issue of the clearance letter, at least in two local newspapers that are widely circulated in the region of which one shall be in the vernacular language of the locality concerned and a copy of the same shall be forwarded to the concerned Regional Office of the Ministry.
1.	The project authorities shall inform the Regional Office as well as the Ministry, the date of financial closure and

	final approval of the project by the concerned authorities and the date of start of the project.
1.	This Environmental clearance is granted subject to final outcome of Hon'ble Supreme Court of India, Hon'ble High Court, Hon'ble NGT and any other Court of Law, if any, as may be applicable to this project.
NBWL Conditions	
1.	The environmental clearance is subject to obtaining prior clearance from the wildlife angle, including clearance from the Standing Committee of the National Board for Wildlife, as applicable, as per the Ministry's OM dated 8th August, 2019. Grant of environmental clearance does not necessarily imply that Wildlife Clearance shall be granted to the project and that their proposal for Wildlife Clearance will be considered by the respective authorities on its merit and decision taken. PP shall also strictly follow the conditions mentioned in existing NBWL clearance.
1.	The project proponent shall prepare a site specific conservation plan and wildlife management plan in case of the presence of Schedule-1 species in the study area, as applicable to the project, and submit to Chief Wildlife Warden for approval. The recommendations shall be implemented in consultation with the State Forest/Wildlife Department in a time bound manner.

3.11. Agenda Item No 11:

3.11.1. Details of the proposal

Common Bio-Medical Waste Treatment Facility at Dhing Industrial Estate, Dhing, Nagaon, Assam by M/s Fresh Air Waste Management Services Pvt. Ltd. by **FRESH AIR WASTE MANAGEMENT SERVICES PRIVATE LI MITED** located at **NAGAON,ASSAM**

Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/INFRA2/524738/2025	SEAC/SEIAA. 3859/2024	12/03/2025	Bio-Medical Waste Treatment Facilities (7(da))

3.11.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :05/04/2025

Deliberations of SEAC 1 :

All connected documents are placed before the Committee for scrutiny, discussion and deliberation. The Consent to Establish (CTE) is already granted by the PCB, Assam on19.08.2024for the Project with its validity for 5 (five) years. The relevant documents as uploaded are the Pre Feasibility Report (PFR), Final EIA Report, Executive summary; Land documents etc. Land allotment letter from AIDCL dated **31.08.2024** for a period of **60 years** is uploaded. Lease agreement dated **02.05.2024** between AIDC and M/s Fresh Air Waste Management Services Pvt Ltd is uploaded.

Correspondence from AIDC dated **01.04.2024** regarding handing over of land measuring **2025 Sq.m**, Letter to the DC, Nagaon from AIDC dated **13.05.2024**, Letter of AIDC to the Proponent dated **12.07.2024** for In Principle allotment Approval of land is attached in the EIA Report and uploaded.

Presentation was made by the Accredited Consultant M/S Shivalik Solid Waste Management Limited in presence of the authorized representative of the Company including the applicant Shri Partha Pratim Pathak**,** Director, M/s Fresh Air Waste Management Services Pvt. Ltd. As the location is at Dhing Industrial Estate, Public Hearing (PH) is exempted for the proposed project as per EIA Notification 2006.

Standard Terms of Reference (ToR) was granted by the SEAC vide proposal number **SIA/AS/INFRA2/486743/2024**, dated 11.09.2024. Point wise ToR Compliance is uploaded with the EIA Report.

Recommendation: The Committee is of the considered opinion to recommend issue of the EC by the SEIAA to the project Proponent with the **Special Conditions as below** in the EC and the copy of the EC also be marked to the **DFO, Nagaon S F Division**, the **District Commissioner, Nagaon**.

3.11.3. Deliberations by the SEIAA in current meetings

EC is approved for Common Bio-Medical Waste Treatment Facility at Dhing Industrial Estate, Dhing, District: Nagaon, Assam by M/s Fresh Air Waste Management Services Pvt. Ltd.

3.11.4. Recommendation of SEIAA

Approved

3.11.5. Details of Environment Conditions

3.11.5.1. Specific

SPECIAL CONDITIONS BY SEAC	
1.	Upon hearing the party and due deliberation the Committee deemed it appropriate to invoke certain conditions in the EC as under: 1) For development of Green Belt around the area the plant species should be tolerant to the air pollution in the area and should invariably be given priority. Preferred plant species, so suitable for the area shall be Safed Siris (*Albizzia procera*), Kadam (*Neolamarckia cadamba*), Ow tenga *(Dillenia indica*), Thekera (*Garcinia morella*), Bor Thekera (*Garcinia pedunculata*), Cham (*Artocarpus chaplasha*), Bot gos (*Ficus benjamina*), Uriam (*Bischofia javanica*), Chatiana (*Alstonia scholaris*), Hilikha (*Terminalia chebula*), Leteku (*Baccaurea rammiflora*), Bakul (M*imosups elengi*), Nahor (*Mesusa ferrea*), Titasopa (*Michelia champaca*) etc etc. This shall also be in addition to the local and endemic species of broad leaved evergreen plants which need to be considered for the purposes.
2.	Numbers of plants around the periphery of the plot of land should not be less than 400 which should be planted with due consultation with the DFO, Social Forestry Division, Nagaon.

3.	Use of Green Energy around the Project area as proposed installing Solar lights, LED bulbs, development of adequate drainage networks with the estimated Capital Cost of Rs 19 Lakh and with recurring cost of Rs 5.5 Lakh annually.
4.	The Company shall tie up with the AEGCL for the CNG under guidance and advice of the PCB to discard use of Fuel wood, Coal etc.
5.	Environment Management Plan (EMP) is required to ensure support by way of livelihood generation to nearby community residing in villages, undertaking skill development programme for the deserving youths etc.
6.	The EMP budget with the Capital cost of Rs 19 Lakh and recurring annual expenditure of Rs 5.5 Lakh shall be spent on the activities as approved and shall not be diverted for any other purposes.
7.	Efforts may be made by the PCB, Assam with appropriate direction at all levels to have a fair networking and tracking of all the generated hazardous and domestic hazardous wastes covering the districts of upper Assam. All the Biomedical Waste materials should invariably be routed through pre-processing facility upcoming at Common Bio-Medical Waste Treatment Facility at Dhing Industrial Estate, Nagaon, Assam.
8.	All the Health care facilities/ pathological laboratories etc falling under the jurisdiction of the facility should also avail and become a member of the Common Biomedical Waste Treatment facility and ensure the categorization of the Wastes as per the Bio-Medical Waste Management Rules, 2016 and ensured that the same be properly stored, transported to the facility for its timely and scientific treatment including its timely disposal.
9.	Under the proposed CER activities containing the details with the proposed targets in physical terms showing financial expenditures as are reflected and approved for each year, keeping in view the public demand / requirement are to be fulfilled, for the 1st 3 years with the allocated budgetary provision of Rs 7.6 Lakh without any deviation which need to be uploaded in the PARIVESH portal as a Half Yearly Compliance Report.
10.	The company shall facilitate installation of the requirement of at least 25 Bio toilets on priority through the PWD, Assam nearby the project area for use by the common people which shall be a part of the CER activity and shall be uploaded in the portal as a part of the HCR.
11.	It shall be bounden on the project Proponent to upload the Half Yearly Compliance Report (HCR) in terms of the guidelines circulated under OM No. IA3-22/1/2022-IA.III Dated 14.06.2024 by the ministry in the MoEF & CC, GoI.

3.11.5.2. Standard

7(da)	**Bio-Medical Waste Treatment Facilities**
Statutory compliance	
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1980, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.

1.	The project proponent shall prepare a Site-Specific Conservation Plan & Wildlife Management Plan and approved by the Chief Wildlife Warden. The recommendations of the approved Site-Specific Conservation Plan/Wildlife Management Plan shall be implemented in consultation with the State Forest Department. The implementation report shall be furnished along with the six-monthly compliance report (in case of the presence of schedule-I species in the study area)
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State Pollution Control Board/ Committee.
1.	Transportation and handling of Bio-medical Wastes shall be as per the Bio-Medical Waste Management Rules, 2016 including the section 129 to 137 of Central Motor Vehicle Rules 1989.
1.	Project shall fulfill all the provisions of Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 including collection and transportation design etc. and also guidelines for Common Hazardous Waste Incineration - 2005, issued by CPCB Guidelines of CPCB/MPPCB for Bio-medical Waste Common Hazardous Wastes incinerators shall be followed.
1.	The project proponent shall obtain the necessary permission from the Central Ground Water Authority, in case of drawl of ground water / from the competent authority concerned in case of drawl of surface water required for the project.
1.	A certificate of adequacy of available power from the agency supplying power to the project along with the load allowed for the project should be obtained.
1.	All other statutory clearances such as the approvals for storage of diesel from Chief Controller of Explosives, Fire Department, Civil Aviation Department shall be obtained, as applicable by project proponents from the respective competent authorities
Air quality monitoring and preservation	
1.	The project proponent shall install emission monitoring system including Dioxin and furans to monitor stack emission with respect to standards prescribed in Environment (Protection) Rules 1986 and connected to SPCB and CPCB online servers and calibrate these systems from time to time according to equipment supplier specification through labs recognised under Environment (Protection) Act, 1986 or NABL accredited laboratories.
1.	Periodical air quality monitoring in and around the site including VOC, HC shall be carried out.
1.	Incineration plants shall be operated (combustion chambers) with such temperature, retention time and turbulence, so as to achieve Total Organic Carbon (TOC) content in the slag and bottom ashes less than 3%, or their loss on ignition is less than 5% of the dry weight of the material.
1.	Venturi scrubber (alkaline) should be provided with the incinerator with stack of adequate height (Minimum 30 meters) to control particulate emission within 50mg/Nm3.
1.	Appropriate Air Pollution Control (APC) system shall be provided for fugitive dust from all vulnerable sources, so as to comply prescribed standards. All necessary air pollution control devises (quenching, Venturi scrubber, mist eliminator) should be provided for compliance of emission standards.
1.	Masking agents should be used for odour control.
Water quality monitoring and preservation	
1.	The project proponent shall install effluent monitoring system with respect to standards prescribed in Environment (Protection) Rules 1986 through labs recognised under Environment (Protection) Act, 1986 or NABL accredited laboratories.

1.	Waste water generated from the facility shall be treated in the ETP and treated waste water shall be reused in the APCD connected to the incinerator. The water quality of treated effluent shall meet the norms prescribed by State Pollution Control Board. Zero discharge should be maintained.
1.	Process effluent/any waste water should not be allowed to mix with storm water.
1.	Total fresh water use shall not exceed the proposed requirement as provided in the project details. Prior permission from competent authority shall be obtained for use of fresh water.
1.	Sewage Treatment Plant shall be provided to treat the wastewater generated from the project. Treated water shall be reused within the project.
1.	A certificate from the competent authority for discharging treated effluent/ untreated effluents into the Public sewer/disposal/drainage systems along with the final disposal point should be obtained.
1.	The leachate from the facility shall be collected and treated to meet the prescribed standards before disposal.
1.	Magnetic flow meters shall be provided at the inlet and outlet of the ETP & all ground water abstraction points and records for the same shall be maintained regularly.
1.	Rain water runoff from hazardous waste storage area shall be collected and treated in the effluent treatment plant.
Noise monitoring and prevention	
1.	The ambient noise levels should conform to the standards prescribed under E(P)A Rules, 1986 viz. 75 dB(A) during day time and 70 dB(A) during night time.
Energy Conservation measures	
1.	Provide solar power generation on roof tops of buildings, for solar light system for all common areas, street lights, parking around project area and maintain the same regularly;
1.	Provide LED lights in their offices and residential areas
Waste management	
1.	Incinerated ash shall be disposed at approved TSDF and MoU made in this regard shall be submitted to the Ministry prior to the commencement.
1.	The solid wastes shall be segregated as per the norms of the Solid Waste Management Rules, 2016.
1.	A certificate from the competent authority handling municipal solid wastes should be obtained, indicating the existing civic capacities of handling and their adequacy to cater to the M.S.W. generated from project.
1.	Any wastes from construction and demolition activities related thereto shall be managed so as to strictly conform to the Construction and Demolition Waste Management Rules, 2016
1.	No landfill site is allowed within the CBWTF site
1.	The Project proponent shall not store the Hazardous Wastes more than the quantity that has been permitted by the CPCB/SPCB.
Green Belt	
1.	Green belt shall be developed in area as provided in project details, with native tree Green belt shall be developed in an area equal to 33% of the plant area with a native tree species in accordance with CPCB guidelines. The

	greenbelt shall inter alia cover the entire periphery of the plant.
Public hearing and Human health issues	
1.	Feeding of materials/Bio-medical waste should be mechanized and automatic no manual feeding is permitted.
1.	Proper parking facility should be provided for employees & transport used for collection & disposal of waste materials.
1.	Necessary provision shall be made for fire-fighting facilities within the complex.
1.	Emergency preparedness plan based on the Hazard identification and Risk Assessment (HIRA) and Disaster Management Plan shall be implemented.
1.	Emergency plan shall be drawn in consultation with SPCB/CPCB and implemented in order to minimize the hazards to human health or environment from fires, explosion or any unplanned sudden or gradual release of hazardous waste or hazardous waste constituents to air, soil or surface water.
1.	Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, crèche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.
1.	Occupational health surveillance of the workers shall be done on a regular basis.
Miscellaneous	
1.	The project proponent shall prominently advertise it at least in two local newspapers of the District or State, of which one shall be in the vernacular languagewithin seven days indicating that the project has been accorded environment clearance and the details of MoEF&CC/SEIAA website where it is displayed
1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/ conditions and / or shareholder's/stake holders. The copy of the board resolution in this regard shall be submitted to the MoEF&CC as a part of six-monthly report.
1.	A separate Environmental Cell both at the project and company head quarter level, with qualified personnel shall be set up under the control of senior Executive, who will directly report to the head of the organization.
1.	Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the Six Monthly Compliance Report.

1.	Self-environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
1.	The criteria pollutant levels namely; PM2.5, PM10, SO2, NOx (ambient levels as well as stack emissions) or critical sectoral parameters, indicated for the project shall be monitored and displayed at a convenient location near the main gate of the company in the public domain.
1.	The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	The project proponent shall abide by all the commitments and recommendations made in the EIA/EMP report, commitment made during Public Hearing and also that during their presentation to the Expert Appraisal Committee.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	Concealing factual data or submission of false/fabricated data may result in revocation of this environmental clearance and attract action under the provisions of Environment (Protection) Act, 1986.
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data/information/monitoring reports.
1.	The above conditions shall be enforced, inter-alia under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986, Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 and the Public Liability Insurance Act, 1991 along with their amendments and Rules and any other orders passed by the Hon'ble Supreme Court of India / High Courts/NGT and any other Court of Law relating to the subject matter.
1.	Any appeal against this EC shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.
Specific Conditions	
1.	The project proponent shall ensure 70% of the employment to the local people, as per the applicable law. The project proponent shall set up a skill development center/provide skill development training to village people.

3.12. Agenda Item No 12:

3.12.1. Details of the proposal

Drilling of Exploratory wells in Upper Assam Shelf (South) area encompassing Jorhat and Golaghat, Assam. by **OIL AND NATURAL GAS CORPORATION LIMITED** located at **GOLAGHAT,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/IND2/529970/2025	SEAC/SEIAA.4040/2025	18/03/2025	Off-shore and onshore oil and gas exploration, development and production (1(b))

3.12.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :05/04/2025

Deliberations of SEAC 1 :

The proposal requesting Amendment of the EC for Drilling of Exploratory wells in Upper Assam Shelf (South) area encompassing Jorhat and Golaghat districts in Assam is placed before the Hon'ble Committee for appraisal and deliberation. All the papers of the proposal submitted for **amendment of EC** for inclusion of 5 locations namely ELAJ, SUAD, SPAA, TLAB & ELAL in the earlier granted EC and along with the pre feasibility report, land use and land cover map of the locations including other requisite documents submitted are placed before the Committee. Scrutinized the documents submitted by the project Proponent in support of the proposal.

Senior Officers of **Oil and Natural Gas Corporation Limited** representing the project Proponent has made the detailed presentation with clarification as to the status as on date about the project at hand. T**he** Well locations **ELAJ, SUAD, TLAB & SPAA** are falling within **Doyang Reserved Forest** and the well **ELAL** is falling in non forest **private patta land**.

During the course of deliberation it was clarified by the project Proponent that they have already processed for the **final Forest Clearance**from the competent authority in terms of the "Forest (Conservation) Act" now known as **"Van *(Sanrakshan Evam Samvardhan)* Adhiniyam, 1980"** for the Wells falling in the Reserved Forest.

It is further submitted that **FC (Stage-I)** is granted for the well locations **ELAJ, SUAD, TLAB & SPAA** has been uploaded in Parivesh Portal 2.0.

Entire issue is discussed and due diligence is made by the SEAC.

The Environmental Clearance is subject to due prior clearances from the competent authority in respect of Forest Clearance (Stage I) from the MoEF & CC under the **Van (*Sanrakshan Evam Samvardhan*) Adhiniyam**, **1980**, as applicable.

The well **ELAL** is falling in non forest **revenue land, land acquisition is needed for further processing of the proposal.**

ONGCL has subsequently submitted the following documents:

1. **On 27.01.2025, joint verification report by Circle Officer, Golaghat Revenue Circle as submitted.**
2. **On 16.04.2025, undertaking of land purchase by Oil And Natural Gas Corporation Limited was uploaded and upon completion of the acquisition process, ONGC will provide all the relevant details of the acquired land.**

The Committee deem it appropriate to ask the PP to submit the following information to the SEAC in respect of the proposal for the Well falling in the private patta land.

1. If the area is falling in any ESZ

Decision:

After due deliberation, discussion and due diligence in the matter the Committee is of the considered opinion that EC may be granted for the Well locations **ELAJ, SUAD, TLAB** & **SPAA** which are within the Reserved Forest area with specific conditions of the SEAC**.**

The Committee is also of the opinion that for the proposal for **Non Forest Well location ELAL** the same shall duly be considered upon receipt of the documents with required information by the SEAC which shall also be subject to specific conditions to be stipulated by the SEAC.

Recommendation: Recommended for **grant of the EC for Well location ELAJ, SUAD, TLAB & SPAA** falling within the Reserved Forest area.

3.12.3. Deliberations by the SEIAA in current meetings

EC is approved for Well location ELAJ, SUAD, TLAB & SPAA falling within the Reserved Forest area for amendment of EC for Drilling of Exploratory Wells in Upper Assam Shelf (South) area encompassing Jorhat and Golaghat districts in the State of Assam by the applicant of the project is Lily P Chawang, GM (E&T)-I/C HSE Basin,

Oil and Natural Gas Corporation Limited. Estimated Project Cost is Rs 20 crore.

3.12.4. Recommendation of SEIAA

Approved

3.12.5. Details of Environment Conditions

3.12.5.1. Specific

SPECIFIC CONDITIONS BY SEAC	
1.	The Proponent is to under the CER (Corporate Environment Responsibility) outlined here under against each of the proposal: Green Belt: The proponent shall develop Green Belt around the Wells comprising 10% of the area of the project area and shall ensure planting of indigenous species of plants as are prescribed. For the purpose, the concerned DFO may be consulted to have the quality planting materials ready in advance in the Departmental Nursery and requisite fund for the purpose should be made available to the DFO in advance for raising of minimum of 1,500 poly-pot saplings.
2.	The recommended species of plants in the area could be of species like Nahor (*Mesua ferrea*), Siris (*Albizzia procera*), Hollock (*Terminalia myriocarpa*), Amlokhi (*Phyllanthusemblica*), Hilikha (*Terminalia chebula*),Jamun (*Syzygiumcuminii*), Cham (*Artocarpus chaplasha*), Dimaru (*Ficus spp*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*), Bhomora (*Terminalia bellirica*) etc etc. Density of plantations shall be 1,250 plants per Hectare and the Proponent is required to raise plantations covering an area measuring 33% of the project area against the Well as prescribed.
3.	To cover the prescribed area under plantation, educational institution, Govt lands around the project area may be selected and local NGOs, Students, Villagers may be involved in plantation activities and the preferred species of plants may be fruit bearing, of medicinal value and aesthetic in nature.
4.	The Proponent shall ensure use of Green Energy in the villages around the Project area by installing Solar lights, LED bulbs, drinking water facility and also construction of Bio toilets etc. Such provision may also be made for educational institutions existing near to the project area against each of the projects (Drilling Well) under the proposal with due consultation of the local DFO (DFO, Golaghat).
5.	The proponent shall take all requisite measures to maintain natural environment in the oil fields and its surroundings are to be maintained in healthy and environment friendly conditions. All necessary measures and precautions must have to be taken by the proponent to prevent any probable / random oil spillage, discharge of effluents in the surroundings.
6.	Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.12.5.2. Standard

1(b)	**Off-shore and onshore oil and gas exploration, development and production**

Specific Conditions	
1.	The company shall comply with all the environmental protection measures and safeguards proposed in the documents submitted to the Ministry. All the recommendations made in the EIA/EMP in respect of environmental management, and risk mitigation measures relating to the project shall be implemented.
1.	No pipelines or its part shall be laid in the Forest land/Protected Area without prior permission/approval from the Competent Authority.
1.	Total fresh water requirement shall not exceed 39 m3/day will be met from groundwater. Prior permission shall be obtained from the concerned regulatory authority.
1.	The project proponent will treat and reuse the treated water within the factory and no waste or treated water shall be discharged outside the premises. Mobile ETP coupled with RO shall be installed to reuse the treated water in drilling system. Size of the waste shall be equal to the hole volume+ volume of drill cutting and volume of discarded mud if any. Two feet free board may be left to accommodate rain water. There shall be separate storm water channel and rain water shall not be allowed to mix with waste water. Alternatively, if possible pit less drilling be practiced instead of above.
1.	During production, storage and handling, the fugitive emission of methane, if any, shall be monitored using Infra-red camera/ appropriate technology.
1.	The project proponent also to ensure trapping/storing of the CO2 generated, if any, during the process and handling.
1.	Approach road shall be made pucca to minimize generation of suspended dust.
1.	The project proponent shall make all arrangements for control of noise from the drilling activity. Acoustic enclosure shall be provided for the DG sets along with the adequate stack height as per CPCB guidelines.
1.	The company shall construct the garland drain to prevent runoff of any oil containing waste into the nearby water bodies. Separate drainage system shall be created for oil contaminated and non-oil contaminated.
1.	Drill cuttings separated from drilling fluid shall be adequately washed and disposed in HDPE lined pit. Waste mud shall be tested for hazardous contaminants and disposed according to HWMH Rules, 2016. No effluent/drilling mud shall be discharged/disposed off into nearby surface water bodies. The company shall comply with the guidelines for disposal of solid waste, drill cutting and drilling fluids for onshore drilling operation notified vide GSR.546(E) dated 30th August, 2005.
1.	Oil spillage prevention and mitigation scheme shall be prepared. In case of oil spillage/ contamination, action plan shall be prepared to clean the site by adopting proven technology. The recyclable waste (oily sludge) and spent oil shall be disposed of to the authorized recyclers.
1.	The project proponent shall take necessary measures to prevent fire hazards, containing oil spill and soil remediation as needed. At fixed installations or plants use of ground flare shall be explored. At the place of ground flaring, the overhead flaring stack with knockout drums shall be installed to minimize gaseous emissions during operation.
1.	The project proponent shall develop a contingency plan for H2S release including all necessary aspects from evacuation to resumption of normal operations. The workers shall be provided with personal H2S detectors in locations of high risk of exposure along with self-containing breathing apparatus.
1.	Blow Out Preventer system shall be installed to prevent well blowouts during drilling operations.
1.	On completion of the project, necessary measures shall be taken for safe plugging of wells with secured enclosures to restore the drilling site to the original condition. The same shall be confirmed by the concerned regulatory authority from environment safety angle. In case of hydrocarbon not found economically viable, a full

	abandonment plan shall be implemented for the drilling site in accordance with the applicable DGH / Indian Petroleum Regulations.
1.	As per the Ministry's OM dated 30.09.2020 superseding the OM dated 01.05.2018 regarding the Corporate Environmental Responsibility, and as per the action plan proposed by the project proponent to address the socio-economic and environmental issues in the study area, the project proponent, as committed, shall provide education funds in technical training centers/ support in nearby village's schools, support in health care facilities, drinking water supply and funds for miscellaneous activities like solar street lights, battery, solar panel etc., in the nearby villages. The action plan shall to be completed within time as proposed.
1.	No lead acid batteries shall be utilized in the project/site.
1.	Occupational health surveillance of the workers shall be carried out as per the prevailing Acts and Rules. All workers & employees shall be provided with required safety kits/mask for personal protection.
1.	Oil content in the drill cuttings shall be monitored and report & shall sent to the Ministry's Regional Office.
1.	The project proponent shall prepare operating manual in respect of all activities, which would cover all safety & environment related issues and measures to be taken for protection. One set of environmental manual shall be made available at the drilling site/ project site. Awareness shall be created at each level of the management. All the schedules and results of environmental monitoring shall be available at the project site office. Remote monitoring of site should be done.
1.	PP shall sensitize and create awareness among the people working within the project area as well as its surrounding area on the ban of Single Use Plastic in order to ensure the compliance of Notification published by MOEFCC on 12th August, 2021. A report along with photographs on the measures taken shall also be included in the six-monthly compliance report being submitted to concerned authority.
General Conditions	
1.	No further expansion or modifications in the plant, other than mentioned in the EIA Notification, 2006 and its amendments, shall be carried out without prior approval of the Ministry of Environment, Forest and Climate Change/SEIAA, as applicable. In case of deviations or alterations in the project proposal from those submitted to this Ministry for clearance, a fresh reference shall be made to the Ministry/SEIAA, as applicable, to assess the adequacy of conditions imposed and to add additional environmental protection measures required, if any.
1.	The energy source for lighting purpose shall be preferably LED based, or advanced having preference in energy conservation and environment betterment.
1.	The overall noise levels in and around the plant area shall be kept well within the standards by providing noise control measures including acoustic hoods, silencers, enclosures etc. on all sources of noise generation. The ambient noise levels shall conform to the standards prescribed under the Environment (Protection) Act, 1986 Rules, 1989 viz. 75 dBA (day time) and 70 dBA (night time).
1.	The company shall undertake all relevant measures for improving the socio-economic conditions of the surrounding area. CER activities shall be undertaken by involving local villages and administration and shall be implemented. The company shall undertake eco-developmental measures including community welfare measures in the project area for the overall improvement of the environment.
1.	The company shall earmark sufficient funds towards capital cost and recurring cost per annum to implement the conditions stipulated by the Ministry of Environment, Forest and Climate Change as well as the State Government along with the implementation schedule for all the conditions stipulated herein. The funds so earmarked for environment management/ pollution control measures shall not be diverted for any other purpose.
1.	A copy of the clearance letter shall be sent by the project proponent to concerned Panchayat, Zilla Parishad/Municipal Corporation, Urban local Body and the local NGO, if any, from whom suggestions/ representations, if any, were received while processing the proposal.

1.	The project proponent shall also submit six monthly reports on the status of compliance of the stipulated Environmental Clearance conditions including results of monitored data (both in hard copies as well as by e-mail) to the respective Regional Office of MoEF&CC, the respective Zonal Office of CPCB and SPCB. A copy of Environmental Clearance and six monthly compliance status report shall be posted on the website of the company.
1.	The environmental statement for each financial year ending 31st March in Form-V as is mandated shall be submitted to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently, shall also be put on the website of the company along with the status of compliance of environmental clearance conditions and shall also be sent to the respective Regional Offices of MoEF&CC by e-mail.
1.	The project proponent shall inform the public that the project has been accorded environmental clearance by the Ministry and copies of the clearance letter are available with the SPCB/Committee and may also be seen at Website of the Ministry and at https://parivesh.nic.in/. This shall be advertised within seven days from the date of issue of the clearance letter, at least in two local newspapers that are widely circulated in the region of which one shall be in the vernacular language of the locality concerned and a copy of the same shall be forwarded to the concerned Regional Office of the Ministry.
1.	The project authorities shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities and the date of start of the project.
1.	This Environmental clearance is granted subject to final outcome of Hon'ble Supreme Court of India, Hon'ble High Court, Hon'ble NGT and any other Court of Law, if any, as may be applicable to this project.
NBWL Conditions	
1.	The environmental clearance is subject to obtaining prior clearance from the wildlife angle, including clearance from the Standing Committee of the National Board for Wildlife, as applicable, as per the Ministry's OM dated 8th August, 2019. Grant of environmental clearance does not necessarily imply that Wildlife Clearance shall be granted to the project and that their proposal for Wildlife Clearance will be considered by the respective authorities on its merit and decision taken. PP shall also strictly follow the conditions mentioned in existing NBWL clearance.
1.	The project proponent shall prepare a site specific conservation plan and wildlife management plan in case of the presence of Schedule-1 species in the study area, as applicable to the project, and submit to Chief Wildlife Warden for approval. The recommendations shall be implemented in consultation with the State Forest/Wildlife Department in a time bound manner.

3.13. Agenda Item No 13:

3.13.1. Details of the proposal

GOVT. PERMIT AREA OF KELENG CHOCK A by **BAKSA FOREST DIVISION MUSHALPUR** located at **B AKSA,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/486219/2024	SEAC/ SEIAA. 3884/2024	06/07/2024	Mining of minerals (1(a))

3.13.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :09/09/2024

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. Due deliberations and discussions are held.

The Committee is of the opinion to urge the DFO for taking requisite steps to conduct preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF and CC in 2016 and 2020 {SSMMG'2016 and EMGSM'2020} and to place the same for appraisal and approval by the competent authority after inclusion of the proposed area.

Date of SEAC 2 :05/04/2025

Deliberations of SEAC 2 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. Due deliberations and discussions are held.

The Committee is of the opinion to urge the DFO for taking requisite steps to comply with the deficiencies of the final District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG'2016 and EMGSM'2020} and place the same for authentication with necessary corrections and compliance before the SEIAA for approval.

It is pertinent to mention that Evaluation, Examination and Appraisal of the final DSR for the district has already been done by the SEAC with its observations for compliance and recommended *in principle* for further approval by the SEIAA, Assam.

The approved copy of the DSR for the district is yet to be placed in public domain as required by the competent authority in the DC, Baksa and the SEAC urge the DFO to do the needful immediately after due approval of the same by the SEIAA. It is to be ensured that the instant proposal is already approved in the DSR with the quantity allotted for mining.

It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the development of infrastructure in progress specially to strengthen the road network connectivity and other developmental works after the ravages of flood in the whole state which is a *sine qua non* for overall development and economic growth of the state while the impact on environment also require due diligence and consideration with proper safeguards.

The Committee deem it appropriate to recommend the grant of EC by the SEIAA allowing extraction of minor mineral for 1(one) year, as recommended in the mining plan, with the quantity of **54,000 Cu M** of **Clay** in 1(one) year with an observation that the DFO, Baksa shall submit the approved DSR from the competent authority for further consideration of the balance quantity for the project allowing mining by the Proponent within a period of **1 (one) month**.

Decision: Recommended for grant of EC with the quantity of **54,000Cu M** of **Clay** for **1(one) year.**

3.13.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 4.90Ha with a quantity of 27,000Cu M of Clay for 6 (six) months subjected to the terms and conditions laid down by SEAC and that the area in question is to be reflected in the approved final DSR.

3.13.4. Recommendation of SEIAA

Approved

3.13.5. Details of Environment Conditions

3.13.5.1. Specific

GENERAL CONDITIONS BY SEAC	
1.	This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan and the approved DSR for the district.
2.	This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates recorded in the approved DSR; (b) the active bank of the river is not disturbed / damaged because of mining and transportation of mining materials; (c) the Proponent shall extract the approved quantity of minerals indicated herein with maximum mining depth of up to 1(one) meter only from the non-mined surface.
3.	The quantities of minor mineral allowed for extraction, annually, in terms of the approved DSR shall not be exceeded by the Proponent.
4.	The Orders of the Hon'ble Apex Court, the NGT (Eastern Bench), Kolkata; the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} shall be followed by the Proponent.
SPECIFIC CONDITIONS BY SEAC	
1.	Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO.
2.	The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period.
3.	The DFO shall comply with necessary formalities for transfer of the EC to the lessee with due NOC for filing application to the SEIAA before allowing mining so that the entire accountability in mining is vested on the lessee / Proponent with the same terms and conditions stipulated in the EC as per the EIA Notification, 2006.
4.	The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan/DSR before allowing any mining.
5.	CER activities shall be carried out / undertaken by the Proponent and a minimum estimated cost to be Rs6.00 Lakh only shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the nearby village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 3 (three) of the year of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report.
6.	Plantation activities shall be carried out / undertaken in any educational institution or Govt lands along the proposed mining area involving local NGOs, School / College students and adequate fund required for the purposes shall be earmarked. Efforts shall be made to selectively use the

	saplings of aesthetic, medicinal value, evergreen nature with due consultation of the DFO and shall make effort to label the plant species for the benefits of the villagers, common people and specially the school/college students.
7.	The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Agor(*Aquillariamalaccensis*), Amlokhi (*Phyllanthus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saracaasoca*),Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*), Mohaneem (*Azedirachtaindica*), Jamun (*Syzygiumcuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpusintegrifolia*), Ow Tenga (*Dilleniaindica*), Chandan (*Santalum album*),Thekera (*Garcinia spp*) etc etc.
8.	Half Yearly Compliance Reports (HCR) are mandatory on the part of project Proponent which need to be uploaded on or before 1st June and 1st December of the calendar year in PARIVESH 2.0 portal and no activity shall be permitted by the DFO without HCR.
9.	Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.13.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State Pollution Control Board/ Committee.
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	This Environmental Clearance (EC) is subject to orders/ judgment of Honble Supreme Court of India, Honble High Court, Honble NGT and any other Court of Law, Common Cause Conditions as may be applicable.
Statutory compliance	
1.	State Pollution Control Board/Committee shall be responsible for display of this EC letter at its Regional office, District Industries Centre and Collector's office/ Tehsildar's Office for 30 days.
1.	The Project Proponent shall inform the MoEF&CC for any change in ownership of the mining lease. In case there is any change in ownership or mining lease is transferred. PP needs to apply for transfer of EC as per provisions of the para 11 of EIA Notification, 2006 as amended from time to time.
1.	The Project proponent complies with all the statutory requirements and judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India &Ors before commencing the mining operations.
1.	The State Government concerned shall ensure that mining operation shall not be commenced till the entire compensation levied, if any, for illegal mining paid by the Project Proponent through their respective Department of Mining & Geology in strict compliance of Judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India & Ors.

1.	The Project Proponent shall follow the mitigation measures provided in MoEFCC's Office Memorandum No. Z-11013/57/2014-IA.II (M), dated 29th October, 2014, titled "Impact of mining activities on Habitations-Issues related to the mining Projects wherein Habitations and villages are the part of mine lease areas or Habitations and villages are surrounded by the mine lease area."
1.	A copy of EC letter will be marked to concerned Panchayat / local NGO etc. if any, from whom suggestion / representation has been received while processing the proposal.
Air quality monitoring and preservation	
1.	The project proponent use leak proof trucks/dumpers carrying ore and other raw materials and cover them with tarpaulin.
1.	The project proponent shall submit monthly summary report of continuous stack emission and air quality monitoring and results of manual stack monitoring and manual monitoring of air quality /fugitive emissions to Regional Office of MoEF&CC, Zonal office of CPCB and Regional Office of SPCB along with six-monthly monitoring report.
1.	Design the ventilation system for adequate air changes as per ACGIH document for all tunnels, motor houses, Oil Cellars.
Air quality monitoring and preservation	
1.	Appropriate Air Pollution Control (APC) system shall be provided for all the dust generating points including fugitive dust from all vulnerable sources, so as to comply prescribed stack emission and fugitive emission standards.
Air quality monitoring and preservation	
1.	Effective safeguard measures for prevention of dust generation and subsequent suppression (like regular water sprinkling, metalled road construction etc.) shall be carried out in areas prone to air pollution wherein high levels of PM10 and PM2.5 are evident such as haul road, loading and unloading point and transfer points. The Fugitive dust emissions from all sources shall be regularly controlled by installation of required equipments/ machineries and preventive maintenance. Use of suitable water-soluble chemical dust suppressing agents may be explored for better effectiveness of dust control system. It shall be ensured that air pollution level conform to the standards prescribed by the MoEFCC/ Central Pollution Control Board.
Water quality monitoring and preservation	
1.	Project Proponent shall regularly monitor and maintain records w.r.t. ground water level and quality in and around the mine lease by establishing a network of existing wells as well as new piezo-meter installations during the mining operation in consultation with Central Ground Water Authority/ State Ground Water Department. The Report on changes in Ground water level and quality shall be submitted on six-monthly basis to the Regional Office of the Ministry, CGWA and State Groundwater Department / State Pollution Control Board.
Water quality monitoring and preservation	
1.	In case, immediate mining scheme envisages intersection of ground water table, then Environmental Clearance shall become operational only after receiving formal clearance from CGWA. In case, mining operation involves intersection of ground water table at a later stage, then PP shall ensure that prior approval from CGWA and MoEFCC is in place before such mining operations. The permission for intersection of ground water table shall essentially be based on detailed hydro-geological study of the area.
1.	The Project Proponent shall undertake regular monitoring of natural water course/ water resources/ springs and perennial nallahs existing/ flowing in and around the mine lease including upstream and downstream. Sufficient number of gullies shall be provided at appropriate places within the lease for management of water. The parameters to be monitored shall include their water quality vis-à-vis suitability for usage as per CPCB criteria and flow rate. It shall be ensured that no obstruction and/ or alteration be made to water bodies during mining

	operations without justification and prior approval of MoEFCC. The monitoring of water courses/ bodies existing in lease area shall be carried out four times in a year viz. pre- monsoon (April May), monsoon (August), post-monsoon (November) and winter (January) and the record of monitored data may be sent regularly to Ministry of Environment, Forest and Climate Change and its Regional Office, Central Ground Water Authority and Regional Director, Central Ground Water Board, State Pollution Control Board and Central Pollution Control Board. Clearly showing the trend analysis on six-monthly basis.
Noise and vibration monitoring and prevention	
1.	The peak particle velocity at 500m distance or within the nearest habitation, whichever is closer shall be monitored periodically as per applicable DGMS guidelines.
Noise monitoring and prevention	
1.	Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six-monthly compliance report.
Noise and vibration monitoring and prevention	
1.	The Project Proponent shall take measures for control of noise levels below 85 dBA in the work environment. The workers engaged in operations of HEMM, etc. should be provided with ear plugs /muffs. All personnel including laborers working in dusty areas shall be provided with protective respiratory devices along with adequate training, awareness and information on safety and health aspects. The PP shall be held responsible in case it has been found that workers/ personals/ laborers are working without personal protective equipment.
Mining plan	
1.	The Project Proponent shall adhere to approved mining plan, inter alia, including, total excavation (quantum of mineral, waste, over burden, inter burden and top soil etc.); mining technology; lease area; scope of working (method of mining, overburden & dump management, O.B& dump mining, mineral transportation mode, ultimate depth of mining, concurrent reclamation and reclamation at mine closure; land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life; etc.).
Mining plan	
1.	The land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life shall be governed as per the approved Mining Plan. The excavation vis-à-vis backfilling in the mine lease area and corresponding afforestation to be raised in the reclaimed area shall be governed as per approved mining plan. PP shall ensure the monitoring and management of rehabilitated areas until the vegetation becomes self-sustaining. The compliance status shall be submitted half-yearly to the MoEFCC and its concerned Regional Office.
Waste management	
1.	Kitchen waste shall be composted or converted to biogas for further use.(to be decided on case to case basis depending on type and size of plant)
1.	The waste oil, grease and other hazardous waste shall be disposed of as per the Hazardous & Other waste (Management & Transboundary Movement) Rules, 2016.
Land reclamation	
1.	Check dams of appropriate size, gradient and length shall be constructed around mine pit and OB dumps to prevent storm run-off and sediment flow into adjoining water bodies. A safety margin of 50% shall be kept for designing of sump structures over and above peak rainfall (based on 50 years data) and maximum discharge in the mine and its adjoining area which shall also help in providing adequate retention time period thereby allowing proper settling of sediments/ silt material. The sedimentation pits/ sumps shall be constructed at the corners of the garland drains.

Land reclamation	
1.	The Overburden (O.B.), waste and topsoil generated during the mining operations shall be stacked at earmarked OB dump site(s) only and it should not be kept active for a long period of time. The physical parameters of the OB / waste dumps / topsoil dump like height, width and angle of slope shall be governed as per the approved Mining Plan and the guidelines/circulars issued by D.G.M.S. The topsoil shall be used for land reclamation and plantation.
1.	The slope of dumps shall be vegetated in scientific manner with suitable native species to maintain the slope stability, prevent erosion and surface run off. The selection of local species regulates local climatic parameters and help in adaptation of plant species to the microclimate. The gullies formed on slopes should be adequately taken care of as it impacts the overall stability of dumps. The dump mass should be consolidated with the help of dozer/ compactors thereby ensuring proper filling/ leveling of dump mass. In critical areas, use of geo textiles/ geo-membranes / clay liners / Bentonite etc. shall be undertaken for stabilization of the dump.
Green Belt and EMP	
1.	The project proponent shall prepare GHG emissions inventory for the plant and shall submit the programme for reduction of the same including carbon sequestration including plantation.
Transportation	
1.	No Transportation of the minerals shall be allowed in case of roads passing through villages/ habitations. In such cases, PP shall construct a ‘bypass’ road for the purpose of transportation of the minerals leaving an adequate gap (say at least 200 meters) so that the adverse impact of sound and dust along with chances of accidents could be mitigated. All costs resulting from widening and strengthening of existing public road network shall be borne by the PP in consultation with nodal State Govt. Department. Transportation of minerals through road movement in case of existing village/ rural roads shall be allowed in consultation with nodal State Govt. Department only after required strengthening such that the carrying capacity of roads is increased to handle the traffic load. The pollution due to transportation load on the environment will be effectively controlled and water sprinkling will also be done regularly. Vehicular emissions shall be kept under control and regularly monitored. Project should obtain Pollution Under Control (PUC) certificate for all the vehicles from authorized pollution testing centers. [If applicable in case of road transport].
Public hearing and Human health issues	
1.	The project proponent shall carry out heat stress analysis for the workmen who work in high temperature work zone and provide Personal Protection Equipment (PPE) as per the norms of Factory Act.
1.	Occupational health surveillance of the workers shall be done on a regular basis and records maintained as per the Factories Act.
Public hearing and Human health issues	
1.	Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, creche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.
Green Belt	
1.	The Project Proponent shall develop greenbelt in 7.5m wide safety zone all along the mine lease boundary as per the guidelines of CPCB in order to arrest pollution emanating from mining operations within the lease. The whole Green belt shall be developed within first 5 years starting from windward side of the active mining area. The development of greenbelt shall be governed as per the EC granted by the Ministry irrespective of the stipulation made in approved mine plan.
Corporate Environment Responsibility	

1.	Self-environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Corporate Environment Responsibility	
1.	All the recommendations made in the Charter on Corporate Responsibility for Environment Protection (CREP) for the Mineral Beneficiation plants shall be implemented.
Corporate Environment Responsibility	
1.	Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the Six Monthly Compliance Report.
1.	The Project Proponent shall submit the time- bound action plan to the concerned regional office of the Ministry within 6 months from the date of issuance of environmental clearance for undertaking the activities committed during public consultation by the project proponent and as discussed by the EAC, in terms of the provisions of the MoEF&CC Office Memorandum No.22-65/2017-IA.III dated 30 September, 2020. The action plan shall be implemented within three years of commencement of the project.
Miscellaneous	
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	The Project Authorities should inform to the Regional Office regarding date of financial closures and final approval of the project by the concerned authorities and the date of start of land development work.
1.	The above conditions will be enforced inter-alia, under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986 and the Public Liability Insurance Act, 1991 along with their amendments and rules made there under and also any other orders passed by the Hon'ble Supreme Court of India/High Court and any other Court of Law relating to the subject matter.
1.	Concealing factual data failure to comply with any or submission of false/ fabricated data and of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act, 1986.
1.	The Ministry or any other competent authority may alter/modify the above conditions or stipulate any further condition in the interest of environment protection.
Miscellaneous	
1.	The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.
1.	The project proponent shall monitor the criteria pollutants level namely; PM10, S02, NOx (ambient levels as well as stack emissions) or critical sectoral parameters, indicated for the projects and display the same at a convenient location for disclosure to the public and put on the website of the company.
Miscellaneous	
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).

1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	44) The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall abide by all the commitments and recommendations made in the EIA/EMP report, commitment made during Public Hearing and also that during their presentation to the Expert Appraisal Committee.
1.	In pursuant to Ministrys O.M No 22-34/2018-IA.III dated 16.01.2020 to comply with the direction made by Honble Supreme Court on 8.01.2020 in W.P. (Civil) No 114/2014 in the matter Common Cause vs Union of India, the mining lease holder shall after ceasing mining operations, undertake regrassing the mining area and any other area which may have been disturbed due to other mining activities and restore the land to a condition which is fit for growth of fodder, flora, fauna etc.
1.	The concerned Regional Office of the MoEF&CC shall randomly monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the MoEF&CC officer(s) by furnishing the requisite data / information / monitoring reports.
1.	Any appeal against this environmental clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.
1.	The Project Proponent shall prepare digital map (land use & land cover) of the entire lease area once in five years purpose of monitoring land use pattern and submit a report to concerned Regional Office of the MoEF&CC.

3.14. Agenda Item No 14:

3.14.1. Details of the proposal

KOPILI RIVER BLOCK-4 SAND MINING PERMIT AREA by **dima hasao forest division(west)** located at **DIM A HASAO,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/489395/2024	SEAC/SEIAA. 3905/2024	12/08/2024	Mining of minerals (1(a))

3.14.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :09/09/2024

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. Due deliberations and discussions are held.

The Committee is of the opinion to urge the DFO for taking requisite steps to conduct preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF and CC in 2016 and 2020 {SSMMG'2016 and EMGSM'2020} and to place the same for appraisal and approval by the competent authority after inclusion of the proposed area.

Decision: ADS

Date of SEAC 2 :05/04/2025

Deliberations of SEAC 2 :

Due deliberations and discussions are held. Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized.

The Committee is of the opinion that the DFO has taken requisite steps to complete the preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF& CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} and placed the same for appraisal and final approval by the competent authority. It is pertinent to mention that *Evaluation*and *Appraisal* of the final DSR for the district has already been done by the SEAC & SEIAA, Assam. It is revealed that the instant proposal is already approved in the DSR with the quantity allotted measuring **37,843.20 Cu M** of **Sand**mineral for mining.

The Committee deem it appropriate to recommend the grant of EC by the SEIAA allowing extraction of minor mineral for 1(One) year, as recommended in terms of the approved DSR-(**Page No. B.143 ,SL. No 9**) with the quantity of minor mineral measuring **37,840 Cu M** of Sand.

Decision:

Recommended grant of EC for **1 (one) year** only allowing extraction of minor mineral measuring **37,840 Cu M** of Sand.

3.14.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 4.38Ha with a quantity of 37,840Cu M of Sand in 1 (one) Year subject to the terms and conditions laid down by SEAC and as per approved in terms of the approved DSR- (Page No. B.143 ,SL. No 9).

3.14.4. Recommendation of SEIAA

Approved

3.14.5. Details of Environment Conditions

3.14.5.1. Specific

GENERAL CONDITIONS BY SEAC	
1.	This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan and the approved DSR for the district.
2.	This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates recorded in the approved DSR; (b) the active bank of the river is not disturbed / damaged because of mining and transportation of mining materials; (c) the Proponent shall extract the approved quantity of minerals indicated herein with maximum mining depth of up to 1(one) meter only from the non-mined surface.
3.	The quantities of minor mineral allowed for extraction, annually, in terms of the approved DSR shall not be exceeded by the Proponent.

4.	The Orders of the Hon'ble Apex Court, the NGT (Eastern Bench), Kolkata; the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} shall be followed by the Proponent.
SPECIFIC CONDITIONS BY SEAC	
1.	Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF& CC for non manual extraction which need to be adhered to by the concerned DFO.
2.	The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period.
3.	The DFO shall comply with necessary formalities for transfer of the EC to the lessee with due NOC for filing application to the SEIAA before allowing mining so that the entire accountability in mining is vested on the lessee / Proponent with the same terms and conditions stipulated in the EC as per the EIA Notification, 2006.
4.	The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan/DSR before allowing any mining.
5.	CER activities shall be carried out / undertaken by the Proponent and a minimum estimated cost to be Rs 6.00 Lakh only shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the nearby village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 3 (three) of the year of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report.
6.	Plantation activities shall be carried out / undertaken in any educational institution or Govt lands along the proposed mining area involving local NGOs, School / College students and adequate fund required for the purposes shall be earmarked. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with due consultation of the DFO and shall make effort to label the plant species for the benefits of the villagers, common people and specially the school/ college students.
7.	The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Agor(*Aquillariamalaccensis*), Amlokhi (*Phyllanthus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saracaasoca*),Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*), Mohaneem (*Azedirachtaindica*), Jamun (*Syzygiumcuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpusintegrifolia*), Ow Tenga (*Dilleniaindica*), Chandan (*Santalum album*),Thekera (*Garcinia spp*) etc etc.
8.	Half Yearly Compliance Reports (HCR) are mandatory on the part of project Proponent which need to be uploaded on or before 1st June and 1st December of the calendar year in PARIVESH 2.0 portal and no activity shall be permitted by the DFO without HCR.
9.	Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.14.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State Pollution Control Board/ Committee.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	This Environmental Clearance (EC) is subject to orders/ judgment of Honble Supreme Court of India, Honble High Court, Honble NGT and any other Court of Law, Common Cause Conditions as may be applicable.
Statutory compliance	
1.	The State Government concerned shall ensure that mining operation shall not be commenced till the entire compensation levied, if any, for illegal mining paid by the Project Proponent through their respective Department of Mining & Geology in strict compliance of Judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India & Ors.
1.	The Project proponent complies with all the statutory requirements and judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India &Ors before commencing the mining operations.
1.	The Project Proponent shall inform the MoEF&CC for any change in ownership of the mining lease. In case there is any change in ownership or mining lease is transferred. PP needs to apply for transfer of EC as per provisions of the para 11 of EIA Notification, 2006 as amended from time to time.
1.	The Project Proponent shall follow the mitigation measures provided in MoEFCC's Office Memorandum No. Z-11013/57/2014-IA.II (M), dated 29th October, 2014, titled "Impact of mining activities on Habitations-Issues related to the mining Projects wherein Habitations and villages are the part of mine lease areas or Habitations and villages are surrounded by the mine lease area."
1.	A copy of EC letter will be marked to concerned Panchayat / local NGO etc. if any, from whom suggestion / representation has been received while processing the proposal.
1.	State Pollution Control Board/Committee shall be responsible for display of this EC letter at its Regional office, District Industries Centre and Collector's office/ Tehsildar's Office for 30 days.
Air quality monitoring and preservation	
1.	The project proponent shall submit monthly summary report of continuous stack emission and air quality monitoring and results of manual stack monitoring and manual monitoring of air quality /fugitive emissions to Regional Office of MoEF&CC, Zonal office of CPCB and Regional Office of SPCB along with six-monthly monitoring report.
1.	Design the ventilation system for adequate air changes as per ACGIH document for all tunnels, motor houses, Oil Cellars.
1.	The project proponent use leak proof trucks/dumpers carrying ore and other raw materials and cover them with

	tarpaulin.
Air quality monitoring and preservation	
1.	Appropriate Air Pollution Control (APC) system shall be provided for all the dust generating points including fugitive dust from all vulnerable sources, so as to comply prescribed stack emission and fugitive emission standards.
Air quality monitoring and preservation	
1.	Effective safeguard measures for prevention of dust generation and subsequent suppression (like regular water sprinkling, metalled road construction etc.) shall be carried out in areas prone to air pollution wherein high levels of PM10 and PM2.5 are evident such as haul road, loading and unloading point and transfer points. The Fugitive dust emissions from all sources shall be regularly controlled by installation of required equipments/ machineries and preventive maintenance. Use of suitable water-soluble chemical dust suppressing agents may be explored for better effectiveness of dust control system. It shall be ensured that air pollution level conform to the standards prescribed by the MoEFCC/ Central Pollution Control Board.
Water quality monitoring and preservation	
1.	Project Proponent shall regularly monitor and maintain records w.r.t. ground water level and quality in and around the mine lease by establishing a network of existing wells as well as new piezo-meter installations during the mining operation in consultation with Central Ground Water Authority/ State Ground Water Department. The Report on changes in Ground water level and quality shall be submitted on six-monthly basis to the Regional Office of the Ministry, CGWA and State Groundwater Department / State Pollution Control Board.
Water quality monitoring and preservation	
1.	In case, immediate mining scheme envisages intersection of ground water table, then Environmental Clearance shall become operational only after receiving formal clearance from CGWA. In case, mining operation involves intersection of ground water table at a later stage, then PP shall ensure that prior approval from CGWA and MoEFCC is in place before such mining operations. The permission for intersection of ground water table shall essentially be based on detailed hydro-geological study of the area.
1.	The Project Proponent shall undertake regular monitoring of natural water course/ water resources/ springs and perennial nallahs existing/ flowing in and around the mine lease including upstream and downstream. Sufficient number of gullies shall be provided at appropriate places within the lease for management of water. The parameters to be monitored shall include their water quality vis-à-vis suitability for usage as per CPCB criteria and flow rate. It shall be ensured that no obstruction and/ or alteration be made to water bodies during mining operations without justification and prior approval of MoEFCC. The monitoring of water courses/ bodies existing in lease area shall be carried out four times in a year viz. pre- monsoon (April May), monsoon (August), post-monsoon (November) and winter (January) and the record of monitored data may be sent regularly to Ministry of Environment, Forest and Climate Change and its Regional Office, Central Ground Water Authority and Regional Director, Central Ground Water Board, State Pollution Control Board and Central Pollution Control Board. Clearly showing the trend analysis on six-monthly basis.
Noise and vibration monitoring and prevention	
1.	The peak particle velocity at 500m distance or within the nearest habitation, whichever is closer shall be monitored periodically as per applicable DGMS guidelines.
Noise monitoring and prevention	
1.	Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six-monthly compliance report.
Noise and vibration monitoring and prevention	

1.	The Project Proponent shall take measures for control of noise levels below 85 dBA in the work environment. The workers engaged in operations of HEMM, etc. should be provided with ear plugs /muffs. All personnel including laborers working in dusty areas shall be provided with protective respiratory devices along with adequate training, awareness and information on safety and health aspects. The PP shall be held responsible in case it has been found that workers/ personals/ laborers are working without personal protective equipment.
Mining plan	
1.	The Project Proponent shall adhere to approved mining plan, inter alia, including, total excavation (quantum of mineral, waste, over burden, inter burden and top soil etc.); mining technology; lease area; scope of working (method of mining, overburden & dump management, O.B& dump mining, mineral transportation mode, ultimate depth of mining, concurrent reclamation and reclamation at mine closure; land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life; etc.).
Mining plan	
1.	The land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life shall be governed as per the approved Mining Plan. The excavation vis-à-vis backfilling in the mine lease area and corresponding afforestation to be raised in the reclaimed area shall be governed as per approved mining plan. PP shall ensure the monitoring and management of rehabilitated areas until the vegetation becomes self-sustaining. The compliance status shall be submitted half-yearly to the MoEFCC and its concerned Regional Office.
Waste management	
1.	The waste oil, grease and other hazardous waste shall be disposed of as per the Hazardous & Other waste (Management & Transboundary Movement) Rules, 2016.
1.	Kitchen waste shall be composted or converted to biogas for further use.(to be decided on case to case basis depending on type and size of plant)
Land reclamation	
1.	Check dams of appropriate size, gradient and length shall be constructed around mine pit and OB dumps to prevent storm run-off and sediment flow into adjoining water bodies. A safety margin of 50% shall be kept for designing of sump structures over and above peak rainfall (based on 50 years data) and maximum discharge in the mine and its adjoining area which shall also help in providing adequate retention time period thereby allowing proper settling of sediments/ silt material. The sedimentation pits/ sumps shall be constructed at the corners of the garland drains.
Land reclamation	
1.	The slope of dumps shall be vegetated in scientific manner with suitable native species to maintain the slope stability, prevent erosion and surface run off. The selection of local species regulates local climatic parameters and help in adaptation of plant species to the microclimate. The gullies formed on slopes should be adequately taken care of as it impacts the overall stability of dumps. The dump mass should be consolidated with the help of dozer/ compactors thereby ensuring proper filling/ leveling of dump mass. In critical areas, use of geo textiles/ geo-membranes / clay liners / Bentonite etc. shall be undertaken for stabilization of the dump.
1.	The Overburden (O.B.), waste and topsoil generated during the mining operations shall be stacked at earmarked OB dump site(s) only and it should not be kept active for a long period of time. The physical parameters of the OB / waste dumps / topsoil dump like height, width and angle of slope shall be governed as per the approved Mining Plan and the guidelines/circulars issued by D.G.M.S. The topsoil shall be used for land reclamation and plantation.
Green Belt and EMP	
1.	The project proponent shall prepare GHG emissions inventory for the plant and shall submit the programme for reduction of the same including carbon sequestration including plantation.

Transportation	
1.	No Transportation of the minerals shall be allowed in case of roads passing through villages/ habitations. In such cases, PP shall construct a 'bypass' road for the purpose of transportation of the minerals leaving an adequate gap (say at least 200 meters) so that the adverse impact of sound and dust along with chances of accidents could be mitigated. All costs resulting from widening and strengthening of existing public road network shall be borne by the PP in consultation with nodal State Govt. Department. Transportation of minerals through road movement in case of existing village/ rural roads shall be allowed in consultation with nodal State Govt. Department only after required strengthening such that the carrying capacity of roads is increased to handle the traffic load. The pollution due to transportation load on the environment will be effectively controlled and water sprinkling will also be done regularly. Vehicular emissions shall be kept under control and regularly monitored. Project should obtain Pollution Under Control (PUC) certificate for all the vehicles from authorized pollution testing centers. [If applicable in case of road transport].
Public hearing and Human health issues	
1.	The project proponent shall carry out heat stress analysis for the workmen who work in high temperature work zone and provide Personal Protection Equipment (PPE) as per the norms of Factory Act.
1.	Occupational health surveillance of the workers shall be done on a regular basis and records maintained as per the Factories Act.
Public hearing and Human health issues	
1.	Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, creche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.
Green Belt	
1.	The Project Proponent shall develop greenbelt in 7.5m wide safety zone all along the mine lease boundary as per the guidelines of CPCB in order to arrest pollution emanating from mining operations within the lease. The whole Green belt shall be developed within first 5 years starting from windward side of the active mining area. The development of greenbelt shall be governed as per the EC granted by the Ministry irrespective of the stipulation made in approved mine plan.
Corporate Environment Responsibility	
1.	Self-environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Corporate Environment Responsibility	
1.	All the recommendations made in the Charter on Corporate Responsibility for Environment Protection (CREP) for the Mineral Beneficiation plants shall be implemented.
Corporate Environment Responsibility	
1.	The Project Proponent shall submit the time- bound action plan to the concerned regional office of the Ministry within 6 months from the date of issuance of environmental clearance for undertaking the activities committed during public consultation by the project proponent and as discussed by the EAC, in terms of the provisions of the MoEF&CC Office Memorandum No.22-65/2017-IA.III dated 30 September, 2020. The action plan shall be implemented within three years of commencement of the project.
1.	Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose.

	Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the Six Monthly Compliance Report.
Miscellaneous	
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	Concealing factual data failure to comply with any or submission of false/ fabricated data and of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act, 1986.
1.	The Project Authorities should inform to the Regional Office regarding date of financial closures and final approval of the project by the concerned authorities and the date of start of land development work.
1.	The above conditions will be enforced inter-alia, under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986 and the Public Liability Insurance Act, 1991 along with their amendments and rules made there under and also any other orders passed by the Hon'ble Supreme Court of India/High Court and any other Court of Law relating to the subject matter.
1.	The Ministry or any other competent authority may alter/modify the above conditions or stipulate any further condition in the interest of environment protection.
Miscellaneous	
1.	The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.
1.	The project proponent shall monitor the criteria pollutants level namely; PM10, S02, NOx (ambient levels as well as stack emissions) or critical sectoral parameters, indicated for the projects and display the same at a convenient location for disclosure to the public and put on the website of the company.
Miscellaneous	
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	44) The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall abide by all the commitments and recommendations made in the EIA/EMP report, commitment made during Public Hearing and also that during their presentation to the Expert Appraisal Committee.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The Project Proponent shall prepare digital map (land use & land cover) of the entire lease area once in five years purpose of monitoring land use pattern and submit a report to concerned Regional Office of the MoEF&CC.
1.	In pursuant to Ministrys O.M No 22-34/2018-IA.III dated 16.01.2020 to comply with the direction made by Honble Supreme Court on 8.01.2020 in W.P. (Civil) No 114/2014 in the matter Common Cause vs Union of India, the mining lease holder shall after ceasing mining operations, undertake regrassing the mining area and any other area which may have been disturbed due to other mining activities and restore the land to a condition which

	is fit for growth of fodder, flora, fauna etc.
1.	The concerned Regional Office of the MoEF&CC shall randomly monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the MoEF&CC officer(s) by furnishing the requisite data / information / monitoring reports.
1.	Any appeal against this environmental clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.

3.15. Agenda Item No 15:

3.15.1. Details of the proposal

SAND GRAVEL AND BOULDER MINING PERMIT AREA AT MAHURBRA AREA OF MAHUR RIVER by **dima hasao forest division(west)** located at **DIMA HASAO,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/527879/2025	SEAC/SEIAA.4050/2025	06/03/2025	Mining of minerals (1(a))

3.15.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :05/04/2025

Deliberations of SEAC 1 :

Due deliberations and discussions are held. Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized.

The Committee is of the opinion that the DFO has taken requisite steps to complete the preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} and placed the same for appraisal and final approval by the competent authority. It is pertinent to mention that *Evaluation* and *Appraisal* of the final DSR for the district has already been done by the SEAC & SEIAA, Assam.

It is revealed that the instant proposal is included in the approved DSR of the district showing the quantity allotted for mining as reflected at **Page No. 24, Sl. No 35** with the quantity of different minerals measuring **25,218 Cu M Stone.**

Further, the approved copy of the DSR for the district is yet to be placed in public domain as required by the competent authority and the SEAC urge the DFO to do the needful immediately.

In view of the above scenario the Committee is of the opinion that the DFO shall make a presentation of the same after inclusion of the instant proposal in the district DSR with the permissible quantity of different minor minerals in question in terms of the guidelines followed.

The Committee deem it appropriate to recommend the grant of EC by the SEIAA allowing extraction of minor mineral for **1(One) year** as recommended quantity allotted for mining reflected at **Page No. 24, Sl. No 35** with the quantity of different minerals measuring **25,218 Cu M Stone (Boulder)**.

Decision: Recommended for grant of EC for **1 (one) year** only allowing extraction of minor mineral measuring **25,218 Cu M Stone (Boulder)**.

3.15.3. Deliberations by the SEIAA in current meetings

The proposal is refer back to SEAC as the proposal is not in the DSR.

3.15.4. Recommendation of SEIAA

Refer-Back to SEAC for Reconsideration

3.16. Agenda Item No 16:

3.16.1. Details of the proposal

Jatinga River Minor Mineral Unit - 3 (Stone) by **DFO CACHAR** located at **CACHAR,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/498761/2024	SEAC/SEIAA.4052/2025	27/03/2025	Mining of minerals (1(a))

3.16.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :05/04/2025

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. Due deliberations and discussions are held.

The Committee is of the opinion to urge the DFO for taking requisite steps to comply with the deficiencies of the final District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG'2016 and EMGSM'2020} and place the same for authentication with its observations for necessary corrections and compliance.

It is pertinent to mention that Evaluation, Examination and Appraisal of the final DSR for the district has already been done by the SEAC with its observations for compliance and recommended *in principle* for further approval by the SEIAA, Assam. It is revealed that the instant proposal is already approved in the DSR with the quantity allotted for mining.

The approved copy of the DSR for the district is yet to be placed in public domain as required by the competent authority in the DC, Cachar and the SEAC urge the DFO to do the needful immediately after due approval of the same by the SEIAA.

It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the development of infrastructure in progress specially to strengthen the road network connectivity and other developmental works after the ravages of flood in the whole state which is a *sine qua non* for overall development and economic growth of the state while the impact on environment also require due diligence and consideration with proper safeguards.

The Committee deem it appropriate to recommend the grant of EC by the SEIAA allowing extraction of minor mineral for 1 (one) year, as recommended in the mining plan, with the quantity of **33,200 Cu M** of Stone in 1 (one) year with an observation that the DFO, Cachar shall submit the approved DSR from the competent authority for further consideration of the balance quantity for the project allowing mining by the Proponent within a period of **1 (one) month**.

Decision: Recommended for grant of EC for **1 (one)** year only for **33,200 Cu M** of **Stone**.

3.16.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 4.67Ha with a quantity of 7,500Cu M of Stone for 6 (six) months subjected to the terms and conditions laid down by SEAC and that the area in question is to be reflected in the approved final DSR.

3.16.4. Recommendation of SEIAA

Approved

3.16.5. Details of Environment Conditions

3.16.5.1. Specific

GENERAL CONDITIONS BY SEAC	
1.	This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan and the approved DSR for the district.
2.	This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates recorded in

	the approved DSR; (b) the active bank of the river is not disturbed / damaged because of mining and transportation of mining materials; (c) the Proponent shall extract the approved quantity of minerals indicated herein with maximum mining depth of up to 1 (one) meter only from the non-mined surface.
3.	The quantities of minor mineral allowed for extraction, annually, in terms of the approved DSR shall not be exceeded by the Proponent.
4.	The Orders of the Hon'ble Apex Court, the NGT (Eastern Bench), Kolkata; the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF& CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} shall be followed by the Proponent.
SPECIFIC CONDITIONS BY SEAC	
1.	Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF& CC for non manual extraction which need to be adhered to by the concerned DFO.
2.	The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period.
3.	The DFO shall comply with necessary formalities for transfer of the EC to the lessee with due NOC for filing application to the SEIAA before allowing mining so that the entire accountability in mining is vested on the lessee / Proponent with the same terms and conditions stipulated in the EC as per the EIA Notification, 2006.
4.	The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan/DSR before allowing any mining.
5.	CER activities shall be carried out / undertaken by the Proponent and minimum estimated cost to be Rs 8.00 Lakh (Eight Lakh) only shall be earmarked for the purposes.
6.	Necessary drinking water facilities, toilets and provision for solar lights shall be made in the nearby village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st half of the year of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report.
7.	Plantation activities shall be carried out / undertaken in any educational institution or Govt lands along the proposed mining area involving local NGOs, School / College students and an adequate fund shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with due consultation of the DFO and shall make effort to label the plant species for the benefits of the villagers, common people and specially the school/college students.
8.	The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Agor(*Aquillariamalaccensis*), Amlokhi (*Phyllanthus emblica*), Hilikha (*Terminalia*

	chebula), Asoca (*Saraca asoca*), Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*), Mohaneem (*Azedirachtaindica*), Jamun (*Syzygiumcuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpus integrifolia*), Ow Tenga (*Dillenia indica*), Chandan (*Santalum album*),Thekera (*Garcinia spp*) etc etc.
9.	Half Yearly Compliance Reports (HCR) are mandatory on the part of project Proponent which need to be uploaded on or before 1st June and 1st December of the calendar year in PARIVESH 2.0 portal and no activity shall be permitted by the DFO without HCR.
10.	Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.16.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	This Environmental Clearance (EC) is subject to orders/ judgment of Honble Supreme Court of India, Honble High Court, Honble NGT and any other Court of Law, Common Cause Conditions as may be applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State Pollution Control Board/ Committee.
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
Statutory compliance	
1.	State Pollution Control Board/Committee shall be responsible for display of this EC letter at its Regional office, District Industries Centre and Collector's office/ Tehsildar's Office for 30 days.
1.	The Project Proponent shall follow the mitigation measures provided in MoEFCC's Office Memorandum No. Z-11013/57/2014-IA.II (M), dated 29th October, 2014, titled "Impact of mining activities on Habitations-Issues related to the mining Projects wherein Habitations and villages are the part of mine lease areas or Habitations and villages are surrounded by the mine lease area."
1.	A copy of EC letter will be marked to concerned Panchayat / local NGO etc. if any, from whom suggestion / representation has been received while processing the proposal.
1.	The Project Proponent shall inform the MoEF&CC for any change in ownership of the mining lease. In case there is any change in ownership or mining lease is transferred. PP needs to apply for transfer of EC as per provisions of the para 11 of EIA Notification, 2006 as amended from time to time.
1.	The Project Authorities should widely advertise about the grant of this EC letter by printing the same in at least two local newspapers, one of which shall be in vernacular language of the concerned area. The advertisement shall be done within 7 days of the issue of the clearance letter mentioning that the instant project has been accorded EC and copy of the EC letter is available with the State Pollution Control Board/Committee and web site of the Ministry of Environment, Forest and Climate Change (www.parivesh.nic.in). A copy of the advertisement may be forwarded to the concerned MoEFCC Regional Office for compliance and record.

1.	The State Government concerned shall ensure that mining operation shall not be commenced till the entire compensation levied, if any, for illegal mining paid by the Project Proponent through their respective Department of Mining & Geology in strict compliance of Judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India & Ors.
1.	The Project proponent complies with all the statutory requirements and judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India &Ors before commencing the mining operations.
Air quality monitoring and preservation	
1.	The project proponent shall submit monthly summary report of continuous stack emission and air quality monitoring and results of manual stack monitoring and manual monitoring of air quality /fugitive emissions to Regional Office of MoEF&CC, Zonal office of CPCB and Regional Office of SPCB along with six-monthly monitoring report.
1.	The project proponent use leak proof trucks/dumpers carrying ore and other raw materials and cover them with tarpaulin.
1.	Design the ventilation system for adequate air changes as per ACGIH document for all tunnels, motor houses, Oil Cellars.
Air quality monitoring and preservation	
1.	Appropriate Air Pollution Control (APC) system shall be provided for all the dust generating points including fugitive dust from all vulnerable sources, so as to comply prescribed stack emission and fugitive emission standards.
Air quality monitoring and preservation	
1.	Effective safeguard measures for prevention of dust generation and subsequent suppression (like regular water sprinkling, metalled road construction etc.) shall be carried out in areas prone to air pollution wherein high levels of PM10 and PM2.5 are evident such as haul road, loading and unloading point and transfer points. The Fugitive dust emissions from all sources shall be regularly controlled by installation of required equipments/ machineries and preventive maintenance. Use of suitable water-soluble chemical dust suppressing agents may be explored for better effectiveness of dust control system. It shall be ensured that air pollution level conform to the standards prescribed by the MoEFCC/ Central Pollution Control Board.
Water quality monitoring and preservation	
1.	Project Proponent shall regularly monitor and maintain records w.r.t. ground water level and quality in and around the mine lease by establishing a network of existing wells as well as new piezo-meter installations during the mining operation in consultation with Central Ground Water Authority/ State Ground Water Department. The Report on changes in Ground water level and quality shall be submitted on six-monthly basis to the Regional Office of the Ministry, CGWA and State Groundwater Department / State Pollution Control Board.
Water quality monitoring and preservation	
1.	In case, immediate mining scheme envisages intersection of ground water table, then Environmental Clearance shall become operational only after receiving formal clearance from CGWA. In case, mining operation involves intersection of ground water table at a later stage, then PP shall ensure that prior approval from CGWA and MoEFCC is in place before such mining operations. The permission for intersection of ground water table shall essentially be based on detailed hydro-geological study of the area.
1.	The Project Proponent shall undertake regular monitoring of natural water course/ water resources/ springs and perennial nallahs existing/ flowing in and around the mine lease including upstream and downstream. Sufficient number of gullies shall be provided at appropriate places within the lease for management of water. The parameters to be monitored shall include their water quality vis-à-vis suitability for usage as per CPCB criteria

	and flow rate. It shall be ensured that no obstruction and/ or alteration be made to water bodies during mining operations without justification and prior approval of MoEFCC. The monitoring of water courses/ bodies existing in lease area shall be carried out four times in a year viz. pre- monsoon (April May), monsoon (August), post-monsoon (November) and winter (January) and the record of monitored data may be sent regularly to Ministry of Environment, Forest and Climate Change and its Regional Office, Central Ground Water Authority and Regional Director, Central Ground Water Board, State Pollution Control Board and Central Pollution Control Board. Clearly showing the trend analysis on six-monthly basis.
Noise and vibration monitoring and prevention	
1.	The peak particle velocity at 500m distance or within the nearest habitation, whichever is closer shall be monitored periodically as per applicable DGMS guidelines.
Noise monitoring and prevention	
1.	Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six-monthly compliance report.
Noise and vibration monitoring and prevention	
1.	The Project Proponent shall take measures for control of noise levels below 85 dBA in the work environment. The workers engaged in operations of HEMM, etc. should be provided with ear plugs /muffs. All personnel including laborers working in dusty areas shall be provided with protective respiratory devices along with adequate training, awareness and information on safety and health aspects. The PP shall be held responsible in case it has been found that workers/ personals/ laborers are working without personal protective equipment.
Mining plan	
1.	The Project Proponent shall adhere to approved mining plan, inter alia, including, total excavation (quantum of mineral, waste, over burden, inter burden and top soil etc.); mining technology; lease area; scope of working (method of mining, overburden & dump management, O.B& dump mining, mineral transportation mode, ultimate depth of mining, concurrent reclamation and reclamation at mine closure; land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life; etc.).
Mining plan	
1.	The land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life shall be governed as per the approved Mining Plan. The excavation vis-à-vis backfilling in the mine lease area and corresponding afforestation to be raised in the reclaimed area shall be governed as per approved mining plan. PP shall ensure the monitoring and management of rehabilitated areas until the vegetation becomes self-sustaining. The compliance status shall be submitted half-yearly to the MoEFCC and its concerned Regional Office.
Waste management	
1.	The waste oil, grease and other hazardous waste shall be disposed of as per the Hazardous & Other waste (Management & Transboundary Movement) Rules, 2016.
1.	Kitchen waste shall be composted or converted to biogas for further use.(to be decided on case to case basis depending on type and size of plant)
Land reclamation	
1.	Check dams of appropriate size, gradient and length shall be constructed around mine pit and OB dumps to prevent storm run-off and sediment flow into adjoining water bodies. A safety margin of 50% shall be kept for designing of sump structures over and above peak rainfall (based on 50 years data) and maximum discharge in the mine and its adjoining area which shall also help in providing adequate retention time period thereby allowing proper settling of sediments/ silt material. The sedimentation pits/ sumps shall be constructed at the corners of the

	garland drains.
Land reclamation	
1.	The Overburden (O.B.), waste and topsoil generated during the mining operations shall be stacked at earmarked OB dump site(s) only and it should not be kept active for a long period of time. The physical parameters of the OB / waste dumps / topsoil dump like height, width and angle of slope shall be governed as per the approved Mining Plan and the guidelines/circulars issued by D.G.M.S. The topsoil shall be used for land reclamation and plantation.
1.	The slope of dumps shall be vegetated in scientific manner with suitable native species to maintain the slope stability, prevent erosion and surface run off. The selection of local species regulates local climatic parameters and help in adaptation of plant species to the microclimate. The gullies formed on slopes should be adequately taken care of as it impacts the overall stability of dumps. The dump mass should be consolidated with the help of dozer/ compactors thereby ensuring proper filling/ leveling of dump mass. In critical areas, use of geo textiles/ geo-membranes / clay liners / Bentonite etc. shall be undertaken for stabilization of the dump.
Green Belt and EMP	
1.	The project proponent shall prepare GHG emissions inventory for the plant and shall submit the programme for reduction of the same including carbon sequestration including plantation.
Transportation	
1.	No Transportation of the minerals shall be allowed in case of roads passing through villages/ habitations. In such cases, PP shall construct a ‘bypass’ road for the purpose of transportation of the minerals leaving an adequate gap (say at least 200 meters) so that the adverse impact of sound and dust along with chances of accidents could be mitigated. All costs resulting from widening and strengthening of existing public road network shall be borne by the PP in consultation with nodal State Govt. Department. Transportation of minerals through road movement in case of existing village/ rural roads shall be allowed in consultation with nodal State Govt. Department only after required strengthening such that the carrying capacity of roads is increased to handle the traffic load. The pollution due to transportation load on the environment will be effectively controlled and water sprinkling will also be done regularly. Vehicular emissions shall be kept under control and regularly monitored. Project should obtain Pollution Under Control (PUC) certificate for all the vehicles from authorized pollution testing centers. [If applicable in case of road transport].
Public hearing and Human health issues	
1.	Occupational health surveillance of the workers shall be done on a regular basis and records maintained as per the Factories Act.
1.	The project proponent shall carry out heat stress analysis for the workmen who work in high temperature work zone and provide Personal Protection Equipment (PPE) as per the norms of Factory Act.
Public hearing and Human health issues	
1.	Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, creche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.
Green Belt	
1.	The Project Proponent shall develop greenbelt in 7.5m wide safety zone all along the mine lease boundary as per the guidelines of CPCB in order to arrest pollution emanating from mining operations within the lease. The whole Green belt shall be developed within first 5 years starting from windward side of the active mining area. The development of greenbelt shall be governed as per the EC granted by the Ministry irrespective of the stipulation made in approved mine plan.

Corporate Environment Responsibility	
1.	Self-environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Corporate Environment Responsibility	
1.	All the recommendations made in the Charter on Corporate Responsibility for Environment Protection (CREP) for the Mineral Beneficiation plants shall be implemented.
Corporate Environment Responsibility	
1.	Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the Six Monthly Compliance Report.
1.	The Project Proponent shall submit the time- bound action plan to the concerned regional office of the Ministry within 6 months from the date of issuance of environmental clearance for undertaking the activities committed during public consultation by the project proponent and as discussed by the EAC, in terms of the provisions of the MoEF&CC Office Memorandum No.22-65/2017-IA.III dated 30 September, 2020. The action plan shall be implemented within three years of commencement of the project.
Miscellaneous	
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	Concealing factual data failure to comply with any or submission of false/ fabricated data and of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act, 1986.
1.	The Project Authorities should inform to the Regional Office regarding date of financial closures and final approval of the project by the concerned authorities and the date of start of land development work.
1.	The above conditions will be enforced inter-alia, under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986 and the Public Liability Insurance Act, 1991 along with their amendments and rules made there under and also any other orders passed by the Hon'ble Supreme Court of India/High Court and any other Court of Law relating to the subject matter.
1.	The Ministry or any other competent authority may alter/modify the above conditions or stipulate any further condition in the interest of environment protection.
Miscellaneous	
1.	The project proponent shall monitor the criteria pollutants level namely; PM10, S02, NOx (ambient levels as well as stack emissions) or critical sectoral parameters, indicated for the projects and display the same at a convenient location for disclosure to the public and put on the website of the company.
1.	The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.
Miscellaneous	

1.	The project proponent shall abide by all the commitments and recommendations made in the EIA/EMP report, commitment made during Public Hearing and also that during their presentation to the Expert Appraisal Committee.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	44) The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	Any appeal against this environmental clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.
1.	The Project Proponent shall prepare digital map (land use & land cover) of the entire lease area once in five years purpose of monitoring land use pattern and submit a report to concerned Regional Office of the MoEF&CC.
1.	The concerned Regional Office of the MoEF&CC shall randomly monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the MoEF&CC officer(s) by furnishing the requisite data / information / monitoring reports.
1.	In pursuant to Ministrys O.M No 22-34/2018-IA.III dated 16.01.2020 to comply with the direction made by Honble Supreme Court on 8.01.2020 in W.P. (Civil) No 114/2014 in the matter Common Cause vs Union of India, the mining lease holder shall after ceasing mining operations, undertake regrassing the mining area and any other area which may have been disturbed due to other mining activities and restore the land to a condition which is fit for growth of fodder, flora, fauna etc.

3.17. Agenda Item No 17:

3.17.1. Details of the proposal

Madhura River Stone Quarry Block No. 1 by **DFO CACHAR** located at **CACHAR,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/486052/2024	SEAC/ SEIAA.3881/2024	05/07/2024	Mining of minerals (1(a))

3.17.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :09/09/2024

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. Due deliberations and discussions are held.

In view of the Order containing directions passed by the Hon'ble Gauhati High Court in the **PIL No 14/2015** the DFO, Cachar was asked to come up with a presentation before the Committee to be assisted by the RQP who had prepared the Mining Plan.The DFO had made a written request to defer the matter for the next meeting. However, the RQP who was present was asked to clarify the directions passed by the Hon'ble Court in the matter and if he had taken note of such directions before going ahead with the preparation of mining plan which got subsequently approved by the DGM, Assam. The RQP could not clarify as to the requirement and need for the EMP/ EIA study for the entire stretch of the Madhura river for sustainable mining in terms of the aforesaid Courts' Order.

The Committee is of the opinion to urge the DFO for taking requisite steps to conduct preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF and CC in 2016 and 2020 {SSMMG'2016 and EMGSM'2020} and to place the same for appraisal and approval by the competent authority after inclusion of the proposed area.

The DFO shall also make a presentation specially for the proposal during the course of appraisal of the DSR for the district clarifying the implications of the Order of the Hon'ble Gauhati High Court and the actions taken in terms of the directions passed.

Date of SEAC 2 :05/04/2025

Deliberations of SEAC 2 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. Due deliberations and discussions are held.

The DFO, Proponent has furnished reply to the **ADS raised as -** The Hon'ble Gauhati High Court in its order dtd. 25-02-2015 stated that mining of stone materials can be carried out for about 16km length of the river allowing 2.Okm reach to be mined in a year on alternate basis and a yearly mining volume of 60,000 m can be permitted for govt. development purpose, subject to approved mining plan and environmental clearance from SEIAA, Assam.

The Committee is of the opinion to urge the DFO for taking requisite steps to complete the preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG'2016 and EMGSM'2020} and place the same for appraisal and final approval by the competent authority. It is pertinent to mention that the *pre appraisal* of the draft DSR for the district has already been done by the SEAC with its observations for necessary corrections and compliance of the guidelines as stipulated.

It is pertinent to mention that Evaluation, Examination and Appraisal of the final DSR for the district has already been done by the SEAC with its observations for compliance and recommended for further approval by the SEIAA, Assam. It is revealed that the instant proposal is already approved in the DSR with the quantity allotted for mining. The approved copy of the DSR for the district is yet to be placed in public domain as required by the competent authority in the DC, Cachar and the SEAC urge the DFO to do the needful immediately.

It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the development of infrastructure in progress specially to strengthen the road network connectivity and other developmental works after the ravages of flood in the whole state which is a *sine qua non* for overall development and economic growth of the state while the impact on environment also require due diligence and consideration with proper safeguards. It is further appreciated that the important stakeholders like the Registered Qualified Person (RQP), Geologist from the Department of Geology and Mining, the Forest official, the official from the Water Resource Department are actively involved in the process for recommending mining in the area by way of consultation including site inspection before appraisal by the SEAC.

The Committee deem it appropriate to recommend the grant of EC by the SEIAA allowing extraction of minor mineral for 1 (one) year, as recommended in the mining plan, with the quantity of quantity of **15,000 Cu M** of Stone in 1(one) year with an observation that the DFO, Cachar shall submit the approved DSR from the competent authority for further consideration of the balance quantity for the project allowing mining by the Proponent within a period of 1 (one) year and to ensure that the area in question is reflected in the DSR

Decision: Recommended for grant of EC for **1 (one)** year only for **15,000 Cu M** of Stone minor minerals.

3.17.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 4.97Ha with a quantity of 7,500 Cu M of Stone minor minerals for 6 (six) months subjected to the terms and conditions laid down by SEAC and that the area in question is to be reflected in the approved final DSR.

3.17.4. Recommendation of SEIAA

Approved

3.17.5. Details of Environment Conditions

3.17.5.1. Specific

GENERAL CONDITIONS BY SEAC	
1.	This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan and the approved DSR for the district.
2.	This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates recorded in the approved DSR; (b) the active bank of the river is not disturbed / damaged because of mining and transportation of mining materials; (c) the Proponent shall extract the approved quantity of minerals indicated herein with maximum mining depth of up to 1 (one) meter only from the non-mined surface.
3.	The quantities of minor mineral allowed for extraction, annually, in terms of the approved DSR shall not be exceeded by the Proponent.
4.	The Orders of the Hon'ble Apex Court, the NGT (Eastern Bench), Kolkata; the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} shall be followed by the Proponent.
SPECIFIC CONDITIONS BY SEAC	
1.	Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO.
2.	The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period.
3.	The DFO shall comply with necessary formalities for transfer of the EC to the lessee with due NOC for filing application to the SEIAA before allowing mining so that the entire accountability in mining is vested on the lessee / Proponent with the same terms and conditions stipulated in the EC as per the EIA Notification, 2006.
4.	The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan/DSR before allowing any mining.
5.	CER activities shall be carried out / undertaken by the Proponent and minimum 2% of the total project cost estimated to be Rs 6.00 Lakh (Six Lakh) only shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the nearby village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st year of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report.
6.	Plantation activities shall be carried out / undertaken in any educational institution or Govt lands along the proposed mining area involving local NGOs, School / College students and an amount of Rs 3.00 (three) Lakh shall be earmarked for the purposes. Efforts shall be made to selectively

	use the saplings of aesthetic, medicinal value, evergreen nature with due consultation of the DFO and shall make effort to label the plant species for the benefits of the villagers, common people and specially the school/ college students.
7.	The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Agor(*Aquillariamalaccensis*), Amlokhi (*Phyllanthus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saracaasoca*),Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*), Mohaneem (*Azedirachtaindica*), Jamun (*Syzygiumcuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpusintegrifolia*), Ow Tenga (*Dilleniaindica*), Chandan (*Santalum album*), Thekera (*Garcinia spp*) etc etc.
8.	Half Yearly Compliance Reports (HCR) are mandatory on the part of project Proponent which need to be uploaded on or before 1st June and 1st December of the calendar year in PARIVESH 2.0 portal and no activity shall be permitted by the DFO without HCR.
9.	Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.17.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	This Environmental Clearance (EC) is subject to orders/ judgment of Honble Supreme Court of India, Honble High Court, Honble NGT and any other Court of Law, Common Cause Conditions as may be applicable.
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State Pollution Control Board/ Committee.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
Statutory compliance	
1.	A copy of EC letter will be marked to concerned Panchayat / local NGO etc. if any, from whom suggestion / representation has been received while processing the proposal.
1.	The State Government concerned shall ensure that mining operation shall not be commenced till the entire compensation levied, if any, for illegal mining paid by the Project Proponent through their respective Department of Mining & Geology in strict compliance of Judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India & Ors.
1.	State Pollution Control Board/Committee shall be responsible for display of this EC letter at its Regional office, District Industries Centre and Collector's office/ Tehsildar's Office for 30 days.
1.	The Project Proponent shall follow the mitigation measures provided in MoEFCC's Office Memorandum No. Z-11013/57/2014-IA.II (M), dated 29th October, 2014, titled "Impact of mining activities on Habitations-Issues related to the mining Projects wherein Habitations and villages are the part of mine lease areas or Habitations and villages are surrounded by the mine lease area."

1.	The Project Proponent shall inform the MoEF&CC for any change in ownership of the mining lease. In case there is any change in ownership or mining lease is transferred. PP needs to apply for transfer of EC as per provisions of the para 11 of EIA Notification, 2006 as amended from time to time.
1.	The Project proponent complies with all the statutory requirements and judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India &Ors before commencing the mining operations.
Air quality monitoring and preservation	
1.	Design the ventilation system for adequate air changes as per ACGIH document for all tunnels, motor houses, Oil Cellars.
1.	The project proponent shall submit monthly summary report of continuous stack emission and air quality monitoring and results of manual stack monitoring and manual monitoring of air quality /fugitive emissions to Regional Office of MoEF&CC, Zonal office of CPCB and Regional Office of SPCB along with six-monthly monitoring report.
1.	The project proponent use leak proof trucks/dumpers carrying ore and other raw materials and cover them with tarpaulin.
Air quality monitoring and preservation	
1.	Appropriate Air Pollution Control (APC) system shall be provided for all the dust generating points including fugitive dust from all vulnerable sources, so as to comply prescribed stack emission and fugitive emission standards.
Air quality monitoring and preservation	
1.	Effective safeguard measures for prevention of dust generation and subsequent suppression (like regular water sprinkling, metalled road construction etc.) shall be carried out in areas prone to air pollution wherein high levels of PM10 and PM2.5 are evident such as haul road, loading and unloading point and transfer points. The Fugitive dust emissions from all sources shall be regularly controlled by installation of required equipments/ machineries and preventive maintenance. Use of suitable water-soluble chemical dust suppressing agents may be explored for better effectiveness of dust control system. It shall be ensured that air pollution level conform to the standards prescribed by the MoEFCC/ Central Pollution Control Board.
Water quality monitoring and preservation	
1.	The project proponent shall install 24x7 continuous effluent monitoring system with respect to standards prescribed in Environment (Protection) Rules 1986 as amended from time to time and connected to SPCB and CPCB online servers and calibrate these system from time to time according to equipment supplier specification through labs recognised under Environment (Protection) Act, 1986 or NABL accredited laboratories.
1.	Project Proponent shall regularly monitor and maintain records w.r.t. ground water level and quality in and around the mine lease by establishing a network of existing wells as well as new piezo-meter installations during the mining operation in consultation with Central Ground Water Authority/ State Ground Water Department. The Report on changes in Ground water level and quality shall be submitted on six-monthly basis to the Regional Office of the Ministry, CGWA and State Groundwater Department / State Pollution Control Board.
Water quality monitoring and preservation	
1.	In case, immediate mining scheme envisages intersection of ground water table, then Environmental Clearance shall become operational only after receiving formal clearance from CGWA. In case, mining operation involves intersection of ground water table at a later stage, then PP shall ensure that prior approval from CGWA and MoEFCC is in place before such mining operations. The permission for intersection of ground water table shall essentially be based on detailed hydro-geological study of the area.

1.	The Project Proponent shall undertake regular monitoring of natural water course/ water resources/ springs and perennial nallahs existing/ flowing in and around the mine lease including upstream and downstream. Sufficient number of gullies shall be provided at appropriate places within the lease for management of water. The parameters to be monitored shall include their water quality vis-à-vis suitability for usage as per CPCB criteria and flow rate. It shall be ensured that no obstruction and/ or alteration be made to water bodies during mining operations without justification and prior approval of MoEFCC. The monitoring of water courses/ bodies existing in lease area shall be carried out four times in a year viz. pre- monsoon (April May), monsoon (August), post-monsoon (November) and winter (January) and the record of monitored data may be sent regularly to Ministry of Environment, Forest and Climate Change and its Regional Office, Central Ground Water Authority and Regional Director, Central Ground Water Board, State Pollution Control Board and Central Pollution Control Board. Clearly showing the trend analysis on six-monthly basis.
Noise and vibration monitoring and prevention	
1.	The peak particle velocity at 500m distance or within the nearest habitation, whichever is closer shall be monitored periodically as per applicable DGMS guidelines.
Noise monitoring and prevention	
1.	Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six-monthly compliance report.
Noise and vibration monitoring and prevention	
1.	The Project Proponent shall take measures for control of noise levels below 85 dBA in the work environment. The workers engaged in operations of HEMM, etc. should be provided with ear plugs /muffs. All personnel including laborers working in dusty areas shall be provided with protective respiratory devices along with adequate training, awareness and information on safety and health aspects. The PP shall be held responsible in case it has been found that workers/ personals/ laborers are working without personal protective equipment.
Mining plan	
1.	The Project Proponent shall adhere to approved mining plan, inter alia, including, total excavation (quantum of mineral, waste, over burden, inter burden and top soil etc.); mining technology; lease area; scope of working (method of mining, overburden & dump management, O.B& dump mining, mineral transportation mode, ultimate depth of mining, concurrent reclamation and reclamation at mine closure; land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life; etc.).
Mining plan	
1.	The land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life shall be governed as per the approved Mining Plan. The excavation vis-à-vis backfilling in the mine lease area and corresponding afforestation to be raised in the reclaimed area shall be governed as per approved mining plan. PP shall ensure the monitoring and management of rehabilitated areas until the vegetation becomes self-sustaining. The compliance status shall be submitted half-yearly to the MoEFCC and its concerned Regional Office.
Waste management	
1.	The waste oil, grease and other hazardous waste shall be disposed of as per the Hazardous & Other waste (Management & Transboundary Movement) Rules, 2016.
1.	Kitchen waste shall be composted or converted to biogas for further use.(to be decided on case to case basis depending on type and size of plant)
Land reclamation	
1.	Check dams of appropriate size, gradient and length shall be constructed around mine pit and OB dumps to

	prevent storm run-off and sediment flow into adjoining water bodies. A safety margin of 50% shall be kept for designing of sump structures over and above peak rainfall (based on 50 years data) and maximum discharge in the mine and its adjoining area which shall also help in providing adequate retention time period thereby allowing proper settling of sediments/ silt material. The sedimentation pits/ sumps shall be constructed at the corners of the garland drains.
Land reclamation	
1.	The Overburden (O.B.), waste and topsoil generated during the mining operations shall be stacked at earmarked OB dump site(s) only and it should not be kept active for a long period of time. The physical parameters of the OB / waste dumps / topsoil dump like height, width and angle of slope shall be governed as per the approved Mining Plan and the guidelines/circulars issued by D.G.M.S. The topsoil shall be used for land reclamation and plantation.
1.	The slope of dumps shall be vegetated in scientific manner with suitable native species to maintain the slope stability, prevent erosion and surface run off. The selection of local species regulates local climatic parameters and help in adaptation of plant species to the microclimate. The gullies formed on slopes should be adequately taken care of as it impacts the overall stability of dumps. The dump mass should be consolidated with the help of dozer/ compactors thereby ensuring proper filling/ leveling of dump mass. In critical areas, use of geo textiles/ geo-membranes / clay liners / Bentonite etc. shall be undertaken for stabilization of the dump.
Green Belt and EMP	
1.	The project proponent shall prepare GHG emissions inventory for the plant and shall submit the programme for reduction of the same including carbon sequestration including plantation.
Transportation	
1.	No Transportation of the minerals shall be allowed in case of roads passing through villages/ habitations. In such cases, PP shall construct a ‘bypass’ road for the purpose of transportation of the minerals leaving an adequate gap (say at least 200 meters) so that the adverse impact of sound and dust along with chances of accidents could be mitigated. All costs resulting from widening and strengthening of existing public road network shall be borne by the PP in consultation with nodal State Govt. Department. Transportation of minerals through road movement in case of existing village/ rural roads shall be allowed in consultation with nodal State Govt. Department only after required strengthening such that the carrying capacity of roads is increased to handle the traffic load. The pollution due to transportation load on the environment will be effectively controlled and water sprinkling will also be done regularly. Vehicular emissions shall be kept under control and regularly monitored. Project should obtain Pollution Under Control (PUC) certificate for all the vehicles from authorized pollution testing centers. [If applicable in case of road transport].
Public hearing and Human health issues	
1.	Occupational health surveillance of the workers shall be done on a regular basis and records maintained as per the Factories Act.
1.	The project proponent shall carry out heat stress analysis for the workmen who work in high temperature work zone and provide Personal Protection Equipment (PPE) as per the norms of Factory Act.
Public hearing and Human health issues	
1.	Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, creche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.
Green Belt	
1.	The Project Proponent shall develop greenbelt in 7.5m wide safety zone all along the mine lease boundary as per the guidelines of CPCB in order to arrest pollution emanating from mining operations within the lease. The whole

	Green belt shall be developed within first 5 years starting from windward side of the active mining area. The development of greenbelt shall be governed as per the EC granted by the Ministry irrespective of the stipulation made in approved mine plan.
Corporate Environment Responsibility	
1.	Self-environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Corporate Environment Responsibility	
1.	All the recommendations made in the Charter on Corporate Responsibility for Environment Protection (CREP) for the Mineral Beneficiation plants shall be implemented.
Corporate Environment Responsibility	
1.	The Project Proponent shall submit the time- bound action plan to the concerned regional office of the Ministry within 6 months from the date of issuance of environmental clearance for undertaking the activities committed during public consultation by the project proponent and as discussed by the EAC, in terms of the provisions of the MoEF&CC Office Memorandum No.22-65/2017-IA.III dated 30 September, 2020. The action plan shall be implemented within three years of commencement of the project.
1.	Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the Six Monthly Compliance Report.
Miscellaneous	
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	Concealing factual data failure to comply with any or submission of false/ fabricated data and of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act, 1986.
1.	The Project Authorities should inform to the Regional Office regarding date of financial closures and final approval of the project by the concerned authorities and the date of start of land development work.
1.	The above conditions will be enforced inter-alia, under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986 and the Public Liability Insurance Act, 1991 along with their amendments and rules made there under and also any other orders passed by the Hon’ble Supreme Court of India/High Court and any other Court of Law relating to the subject matter.
1.	The Ministry or any other competent authority may alter/modify the above conditions or stipulate any further condition in the interest of environment protection.
Miscellaneous	
1.	The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.
1.	The project proponent shall monitor the criteria pollutants level namely; PM10, S02, NOx (ambient levels as well as stack emissions) or critical sectoral parameters, indicated for the projects and display the same at a convenient

	location for disclosure to the public and put on the website of the company.
Miscellaneous	
1.	The project proponent shall abide by all the commitments and recommendations made in the EIA/EMP report, commitment made during Public Hearing and also that during their presentation to the Expert Appraisal Committee.
1.	44) The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	In pursuant to Ministrys O.M No 22-34/2018-IA.III dated 16.01.2020 to comply with the direction made by Honble Supreme Court on 8.01.2020 in W.P. (Civil) No 114/2014 in the matter Common Cause vs Union of India, the mining lease holder shall after ceasing mining operations, undertake regrassing the mining area and any other area which may have been disturbed due to other mining activities and restore the land to a condition which is fit for growth of fodder, flora, fauna etc.
1.	The Project Proponent shall prepare digital map (land use & land cover) of the entire lease area once in five years purpose of monitoring land use pattern and submit a report to concerned Regional Office of the MoEF&CC.
1.	The concerned Regional Office of the MoEF&CC shall randomly monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the MoEF&CC officer(s) by furnishing the requisite data / information / monitoring reports.
1.	Any appeal against this environmental clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.

3.18. Agenda Item No 18:

3.18.1. Details of the proposal

Madhura River Stone Quarry Block No.2 by **DFO CACHAR** located at **CACHAR,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/486073/2024	SEAC/SEIAA. 3882/2024	05/07/2024	Mining of minerals (1(a))

3.18.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :09/09/2024

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. Due deliberations and discussions are held.

In view of the Order containing directions passed by the Hon'ble Gauhati High Court in the PIL No 14/2015 the DFO, Cachar was asked to come up with a presentation before the Committee to be assisted by the RQP who had prepared the Mining Plan.The DFO had made a request to defer the matter for the next meeting. However, the RQP who was present was asked to clarify the directions passed by the Hon'ble Court wherein he could not clarify as to the need for the EMP/ EIA study for the entire stretch of the Madhura river for sustainable mining.

The Committee is of the opinion to urge the DFO for taking requisite steps to conduct preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF and CC in 2016 and 2020 {SSMMG'2016 and EMGSM'2020} and to place the same for appraisal and approval by the competent authority after inclusion of the proposed area.

The DFO shall also make a presentation specially for the proposal during the course of appraisal of the DSR for the district clarifying the implications of the Hon'ble Court and the actions taken in terms of the directions passed.

Date of SEAC 2 :05/04/2025

Deliberations of SEAC 2 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. Due deliberations and discussions are held. The DFO, Proponent has furnished reply to the **ADS raised as-**"*The Hon'ble Gauhati High Court in its order dtd. 25-02-2015 stated that mining of stone materials can be carried out for about 16km length of the river allowing 2.Okm reach to be mined in a year on alternate basis and a yearly mining volume of 60,000 m can be permitted for govt. development purpose, subject to approved mining plan and environmental clearance from SEIAA, Assam.*"

The Committee is of the opinion to urge the DFO for taking requisite steps to comply with the deficiencies of the final District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG'2016 and EMGSM'2020} and place the same for authentication with its observations for necessary corrections and compliance.

It is pertinent to mention that Evaluation, Examination and Appraisal of the final DSR for the district has already been done by the SEAC with its observations for compliance and recommended *in principle* for further approval by the SEIAA, Assam. It is revealed that the instant proposal is already approved in the DSR with the quantity allotted for mining.

The approved copy of the DSR for the district is yet to be placed in public domain as required by the competent authority in the DC, Cachar and the SEAC urge the DFO to do the needful immediately after due approval of the same by the SEIAA.

It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the development of infrastructure in progress specially to strengthen the road network connectivity and other developmental works after the ravages of flood in the whole state which is a *sine qua non* for overall development and economic growth of the state while the impact on environment also require due diligence and consideration with proper safeguards.

The Committee deem it appropriate to recommend the grant of EC by the SEIAA allowing extraction of minor mineral for 1 (one) year, as recommended in the mining plan, with the quantity of **15,000Cu M** of Stone in 1(one) year with an observation that the DFO, Cachar shall submit the approved DSR from the competent authority for further consideration of the balance quantity for the project allowing mining by the Proponent within a period of **1 (one) month**.

Decision: Recommended for grant of EC for **1 (one)** year only for **15,000 Cu M** of Stone.

3.18.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 4.71Ha with a quantity of 7,500Cu M of Stone for 6 (six) months subjected to the terms and conditions laid down by SEAC and that the area in question is to be reflected in the approved final DSR.

3.18.4. Recommendation of SEIAA

Approved

3.18.5. Details of Environment Conditions

3.18.5.1. Specific

GENERAL CONDITIONS BY SEAC	
1.	This is subject to the conditions that the proponent shall have to strictly follow all terms and

	conditions laid down in the approved mining plan and the approved DSR for the district.
2.	This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates recorded in the approved DSR; (b) the active bank of the river is not disturbed/ damaged because of mining and transportation of mining materials; (c) the Proponent shall extract the approved quantity of minerals indicated herein with maximum mining depth of up to 1 (one) meter only from the non-mined surface.
3.	The quantities of minor mineral allowed for extraction, annually, in terms of the approved DSR shall not be exceeded by the Proponent.
4.	The Orders of the Hon'ble Apex Court, the NGT (Eastern Bench), Kolkata; the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} shall be followed by the Proponent.
SPECIFIC CONDITIONS BY SEAC	
1.	Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO.
2.	The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period.
3.	The DFO shall comply with necessary formalities for transfer of the EC to the lessee with due NOC for filing application to the SEIAA before allowing mining so that the entire accountability in mining is vested on the lessee / Proponent with the same terms and conditions stipulated in the EC as per the EIA Notification, 2006.
4.	The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan/DSR before allowing any mining.
5.	CER activities shall be carried out / undertaken by the Proponent and minimum estimated cost to be Rs 6.00 Lakh (Six Lakh) only shall be earmarked for the purposes.
6.	Necessary drinking water facilities, toilets and provision for solar lights shall be made in the nearby village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st half of the year of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report.
7.	Plantation activities shall be carried out / undertaken in any educational institution or Govt lands along the proposed mining area involving local NGOs, School / College students and an adequate fund shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with due consultation of the DFO and shall make effort to label the plant species for the

	benefits of the villagers, common people and specially the school/ college students.
8.	The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Agor(*Aquillariamalaccensis*), Amlokhi (*Phyllanthus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*), Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*), Mohaneem (*Azedirachtaindica*), Jamun (*Syzygiumcuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpus integrifolia*), Ow Tenga (*Dillenia indica*), Chandan (*Santalum album*),Thekera (*Garcinia spp*) etc etc.
9.	Half Yearly Compliance Reports (HCR) are mandatory on the part of project Proponent which need to be uploaded on or before 1st June and 1st December of the calendar year in PARIVESH 2.0 portal and no activity shall be permitted by the DFO without HCR.
10.	Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.18.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State Pollution Control Board/ Committee.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	This Environmental Clearance (EC) is subject to orders/ judgment of Honble Supreme Court of India, Honble High Court, Honble NGT and any other Court of Law, Common Cause Conditions as may be applicable.
Statutory compliance	
1.	The Project proponent complies with all the statutory requirements and judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India &Ors before commencing the mining operations.
1.	A copy of EC letter will be marked to concerned Panchayat / local NGO etc. if any, from whom suggestion / representation has been received while processing the proposal.
1.	State Pollution Control Board/Committee shall be responsible for display of this EC letter at its Regional office, District Industries Centre and Collector's office/ Tehsildar's Office for 30 days.
1.	The Project Proponent shall inform the MoEF&CC for any change in ownership of the mining lease. In case there is any change in ownership or mining lease is transferred. PP needs to apply for transfer of EC as per provisions of the para 11 of EIA Notification, 2006 as amended from time to time.
1.	The Project Proponent shall follow the mitigation measures provided in MoEFCC's Office Memorandum No. Z-11013/57/2014-IA.II (M), dated 29th October, 2014, titled "Impact of mining activities on Habitations-Issues related to the mining Projects wherein Habitations and villages are the part of mine lease areas or Habitations and villages are surrounded by the mine lease area."

1.	The State Government concerned shall ensure that mining operation shall not be commenced till the entire compensation levied, if any, for illegal mining paid by the Project Proponent through their respective Department of Mining & Geology in strict compliance of Judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India & Ors.
Air quality monitoring and preservation	
1.	Design the ventilation system for adequate air changes as per ACGIH document for all tunnels, motor houses, Oil Cellars.
1.	The project proponent shall submit monthly summary report of continuous stack emission and air quality monitoring and results of manual stack monitoring and manual monitoring of air quality /fugitive emissions to Regional Office of MoEF&CC, Zonal office of CPCB and Regional Office of SPCB along with six-monthly monitoring report.
1.	The project proponent use leak proof trucks/dumpers carrying ore and other raw materials and cover them with tarpaulin.
Air quality monitoring and preservation	
1.	Appropriate Air Pollution Control (APC) system shall be provided for all the dust generating points including fugitive dust from all vulnerable sources, so as to comply prescribed stack emission and fugitive emission standards.
Air quality monitoring and preservation	
1.	Effective safeguard measures for prevention of dust generation and subsequent suppression (like regular water sprinkling, metalled road construction etc.) shall be carried out in areas prone to air pollution wherein high levels of PM10 and PM2.5 are evident such as haul road, loading and unloading point and transfer points. The Fugitive dust emissions from all sources shall be regularly controlled by installation of required equipments/ machineries and preventive maintenance. Use of suitable water-soluble chemical dust suppressing agents may be explored for better effectiveness of dust control system. It shall be ensured that air pollution level conform to the standards prescribed by the MoEFCC/ Central Pollution Control Board.
Water quality monitoring and preservation	
1.	Project Proponent shall regularly monitor and maintain records w.r.t. ground water level and quality in and around the mine lease by establishing a network of existing wells as well as new piezo-meter installations during the mining operation in consultation with Central Ground Water Authority/ State Ground Water Department. The Report on changes in Ground water level and quality shall be submitted on six-monthly basis to the Regional Office of the Ministry, CGWA and State Groundwater Department / State Pollution Control Board.
Water quality monitoring and preservation	
1.	The Project Proponent shall undertake regular monitoring of natural water course/ water resources/ springs and perennial nallahs existing/ flowing in and around the mine lease including upstream and downstream. Sufficient number of gullies shall be provided at appropriate places within the lease for management of water. The parameters to be monitored shall include their water quality vis-à-vis suitability for usage as per CPCB criteria and flow rate. It shall be ensured that no obstruction and/ or alteration be made to water bodies during mining operations without justification and prior approval of MoEFCC. The monitoring of water courses/ bodies existing in lease area shall be carried out four times in a year viz. pre- monsoon (April May), monsoon (August), post-monsoon (November) and winter (January) and the record of monitored data may be sent regularly to Ministry of Environment, Forest and Climate Change and its Regional Office, Central Ground Water Authority and Regional Director, Central Ground Water Board, State Pollution Control Board and Central Pollution Control Board. Clearly showing the trend analysis on six-monthly basis.
1.	In case, immediate mining scheme envisages intersection of ground water table, then Environmental Clearance shall become operational only after receiving formal clearance from CGWA. In case, mining operation involves

	intersection of ground water table at a later stage, then PP shall ensure that prior approval from CGWA and MoEFCC is in place before such mining operations. The permission for intersection of ground water table shall essentially be based on detailed hydro-geological study of the area.
Noise and vibration monitoring and prevention	
1.	The peak particle velocity at 500m distance or within the nearest habitation, whichever is closer shall be monitored periodically as per applicable DGMS guidelines.
Noise and vibration monitoring and prevention	
1.	The Project Proponent shall take measures for control of noise levels below 85 dBA in the work environment. The workers engaged in operations of HEMM, etc. should be provided with ear plugs /muffs. All personnel including laborers working in dusty areas shall be provided with protective respiratory devices along with adequate training, awareness and information on safety and health aspects. The PP shall be held responsible in case it has been found that workers/ personals/ laborers are working without personal protective equipment.
Mining plan	
1.	The Project Proponent shall adhere to approved mining plan, inter alia, including, total excavation (quantum of mineral, waste, over burden, inter burden and top soil etc.); mining technology; lease area; scope of working (method of mining, overburden & dump management, O.B& dump mining, mineral transportation mode, ultimate depth of mining, concurrent reclamation and reclamation at mine closure; land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life; etc.).
Mining plan	
1.	The land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life shall be governed as per the approved Mining Plan. The excavation vis-à-vis backfilling in the mine lease area and corresponding afforestation to be raised in the reclaimed area shall be governed as per approved mining plan. PP shall ensure the monitoring and management of rehabilitated areas until the vegetation becomes self-sustaining. The compliance status shall be submitted half-yearly to the MoEFCC and its concerned Regional Office.
Land reclamation	
1.	Check dams of appropriate size, gradient and length shall be constructed around mine pit and OB dumps to prevent storm run-off and sediment flow into adjoining water bodies. A safety margin of 50% shall be kept for designing of sump structures over and above peak rainfall (based on 50 years data) and maximum discharge in the mine and its adjoining area which shall also help in providing adequate retention time period thereby allowing proper settling of sediments/ silt material. The sedimentation pits/ sumps shall be constructed at the corners of the garland drains.
Waste management	
1.	Kitchen waste shall be composted or converted to biogas for further use.(to be decided on case to case basis depending on type and size of plant)
1.	The waste oil, grease and other hazardous waste shall be disposed of as per the Hazardous & Other waste (Management & Transboundary Movement) Rules, 2016.
Land reclamation	
1.	The Overburden (O.B.), waste and topsoil generated during the mining operations shall be stacked at earmarked OB dump site(s) only and it should not be kept active for a long period of time. The physical parameters of the OB / waste dumps / topsoil dump like height, width and angle of slope shall be governed as per the approved Mining Plan and the guidelines/circulars issued by D.G.M.S. The topsoil shall be used for land reclamation and plantation.

1.	The slope of dumps shall be vegetated in scientific manner with suitable native species to maintain the slope stability, prevent erosion and surface run off. The selection of local species regulates local climatic parameters and help in adaptation of plant species to the microclimate. The gullies formed on slopes should be adequately taken care of as it impacts the overall stability of dumps. The dump mass should be consolidated with the help of dozer/ compactors thereby ensuring proper filling/ leveling of dump mass. In critical areas, use of geo textiles/ geo-membranes / clay liners / Bentonite etc. shall be undertaken for stabilization of the dump.
Green Belt and EMP	
1.	The project proponent shall prepare GHG emissions inventory for the plant and shall submit the programme for reduction of the same including carbon sequestration including plantation.
Transportation	
1.	No Transportation of the minerals shall be allowed in case of roads passing through villages/ habitations. In such cases, PP shall construct a 'bypass' road for the purpose of transportation of the minerals leaving an adequate gap (say at least 200 meters) so that the adverse impact of sound and dust along with chances of accidents could be mitigated. All costs resulting from widening and strengthening of existing public road network shall be borne by the PP in consultation with nodal State Govt. Department. Transportation of minerals through road movement in case of existing village/ rural roads shall be allowed in consultation with nodal State Govt. Department only after required strengthening such that the carrying capacity of roads is increased to handle the traffic load. The pollution due to transportation load on the environment will be effectively controlled and water sprinkling will also be done regularly. Vehicular emissions shall be kept under control and regularly monitored. Project should obtain Pollution Under Control (PUC) certificate for all the vehicles from authorized pollution testing centers. [If applicable in case of road transport].
Green Belt	
1.	The Project Proponent shall develop greenbelt in 7.5m wide safety zone all along the mine lease boundary as per the guidelines of CPCB in order to arrest pollution emanating from mining operations within the lease. The whole Green belt shall be developed within first 5 years starting from windward side of the active mining area. The development of greenbelt shall be governed as per the EC granted by the Ministry irrespective of the stipulation made in approved mine plan.
Public hearing and Human health issues	
1.	Occupational health surveillance of the workers shall be done on a regular basis and records maintained as per the Factories Act.
1.	The project proponent shall carry out heat stress analysis for the workmen who work in high temperature work zone and provide Personal Protection Equipment (PPE) as per the norms of Factory Act.
Public hearing and Human health issues	
1.	Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, creche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.
Corporate Environment Responsibility	
1.	Self-environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Corporate Environment Responsibility	
1.	All the recommendations made in the Charter on Corporate Responsibility for Environment Protection (CREP) for the Mineral Beneficiation plants shall be implemented.

Corporate Environment Responsibility	
1.	The Project Proponent shall submit the time- bound action plan to the concerned regional office of the Ministry within 6 months from the date of issuance of environmental clearance for undertaking the activities committed during public consultation by the project proponent and as discussed by the EAC, in terms of the provisions of the MoEF&CC Office Memorandum No.22-65/2017-IA.III dated 30 September, 2020. The action plan shall be implemented within three years of commencement of the project.
1.	Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the Six Monthly Compliance Report.
Miscellaneous	
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	The Ministry or any other competent authority may alter/modify the above conditions or stipulate any further condition in the interest of environment protection.
1.	Concealing factual data failure to comply with any or submission of false/ fabricated data and of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act, 1986.
1.	The Project Authorities should inform to the Regional Office regarding date of financial closures and final approval of the project by the concerned authorities and the date of start of land development work.
1.	The above conditions will be enforced inter-alia, under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986 and the Public Liability Insurance Act, 1991 along with their amendments and rules made there under and also any other orders passed by the Hon'ble Supreme Court of India/High Court and any other Court of Law relating to the subject matter.
Miscellaneous	
1.	The project proponent shall monitor the criteria pollutants level namely; PM10, S02, NOx (ambient levels as well as stack emissions) or critical sectoral parameters, indicated for the projects and display the same at a convenient location for disclosure to the public and put on the website of the company.
1.	The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.
Miscellaneous	
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The project proponent shall abide by all the commitments and recommendations made in the EIA/EMP report, commitment made during Public Hearing and also that during their presentation to the Expert Appraisal Committee.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.

1.	44) The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	Any appeal against this environmental clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.
1.	In pursuant to Ministrys O.M No 22-34/2018-IA.III dated 16.01.2020 to comply with the direction made by Honble Supreme Court on 8.01.2020 in W.P. (Civil) No 114/2014 in the matter Common Cause vs Union of India, the mining lease holder shall after ceasing mining operations, undertake regrassing the mining area and any other area which may have been disturbed due to other mining activities and restore the land to a condition which is fit for growth of fodder, flora, fauna etc.
1.	The Project Proponent shall prepare digital map (land use & land cover) of the entire lease area once in five years purpose of monitoring land use pattern and submit a report to concerned Regional Office of the MoEF&CC.
1.	The concerned Regional Office of the MoEF&CC shall randomly monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the MoEF&CC officer(s) by furnishing the requisite data / information / monitoring reports.
Noise monitoring and prevention	
1.	Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six-monthly compliance report.

3.19. Agenda Item No 19:

3.19.1. Details of the proposal

BARAKHAT P.P. LAND ORDINARY CLAY MINING PERMIT AREA by **KAMALESWAR BORO** located at **KAMRUP,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/490671/2024	SEAC/SEIAA. 3890/2024	31/07/2024	Mining of minerals (1(a))

3.19.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :09/09/2024

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. Due deliberations and discussions are held.

The Committee is of the opinion to urge the DFO for taking requisite steps to conduct preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF and CC in 2016 and 2020 {SSMMG'2016 and EMGSM'2020} and to place the same for appraisal and approval by the competent authority after inclusion of the proposed area.

Decision: ADS

Date of SEAC 2 :05/04/2025

Deliberations of SEAC 2 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. Due deliberations and discussions are held.

The Committee is of the opinion to urge the DFO for taking requisite steps to complete the preparation of the final District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF& CC in 2016 and 2020 {SSMMG'2016 and EMGSM'2020} and place the same for evaluation and appraisal by the SEAC and further approval by the competent authority.

It is pertinent to mention that the *pre appraisal* of the draft DSR for the district has already been done by the SEAC and communicated with its observations for necessary corrections and compliance of the guidelines as stipulated.

It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the development of infrastructure in progress specially to strengthen the road connectivity in the interior areas of the district and also other developmental works for overall development and economic growth of the state while the impact on environment also require due diligence and consideration with proper safeguards.

It is further appreciated that the important stakeholders like the Registered Qualified Person (RQP), Geologist from the Department of Geology and Mining, the Forest official, the official from the Revenue Department are actively involved in the process for recommending mining in the area by way of consultation including site inspection before appraisal by the SEAC.

The Committee deem it appropriate to recommend the grant of the EC by the SEIAA allowing extraction of minor mineral for 1(one) year, as recommended in the mining plan, with the quantity measuring 16,150 Cu M of Clay with an observation that the DFO, Kamrup West Division shall submit the approved DSR from the competent authority for further consideration of the balance quantity for the project allowing mining by the Proponent within a period of 3 (three) months and to ensure that the area in question is accordingly reflected in the final DSR.

This is necessitated in view of the process of development works being undertaken for the Construction of Road by the Govt of Assam as has been communicated by the concerned competent authority.

Decision: Recommended for grant of EC for 1(one) year only measuring 16,150 Cu M of Ordinary Clay.

3.19.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 3.31Ha with a quantity of 8,000Cu M of Ordinary Clay for 6 (six) months subjected to the terms and conditions laid down by SEAC and that the area in question is to be reflected in the approved final DSR.

3.19.4. Recommendation of SEIAA

Approved

3.19.5. Details of Environment Conditions

3.19.5.1. Specific

General condition by SEAC	
1.	This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates;

	(b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials; (c) the Proponent shall extract the approved quantity of minerals indicated herein with maximum mining depth of up to 1(one) meter only from the non-mined surface and (d) the DFO shall place the final DSR for further evaluation and appraisal by the SEAC and on the basis of the approved DSR the Proponent may come forward for the balance quantity remaining as may be found permissible for mining.
2.	The quantities of minor mineral allowed for extraction, annually, in terms of the approved DSR shall not be exceeded by the Proponent.
3.	The Orders of the Hon'ble Apex Court, the NGT (Eastern Bench), Kolkata; the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} shall be followed by the Proponent.
4.	Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.
5.	This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan;
Specific condition by SEAC	
1.	Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO.
2.	The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period.
3.	The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan before allowing mining as bounden on the PP.
4.	No mechanized machinery shall be allowed to be used for excavation of mineral from river bed and only on exceptional cases the DFO may permit use of JCB for loading and unloading of mineral in vehicles.
5.	CER activities shall be carried out / undertaken by the Proponent with the estimated cost of Rs 20,000.00 (Twenty thousand) only, shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the nearby village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 3 (three) months of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report (HCR) as mandated to be uploaded by the project Proponent in terms of the OM No IA3-22/1/2022-IA.III Dated 14.06.2024 in pursuance of the EIA Notification 2006.
6.	Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands adjoining the mining area involving local NGOs, School / College students and an amount of Rs

	20,000.00 (Twenty thousand) only, shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. The DFO shall get the same executed / implemented within 3 (three) months of allowing mining in the area and shall upload the reports in PARIVESH 2.0 portal which shall form part of the Half Yearly Compliance Report (HCR) as mandated to be uploaded by the project Proponent in terms of the OM No IA3-22/1/2022-IA.III Dated 14.06.2024 in pursuance of the EIA Notification 2006.
7.	The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Amlokhi (*Phyllanthus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saracaasoca*),Bael (*Aegle marmelos*), Jamun (*Syzygiumcuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpus integrifolia*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*) etc etc.
8.	Half Yearly Compliance Reports (HCR) are mandatory on the part of project Proponent which need to be uploaded on or before 1st June and 1st December of the calendar year in PARIVESH 2.0 portal and no activity shall be permitted by the DFO without HCR.

3.19.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State Pollution Control Board/ Committee.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	This Environmental Clearance (EC) is subject to orders/ judgment of Honble Supreme Court of India, Honble High Court, Honble NGT and any other Court of Law, Common Cause Conditions as may be applicable.
Statutory compliance	
1.	A copy of EC letter will be marked to concerned Panchayat / local NGO etc. if any, from whom suggestion / representation has been received while processing the proposal.
1.	The Project Proponent shall inform the MoEF&CC for any change in ownership of the mining lease. In case there is any change in ownership or mining lease is transferred. PP needs to apply for transfer of EC as per provisions of the para 11 of EIA Notification, 2006 as amended from time to time.
1.	State Pollution Control Board/Committee shall be responsible for display of this EC letter at its Regional office, District Industries Centre and Collector's office/ Tehsildar's Office for 30 days.
1.	The Project proponent complies with all the statutory requirements and judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India &Ors before commencing the mining operations.
1.	The Project Proponent shall follow the mitigation measures provided in MoEFCC's Office Memorandum No. Z-

	11013/57/2014-IA.II (M), dated 29th October, 2014, titled "Impact of mining activities on Habitations-Issues related to the mining Projects wherein Habitations and villages are the part of mine lease areas or Habitations and villages are surrounded by the mine lease area."
1.	The State Government concerned shall ensure that mining operation shall not be commenced till the entire compensation levied, if any, for illegal mining paid by the Project Proponent through their respective Department of Mining & Geology in strict compliance of Judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India & Ors.
Air quality monitoring and preservation	
1.	The project proponent shall submit monthly summary report of continuous stack emission and air quality monitoring and results of manual stack monitoring and manual monitoring of air quality /fugitive emissions to Regional Office of MoEF&CC, Zonal office of CPCB and Regional Office of SPCB along with six-monthly monitoring report.
1.	The project proponent use leak proof trucks/dumpers carrying ore and other raw materials and cover them with tarpaulin.
1.	Design the ventilation system for adequate air changes as per ACGIH document for all tunnels, motor houses, Oil Cellars.
Air quality monitoring and preservation	
1.	Appropriate Air Pollution Control (APC) system shall be provided for all the dust generating points including fugitive dust from all vulnerable sources, so as to comply prescribed stack emission and fugitive emission standards.
Air quality monitoring and preservation	
1.	Effective safeguard measures for prevention of dust generation and subsequent suppression (like regular water sprinkling, metalled road construction etc.) shall be carried out in areas prone to air pollution wherein high levels of PM10 and PM2.5 are evident such as haul road, loading and unloading point and transfer points. The Fugitive dust emissions from all sources shall be regularly controlled by installation of required equipments/ machineries and preventive maintenance. Use of suitable water-soluble chemical dust suppressing agents may be explored for better effectiveness of dust control system. It shall be ensured that air pollution level conform to the standards prescribed by the MoEFCC/ Central Pollution Control Board.
Water quality monitoring and preservation	
1.	Project Proponent shall regularly monitor and maintain records w.r.t. ground water level and quality in and around the mine lease by establishing a network of existing wells as well as new piezo-meter installations during the mining operation in consultation with Central Ground Water Authority/ State Ground Water Department. The Report on changes in Ground water level and quality shall be submitted on six-monthly basis to the Regional Office of the Ministry, CGWA and State Groundwater Department / State Pollution Control Board.
Water quality monitoring and preservation	
1.	In case, immediate mining scheme envisages intersection of ground water table, then Environmental Clearance shall become operational only after receiving formal clearance from CGWA. In case, mining operation involves intersection of ground water table at a later stage, then PP shall ensure that prior approval from CGWA and MoEFCC is in place before such mining operations. The permission for intersection of ground water table shall essentially be based on detailed hydro-geological study of the area.
1.	The Project Proponent shall undertake regular monitoring of natural water course/ water resources/ springs and perennial nallahs existing/ flowing in and around the mine lease including upstream and downstream. Sufficient number of gullies shall be provided at appropriate places within the lease for management of water. The parameters to be monitored shall include their water quality vis-à-vis suitability for usage as per CPCB criteria

	and flow rate. It shall be ensured that no obstruction and/ or alteration be made to water bodies during mining operations without justification and prior approval of MoEFCC. The monitoring of water courses/ bodies existing in lease area shall be carried out four times in a year viz. pre- monsoon (April May), monsoon (August), post-monsoon (November) and winter (January) and the record of monitored data may be sent regularly to Ministry of Environment, Forest and Climate Change and its Regional Office, Central Ground Water Authority and Regional Director, Central Ground Water Board, State Pollution Control Board and Central Pollution Control Board. Clearly showing the trend analysis on six-monthly basis.
Noise and vibration monitoring and prevention	
1.	The peak particle velocity at 500m distance or within the nearest habitation, whichever is closer shall be monitored periodically as per applicable DGMS guidelines.
Noise monitoring and prevention	
1.	Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six-monthly compliance report.
1.	The ambient noise levels should conform to the standards prescribed under E(P)A Rules, 1986 viz. 75 dB(A) during day time and 70 dB(A) during night time.
Noise and vibration monitoring and prevention	
1.	The Project Proponent shall take measures for control of noise levels below 85 dBA in the work environment. The workers engaged in operations of HEMM, etc. should be provided with ear plugs /muffs. All personnel including laborers working in dusty areas shall be provided with protective respiratory devices along with adequate training, awareness and information on safety and health aspects. The PP shall be held responsible in case it has been found that workers/ personals/ laborers are working without personal protective equipment.
Mining plan	
1.	The Project Proponent shall adhere to approved mining plan, inter alia, including, total excavation (quantum of mineral, waste, over burden, inter burden and top soil etc.); mining technology; lease area; scope of working (method of mining, overburden & dump management, O.B& dump mining, mineral transportation mode, ultimate depth of mining, concurrent reclamation and reclamation at mine closure; land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life; etc.).
Mining plan	
1.	The land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life shall be governed as per the approved Mining Plan. The excavation vis-à-vis backfilling in the mine lease area and corresponding afforestation to be raised in the reclaimed area shall be governed as per approved mining plan. PP shall ensure the monitoring and management of rehabilitated areas until the vegetation becomes self-sustaining. The compliance status shall be submitted half-yearly to the MoEFCC and its concerned Regional Office.
Waste management	
1.	The waste oil, grease and other hazardous waste shall be disposed of as per the Hazardous & Other waste (Management & Transboundary Movement) Rules, 2016.
1.	Kitchen waste shall be composted or converted to biogas for further use.(to be decided on case to case basis depending on type and size of plant)
Land reclamation	
1.	Check dams of appropriate size, gradient and length shall be constructed around mine pit and OB dumps to prevent storm run-off and sediment flow into adjoining water bodies. A safety margin of 50% shall be kept for

	designing of sump structures over and above peak rainfall (based on 50 years data) and maximum discharge in the mine and its adjoining area which shall also help in providing adequate retention time period thereby allowing proper settling of sediments/ silt material. The sedimentation pits/ sumps shall be constructed at the corners of the garland drains.
Land reclamation	
1.	The slope of dumps shall be vegetated in scientific manner with suitable native species to maintain the slope stability, prevent erosion and surface run off. The selection of local species regulates local climatic parameters and help in adaptation of plant species to the microclimate. The gullies formed on slopes should be adequately taken care of as it impacts the overall stability of dumps. The dump mass should be consolidated with the help of dozer/ compactors thereby ensuring proper filling/ leveling of dump mass. In critical areas, use of geo textiles/ geo-membranes / clay liners / Bentonite etc. shall be undertaken for stabilization of the dump.
1.	The Overburden (O.B.), waste and topsoil generated during the mining operations shall be stacked at earmarked OB dump site(s) only and it should not be kept active for a long period of time. The physical parameters of the OB / waste dumps / topsoil dump like height, width and angle of slope shall be governed as per the approved Mining Plan and the guidelines/circulars issued by D.G.M.S. The topsoil shall be used for land reclamation and plantation.
Green Belt and EMP	
1.	The project proponent shall prepare GHG emissions inventory for the plant and shall submit the programme for reduction of the same including carbon sequestration including plantation.
Transportation	
1.	No Transportation of the minerals shall be allowed in case of roads passing through villages/ habitations. In such cases, PP shall construct a 'bypass' road for the purpose of transportation of the minerals leaving an adequate gap (say at least 200 meters) so that the adverse impact of sound and dust along with chances of accidents could be mitigated. All costs resulting from widening and strengthening of existing public road network shall be borne by the PP in consultation with nodal State Govt. Department. Transportation of minerals through road movement in case of existing village/ rural roads shall be allowed in consultation with nodal State Govt. Department only after required strengthening such that the carrying capacity of roads is increased to handle the traffic load. The pollution due to transportation load on the environment will be effectively controlled and water sprinkling will also be done regularly. Vehicular emissions shall be kept under control and regularly monitored. Project should obtain Pollution Under Control (PUC) certificate for all the vehicles from authorized pollution testing centers. [If applicable in case of road transport].
Public hearing and Human health issues	
1.	The project proponent shall carry out heat stress analysis for the workmen who work in high temperature work zone and provide Personal Protection Equipment (PPE) as per the norms of Factory Act.
1.	Occupational health surveillance of the workers shall be done on a regular basis and records maintained as per the Factories Act.
Public hearing and Human health issues	
1.	Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, creche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.
Green Belt	
1.	The Project Proponent shall develop greenbelt in 7.5m wide safety zone all along the mine lease boundary as per the guidelines of CPCB in order to arrest pollution emanating from mining operations within the lease. The whole Green belt shall be developed within first 5 years starting from windward side of the active mining area. The

	development of greenbelt shall be governed as per the EC granted by the Ministry irrespective of the stipulation made in approved mine plan.
Corporate Environment Responsibility	
1.	Self-environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Corporate Environment Responsibility	
1.	All the recommendations made in the Charter on Corporate Responsibility for Environment Protection (CREP) for the Mineral Beneficiation plants shall be implemented.
Corporate Environment Responsibility	
1.	Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the Six Monthly Compliance Report.
1.	The Project Proponent shall submit the time- bound action plan to the concerned regional office of the Ministry within 6 months from the date of issuance of environmental clearance for undertaking the activities committed during public consultation by the project proponent and as discussed by the EAC, in terms of the provisions of the MoEF&CC Office Memorandum No.22-65/2017-IA.III dated 30 September, 2020. The action plan shall be implemented within three years of commencement of the project.
Miscellaneous	
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	The Ministry or any other competent authority may alter/modify the above conditions or stipulate any further condition in the interest of environment protection.
1.	Concealing factual data failure to comply with any or submission of false/ fabricated data and of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act, 1986.
1.	The Project Authorities should inform to the Regional Office regarding date of financial closures and final approval of the project by the concerned authorities and the date of start of land development work.
1.	The above conditions will be enforced inter-alia, under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986 and the Public Liability Insurance Act, 1991 along with their amendments and rules made there under and also any other orders passed by the Hon'ble Supreme Court of India/High Court and any other Court of Law relating to the subject matter.
Miscellaneous	
1.	The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.
1.	The project proponent shall monitor the criteria pollutants level namely; PM10, S02, NOx (ambient levels as well as stack emissions) or critical sectoral parameters, indicated for the projects and display the same at a convenient location for disclosure to the public and put on the website of the company.

Miscellaneous	
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	44) The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The project proponent shall abide by all the commitments and recommendations made in the EIA/EMP report, commitment made during Public Hearing and also that during their presentation to the Expert Appraisal Committee.
1.	The concerned Regional Office of the MoEF&CC shall randomly monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the MoEF&CC officer(s) by furnishing the requisite data / information / monitoring reports.
1.	In pursuant to Ministrys O.M No 22-34/2018-IA.III dated 16.01.2020 to comply with the direction made by Honble Supreme Court on 8.01.2020 in W.P. (Civil) No 114/2014 in the matter Common Cause vs Union of India, the mining lease holder shall after ceasing mining operations, undertake regrassing the mining area and any other area which may have been disturbed due to other mining activities and restore the land to a condition which is fit for growth of fodder, flora, fauna etc.
1.	The Project Proponent shall prepare digital map (land use & land cover) of the entire lease area once in five years purpose of monitoring land use pattern and submit a report to concerned Regional Office of the MoEF&CC.
1.	Any appeal against this environmental clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.

3.20. Agenda Item No 20:

3.20.1. Details of the proposal

Amtreng Borpani River Sand Contract Permit Area by **HOREN SENAR** located at **WEST KARBI ANGLONG, ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/438361/2023	SEAC/SEIAA.4066/2025	25/02/2025	Mining of minerals (1(a))

3.20.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :05/04/2025

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. Due deliberations and discussions are held.

The Committee is of the opinion that the DFO has taken requisite steps to complete the preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF& CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} and placed the same for appraisal and approval by the competent authority.

It is pertinent to mention that *Evaluation* and *Appraisal* of the final DSR for the district has already been done by the SEAC & SEIAA, Assam. It is revealed that the instant proposal is already approved in the DSR with the permissible quantity measuring 6,600 Cu M of Sand mineral for mining in terms of the approved DSR within mining area of 0.44 ha (Go Zone area) which need to be clearly demarcated on ground with the GPS coordinates as approved in the DSR for the district.The Committee deem it appropriate to recommend the grant of EC by the SEIAA allowing extraction of minor mineral for 1(One) year only, as recommended in terms of the approved DSR-(Page No. 111 ,SL. No 18) with the quantity of minor mineral measuring 5,000 Cu M of Sand as in the approved DSR an area measuring 2.20 ha is not recommended due to presence of highway within 100 m.

Decision: Recommended grant of EC for only allowing extraction of minor mineral measuring 5,000 Cu M of Sand.

3.20.3. Deliberations by the SEIAA in current meetings

The reserve area in the Approved Mining Plan are in stark contrast to the figures included in the DSR. Submit new Approved Mining Plan as per Approved DSR.

3.20.4. Recommendation of SEIAA

Deferred for ADS

3.21. Agenda Item No 21:

3.21.1. Details of the proposal

Saukuchi Village P.P. Land Ordinary Earth Mining Permit Area by **mijing gayari** located at **BAKSA,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/524602/2025	SEAC/SEIAA.4063/2025	01/03/2025	Mining of minerals (1(a))

3.21.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :05/04/2025

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. Due deliberations and discussions are held.

The Committee urged the DFO for taking requisite steps to complete the preparation of the final District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF& CC in 2016 and 2020 {SSMMG'2016 and EMGSM'2020} and place the same for evaluation and appraisal by the SEAC and further approval by the competent authority.

It is pertinent to mention that the the *Evaluation* and A*ppraisal* of the final DSR for the district has already been done by the SEAC and communicated with its observations for necessary corrections and compliance of the guidelines as stipulated and recommended for approval by the SEIAA..

It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the development of infrastructure in progress specially to strengthen the road connectivity in the interior areas of the district and also other developmental works for overall development and economic growth of the state while the impact on environment also require due diligence and consideration with proper safeguards. It is further appreciated that the important stakeholders like the Registered Qualified Person (RQP), Geologist from the Department of Geology and Mining, the Forest official, the official from the Water Resource Department are actively involved in the process for recommending mining in the area by way of consultation including site inspection before appraisal by the SEAC.

The Committee deem it appropriate to recommend the grant of the EC by the SEIAA allowing extraction of minor mineral for 6 (Six) months with the quantity measuring 6,150 Cu M of Ordinary Earth with an observation that the DFO, Baksa Division shall submit the approved DSR from the competent authority for further consideration of the balance quantity for the project allowing mining by the Proponent within a period of 3 (three) months and to ensure that the area in question is accordingly reflected in the final DSR. This is necessitated in view of the process of development works being undertaken for the Construction of Martyr Sujit Narzary memorial Auditorium at Mushalpur under the BTC as has been communicated by the concerned competent authority.

Decision: Recommended for grant of EC for 6 (Six) months only measuring 6,150Cu M of ordinary earth.

3.21.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 1.26Ha with a quantity of 6,150Cu M of Ordinary Earth for 6(six) months subjected to the terms and conditions laid down by SEAC and that the area in question is to be reflected in the approved final DSR.

3.21.4. Recommendation of SEIAA

Approved

3.21.5. Details of Environment Conditions

3.21.5.1. Specific

General condition by SEAC	
1.	This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates;

	(b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials; (c) the Proponent shall extract the approved quantity of minerals indicated herein with maximum mining depth of up to 1(one) meter only from the non-mined surface and (d) the DFO shall place the final DSR for further evaluation and appraisal by the SEAC and on the basis of the approved DSR the Proponent may come forward for the balance quantity remaining as may be found permissible for mining.
2.	The quantities of minor mineral allowed for extraction, annually, in terms of the approved DSR shall not be exceeded by the Proponent.
3.	The Orders of the Hon'ble Apex Court, the NGT (Eastern Bench), Kolkata; the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} shall be followed by the Proponent.
4.	This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan;
Specific condition by SEAC	
1.	Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO.
2.	The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period.
3.	The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan before allowing mining as bounden on the PP.
4.	No mechanized machinery shall be allowed to be used for excavation of mineral from river bed and only on exceptional cases the DFO may permit use of JCB for loading and unloading of mineral in vehicles.
5.	CER activities shall be carried out / undertaken by the Proponent with the estimated cost of Rs 20,000.00 (twenty thousand) only shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the nearby village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 3 (three) months of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report (HCR) as mandated to be uploaded by the project Proponent in terms of the OM No IA3-22/1/2022-IA.III Dated 14.06.2024 in pursuance of the EIA Notification 2006.
6.	Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands adjoining the mining area involving local NGOs, School / College students and an amount of Rs 20,000(Twenty) thousand shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO

	and label the plant species for the benefits of the villagers, common people and specially the school students. The DFO shall get the same executed / implemented within 3 (three) months of allowing mining in the area and shall upload the reports in PARIVESH 2.0 portal which shall form part of the Half Yearly Compliance Report (HCR) as mandated to be uploaded by the project Proponent in terms of the OM No IA3-22/1/2022-IA.III Dated 14.06.2024 in pursuance of the EIA Notification 2006.
7.	The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Amlokhi (*Phyllanthus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*),Bael (*Aegle marmelos*), Jamun (*Syzygiumcuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpus integrifolia*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*) etc etc.
8.	Half Yearly Compliance Reports (HCR) are mandatory on the part of project Proponent which need to be uploaded on or before 1st June and 1st December of the calendar year in PARIVESH 2.0 portal and no activity shall be permitted by the DFO without HCR.
9.	Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.21.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	This Environmental Clearance (EC) is subject to orders/ judgment of Honble Supreme Court of India, Honble High Court, Honble NGT and any other Court of Law, Common Cause Conditions as may be applicable.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State Pollution Control Board/ Committee.
Statutory compliance	
1.	A copy of EC letter will be marked to concerned Panchayat / local NGO etc. if any, from whom suggestion / representation has been received while processing the proposal.
1.	The Project Proponent shall follow the mitigation measures provided in MoEFCC's Office Memorandum No. Z-11013/57/2014-IA.II (M), dated 29th October, 2014, titled "Impact of mining activities on Habitations-Issues related to the mining Projects wherein Habitations and villages are the part of mine lease areas or Habitations and villages are surrounded by the mine lease area."
1.	State Pollution Control Board/Committee shall be responsible for display of this EC letter at its Regional office, District Industries Centre and Collector's office/ Tehsildar's Office for 30 days.
1.	The Project Proponent shall inform the MoEF&CC for any change in ownership of the mining lease. In case there is any change in ownership or mining lease is transferred. PP needs to apply for transfer of EC as per provisions of the para 11 of EIA Notification, 2006 as amended from time to time.

1.	The Project proponent complies with all the statutory requirements and judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India &Ors before commencing the mining operations.
1.	The State Government concerned shall ensure that mining operation shall not be commenced till the entire compensation levied, if any, for illegal mining paid by the Project Proponent through their respective Department of Mining & Geology in strict compliance of Judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India & Ors.
Air quality monitoring and preservation	
1.	The project proponent shall submit monthly summary report of continuous stack emission and air quality monitoring and results of manual stack monitoring and manual monitoring of air quality /fugitive emissions to Regional Office of MoEF&CC, Zonal office of CPCB and Regional Office of SPCB along with six-monthly monitoring report.
1.	Design the ventilation system for adequate air changes as per ACGIH document for all tunnels, motor houses, Oil Cellars.
1.	The project proponent use leak proof trucks/dumpers carrying ore and other raw materials and cover them with tarpaulin.
Air quality monitoring and preservation	
1.	Appropriate Air Pollution Control (APC) system shall be provided for all the dust generating points including fugitive dust from all vulnerable sources, so as to comply prescribed stack emission and fugitive emission standards.
Air quality monitoring and preservation	
1.	Effective safeguard measures for prevention of dust generation and subsequent suppression (like regular water sprinkling, metalled road construction etc.) shall be carried out in areas prone to air pollution wherein high levels of PM10 and PM2.5 are evident such as haul road, loading and unloading point and transfer points. The Fugitive dust emissions from all sources shall be regularly controlled by installation of required equipments/ machineries and preventive maintenance. Use of suitable water-soluble chemical dust suppressing agents may be explored for better effectiveness of dust control system. It shall be ensured that air pollution level conform to the standards prescribed by the MoEFCC/ Central Pollution Control Board.
Water quality monitoring and preservation	
1.	The Project Proponent shall undertake regular monitoring of natural water course/ water resources/ springs and perennial nallahs existing/ flowing in and around the mine lease including upstream and downstream. Sufficient number of gullies shall be provided at appropriate places within the lease for management of water. The parameters to be monitored shall include their water quality vis-à-vis suitability for usage as per CPCB criteria and flow rate. It shall be ensured that no obstruction and/ or alteration be made to water bodies during mining operations without justification and prior approval of MoEFCC. The monitoring of water courses/ bodies existing in lease area shall be carried out four times in a year viz. pre- monsoon (April May), monsoon (August), post-monsoon (November) and winter (January) and the record of monitored data may be sent regularly to Ministry of Environment, Forest and Climate Change and its Regional Office, Central Ground Water Authority and Regional Director, Central Ground Water Board, State Pollution Control Board and Central Pollution Control Board. Clearly showing the trend analysis on six-monthly basis.
1.	In case, immediate mining scheme envisages intersection of ground water table, then Environmental Clearance shall become operational only after receiving formal clearance from CGWA. In case, mining operation involves intersection of ground water table at a later stage, then PP shall ensure that prior approval from CGWA and MoEFCC is in place before such mining operations. The permission for intersection of ground water table shall essentially be based on detailed hydro-geological study of the area.

1.	The project proponent shall monitor regularly ground water quality at least twice a year (pre and post monsoon) at sufficient numbers of piezometers/sampling wells in the plant and adjacent areas through labs recognised under Environment (Protection) Act, 1986 and NABL accredited laboratories.
Noise and vibration monitoring and prevention	
1.	The Project Proponent shall take measures for control of noise levels below 85 dBA in the work environment. The workers engaged in operations of HEMM, etc. should be provided with ear plugs /muffs. All personnel including laborers working in dusty areas shall be provided with protective respiratory devices along with adequate training, awareness and information on safety and health aspects. The PP shall be held responsible in case it has been found that workers/ personals/ laborers are working without personal protective equipment.
Noise and vibration monitoring and prevention	
1.	The peak particle velocity at 500m distance or within the nearest habitation, whichever is closer shall be monitored periodically as per applicable DGMS guidelines.
Noise monitoring and prevention	
1.	Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six-monthly compliance report.
Mining plan	
1.	The land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life shall be governed as per the approved Mining Plan. The excavation vis-à-vis backfilling in the mine lease area and corresponding afforestation to be raised in the reclaimed area shall be governed as per approved mining plan. PP shall ensure the monitoring and management of rehabilitated areas until the vegetation becomes self-sustaining. The compliance status shall be submitted half-yearly to the MoEFCC and its concerned Regional Office.
Mining plan	
1.	The Project Proponent shall adhere to approved mining plan, inter alia, including, total excavation (quantum of mineral, waste, over burden, inter burden and top soil etc.); mining technology; lease area; scope of working (method of mining, overburden & dump management, O.B& dump mining, mineral transportation mode, ultimate depth of mining, concurrent reclamation and reclamation at mine closure; land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life; etc.).
Land reclamation	
1.	The slope of dumps shall be vegetated in scientific manner with suitable native species to maintain the slope stability, prevent erosion and surface run off. The selection of local species regulates local climatic parameters and help in adaptation of plant species to the microclimate. The gullies formed on slopes should be adequately taken care of as it impacts the overall stability of dumps. The dump mass should be consolidated with the help of dozer/ compactors thereby ensuring proper filling/ leveling of dump mass. In critical areas, use of geo textiles/ geo-membranes / clay liners / Bentonite etc. shall be undertaken for stabilization of the dump.
1.	The Overburden (O.B.), waste and topsoil generated during the mining operations shall be stacked at earmarked OB dump site(s) only and it should not be kept active for a long period of time. The physical parameters of the OB / waste dumps / topsoil dump like height, width and angle of slope shall be governed as per the approved Mining Plan and the guidelines/circulars issued by D.G.M.S. The topsoil shall be used for land reclamation and plantation.
Waste management	
1.	Kitchen waste shall be composted or converted to biogas for further use.(to be decided on case to case basis depending on type and size of plant)

1.	The waste oil, grease and other hazardous waste shall be disposed of as per the Hazardous & Other waste (Management & Transboundary Movement) Rules, 2016.
Land reclamation	
1.	Check dams of appropriate size, gradient and length shall be constructed around mine pit and OB dumps to prevent storm run-off and sediment flow into adjoining water bodies. A safety margin of 50% shall be kept for designing of sump structures over and above peak rainfall (based on 50 years data) and maximum discharge in the mine and its adjoining area which shall also help in providing adequate retention time period thereby allowing proper settling of sediments/ silt material. The sedimentation pits/ sumps shall be constructed at the corners of the garland drains.
Transportation	
1.	No Transportation of the minerals shall be allowed in case of roads passing through villages/ habitations. In such cases, PP shall construct a 'bypass' road for the purpose of transportation of the minerals leaving an adequate gap (say at least 200 meters) so that the adverse impact of sound and dust along with chances of accidents could be mitigated. All costs resulting from widening and strengthening of existing public road network shall be borne by the PP in consultation with nodal State Govt. Department. Transportation of minerals through road movement in case of existing village/ rural roads shall be allowed in consultation with nodal State Govt. Department only after required strengthening such that the carrying capacity of roads is increased to handle the traffic load. The pollution due to transportation load on the environment will be effectively controlled and water sprinkling will also be done regularly. Vehicular emissions shall be kept under control and regularly monitored. Project should obtain Pollution Under Control (PUC) certificate for all the vehicles from authorized pollution testing centers. [If applicable in case of road transport].
Green Belt and EMP	
1.	The project proponent shall prepare GHG emissions inventory for the plant and shall submit the programme for reduction of the same including carbon sequestration including plantation.
Public hearing and Human health issues	
1.	The project proponent shall carry out heat stress analysis for the workmen who work in high temperature work zone and provide Personal Protection Equipment (PPE) as per the norms of Factory Act.
1.	Occupational health surveillance of the workers shall be done on a regular basis and records maintained as per the Factories Act.
Public hearing and Human health issues	
1.	Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, creche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.
Green Belt	
1.	The Project Proponent shall develop greenbelt in 7.5m wide safety zone all along the mine lease boundary as per the guidelines of CPCB in order to arrest pollution emanating from mining operations within the lease. The whole Green belt shall be developed within first 5 years starting from windward side of the active mining area. The development of greenbelt shall be governed as per the EC granted by the Ministry irrespective of the stipulation made in approved mine plan.
Corporate Environment Responsibility	
1.	All the recommendations made in the Charter on Corporate Responsibility for Environment Protection (CREP) for the Mineral Beneficiation plants shall be implemented.

Corporate Environment Responsibility	
1.	Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the Six Monthly Compliance Report.
1.	The Project Proponent shall submit the time- bound action plan to the concerned regional office of the Ministry within 6 months from the date of issuance of environmental clearance for undertaking the activities committed during public consultation by the project proponent and as discussed by the EAC, in terms of the provisions of the MoEF&CC Office Memorandum No.22-65/2017-IA.III dated 30 September, 2020. The action plan shall be implemented within three years of commencement of the project.
Corporate Environment Responsibility	
1.	Self-environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Miscellaneous	
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The project proponent shall abide by all the commitments and recommendations made in the EIA/EMP report, commitment made during Public Hearing and also that during their presentation to the Expert Appraisal Committee.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	44) The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	Any appeal against this environmental clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.
1.	The Project Proponent shall prepare digital map (land use & land cover) of the entire lease area once in five years purpose of monitoring land use pattern and submit a report to concerned Regional Office of the MoEF&CC.
1.	In pursuant to Ministrys O.M No 22-34/2018-IA.III dated 16.01.2020 to comply with the direction made by Honble Supreme Court on 8.01.2020 in W.P. (Civil) No 114/2014 in the matter Common Cause vs Union of India, the mining lease holder shall after ceasing mining operations, undertake regrassing the mining area and any other area which may have been disturbed due to other mining activities and restore the land to a condition which is fit for growth of fodder, flora, fauna etc.
1.	The concerned Regional Office of the MoEF&CC shall randomly monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the MoEF&CC officer(s) by furnishing the requisite data / information / monitoring reports.
Miscellaneous	
1.	The project proponent shall monitor the criteria pollutants level namely; PM10, S02, NOx (ambient levels as well as stack emissions) or critical sectoral parameters, indicated for the projects and display the same at a convenient location for disclosure to the public and put on the website of the company.

1.	The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.
Miscellaneous	
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	The Ministry or any other competent authority may alter/modify the above conditions or stipulate any further condition in the interest of environment protection.
1.	Concealing factual data failure to comply with any or submission of false/ fabricated data and of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act, 1986.
1.	The Project Authorities should inform to the Regional Office regarding date of financial closures and final approval of the project by the concerned authorities and the date of start of land development work.
1.	The above conditions will be enforced inter-alia, under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986 and the Public Liability Insurance Act, 1991 along with their amendments and rules made there under and also any other orders passed by the Hon'ble Supreme Court of India/High Court and any other Court of Law relating to the subject matter.
Water quality monitoring and preservation	
1.	Project Proponent shall regularly monitor and maintain records w.r.t. ground water level and quality in and around the mine lease by establishing a network of existing wells as well as new piezo-meter installations during the mining operation in consultation with Central Ground Water Authority/ State Ground Water Department. The Report on changes in Ground water level and quality shall be submitted on six-monthly basis to the Regional Office of the Ministry, CGWA and State Groundwater Department / State Pollution Control Board.

3.22. Agenda Item No 22:

3.22.1. Details of the proposal

CHANDRAPUR VILLAGE ORDINARY EARTH MINING PERMIT AREA by **hemen deka** located at **KAMRUP METRO,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/525438/2025	SEAC/SEIAA.4053/2025	04/03/2025	Mining of minerals (1(a))

3.22.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :05/04/2025

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. Due deliberations and discussions are held.

The Committee had urged the DFO for taking requisite steps to complete the preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF& CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} and place the same for appraisal and final approval by the competent authority.

It is pertinent to mention that *Evaluation* and *Appraisal* of the final DSR for the district has already been done by the SEAC & SEIAA, Assam.

The Committee deem it appropriate to recommend the grant of EC by the SEIAA allowing extraction of minor mineral for 6 (six) months with the quantity of mineral measuring 1,950 Cu Mof Ordinary Earth with an observation that the DFO, Kamrup East Division shall ask the Proponent to get the NOC from the District Commissioner, Kamrup (M) prior to allowing mining in the proposed area.

Decision: Recommended for grant of EC for 6 (six) months only for 1,950 Cu M of mineral.

3.22.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 0.10Ha with a quantity of 1,950Cu M of Ordinary Earth for 6 (six) months subjected to the terms and conditions laid down by SEAC and that the area in question is to be reflected in the approved final DSR.

3.22.4. Recommendation of SEIAA

Approved

3.22.5. Details of Environment Conditions

3.22.5.1. Specific

General Condition by SEAC	
1.	This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan and the approved DSR for the district.
2.	This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates and (b) the Proponent shall extract the approved quantity of mineral indicated herein with maximum mining depth of up to 2 (two) meters only from the non-mined surface area.
3.	The quantities of minor mineral allowed for extraction in terms of the approved Mining Plan shall not be exceeded by the Proponent.
4.	In terms of the Order no-E138008/2 dated 05.02.2025 by the District Magistrate, Kamrup (M), the project Proponent shall obtain the NOC from the DC and to submit to the DFO for allowing mining in the area.
Specific Condition by SEAC	

1.	The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period.
2.	The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan prior to allowing mining.
3.	Half Yearly Compliance Reports (HCR) are mandatory on the part of project Proponent which need to be uploaded on or before 1st June and 1st December of the calendar year in PARIVESH 2.0 portal and no activity shall be permitted by the DFO without HCR.
4.	Methods of excavation:
5.	Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH 2.0 portal.

3.22.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State Pollution Control Board/ Committee.
1.	This Environmental Clearance (EC) is subject to orders/ judgment of Honble Supreme Court of India, Honble High Court, Honble NGT and any other Court of Law, Common Cause Conditions as may be applicable.
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
Statutory compliance	
1.	State Pollution Control Board/Committee shall be responsible for display of this EC letter at its Regional office, District Industries Centre and Collector's office/ Tehsildar's Office for 30 days.
1.	A copy of EC letter will be marked to concerned Panchayat / local NGO etc. if any, from whom suggestion / representation has been received while processing the proposal.
1.	The Project Proponent shall follow the mitigation measures provided in MoEFCC's Office Memorandum No. Z-11013/57/2014-IA.II (M), dated 29th October, 2014, titled "Impact of mining activities on Habitations-Issues related to the mining Projects wherein Habitations and villages are the part of mine lease areas or Habitations and villages are surrounded by the mine lease area."
1.	The State Government concerned shall ensure that mining operation shall not be commenced till the entire compensation levied, if any, for illegal mining paid by the Project Proponent through their respective Department of Mining & Geology in strict compliance of Judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India & Ors.
1.	The Project proponent complies with all the statutory requirements and judgment of Hon'ble Supreme Court dated

	2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India &Ors before commencing the mining operations.
1.	The Project Proponent shall inform the MoEF&CC for any change in ownership of the mining lease. In case there is any change in ownership or mining lease is transferred. PP needs to apply for transfer of EC as per provisions of the para 11 of EIA Notification, 2006 as amended from time to time.
Air quality monitoring and preservation	
1.	The project proponent use leak proof trucks/dumpers carrying ore and other raw materials and cover them with tarpaulin.
1.	The project proponent shall submit monthly summary report of continuous stack emission and air quality monitoring and results of manual stack monitoring and manual monitoring of air quality /fugitive emissions to Regional Office of MoEF&CC, Zonal office of CPCB and Regional Office of SPCB along with six-monthly monitoring report.
1.	Design the ventilation system for adequate air changes as per ACGIH document for all tunnels, motor houses, Oil Cellars.
Air quality monitoring and preservation	
1.	Appropriate Air Pollution Control (APC) system shall be provided for all the dust generating points including fugitive dust from all vulnerable sources, so as to comply prescribed stack emission and fugitive emission standards.
Air quality monitoring and preservation	
1.	Effective safeguard measures for prevention of dust generation and subsequent suppression (like regular water sprinkling, metalled road construction etc.) shall be carried out in areas prone to air pollution wherein high levels of PM10 and PM2.5 are evident such as haul road, loading and unloading point and transfer points. The Fugitive dust emissions from all sources shall be regularly controlled by installation of required equipments/ machineries and preventive maintenance. Use of suitable water-soluble chemical dust suppressing agents may be explored for better effectiveness of dust control system. It shall be ensured that air pollution level conform to the standards prescribed by the MoEFCC/ Central Pollution Control Board.
Water quality monitoring and preservation	
1.	Project Proponent shall regularly monitor and maintain records w.r.t. ground water level and quality in and around the mine lease by establishing a network of existing wells as well as new piezo-meter installations during the mining operation in consultation with Central Ground Water Authority/ State Ground Water Department. The Report on changes in Ground water level and quality shall be submitted on six-monthly basis to the Regional Office of the Ministry, CGWA and State Groundwater Department / State Pollution Control Board.
Water quality monitoring and preservation	
1.	The Project Proponent shall undertake regular monitoring of natural water course/ water resources/ springs and perennial nallahs existing/ flowing in and around the mine lease including upstream and downstream. Sufficient number of gullies shall be provided at appropriate places within the lease for management of water. The parameters to be monitored shall include their water quality vis-à-vis suitability for usage as per CPCB criteria and flow rate. It shall be ensured that no obstruction and/ or alteration be made to water bodies during mining operations without justification and prior approval of MoEFCC. The monitoring of water courses/ bodies existing in lease area shall be carried out four times in a year viz. pre- monsoon (April May), monsoon (August), post-monsoon (November) and winter (January) and the record of monitored data may be sent regularly to Ministry of Environment, Forest and Climate Change and its Regional Office, Central Ground Water Authority and Regional Director, Central Ground Water Board, State Pollution Control Board and Central Pollution Control Board. Clearly showing the trend analysis on six-monthly basis.

1.	In case, immediate mining scheme envisages intersection of ground water table, then Environmental Clearance shall become operational only after receiving formal clearance from CGWA. In case, mining operation involves intersection of ground water table at a later stage, then PP shall ensure that prior approval from CGWA and MoEFCC is in place before such mining operations. The permission for intersection of ground water table shall essentially be based on detailed hydro-geological study of the area.
Noise and vibration monitoring and prevention	
1.	The peak particle velocity at 500m distance or within the nearest habitation, whichever is closer shall be monitored periodically as per applicable DGMS guidelines.
Noise monitoring and prevention	
1.	Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six-monthly compliance report.
Noise and vibration monitoring and prevention	
1.	The Project Proponent shall take measures for control of noise levels below 85 dBA in the work environment. The workers engaged in operations of HEMM, etc. should be provided with ear plugs /muffs. All personnel including laborers working in dusty areas shall be provided with protective respiratory devices along with adequate training, awareness and information on safety and health aspects. The PP shall be held responsible in case it has been found that workers/ personals/ laborers are working without personal protective equipment.
Mining plan	
1.	The Project Proponent shall adhere to approved mining plan, inter alia, including, total excavation (quantum of mineral, waste, over burden, inter burden and top soil etc.); mining technology; lease area; scope of working (method of mining, overburden & dump management, O.B& dump mining, mineral transportation mode, ultimate depth of mining, concurrent reclamation and reclamation at mine closure; land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life; etc.).
Mining plan	
1.	The land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life shall be governed as per the approved Mining Plan. The excavation vis-à-vis backfilling in the mine lease area and corresponding afforestation to be raised in the reclaimed area shall be governed as per approved mining plan. PP shall ensure the monitoring and management of rehabilitated areas until the vegetation becomes self-sustaining. The compliance status shall be submitted half-yearly to the MoEFCC and its concerned Regional Office.
Waste management	
1.	Kitchen waste shall be composted or converted to biogas for further use.(to be decided on case to case basis depending on type and size of plant)
1.	The waste oil, grease and other hazardous waste shall be disposed of as per the Hazardous & Other waste (Management & Transboundary Movement) Rules, 2016.
Land reclamation	
1.	Check dams of appropriate size, gradient and length shall be constructed around mine pit and OB dumps to prevent storm run-off and sediment flow into adjoining water bodies. A safety margin of 50% shall be kept for designing of sump structures over and above peak rainfall (based on 50 years data) and maximum discharge in the mine and its adjoining area which shall also help in providing adequate retention time period thereby allowing proper settling of sediments/ silt material. The sedimentation pits/ sumps shall be constructed at the corners of the garland drains.

Land reclamation	
1.	The Overburden (O.B.), waste and topsoil generated during the mining operations shall be stacked at earmarked OB dump site(s) only and it should not be kept active for a long period of time. The physical parameters of the OB / waste dumps / topsoil dump like height, width and angle of slope shall be governed as per the approved Mining Plan and the guidelines/circulars issued by D.G.M.S. The topsoil shall be used for land reclamation and plantation.
1.	The slope of dumps shall be vegetated in scientific manner with suitable native species to maintain the slope stability, prevent erosion and surface run off. The selection of local species regulates local climatic parameters and help in adaptation of plant species to the microclimate. The gullies formed on slopes should be adequately taken care of as it impacts the overall stability of dumps. The dump mass should be consolidated with the help of dozer/ compactors thereby ensuring proper filling/ leveling of dump mass. In critical areas, use of geo textiles/ geo-membranes / clay liners / Bentonite etc. shall be undertaken for stabilization of the dump.
Green Belt and EMP	
1.	The project proponent shall prepare GHG emissions inventory for the plant and shall submit the programme for reduction of the same including carbon sequestration including plantation.
Transportation	
1.	No Transportation of the minerals shall be allowed in case of roads passing through villages/ habitations. In such cases, PP shall construct a 'bypass' road for the purpose of transportation of the minerals leaving an adequate gap (say at least 200 meters) so that the adverse impact of sound and dust along with chances of accidents could be mitigated. All costs resulting from widening and strengthening of existing public road network shall be borne by the PP in consultation with nodal State Govt. Department. Transportation of minerals through road movement in case of existing village/ rural roads shall be allowed in consultation with nodal State Govt. Department only after required strengthening such that the carrying capacity of roads is increased to handle the traffic load. The pollution due to transportation load on the environment will be effectively controlled and water sprinkling will also be done regularly. Vehicular emissions shall be kept under control and regularly monitored. Project should obtain Pollution Under Control (PUC) certificate for all the vehicles from authorized pollution testing centers. [If applicable in case of road transport].
Public hearing and Human health issues	
1.	Occupational health surveillance of the workers shall be done on a regular basis and records maintained as per the Factories Act.
1.	The project proponent shall carry out heat stress analysis for the workmen who work in high temperature work zone and provide Personal Protection Equipment (PPE) as per the norms of Factory Act.
Public hearing and Human health issues	
1.	Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, creche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.
Green Belt	
1.	The Project Proponent shall develop greenbelt in 7.5m wide safety zone all along the mine lease boundary as per the guidelines of CPCB in order to arrest pollution emanating from mining operations within the lease. The whole Green belt shall be developed within first 5 years starting from windward side of the active mining area. The development of greenbelt shall be governed as per the EC granted by the Ministry irrespective of the stipulation made in approved mine plan.
Corporate Environment Responsibility	

1.	Self-environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Corporate Environment Responsibility	
1.	All the recommendations made in the Charter on Corporate Responsibility for Environment Protection (CREP) for the Mineral Beneficiation plants shall be implemented.
Corporate Environment Responsibility	
1.	Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the Six Monthly Compliance Report.
Miscellaneous	
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	The Ministry or any other competent authority may alter/modify the above conditions or stipulate any further condition in the interest of environment protection.
1.	The Project Authorities should inform to the Regional Office regarding date of financial closures and final approval of the project by the concerned authorities and the date of start of land development work.
1.	Concealing factual data failure to comply with any or submission of false/ fabricated data and of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act, 1986.
Miscellaneous	
1.	The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.
1.	The project proponent shall monitor the criteria pollutants level namely; PM10, S02, NOx (ambient levels as well as stack emissions) or critical sectoral parameters, indicated for the projects and display the same at a convenient location for disclosure to the public and put on the website of the company.
Miscellaneous	
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	44) The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The project proponent shall abide by all the commitments and recommendations made in the EIA/EMP report, commitment made during Public Hearing and also that during their presentation to the Expert Appraisal Committee.

1.	In pursuant to Ministrys O.M No 22-34/2018-IA.III dated 16.01.2020 to comply with the direction made by Honble Supreme Court on 8.01.2020 in W.P. (Civil) No 114/2014 in the matter Common Cause vs Union of India, the mining lease holder shall after ceasing mining operations, undertake regrassing the mining area and any other area which may have been disturbed due to other mining activities and restore the land to a condition which is fit for growth of fodder, flora, fauna etc.
1.	The concerned Regional Office of the MoEF&CC shall randomly monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the MoEF&CC officer(s) by furnishing the requisite data / information / monitoring reports.
1.	The Project Proponent shall prepare digital map (land use & land cover) of the entire lease area once in five years purpose of monitoring land use pattern and submit a report to concerned Regional Office of the MoEF&CC.

3.23. Agenda Item No 23:

3.23.1. Details of the proposal

Ghiladhari P.P. Land Ordinary Clay Mining Permit Area by **sahar ali** located at **DARRANG,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/494313/2024	SEAC/SEIAA.4055/2025	11/03/2025	Mining of minerals (1(a))

3.23.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :05/04/2025

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. Due deliberations and discussions are held.

The Committee is of the opinion to urge the DFO for taking requisite steps to complete the preparation of the final District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF& CC in 2016 and 2020 {SSMMG'2016 and EMGSM'2020} and place the same for evaluation and appraisal by the SEAC and further approval by the competent authority.

It is pertinent to mention that the *pre appraisal* of the draft DSR for the district has already been done by the SEAC and communicated with its observations for necessary corrections and compliance of the guidelines as stipulated.

It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the development of infrastructure in progress and other developmental works requiring restoration after the ravages of flood in the whole state which is a *sine qua non* for overall development and economic growth of the state while the impact on environment also require due diligence and consideration with proper safeguards.

It is further appreciated that the important stakeholders like the Registered Qualified Person (RQP), Geologist from the Department of Geology and Mining, the Forest official, the official from the Water Resource Department are actively involved in the process for recommending mining in the area by way of consultation including site inspection before appraisal by the SEAC.

The Committee deem it appropriate to recommend the grant of the EC by the SEIAA allowing extraction of minor mineral for 6 (Six) months only, as recommended in the mining plan, with the quantity measuring 4,975 Cu M of Claywith an observation that the DFO, N.K Division shall submit the approved DSR from the competent authority after allowing mining by the Proponent within a period of 3 (three) months and to ensure that the area in question is accordingly reflected in the final DSR.

This is necessitated in view of the process of development works being undertaken for the Construction of Road, by the Govt of Assam as has been communicated by the concerned competent authority.

Decision:Recommended for grant of EC for 6 (six) months only measuring 4,975Cu M of Ordinary Clay.

3.23.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 0.51Ha with a quantity of 2,487Cu M of Ordinary Clay for 6 (six) months subjected to the terms and conditions laid down by SEAC and that the area in question is to be reflected in the approved final DSR.

3.23.4. Recommendation of SEIAA

Approved

3.23.5. Details of Environment Conditions

3.23.5.1. Specific

General conditions by SEAC	
1.	This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates recorded in the approved Mining Plan; (b) the active bank of the river is not disturbed / damaged because of mining and transportation

	of mining materials; © the Proponent shall extract the approved quantity of minerals indicated herein with maximum mining depth of up to 1 (one) meter only from the non-mined surface.
2.	The quantities of minor mineral allowed for extraction in terms of the approved Mining Plan shall not be exceeded by the Proponent.
3.	The Orders of the Hon'ble Apex Court, the NGT (Eastern Bench), Kolkata; the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} shall be followed by the Proponent.
4.	This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan and the approved DSR for the district.
Specific conditions by SEAC	
1.	Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF& CC for non manual extraction which need to be adhered to by the concerned DFO.
2.	The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period.
3.	The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan/DSR before allowing any mining.
4.	No mechanized machinery shall be allowed to be used for excavation of mineral from river bed and only on exceptional cases the DFO may permit use of JCB for loading and unloading of mineral in vehicles.
5.	CER activities shall be carried out / undertaken by the Proponent and minimum cost estimated to be Rs 50,000.00 (Fifty Thousand) only shall be earmarked for the purposes.
6.	Plantation activities shall be carried out / undertaken in any educational institution or Govt lands along the proposed mining area involving local NGOs, School / College students.
7.	Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with due consultation of the DFO and shall make effort to label the plant species for the benefits of the villagers, common people and specially the school/college students.
8.	The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Amlokhi (*Phyllanthus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*),Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*), Jamun (*Syzygiumcuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpus integrifolia*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*) etc etc.
9.	Half Yearly Compliance Reports (HCR) are mandatory on the part of project Proponent which need to be uploaded on or before 1st June and 1st December of the calendar year in PARIVESH 2.0 portal and no activity shall be permitted by the DFO without HCR.

10.	Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.23.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	This Environmental Clearance (EC) is subject to orders/ judgment of Honble Supreme Court of India, Honble High Court, Honble NGT and any other Court of Law, Common Cause Conditions as may be applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State Pollution Control Board/ Committee.
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
Statutory compliance	
1.	The Project proponent complies with all the statutory requirements and judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India &Ors before commencing the mining operations.
1.	The Project Proponent shall inform the MoEF&CC for any change in ownership of the mining lease. In case there is any change in ownership or mining lease is transferred. PP needs to apply for transfer of EC as per provisions of the para 11 of EIA Notification, 2006 as amended from time to time.
1.	The State Government concerned shall ensure that mining operation shall not be commenced till the entire compensation levied, if any, for illegal mining paid by the Project Proponent through their respective Department of Mining & Geology in strict compliance of Judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India & Ors.
1.	The Project Proponent shall follow the mitigation measures provided in MoEFCC's Office Memorandum No. Z-11013/57/2014-IA.II (M), dated 29th October, 2014, titled "Impact of mining activities on Habitations-Issues related to the mining Projects wherein Habitations and villages are the part of mine lease areas or Habitations and villages are surrounded by the mine lease area."
1.	A copy of EC letter will be marked to concerned Panchayat / local NGO etc. if any, from whom suggestion / representation has been received while processing the proposal.
1.	State Pollution Control Board/Committee shall be responsible for display of this EC letter at its Regional office, District Industries Centre and Collector's office/ Tehsildar's Office for 30 days.
Air quality monitoring and preservation	
1.	Design the ventilation system for adequate air changes as per ACGIH document for all tunnels, motor houses, Oil Cellars.
1.	The project proponent shall submit monthly summary report of continuous stack emission and air quality monitoring and results of manual stack monitoring and manual monitoring of air quality /fugitive emissions to Regional Office of MoEF&CC, Zonal office of CPCB and Regional Office of SPCB along with six-monthly

	monitoring report.
1.	The project proponent use leak proof trucks/dumpers carrying ore and other raw materials and cover them with tarpaulin.
Air quality monitoring and preservation	
1.	Appropriate Air Pollution Control (APC) system shall be provided for all the dust generating points including fugitive dust from all vulnerable sources, so as to comply prescribed stack emission and fugitive emission standards.
Air quality monitoring and preservation	
1.	Effective safeguard measures for prevention of dust generation and subsequent suppression (like regular water sprinkling, metalled road construction etc.) shall be carried out in areas prone to air pollution wherein high levels of PM10 and PM2.5 are evident such as haul road, loading and unloading point and transfer points. The Fugitive dust emissions from all sources shall be regularly controlled by installation of required equipments/ machineries and preventive maintenance. Use of suitable water-soluble chemical dust suppressing agents may be explored for better effectiveness of dust control system. It shall be ensured that air pollution level conform to the standards prescribed by the MoEFCC/ Central Pollution Control Board.
Water quality monitoring and preservation	
1.	Project Proponent shall regularly monitor and maintain records w.r.t. ground water level and quality in and around the mine lease by establishing a network of existing wells as well as new piezo-meter installations during the mining operation in consultation with Central Ground Water Authority/ State Ground Water Department. The Report on changes in Ground water level and quality shall be submitted on six-monthly basis to the Regional Office of the Ministry, CGWA and State Groundwater Department / State Pollution Control Board.
Water quality monitoring and preservation	
1.	The Project Proponent shall undertake regular monitoring of natural water course/ water resources/ springs and perennial nallahs existing/ flowing in and around the mine lease including upstream and downstream. Sufficient number of gullies shall be provided at appropriate places within the lease for management of water. The parameters to be monitored shall include their water quality vis-à-vis suitability for usage as per CPCB criteria and flow rate. It shall be ensured that no obstruction and/ or alteration be made to water bodies during mining operations without justification and prior approval of MoEFCC. The monitoring of water courses/ bodies existing in lease area shall be carried out four times in a year viz. pre- monsoon (April May), monsoon (August), post-monsoon (November) and winter (January) and the record of monitored data may be sent regularly to Ministry of Environment, Forest and Climate Change and its Regional Office, Central Ground Water Authority and Regional Director, Central Ground Water Board, State Pollution Control Board and Central Pollution Control Board. Clearly showing the trend analysis on six-monthly basis.
1.	In case, immediate mining scheme envisages intersection of ground water table, then Environmental Clearance shall become operational only after receiving formal clearance from CGWA. In case, mining operation involves intersection of ground water table at a later stage, then PP shall ensure that prior approval from CGWA and MoEFCC is in place before such mining operations. The permission for intersection of ground water table shall essentially be based on detailed hydro-geological study of the area.
Noise and vibration monitoring and prevention	
1.	The peak particle velocity at 500m distance or within the nearest habitation, whichever is closer shall be monitored periodically as per applicable DGMS guidelines.
Noise monitoring and prevention	
1.	Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six-monthly compliance report.

Noise and vibration monitoring and prevention	
1.	The Project Proponent shall take measures for control of noise levels below 85 dBA in the work environment. The workers engaged in operations of HEMM, etc. should be provided with ear plugs /muffs. All personnel including laborers working in dusty areas shall be provided with protective respiratory devices along with adequate training, awareness and information on safety and health aspects. The PP shall be held responsible in case it has been found that workers/ personals/ laborers are working without personal protective equipment.
Mining plan	
1.	The Project Proponent shall adhere to approved mining plan, inter alia, including, total excavation (quantum of mineral, waste, over burden, inter burden and top soil etc.); mining technology; lease area; scope of working (method of mining, overburden & dump management, O.B& dump mining, mineral transportation mode, ultimate depth of mining, concurrent reclamation and reclamation at mine closure; land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life; etc.).
Mining plan	
1.	The land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life shall be governed as per the approved Mining Plan. The excavation vis-à-vis backfilling in the mine lease area and corresponding afforestation to be raised in the reclaimed area shall be governed as per approved mining plan. PP shall ensure the monitoring and management of rehabilitated areas until the vegetation becomes self-sustaining. The compliance status shall be submitted half-yearly to the MoEFCC and its concerned Regional Office.
Waste management	
1.	Kitchen waste shall be composted or converted to biogas for further use.(to be decided on case to case basis depending on type and size of plant)
1.	The waste oil, grease and other hazardous waste shall be disposed of as per the Hazardous & Other waste (Management & Transboundary Movement) Rules, 2016.
Land reclamation	
1.	Check dams of appropriate size, gradient and length shall be constructed around mine pit and OB dumps to prevent storm run-off and sediment flow into adjoining water bodies. A safety margin of 50% shall be kept for designing of sump structures over and above peak rainfall (based on 50 years data) and maximum discharge in the mine and its adjoining area which shall also help in providing adequate retention time period thereby allowing proper settling of sediments/ silt material. The sedimentation pits/ sumps shall be constructed at the corners of the garland drains.
Land reclamation	
1.	The Overburden (O.B.), waste and topsoil generated during the mining operations shall be stacked at earmarked OB dump site(s) only and it should not be kept active for a long period of time. The physical parameters of the OB / waste dumps / topsoil dump like height, width and angle of slope shall be governed as per the approved Mining Plan and the guidelines/circulars issued by D.G.M.S. The topsoil shall be used for land reclamation and plantation.
1.	The slope of dumps shall be vegetated in scientific manner with suitable native species to maintain the slope stability, prevent erosion and surface run off. The selection of local species regulates local climatic parameters and help in adaptation of plant species to the microclimate. The gullies formed on slopes should be adequately taken care of as it impacts the overall stability of dumps. The dump mass should be consolidated with the help of dozer/ compactors thereby ensuring proper filling/ leveling of dump mass. In critical areas, use of geo textiles/ geo-membranes / clay liners / Bentonite etc. shall be undertaken for stabilization of the dump.
Green Belt and EMP	

1.	The project proponent shall prepare GHG emissions inventory for the plant and shall submit the programme for reduction of the same including carbon sequestration including plantation.
Transportation	
1.	No Transportation of the minerals shall be allowed in case of roads passing through villages/ habitations. In such cases, PP shall construct a 'bypass' road for the purpose of transportation of the minerals leaving an adequate gap (say at least 200 meters) so that the adverse impact of sound and dust along with chances of accidents could be mitigated. All costs resulting from widening and strengthening of existing public road network shall be borne by the PP in consultation with nodal State Govt. Department. Transportation of minerals through road movement in case of existing village/ rural roads shall be allowed in consultation with nodal State Govt. Department only after required strengthening such that the carrying capacity of roads is increased to handle the traffic load. The pollution due to transportation load on the environment will be effectively controlled and water sprinkling will also be done regularly. Vehicular emissions shall be kept under control and regularly monitored. Project should obtain Pollution Under Control (PUC) certificate for all the vehicles from authorized pollution testing centers. [If applicable in case of road transport].
Public hearing and Human health issues	
1.	The project proponent shall carry out heat stress analysis for the workmen who work in high temperature work zone and provide Personal Protection Equipment (PPE) as per the norms of Factory Act.
1.	Occupational health surveillance of the workers shall be done on a regular basis and records maintained as per the Factories Act.
Public hearing and Human health issues	
1.	Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, creche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.
Green Belt	
1.	The Project Proponent shall develop greenbelt in 7.5m wide safety zone all along the mine lease boundary as per the guidelines of CPCB in order to arrest pollution emanating from mining operations within the lease. The whole Green belt shall be developed within first 5 years starting from windward side of the active mining area. The development of greenbelt shall be governed as per the EC granted by the Ministry irrespective of the stipulation made in approved mine plan.
Corporate Environment Responsibility	
1.	Self-environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Corporate Environment Responsibility	
1.	All the recommendations made in the Charter on Corporate Responsibility for Environment Protection (CREP) for the Mineral Beneficiation plants shall be implemented.
Corporate Environment Responsibility	
1.	The Project Proponent shall submit the time- bound action plan to the concerned regional office of the Ministry within 6 months from the date of issuance of environmental clearance for undertaking the activities committed during public consultation by the project proponent and as discussed by the EAC, in terms of the provisions of the MoEF&CC Office Memorandum No.22-65/2017-IA.III dated 30 September, 2020. The action plan shall be implemented within three years of commencement of the project.

1.	Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the Six Monthly Compliance Report.
Miscellaneous	
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	Concealing factual data failure to comply with any or submission of false/ fabricated data and of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act, 1986.
1.	The above conditions will be enforced inter-alia, under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986 and the Public Liability Insurance Act, 1991 along with their amendments and rules made there under and also any other orders passed by the Hon'ble Supreme Court of India/High Court and any other Court of Law relating to the subject matter.
1.	The Project Authorities should inform to the Regional Office regarding date of financial closures and final approval of the project by the concerned authorities and the date of start of land development work.
1.	The Ministry or any other competent authority may alter/modify the above conditions or stipulate any further condition in the interest of environment protection.
Miscellaneous	
1.	The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.
1.	The project proponent shall monitor the criteria pollutants level namely; PM10, S02, NOx (ambient levels as well as stack emissions) or critical sectoral parameters, indicated for the projects and display the same at a convenient location for disclosure to the public and put on the website of the company.
Miscellaneous	
1.	44) The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The project proponent shall abide by all the commitments and recommendations made in the EIA/EMP report, commitment made during Public Hearing and also that during their presentation to the Expert Appraisal Committee.
1.	The concerned Regional Office of the MoEF&CC shall randomly monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the MoEF&CC officer(s) by furnishing the requisite data / information / monitoring reports.

1.	Any appeal against this environmental clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.
1.	The Project Proponent shall prepare digital map (land use & land cover) of the entire lease area once in five years purpose of monitoring land use pattern and submit a report to concerned Regional Office of the MoEF&CC.
1.	In pursuant to Ministrys O.M No 22-34/2018-IA.III dated 16.01.2020 to comply with the direction made by Honble Supreme Court on 8.01.2020 in W.P. (Civil) No 114/2014 in the matter Common Cause vs Union of India, the mining lease holder shall after ceasing mining operations, undertake regrassing the mining area and any other area which may have been disturbed due to other mining activities and restore the land to a condition which is fit for growth of fodder, flora, fauna etc.

3.24. Agenda Item No 24:

3.24.1. Details of the proposal

Uttar Fulung Govt. Land Ordinary Clay Mining Permit Area by **ABHAY SHARMA** located at **KAMRUP,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/529045/2025	SEAC/SEIAA.4059/2025	13/03/2025	Mining of minerals (1(a))

3.24.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :05/04/2025

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. Due deliberations and discussions are held.

The Committee had urged the DFO for taking requisite steps to complete the preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF& CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} and place the same for appraisal and final approval by the competent authority.

It is pertinent to mention that the *pre appraisal* of the draft DSR for the district has already been done by the SEAC with its observations for necessary corrections and compliance of the guidelines as stipulated.

It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the development of infrastructure in progress in the interior areas of the district and also other developmental works which is a *sine qua non* for overall development and economic growth of the state while the impact on environment also require due diligence and consideration with proper safeguards.

It is further appreciated that the important stakeholders like the Registered Qualified Person (RQP), Geologist from the Department of Geology and Mining, the Forest official, the official from the Revenue Department are actively involved in the process for recommending mining in the area by way of consultation including site inspection before appraisal by the SEAC.

The Committee deem it appropriate to recommend the grant of the EC by the SEIAA allowing extraction of minor mineral for 1(one) year as recommended in the mining plan, with the quantity measuring 16,865 Cu M of Clay with an observation that the DFO, N.K Division shall submit the approved DSR from the competent authority for further consideration of the balance quantity for the project allowing mining by the Proponent within a period of 3 (three) months and to ensure that the area in question is accordingly reflected in the final DSR.

This is necessitated in view of the process of development works being undertaken in 20 Bighas of land by Gauhati Town Club at Phulung, North Guwahati for filling up as has been duly communicated by the concerned competent authority.

Decision: Recommended for grant of EC for 1 (one) year only for 16,865 Cu M of Clay.

3.24.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 2.16Ha with a quantity of 8,500Cu M of Ordinary Clay for 6 (six) months subjected to the terms and conditions laid down by SEAC and that the area in question is to be reflected in the approved final DSR.

3.24.4. Recommendation of SEIAA

Approved

3.24.5. Details of Environment Conditions

3.24.5.1. Specific

General Conditions by SEAC	
1.	This is also subject to the conditions that:

	(a) mining shall be confined and limited to the area falling within the GPS coordinates; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials; (c) the Proponent shall extract the approved quantity of minerals indicated herein with maximum mining depth of up to 1(one) meter only from the non-mined surface and (d) the DFO shall place the final DSR for further evaluation and appraisal by the SEAC and on the basis of the approved DSR the Proponent may come forward for the balance quantity remaining as may be found permissible for mining.
2.	The quantities of minor mineral allowed for extraction, annually, in terms of the approved DSR shall not be exceeded by the Proponent.
3.	The Orders of the Hon'ble Apex Court, the NGT (Eastern Bench), Kolkata; the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} shall be followed by the Proponent.
4.	This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan;
Specific Conditions by SEAC	
1.	Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO.
2.	The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period.
3.	The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan before allowing mining as bounden on the PP.
4.	No mechanized machinery shall be allowed to be used for excavation of mineral from river bed and only on exceptional cases the DFO may permit use of JCB for loading and unloading of mineral in vehicles.
5.	CER activities shall be carried out / undertaken by the Proponent with the estimated cost Rs 2,00,000.00 (Two lakhs) only shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the nearby village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 3 (three) months of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report (HCR) as mandated to be uploaded by the project Proponent in terms of the OM No IA3-22/1/2022-IA.III Dated 14.06.2024 in pursuance of the EIA Notification 2006.
6.	Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands adjoining the mining area involving local NGOs, School / College students and an amount of Rs 2,00,000.00 (Two lakhs) only, shall be earmarked for the purposes.

7.	Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. The DFO shall get the same executed / implemented within 3 (three) months of allowing mining in the area and shall upload the reports in PARIVESH 2.0 portal which shall form part of the Half Yearly Compliance Report (HCR) as mandated to be uploaded by the project Proponent in terms of the OM No IA3-22/1/2022-IA.III Dated 14.06.2024 in pursuance of the EIA Notification 2006.
8.	The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Amlokhi (*Phyllanthus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*),Bael (*Aegle marmelos*), Jamun (*Syzygiumcuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpus integrifolia*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*) etc etc.
9.	Half Yearly Compliance Reports (HCR) are mandatory on the part of project Proponent which need to be uploaded on or before 1st June and 1st December of the calendar year in PARIVESH 2.0 portal and no activity shall be permitted by the DFO without HCR.
10.	Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.24.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State Pollution Control Board/ Committee.
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	This Environmental Clearance (EC) is subject to orders/ judgment of Honble Supreme Court of India, Honble High Court, Honble NGT and any other Court of Law, Common Cause Conditions as may be applicable.
Statutory compliance	
1.	The Project proponent complies with all the statutory requirements and judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India &Ors before commencing the mining operations.
1.	The Project Proponent shall inform the MoEF&CC for any change in ownership of the mining lease. In case there is any change in ownership or mining lease is transferred. PP needs to apply for transfer of EC as per provisions of the para 11 of EIA Notification, 2006 as amended from time to time.
1.	State Pollution Control Board/Committee shall be responsible for display of this EC letter at its Regional office, District Industries Centre and Collector's office/ Tehsildar's Office for 30 days.
1.	The Project Proponent shall follow the mitigation measures provided in MoEFCC's Office Memorandum No. Z-11013/57/2014-IA.II (M), dated 29th October, 2014, titled "Impact of mining activities on Habitations-Issues

	related to the mining Projects wherein Habitations and villages are the part of mine lease areas or Habitations and villages are surrounded by the mine lease area.“
1.	A copy of EC letter will be marked to concerned Panchayat / local NGO etc. if any, from whom suggestion / representation has been received while processing the proposal.
1.	The State Government concerned shall ensure that mining operation shall not be commenced till the entire compensation levied, if any, for illegal mining paid by the Project Proponent through their respective Department of Mining & Geology in strict compliance of Judgment of Hon’ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India & Ors.
Air quality monitoring and preservation	
1.	The project proponent use leak proof trucks/dumpers carrying ore and other raw materials and cover them with tarpaulin.
1.	The project proponent shall submit monthly summary report of continuous stack emission and air quality monitoring and results of manual stack monitoring and manual monitoring of air quality /fugitive emissions to Regional Office of MoEF&CC, Zonal office of CPCB and Regional Office of SPCB along with six-monthly monitoring report.
1.	Design the ventilation system for adequate air changes as per ACGIH document for all tunnels, motor houses, Oil Cellars.
Air quality monitoring and preservation	
1.	Appropriate Air Pollution Control (APC) system shall be provided for all the dust generating points including fugitive dust from all vulnerable sources, so as to comply prescribed stack emission and fugitive emission standards.
Air quality monitoring and preservation	
1.	Effective safeguard measures for prevention of dust generation and subsequent suppression (like regular water sprinkling, metalled road construction etc.) shall be carried out in areas prone to air pollution wherein high levels of PM10 and PM2.5 are evident such as haul road, loading and unloading point and transfer points. The Fugitive dust emissions from all sources shall be regularly controlled by installation of required equipments/ machineries and preventive maintenance. Use of suitable water-soluble chemical dust suppressing agents may be explored for better effectiveness of dust control system. It shall be ensured that air pollution level conform to the standards prescribed by the MoEFCC/ Central Pollution Control Board.
Water quality monitoring and preservation	
1.	Project Proponent shall regularly monitor and maintain records w.r.t. ground water level and quality in and around the mine lease by establishing a network of existing wells as well as new piezo-meter installations during the mining operation in consultation with Central Ground Water Authority/ State Ground Water Department. The Report on changes in Ground water level and quality shall be submitted on six-monthly basis to the Regional Office of the Ministry, CGWA and State Groundwater Department / State Pollution Control Board.
Water quality monitoring and preservation	
1.	The Project Proponent shall undertake regular monitoring of natural water course/ water resources/ springs and perennial nallahs existing/ flowing in and around the mine lease including upstream and downstream. Sufficient number of gullies shall be provided at appropriate places within the lease for management of water. The parameters to be monitored shall include their water quality vis-à-vis suitability for usage as per CPCB criteria and flow rate. It shall be ensured that no obstruction and/ or alteration be made to water bodies during mining operations without justification and prior approval of MoEFCC. The monitoring of water courses/ bodies existing in lease area shall be carried out four times in a year viz. pre- monsoon (April May), monsoon (August), post-monsoon (November) and winter (January) and the record of monitored data may be sent regularly to Ministry of

	Environment, Forest and Climate Change and its Regional Office, Central Ground Water Authority and Regional Director, Central Ground Water Board, State Pollution Control Board and Central Pollution Control Board. Clearly showing the trend analysis on six-monthly basis.
1.	In case, immediate mining scheme envisages intersection of ground water table, then Environmental Clearance shall become operational only after receiving formal clearance from CGWA. In case, mining operation involves intersection of ground water table at a later stage, then PP shall ensure that prior approval from CGWA and MoEFCC is in place before such mining operations. The permission for intersection of ground water table shall essentially be based on detailed hydro-geological study of the area.
Noise and vibration monitoring and prevention	
1.	The peak particle velocity at 500m distance or within the nearest habitation, whichever is closer shall be monitored periodically as per applicable DGMS guidelines.
Noise monitoring and prevention	
1.	Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six-monthly compliance report.
Noise and vibration monitoring and prevention	
1.	The Project Proponent shall take measures for control of noise levels below 85 dBA in the work environment. The workers engaged in operations of HEMM, etc. should be provided with ear plugs /muffs. All personnel including laborers working in dusty areas shall be provided with protective respiratory devices along with adequate training, awareness and information on safety and health aspects. The PP shall be held responsible in case it has been found that workers/ personals/ laborers are working without personal protective equipment.
Mining plan	
1.	The Project Proponent shall adhere to approved mining plan, inter alia, including, total excavation (quantum of mineral, waste, over burden, inter burden and top soil etc.); mining technology; lease area; scope of working (method of mining, overburden & dump management, O.B& dump mining, mineral transportation mode, ultimate depth of mining, concurrent reclamation and reclamation at mine closure; land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life; etc.).
Mining plan	
1.	The land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life shall be governed as per the approved Mining Plan. The excavation vis-à-vis backfilling in the mine lease area and corresponding afforestation to be raised in the reclaimed area shall be governed as per approved mining plan. PP shall ensure the monitoring and management of rehabilitated areas until the vegetation becomes self-sustaining. The compliance status shall be submitted half-yearly to the MoEFCC and its concerned Regional Office.
Waste management	
1.	The waste oil, grease and other hazardous waste shall be disposed of as per the Hazardous & Other waste (Management & Transboundary Movement) Rules, 2016.
1.	Kitchen waste shall be composted or converted to biogas for further use.(to be decided on case to case basis depending on type and size of plant)
Land reclamation	
1.	Check dams of appropriate size, gradient and length shall be constructed around mine pit and OB dumps to prevent storm run-off and sediment flow into adjoining water bodies. A safety margin of 50% shall be kept for designing of sump structures over and above peak rainfall (based on 50 years data) and maximum discharge in the

	mine and its adjoining area which shall also help in providing adequate retention time period thereby allowing proper settling of sediments/ silt material. The sedimentation pits/ sumps shall be constructed at the corners of the garland drains.
Land reclamation	
1.	The slope of dumps shall be vegetated in scientific manner with suitable native species to maintain the slope stability, prevent erosion and surface run off. The selection of local species regulates local climatic parameters and help in adaptation of plant species to the microclimate. The gullies formed on slopes should be adequately taken care of as it impacts the overall stability of dumps. The dump mass should be consolidated with the help of dozer/ compactors thereby ensuring proper filling/ leveling of dump mass. In critical areas, use of geo textiles/ geo-membranes / clay liners / Bentonite etc. shall be undertaken for stabilization of the dump.
1.	The Overburden (O.B.), waste and topsoil generated during the mining operations shall be stacked at earmarked OB dump site(s) only and it should not be kept active for a long period of time. The physical parameters of the OB / waste dumps / topsoil dump like height, width and angle of slope shall be governed as per the approved Mining Plan and the guidelines/circulars issued by D.G.M.S. The topsoil shall be used for land reclamation and plantation.
Green Belt and EMP	
1.	The project proponent shall prepare GHG emissions inventory for the plant and shall submit the programme for reduction of the same including carbon sequestration including plantation.
Transportation	
1.	No Transportation of the minerals shall be allowed in case of roads passing through villages/ habitations. In such cases, PP shall construct a ‘bypass’ road for the purpose of transportation of the minerals leaving an adequate gap (say at least 200 meters) so that the adverse impact of sound and dust along with chances of accidents could be mitigated. All costs resulting from widening and strengthening of existing public road network shall be borne by the PP in consultation with nodal State Govt. Department. Transportation of minerals through road movement in case of existing village/ rural roads shall be allowed in consultation with nodal State Govt. Department only after required strengthening such that the carrying capacity of roads is increased to handle the traffic load. The pollution due to transportation load on the environment will be effectively controlled and water sprinkling will also be done regularly. Vehicular emissions shall be kept under control and regularly monitored. Project should obtain Pollution Under Control (PUC) certificate for all the vehicles from authorized pollution testing centers. [If applicable in case of road transport].
Public hearing and Human health issues	
1.	The project proponent shall carry out heat stress analysis for the workmen who work in high temperature work zone and provide Personal Protection Equipment (PPE) as per the norms of Factory Act.
1.	Occupational health surveillance of the workers shall be done on a regular basis and records maintained as per the Factories Act.
Public hearing and Human health issues	
1.	Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, creche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.
Green Belt	
1.	The Project Proponent shall develop greenbelt in 7.5m wide safety zone all along the mine lease boundary as per the guidelines of CPCB in order to arrest pollution emanating from mining operations within the lease. The whole Green belt shall be developed within first 5 years starting from windward side of the active mining area. The development of greenbelt shall be governed as per the EC granted by the Ministry irrespective of the stipulation

	made in approved mine plan.
Corporate Environment Responsibility	
1.	Self-environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Corporate Environment Responsibility	
1.	All the recommendations made in the Charter on Corporate Responsibility for Environment Protection (CREP) for the Mineral Beneficiation plants shall be implemented.
Corporate Environment Responsibility	
1.	Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the Six Monthly Compliance Report.
Miscellaneous	
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	The Project Authorities should inform to the Regional Office regarding date of financial closures and final approval of the project by the concerned authorities and the date of start of land development work.
1.	Concealing factual data failure to comply with any or submission of false/ fabricated data and of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act, 1986.
1.	The Ministry or any other competent authority may alter/modify the above conditions or stipulate any further condition in the interest of environment protection.
Miscellaneous	
1.	The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.
1.	The project proponent shall monitor the criteria pollutants level namely; PM10, S02, NOx (ambient levels as well as stack emissions) or critical sectoral parameters, indicated for the projects and display the same at a convenient location for disclosure to the public and put on the website of the company.
Miscellaneous	
1.	The project proponent shall abide by all the commitments and recommendations made in the EIA/EMP report, commitment made during Public Hearing and also that during their presentation to the Expert Appraisal Committee.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	44) The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.

1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The Project Proponent shall prepare digital map (land use & land cover) of the entire lease area once in five years purpose of monitoring land use pattern and submit a report to concerned Regional Office of the MoEF&CC.
1.	The concerned Regional Office of the MoEF&CC shall randomly monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the MoEF&CC officer(s) by furnishing the requisite data / information / monitoring reports.
1.	In pursuant to Ministrys O.M No 22-34/2018-IA.III dated 16.01.2020 to comply with the direction made by Honble Supreme Court on 8.01.2020 in W.P. (Civil) No 114/2014 in the matter Common Cause vs Union of India, the mining lease holder shall after ceasing mining operations, undertake regrassing the mining area and any other area which may have been disturbed due to other mining activities and restore the land to a condition which is fit for growth of fodder, flora, fauna etc.

3.25. Agenda Item No 25:

3.25.1. Details of the proposal

JOYMAGAON VILLAGE PATTA LAND ORDINARY EARTH MINING PERMIT AREA by **RANENDRA N ATH BRAHMA** located at **KOKRAJHAR,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/519843/2025	SEAC/SEIAA.4057/2025	21/03/2025	Mining of minerals (1(a))

3.25.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :05/04/2025

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. Due deliberations and discussions are held.

The Committee is of the opinion to urge the DFO for taking requisite steps to complete the preparation of the final District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF& CC in 2016 and 2020 {SSMMG'2016 and EMGSM'2020} and place the same for evaluation and appraisal by the SEAC and further approval by the competent authority.

It is pertinent to mention that the *pre appraisal* of the draft DSR for the district has already been done by the SEAC and communicated with its observations for necessary corrections and compliance of the guidelines as stipulated.

It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the development of infrastructure in progress in the whole state which is a *sine qua non* for overall development and economic growth of the state while the impact on environment also require due diligence and consideration with proper safeguards.

It is further appreciated that the important stakeholders like the Registered Qualified Person (RQP), Geologist from the Department of Geology and Mining, the Forest official, the official from the Water Resource Department are actively involved in the process for recommending mining in the area by way of consultation including site inspection before appraisal by the SEAC.

The Committee deem it appropriate to recommend the grant of the EC by the SEIAA allowing extraction of minor mineral for 1(one) year, as recommended in the mining plan, with the quantity measuring 13,400 Cu M ofOrdinaryEarth with an observation that the DFO, Kachugaon Divisionshall submit the approved DSR from the competent authority for further consideration of the balance quantity for the project allowing mining by the Proponent within a period of 3 (three) months and to ensure that the area in question is accordingly reflected in the final DSR.

This is necessitated in view of the process of development works being undertaken by the filling work of project 220 KV AGOMONI GIS located at 132 KV GSS, AGECL,Gossaigaon a Govt of Assam Undertaking as has been communicated by the concerned competent authority.

Decision: Recommended for grant of EC for 6 (six) months only measuring 13,400 Cu M of Ordinary Earth.

3.25.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 2.90Ha with a quantity of 6,500Cu M of Ordinary Clay for 6 (six) months subjected to the terms and conditions laid down by SEAC and that the area in question is to be reflected in the approved final DSR.

3.25.4. Recommendation of SEIAA

Approved

3.25.5. Details of Environment Conditions

3.25.5.1. Specific

General condition by SEAC	
1.	This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates and

	(b) the Proponent shall extract the approved quantity of mineral indicated herein with maximum mining depth of up to 1 (one) meter only from the non-mined surface area.
2.	The quantities of minor mineral allowed for extraction in terms of the approved Mining Plan shall not be exceeded by the Proponent.
3.	The Orders of the Hon'ble Apex Court, the NGT (Eastern Bench), Kolkata; the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF& CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} shall be followed by the Proponent.
4.	This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan and the approved DSR for the district.
Specific condition by SEAC	
1.	The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period.
2.	The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan before allowing mining as bounden on the Proponent.
3.	CER activities shall be carried out / undertaken by the Proponent and a minimum estimated amount of the total project cost Rs 60,000.00 (Sixty thousand) only, shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the nearby village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 3 (three) months of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report (HCR) as mandated to be uploaded by the project Proponent in terms of the OM No IA3-22/1/2022-IA.III Dated 14.06.2024 in pursuance of the EIA Notification 2006.
4.	Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands adjoining the mining area involving local NGOs, School / College students.
5.	Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students.
6.	The DFO shall get the same executed / implemented within 3 (three) months of allowing mining in the area and shall upload the reports in PARIVESH 2.0 portal which shall form part of the Half Yearly Compliance Report (HCR) as mandated to be uploaded by the project Proponent in terms of the OM No IA3-22/1/2022-IA.III Dated 14.06.2024 in pursuance of the EIA Notification 2006.
7.	The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Amlokhi (*Phyllanthus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*), Bael (*Aegle marmelos*), Jamun (*Syzygiumcuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpus integrifolia*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*) etc etc.

8.	Half Yearly Compliance Reports (HCR) are mandatory on the part of project Proponent which need to be uploaded on or before 1st June and 1st December of the calendar year in PARIVESH 2.0 portal and no activity shall be permitted by the DFO without HCR.

3.25.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State Pollution Control Board/ Committee.
1.	This Environmental Clearance (EC) is subject to orders/ judgment of Honble Supreme Court of India, Honble High Court, Honble NGT and any other Court of Law, Common Cause Conditions as may be applicable.
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
Statutory compliance	
1.	State Pollution Control Board/Committee shall be responsible for display of this EC letter at its Regional office, District Industries Centre and Collector's office/ Tehsildar's Office for 30 days.
1.	The Project proponent complies with all the statutory requirements and judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India &Ors before commencing the mining operations.
1.	The Project Proponent shall follow the mitigation measures provided in MoEFCC's Office Memorandum No. Z-11013/57/2014-IA.II (M), dated 29th October, 2014, titled "Impact of mining activities on Habitations-Issues related to the mining Projects wherein Habitations and villages are the part of mine lease areas or Habitations and villages are surrounded by the mine lease area."
1.	The Project Proponent shall inform the MoEF&CC for any change in ownership of the mining lease. In case there is any change in ownership or mining lease is transferred. PP needs to apply for transfer of EC as per provisions of the para 11 of EIA Notification, 2006 as amended from time to time.
1.	A copy of EC letter will be marked to concerned Panchayat / local NGO etc. if any, from whom suggestion / representation has been received while processing the proposal.
1.	The State Government concerned shall ensure that mining operation shall not be commenced till the entire compensation levied, if any, for illegal mining paid by the Project Proponent through their respective Department of Mining & Geology in strict compliance of Judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India & Ors.
Air quality monitoring and preservation	
1.	Design the ventilation system for adequate air changes as per ACGIH document for all tunnels, motor houses, Oil Cellars.
1.	The project proponent shall submit monthly summary report of continuous stack emission and air quality monitoring and results of manual stack monitoring and manual monitoring of air quality /fugitive emissions to

	Regional Office of MoEF&CC, Zonal office of CPCB and Regional Office of SPCB along with six-monthly monitoring report.
1.	The project proponent use leak proof trucks/dumpers carrying ore and other raw materials and cover them with tarpaulin.
Air quality monitoring and preservation	
1.	Appropriate Air Pollution Control (APC) system shall be provided for all the dust generating points including fugitive dust from all vulnerable sources, so as to comply prescribed stack emission and fugitive emission standards.
Air quality monitoring and preservation	
1.	Effective safeguard measures for prevention of dust generation and subsequent suppression (like regular water sprinkling, metalled road construction etc.) shall be carried out in areas prone to air pollution wherein high levels of PM10 and PM2.5 are evident such as haul road, loading and unloading point and transfer points. The Fugitive dust emissions from all sources shall be regularly controlled by installation of required equipments/ machineries and preventive maintenance. Use of suitable water-soluble chemical dust suppressing agents may be explored for better effectiveness of dust control system. It shall be ensured that air pollution level conform to the standards prescribed by the MoEFCC/ Central Pollution Control Board.
Water quality monitoring and preservation	
1.	Project Proponent shall regularly monitor and maintain records w.r.t. ground water level and quality in and around the mine lease by establishing a network of existing wells as well as new piezo-meter installations during the mining operation in consultation with Central Ground Water Authority/ State Ground Water Department. The Report on changes in Ground water level and quality shall be submitted on six-monthly basis to the Regional Office of the Ministry, CGWA and State Groundwater Department / State Pollution Control Board.
Water quality monitoring and preservation	
1.	The Project Proponent shall undertake regular monitoring of natural water course/ water resources/ springs and perennial nallahs existing/ flowing in and around the mine lease including upstream and downstream. Sufficient number of gullies shall be provided at appropriate places within the lease for management of water. The parameters to be monitored shall include their water quality vis-à-vis suitability for usage as per CPCB criteria and flow rate. It shall be ensured that no obstruction and/ or alteration be made to water bodies during mining operations without justification and prior approval of MoEFCC. The monitoring of water courses/ bodies existing in lease area shall be carried out four times in a year viz. pre- monsoon (April May), monsoon (August), post-monsoon (November) and winter (January) and the record of monitored data may be sent regularly to Ministry of Environment, Forest and Climate Change and its Regional Office, Central Ground Water Authority and Regional Director, Central Ground Water Board, State Pollution Control Board and Central Pollution Control Board. Clearly showing the trend analysis on six-monthly basis.
1.	In case, immediate mining scheme envisages intersection of ground water table, then Environmental Clearance shall become operational only after receiving formal clearance from CGWA. In case, mining operation involves intersection of ground water table at a later stage, then PP shall ensure that prior approval from CGWA and MoEFCC is in place before such mining operations. The permission for intersection of ground water table shall essentially be based on detailed hydro-geological study of the area.
Noise and vibration monitoring and prevention	
1.	The peak particle velocity at 500m distance or within the nearest habitation, whichever is closer shall be monitored periodically as per applicable DGMS guidelines.
Noise and vibration monitoring and prevention	
1.	The Project Proponent shall take measures for control of noise levels below 85 dBA in the work environment. The

	workers engaged in operations of HEMM, etc. should be provided with ear plugs /muffs. All personnel including laborers working in dusty areas shall be provided with protective respiratory devices along with adequate training, awareness and information on safety and health aspects. The PP shall be held responsible in case it has been found that workers/ personals/ laborers are working without personal protective equipment.
Mining plan	
1.	The Project Proponent shall adhere to approved mining plan, inter alia, including, total excavation (quantum of mineral, waste, over burden, inter burden and top soil etc.); mining technology; lease area; scope of working (method of mining, overburden & dump management, O.B& dump mining, mineral transportation mode, ultimate depth of mining, concurrent reclamation and reclamation at mine closure; land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life; etc.).
Mining plan	
1.	The land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life shall be governed as per the approved Mining Plan. The excavation vis-à-vis backfilling in the mine lease area and corresponding afforestation to be raised in the reclaimed area shall be governed as per approved mining plan. PP shall ensure the monitoring and management of rehabilitated areas until the vegetation becomes self-sustaining. The compliance status shall be submitted half-yearly to the MoEFCC and its concerned Regional Office.
Land reclamation	
1.	Check dams of appropriate size, gradient and length shall be constructed around mine pit and OB dumps to prevent storm run-off and sediment flow into adjoining water bodies. A safety margin of 50% shall be kept for designing of sump structures over and above peak rainfall (based on 50 years data) and maximum discharge in the mine and its adjoining area which shall also help in providing adequate retention time period thereby allowing proper settling of sediments/ silt material. The sedimentation pits/ sumps shall be constructed at the corners of the garland drains.
Waste management	
1.	Kitchen waste shall be composted or converted to biogas for further use.(to be decided on case to case basis depending on type and size of plant)
1.	The waste oil, grease and other hazardous waste shall be disposed of as per the Hazardous & Other waste (Management & Transboundary Movement) Rules, 2016.
Land reclamation	
1.	The Overburden (O.B.), waste and topsoil generated during the mining operations shall be stacked at earmarked OB dump site(s) only and it should not be kept active for a long period of time. The physical parameters of the OB / waste dumps / topsoil dump like height, width and angle of slope shall be governed as per the approved Mining Plan and the guidelines/circulars issued by D.G.M.S. The topsoil shall be used for land reclamation and plantation.
1.	The slope of dumps shall be vegetated in scientific manner with suitable native species to maintain the slope stability, prevent erosion and surface run off. The selection of local species regulates local climatic parameters and help in adaptation of plant species to the microclimate. The gullies formed on slopes should be adequately taken care of as it impacts the overall stability of dumps. The dump mass should be consolidated with the help of dozer/ compactors thereby ensuring proper filling/ leveling of dump mass. In critical areas, use of geo textiles/ geo-membranes / clay liners / Bentonite etc. shall be undertaken for stabilization of the dump.
Green Belt and EMP	
1.	The project proponent shall prepare GHG emissions inventory for the plant and shall submit the programme for reduction of the same including carbon sequestration including plantation.

Transportation	
1.	No Transportation of the minerals shall be allowed in case of roads passing through villages/ habitations. In such cases, PP shall construct a 'bypass' road for the purpose of transportation of the minerals leaving an adequate gap (say at least 200 meters) so that the adverse impact of sound and dust along with chances of accidents could be mitigated. All costs resulting from widening and strengthening of existing public road network shall be borne by the PP in consultation with nodal State Govt. Department. Transportation of minerals through road movement in case of existing village/ rural roads shall be allowed in consultation with nodal State Govt. Department only after required strengthening such that the carrying capacity of roads is increased to handle the traffic load. The pollution due to transportation load on the environment will be effectively controlled and water sprinkling will also be done regularly. Vehicular emissions shall be kept under control and regularly monitored. Project should obtain Pollution Under Control (PUC) certificate for all the vehicles from authorized pollution testing centers. [If applicable in case of road transport].
Public hearing and Human health issues	
1.	Occupational health surveillance of the workers shall be done on a regular basis and records maintained as per the Factories Act.
1.	The project proponent shall carry out heat stress analysis for the workmen who work in high temperature work zone and provide Personal Protection Equipment (PPE) as per the norms of Factory Act.
Public hearing and Human health issues	
1.	Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, creche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.
Green Belt	
1.	The Project Proponent shall develop greenbelt in 7.5m wide safety zone all along the mine lease boundary as per the guidelines of CPCB in order to arrest pollution emanating from mining operations within the lease. The whole Green belt shall be developed within first 5 years starting from windward side of the active mining area. The development of greenbelt shall be governed as per the EC granted by the Ministry irrespective of the stipulation made in approved mine plan.
Corporate Environment Responsibility	
1.	Self-environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Corporate Environment Responsibility	
1.	All the recommendations made in the Charter on Corporate Responsibility for Environment Protection (CREP) for the Mineral Beneficiation plants shall be implemented.
Corporate Environment Responsibility	
1.	Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the Six Monthly Compliance Report.
1.	The Project Proponent shall submit the time- bound action plan to the concerned regional office of the Ministry within 6 months from the date of issuance of environmental clearance for undertaking the activities committed during public consultation by the project proponent and as discussed by the EAC, in terms of the provisions of the

	MoEF&CC Office Memorandum No.22-65/2017-IA.III dated 30 September, 2020. The action plan shall be implemented within three years of commencement of the project.
Miscellaneous	
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	The Ministry or any other competent authority may alter/modify the above conditions or stipulate any further condition in the interest of environment protection.
1.	The Project Authorities should inform to the Regional Office regarding date of financial closures and final approval of the project by the concerned authorities and the date of start of land development work.
1.	The above conditions will be enforced inter-alia, under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986 and the Public Liability Insurance Act, 1991 along with their amendments and rules made there under and also any other orders passed by the Hon'ble Supreme Court of India/High Court and any other Court of Law relating to the subject matter.
1.	Concealing factual data failure to comply with any or submission of false/ fabricated data and of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act, 1986.
Miscellaneous	
1.	The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.
1.	The project proponent shall monitor the criteria pollutants level namely; PM10, S02, NOx (ambient levels as well as stack emissions) or critical sectoral parameters, indicated for the projects and display the same at a convenient location for disclosure to the public and put on the website of the company.
1.	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponents website permanently.
1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
Miscellaneous	
1.	The project proponent shall abide by all the commitments and recommendations made in the EIA/EMP report, commitment made during Public Hearing and also that during their presentation to the Expert Appraisal Committee.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	44) The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of

	Environment, Forests and Climate Change (MoEF&CC).
1.	The Project Proponent shall prepare digital map (land use & land cover) of the entire lease area once in five years purpose of monitoring land use pattern and submit a report to concerned Regional Office of the MoEF&CC.
1.	The concerned Regional Office of the MoEF&CC shall randomly monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the MoEF&CC officer(s) by furnishing the requisite data / information / monitoring reports.
1.	Any appeal against this environmental clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.
1.	In pursuant to Ministrys O.M No 22-34/2018-IA.III dated 16.01.2020 to comply with the direction made by Honble Supreme Court on 8.01.2020 in W.P. (Civil) No 114/2014 in the matter Common Cause vs Union of India, the mining lease holder shall after ceasing mining operations, undertake regrassing the mining area and any other area which may have been disturbed due to other mining activities and restore the land to a condition which is fit for growth of fodder, flora, fauna etc.

3.26. Agenda Item No 26:

3.26.1. Details of the proposal

MIRAKUCHI VILLAGE ORDINARY EARTH MINING PERMIT AREA by **satyabrat rongpi** located at **KAM RUP METRO,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/520013/2025	SEAC/SEIAA.4060/2025	26/03/2025	Mining of minerals (1(a))

3.26.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :05/04/2025

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. Due deliberations and discussions are held.

The Committee had urged the DFO for taking requisite steps to complete the preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF& CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} and place the same for appraisal and final approval by the competent authority.

It is pertinent to mention that *Evaluation* and *Appraisal* of the final DSR for the district has already been done by the SEAC & the SEIAA, Assam has already approved the recommended DSR.

The Committee deem it appropriate to recommend the grant of EC by the SEIAA allowing extraction of minor mineral for 1(one) year with the quantity of mineral measuring 6,930Cu Mof ordinary earthwith an observation that the DFO, Kamrup East Division shall ask the Proponent to furnish the NOC from the District Commissioner Kamrup (M) before allowing mining in the area.

Decision: Recommended for grant of EC for 1 (one) year only for 6,930 Cu M of ordinary earth mineral.

3.26.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 0.38Ha with a quantity of 3,465Cu M of Ordinary Earth for 1 (one) year subjected to the terms and conditions laid down by SEAC and that the area in question is to be reflected in the approved final DSR.

3.26.4. Recommendation of SEIAA

Approved

3.26.5. Details of Environment Conditions

3.26.5.1. Specific

General condition by SEAC	
1.	This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates and (b) the Proponent shall extract the approved quantity of mineral indicated herein with maximum mining depth of up to 2 (two) meters only from the non-mined surface area.
2.	The quantities of minor mineral allowed for extraction in terms of the approved Mining Plan shall not be exceeded by the Proponent.
3.	In terms of the Order no-E138008/2 dated 05.02.2025 by the District Magistrate, Kamrup (M), the project Proponent shall obtain the NOC from the DC and to submit to the DFO for mining in the area.
4.	This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan and the approved DSR for the district.
Specific condition by SEAC	
1.	The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period.
2.	The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan prior to allowing mining.
3.	CER activities shall be carried out / undertaken by the Proponent with the estimated cost Rs 20,000.00 (Twenty thousand) only shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the nearby village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 3 (three) months of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report (HCR) as mandated to be uploaded by the project Proponent in terms of the OM No IA3-22/1/2022-IA.III Dated 14.06.2024 in pursuance of the EIA Notification 2006.

4.	Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands adjoining the mining area involving local NGOs, School / College students and an amount of Rs 20,000 (Twenty thousand) only, shall be earmarked for the purposes.
5.	Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. The DFO shall get the same executed / implemented within 3 (three) months of allowing mining in the area and shall upload the reports in PARIVESH 2.0 portal which shall form part of the Half Yearly Compliance Report (HCR) as mandated to be uploaded by the project Proponent in terms of the OM No IA3-22/1/2022-IA.III Dated 14.06.2024 in pursuance of the EIA Notification 2006.
6.	The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Amlokhi (*Phyllanthus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*),Bael (*Aegle marmelos*), Jamun (*Syzygiumcuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpus integrifolia*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*) etc etc.
7.	Half Yearly Compliance Reports (HCR) are mandatory on the part of project Proponent which need to be uploaded on or before 1st June and 1st December of the calendar year in PARIVESH 2.0 portal and no activity shall be permitted by the DFO without HCR.
8.	Methods of excavation:
9.	Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH 2.0 portal.

3.26.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State Pollution Control Board/ Committee.
1.	This Environmental Clearance (EC) is subject to orders/ judgment of Honble Supreme Court of India, Honble High Court, Honble NGT and any other Court of Law, Common Cause Conditions as may be applicable.
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
Statutory compliance	
1.	The State Government concerned shall ensure that mining operation shall not be commenced till the entire compensation levied, if any, for illegal mining paid by the Project Proponent through their respective Department of Mining & Geology in strict compliance of Judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India & Ors.
1.	A copy of EC letter will be marked to concerned Panchayat / local NGO etc. if any, from whom suggestion / representation has been received while processing the proposal.

1.	The Project proponent complies with all the statutory requirements and judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India &Ors before commencing the mining operations.
1.	State Pollution Control Board/Committee shall be responsible for display of this EC letter at its Regional office, District Industries Centre and Collector's office/ Tehsildar's Office for 30 days.
1.	The Project Proponent shall inform the MoEF&CC for any change in ownership of the mining lease. In case there is any change in ownership or mining lease is transferred. PP needs to apply for transfer of EC as per provisions of the para 11 of EIA Notification, 2006 as amended from time to time.
1.	The Project Proponent shall follow the mitigation measures provided in MoEFCC's Office Memorandum No. Z-11013/57/2014-IA.II (M), dated 29th October, 2014, titled "Impact of mining activities on Habitations-Issues related to the mining Projects wherein Habitations and villages are the part of mine lease areas or Habitations and villages are surrounded by the mine lease area."
Air quality monitoring and preservation	
1.	The project proponent shall submit monthly summary report of continuous stack emission and air quality monitoring and results of manual stack monitoring and manual monitoring of air quality /fugitive emissions to Regional Office of MoEF&CC, Zonal office of CPCB and Regional Office of SPCB along with six-monthly monitoring report.
1.	The project proponent use leak proof trucks/dumpers carrying ore and other raw materials and cover them with tarpaulin.
1.	Design the ventilation system for adequate air changes as per ACGIH document for all tunnels, motor houses, Oil Cellars.
Air quality monitoring and preservation	
1.	Appropriate Air Pollution Control (APC) system shall be provided for all the dust generating points including fugitive dust from all vulnerable sources, so as to comply prescribed stack emission and fugitive emission standards.
Air quality monitoring and preservation	
1.	Effective safeguard measures for prevention of dust generation and subsequent suppression (like regular water sprinkling, metalled road construction etc.) shall be carried out in areas prone to air pollution wherein high levels of PM10 and PM2.5 are evident such as haul road, loading and unloading point and transfer points. The Fugitive dust emissions from all sources shall be regularly controlled by installation of required equipments/ machineries and preventive maintenance. Use of suitable water-soluble chemical dust suppressing agents may be explored for better effectiveness of dust control system. It shall be ensured that air pollution level conform to the standards prescribed by the MoEFCC/ Central Pollution Control Board.
Water quality monitoring and preservation	
1.	Project Proponent shall regularly monitor and maintain records w.r.t. ground water level and quality in and around the mine lease by establishing a network of existing wells as well as new piezo-meter installations during the mining operation in consultation with Central Ground Water Authority/ State Ground Water Department. The Report on changes in Ground water level and quality shall be submitted on six-monthly basis to the Regional Office of the Ministry, CGWA and State Groundwater Department / State Pollution Control Board.
Water quality monitoring and preservation	
1.	The Project Proponent shall undertake regular monitoring of natural water course/ water resources/ springs and perennial nallahs existing/ flowing in and around the mine lease including upstream and downstream. Sufficient

	number of gullies shall be provided at appropriate places within the lease for management of water. The parameters to be monitored shall include their water quality vis-à-vis suitability for usage as per CPCB criteria and flow rate. It shall be ensured that no obstruction and/ or alteration be made to water bodies during mining operations without justification and prior approval of MoEFCC. The monitoring of water courses/ bodies existing in lease area shall be carried out four times in a year viz. pre- monsoon (April May), monsoon (August), post-monsoon (November) and winter (January) and the record of monitored data may be sent regularly to Ministry of Environment, Forest and Climate Change and its Regional Office, Central Ground Water Authority and Regional Director, Central Ground Water Board, State Pollution Control Board and Central Pollution Control Board. Clearly showing the trend analysis on six-monthly basis.
1.	In case, immediate mining scheme envisages intersection of ground water table, then Environmental Clearance shall become operational only after receiving formal clearance from CGWA. In case, mining operation involves intersection of ground water table at a later stage, then PP shall ensure that prior approval from CGWA and MoEFCC is in place before such mining operations. The permission for intersection of ground water table shall essentially be based on detailed hydro-geological study of the area.
Noise and vibration monitoring and prevention	
1.	The peak particle velocity at 500m distance or within the nearest habitation, whichever is closer shall be monitored periodically as per applicable DGMS guidelines.
Noise monitoring and prevention	
1.	Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six-monthly compliance report.
Noise and vibration monitoring and prevention	
1.	The Project Proponent shall take measures for control of noise levels below 85 dBA in the work environment. The workers engaged in operations of HEMM, etc. should be provided with ear plugs /muffs. All personnel including laborers working in dusty areas shall be provided with protective respiratory devices along with adequate training, awareness and information on safety and health aspects. The PP shall be held responsible in case it has been found that workers/ personals/ laborers are working without personal protective equipment.
Mining plan	
1.	The Project Proponent shall adhere to approved mining plan, inter alia, including, total excavation (quantum of mineral, waste, over burden, inter burden and top soil etc.); mining technology; lease area; scope of working (method of mining, overburden & dump management, O.B& dump mining, mineral transportation mode, ultimate depth of mining, concurrent reclamation and reclamation at mine closure; land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life; etc.).
Mining plan	
1.	The land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life shall be governed as per the approved Mining Plan. The excavation vis-à-vis backfilling in the mine lease area and corresponding afforestation to be raised in the reclaimed area shall be governed as per approved mining plan. PP shall ensure the monitoring and management of rehabilitated areas until the vegetation becomes self-sustaining. The compliance status shall be submitted half-yearly to the MoEFCC and its concerned Regional Office.
Waste management	
1.	Kitchen waste shall be composted or converted to biogas for further use.(to be decided on case to case basis depending on type and size of plant)
1.	The waste oil, grease and other hazardous waste shall be disposed of as per the Hazardous & Other waste (Management & Transboundary Movement) Rules, 2016.

Land reclamation	
1.	Check dams of appropriate size, gradient and length shall be constructed around mine pit and OB dumps to prevent storm run-off and sediment flow into adjoining water bodies. A safety margin of 50% shall be kept for designing of sump structures over and above peak rainfall (based on 50 years data) and maximum discharge in the mine and its adjoining area which shall also help in providing adequate retention time period thereby allowing proper settling of sediments/ silt material. The sedimentation pits/ sumps shall be constructed at the corners of the garland drains.
Land reclamation	
1.	The slope of dumps shall be vegetated in scientific manner with suitable native species to maintain the slope stability, prevent erosion and surface run off. The selection of local species regulates local climatic parameters and help in adaptation of plant species to the microclimate. The gullies formed on slopes should be adequately taken care of as it impacts the overall stability of dumps. The dump mass should be consolidated with the help of dozer/ compactors thereby ensuring proper filling/ leveling of dump mass. In critical areas, use of geo textiles/ geo-membranes / clay liners / Bentonite etc. shall be undertaken for stabilization of the dump.
1.	The Overburden (O.B.), waste and topsoil generated during the mining operations shall be stacked at earmarked OB dump site(s) only and it should not be kept active for a long period of time. The physical parameters of the OB / waste dumps / topsoil dump like height, width and angle of slope shall be governed as per the approved Mining Plan and the guidelines/circulars issued by D.G.M.S. The topsoil shall be used for land reclamation and plantation.
Green Belt and EMP	
1.	The project proponent shall prepare GHG emissions inventory for the plant and shall submit the programme for reduction of the same including carbon sequestration including plantation.
Transportation	
1.	No Transportation of the minerals shall be allowed in case of roads passing through villages/ habitations. In such cases, PP shall construct a ‘bypass’ road for the purpose of transportation of the minerals leaving an adequate gap (say at least 200 meters) so that the adverse impact of sound and dust along with chances of accidents could be mitigated. All costs resulting from widening and strengthening of existing public road network shall be borne by the PP in consultation with nodal State Govt. Department. Transportation of minerals through road movement in case of existing village/ rural roads shall be allowed in consultation with nodal State Govt. Department only after required strengthening such that the carrying capacity of roads is increased to handle the traffic load. The pollution due to transportation load on the environment will be effectively controlled and water sprinkling will also be done regularly. Vehicular emissions shall be kept under control and regularly monitored. Project should obtain Pollution Under Control (PUC) certificate for all the vehicles from authorized pollution testing centers. [If applicable in case of road transport].
Public hearing and Human health issues	
1.	Occupational health surveillance of the workers shall be done on a regular basis and records maintained as per the Factories Act.
1.	The project proponent shall carry out heat stress analysis for the workmen who work in high temperature work zone and provide Personal Protection Equipment (PPE) as per the norms of Factory Act.
Public hearing and Human health issues	
1.	Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, creche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.
Green Belt	

1.	The Project Proponent shall develop greenbelt in 7.5m wide safety zone all along the mine lease boundary as per the guidelines of CPCB in order to arrest pollution emanating from mining operations within the lease. The whole Green belt shall be developed within first 5 years starting from windward side of the active mining area. The development of greenbelt shall be governed as per the EC granted by the Ministry irrespective of the stipulation made in approved mine plan.
Corporate Environment Responsibility	
1.	Self-environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Corporate Environment Responsibility	
1.	All the recommendations made in the Charter on Corporate Responsibility for Environment Protection (CREP) for the Mineral Beneficiation plants shall be implemented.
Corporate Environment Responsibility	
1.	The Project Proponent shall submit the time- bound action plan to the concerned regional office of the Ministry within 6 months from the date of issuance of environmental clearance for undertaking the activities committed during public consultation by the project proponent and as discussed by the EAC, in terms of the provisions of the MoEF&CC Office Memorandum No.22-65/2017-IA.III dated 30 September, 2020. The action plan shall be implemented within three years of commencement of the project.
1.	Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the Six Monthly Compliance Report.
Miscellaneous	
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	The Ministry or any other competent authority may alter/modify the above conditions or stipulate any further condition in the interest of environment protection.
1.	Concealing factual data failure to comply with any or submission of false/ fabricated data and of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act, 1986.
1.	The Project Authorities should inform to the Regional Office regarding date of financial closures and final approval of the project by the concerned authorities and the date of start of land development work.
1.	The above conditions will be enforced inter-alia, under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986 and the Public Liability Insurance Act, 1991 along with their amendments and rules made there under and also any other orders passed by the Hon'ble Supreme Court of India/High Court and any other Court of Law relating to the subject matter.
Miscellaneous	
1.	The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.

1.	The project proponent shall monitor the criteria pollutants level namely; PM10, S02, NOx (ambient levels as well as stack emissions) or critical sectoral parameters, indicated for the projects and display the same at a convenient location for disclosure to the public and put on the website of the company.
Miscellaneous	
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	44) The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall abide by all the commitments and recommendations made in the EIA/EMP report, commitment made during Public Hearing and also that during their presentation to the Expert Appraisal Committee.
1.	The Project Proponent shall prepare digital map (land use & land cover) of the entire lease area once in five years purpose of monitoring land use pattern and submit a report to concerned Regional Office of the MoEF&CC.
1.	The concerned Regional Office of the MoEF&CC shall randomly monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the MoEF&CC officer(s) by furnishing the requisite data / information / monitoring reports.
1.	Any appeal against this environmental clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.
1.	In pursuant to Ministrys O.M No 22-34/2018-IA.III dated 16.01.2020 to comply with the direction made by Honble Supreme Court on 8.01.2020 in W.P. (Civil) No 114/2014 in the matter Common Cause vs Union of India, the mining lease holder shall after ceasing mining operations, undertake regrassing the mining area and any other area which may have been disturbed due to other mining activities and restore the land to a condition which is fit for growth of fodder, flora, fauna etc.

3.27. Agenda Item No 27:

3.27.1. Details of the proposal

Gobardhana Village Patta Land Sand, Sand Gravel and Stone Mining Permit Area by **chinmay pathak** located at **BAKSA,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/517485/2025	SEAC/SEIAA.4068/2025	02/04/2025	Mining of minerals (1(a))

3.27.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :05/04/2025

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. Due deliberations and discussions are held.

The Committee urged the DFO for taking requisite steps to complete the preparation of the final District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF& CC in 2016 and 2020 {SSMMG'2016 and EMGSM'2020} and place the same for evaluation and appraisal by the SEAC and further approval by the competent authority.

It is pertinent to mention that the A*ppraisal* and *Evaluation* of the final DSR for the district has already been done by the SEAC and communicated with its observations for necessary corrections and compliance of the guidelines as stipulated for approval by the SEIAA.

The Committee deem it appropriate to recommend the grant of the EC by the SEIAA allowing extraction of minor mineral for 1(one) year, as recommended in the mining plan, with the quantity measuring @ 9,75 CuM of Sand @ 2,925 CuM of Sand Gravel and @ 4,880 Cu M of Stone with an observation that the DFO, Baksa Divisionshall submit the approved DSR from the competent authority for further consideration of the balance quantity for the project allowing mining by the Proponent within a period of 3 (three) months and to ensure that the area in question is accordingly reflected in the final DSR.

Decision: Recommended for grant of EC for 1 (one) year only measuring@ 9,75 CuM of Sand @ 2,925 CuM of Sand Gravel and @ 4,880 Cu M of Stone.

3.27.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 3.60Ha with a quantity of @975cum of Sand, @2,925cum of Sand Gravel and @4,880cum of Stone for 1 (one) year subjected to the terms and conditions laid down by SEAC and that the area in question is to be reflected in the approved final DSR.

3.27.4. Recommendation of SEIAA

Approved

3.27.5. Details of Environment Conditions

3.27.5.1. Specific

General conditions by SEAC	
1.	This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates recorded in the approved DSR; (b) the active bank of the river is not disturbed / damaged because of mining and transportation of mining materials; (c) the Proponent shall extract the approved quantity of minerals indicated herein with maximum mining depth of up to 1 (one) meter only from the non-mined surface.
2.	The quantities of minor mineral allowed for extraction, annually, in terms of the approved DSR shall not be exceeded by the Proponent.
3.	The Orders of the Hon'ble Apex Court, the NGT (Eastern Bench), Kolkata; the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF& CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} shall be followed by the Proponent.

4.	This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan and the approved DSR for the district.
Specific conditions by SEAC	
1.	Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF& CC for non manual extraction which need to be adhered to by the concerned DFO.
2.	The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period.
3.	The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan/DSR before allowing any mining.
4.	No mechanized machinery shall be allowed to be used for excavation of mineral from river bed and only on exceptional cases the DFO may permit use of JCB for loading and unloading of mineral in vehicles.
5.	CER activities shall be carried out / undertaken by the Proponent and minimum estimated cost of Rs 1.00 Lakh (one Lakh) only, shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the nearby village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st year of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report.
6.	Plantation activities shall be carried out / undertaken in any educational institution or Govt lands along the proposed mining area involving local NGOs, School / College students and an amount of Rs 2.00(two) Lakh shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with due consultation of the DFO and shall make effort to label the plant species for the benefits of the villagers, common people and specially the school/college students.
7.	The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Amlokhi (*Phyllanthus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saracaasoca*), Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*), Jamun (*Syzygiumcuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpus integrifolia*), Ow Tenga (*Dillenia indica*), Khair (*Acacia catechu*),Thekera (*Garcinia spp*) etc etc.
8.	Half Yearly Compliance Reports (HCR) are mandatory on the part of project Proponent which need to be uploaded on or before 1st June and 1st December of the calendar year in PARIVESH 2.0 portal and no activity shall be permitted by the DFO without HCR.
9.	Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.27.5.2. Standard

1(	**Mining of minerals**

a)	
Statutory compliance	
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State Pollution Control Board/ Committee.
1.	This Environmental Clearance (EC) is subject to orders/ judgment of Honble Supreme Court of India, Honble High Court, Honble NGT and any other Court of Law, Common Cause Conditions as may be applicable.
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
Statutory compliance	
1.	A copy of EC letter will be marked to concerned Panchayat / local NGO etc. if any, from whom suggestion / representation has been received while processing the proposal.
1.	The Project proponent complies with all the statutory requirements and judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India &Ors before commencing the mining operations.
1.	State Pollution Control Board/Committee shall be responsible for display of this EC letter at its Regional office, District Industries Centre and Collector's office/ Tehsildar's Office for 30 days.
1.	The Project Proponent shall inform the MoEF&CC for any change in ownership of the mining lease. In case there is any change in ownership or mining lease is transferred. PP needs to apply for transfer of EC as per provisions of the para 11 of EIA Notification, 2006 as amended from time to time.
1.	The Project Proponent shall follow the mitigation measures provided in MoEFCC's Office Memorandum No. Z-11013/57/2014-IA.II (M), dated 29th October, 2014, titled "Impact of mining activities on Habitations-Issues related to the mining Projects wherein Habitations and villages are the part of mine lease areas or Habitations and villages are surrounded by the mine lease area."
1.	The State Government concerned shall ensure that mining operation shall not be commenced till the entire compensation levied, if any, for illegal mining paid by the Project Proponent through their respective Department of Mining & Geology in strict compliance of Judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India & Ors.
Air quality monitoring and preservation	
1.	The project proponent shall submit monthly summary report of continuous stack emission and air quality monitoring and results of manual stack monitoring and manual monitoring of air quality /fugitive emissions to Regional Office of MoEF&CC, Zonal office of CPCB and Regional Office of SPCB along with six-monthly monitoring report.
1.	The project proponent use leak proof trucks/dumpers carrying ore and other raw materials and cover them with tarpaulin.
1.	Design the ventilation system for adequate air changes as per ACGIH document for all tunnels, motor houses, Oil Cellars.
Air quality monitoring and preservation	

1.	Appropriate Air Pollution Control (APC) system shall be provided for all the dust generating points including fugitive dust from all vulnerable sources, so as to comply prescribed stack emission and fugitive emission standards.
Air quality monitoring and preservation	
1.	Effective safeguard measures for prevention of dust generation and subsequent suppression (like regular water sprinkling, metalled road construction etc.) shall be carried out in areas prone to air pollution wherein high levels of PM10 and PM2.5 are evident such as haul road, loading and unloading point and transfer points. The Fugitive dust emissions from all sources shall be regularly controlled by installation of required equipments/ machineries and preventive maintenance. Use of suitable water-soluble chemical dust suppressing agents may be explored for better effectiveness of dust control system. It shall be ensured that air pollution level conform to the standards prescribed by the MoEFCC/ Central Pollution Control Board.
Water quality monitoring and preservation	
1.	Project Proponent shall regularly monitor and maintain records w.r.t. ground water level and quality in and around the mine lease by establishing a network of existing wells as well as new piezo-meter installations during the mining operation in consultation with Central Ground Water Authority/ State Ground Water Department. The Report on changes in Ground water level and quality shall be submitted on six-monthly basis to the Regional Office of the Ministry, CGWA and State Groundwater Department / State Pollution Control Board.
Water quality monitoring and preservation	
1.	The Project Proponent shall undertake regular monitoring of natural water course/ water resources/ springs and perennial nallahs existing/ flowing in and around the mine lease including upstream and downstream. Sufficient number of gullies shall be provided at appropriate places within the lease for management of water. The parameters to be monitored shall include their water quality vis-à-vis suitability for usage as per CPCB criteria and flow rate. It shall be ensured that no obstruction and/ or alteration be made to water bodies during mining operations without justification and prior approval of MoEFCC. The monitoring of water courses/ bodies existing in lease area shall be carried out four times in a year viz. pre- monsoon (April May), monsoon (August), post-monsoon (November) and winter (January) and the record of monitored data may be sent regularly to Ministry of Environment, Forest and Climate Change and its Regional Office, Central Ground Water Authority and Regional Director, Central Ground Water Board, State Pollution Control Board and Central Pollution Control Board. Clearly showing the trend analysis on six-monthly basis.
1.	In case, immediate mining scheme envisages intersection of ground water table, then Environmental Clearance shall become operational only after receiving formal clearance from CGWA. In case, mining operation involves intersection of ground water table at a later stage, then PP shall ensure that prior approval from CGWA and MoEFCC is in place before such mining operations. The permission for intersection of ground water table shall essentially be based on detailed hydro-geological study of the area.
Noise and vibration monitoring and prevention	
1.	The peak particle velocity at 500m distance or within the nearest habitation, whichever is closer shall be monitored periodically as per applicable DGMS guidelines.
Noise monitoring and prevention	
1.	Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six-monthly compliance report.
Noise and vibration monitoring and prevention	
1.	The Project Proponent shall take measures for control of noise levels below 85 dBA in the work environment. The workers engaged in operations of HEMM, etc. should be provided with ear plugs /muffs. All personnel including laborers working in dusty areas shall be provided with protective respiratory devices along with adequate training, awareness and information on safety and health aspects. The PP shall be held responsible in case it has been found

	that workers/ personals/ laborers are working without personal protective equipment.
Mining plan	
1.	The Project Proponent shall adhere to approved mining plan, inter alia, including, total excavation (quantum of mineral, waste, over burden, inter burden and top soil etc.); mining technology; lease area; scope of working (method of mining, overburden & dump management, O.B& dump mining, mineral transportation mode, ultimate depth of mining, concurrent reclamation and reclamation at mine closure; land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life; etc.).
Mining plan	
1.	The land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life shall be governed as per the approved Mining Plan. The excavation vis-à-vis backfilling in the mine lease area and corresponding afforestation to be raised in the reclaimed area shall be governed as per approved mining plan. PP shall ensure the monitoring and management of rehabilitated areas until the vegetation becomes self-sustaining. The compliance status shall be submitted half-yearly to the MoEFCC and its concerned Regional Office.
Waste management	
1.	Kitchen waste shall be composted or converted to biogas for further use.(to be decided on case to case basis depending on type and size of plant)
1.	The waste oil, grease and other hazardous waste shall be disposed of as per the Hazardous & Other waste (Management & Transboundary Movement) Rules, 2016.
Land reclamation	
1.	Check dams of appropriate size, gradient and length shall be constructed around mine pit and OB dumps to prevent storm run-off and sediment flow into adjoining water bodies. A safety margin of 50% shall be kept for designing of sump structures over and above peak rainfall (based on 50 years data) and maximum discharge in the mine and its adjoining area which shall also help in providing adequate retention time period thereby allowing proper settling of sediments/ silt material. The sedimentation pits/ sumps shall be constructed at the corners of the garland drains.
Land reclamation	
1.	The slope of dumps shall be vegetated in scientific manner with suitable native species to maintain the slope stability, prevent erosion and surface run off. The selection of local species regulates local climatic parameters and help in adaptation of plant species to the microclimate. The gullies formed on slopes should be adequately taken care of as it impacts the overall stability of dumps. The dump mass should be consolidated with the help of dozer/ compactors thereby ensuring proper filling/ leveling of dump mass. In critical areas, use of geo textiles/ geo-membranes / clay liners / Bentonite etc. shall be undertaken for stabilization of the dump.
1.	The Overburden (O.B.), waste and topsoil generated during the mining operations shall be stacked at earmarked OB dump site(s) only and it should not be kept active for a long period of time. The physical parameters of the OB / waste dumps / topsoil dump like height, width and angle of slope shall be governed as per the approved Mining Plan and the guidelines/circulars issued by D.G.M.S. The topsoil shall be used for land reclamation and plantation.
Green Belt and EMP	
1.	The project proponent shall prepare GHG emissions inventory for the plant and shall submit the programme for reduction of the same including carbon sequestration including plantation.
Transportation	

1.	No Transportation of the minerals shall be allowed in case of roads passing through villages/ habitations. In such cases, PP shall construct a 'bypass' road for the purpose of transportation of the minerals leaving an adequate gap (say at least 200 meters) so that the adverse impact of sound and dust along with chances of accidents could be mitigated. All costs resulting from widening and strengthening of existing public road network shall be borne by the PP in consultation with nodal State Govt. Department. Transportation of minerals through road movement in case of existing village/ rural roads shall be allowed in consultation with nodal State Govt. Department only after required strengthening such that the carrying capacity of roads is increased to handle the traffic load. The pollution due to transportation load on the environment will be effectively controlled and water sprinkling will also be done regularly. Vehicular emissions shall be kept under control and regularly monitored. Project should obtain Pollution Under Control (PUC) certificate for all the vehicles from authorized pollution testing centers. [If applicable in case of road transport].
Public hearing and Human health issues	
1.	The project proponent shall carry out heat stress analysis for the workmen who work in high temperature work zone and provide Personal Protection Equipment (PPE) as per the norms of Factory Act.
1.	Occupational health surveillance of the workers shall be done on a regular basis and records maintained as per the Factories Act.
Public hearing and Human health issues	
1.	Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, creche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.
Green Belt	
1.	The Project Proponent shall develop greenbelt in 7.5m wide safety zone all along the mine lease boundary as per the guidelines of CPCB in order to arrest pollution emanating from mining operations within the lease. The whole Green belt shall be developed within first 5 years starting from windward side of the active mining area. The development of greenbelt shall be governed as per the EC granted by the Ministry irrespective of the stipulation made in approved mine plan.
Corporate Environment Responsibility	
1.	Self-environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Corporate Environment Responsibility	
1.	All the recommendations made in the Charter on Corporate Responsibility for Environment Protection (CREP) for the Mineral Beneficiation plants shall be implemented.
Corporate Environment Responsibility	
1.	The Project Proponent shall submit the time- bound action plan to the concerned regional office of the Ministry within 6 months from the date of issuance of environmental clearance for undertaking the activities committed during public consultation by the project proponent and as discussed by the EAC, in terms of the provisions of the MoEF&CC Office Memorandum No.22-65/2017-IA.III dated 30 September, 2020. The action plan shall be implemented within three years of commencement of the project.
1.	Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the Six Monthly Compliance Report.

Miscellaneous	
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	Concealing factual data failure to comply with any or submission of false/ fabricated data and of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act, 1986.
1.	The Project Authorities should inform to the Regional Office regarding date of financial closures and final approval of the project by the concerned authorities and the date of start of land development work.
1.	The Ministry or any other competent authority may alter/modify the above conditions or stipulate any further condition in the interest of environment protection.
1.	The above conditions will be enforced inter-alia, under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986 and the Public Liability Insurance Act, 1991 along with their amendments and rules made there under and also any other orders passed by the Hon'ble Supreme Court of India/High Court and any other Court of Law relating to the subject matter.
Miscellaneous	
1.	The project proponent shall monitor the criteria pollutants level namely; PM10, S02, NOx (ambient levels as well as stack emissions) or critical sectoral parameters, indicated for the projects and display the same at a convenient location for disclosure to the public and put on the website of the company.
1.	The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.
Miscellaneous	
1.	44) The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall abide by all the commitments and recommendations made in the EIA/EMP report, commitment made during Public Hearing and also that during their presentation to the Expert Appraisal Committee.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	In pursuant to Ministrys O.M No 22-34/2018-IA.III dated 16.01.2020 to comply with the direction made by Honble Supreme Court on 8.01.2020 in W.P. (Civil) No 114/2014 in the matter Common Cause vs Union of India, the mining lease holder shall after ceasing mining operations, undertake regrassing the mining area and any other area which may have been disturbed due to other mining activities and restore the land to a condition which is fit for growth of fodder, flora, fauna etc.
1.	The concerned Regional Office of the MoEF&CC shall randomly monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the MoEF&CC officer(s) by furnishing the requisite data / information / monitoring reports.
1.	Any appeal against this environmental clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.
1.	The Project Proponent shall prepare digital map (land use & land cover) of the entire lease area once in five years

	purpose of monitoring land use pattern and submit a report to concerned Regional Office of the MoEF&CC.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.

3.28. Agenda Item No 28:

3.28.1. Details of the proposal

Grain Based Distillery (60 KLPD) and Captive Power Plant (2 MW) at Choygaon Industrial Growth Centre, Village 2 No. Jambari, Tehsil Choygaon, District Kamrup, Assam by M/s Brahmaputra Biochem Pvt. Ltd. by **BRAHMAPUTRA BIOCHEM PRIVATE LIMITED** located at **KAMRUP,ASSAM**			
Proposal For		Application for Corrigendum	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/IND2/535735/2025	SEAC/SEIAA.4006/2025	29/04/2025	Distilleries (5(g))

3.28.2. Deliberations by the committee in previous meetings

N/A

3.28.3. Deliberations by the SEIAA in current meetings

Corrigendum of EC is approved.

3.28.4. Recommendation of SEIAA

Approved

3.28.5. Details of Environment Conditions

3.28.5.1. Specific

Corrigendum is sought	
1.	Multicyclone followed by bag filters along with a stack of adequate height will be provided to 8 TPH agri-waste based boilers. Existing 25 TPH boiler will remain the same as it is.
2.	Multicyclone followed by bag filters along with a stack of adequate height shall be provided t o 8 TPH agri-waste based boiler to control particulate emissions within 50 mg/Nm 3 . Existing 25 TPH boiler will remain the same as it is.
3.	Use of Green Energy around the Project area as proposed installing Solar lights, LED bulbs.
4.	The EC letter dated 01/04/2025 mentioned Specific Conditions By SEAC. Sl. No. 1.4 is not applicable.
Specific Condition by SEIAA	

1.	All the other terms and conditions mentioned in the EC letter dated 01/04/2025 shall remains the same.

3.29. Agenda Item No 29:

3.29.1. Details of the proposal

Regularisation of existing manufacturing unit - SHREE TIMBER PRODUCTS PRIVATE LIMITED that produces timber based products of capacity 19830 MTPA and resin of 234 MTPA. by **SHREE TIMBER PRODUCTS PRIVATE LIMITED** located at **TINSUKIA,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/IND3/464515/2024	SEAC/SEIAA.3792/2024	04/06/2024	Synthetic organic chemicals industry (5(f))

3.29.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :09/07/2024

Deliberations of SEAC 1 :

All the papers connected to the proposal are placed before the Committee for due diligence and deliberation. The Proponent has also submitted that the unit is falling under Lakhipather Range of Digboi Forest Division and furnished the copy of **License No.B/G-38(a)/WBI/2024/1849-50 Dated 21.06.2024 valid from 1.01.2023 to 31.12.2027** granted by the Environment and Forest Department, GoA.

It is on record that in pursuance to the EIA Notification, 2006 and as envisaged under Clause 5(d) of the said Notification, 2006 dated 14th September, 2006 by the MoEF & CC in the Govt. of India a sub-committee of the SEAC, Assam was constituted comprising of the Hon'ble Members to conduct physical field inspection of a similarly situated project site for adequate appraisal of the project proposal.

The mandate of the sub-committee was to inspect the proposed site, assess the present status of operation of the plant and also to assess the existing environmental status, appraisal on the probable environmental impact that may generate on the natural environment in the surroundings.

The observation and comments / recommendations of the sub-committee who have assessed the environmental issues for the said Wood Based Industry covering the aspects of emission, effluent and Hazardous waste generation are placed for appraisal of the Committee.

a) The sub-committee observed that the manufacturing processes in a Plywood Factory use Resins, which are of two types in general, viz., Melamine Urea Resin and Phenol Formaldehyde Resin. Melamine, Phenol and Formaldehyde are the major raw materials for production of resins. The resins are produced by blending the raw materials in a batch process and a resin producing unit washes the reactor/vessels intermittently when type of resin production is changed.

b) Effluent is generated in the form of vessel washings. Further, effluent is also generated from spillage of glue or resins, which are applied on the surface of the ply boards. Member Secretary, SEAC heading the sub-committee pointed out that **a resin producing unit can recycle the entire quantity of such effluent** in the next batch of resin production by proper collection of effluent and subsequent recycling.

c) It was also observed that the effluent generated from the glue application section was released into the storm drain. Further, during the course of visit to the resin plant located outside the main factory shed, it came to light that effluent generated was released into the storm drain. The team also observed that a small ETP was installed by the PP at the end of the storm drain and the visiting team was of the opinion that such a small ETP would not function properly in case effluent get mixed with rain water and suggested for a bigger STP in place.

d) The inspection team strongly felt that a Plywood Industry should invariably install Rain Water Harvesting (RWH) system, which shall function as a sedimentation tank for the rain water mixed with saw dust and other solid particles. The unit should use the harvested rain water in dust suppression measures like water sprinklings in haul roads. After proper sedimentation of the rain water in the RWH tank, which may be even in the form of earthen pond, the water may be allowed to discharge to nearby drains as available.

Entire effluent generated in such a plant shall be fully recycled as the effluent generated in a resin unit contain phenolic substances and formaldehyde (carciogenic) and these contaminants are potential contaminants to the environment, especially the soil and water environment.

*There are examples of complete recycling of effluent in such a resin producing or using industry and such environmental best practices which need to be replicated by all other similarly placed industries in the State***.**

e) Since primarily, the Plywood Industries operate boiler to generate steam, the **saw dusts** and **wood rejects** generated in the plant as wastes, are used as boiler fuel in such a plywood industry. The Committee opined that if **biomass briquettes**, which can be converted from the saw dust and other wood rejects, are used effectively as fuel in the boiler instead of saw dust, emission generated from the boiler would contain lesser dust and as such the emission would be reduced. Emissions as released by the instant Unit as of now contain semi charred carbon.

f) Empty chemical drums are generated as hazardous waste in the premises of the **Shree Timber Products Private Limited.** It is required to have proper quantification and subsequent stacking of this type of hazardous waste.

Decision:

After due deliberation the august ***Committee is of the opinion for recommending grant of the EC*** to the project Proponent subject to the to strict adhere and compliance of the special conditions as best environmental practices while according EC to a Plywood Manufacturing Units.

Date of SEIAA 2 :19/09/2024
Deliberations of SEIAA 2 :
The committee suggest for site visit.

Date of SEIAA 3 :N/A
Deliberations of SEIAA 3 :
ADS required-

1. Installation of an ETP with adequate facility for handling peak load in consultation with PCBA with a permanent weather protection shed for the ETP.
2. Storage tanks and pipe lines for 100% recycling of treated effluent.

3.29.3. Deliberations by the SEIAA in current meetings

EC is approved for Shree industries Private Limited is a Plywood Manufacturing Industry that produces timber based products of 13350 MTPA and resins of capacity 234 MTPA and as such it needs prior Environmental Clearance (EC) for setting up of such an industry. As per the order of the MoEF & CC in the GoI contained in F.No. 22-93/2017-IA.III dated 10.04.2019 a resin producing unit of less than 1000 MTPA needs to obtain prior EC under the B-2 Category.

3.29.4. Recommendation of SEIAA

Approved

3.29.5. Details of Environment Conditions

3.29.5.1. Specific

SPECIAL CONDITIONS BY SEAC	
1.	The Unit shall manage the effluent generated in a resin plant in a closed loop without passing the effluent to a storm drain.
2.	The Unit shall have agreement with bio mass briquette producing unit. Saw dust generated by the unit shall be converted into briquette and then be used in the boiler as fuel. This would reduce the emission generation to a significant level.
3.	Storm water drain shall be segregated from the effluent drain.
4.	Rain Water Harvesting system shall be made. A pond shall be constructed within the premises and storm water drain shall be connected to it. The earthen pond shall function as Rain Water Harvesting tank as well as Sedimentation pit.
5.	The HW generated, viz., empty containers of chemicals and resin residues, shall be inventoried and stacked properly for subsequent disposal to TSDFs.
6.	The License from the competent authority in the Forest Department as applicable for the establishment of the Wood Based Industry in terms of the applicable Rules shall be obtained and the copy of the same shall have to be uploaded.
7.	The Committee further made it a point that the premises of the Manufacturing Unit needs to be planted with local species of plants for greenery to ameliorate the environment. It was also urged that the unit shall encourage captive plantation of plywood species in the nearby villages in the vacant areas, roadsides, community lands and also raise private plantations for which adequate fund should be annually earmarked and spent. It is evident that the industry is procuring timbers for the purposes from the nearby areas belonging to private individuals in villages and, therefore, sufficient saplings of the species like Kathal (*Artocarpusintegrifolia*), Jamun (*Syzygium cuminii*), Kadam (*Anthocephalus cadamaba*), Am (*Mangiferaindica*), Boga Siris (*Albizzia procera*) etc should be distributed to the individuals in the villages for plantation in their homestead besides taking up the plantation activities in areas indicated above under due discussions with the DFO, Digboi. An amount of Rs 8 lakh (Rs 3 lakh-nursery raising + Rs 5 Lakh for plantation) as agreed upon by the PP during the course of presentation should be annually spent as a part of the Corporate Environmental Responsibility (CER) activity and shall be uploaded in the PARIVESH Portal.
8.	It shall be bounded on the project Proponent to upload the Half Yearly Compliance Report (HCR) in terms of the guidelines circulated under OM No. IA3-22/1/2022-IA.III Dated 14.06.2024 by the ministry in the MoEF & CC, GoI.

3.29.5.2. Standard

5(f)	**Synthetic organic chemicals industry**
null	
1.	No further expansion or modifications in the plant, other than mentioned in the EIA Notification, 2006 and its amendments, shall be carried out without prior approval of the Ministry of Environment, Forest and Climate

	Change/SEIAA, as applicable. In case of deviations or alterations in the project proposal from those submitted to this Ministry for clearance, a fresh reference shall be made to the Ministry/SEIAA, as applicable, to assess the adequacy of conditions imposed and to add additional environmental protection measures required, if any.
1.	The Project proponent shall strictly comply with the rules and guidelines issued under the Manufacture, Storage and Import of Hazardous Chemicals (MSIHC) Rules, 1989, as amended time to time, the Chemical Accidents (Emergency Planning, Preparedness and Response) Rules, 1996, and Hazardous and Other Wastes (Management and Trans-Boundary Movement) Rules, 2016 and other rules notified under various Acts.
1.	The energy source for lighting purpose shall be preferably LED based, or advanced having preference in energy conservation and environment betterment.
1.	The overall noise levels in and around the plant area shall be kept well within the standards by providing noise control measures including acoustic hoods, silencers, enclosures etc. on all sources of noise generation. The ambient noise levels shall conform to the standards prescribed under the Environment (Protection) Act, 1986 Rules, 1989 viz. 75 dBA (day time) and 70 dBA (night time).
1.	The company shall undertake all relevant measures for improving the socio-economic conditions of the surrounding area. The activities shall be undertaken by involving local villages and administration. The company shall undertake eco-developmental measures including community welfare measures in the project area for the overall improvement of the environment.
1.	The company shall earmark sufficient funds towards capital cost and recurring cost per annum to implement the conditions stipulated by the Ministry of Environment, Forest and Climate Change as well as the State Government along with the implementation schedule for all the conditions stipulated herein. The funds so earmarked for environment management/ pollution control measures shall not be diverted for any other purpose.
1.	A copy of the clearance letter shall be sent by the project proponent to concerned Panchayat, Zilla Parishad/Municipal Corporation, Urban local Body and the local NGO, if any, from whom suggestions/ representations, if any, were received while processing the proposal.
1.	The project proponent shall also upload/submit six monthly reports on Parivesh Portal on the status of compliance of the stipulated Environmental Clearance conditions including results of monitored data to the respective Integrated Regional Office of MoEF&CC, the respective Zonal Office of CPCB and SPCB. A copy of Environmental Clearance and six monthly compliance status report shall be posted on the website of the company.
1.	The environmental statement for each financial year ending 31st March in Form-V as is mandated shall be submitted to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently, shall also be put on the website of the company along with the status of compliance of environmental clearance conditions and shall also be sent to the respective Integrated Regional Office of MoEF&CC by e-mail.
1.	The project proponent shall inform the public that the project has been accorded environmental clearance by the Ministry and copies of the clearance letter are available with the SPCB/Committee and may also be seen at Website of the Ministry and at https://parivesh.nic.in/. This shall be advertised within seven days from the date of issue of the clearance letter, at least in two local newspapers that are widely circulated in the region of which one shall be in the vernacular language of the locality concerned and a copy of the same shall be forwarded to the concerned Regional Office of the Ministry.
1.	The project authorities shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities and the date of start of the project.
1.	This Environmental clearance is granted subject to final outcome of Hon'ble Supreme Court of India, Hon'ble High Court, Hon'ble NGT and any other Court of Law, if any, as may be applicable to this project.
Specific Conditions	
1.	Process effluent/any wastewater shall not be allowed to mix with storm water. Storm water drain shall be passed

	through guard pond.

3.30. Agenda Item No 30:

3.30.1. Details of the proposal

Regularisation of existing manufacturing unit BHISMAK PLY PRIVATE LIMITED that produces timber based products of 33478.62 MTPA and resin of capacity 225 MTPA by **BHISMAK PLY PRIVATE LIMITED** located a t **TINSUKIA,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/IND3/473280/2024	SEAC/SEIAA.3835/2024	23/07/2024	Synthetic organic chemicals industry (5(f))

3.30.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :09/08/2024

Deliberations of SEAC 1 :

All the relevant papers are placed before the Committee and the Proponent was asked to present the case for adequate appraisal of the project proposal. The project Proponent has presented the proposal accordingly explaining the need for obtaining the EC for regularization with the requirement of the CTO on a regular basis. The Proponent has also submitted that the unit is falling within the Makum Industrial Estate-I and furnished the copy of **License No WBI/PRI/UAZ/EAC/DIB/095** valid from **25.01.2024 to 24.01.2029** granted by the Environment and Forest Department, GoA.

A sub-Committee was constituted for inspection of the site in a similarly placed unit at Palashbari requiring the EC which is taken into consideration in the instant matter too. The mandate of the sub-Committee was to inspect the proposed site, assess the present status of operation of the plant and also to assess the existing environmental status, appraisal on the probable environmental impact that may generate on the natural environment in the surroundings.

The observation and comments / recommendations of the sub-committee who have assessed the environmental issues in the said Plywood Industry covering the aspects of emission, effluent and Hazardous waste generation are placed for appraisal of the Committee in the instant case too being of similar nature to dispense with site inspection.

a) The sub-Committee observed that the manufacturing processes in a Plywood Factory use Resins, which are of two types in general, viz., Melamine Urea Resin and Phenol Formaldehyde Resin. Melamine, Phenol and Formaldehyde are the major raw materials for production of resins. The resins are produced by blending the raw materials in a batch process and a resin producing unit washes the reactor/vessels intermittently when type of resin production is changed.

b) Effluent is generated in the form of vessel washings. Further, effluent is also generated from spillage of glue or resins, which are applied on the surface of the ply boards.

c) Member Secretary, SEAC heading the sub-committee pointed out that **a resin producing unit can recycle the entire quantity of such effluent** in the next batch of resin production by proper collection of effluent and subsequent recycling.

d) It was also observed that the effluent generated from the glue application section was released into the storm drain. Further, during the course of visit to the resin plant located outside the main factory shed, it was observed that effluent generated was released into the storm drain.

e) The team also observed that a small ETP was installed by the PP at the end of the storm drain and the visiting team was of the opinion that such a small ETP would not function properly in case effluent get mixed with rain water and suggested for a bigger STP in place.

f) The inspection team strongly felt that a Plywood Industry should invariably install Rain Water Harvesting (RWH) system, which shall function as a sedimentation tank for the rain water mixed with saw dust and other solid particles. The unit should use the harvested rain water in dust suppression measures like water sprinklings in haul roads. After proper sedimentation of the rain water in the RWH tank, which may be even in the form of earthen pond, the water may be allowed to discharge to nearby drains as available.

g) Entire effluent generated in such a plant shall be fully recycled as the effluent generated in a resin unit contain *phenolic* substances and formaldehyde (*carciogenic*) and these are potential contaminants to the environment, especially the soil and water environment.

There are examples of complete recycling of effluent in such a resin producing or using industry and such environmental best practices which need to be replicated by all other similarly placed industries in the State**.**

h) Since primarily, the Plywood Industries operate boiler to generate steam, the **saw dusts** and **wood rejects** generated in the plant as wastes, are used as boiler fuel in such a plywood industry. The Committee opined that if **biomass briquettes**, which can be converted from the saw dust and other wood rejects, are used effectively as

fuel in the boiler instead of saw dust, emission generated from the boiler would contain lesser dust and as such the emission would be reduced.

i) Empty chemical drums as are generated as hazardous waste in the premises, is required to have proper quantification and subsequent stacking of this type of hazardous waste.

After due deliberation the august Committee is of the opinion for recommending grant of the **EC** to the project Proponent subject to the strict adherence and compliance of the special conditions as best environmental practices:

Decision: Recommended for grant of the EC.

Date of SEIAA 2 :19/09/2024
Deliberations of SEIAA 2 :
The committee suggest for site visit.

Date of SEIAA 3 :N/A
Deliberations of SEIAA 3 :
ADS required-

1. Installation of an ETP with adequate facility for handling peak load in consultation with PCBA with a perm
2. Storage tanks and pipe lines for 100% recycling of treated effluent.

Date of SEIAA 4 :04/04/2025
Deliberations of SEIAA 4 :
ADS required-

1. As ADS Replied the ETP is not properly installation, and upload more photos of Installation of an ETP with adequate facility for handling peak load in consultation with PCBA with a permanent weather protection shed for the ETP.
2. Storage tanks and pipe lines for 100% recycling of treated effluent.

3.30.3. Deliberations by the SEIAA in current meetings

EC is approved for Bhismak Ply Private Limited is a Plywood Manufacturing Industry that produces plywood of 33478.62 MTPA and resin of capacity 225 MTPA and as such it needs prior Environmental Clearance (EC) for setting up of such an industry. As per the order of the MoEF & CC, GoI contained in F.No. 22-93/2017-IA.III dated 10.04.2019 a resin producing unit of less than 1000 MTPA needs to obtain prior EC under the B-2 Category.

3.30.4. Recommendation of SEIAA

Approved

3.30.5. Details of Environment Conditions

3.30.5.1. Specific

SPECIAL CONDITIONS BY SEAC

1.	The Unit shall manage the effluent generated in a resin plant in a closed loop without passing the effluent to a storm drain.
2.	The Unit shall have agreement with bio mass briquette producing unit. Saw dust generated by the unit shall be converted into briquette and then be used in the boiler as fuel to reduce the emission generation to a significant level.

Subject: Grant of EC under the provision of the EIA Notification 2006-regarding.

Sir/Madam,

This is in reference to your application for Grant of EC under the provision of the EIA Notification 2006-regarding in respect of project GOVT. PERMIT AREA OF KELENG CHOCK A submitted to SEAC & SEIAA vide proposal number SIA/AS/MIN/486219/2024 dated 06/07/2024.

2. The particulars of the proposal are as below :

(i) EC Identification No.	EC24C0107AS5407425N
(ii) File No.	
(iii) Clearance Type	Fresh ToR
(iv) Category	B2
(v) Project/Activity Included Schedule No.	1(a) Mining of minerals
(vii) Name of Project	GOVT. PERMIT AREA OF KELENG CHOCK A
(viii) Name of Company/Organization	BAKSA FOREST DIVISION MUSHALPUR
(ix) Location of Project (District, State)	BAKSA, ASSAM
(x) Issuing Authority	SEIAA
(xii) Applicability of General Conditions	no
(xiii) Applicability of Specific Conditions	no

In view of the particulars given in the Para 1 above, the project proposal interalia including Form-1(Part A and B) were submitted to the State Expert Appraisal Committee (SEAC), Assam under the provision of EIA notification 2006 and its subsequent amendments.

The above-mentioned proposal has been considered by State Expert Appraisal Committee (SEAC) in the meeting held on 05/04/2025. The minutes of the meeting and all the Application and documents submitted (viz. Form-1 Part A and Part B) are available on PARIVESH portal which can be accessed by scanning the QR Code above.

The brief about configuration of plant/equipment, products and by products and salient features of the project along with environment settings, as submitted by the Project proponent in Form-1 (Part A and B) /presented during SEIAA are annexed to this EC as Annexure (1).

The SEIAA, in its meeting held on 13/05/2025, based on information & clarifications provided by the project proponent and after detailed deliberations recommended the proposal for grant of EC under the provision of EIA Notification, 2006 and as amended thereof subject to stipulation of specific and general conditions as detailed in Annexure (2).

The SEAC has examined the proposal in accordance with the Environment Impact Assessment (EIA) Notification, 2006 & further amendments thereto and after recommendations of the State Environment Impact Assessment Authority (SEIAA) hereby decided to grant EC for instant proposal of **Divisional Forest Officer, Baksa Forest Division** under the provisions of EIA Notification, 2006 and as amended thereof.

The SEIAA reserves the right to stipulate additional conditions, if found necessary.

The EC to the aforementioned project is under provisions of EIA Notification, 2006. It does not tantamount to approvals/consent/permissions etc. required to be obtained under any other Act/Rule/regulation. The Project Proponent is under obligation to obtain approvals /clearances under any other Acts/ Regulations or Statutes, as applicable, to the project.

This issues with the approval of the Competent Authority.

The GPS Coordinates are as follows-
26° 31' 15.20" N 91° 40' 22.04" E
26° 31' 15.85" N 91° 40' 24.17" E
26° 30' 49.02" N 91° 40' 34.27" E
26° 30' 49.51" N 91° 40' 32.72" E

EC is approved for project area allotted 4.38Ha with a quantity of 37,840Cu M of Sand in 1 (one) Year subject to the terms and conditions laid down by SEAC and as per approved in terms of the approved DSR- (Page No. B.143, SL. No 9).

Copy To

1. The Joint Secretary, Ministry of Environment, Forest and Climate Change, Government of India, MOEF&CC, Indira Paryavaran Bhawan, Jorbagh Rd, New Delhi-110003.
2. The Secretary to the Govt. of Assam, Environment & Forest Department, Dispur, Guwahati-6 Cum Member Secretary, SEIAA, Assam for favour of kind information.
3. The P.C.C.F, HoFF, Govt. of Assam, Panjabari, Guwahati-37 for favour of kind information.
4. The Member Secretary, PCB Assam for favour of kind information.
5. The Divisional Forest Officer, Baksa Forest Division, Mushalpur, Dist. Baksa, Assam for information & necessary action to ensure that all **Specific Conditions & General Condition** are complied with.
6. The Integrated Regional Office, Ministry of Environment, Forest & Climate Change, 4th Floor, Housefed Building, G.S. Road, Rukminigaon, Guwahati-22 for kind information.
7. Office Copy.

Annexure 1

Specific EC Conditions for (Mining Of Minerals)

1. General Conditions By Seac

S. No	EC Conditions
1.1	This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan and the approved DSR for the district.
1.2	This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates recorded in the approved DSR; (b) the active bank of the river is not disturbed / damaged because of mining and transportation of mining materials; (c) the Proponent shall extract the approved quantity of minerals indicated herein with maximum mining depth of up to 1(one) meter only from the non-mined surface.
1.3	The quantities of minor mineral allowed for extraction, annually, in terms of the approved DSR shall not be exceeded by the Proponent.
1.4	The Orders of the Hon'ble Apex Court, the NGT (Eastern Bench), Kolkata; the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} shall be followed by the Proponent.

2. Specific Conditions By Seac

S. No	EC Conditions
2.1	Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO.
2.2	The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period.
2.3	The DFO shall comply with necessary formalities for transfer of the EC to the lessee with due NOC for filing application to the SEIAA before allowing mining so that the entire accountability in mining is vested on the lessee / Proponent with the same terms and conditions stipulated in the EC as per the EIA Notification, 2006.
2.4	The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan/DSR before allowing any mining.
2.5	CER activities shall be carried out / undertaken by the Proponent and a minimum estimated cost to be Rs6.00 Lakh only shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the nearby village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 3 (three) of the year of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report.
2.6	Plantation activities shall be carried out / undertaken in any educational institution or Govt lands

S. No	EC Conditions
	along the proposed mining area involving local NGOs, School / College students and adequate fund required for the purposes shall be earmarked. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with due consultation of the DFO and shall make effort to label the plant species for the benefits of the villagers, common people and specially the school/college students.
2.7	The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Agor(*Aquillariamalaccensis*), Amlokhi (*Phyllanthus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saracaasoca*),Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*), Mohaneem (*Azedirachtaindica*), Jamun (*Syzygiumcuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpusintegrifolia*), Ow Tenga (*Dilleniaindica*), Chandan (*Santalum album*),Thekera (*Garcinia spp*) etc etc.
2.8	Half Yearly Compliance Reports (HCR) are mandatory on the part of project Proponent which need to be uploaded on or before 1st June and 1st December of the calendar year in PARIVESH 2.0 portal and no activity shall be permitted by the DFO without HCR.
2.9	Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

Standard EC Conditions for (Mining of minerals)

1. Statutory Compliance

S. No	EC Conditions
1.1	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.2	The Project proponent complies with all the statutory requirements and judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India &Ors before commencing the mining operations.
1.3	The Project Proponent shall inform the MoEF&CC for any change in ownership of the mining lease. In case there is any change in ownership or mining lease is transferred. PP needs to apply for transfer of EC as per provisions of the para 11 of EIA Notification, 2006 as amended from time to time.
1.4	This Environmental Clearance (EC) is subject to orders/ judgment of Honble Supreme Court of India, Honble High Court, Honble NGT and any other Court of Law, Common Cause Conditions as may be applicable.
1.5	A copy of EC letter will be marked to concerned Panchayat / local NGO etc. if any, from whom suggestion / representation has been received while processing the proposal.
1.6	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State Pollution Control Board/ Committee.
1.7	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.

S. No	EC Conditions
1.8	The State Government concerned shall ensure that mining operation shall not be commenced till the entire compensation levied, if any, for illegal mining paid by the Project Proponent through their respective Department of Mining & Geology in strict compliance of Judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India & Ors.
1.9	State Pollution Control Board/Committee shall be responsible for display of this EC letter at its Regional office, District Industries Centre and Collector's office/ Tehsildar's Office for 30 days.
1.10	The Project Proponent shall follow the mitigation measures provided in MoEFCC's Office Memorandum No. Z-11013/57/2014-IA.II (M), dated 29th October, 2014, titled "Impact of mining activities on Habitations-Issues related to the mining Projects wherein Habitations and villages are the part of mine lease areas or Habitations and villages are surrounded by the mine lease area."

2. Air Quality Monitoring And Preservation

S. No	EC Conditions
2.1	Effective safeguard measures for prevention of dust generation and subsequent suppression (like regular water sprinkling, metalled road construction etc.) shall be carried out in areas prone to air pollution wherein high levels of PM10 and PM2.5 are evident such as haul road, loading and unloading point and transfer points. The Fugitive dust emissions from all sources shall be regularly controlled by installation of required equipments/ machineries and preventive maintenance. Use of suitable water-soluble chemical dust suppressing agents may be explored for better effectiveness of dust control system. It shall be ensured that air pollution level conform to the standards prescribed by the MoEFCC/ Central Pollution Control Board.
2.2	Appropriate Air Pollution Control (APC) system shall be provided for all the dust generating points including fugitive dust from all vulnerable sources, so as to comply prescribed stack emission and fugitive emission standards.
2.3	The project proponent use leak proof trucks/dumpers carrying ore and other raw materials and cover them with tarpaulin.
2.4	The project proponent shall submit monthly summary report of continuous stack emission and air quality monitoring and results of manual stack monitoring and manual monitoring of air quality /fugitive emissions to Regional Office of MoEF&CC, Zonal office of CPCB and Regional Office of SPCB along with six-monthly monitoring report.
2.5	Design the ventilation system for adequate air changes as per ACGIH document for all tunnels, motor houses, Oil Cellars.

3. Water Quality Monitoring And Preservation

S. No	EC Conditions
3.1	Project Proponent shall regularly monitor and maintain records w.r.t. ground water level and quality in and around the mine lease by establishing a network of existing wells as well as new piezo-meter installations during the mining operation in consultation with Central Ground Water Authority/

S. No	EC Conditions
	State Ground Water Department. The Report on changes in Ground water level and quality shall be submitted on six-monthly basis to the Regional Office of the Ministry, CGWA and State Groundwater Department / State Pollution Control Board.
3.2	The Project Proponent shall undertake regular monitoring of natural water course/ water resources/ springs and perennial nallahs existing/ flowing in and around the mine lease including upstream and downstream. Sufficient number of gullies shall be provided at appropriate places within the lease for management of water. The parameters to be monitored shall include their water quality vis-à-vis suitability for usage as per CPCB criteria and flow rate. It shall be ensured that no obstruction and/ or alteration be made to water bodies during mining operations without justification and prior approval of MoEFCC. The monitoring of water courses/ bodies existing in lease area shall be carried out four times in a year viz. pre- monsoon (April May), monsoon (August), post-monsoon (November) and winter (January) and the record of monitored data may be sent regularly to Ministry of Environment, Forest and Climate Change and its Regional Office, Central Ground Water Authority and Regional Director, Central Ground Water Board, State Pollution Control Board and Central Pollution Control Board. Clearly showing the trend analysis on six-monthly basis.
3.3	In case, immediate mining scheme envisages intersection of ground water table, then Environmental Clearance shall become operational only after receiving formal clearance from CGWA. In case, mining operation involves intersection of ground water table at a later stage, then PP shall ensure that prior approval from CGWA and MoEFCC is in place before such mining operations. The permission for intersection of ground water table shall essentially be based on detailed hydro-geological study of the area.

4. Noise And Vibration Monitoring And Prevention

S. No	EC Conditions
4.1	The peak particle velocity at 500m distance or within the nearest habitation, whichever is closer shall be monitored periodically as per applicable DGMS guidelines.
4.2	The Project Proponent shall take measures for control of noise levels below 85 dBA in the work environment. The workers engaged in operations of HEMM, etc. should be provided with ear plugs /muffs. All personnel including laborers working in dusty areas shall be provided with protective respiratory devices along with adequate training, awareness and information on safety and health aspects. The PP shall be held responsible in case it has been found that workers/ personals/ laborers are working without personal protective equipment.

5. Noise Monitoring And Prevention

S. No	EC Conditions
5.1	Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six-monthly compliance report.

6. Mining Plan

S. No	EC Conditions
6.1	The land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life shall be governed as per the approved Mining Plan. The excavation vis-à-vis backfilling in the mine lease area and corresponding afforestation to be raised in the reclaimed area shall be governed as per approved mining plan. PP shall ensure the monitoring and management of rehabilitated areas until the vegetation becomes self-sustaining. The compliance status shall be submitted half-yearly to the MoEFCC and its concerned Regional Office.
6.2	The Project Proponent shall adhere to approved mining plan, inter alia, including, total excavation (quantum of mineral, waste, over burden, inter burden and top soil etc.); mining technology; lease area; scope of working (method of mining, overburden & dump management, O.B& dump mining, mineral transportation mode, ultimate depth of mining, concurrent reclamation and reclamation at mine closure; land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life; etc.).

7. Land Reclamation

S. No	EC Conditions
7.1	The slope of dumps shall be vegetated in scientific manner with suitable native species to maintain the slope stability, prevent erosion and surface run off. The selection of local species regulates local climatic parameters and help in adaptation of plant species to the microclimate. The gullies formed on slopes should be adequately taken care of as it impacts the overall stability of dumps. The dump mass should be consolidated with the help of dozer/ compactors thereby ensuring proper filling/ leveling of dump mass. In critical areas, use of geo textiles/ geo-membranes / clay liners / Bentonite etc. shall be undertaken for stabilization of the dump.
7.2	Check dams of appropriate size, gradient and length shall be constructed around mine pit and OB dumps to prevent storm run-off and sediment flow into adjoining water bodies. A safety margin of 50% shall be kept for designing of sump structures over and above peak rainfall (based on 50 years data) and maximum discharge in the mine and its adjoining area which shall also help in providing adequate retention time period thereby allowing proper settling of sediments/ silt material. The sedimentation pits/ sumps shall be constructed at the corners of the garland drains.
7.3	The Overburden (O.B.), waste and topsoil generated during the mining operations shall be stacked at earmarked OB dump site(s) only and it should not be kept active for a long period of time. The physical parameters of the OB / waste dumps / topsoil dump like height, width and angle of slope shall be governed as per the approved Mining Plan and the guidelines/circulars issued by D.G.M.S. The topsoil shall be used for land reclamation and plantation.

8. Waste Management

S. No	EC Conditions
8.1	The waste oil, grease and other hazardous waste shall be disposed of as per the Hazardous & Other waste (Management & Transboundary Movement) Rules, 2016.
8.2	Kitchen waste shall be composted or converted to biogas for further use.(to be decided on case to case basis depending on type and size of plant)

9. Green Belt And Emp

S. No	EC Conditions
9.1	The project proponent shall prepare GHG emissions inventory for the plant and shall submit the programme for reduction of the same including carbon sequestration including plantation.

10. Transportation

S. No	EC Conditions
10.1	No Transportation of the minerals shall be allowed in case of roads passing through villages/ habitations. In such cases, PP shall construct a 'bypass' road for the purpose of transportation of the minerals leaving an adequate gap (say at least 200 meters) so that the adverse impact of sound and dust along with chances of accidents could be mitigated. All costs resulting from widening and strengthening of existing public road network shall be borne by the PP in consultation with nodal State Govt. Department. Transportation of minerals through road movement in case of existing village/ rural roads shall be allowed in consultation with nodal State Govt. Department only after required strengthening such that the carrying capacity of roads is increased to handle the traffic load. The pollution due to transportation load on the environment will be effectively controlled and water sprinkling will also be done regularly. Vehicular emissions shall be kept under control and regularly monitored. Project should obtain Pollution Under Control (PUC) certificate for all the vehicles from authorized pollution testing centers. [If applicable in case of road transport].

11. Green Belt

S. No	EC Conditions
11.1	The Project Proponent shall develop greenbelt in 7.5m wide safety zone all along the mine lease boundary as per the guidelines of CPCB in order to arrest pollution emanating from mining operations within the lease. The whole Green belt shall be developed within first 5 years starting from windward side of the active mining area. The development of greenbelt shall be governed as per the EC granted by the Ministry irrespective of the stipulation made in approved mine plan.

12. Public Hearing And Human Health Issues

S. No	EC Conditions
12.1	Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, creche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.
12.2	Occupational health surveillance of the workers shall be done on a regular basis and records maintained as per the Factories Act.
12.3	The project proponent shall carry out heat stress analysis for the workmen who work in high temperature work zone and provide Personal Protection Equipment (PPE) as per the norms of Factory Act.

13. Corporate Environment Responsibility

S. No	EC Conditions
13.1	The Project Proponent shall submit the time- bound action plan to the concerned regional office of the Ministry within 6 months from the date of issuance of environmental clearance for undertaking the activities committed during public consultation by the project proponent and as discussed by the EAC, in terms of the provisions of the MoEF&CC Office Memorandum No.22-65/2017-IA.III dated 30 September, 2020. The action plan shall be implemented within three years of commencement of the project.
13.2	Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the Six Monthly Compliance Report.
13.3	Self-environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
13.4	All the recommendations made in the Charter on Corporate Responsibility for Environment Protection (CREP) for the Mineral Beneficiation plants shall be implemented.

14. Miscellaneous

S. No	EC Conditions
14.1	The project proponent shall abide by all the commitments and recommendations made in the EIA/EMP report, commitment made during Public Hearing and also that during their presentation to the Expert Appraisal Committee.
14.2	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
14.3	44) The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
14.4	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
14.5	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
14.6	The project proponent shall monitor the criteria pollutants level namely; PM10, S02, NOx (ambient levels as well as stack emissions) or critical sectoral parameters, indicated for the projects and display the same at a convenient location for disclosure to the public and put on the website of the company.
14.7	The project proponent shall inform the Regional Office as well as the Ministry, the date of financial

S. No	EC Conditions
	closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.
14.8	The Project Proponent shall prepare digital map (land use & land cover) of the entire lease area once in five years purpose of monitoring land use pattern and submit a report to concerned Regional Office of the MoEF&CC.
14.9	Any appeal against this environmental clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.
14.10	The Ministry or any other competent authority may alter/modify the above conditions or stipulate any further condition in the interest of environment protection.
14.11	The concerned Regional Office of the MoEF&CC shall randomly monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the MoEF&CC officer(s) by furnishing the requisite data / information / monitoring reports.
14.12	The Project Authorities should inform to the Regional Office regarding date of financial closures and final approval of the project by the concerned authorities and the date of start of land development work.
14.13	The above conditions will be enforced inter-alia, under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986 and the Public Liability Insurance Act, 1991 along with their amendments and rules made there under and also any other orders passed by the Hon'ble Supreme Court of India/High Court and any other Court of Law relating to the subject matter.
14.14	Concealing factual data failure to comply with any or submission of false/ fabricated data and of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act, 1986.
14.15	In pursuant to Ministrys O.M No 22-34/2018-IA.III dated 16.01.2020 to comply with the direction made by Honble Supreme Court on 8.01.2020 in W.P. (Civil) No 114/2014 in the matter Common Cause vs Union of India, the mining lease holder shall after ceasing mining operations, undertake regrassing the mining area and any other area which may have been disturbed due to other mining activities and restore the land to a condition which is fit for growth of fodder, flora, fauna etc.

Project Details

1. Details of Project

1.1. Name of the Project	Khagrabari P.P. Land Sand and Stone Mining Permit Area
1.2. Project Proposal For	New
1.3. Project ID (Single Window Number)	SW/174016/2024
1.4. Description of Project	Khagrabari P.P. Land Sand and Stone Mining Permit Area is located at Khagrabari, P.O. Kalpani, Dist. Baksa, BTAD, Assam. The proposed project included mining of 803 Cum of Sand, 10045 Cum of Stone & 4018 Cum of Sand Gravel for two years.

2. Details of the Company/Organization/User Agency making application

2.1. Legal Status of the Company/Organization/User Agency	Individual
2.2. Name of the Company/ Organization/User agency	ABDUL MANNAN

Registered address

2.3. Address	Sukrungbari Gaon, P.O. Gobardhana, Dist. Baksa
2.4. State	ASSAM
2.5. District	BAKSA
2.6. Pin Code	781315
2.7. E-mail address	abdulec22@yahoo.com
2.8. Mobile number	xxxxxx1336

3. Details of the person making application

3.1. Name	ABDUL MANNAN
3.2. Designation	Proprietor

Correspondence address

3.3. Address	Sukrungbari Gaon, P.O. Gobardhana, Dist. Baksa
3.4. State	ASSAM
3.5. District	BAKSA
3.6. Pin Code	781315
3.7. E-mail address	abdulec22@yahoo.com
3.8. Mobile number	xxxxxx1336

Project Location

4. Location of the Project or Activity

4.1. Upload KML	Mining Permit Area.kml
4.2. Whether the project/activity falling in the state/UT sharing international borders	NO
5. Shape of the Project	Non - Linear

5. Shape of the Project	Non - Linear

Location Details

Toposheet No	State/UT	District	Sub District	Village	Plot/Survey/Khasra No.

Remarks

N/A

6. Land Requirement (in Ha) of the project or activity

6.1. Nature of Land involved	
6.2. Non-Forest Land [A]	2.48
6.3. Forest Land [B]	0
6.4. Total Land [A+B]	2.48

'roject Activity Cost

6. Project/Activity Cost

6.1. Total Cost of the Project at current price level (in Lakhs)	58 Amount in Words : **Fifty Eight Lakh(s) Only**

7. Employment likely to be generated

7.1. During construction phase

Permanent employment

Temporary employment

7.2. During operational phase

Permanent employment

7.2.1. No. of permanent employment (No.s) [A]	10
7.2.2. Period of employment (No. of days) [B]	560
7.2.3. No. of man-days [X]=[A]*[B]	5600

Temporary employment

7.2.4. Temporary / Contractual employment (No. of Man days) [Y]	10
7.2.5. Total [X] +[Y]	5610

)thers

8. Whether Rehabilitation and Resettlement (R&R) involved?	NO
9. Whether project area involves shifting of watercourse/road/rail/Transmission line/water pipeline, etc. required?	NO
10. Whether any alternative site(s) examined or part thereof for the non-site-specific component?	Not applicable as the project or activity is site specific

11. Whether there is any Government Order or Policy/ Court

11. Whether there is any Government Order or Policy/ Court order relevant or restricting to the site?	NO
12. Whether there is any litigation pending against the project and/or land in which the project is proposed to be set up?	NO
13. Whether the proposal involves violation of Act/Rule/Regulation/Notification of Central/State Government?	NO

Application for ToR (Category A, B1, and B2 Violation)/EC (Category B2) - Form 1

Basic Information

1. Category of the Project/Activity

1.1. Name of the project proposal	Khagrabari P.P. Land Sand and Stone Mining Permit Area	
1.2. Type of Proposal	New	
1.3. Whether the Project Activity (Construction/ Operation) has been undertaken without obtaining **prior** Environmental Clearance under the provision of EIA Notification 1994/ 2006?	No	
1.4. Whether multiple items (Components) as per the notification involved in the proposal?	No	
1.4.1. Item No. as per schedule to EIA Notification, 2006	1(a) Mining of minerals	Non-Coal Mining (Minor Minerals-other than river bed mining)
Capacity	2.48	Ha
2. Whether project/activity attracts the General Condition specified in the Schedule of EIA Notification?	No	
3. Whether any Protected Areas Notified Under the Wild Life (Protection) Act, 1972 are located within 10 km of the project site	N/A	
4. Whether any Severely Polluted Areas as identified by the CPCB from time to time located in proximity to the project site	No	
5. Whether any Critically Polluted Areas as identified by the CPCB from time to time located in proximity to the project site	N/A	
6. Whether any Notified Eco-Sensitive area notified under Environmental (Protection) Act, 1986 located in proximity to the project site	N/A	
7. Whether any Inter-State Boundaries and International Boundaries located in proximity to the project site	N/A	
8. Whether any Eco-sensitive Zone notified/proposed to be notified under Environment (Protection) Act, 1986 located within 10 km of the project site	No	
9. Whether any forest land present within 10 km of the project site	No	
10. Category of the Project as per EIA Notification, 2006	B2	
10.1. Whether proposal is required to be appraised at Central level?	No	
11. Whether Proposal has interlinked / interdependent projects or activities?	No	
11.1. Reason thereof	NA	

12. Whether any Forest Land involved in the project or part thereof	No
13. Whether NBWL recommendation is required?	No

14. Land Acquisition Details

Type of Land	In case of non-forest land, please specify	Type of privately owned land	Type of land in terms of ownership	Supporting documents			Status of Land Acquisition
				Document Name	Remarks	Document	

Project Details

14. Details of CTE

14.1. Whether consent under Air & Water Act has been obtained from SPCB / UTPCC?	No
14.1.1. Reason thereof	NA
15. Whether the project/activity located in Notified Industrial Area?	No
16. Whether the project/activity located in CRZ or ICRZ area?	No
17. Whether the project proposed to be located in Territorial waters (Off-shore)	No
18. Whether project/activity attracts the Specific Condition specified in the Schedule of EIA Notification?	No

Product Details

19. Details of Products & By-products

Name of Product	Product / By Product	Quantity / Capacity	Unit	Mode of Transport / Transmission	Remarks
Sand	Product	1.43	Cubic Meter per Day	Road	NA
Stone	Product	17.94	Cubic Meter per Day	Road	NA
Sand Gravel	Product	7.18	Cubic Meter per Day	Road	NA

20. Whether any other Environmental Sensitive area exists within 10 Km from the project/activity boundary?	No

Note : Others, interalia, includes areas protected under international conventions/ Area important or sensitive ecological reasons/ Sensitive species of flora or fauna/ Inland or coastal/Tourist places/ Defence installations / Densely populated areas/ Areas containing important, high quality, or scarce resources/ Areas susceptible to natural Hazards

21. Status of collection of baseline data	Not required as the proposal is under B2 category

Consultant Details

24. Whether QCI/NABET Accredited EIA Consultant engaged?	No
24.1. Reason for not engaging the Consultant	Proposal is under B2 category

Application for ToR (Category A, B1, and B2 Violation)/EC (Category B2) - Form 1

Project Details

1. Introduction of Project or Activity

1.1. Need for the project or activity and its importance to the country/region	Will generate employment and fulfill the demand of minerals in the region
1.2. Demand - Supply Gap and Domestic and export markets, if any	Domestic

2. Social Infrastructure

2.1. Readily available	NA
2.2. Proposed to be developed	NA

3. Connectivity to the project or activity

3.1. Nearest railway station and its distance (in Km)	Barpeta Road	11.5
3.2. Nearest Airport and its distance (in Km)	LGB, Guwahati	82.0
3.3. Nearest Town/City/District head quarter and its distance (in Km)	Baksa	39.5
4. Soil classification	P.P. Land	
5. Distance from the HFL of the river in m, if any	0	

6. Benefits of the project

6.1. Social benefits of project or activity	Generate employment
6.2. Financial benefits of project or activity	Economic upliftment

7. Project/ Activity Construction Status	To be Started
7.1. Likely date of start of construction activity (start of mining operations in case of mining proposals)	05/03/2024
7.2. Likely date of completion of construction activity (end of mining operations in case of mining proposals)	12/12/2025

Resource Utilization

8. Use of resources for construction or operation of the project

8.1. Whether requirement of water involved in the project?	No
8.2. Whether requirement of Minerals and/or fuels involved in the project?	No
8.3. Construction material	No
8.4. Timber	No

8.5. Electric Power:	No
8.6. Whether any other natural resources / other raw materials required?:	No
8.7. Whether any use of substances or materials, which are hazardous (as per MSIHC rules) to human health or the environment (flora, fauna, and water supplies) required?	No
8.8. Whether any resource efficiency / optimization / recycling and reuse envisaged in the project?	No

Physical Changes

9. Construction, operation or decommissioning of the Project involving actions, which will cause physical changes in the locality:

9.1. Whether any permanent or temporary change in land use, land cover or topography due to project activity?	No
9.2. Whether any clearance of existing vegetation due to project activity?	No
9.3. Whether any loss of native species or genetic diversity?	No
9.4. Whether any demolition works involved in project activity?	No
9.5. Whether any linear structures proposed for diversion or demolition due to project activity? (e.g. roads, transmission lines, rail line, pipeline, conveyor, etc.)	No
9.6. Whether any closure or diversion of existing transport routes or infrastructure due to project leading to changes in traffic movements?	No
9.7. Whether any closure or diversion of water bodies present in project area or realignment of water courses passing through project area?	No
9.8. Whether any dismantling or decommissioning or restoration works or reclamation works (Long-term/ short-term)?	No
9.9. Whether any construction works for temporary use for project activity?	No
9.10. Whether any cut and fill excavations proposed for the project activity?	No
9.11. Whether any underground works including tunnelling?	No
9.12. Whether any dredging involved in project?	No

9.13. Whether any offshore structures involved in project?	No
9.14. Whether any new road, rail, sea, airports, helipad, etc. during construction or operation?	No
9.15. Whether any construction of new linear structures? (e.g. transmission lines, pipelines, etc.)	No
9.16. Whether any Facilities for storage of goods or raw materials?	No
9.17. Whether any Facilities for long term/ permanent housing of operational workers/ staff?	No
9.18. Whether any Impoundment, damming, culverting, realignment or other changes to the hydrology of watercourses or aquifers?	No
9.19. Whether any Stream crossings, temporary and permanent?	No
9.20. Whether any Influx of people to an area in either temporarily or permanently?	No
9.21. Whether any other information would like to submit?	No

ollution Details

10. Release of pollutants to Air and Mitigation measures

10.1. Whether any probable air pollutants generated?	No
10.2. Other information, if any	NA

10.3. Generation of Noise & Vibration and mitigation measures

10.3.1. Whether any probable generation of Noise and vibration from the proposed project?	No
10.3.2. Whether any probable generation of Light and Heat?	No

10.4. Discharge of pollutants to water and mitigation measures

10.4.1. Whether any probable water pollutants generated?	No
10.5. Probable sources of water pollutant	No

Details of reuse / recycle of wastewater

Details	Qty / Capacity
10.6. Quantity of waste water generation per day (KLD)	0
10.7. Quantity of treated water proposed to use per day (KLD)	0
10.8. Quantity of treated water proposed to discharge outside the premises (KLD)	0

outside the premises (KLD)	
10.9. Purpose for which treated water is proposed to use	NA
10.10. Whether it is proposed to opt/avail common off-site Sewage Treatment Plant (CSTP)/Effluent Treatment Plant (CETP) facility?	No
10.11. Whether it is proposed to setup on-site Sewage Treatment Plant (STP)/Effluent Treatment Plant (ETP) facility?	No
10.12. Whether the adequacy of the Sewage Treatment Plant (STP) or Effluent Treatment Plant certified by an independent expert?	No
10.12.1. Reasons thereof	NA
10.13. Whether any other mitigation measures proposed?	No
10.14. Whether Dual Plumbing System proposed to be implemented?	No
10.14.1. Reasons thereof	NA
10.15. Whether any discharge of treated effluent involved?	No

Water Requirements

11. Ground water intersection and water conservation measures:

11.1. Whether ground water table intersection involved in the project activities?	No
11.2. Area category from Groundwater availability perspective?	Safe
11.3. Whether Rainwater harvesting proposed	No
11.4. Whether any other water conservation measures proposed?	No
11.5. Whether the ZLD is proposed?	No

2. Greenbelt

12.1. Area proposed for green belt (in Ha)	0
12.2. Width of green belt (in m) along the boundaryof the project or activity	0
12.3. Percentage of the total area covered under green belt	0
12.4. Details of the species proposed for plantation	Economic & medicinal value species
12.5. No. of tree saplings to be planted	232
12.6. Funds allocated for plantation in Lakhs.	116000

Waste Generation

13. Production of wastes during construction or operation or decommissioning

13.1. Whether any generation of Solid waste (domestic wastes)?	No
13.2. Whether any generation of plastic waste?	No
13.3. Whether any generation of e-waste?	No
13.4. Whether any generation of batteries waste?	No
13.5. Whether any generation of Bio-medical waste?	No
13.6. Whether any generation of hazardous wastes (as per Hazardous Waste Management Rules)?	No
13.7. Whether any generation of construction or demolition wastes?	No
13.8. Whether any generation of other wastes?	No
13.9. Whether any generation of surplus products?	No
13.10. Whether measures for waste minimization proposed?	No

Risk Assessment

14. Whether any risks associated with project activities which could affect human health or the environment, -

14.1. From explosions, spillages, fires etc. from storage, handling, use or production of hazardous substances?	No
14.2. From any other causes?	No
14.3. Could the project be affected by natural disasters causing environmental damage (e.g. floods, earthquakes, landslides, cloudburst etc)?	No
14.4. Changes in occurrence of disease or affect disease vectors (e.g. insect or water borne diseases)	No
14.5. Could project adversely affect the wellbeing of people in project area e.g. by changing living conditions?	No
14.6. Vulnerable groups of people who could be adversely affected by the project e.g. hospital patients, children, the elderly etc.	No
14.6.1. Has cumulative risk assessment been performed?	N/A
14.7. Whether any likely impacts of the proposed activity on the existing facilities adjacent to the proposed site due to generation of dust, smoke, odorous fumes or other hazardous gases?	No

15. Factors which should be considered (such as consequential development) which could lead to environmental effects or the potential for cumulative impacts with other existing or planned activities in the locality	
15.1. Whether lead to development of supportive facilities, ancillary development or development stimulated by the project which could have impact on the environment e.g.: Supportive infrastructure (roads, power supply, waste or waste water treatment, etc.); housing development; industries in supply chain and downstream; any other?	No
15.2. Whether lead to after-use of the site, which could have an impact on the environment? (e.g. mine void, dump sites, etc.)	No
15.3. Whether set a precedent for later developments?	No
15.4. Have cumulative effects due to proximity to other existing or planned projects with similar effects?	No
15.5. Whether lead to growth of alien species, if any?	No
15.6. Is there any threat of the project to the biodiversity (including displacement of fauna-both terrestrial and aquatic and avi-fauna or creation of barriers for their movement)?	No
15.7. Will the proposed project in any way result in the obstruction of a view, scenic amenity or landscapes?	No
15.8. Is there any impact on anthropological or archaeological sites or any important site feature in the vicinity of the proposed site have been considered?	No
15.9. Will the proposed project result in any changes to the demographic structure of local population?	No
15.10. Will the project cause adverse effect on local communities, disturbance to sacred sites or other cultural values?	No

16. Mining Proposals

16.1. Details of Letter of Intent (LoI) / Vesting order / Mining Lease

16.1.1. Date of issue of LoI/Vesting order/Minning Lease	12/12/2023
16.1.2. Validity of the LoI/Vesting order	12/12/2025
16.1.3. Lease Period	02/00
16.1.4. Date of expiry of lease	12/12/2025
16.1.5. Lease area (in Ha) as per LoI/Vesting order/Mining Lease	2.48
16.1.6. Production capacity (in MTPA) as per LoI / Vesting Order / Mining lease, if any prescribed	0.0179
16.1.7. Details of Lease renewal(s), if any	NA
16.1.8. Other information, if any	NA

16.1. Status of approval of Mining plan	Approved

17. Minerals to be mined

Name of Mineral	Classification	Production Capacity	Remarks
Sand	Minor	0.0009	NA
Sand Gravel	Minor	0.0048	NA
Stone	Minor	0.0121	NA

18. Details of Total excavation (RoM) including Topsoil, Overburden, Mining waste, Rejects, etc.

18.1. Total excavation in MTPA	0.0179
18.2. Total Excavation in M.Cu.m/Annum	0.0074
18.3. Enter stripping Ratio	00:00
18.4. Other information, if any	NA

9. Mineral Reserves

Name of Mineral	Proved Reserves	Indicated Reserves	Inferred Reserves	Mineable Reserves	Remarks
Sand, Stone & Sand Gravel	0.0491	0.0491	0.0491	0.0358	

20. Life of Mine (Years)

20.1. Life of the mine as per approved mining plan	02/00
20.2. Life of the mine as per total estimated reserves, if any	02/00
20.3. Other information, if any	NA

21. Type and method of Mining Method

21.1. Type of mining	Opencast
21.2. Method of mining	Manual
21.3. Other information, if any	NA

22. Type of blasting, if any, to be adopted

22.1. Type of blasting	NA
22.2. Mitigation measures for control of blast induced vibrations	NA
22.3. Other information, if any	NA

23. Whether it is proposed to install beneficiation plant/Coal washery within the mining lease area?	No

24. Whether it is proposed to install crusher within the mining lease area?	No

25. Dumping strategy

Description	Area in Ha	Maximum height in m	Remarks
External dump	0	0	NA
Internal dump	0	0	NA
Topsoil dump/ storage	0	0	NA

26. Topsoil management

26.1. Total Topsoil excavated during the entire life of the mine (in Million Cubic Meter)	0
26.2. Utilization strategy of topsoil	NA
26.3. Other information, if any	NA

27. Details of the Quarry/Mine Pit

27.1. Total Quarry Area (Ha)	2.48
27.2. Enter Area of final void (in Hectare)	0
27.3. Maximum Depth of final void (in meter)	0
27.4. Other information, if any	NA

28. Details of Transportation

28.1. Mode of transportation upto pit head	Manual
28.2. Mode of transportation from pit head to siding/loading	Manual
28.3. Mode of transport from loading point to consumers	Trucks/Dumpers
28.4. Other information, if any	NA

29. Details of reclamation/post mining land use

29.1. Plantation area (ha)	0
29.2. Water body in Ha	0
29.3. Public use in Ha	0
29.4. Enter Other uses in Ha	2.48

30. Details of DSR; Cluster and Replenishment study

30.1. Whether approved DSR available	No
30.2. Whether the instant proposal is part of cluster	No

30.1. Whether road/river /seasonal nallah /irrigation canal passes through project site

S.No.	Type of Road/Waterway	Any diversion is proposed	No Object Certificate obtained	Application for NOC has been submitted	NOC from the concerned department or authority	Proof of application for NOC	Reason thereof (No Object Certificate obtained - Not Applicable)	Reason thereof (NOC has not been submitted)

Enclosures

24. Layout Plan showing the components of the project and green belt proposed; general location and specific location of the project along with coordinates	Toposheet & Google Map.pdf
25. Upload copy of Replenishment Study Report & Baseline Survey data	Replenishment.pdf Preview
26. Letter of Intent / Mining Lease	LOI.pdf
27. Upload copy of District Survey Report	NOT APPLICABLE.pdf
28. Schematic representation of the feasibility drawings which give information for EIA purpose	Key Map.pdf

8. Additional Information

S. No.	Document Name	Remark	Document
1	Toposheet & Google Map	NA	Toposheet & Google Map.pdf
2	Mining Plan	NA	Mining Plan.pdf
3	Mining Plan Approval Letter	NA	Mining Plan Approval Letter.pdf
4	LOI	NA	LOI.pdf
5	Key Map	NA	Key Map.pdf
6	DFO Letter	NA	DFO Letter.pdf
7	Cover Letter	NA	Cover letter.pdf

Undertaking

19. ☑ I hereby give undertaking that the data and information given in the application and enclosures are true to be best of my knowledge and belief and I am aware that if any part of the data and information is found to be false or misleading at any stage, the project will be rejected and clearance given if any to the project will be revoked at our risk and cost. In addition to the above, I hearby give undertaking that no activity/construction/expansion has been taken up

19.1. Name	ABDUL MANNAN
19.2. Designation	Proprietor
19.3. Company	ABDUL MANNAN
19.4. Address	Sukrungbari Gaon, P.O. Gobardhana, Dist. Baksa
19.5. Date	05/03/2024

सत्यमेव जयते

Government of India
Ministry of Environment, Forest and Climate Change
(Issued by the State Environment Impact Assessment Authority (SEIAA), ASSAM)
***

Minutes of 17th SEIAA Meeting State Environment Impact Assessment Authority meeting held from 01/07/2024 to 01/07/2024

Date: 16/07/2024

MoM ID: EC/MOM/SEIAA/612251/6/2024

Agenda ID: EC/AGENDA/SEIAA/612251/6/2024

Meeting Venue: Conference Hall 3rd Floor, Pollution Control Board, Assam

Meeting Mode: Physical

Date & Time:

01/07/2024	11:00 AM	05:00 PM

1. Opening remarks

The Member Secretary, SEIAA welcomed the Chairman, SEIAA and the Member of regulatory body. She briefed the house about the agenda for the meeting for deliberation and to expedite disposal of the recommended proposals by SEAC, Assam.

2. Confirmation of the minutes of previous meeting

As per the agenda, the regulatory body duly reviewed the Minutes of the Meetings held on 30/05/2024 & 21/06/2024.

3. Details of proposals considered by the committee

Day 1 -01/07/2024

3.1. Agenda Item No 1:

3.1.1. Details of the proposal

Khagrabari P.P. Land Sand and Stone Mining Permit Area by **ABDUL MANNAN** located at **BAKSA,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/465066/2024	SEAC/SEIAA 3768/2024	15/05/2024	Mining of minerals (1(a))

3.1.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :30/05/2024

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. Land Documents pertaining to Dag No 90,95,87,84 and Patta No-73,304,152 together with the JVR dated 18.11.2023 are placed before the Committee. Non-agricultural land certificate issued to this effect is also place as furnished. The KML file of the proposed mining area is scrutinized.

The Committee also is of the opinion to urge for taking requisite steps to conduct preparation of the District Survey Report (DSR) for the District by the DFO in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC.

The Committee considered it appropriate to recommend the grant of EC by the SEIAA allowing extraction and harvesting of minor mineral in **2 (two)** years time with the quantity of**800** Cu M of **Sand; 10,000** CuM of **Stone; 4,000** Cu M of **Sand- Gravel @ 400** Cu M of **Sand; 5000** Cu M of **Stone** and **2, 000** Cu M of **Sand- Gravel,** annually.

3.1.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 2.48Ha with quantity of 800 Cu M of Sand; 10,000 CuM of Stone; 4,000 Cu M of Sand- Gravel @ 400 Cu M of Sand; 5000 Cu M of Stone and 2, 000 Cu M of Sand- Gravel, annually subject to the terms and conditions laid down by SEAC.

3.1.4. Recommendation of SEIAA

Approved

3.1.5. Details of Environment Conditions

3.1.5.1. Specific

SPECIFIC CONDITIONS BY SEAC	
1.	2 The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. 3 The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan. 4 Plantation activities shall be carried out/undertaken in any Educational institution or Govt lands involving local NGOs, School / College students and an amount of Rs 2.00 (two) Lakh shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.
GENERAL CONDITIONS BY SEAC	
1.	1. This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan;

	2. This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials; (c) the Proponent shall extract / harvest the approved quantity of minerals indicated herein with maximum mining depth of up to 2 (two) meters only from the non-mined surface.
Specific condition by SEIAA	
1.	CSR activities shall be carried out / undertaken by the Proponent and 2% of the total project cost Rs 2.00 (two)Lakh shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the nearby village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within the 1st year of allowing mining in the area and shall upload the reports in the PARIVESH portal which shall form part of the Half Yearly Compliance Report.

3.1.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee.
1.	Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA Notification, 2006 and its amendments therein
Air quality monitoring and mitigation measure	
1.	Adequate ambient air quality monitoring stations shall be established in the core zone as well as in the buffer zone for monitoring of pollutants, namely particulates, SO2 and NOx. Location of the stations shall be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive receptors in consultation with the State Pollution Control Board. Online ambient air quality monitoring station/stations may also be installed in addition to the regular air monitoring stations as per the requirement and/or in consultation with the SPCB

1.	Major approach roads shall be properly maintained with dust suppression measures and the river bank in any case must not be damaged.
1.	The transportation of materials shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the materialsl through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.
1.	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
Water quality monitoring and mitigation measures	
1.	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
Corporate Environment Responsibility	
1.	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders.
1.	Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Land Recalmation	
1.	Native tree species shall be selected and planted over areas affected by subsidence.
Mining Plan	
1.	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.
1.	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.
1.	No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
Miscellaneous	
1.	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in

	addition this shall also be displayed in the project proponent's website permanently.
1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
1.	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours
Noise and Vibration monitoring and prevention	
1.	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.
Public hearing and Human health issues	
1.	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
1.	Project Proponent must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)

1.	Project Proponent is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
1.	Project Proponent to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius

3.2. Agenda Item No 2:

3.2.1. Details of the proposal

DOLAMARA PATTA LAND ORDINARY EARTH MINING PERMIT AREA by **DHANIRAM RONGPHAR** lo cated at **KARBI ANGLONG,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/460858/2024	SEIAA.3668/2024	03/02/2024	Mining of minerals (1(a))

3.2.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :30/05/2024

Deliberations of SEAC 1 :

Necessary land documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The Joint Verification Report (JVR) with the Revenue and Forest Department is also placed for scrutiny. The report is placed for deliberation and due discussion. After due discussions and deliberations the Committee is of the opinion to allow excavation of Ordinary Earth measuring **2000** Cu M in 1**(one)** year**,** only.

Date of SEAC 2 :23/02/2024

Deliberations of SEAC 2 :

As decided in the meeting, a field enquiry by a sub committee is proposed

3.2.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 2.48Ha with quantity of 2000cu.m of Ordinary Earth in 2 (two) years (as approved mining plan) subject to the terms and conditions laid down by SEAC.

3.2.4. Recommendation of SEIAA

Approved

3.2.5. Details of Environment Conditions

3.2.5.1. Specific

Specific Conditions by SEAC

1.	1. This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions la 2. This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling wit depth exceeds 2.0 m depth, it is necessary to protect the sides of the excavation by driving sheet piles or s have to be erected to prevent dust pollution, air pollution. 3. The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularit 4. The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent conc
Specific condition by SEIAA	
1.	• CSR activities shall be carried out / undertaken by the Proponent and 2% of the total pr • The DFO shall identify the activities adequately, prepare a budget for the purposes and • Plantation activities shall be carried out / undertaken in any Educational institution or G

3.2.5.2. Standard

1(a)	**Mining of minerals**
Air quality monitoring and mitigation measure	
1.	Major approach roads shall be properly maintained with dust suppression measures and the river bank in any case must not be damaged.
1.	The transportation of materials shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the materialsl through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.
1.	Adequate ambient air quality monitoring stations shall be established in the core zone as well as in the buffer zone for monitoring of pollutants, namely particulates, SO2 and NOx. Location of the stations shall be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive receptors in consultation with the State Pollution Control Board. Online ambient air quality monitoring station/stations may also be installed in addition to the regular air monitoring stations as per the requirement and/or in consultation with the SPCB
1.	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
Corporate Environment Responsibility	
1.	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders.

1.	Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Land Recalmation	
1.	Native tree species shall be selected and planted over areas affected by subsidence.
Mining Plan	
1.	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.
1.	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.
1.	No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
Miscellaneous	
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
1.	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent’s website permanently.
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours
1.	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.

1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
Noise and Vibration monitoring and prevention	
1.	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.
Public hearing and Human health issues	
1.	PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
1.	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
1.	PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius
1.	PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
Statutory compliance	
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
1.	Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA Notification, 2006 and its amendments therein
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee.
Water quality monitoring and mitigation measures	
1.	The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.
1.	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.

1.	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.

3.3. Agenda Item No 3:

3.3.1. Details of the proposal

DALIMBARI VILLAGE PP LAND STONE MINING PERMIT AREA by **BIDYA TERON** located at **WEST KA RBI ANGLONG,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/466341/2024	SEAC/SEIAA 3771/2024	17/05/2024	Mining of minerals (1(a))

3.3.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :30/05/2024

Deliberations of SEAC 1 :

Necessary land documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The Joint Verification Report (JVR) with the Revenue and Forest Department is also placed for scrutiny. After due discussions and deliberations the Committee is of the opinion to allow extraction of the minor mineral with the approved quantity of **10,000** Cu M of Stone in **2 (two)**.

Decision:

Recommended for grant of EC for 2 (two) years

3.3.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 1.65Ha with quantity of 10,000cu.m of Stone in 2 (two) years @ 5,000cu.m of stone, annually subject to the terms and conditions laid down by SEAC.

3.3.4. Recommendation of SEIAA

Approved

3.3.5. Details of Environment Conditions

3.3.5.1. Specific

GENERAL CONDITION BY SEAC	
1.	1. This is subject to the conditions that the proponent shall have to strictly follow all terms and

	conditions laid down in the approved mining plan; 2. This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates ; (b) the Proponent shall extract the approved quantity of minerals indicated herein with maximum mining depth of up to 2 (two) meters only from the non-mined surface and (c) use of explosives for the purpose of extraction shall be done strictly with due permission of the competent authority only under proper supervision and follow up protocols.
SPECOFIC CONDITIONS BY SEAC	
1.	The Divisional Forest Officer, Hamren Division shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan. CSR activities shall be carried out / undertaken by the Proponent and 2% of the total project cost Rs 3.00 Lakh shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the near by village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st year of allowing mining in the area and the proponent shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report. Plantation activities shall be carried out / undertaken in any of the Educational Institutions or nearby existing vacant Govt lands involving local NGOs, School / College students and an amount of Rs 3.00Lakh shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Nahor (*Mesua ferrea*), Amlokhi (*Phyllanthus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*), Bael (*Aegle marmelos*), Mohaneem(*Azedirachta indica*), Jamun (*Syzygium cuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*) etc etc. Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.3.5.2. Standard

1(a)	**Mining of minerals**
Air quality monitoring and mitigation measure	
1.	Adequate ambient air quality monitoring stations shall be established in the core zone as well as in the buffer zone for monitoring of pollutants, namely particulates, SO2 and NOx. Location of the stations shall be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive receptors in consultation with the State Pollution Control Board. Online ambient air quality monitoring station/stations may also be installed in addition to the regular air monitoring stations as per the requirement and/or in consultation with the SPCB
1.	Major approach roads shall be properly maintained with dust suppression measures and the river bank in any case must not be damaged.

3.4. Agenda Item No 4:

3.4.1. Details of the proposal

Nunoi Sand Stone Mahal No.3 (Kulsi River) by **HORU BAGLARI** located at **UDALGURI,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/453916/2023	SEAC/SEIAA 3769/2024	17/05/2024	Mining of minerals (1(a))

3.4.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :30/05/2024

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. On careful perusal it appears that the proposed mining area is covering a stretch of 1.5 km. A gap of 50 m needs to be kept as non-mining zone after a stretch of 1 km of length covering the proposed mining area and the same is to be treated as a buffer zone which shall be identified by the DFO in presence of the project Proponent.

The Committee also is of the opinion to urge for taking requisite steps to conduct preparation of the District Survey Report (DSR) for the District by the DFO in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC.

The Committee considered it appropriate to recommend the grant of EC by the SEIAA allowing extraction and harvesting of minor mineral in 5(five) years time with the quantity of **60,000** Cu M of **Sand** and **9,800** Cu.M **Stone** @ **12,000** Cu M of Sand and @ **1,960** CuM of Stone, annually.

Decision: Recommended for grant of EC for 5 (five) years.

3.4.3. Deliberations by the SEIAA in current meetings

Need to upload NOC from Executive Engineer, Water Resource Department, Udalguri.

3.4.4. Recommendation of SEIAA

Deferred for ADS

3.5. Agenda Item No 5:

3.5.1. Details of the proposal

Beltola Sand and Gravel Mahal (Kulsi River) by **JYOTISH BASUMATARY** located at **UDALGURI,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/453966/2023	SEAC/SEIAA 3770/2024	17/05/2024	Mining of minerals (1(a))

3.5.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :30/05/2024

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. It reveals sufficient quantity of minor mineral available in the proposed area.

The Committee also is of the opinion to urge for taking requisite steps to conduct preparation of the District Survey Report (DSR) for the District by the DFO in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC.

The Committee considered it appropriate to recommend the grant of the EC by the SEIAA allowing extraction and harvesting of minor mineral in 4 (four) years time with the quantity of **42,860** Cu M of Sand and **11,430** Cu M of Stone @ 10,715 Cu M of Sand and @**2,855** Cu M Stone, annually.

Decision: Recommended for grant of EC for 4 (four) years

3.5.3. Deliberations by the SEIAA in current meetings

Need to upload NOC from Executive Engineer, Water Resource Department, Udalguri.

3.5.4. Recommendation of SEIAA

Deferred for ADS

3.6. Agenda Item No 6:

3.6.1. Details of the proposal

Dehangi Diyung River (Dehangi Tiniali) Sand, Gravel & Boulder Mining Permit Area by **dima hasao forest division(west)** located at **DIMA HASAO,ASSAM**

Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/474096/2024	SEAC/SEIAA. 3767/2024	21/05/2024	Mining of minerals (1(a))

3.6.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :30/05/2024

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. It reveals sufficient quantity of minor mineral available in the proposed area.

The RQP Dr Abhijit Bora representing the proponent DFO made necessary clarification for the mining area in question and replied to the queries raised by the Hon'ble Members during the course of deliberation.

The Committee also is of the opinion to urge for taking requisite steps to conduct preparation of the District Survey Report (DSR) for the District by the DFO in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC.

The Committee considered it appropriate to recommend the grant of the EC by the SEIAA allowing extraction and harvesting of minor mineral in 2 (two) years time with the quantity of **21,963** Cu M of **Sand; 23,744** CuM of Gravel and **13,653** CuM of Boulder @ **10,980** Cu M of Sand, @ **11,870** CuM Gravel and @ **6,825** CuM Boulder, annually.

Decision: Recommended for grant of EC for 2 (two) year

3.6.3. Deliberations by the SEIAA in current meetings

Need to show the haul road to the proposed Mining site.

3.6.4. Recommendation of SEIAA

Deferred for ADS

3.7. Agenda Item No 7:

3.7.1. Details of the proposal

Mahur River (Amlangbra Village) Sand, Gravel & Boulder Mining Permit Area by **dima hasao forest division(west)** located at **DIMA HASAO,ASSAM**

Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/474169/2024	SEAC/SEIAA.3761/2024	21/05/2024	Mining of minerals (1(a))

3.7.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :30/05/2024

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. The video footage through Drone technology is also placed with clarifications by the RQP who was requested to be present with the project Proponent DFO.

Due deliberations and discussions are held.

The Committee is of further opinion to urge the DFO for taking requisite steps to conduct preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016.

The Committee considered it appropriate to recommend the grant of the EC by the SEIAA allowing extraction and harvesting of minor mineral in 2(two) years with the quantity of **10,903** Cu M of **Sand** @ 5,450 Cu M per year; **8,424** CuM **Gravel @** 4212 Cu.M per year and **5,450** CuM **Boulder** @ **2,725** CuM, annually.

***Decision*:** Recommended for grant of EC for 2 (two) years.

3.7.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 1.34Ha with quantity of 10,903CuM of Sand; 5,450CuM per year and 8,424CuM Gravel for 2 (two) years @ 4212Cu.M per year, 5,450CuM Boulder and 2,725CuM, annually subject to the terms and conditions laid down by SEAC.

3.7.4. Recommendation of SEIAA

Approved

3.7.5. Details of Environment Conditions

3.7.5.1. Specific

SPECIFIC CONDITIONS BY SEAC	
1.	1 Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO. 2 The DFO shall comply with necessary formalities for transfer of the EC to the lessee with due NOC for filing application to the SEIAA before allowing mining so that the entire accountability in mining is vested on the lessee / Proponent with the same terms and conditions stipulated in the EC as per the EIA Notification, 2006. 3 The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. 4 The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan.

	5 CSR activities shall be carried out / undertaken by the Proponent and 2% of the total project cost Rs 2.00 (two)Lakh shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the near by village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st year of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report. 6. Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands involving local NGOs, School / College students and an amount of Rs 2.00 (two)Lakh shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. 7. The recommended species of plants in the locality could be of species like Agor (*Aquillaria malaccensis*), Amlokhi (*Phyllantus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*), Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*),Jamun (*Syzygium cuminii*), Arjun (*Terminalia arjuna*), Ow Tenga (*Dillenia indica*), Rupahi thekera (*Garcinia lanceaefolia*) including other local plant species to be recommended by the DFOetc etc. Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH 2.0 portal.
GENERAL CONDITIONS BY SEAC	
1.	**1.** This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan; **2.** This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates ; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials and (c) the Proponent shall extract / harvest the approved quantity of minerals indicated herein with maximum mining depth of up to 2 (two) meters only from the non-mined surface. **3.** The DFO shall take steps for transfer of the EC in the name of the Proponent before allowing mining activity as per procedure by filing application to the SEIAA.

3.7.5.2. Standard

1(a)	**Mining of minerals**
Air quality monitoring and mitigation measure	
1.	Adequate ambient air quality monitoring stations shall be established in the core zone as well as in the buffer zone for monitoring of pollutants, namely particulates, SO2 and NOx. Location of the stations shall be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive receptors in consultation with the State Pollution Control Board. Online ambient air quality monitoring station/stations may also be installed in addition to the regular air monitoring stations as per the requirement and/or in consultation with the SPCB
1.	Major approach roads shall be properly maintained with dust suppression measures and the river bank in any case must not be damaged.
1.	The transportation of materials shall be carried out as per the provisions and route

	proposed in the approved mining plan. Transportation of the materialsl through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.
1.	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
Corporate Environment Responsibility	
1.	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders.
1.	Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Land Recalmation	
1.	Native tree species shall be selected and planted over areas affected by subsidence.
Mining Plan	
1.	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.
1.	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.
1.	No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
Miscellaneous	
1.	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent’s website permanently.
1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.

1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
1.	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours
Noise and Vibration monitoring and prevention	
1.	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.
Public hearing and Human health issues	
1.	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
1.	PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
1.	PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
1.	PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius
Statutory compliance	
1.	The Environmental clearance shall be subject to orders of Hon’ble Supreme Court of India, Hon’ble High Courts,

	NGT and any other Court of Law, from time to time, and as applicable to the project
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee.
1.	Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA Notification, 2006 and its amendments therein
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
Water quality monitoring and mitigation measures	
1.	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
1.	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.
1.	The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.

3.8. Agenda Item No 8:

3.8.1. Details of the proposal

Mahur River (Thaisiling Hawer Village) Sand, Gravel & Boulder Mining Permit Area by **dima hasao forest division(west)** located at **DIMA HASAO,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/474152/2024	SEAC/SEIAA.3766/2024	21/05/2024	Mining of minerals (1(a))

3.8.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :30/05/2024

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. It reveals sufficient quantity of minor mineral available in the proposed area.

The RQP Dr Abhijit Bora representing the proponent DFO made necessary clarification for the mining area in question and replied to the queries raised by the Hon'ble Members during the course of deliberation.

The Committee also is of the opinion to urge for taking requisite steps to conduct preparation of the District Survey Report (DSR) for the District by the DFO in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC.

The Committee considered it appropriate to recommend the grant of EC by the SEIAA allowing extraction and harvesting of minor mineral in 2 (two) years time with the quantity of **35,495** Cu M Sand, **31,270** CuM Gravel and **17,747** CuM Boulder; @**17,745** Cu M of Sand, @**15,635** CuM of Gravel and @**8,870** CuM of Boulder, annually.

Decision: Recommended for grant of EC for 2 (two) years.

3.8.3. Deliberations by the SEIAA in current meetings

As there is a bridge across the proposed mining permit area. Necessary modification of the Mining Permit area is advised.

3.8.4. Recommendation of SEIAA

Refer-Back to SEAC for Reconsideration

3.9. Agenda Item No 9:

3.9.1. Details of the proposal

Kapili River Borowashiling Sand Mining Permit Area by **dima hasao forest division(west)** located at **DIMA HAS AO,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/474140/2024	SEAC/SEIAA 3765/2024	21/05/2024	Mining of minerals (1(a))

3.9.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :30/05/2024

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. It reveals sufficient quantity of minor mineral available in the proposed area. The RQP Dr Abhijit Bora representing the proponent DFO made necessary clarification for the mining area in question and replied to the queries raised by the Hon'ble Members during the course of deliberation.

The Committee is of the opinion to urge for taking requisite steps to conduct preparation of the District Survey Report (DSR) for the District by the DFO in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC.

The Committee considered it appropriate to recommend the grant of EC by the SEIAA allowing extraction and harvesting of minor mineral in 2 (two) years time with the quantity of 76,932 Cu M of Sand, @ 38,466 CuM, annually.

Decision:

Recommended for grant of EC for 2 (two) years

3.9.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 4.38Ha with quantity of 76,932Cu M of Sand for 2 (two) years @ 38,466CuM, annually subject to the terms and conditions laid down by SEAC.

3.9.4. Recommendation of SEIAA

Approved

3.9.5. Details of Environment Conditions

3.9.5.1. Specific

	SPECIFIC CONDITIONS BY SEAC
1.	1 Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO. 2 The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. 3 The DFO shall comply with necessary formalities for transfer of the EC to the lessee with due NOC for filing application to the SEIAA before allowing mining so that the entire accountability in mining is vested on the lessee / Proponent with the same terms and conditions stipulated in the EC as per the EIA Notification, 2006. 4 The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan. 5 CSR activities shall be carried out / undertaken by the Proponent and 2% of the total project cost Rs 3.00 (three) Lakh shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the near by village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st year of allowing mining in the

	area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report. 6 Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands involving local NGOs, School / College students and an amount of Rs 3.00 (three)Lakh shall be earmarked for the purposes. 1.	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.

3.10. Agenda Item No 10:

3.10.1. Details of the proposal

Kapili River Phonglangso Nepali Basti Sand Mining Permit Area by **dima hasao forest division(west)** located at **D IMA HASAO,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/474184/2024	SEAC/SEIAA.3764/2024	21/05/2024	Mining of minerals (1(a))

3.10.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :30/05/2024

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. It reveals sufficient quantity of minor mineral available in the proposed area. The RQP Dr Abhijit Bora representing the proponent DFO made necessary clarification for the mining area in question and replied to the queries raised by the Hon'ble Members during the course of deliberation. The video footage captured through use of Drone technology for some of the proposed mining areas is also placed with clarifications as sought for by the RQP who was requested to be present with the project Proponent DFO.

Due deliberations and discussions are held.

The Committee is of the opinion to urge for taking requisite steps to conduct preparation of the District Survey Report (DSR) for the District by the DFO in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC.

The Committee considered it appropriate to recommend the grant of EC by the SEIAA allowing extraction and harvesting of minor mineral in 2 (two) years time with the quantity of 82,110 Cu M of Sand, @ 41,055 CuM, annually.

Decision: Recommended for grant of EC for 2 (two) years

3.10.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 4.54Ha with quantity of 82,110Cu M of Sand for 2 (two) years @ 41,055CuM, annually subject to the terms and conditions laid down by SEAC.

3.10.4. Recommendation of SEIAA

Approved

3.10.5. Details of Environment Conditions

3.10.5.1. Specific

GENERAL CONDITIONS BY SEAC	
1.	**1.** This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan; **2.** This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials and (c) the Proponent shall extract / harvest the approved quantity of minerals indicated herein with maximum mining depth of up to 2 (two) meters only from the non-mined surface.
SPECIFIC CONDITIONS BY SEAC	

1.	1 Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO. 2 The DFO shall comply with necessary formalities for transfer of the EC to the lessee with due NOC for filing application to the SEIAA before allowing mining so that the entire accountability in mining is vested on the lessee / Proponent with the same terms and conditions stipulated in the EC as per the EIA Notification, 2006. 3 The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. 4 The DFO shall comply with necessary formalities for transfer of the EC to the lessee with due NOC for filing application to the SEIAA before allowing mining so that the entire accountability in mining is vested on the lessee / Proponent with the same terms and conditions stipulated in the EC as per the EIA Notification, 2006. 5 The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan. 6 CSR activities shall be carried out / undertaken by the Proponent and 2% of the total project cost Rs 3.00 (three) Lakh shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the near by village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st year of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report. 7 Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands involving local NGOs, School / College students and an amount of Rs 3.00 (three)Lakh shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. 8 The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Agor (*Aquillaria malaccensis*), Amlokhi (*Phyllantus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*), Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*), Mohaneem (*Azedirachta indica*), Jamun (*Syzygium cuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*), Jack fruit (*Artocarpus integrifolia*)etc etc. Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.10.5.2. Standard

1(a)	**Mining of minerals**
Air quality monitoring and mitigation measure	
1.	Adequate ambient air quality monitoring stations shall be established in the core zone as well as in the buffer zone for monitoring of pollutants, namely particulates, SO2 and NOx. Location of the stations shall be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive receptors in consultation with the State Pollution Control Board. Online ambient air quality monitoring station/stations may also be installed in addition to the regular air monitoring stations as per the requirement and/or in consultation with the SPCB
1.	Major approach roads shall be properly maintained with dust suppression measures

	and the river bank in any case must not be damaged.
1.	The transportation of materials shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the materials through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be constructed so that the impact of sound, dust and accidents could be appropriately mitigated.
1.	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
Corporate Environment Responsibility	
1.	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders.
1.	Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Land Recalmation	
1.	Native tree species shall be selected and planted over areas affected by subsidence.
Mining Plan	
1.	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.
1.	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.
1.	No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
Miscellaneous	
1.	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent’s website permanently.
1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.

1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
1.	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours
Noise and Vibration monitoring and prevention	
1.	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.
Public hearing and Human health issues	
1.	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
1.	PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
1.	PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
1.	PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius
Statutory compliance	

1.	The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee.
1.	Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA Notification, 2006 and its amendments therein
Water quality monitoring and mitigation measures	
1.	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
1.	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.
1.	The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.

3.11. Agenda Item No 11:

3.11.1. Details of the proposal

Kapili River Langrimukh Sand Mining Permit Area by **dima hasao forest division(west)** located at **DIMA HASAO,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/474255/2024	SEAC/SEIAA.3763/2024	21/05/2024	Mining of minerals (1(a))

3.11.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :30/05/2024

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal are placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. It reveals sufficient quantity of minor mineral available in the proposed area. The RQP Dr Abhijit Bora representing the proponent DFO made necessary clarification for the mining area in question and replied to the queries raised by the Hon'ble Members during the course of deliberation.

The Committee is of the opinion to urge for taking requisite steps to conduct preparation of the District Survey Report (DSR) for the District by the DFO in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC.

The Committee considered it appropriate to recommend the grant of EC by the SEIAA allowing extraction and harvesting of minor mineral in 2 (two) years time with the quantity of 81,740 Cu M of Sand, @ 40,870 CuM sand, annually.

Decision: Recommended for grant of EC for 2 (two) years

3.11.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 4.55Ha with quantity of 81,740Cu M of Sand for 2 (two) years @ 40,870CuM, annually subject to the terms and conditions laid down by SEAC.

3.11.4. Recommendation of SEIAA

Approved

3.11.5. Details of Environment Conditions

3.11.5.1. Specific

GENERAL CONDITIONS BY SEAC	
1.	**1.** This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan; **2.** This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials and (c) the Proponent shall extract / harvest the approved quantity of minerals indicated herein with maximum mining depth of up to 2 (two) meters only from the non-mined surface.
SPECIFIC CONDITIONS BY SEAC	
1.	1 Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO. 2 The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. 3 The DFO shall comply with necessary formalities for transfer of the EC to the lessee with due

	NOC for filing application to the SEIAA before allowing mining so that the entire accountability in mining is vested on the lessee / Proponent with the same terms and conditions stipulated in the EC as per the EIA Notification, 2006. 4 The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan. 5 CSR activities shall be carried out / undertaken by the Proponent and 2% of the total project cost Rs 3.00 (three) Lakh shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the near by village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st year of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report. 6 Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands involving local NGOs, School / College students and an amount of Rs 3.00 (three)Lakh shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. 7€The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Agor(*Aquillaria malaccensis*), Amlokhi (*Phyllantus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*), Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*), Mohaneem (*Azedirachta indica*), Jamun (*Syzygium cuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpus integrifolia*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*) etc etc. Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.11.5.2. Standard

1(a)	**Mining of minerals**
Air quality monitoring and mitigation measure	
1.	Adequate ambient air quality monitoring stations shall be established in the core zone as well as in the buffer zone for monitoring of pollutants, namely particulates, SO2 and NOx. Location of the stations shall be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive receptors in consultation with the State Pollution Control Board. Online ambient air quality monitoring station/stations may also be installed in addition to the regular air monitoring stations as per the requirement and/or in consultation with the SPCB
1.	Major approach roads shall be properly maintained with dust suppression measures and the river bank in any case must not be damaged.
1.	The transportation of materials shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the materials through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be constructed so that the impact of sound, dust

	and accidents could be appropriately mitigated.
1.	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
Corporate Environment Responsibility	
1.	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders.
1.	Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Land Recalmation	
1.	Native tree species shall be selected and planted over areas affected by subsidence.
Mining Plan	
1.	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.
1.	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.
1.	No change in mining method i.e. open cast to under ground, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
Miscellaneous	
1.	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently.
1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
1.	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining

	operations.
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours
Noise and Vibration monitoring and prevention	
1.	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.
Public hearing and Human health issues	
1.	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
1.	PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
1.	PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
1.	PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius
Statutory compliance	
1.	The Environmental clearance shall be subject to orders of Hon’ble Supreme Court of India, Hon’ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.

1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee.
1.	Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA Notification, 2006 and its amendments therein
Water quality monitoring and mitigation measures	
1.	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
1.	The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.
1.	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.

3.12. Agenda Item No 12:

3.12.1. Details of the proposal

Kapili River Borlangpher Sand Mining Permit Area by **dima hasao forest division(west)** located at **DIMA HASAO,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/474303/2024	SEAC/SEIAA 3762/24	21/05/2024	Mining of minerals (1(a))

3.12.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :30/05/2024

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. It reveals sufficient quantity of minor mineral available in the proposed area.

The video footage take through use of Drone technology for some of the proposed mining areas is also placed with clarifications as sought for by the RQP who was requested to be present with the project Proponent DFO.

Due deliberations and discussions are held.

The Committee is of the opinion to urge the DFO for taking requisite steps to conduct preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016.

***Decision* :**

The Committee considered it appropriate to recommend the grant of the EC by the SEIAA allowing extraction and harvesting of minor mineral in **2 (two)** years with the quantity of **82,294** Cu M of **Sand**@ **41,145** Cu M per year.

3.12.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 4.55Ha with quantity of 82,294Cu M of Sand for 2 (two) years @ 41,145CuM, annually subject to the terms and conditions laid down by SEAC.

3.12.4. Recommendation of SEIAA

Approved

3.12.5. Details of Environment Conditions

3.12.5.1. Specific

SPECIFIC CONDITIONS BY SEAC	
1.	1 Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO. 2 The DFO shall comply with necessary formalities for transfer of the EC to the lessee with due NOC for filing application to the SEIAA before allowing mining so that the entire accountability in mining is vested on the lessee / Proponent with the same terms and conditions stipulated in the EC as per the EIA Notification, 2006. 3 The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period. 4 The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan. 5 CSR activities shall be carried out / undertaken by the Proponent and 2% of the total project cost Rs 4.00 (four)Lakh shall be earmarked for the purposes. Necessary drinking water facilities,

	toilets and provision for solar lights shall be made in the near by village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st year of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report. 6 Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands involving local NGOs, School / College students and an amount of Rs 4.00 (four)Lakh shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students. 7 The recommended species of plants in the locality could be of species like Agor (*Aquillaria malaccensis*), Amlokhi (*Phyllantus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*), Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*),Jamun(*Syzygium cuminii*), Arjun (*Terminalia arjuna*), Ow Tenga (*Dillenia indica*), Jack fruit (Artocarpus integrifolia), Rupahi thekera (*Garcinia lanceaefolia*) including other local plant species to be recommended by the DFO etc etc. Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH 2.0 portal.
GENERAL CONDITIONS BY SEAC	
1.	**1.** This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan; **2.** This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials and (c) the Proponent shall extract / harvest the approved quantity of minerals indicated herein with maximum mining depth of up to 2 (two) meters only from the non-mined surface.

3.12.5.2. Standard

1(a)	**Mining of minerals**
Air quality monitoring and mitigation measure	
1.	Adequate ambient air quality monitoring stations shall be established in the core zone as well as in the buffer zone for monitoring of pollutants, namely particulates, SO2 and NOx. Noise and Vibration monitoring and prevention	
1.	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.
Public hearing and Human health issues	
1.	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
1.	PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
1.	PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
1.	PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius
Statutory compliance	
1.	The Environmental clearance shall be subject to orders of Hon’ble Supreme Court of India, Hon’ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.

1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee.
1.	Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA Notification, 2006 and its amendments therein
Water quality monitoring and mitigation measures	
1.	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
1.	The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.
1.	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.

3.13. Agenda Item No 13:

3.13.1. Details of the proposal

3 NO MADHGHARIA VILLAGE PATTA LAND EARTH MINING PERMIT AREA by **debo borkotoky** located at **KAMRUP METRO,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/472929/2024	SEAC/SEIAA.3774/2024	15/05/2024	Mining of minerals (1(a))

3.13.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :30/05/2024

Deliberations of SEAC 1 :

Necessary land documents (Dag 231, Patta 73) submitted in support of the proposal is placed before the Committee for examination and appraisal. The Joint Verification Report dated 20.11.2023 with the Revenue and Forest Department is also placed for scrutiny.

After due discussions and deliberations, the Committee is of the opinion to allow extraction of the minor mineral with the approved quantity of **5,855** Cu M in 1 (one) year.

3.13.3. Deliberations by the SEIAA in current meetings

The SEIAA committee suggested for a site visit.

3.13.4. Recommendation of SEIAA

Deferred for Site Inspection

3.14. Agenda Item No 14:

3.14.1. Details of the proposal

Mandakata FC Grant P.P. Land Earth Mining Permit Area by **RUNUMI MOMIN** located at **KAMRUP,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/467631/2024	SEAC/SEIAA.3775/2024	29/03/2024	Mining of minerals (1(a))

3.14.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :30/05/2024

Deliberations of SEAC 1 :

Necessary land documents (Dag No-21,22,24 and Patta-01) submitted in support of the proposal is placed before the Committee for examination and appraisal. The Joint Verification Report (JVR) dated 05.09.2023 with the Revenue and Forest Department is also placed for scrutiny.

After due discussions and deliberations the Committee is of the opinion to allow extraction of the ordinary earth with the approved quantity of **42,940** Cu M in **2 (two) years @ 21,470** Cu M per year.

Decision: Recommended grant of the EC for 2(two) year.

3.14.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 1.49Ha with quantity of 42,940cum in 2 (two) years @ 21,470cum per year subject to the terms and conditions laid down by SEAC.

3.14.4. Recommendation of SEIAA

Approved

3.14.5. Details of Environment Conditions

3.14.5.1. Specific

Specific Conditions by SEAC	
1.	1. This is subject to the conditions that the proponent shall have to strictly follow all terms 2. This is also subject to the conditions that: (a) mining shall be confined and limited to th 3. This is also subject to the conditions that the proponent shall (a) demarcate the excavati 4. The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any 5. The DFO shall also ensure marking the boundary of the mining site on the ground fixin 6. The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any 7. The Proponent further must ensure raising Green Belt around the premises in consultati 8. The topsoil of the excavated area must have to be preserved for use in raising of Green 9. The project Proponent accordingly shall submit an undertaking whereby he has to unde

3.14.5.2. Standard

1(a)	**Mining of minerals**
Air quality monitoring and mitigation measure	
1.	Adequate ambient air quality monitoring stations shall be established in the core zone as well as in the buffer zone for monitoring of pollutants, namely particulates, SO2 and NOx. Location of the stations shall be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive receptors in consultation with the State Pollution Control Board. Online ambient air quality monitoring station/stations may also be installed in addition to the regular air monitoring stations as per the requirement and/or in consultation with the SPCB
1.	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.
1.	Major approach roads shall be black topped and properly maintained.
1.	The transportation of coal shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the coal through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.
Corporate Environment Responsibility	
1.	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders.
1.	Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Land Recalmation	

1.	Native tree species shall be selected and planted over areas affected by subsidence.
Mining Plan	
1.	No change in mining method i.e. UG to OC, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
1.	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.
1.	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.
Miscellaneous	
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
1.	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours
1.	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent’s website permanently.

1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
Noise and Vibration monitoring and prevention	
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.
1.	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
Public hearing and Human health issues	
1.	PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
1.	PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius
1.	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
1.	PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
Statutory compliance	
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee.
1.	Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA Notification, 2006 and its amendments therein
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The Environmental clearance shall be subject to orders of Hon’ble Supreme Court of India, Hon’ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
Water quality monitoring and mitigation measures	
1.	The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.
1.	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.

1.	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.

3.15. Agenda Item No 15:

3.15.1. Details of the proposal

"Namdang Kumar Gaon Ordinary Earth Mining Permit Area" by **MUKUL MONI KALITA** located at **SIVASA GAR,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/471001/2024	SEAC/SEIAA.3773/2024	29/04/2024	Mining of minerals (1(a))

3.15.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :30/05/2024

Deliberations of SEAC 1 :

Necessary land documents (Dag No-376, Patta-185) submitted in support of the proposal is placed before the Committee for examination and appraisal. The Joint Verification Report (JVR) with the Revenue and Forest Department is also placed for scrutiny. After due discussions and deliberations the Committee is of the opinion to allow extraction of the minor mineral with the approved quantity of **2,075** Cu M of Ordinary Earth in **1 (one)** year instead of 2 (two) years as the quantity of mineral is too meagre.

Decision: Recommended grant of the EC for 1(one) year**.**

3.15.3. Deliberations by the SEIAA in current meetings

As per the Jamabandi the land is agricultural land, as such Non agricultural Land Certificate from the concerned Revenue authority to be submitted.

3.15.4. Recommendation of SEIAA

Deferred for ADS

3.16. Agenda Item No 16:

3.16.1. Details of the proposal

Desang River Sand Mining Permit Area N (Nangolamora) by **SIBSAGAR TERRITORIAL FOREST DIVISION** located at **SIVASAGAR,ASSAM**	
Proposal For	Fresh EC

Proposal No	File No	Submission Date	Activity (Schedule Item)
SIA/AS/MIN/433671/2023	SEAC/SEIAA.3759/2024	15/05/2024	Mining of minerals (1(a))

3.16.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :30/05/2024

Deliberations of SEAC 1 :

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized. Due deliberations and discussions are held.

The Committee is of the opinion to urge the DFO for taking requisite steps to conduct preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC during 2016.

The Committee is of the opinion to have details of the ECs so transferred in respect of the Lessee during last 3 (three) financial years with the mandatory half yearly compliance reports as a part of the process of sustainable mining in the district. The Committee is of the further opinion to urge for taking requisite steps to conduct preparation of the District Survey Report (DSR) for the District by the DFO in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC during 2016.

Decisions taken: The Committee considered it appropriate to recommend the grant of EC by the SEIAA allowing extraction and harvesting of minor mineral within 1 (one) year only for the quantity of **20,000** Cu M of **Sand.**

3.16.3. Deliberations by the SEIAA in current meetings

As the proposed mining area is modified, quantity of the Sand to be extracted also to be changed. Accordingly mining plan may be revised.

3.16.4. Recommendation of SEIAA

Deferred for ADS

3.17. Agenda Item No 17:

3.17.1. Details of the proposal

Bhalakhowa Sand Mining Permit Area"(P.P.land) by **SRI DEEP PRASAD DAS** located at **KAMRUP,ASSAM**			
Proposal For		Mining EC Under 5 Ha	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/468775/2024	SEAC/SEIAA. 3772/2024	09/04/2024	Mining of minerals (1(a))

3.17.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :30/05/2024

Deliberations of SEAC 1 :

Necessary land documents (Dag No 76,77; Patta No 8) submitted in support of the proposal is placed before the Committee for examination and appraisal.
The Joint Verification Report (JVR) dated 27.12.2023 with the Revenue and Forest Department is also placed for scrutiny together with the Non-agricultural Land Certificate dated 21.03.2024.
After due discussions and deliberations the Committee is of the opinion to allow extraction of the minor mineral with the approved quantity of **3,250**Cu M of Sand in **1 (one)** instead of 2 (two) years as the quantity of mineral is too meagre.

3.17.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 0.44Ha with quantity of 3,250Cu M of Sand in 2 (two) years (as per approved mining plan) subject to the terms and conditions laid down by SEAC.

3.17.4. Recommendation of SEIAA

Approved

3.17.5. Details of Environment Conditions

3.17.5.1. Specific

Specific Conditions by SEAC	
1.	1.The Divisional Forest Officer, Kamrup west Division shall ensure due vigilance in the mining area t 2.The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent
General conditions by SEAC	
1.	1.This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid 2. This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within
Specific condition by SEIAA	
1.	• CSR activities shall be carried out / undertaken by the Proponent and minimum 2% of t • The DFO shall identify the activities adequately, prepare a budget for the purposes and • Plantation activities shall be carried out / undertaken in any educational institution or G

3.17.5.2. Standard

1(a)	**Mining of minerals**

Air quality monitoring and mitigation measure	
1.	Adequate ambient air quality monitoring stations shall be established in the core zone as well as in the buffer zone for monitoring of pollutants, namely particulates, SO2 and NOx. Location of the stations shall be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive receptors in consultation with the State Pollution Control Board. Online ambient air quality monitoring station/stations may also be installed in addition to the regular air monitoring stations as per the requirement and/or in consultation with the SPCB
1.	Major approach roads shall be properly maintained with dust suppression measures and the river bank in any case must not be damaged.
1.	The transportation of materials shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the materials through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be constructed so that the impact of sound, dust and accidents could be appropriately mitigated.
1.	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.

1.	Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Land Recalmation	
1.	Native tree species shall be selected and planted over areas affected by subsidence.
Mining Plan	
1.	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.
1.	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.
1.	No change in mining method i.e. open cast to under ground, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).
Miscellaneous	

1.	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently.
1.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
1.	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours
Noise and Vibration monitoring and prevention	
1.	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
1.	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.

Public hearing and Human health issues	
1.	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
1.	PP must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
1.	PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
1.	PP to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius
Statutory compliance	
1.	The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee.
1.	Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA Notification, 2006 and its amendments therein
Water quality monitoring and mitigation measures	
1.	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.
1.	The project proponent shall take all precautionary measures to ensure reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.
1.	The project proponent shall not alter major water channels around the site. Appropriate embankment shall be provided along the side of the river/nallah flowing near or adjacent to the mine. The embankment constructed along the river/nallah boundary shall be of suitable dimensions and critical patches shall be strengthened by stone pitching on the river front side, stabilized with plantation so as to withstand the peak water pressure preventing any chance of mine inundation.

3.18. Agenda Item No 18:

3.18.1. Details of the proposal

PATTA LAND ORDINARY EARTH AND STONE MINING PERMIT AREA AT PAMOHI/ MOINAKHURU NG VILLAGE by **HIRAK GOGOI** located at **KAMRUP METRO,ASSAM**	
Proposal For	Fresh EC

Proposal No	File No	Submission Date	Activity (Schedule Item)
SIA/AS/MIN/454404/2023	SEIAA.3673/2024	12/02/2024	Mining of minerals (1(a))

3.18.2. Deliberations by the committee in previous meetings

Date of SEIAA 1 :31/05/2024

Deliberations of SEIAA 1 :

A map with the mine site and the Rani Reserve Forest boundary to be endorsed by the concerned DFO is to be submit.

Date of SEAC 2 :30/04/2024

Deliberations of SEAC 2 :

Necessary land documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The Joint Verification Report (JVR) with the Revenue and Forest Department is also placed for scrutiny. It reveals from the report that the proposed mining area is adjacent to the Rani RF (5 mtr away from the boundary). Drone images furnished by the Proponent is also placed before the Committee. After due discussions and deliberations the Committee was of the opinion to have an inspection of the site by a sub-Committee and to furnish a report showing the status of the proposed area and the remedial measures to be taken for averting air pollution due to excavation work / mining in the area. A sub-Committee was constituted accordingly on 29.02.2024 and the said sub-Committee conducted the site verification on 09.03.2024 in presence of the project Proponent. The report dated 25.03.2024 submitted to this effect is also placed for perusal by the Committee.

On perusal of the report it is suggested to follow the guidelines annexed to the report and also to take precaution for safety of the Godown existing near to the proposed area. It is also suggested not to use blasting explosives while disintegrating the rock. There has to be demarcation of the entire proposed area with concrete pillars with proper safety measures to prevent any debris falling in the neighbours' dwelling premises, preferably with high strength iron net.

After due deliberation the Committee is of the opinion to allow mining in the proposed approved area under constant monitoring of the Forest Department following the terms and conditions explained above.

Date of SEAC 3 :23/02/2024

Deliberations of SEAC 3 :

As decided in the meeting a field enquiry by a sub-committee is suggested

3.18.3. Deliberations by the SEIAA in current meetings

ADS Required-

- No objection certificate (NOC) from the Concerned District Forest Officer for carrying out mining within 3.3km distance from the Deepar Beel Ramsar site.
- No objection certificate (NOC) from the owner of the building that is situated in the immediate vicinity of the proposed mine site for carrying out mining.

3.18.4. Recommendation of SEIAA

Deferred for ADS

Subject: Grant of EC under the provision of the EIA Notification 2006-regarding.

Sir/Madam,

This is in reference to your application for Grant of EC under the provision of the EIA Notification 2006-regarding in respect of project Khagrabari P.P. Land Sand and Stone Mining Permit Area submitted to SEAC & SEIAA vide proposal number SIA/AS/MIN/465066/2024 dated 15/05/2024.

2. The particulars of the proposal are as below :

(i) EC Identification No.	EC24C0108AS5724836N
(ii) File No.	SEAC/SEIAA 3768/2024
(iii) Clearance Type	EC
(iv) Category	B2
(v) Project/Activity Included Schedule No.	1(a) Mining of minerals
(vii) Name of Project	Khagrabari P.P. Land Sand and Stone Mining Permit Area
(viii) Name of Company/Organization	Abdul Mannan
(ix) Location of Project (District, State)	BAKSA, ASSAM
(x) Issuing Authority	SEIAA
(xii) Applicability of General Conditions	no
(xiii) Applicability of Specific Conditions	no

In view of the particulars given in the Para 1 above, the project proposal interalia including Form-1(Part A and B) were submitted to the State Expert Appraisal Committee (SEAC), Assam under the provision of EIA notification 2006 and its subsequent amendments.

The above-mentioned proposal has been considered by State Expert Appraisal Committee (SEAC) in the meeting held on 30/05/2024. The minutes of the meeting and all the Application and documents submitted (viz. Form-1 Part A and Part B) are available on PARIVESH portal which can be accessed by scanning the QR Code above.

The brief about configuration of plant/equipment, products and by products and salient features of the project along with environment settings, as submitted by the Project proponent in Form-1 (Part A and B) /presented during SEIAA are annexed to this EC as Annexure (1).

The SEIAA, in its meeting held on 01/07/2024, based on information & clarifications provided by the project proponent and after detailed deliberations recommended the proposal for grant of EC under the provision of EIA Notification, 2006 and as amended thereof subject to stipulation of specific and general conditions as detailed in Annexure (2).

The SEAC has examined the proposal in accordance with the Environment Impact Assessment (EIA) Notification, 2006 & further amendments thereto and after recommendations of the State Environment Impact Assessment Authority (SEIAA) hereby decided to grant EC for instant proposal of Abdul Mannan under the provisions of EIA Notification, 2006 and as amended thereof.

The SEIAA reserves the right to stipulate additional conditions, if found necessary.

The EC to the aforementioned project is under provisions of EIA Notification, 2006. It does not tantamount to approvals/consent/permissions etc. required to be obtained under any other Act/Rule/regulation. The Project Proponent is under obligation to obtain approvals /clearances under any other Acts/ Regulations or Statutes, as applicable, to the project.

This issues with the approval of the Competent Authority.

The extraction of Sand, Stone & Sand-Gravel from the area within the limits of the GPS Co-ordinates as under:

5. The Integrated Regional Office, Ministry of Environment, Forest & Climate Change, 4th Floor, Housefed Building, G.S. Road, Rukminigaon, Guwahati-22 for kind information.
6. Office Copy.

Annexure 1

Specific EC Conditions for (Mining Of Minerals)

1. Specific Conditions By Seac

S. No	EC Conditions
1.1	Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO.
1.2	The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period.
1.3	The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan.
1.4	Plantation activities shall be carried out/undertaken in any Educational institution or Govt lands involving local NGOs, School / College students and an amount of Rs 2.00 (two) Lakh shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students.
1.5	Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

2. General Conditions By Seac

S. No	EC Conditions
2.1	This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan;
2.2	This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials; (c) the Proponent shall extract / harvest the approved quantity of minerals indicated herein with maximum mining depth of up to 2 (two) meters only from the non-mined surface.

3. Specific Condition By Seiaa

S. No	EC Conditions
3.1	CSR activities shall be carried out / undertaken by the Proponent and 2% of the total project cost Rs 2.00 (two)Lakh shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the nearby village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within the 1st year of allowing mining in the area and shall upload the reports in the PARIVESH portal which shall form part of the Half Yearly Compliance Report.

Standard EC Conditions for (Mining of minerals)

1. Statutory Compliance

S. No	EC Conditions
1.1	The Environmental clearance shall be subject to orders of Hon'ble Supreme Court of India, Hon'ble High Courts, NGT and any other Court of Law, from time to time, and as applicable to the project
1.2	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.3	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.4	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee.
1.5	Validity of EC is as per life of the mine mentioned in EC letter or 30 years as per EIA Notification, 2006 and its amendments therein

2. Air Quality Monitoring And Mitigation Measure

S. No	EC Conditions
2.1	Adequate ambient air quality monitoring stations shall be established in the core zone as well as in the buffer zone for monitoring of pollutants, namely particulates, SO2 and NOx. Location of the stations shall be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive receptors in consultation with the State Pollution Control Board. Online ambient air quality monitoring station/stations may also be installed in addition to the regular air monitoring stations as per the requirement and/or in consultation with the SPCB
2.2	Major approach roads shall be properly maintained with dust suppression measures and the river bank in any case must not be damaged.
2.3	The transportation of materials shall be carried out as per the provisions and route proposed in the approved mining plan. Transportation of the materialsl through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed that the impact of sound, dust and accidents could be appropriately mitigated.

S. No	EC Conditions
2.4	Adequate number of Fog canon (mist sprayer) shall be installed to reduce the impact of air pollution at dust generating sources with time bound action plan.

3. Water Quality Monitoring And Mitigation Measures

S. No	EC Conditions
3.1	Monitoring of water quality upstream and downstream of river including pons, lakes, tanks shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change/Regional Office.

4. Corporate Environment Responsibility

S. No	EC Conditions
4.1	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders.
4.2	Self environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.

5. Land Recalmation

S. No	EC Conditions
5.1	Native tree species shall be selected and planted over areas affected by subsidence.

6. Mining Plan

S. No	EC Conditions
6.1	No mining shall be carried out in forest land without obtaining Forestry Clearance as per Forest (Conservation) Act, 1980 and also adhering to The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 read with provisions of Indian Forest Act, 1927.
6.2	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy.
6.3	No change in mining method i.e. OC to UG, calendar programme and scope of work shall be made without obtaining prior approval of the Ministry of Environment, Forests and Climate Change (MoEFCC).

7. Miscellaneous

S. No	EC Conditions
7.1	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently.
7.2	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
7.3	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
7.4	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
7.5	The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
7.6	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
7.7	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
7.8	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
7.9	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
7.10	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
7.11	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours

8. Noise And Vibration Monitoring And Prevention

S. No	EC Conditions
8.1	Adequate measures shall be taken for control of noise levels as per Noise Pollution Rules, 2016 in

S. No	EC Conditions
	the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs/muffs in conformity with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
8.2	The noise level survey shall be carried out as per the prescribed guidelines to assess noise exposure of the workmen at vulnerable points in the mine premises, and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.

9. Public Hearing And Human Health Issues

S. No	EC Conditions
9.1	Effective arrangement shall be made to provide and maintain at suitable points conveniently situated, a sufficient supply of drinking water for all the persons employed.
9.2	Project Proponent must ensure an emergency action plan during pandemic in order to provide assistance to the nearby villages located within the 10 km radius buffer zone (If required)
9.3	Project Proponent is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone with time bound action plan
9.4	Project Proponent to take measure for installation of Renewable Energy sources in nearby area falling within 10 km radius

(Issued by the State Environment Impact Assessment Authority (SEIAA), ASSAM)
***

Minutes of 24th SEIAA Meeting State Environment Impact Assessment Authority meeting held from 25/11/2024 to 25/11/2024

Date: 19/12/2024

MoM ID: EC/MOM/SEIAA/160329/11/2024

Agenda ID: EC/AGENDA/SEIAA/160329/11/2024

Meeting Venue: Conference Hall, 3rd Floor, Pollution Control Board, Assam

Meeting Mode: Physical

Date & Time:

25/11/2024	11:00 AM	03:00 PM

1. Opening remarks

The Member Secretary, SEIAA welcomed the Chairman, SEIAA and the Member of the regulatory body. She briefed the house about the agenda for the meeting for deliberation and to expedite disposal of the recommended proposals by SEAC, Assam.

2. Confirmation of the minutes of previous meeting

As per the agenda, the regulatory body duly reviewed the Minutes of the 20th SEIAA Meetings held on 27/09/2024

3. Details of proposals considered by the committee

Day 1 -25/11/2024

3.1. Agenda Item No 1:

3.1.1. Details of the proposal

Baikunthapur Ordinary Earth Mining Permit Area by **ISPAKUL BARBHUIYA** located at **CACHAR,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/462399/2024	SEIAA 3708/2024	10/02/2024	Mining of minerals (1(a))

3.1.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :28/03/2024

Deliberations of SEAC 1 :

Necessary land documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The non-agricultural land certificate in respect of the land is also furnished and placed for scrutiny. Detailed discussions and deliberations are held. The KML file relating to the project proposal in question is also examined.

After due discussions and deliberations the Committee is of the opinion to have an inspection of the proposed area to be conducted by a sub-Committee as this proposal is for extraction of mineral from a pattaland.

Decision: A sub- Committee is constituted for the propose. The sub-Committee shall visit the site and assess the probable impact in allowing mining in the proposed area and will suggest with their valued observations for mitigation measures, precautions including replenishment of the area with green cover through plantations of suitable species of plants as may warrant.

Date of SEAC 2 :25/10/2024

Deliberations of SEAC 2 :

Deliberations:

Necessary land documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The non-agricultural land certificate in respect of the land is also furnished and placed for scrutiny. Detailed discussions and deliberations are held. The KML file relating to the project proposal in question is also examined.

After due discussions and deliberations the Committee is of the opinion to have an inspection of the proposed area to be conducted by a sub-Committee as this proposal is for extraction of mineral from a pattaland.

Decision: A sub- Committee is constituted for the propose.

The sub-Committee shall visit the site and assess the probable impact in allowing mining in the proposed area and will suggest with their valued observations for mitigation measures, precautions including replenishment of the area with green cover through plantations of suitable species of plants as may warrant.**"**

Pursuant to the Resolutions taken in the 7th SEAC Meeting (1st Sitting) wherein it was proposed to have an on the spot inspection through a sub-Committee of the SEAC, the sub-Committee so constituted had caused the field inspection and submitted a report. The copy of the report is reproduced below in *verbatim* as under:

A.Proposal Information Order:

1. **Bounded Longitude** I.92° 35' 40.463" E
II.92° 35' 40.476" E
III.92° 35' 41.139" E
IV.92°35 42.240" E
2. **Brief description or nature of project activity:**

E. Salient Features of the Project-

The project proponent wants to extract Ordinary earth to be used for any constructional & filling purposes. The project area, Baikunthapur Ordinary Earth Mining Permit Area, in private pattaland proposed by Sri Ispakul Babhuiyan is measuring 0.69 ha with the same approved mining area for mining of ordinary Page 2 of 31earth measuring 1,20,000 cu m for 2 (two) years. The recommended quantity for mining of ordinary earth as per the approved mining plan @ 60,000 cum, annually. The mining plan is prepared by the Registered Qualified Person (RQP) Dr Abhijit Bora. The Director, Geology and Mining, Govt of Assam vide letter dated 30.12.2023 communicated approval of the mining plan. The DFO, Karimanj Division, has recommended for grant of the EC in respect of the proposal allowing extraction vide letter dated 29.01.2024.

F. Composition of the Sub-Committee

Ref.: Order SEAC.3717/2024/71 dtd. 04.04.2024

1. Name of the official – Dr Shantanu Kr Dutta, Member Secretary, SEAC

Dr. Bijoy Sankar Goswami,Member SEAC

Shri Arup Barpujary, Member, SEAC

Shri Shantanoo Bhattacharyya, Member SEAC

2. Role in the Committee – To inspect the site and assess the present status of the site and the probable impact on the natural environment in the surroundings during operational phase. The sub-committee is to submit their detail site inspection report with specific suggestion, observation for needful action.

4. Duration / date of visit –23.05.2024
G.Whether any violation of provision as per EIA Notification 2006 has been observed / recorded? No
H.Additional Details, (if any)-
I.Details of the Site inspected-
1. The proposal involves a small hillock in PP land from where earth mining would be carried out (Photographs –I, II & III).
2. The site has been found apparently suitable for earth cutting.
J. **Recommendations /Suggestions/ Final Remarks –** The committee is of the opinion that EC may be issued with the caveat that the project proponent resort to cutting/levelling/excavating of earth with proper care as suggested in the draft guidelines for safe excavation submitted here-to-before.
Current deliberation:
Necessary land documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The non-agricultural land certificate in respect of the land is also furnished and placed for scrutiny. Detailed discussions and deliberations are held. The KML file relating to the project proposal in question is also examined. The report of the sub Committee is placed before the SEAC for due diligence and deliberation.
The Committee is of the opinion to urge the DFO for taking requisite steps to complete the preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} and place the same for appraisal and final approval by the competent authority.
Decision: Recommended grant of the EC **for 1(one) yea**r with a quantity of **60,000 Cu M.**

3.1.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 0.35Ha with a quantity of 60,000cu m of Ordinary Earth in 1 (one) year subject to the terms and conditions laid down by SEAC and that the area in question is to be reflected in the DSR.

3.1.4. Recommendation of SEIAA

Approved

3.1.5. Details of Environment Conditions

3.1.5.1. Specific

SPECIFIC CONDITIONS BY SEAC	
1.	This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan.
2.	This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates and (b) the Proponent shall extract the approved quantity of Ordinary Earth indicated herein with maximum mining depth of up to 2 (two) meters.
3.	This is also subject to the conditions that the proponent shall- (a) demarcate the excavation setting out plan with reference coordinates and levels; (b) to start the excavation from one end and proceed to another end in layers such as one metre depth layers; (c) if the excavation depth exceeds 2.0 m depth, it is necessary to protect the sides of the excavation by driving sheet piles or soldier piles (the vertical members to protect the excavation is to be driven first followed by horizontal members) provided permission is granted; (d) stack the soil away from the excavation edge to prevent soil collapsing to the excavated area;

	(e) that the excavation shall not be allowed to go below the level of land adjacent to the area in question and (f) proper barrier with green shed nets must have to be erected to prevent Dust pollution, Air pollution in the adjacent area.
4.	The Divisional Forest Officer shall ensure due vigilance in the proposed area to avert any kind of irregularities / illegalities during the excavation period.
5.	The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars/posts, following the GPS coordinates mentioned in the approved mining plan prior to allowing removal of Ordinary Earth.
6.	The project Proponent accordingly shall submit an undertaking whereby he has to undertake to obtain the earth cutting permission from the District Commissioner and to submit the same to the DFO concerned before allowing excavation work.
7.	The DFO shall place the DSR for evaluation and appraisal by the SEAC for further approval by the SEIAA and on the basis of the approved DSR the proponent may come forward for the balance quantity remaining if found available and permissible for mining.
General condition by SEAC	
1.	The Project Proponent shall carryout plantation/ afforestation in backfilled and reclaimed area of mining lease, around water body, along the roadsides, in community areas etc. by planting the native species in consultation with the State Forest Department/ Agriculture Department/ Rural development department/ Tribal Welfare Department/ Gram Panchayat such that only those species be selected which are of use to the local people. The CPCB guidelines in this respect shall also be adhered. The density of the trees should be around 2500 saplings per Hectare. Adequate budgetary provision shall be made for protection and care of trees.
2.	The Project Proponent shall carryout plantation/ afforestation in backfilled and reclaimed area of mining lease, around water body, along the roadsides, in community areas etc. by planting the native species in consultation with the State Forest Department/ Agriculture Department/ Rural development department/ Tribal Welfare Department/ Gram Panchayat such that only those species be selected which are of use to the local people. The CPCB guidelines in this respect shall also be adhered. The density of the trees should be around 2500 saplings per Hectare. Adequate budgetary provision shall be made for protection and care of trees.

3.1.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	This Environmental Clearance (EC) is subject to orders/ judgment of Honble Supreme Court of India, Honble High Court, Honble NGT and any other Court of Law, Common Cause Conditions as may be applicable.

1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State Pollution Control Board/ Committee.
Statutory compliance	
1.	The Project Proponent shall inform the MoEF&CC for any change in ownership of the mining lease. In case there is any change in ownership or mining lease is transferred. PP needs to apply for transfer of EC as per provisions of the para 11 of EIA Notification, 2006 as amended from time to time.
1.	The Project Proponent shall follow the mitigation measures provided in MoEFCC's Office Memorandum No. Z-11013/57/2014-IA.II (M), dated 29th October, 2014, titled "Impact of mining activities on Habitations-Issues related to the mining Projects wherein Habitations and villages are the part of mine lease areas or Habitations and villages are surrounded by the mine lease area."
1.	State Pollution Control Board/Committee shall be responsible for display of this EC letter at its Regional office, District Industries Centre and Collector's office/ Tehsildar's Office for 30 days.
1.	A copy of EC letter will be marked to concerned Panchayat / local NGO etc. if any, from whom suggestion / representation has been received while processing the proposal.
1.	The Project proponent complies with all the statutory requirements and judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India &Ors before commencing the mining operations.
1.	The State Government concerned shall ensure that mining operation shall not be commenced till the entire compensation levied, if any, for illegal mining paid by the Project Proponent through their respective Department of Mining & Geology in strict compliance of Judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India & Ors.
Air quality monitoring and preservation	
1.	The project proponent use leak proof trucks/dumpers carrying ore and other raw materials and cover them with tarpaulin.
1.	Design the ventilation system for adequate air changes as per ACGIH document for all tunnels, motor houses, Oil Cellars.
1.	The project proponent shall submit monthly summary report of continuous stack emission and air quality monitoring and results of manual stack monitoring and manual monitoring of air quality /fugitive emissions to Regional Office of MoEF&CC, Zonal office of CPCB and Regional Office of SPCB along with six-monthly monitoring report.
Air quality monitoring and preservation	
1.	Appropriate Air Pollution Control (APC) system shall be provided for all the dust generating points including fugitive dust from all vulnerable sources, so as to comply prescribed stack emission and fugitive emission standards.
Air quality monitoring and preservation	
1.	Effective safeguard measures for prevention of dust generation and subsequent suppression (like regular water sprinkling, metalled road construction etc.) shall be carried out in areas prone to air pollution wherein high levels of PM10 and PM2.5 are evident such as haul road, loading and unloading point and transfer points. The Fugitive dust emissions from all sources shall be regularly controlled by installation of required equipments/ machineries

	and preventive maintenance. Use of suitable water-soluble chemical dust suppressing agents may be explored for better effectiveness of dust control system. It shall be ensured that air pollution level conform to the standards prescribed by the MoEFCC/ Central Pollution Control Board.
1.	The project proponent shall monitor fugitive emissions in the plant premises at least once in every quarter through labs recognised under Environment (Protection) Act, 1986. 9) The project proponent shall install system to carryout Continuous Ambient Air Quality monitoring for common/criterion parameters relevant to the main pollutants released (e.g., PM10 and PM2.5 in reference to PM emission, and SO2 and NOx in reference to S02 and NOx emissions) within and outside the plant area at least at four locations (one within and three outside the plant area at an angle of 120 each). covering upwind and downwind directions.
Water quality monitoring and preservation	
1.	Project Proponent shall regularly monitor and maintain records w.r.t. ground water level and quality in and around the mine lease by establishing a network of existing wells as well as new piezo-meter installations during the mining operation in consultation with Central Ground Water Authority/ State Ground Water Department. The Report on changes in Ground water level and quality shall be submitted on six-monthly basis to the Regional Office of the Ministry, CGWA and State Groundwater Department / State Pollution Control Board.
Water quality monitoring and preservation	
1.	In case, immediate mining scheme envisages intersection of ground water table, then Environmental Clearance shall become operational only after receiving formal clearance from CGWA. In case, mining operation involves intersection of ground water table at a later stage, then PP shall ensure that prior approval from CGWA and MoEFCC is in place before such mining operations. The permission for intersection of ground water table shall essentially be based on detailed hydro-geological study of the area.
1.	The Project Proponent shall undertake regular monitoring of natural water course/ water resources/ springs and perennial nallahs existing/ flowing in and around the mine lease including upstream and downstream. Sufficient number of gullies shall be provided at appropriate places within the lease for management of water. The parameters to be monitored shall include their water quality vis-à-vis suitability for usage as per CPCB criteria and flow rate. It shall be ensured that no obstruction and/ or alteration be made to water bodies during mining operations without justification and prior approval of MoEFCC. The monitoring of water courses/ bodies existing in lease area shall be carried out four times in a year viz. pre- monsoon (April May), monsoon (August), post-monsoon (November) and winter (January) and the record of monitored data may be sent regularly to Ministry of Environment, Forest and Climate Change and its Regional Office, Central Ground Water Authority and Regional Director, Central Ground Water Board, State Pollution Control Board and Central Pollution Control Board. Clearly showing the trend analysis on six-monthly basis.
Noise and vibration monitoring and prevention	
1.	The Project Proponent shall take measures for control of noise levels below 85 dBA in the work environment. The workers engaged in operations of HEMM, etc. should be provided with ear plugs /muffs. All personnel including laborers working in dusty areas shall be provided with protective respiratory devices along with adequate training, awareness and information on safety and health aspects. The PP shall be held responsible in case it has been found that workers/ personals/ laborers are working without personal protective equipment.
Noise monitoring and prevention	
1.	Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six-monthly compliance report.
Noise and vibration monitoring and prevention	
1.	The peak particle velocity at 500m distance or within the nearest habitation, whichever is closer shall be monitored periodically as per applicable DGMS guidelines.
Mining plan	

1.	The land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life shall be governed as per the approved Mining Plan. The excavation vis-à-vis backfilling in the mine lease area and corresponding afforestation to be raised in the reclaimed area shall be governed as per approved mining plan. PP shall ensure the monitoring and management of rehabilitated areas until the vegetation becomes self-sustaining. The compliance status shall be submitted half-yearly to the MoEFCC and its concerned Regional Office.
Mining plan	
1.	The Project Proponent shall adhere to approved mining plan, inter alia, including, total excavation (quantum of mineral, waste, over burden, inter burden and top soil etc.); mining technology; lease area; scope of working (method of mining, overburden & dump management, O.B& dump mining, mineral transportation mode, ultimate depth of mining, concurrent reclamation and reclamation at mine closure; land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life; etc.).
Waste management	
1.	Kitchen waste shall be composted or converted to biogas for further use.(to be decided on case to case basis depending on type and size of plant)
1.	The waste oil, grease and other hazardous waste shall be disposed of as per the Hazardous & Other waste (Management & Transboundary Movement) Rules, 2016.
Land reclamation	
1.	The Overburden (O.B.), waste and topsoil generated during the mining operations shall be stacked at earmarked OB dump site(s) only and it should not be kept active for a long period of time. The physical parameters of the OB / waste dumps / topsoil dump like height, width and angle of slope shall be governed as per the approved Mining Plan and the guidelines/circulars issued by D.G.M.S. The topsoil shall be used for land reclamation and plantation.
1.	The slope of dumps shall be vegetated in scientific manner with suitable native species to maintain the slope stability, prevent erosion and surface run off. The selection of local species regulates local climatic parameters and help in adaptation of plant species to the microclimate. The gullies formed on slopes should be adequately taken care of as it impacts the overall stability of dumps. The dump mass should be consolidated with the help of dozer/ compactors thereby ensuring proper filling/ leveling of dump mass. In critical areas, use of geo textiles/ geo-membranes / clay liners / Bentonite etc. shall be undertaken for stabilization of the dump.
Land reclamation	
1.	Check dams of appropriate size, gradient and length shall be constructed around mine pit and OB dumps to prevent storm run-off and sediment flow into adjoining water bodies. A safety margin of 50% shall be kept for designing of sump structures over and above peak rainfall (based on 50 years data) and maximum discharge in the mine and its adjoining area which shall also help in providing adequate retention time period thereby allowing proper settling of sediments/ silt material. The sedimentation pits/ sumps shall be constructed at the corners of the garland drains.
Green Belt and EMP	
1.	The project proponent shall prepare GHG emissions inventory for the plant and shall submit the programme for reduction of the same including carbon sequestration including plantation.
Transportation	
1.	No Transportation of the minerals shall be allowed in case of roads passing through villages/ habitations. In such cases, PP shall construct a ‘bypass’ road for the purpose of transportation of the minerals leaving an adequate gap (say at least 200 meters) so that the adverse impact of sound and dust along with chances of accidents could be mitigated. All costs resulting from widening and strengthening of existing public road network shall be borne by the PP in consultation with nodal State Govt. Department. Transportation of minerals through road movement in

	case of existing village/ rural roads shall be allowed in consultation with nodal State Govt. Department only after required strengthening such that the carrying capacity of roads is increased to handle the traffic load. The pollution due to transportation load on the environment will be effectively controlled and water sprinkling will also be done regularly. Vehicular emissions shall be kept under control and regularly monitored. Project should obtain Pollution Under Control (PUC) certificate for all the vehicles from authorized pollution testing centers. [If applicable in case of road transport].
Green Belt	
1.	The Project Proponent shall develop greenbelt in 7.5m wide safety zone all along the mine lease boundary as per the guidelines of CPCB in order to arrest pollution emanating from mining operations within the lease. The whole Green belt shall be developed within first 5 years starting from windward side of the active mining area. The development of greenbelt shall be governed as per the EC granted by the Ministry irrespective of the stipulation made in approved mine plan.
Public hearing and Human health issues	
1.	Occupational health surveillance of the workers shall be done on a regular basis and records maintained as per the Factories Act.
1.	The project proponent shall carry out heat stress analysis for the workmen who work in high temperature work zone and provide Personal Protection Equipment (PPE) as per the norms of Factory Act.
Public hearing and Human health issues	
1.	Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, creche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.
Corporate Environment Responsibility	
1.	Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the Six Monthly Compliance Report.
1.	The Project Proponent shall submit the time- bound action plan to the concerned regional office of the Ministry within 6 months from the date of issuance of environmental clearance for undertaking the activities committed during public consultation by the project proponent and as discussed by the EAC, in terms of the provisions of the MoEF&CC Office Memorandum No.22-65/2017-IA.III dated 30 September, 2020. The action plan shall be implemented within three years of commencement of the project.
Corporate Environment Responsibility	
1.	All the recommendations made in the Charter on Corporate Responsibility for Environment Protection (CREP) for the Mineral Beneficiation plants shall be implemented.
Corporate Environment Responsibility	
1.	Self-environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Miscellaneous	
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.

1.	Concealing factual data failure to comply with any or submission of false/ fabricated data and of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act, 1986.
1.	The Ministry or any other competent authority may alter/modify the above conditions or stipulate any further condition in the interest of environment protection.
1.	The Project Authorities should inform to the Regional Office regarding date of financial closures and final approval of the project by the concerned authorities and the date of start of land development work.
1.	The above conditions will be enforced inter-alia, under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986 and the Public Liability Insurance Act, 1991 along with their amendments and rules made there under and also any other orders passed by the Hon'ble Supreme Court of India/High Court and any other Court of Law relating to the subject matter.
Miscellaneous	
1.	44) The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	Any appeal against this environmental clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.
1.	The project proponent shall abide by all the commitments and recommendations made in the EIA/EMP report, commitment made during Public Hearing and also that during their presentation to the Expert Appraisal Committee.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	In pursuant to Ministrys O.M No 22-34/2018-IA.III dated 16.01.2020 to comply with the direction made by Honble Supreme Court on 8.01.2020 in W.P. (Civil) No 114/2014 in the matter Common Cause vs Union of India, the mining lease holder shall after ceasing mining operations, undertake regrassing the mining area and any other area which may have been disturbed due to other mining activities and restore the land to a condition which is fit for growth of fodder, flora, fauna etc.
1.	The Project Proponent shall prepare digital map (land use & land cover) of the entire lease area once in five years purpose of monitoring land use pattern and submit a report to concerned Regional Office of the MoEF&CC.
1.	Any appeal against this environmental clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.
1.	The concerned Regional Office of the MoEF&CC shall randomly monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the MoEF&CC officer(s) by furnishing the requisite data / information / monitoring reports.
Corporate Environment Responsibility (CER)	
1.	The Project Proponent shall submit the time- bound action plan to the concerned regional office of the Ministry within 6 months from the date of issuance of environmental clearance for undertaking the activities committed during public consultation by the project proponent and as discussed by the EAC, in terms of the provisions of the MoEF&CC Office Memorandum No.22-65/2017-IA.III dated 30 September, 2020. The action plan shall be

	implemented within three years of commencement of the project.
Miscellaneous	
1.	The above conditions will be enforced inter-alia, under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986 and the Public Liability Insurance Act, 1991 along with their amendments and rules made there under and also any other orders passed by the Hon'ble Supreme Court of India/High Court and any other Court of Law relating to the subject matter.
1.	The project proponent shall monitor the criteria pollutants level namely; PM10, S02, NOx (ambient levels as well as stack emissions) or critical sectoral parameters, indicated for the projects and display the same at a convenient location for disclosure to the public and put on the website of the company.
1.	The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.

3.2. Agenda Item No 2:

3.2.1. Details of the proposal

HOTEL HOLIDAY INN(A unit of YUVAAN DEVELOPERS PRIVATE LIMITED) by **YUVAAN DEVELOPERS PRIVATE LIMITED** located at **KAMRUP METRO,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/INFRA2/481943/2024	SEAC/SEIAA.3788/2024	17/06/2024	Building / Construction (8(a))

3.2.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :09/07/2024

Deliberations of SEAC 1 :

The consultant represented by Vikash Agarwal of SGM Consultancy Services on behalf of the project Proponent has made a presentation before the Committee in presence of the project Proponent (authorized signatory) Sri Rohit Lohia.

Requisite documents requiring clearances from the statutory bodies are uploaded including the Form 1A, Conceptual plan, EMP, Solid Waste Management Plan, Rain Water Harvesting (RWH) plan etc etc.

The essential documents from the competent authorities in the GMDA and the GMC are found wanting and required to be uploaded / submitted.

Distance from the nearest point of the boundary of the Deepar Beel Wildlife Sanctuary, a *Ramsar* site, is stated to be around 1.09 Km.

The Committee deliberated upon the matter and felt it expedient to have an inspection of the site in presence of the project Proponent, Consultant engaged for the purposes and the Committee shall furnish their suggestions, views specially in respect of maintenance of STP sustainably, provision for Yoga Hall besides other aspects from environmental angle as proposed near to the Wildlife Sanctuary.

Decision: 1. A sub-Committee will conduct inspection of the project site in presence of the Proponent, Developer and shall submit their report accordingly with suggestions, valued opinion.

Date of SEAC 2 :25/10/2024

Deliberations of SEAC 2 :

The consultant represented by Vikash Agarwal of SGM Consultancy Services on behalf of the project Proponent has made a presentation before the Committee in presence of the project Proponent (authorized signatory) Sri Rohit Lohia. Requisite documents requiring clearances from the statutory bodies are uploaded including the Form 1A, Conceptual plan, EMP, Solid Waste Management Plan, Rain Water Harvesting (RWH) plan etc etc.

The essential documents from the competent authorities in the GMDA and the GMC /Gram Panchayat are found wanting and required to be uploaded / submitted.

Distance from the nearest point of the boundary of the Deepar Beel Wildlife Sanctuary, a *Ramsar* site, is stated to be around 1.09 Km.

The Committee deliberated upon the matter and felt it expedient to have an inspection of the site in presence of the project Proponent, Consultant engaged for the purposes and the Committee shall furnish their suggestions, views specially in respect of maintenance of STP sustainably, provision for Yoga Hall besides other aspects from environmental angle as proposed near to the Wildlife Sanctuary.

Decision:

1. A sub-Committee will conduct inspection of the project site in presence of the Proponent, Developer and shall submit their report accordingly with suggestions, valued opinion.
2. The Proponent shall upload the permissions of the GMDA, CGWA and the GMC/ Gram Panchayat.**"**

In terms of the Resolution of the SEAC, the sub-Committee so constituted had caused the field inspection and submitted a report. The copy of the report is reproduced below:

A. Proposal Information Order:

1. **Name of the Proposal** :Hotel Holiday Inn (A Unit of Yuvaan Developers Private Limited)
2. **Project ID (Online Proposal Number / Green Clearance Number):** SIA/ AS/ INFRA2 /481943 / 2024
3. **Name of the Company**: Yuvaan Developers Private Limited
4. **Project proposal for :** The proposed project is for Construction of a Five Star hotel

B. Site Details

1. State- Assam
2. District- Kamrup Metro

C. Bounded Latitude (North)

1. **Bounded Latitude/Longitude** I. 91.611951, 26.136837

II. 91.6120062, 26.1372019
III. 91.6126641, 26.1364369
IV. 91.6127022, 26.1369322

D. Salient Features of the Project-

The proposed Hotel and Commercial unit shall comprise of 184 Guest Rooms, Restaurant (2 Nos), a Banquet Hall along with Indoor Games, Gymnasium, Library on the ground floor with total built-up area of 29539 m^2, as reported. The proposed structure shall be of 2B+G+10 in a plot area of 0.6 ha.

Estimated cost of project is Rs.188.53 Crore.

E. Composition of the Sub-Committee

Ref.: Office Order SEAC/16 dtd. 12.07.2024

1. **Name of the official** – Dr Shatanu Kr Dutta, Member Secretary, SEAC
   Dr Rahul Mahanta, Member, SEAC
   Dr Bijoy Sankar Goswami, Member, SEAC
   Mr Arup Barpujari, Member SEAC
2. **Role in the Committee** – To inspect the site and assess the present status of the site and the probable impact on the natural environment in the surroundings during operational phase. The sub-committee is to submit their detail site inspection report with specific suggestion, observation for needful action.

3. Date of Inspection : 27.08.2024.

4. Details of the Site inspected –

a) Not any construction activity has been started by the PP [Photographs I , II, III and IV in Annexure-I].
b) Cleaning of the site partly completed. Remaining of old foundations were found dimpled in a corner of the plot.
c) The plot is not a low lying land. It was apparent that there were some structures earlier but demolished.
d) The plot is not connected to the Deepor Beel directly, as verified in Google earth map (Photo II).

F. Whether any violation of provision as per EIA Notification 2006 has been observed / recorded? NO.

G. Additional Details, (if any)-

H. Recommendations /Suggestions/ Final Remarks -

The Sub-Committee is of the opinion that EC could be granted to the Project."

Current Deliberations:

The report of the sub -Committee is placed before the SEAC for due diligence. Requisite documents requiring clearances from the statutory bodies are submitted.

The august Committee thoroughly deliberated upon the matter and also discussed on each of the relevant issues under consideration. It was specifically suggested by the Committee that special attention needs to be paid by the Proponent in the matter of greenery around the premises as this project is a commercial venture.

The break up the ECR and the EMP budget as reflected in the Table submitted by the Proponent is discussed and is of the opinion that the amounts earmarked needs to be spent within the stipulated time while in operational stage and before construction. Recurring expenditures as shown need to be meticulously followed to address all the components. The commitment of the Proponent for spending an amount of **Rs 12 Lakh** for Wildlife conservation measuring, as proposed by DFO, Guwahati Wildlife Division has been considered.

	A. Capital Cost		**B. Recurring Cost**		
S. No.	**Item**	**Rs. Lac**	**Item**	**Rs. Lac/Year**	**Total**
	Waste Water Management STP provided at site (100 KLD)	32	Maintenance of STP Consumable Chemicals	5	55

1	Total Capital Cost for EM P	362	1.9
2	Total Recurring Cost for EMP	23.2	0.12
3	Total EMP Cost During C onstruction And Operatio n Phase	385.2	2

The total budget allocated for EMP IS 385.2 Lakhs which is approx 2% of the total project cost i.e Rs 18853 Lakhs or 188.53 Crores

Decision: Recommended for grant of the EC.

3.2.3. Deliberations by the SEIAA in current meetings

The EC is approved as per condition laid down by SEAC. The project proposal is a Commercial/Hotel

Project “Hotel Holiday Inn” at Dharapur- Palashbari road, Borjhar, Kamrup (M) proposed by M/s Yuvaan Developers Private Ltd.
The total built up area of the proposed residential complex is 29,539.95 Sqm while the plot area is 0.6 ha. The project is falling under item 8(a) of Category-B under the Schedule to the EIA Notification, 2006.
The proposed Green Belt for the area is earmarked with an area of 0.036 ha, 12% of the project area by way of planting 190 saplings with budgeted amount of Rs 6.0 Lakh.

3.2.4. Recommendation of SEIAA

Approved

3.2.5. Details of Environment Conditions

3.2.5.1. Specific

SPECIFIC CONDITIONS BY SEAC	
1.	The total built up area of the proposed commercial complex is **29,539.95 Sqm** and, therefore, around **200** numbers of plants are to be planted by the project proponent at suitable locations and patches in the plot area covering **0.036 h**a comprising **12%** with evergreen species of plants which could withstand storm and are primarily of aesthetic value. It was suggested by the committee that the plant species preferably be are of Bakul (*Mimosups elengi*), Nahor (*Mesua ferrea*), Ashoka (S*araca asoca*), Kanchan (*Bauhinia purpurea*), Joba (*Hibiscus rosa sinensis*), Sonaru (*Cassia fistula*), Putranjiba (*Putranjiva roxburghii*), Agor (*Aquillaria malaccensis*), Sewali phul (*Nyctanthes arbor tris tis*), flowering plant species of herbs and shrubs like Kamini Kusum (*Murraya paniculata*), Aparajita (*Clitorea ternatea*) etc etc. Other commercial ornamental plant species may also be planted around the pockets of the plot for aesthetic purposes in addition to the prescribed indigenous species. The Committee felt it expedient that the numbers of plants should not be restricted to the stipulations and the same should invariably be increased accordingly comprising of herbs, shrubs, climbers and trees etc with touch of religious utility of flowering plants. Efforts shall be made to get the plants with their scientific names, local names properly labeled showing medicinal value for appreciation by the guests/inmates.
2.	The committee after due diligence prescribe for compliance of all mandatory conditions of Indian Green Building Council (IGBC) or *GRIHA* (Green Rating for Integrated Habitat Assessment) / LEEDS (Leadership in Energy and Environmental Development Systems) concept for compliance including the proposed greenery around the premises and the same are to be uploaded in the ***PARIVESH*** portal.
3.	The Proponent shall also arrange for centralized AC with provision for exhaust at the roof top of the building.
4.	The Committee felt it expedient that the proponent shall make provision for a ***YOGA Hall*** (Yoga Centre for the inmates specially for the Children, the Women and as well for the ***elderly*** inmates) .
5.	Certificate from the Central Ground Water Authority (CGWA) for use of water in the Operational phase needs to be obtained by the Proponent.
6.	(i) The cost earmarked for the environmental safeguards contained in the Environment Management Plan (EMP) amounting to **Rs 362 Lakh** as Capital Cost and Rs **23.20 Lakh** as recurring cost per Year against each of the components shall have to be utilized and shall not be diverted for any other purposes and year wise expenditures both in constructional and operational phases shall be reported to the PCB, Assam & SEIAA, the Regional Office, MoEF & CC, GoI, Guwahati along with the break up of expenditures for record and monitoring. (ii) During construction phase, rain water shall be tapped and used for construction purposes.

	(iii) The chimney height of the DG Set available at the site shall be increased as per the CPCB guideline to release the emission in vertical direction. (iv) Further, the STP is to be managed by the project Proponent for the entire period and the PP shall have the necessary AMC with the STP provider for operation and their maintenance shall be ensured under the guidance of the PCB, Assam. v) The PP shall obtain Consent to establish (CTE) and Consent to Operate (CTO) from the Pollution Control Board, Assam under the provisions of the Water (Prevention and Control of Pollution) Act, 1974 and Air (Prevention and Control of Pollution) Act, 1981, as applicable before starting of the construction activities and during the construction activities respectively.

3.2.5.2. Standard

8(a)	**Building / Construction**
Statutory compliance	
1.	The project proponent shall obtain all necessary clearance/ permission from all relevant agencies including town planning authority before commencement of work. All the construction shall be done in accordance with the local building byelaws.
1.	The approval of the Competent Authority shall be obtained for structural safety of buildings due to earthquakes, adequacy of firefighting equipment etc. as per National Building Code including protection measures from lightening etc.
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1980, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State Pollution Control Board/ Committee.
1.	The project proponent shall obtain the necessary permission for drawl of ground water / surface water required for the project from the competent authority.
1.	A certificate of adequacy of available power from the agency supplying power to the project along with the load allowed for the project should be obtained.
1.	All other statutory clearances such as the approvals for storage of diesel from Chief Controller of Explosives, Fire Department, Civil Aviation Department shall be obtained, as applicable, by project proponents from the respective competent authorities.
1.	The provisions of the Solid Waste Management Rules, 2016, e-Waste (Management) Rules, 2016, and the Plastics Waste Management Rules, 2016, shall be followed.
1.	The project proponent shall follow the ECBC/ECBC-R prescribed by Bureau of Energy Efficiency, Ministry of Power strictly.
Air quality monitoring and preservation	
1.	Notification GSR 94(E) dated 25.01.2018 of MoEF&CC regarding Mandatory Implementation of Dust Mitigation Measures for Construction and Demolition Activities for projects requiring Environmental Clearance shall be complied with.

1.	A management plan shall be drawn up and implemented to contain the current exceedance in ambient air quality at the site.
1.	The project proponent shall install system to carryout Ambient Air Quality monitoring for common/criterion parameters relevant to the main pollutants released (e.g. PM10 and PM2.5) covering upwind and downwind directions during the construction period.
1.	Diesel power generating sets proposed as source of backup power should be of enclosed type and conform to rules made under the Environment (Protection) Act, 1986. The height of stack of DG sets should be equal to the height needed for the combined capacity of all proposed DG sets. Use of low sulphur diesel. The location of the DG sets may be decided with in consultation with State Pollution Control Board.
1.	Construction site shall be adequately barricaded before the construction begins. Dust, smoke & other air pollution prevention measures shall be provided for the building as well as the site. These measures shall include screens for the building under construction, continuous dust/ wind breaking walls all around the site (at least 3-meter height). Plastic/tarpaulin sheet covers shall be provided for vehicles bringing in sand, cement, murram and other construction materials prone to causing dust pollution at the site as well as taking out debris from the site.
1.	Sand, murram, loose soil, cement, stored on site shall be covered adequately so as to prevent dust pollution.
1.	Wet jet shall be provided for grinding and stone cutting.
1.	Unpaved surfaces and loose soil shall be adequately sprinkled with water to suppress dust.
1.	All construction and demolition debris shall be stored at the site (and not dumped on the roads or open spaces outside) before they are properly disposed. All demolition and construction waste shall be managed as per the provisions of the Construction and Demolition Waste Management Rules 2016.
1.	The diesel generator sets to be used during construction phase shall be low sulphur diesel type and shall conform to Environmental (Protection) prescribed for air and noise emission standards.
1.	The gaseous emissions from DG set shall be dispersed through adequate stack height as per CPCB standards. Acoustic enclosure shall be provided to the DG sets to mitigate the noise pollution. Low sulphur diesel shall be used. The location of the DG set and exhaust pipe height shall be as per the provisions of the Central Pollution Control Board (CPCB) norms.
1.	For indoor air quality the ventilation provisions as per National Building Code of India.
Water quality monitoring and preservation	
1.	The natural drain system should be maintained for ensuring unrestricted flow of water. No construction shall be allowed to obstruct the natural drainage through the site, on wetland and water bodies. Check dams, bio-swales, landscape, and other sustainable urban drainage systems (SUDS) are allowed for maintaining the drainage pattern and to harvest rain water.
1.	Buildings shall be designed to follow the natural topography as much as possible. Minimum cutting and filling should be done.
1.	Total fresh water use shall not exceed the proposed requirement as provided in the project details.
1.	The quantity of fresh water usage, water recycling and rainwater harvesting shall be measured and recorded to monitor the water balance as projected by the project proponent. The record shall be submitted to the Regional Office, MoEF&CC along with six monthly Monitoring reports.
1.	A certificate shall be obtained from the local body supplying water, specifying the total annual water availability with the local authority, the quantity of water already committed, the quantity of water allotted to the project under consideration and the balance water available. This should be specified separately for ground water and

	surface water sources, ensuring that there is no impact on other users.
1.	At least 20% of the open spaces as required by the local building bye-laws shall be pervious. Use of Grass pavers, paver blocks with at least 50% opening, landscape etc. would be considered as pervious surface.
1.	Installation of dual pipe plumbing for supplying fresh water for drinking, cooking and bathing etc and other for supply of recycled water for flushing, landscape irrigation, car washing, thermal cooling, conditioning etc. shall be done.
1.	Use of water saving devices/fixtures (viz. low flow flushing systems; use of low flow faucets tap aerators etc) for water conservation shall be incorporated in the building plan.
1.	Separation of grey and black water should be done by the use of dual plumbing system. In case of single stack system separate recirculation lines for flushing by giving dual plumbing system be done.
1.	Water demand during construction should be reduced by use of pre-mixed concrete, curing agents and other best practices referred.
1.	The local bye-law provisions on rain water harvesting should be followed. If local bye-law provision is not available, adequate provision for storage and recharge should be followed as per the Ministry of Urban Development Model Building Byelaws, 2016. Rain water harvesting recharge pits/storage tanks shall be provided for ground water recharging as per the CGWB norms.
1.	A rain water harvesting plan needs to be designed where the recharge bores of minimum one recharge bore per 5,000 square meters of built up area and storage capacity of minimum one day of total fresh water requirement shall be provided. In areas where ground water recharge is not feasible, the rain water should be harvested and stored for reuse. The ground water shall not be withdrawn without approval from the Competent Authority.
1.	All recharge should be limited to shallow aquifer.
1.	No ground water shall be used during construction phase of the project.
1.	Any ground water dewatering should be properly managed and shall conform to the approvals and the guidelines of the CGWA in the matter. Formal approval shall be taken from the CGWA for any ground water abstraction or dewatering.
1.	The quantity of fresh water usage, water recycling and rainwater harvesting shall be measured and recorded to monitor the water balance as projected by the project proponent. The record shall be submitted to the Regional Office, MoEF&CC along with six monthly Monitoring reports.
1.	Sewage shall be treated in the STP with tertiary treatment. The treated effluent from STP shall be recycled/re-used for flushing, AC make up water and gardening. As proposed, no treated water shall be disposed in to municipal drain.
1.	No sewage or untreated effluent water would be discharged through storm water drains.
1.	Onsite sewage treatment of capacity of treating 100% waste water to be installed. The installation of the Sewage Treatment Plant (STP) shall be certified by an independent expert and a report in this regard shall be submitted to the Ministry before the project is commissioned for operation. Treated waste water shall be reused on site for landscape, flushing, cooling tower, and other end-uses. Excess treated water shall be discharged as per statutory norms notified by Ministry of Environment, Forest and Climate Change. Natural treatment systems shall be promoted.
1.	Periodical monitoring of water quality of treated sewage shall be conducted. Necessary measures should be made to mitigate the odour problem from STP.
1.	Sludge from the onsite sewage treatment, including septic tanks, shall be collected, conveyed and disposed as per

	the Ministry of Urban Development, Central Public Health and Environmental Engineering Organization (CPHEEO) Manual on Sewerage and Sewage Treatment Systems, 2013.
Noise monitoring and prevention	
1.	Ambient noise levels shall conform to residential area/commercial area/industrial area/silence zone both during day and night as per Noise Pollution (Control and Regulation) Rules, 2000. Incremental pollution loads on the ambient air and noise quality shall be closely monitored during construction phase. Adequate measures shall be made to reduce ambient air and noise level during construction phase, so as to conform to the stipulated standards by CPCB / SPCB.
1.	Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six-monthly compliance report.
1.	Acoustic enclosures for DG sets, noise barriers for ground-run bays, ear plugs for operating personnel shall be implemented as mitigation measures for noise impact due to ground sources.
Energy Conservation measures	
1.	Compliance with the Energy Conservation Building Code (ECBC) of Bureau of Energy Efficiency shall be ensured. Buildings in the States which have notified their own ECBC, shall comply with the State ECBC.
1.	Outdoor and common area lighting shall be LED.
1.	Concept of passive solar design that minimize energy consumption in buildings by using design elements, such as building orientation, landscaping, efficient building envelope, appropriate fenestration, increased day lighting design and thermal mass etc. shall be incorporated in the building design. Wall, window, and roof u-values shall be as per ECBC specifications.
1.	Energy conservation measures like installation of CFLs/ LED for the lighting the area outside the building should be integral part of the project design and should be in place before project commissioning.
1.	Solar, wind or other Renewable Energy shall be installed to meet electricity generation equivalent to 1% of the demand load or as per the state level/ local building bye-laws requirement, whichever is higher.
1.	Solar power shall be used for lighting in the apartment to reduce the power load on grid. Separate electric meter shall be installed for solar power. Solar water heating shall be provided to meet 20% of the hot water demand of the commercial and institutional building or as per the requirement of the local building bye-laws, whichever is higher. Residential buildings are also recommended to meet its hot water demand from solar water heaters, as far as possible.
Waste Management	
1.	A certificate from the competent authority handling municipal solid wastes, indicating the existing civic capacities of handling and their adequacy to cater to the M.S.W. generated from project shall be obtained.
1.	Disposal of muck during construction phase shall not create any adverse effect on the neighbouring communities and be disposed taking the necessary precautions for general safety and health aspects of people, only in approved sites with the approval of competent authority.
1.	Separate wet and dry bins must be provided in each unit and at the ground level for facilitating segregation of waste. Solid waste shall be segregated into wet garbage and inert materials.
1.	Organic waste compost/Vermiculture pit/Organic Waste Converter within the premises with a minimum capacity of 0.3 kg /person/day must be installed.
1.	All non-biodegradable waste shall be handed over to authorized recyclers for which a written tie up must be done

	with the authorized recyclers.
1.	Any hazardous waste generated during construction phase, shall be disposed off as per applicable rules and norms with necessary approvals of the State Pollution Control Board.
1.	Use of environment friendly materials in bricks, blocks and other construction materials, shall be required for at least 20% of the construction material quantity. These include Fly Ash bricks, hollow bricks, AACs, Fly Ash Lime Gypsum blocks, Compressed earth blocks, and other environment friendly materials.
1.	Fly ash should be used as building material in the construction as per the provision of Fly Ash Notification of September, 1999 and amended as on 27th August, 2003 and 25th January, 2016. Ready mixed concrete must be used in building construction.
1.	Any wastes from construction and demolition activities related thereto shall be managed so as to strictly conform to the Construction and Demolition Waste Management Rules, 2016.
1.	Used CFLs and TFLs should be properly collected and disposed off/sent for recycling as per the prevailing guidelines/ rules of the regulatory authority to avoid mercury contamination.
Green Cover	
1.	No tree can be felled/transplant unless exigencies demand. Where absolutely necessary, tree felling shall be with prior permission from the concerned regulatory authority. Old trees should be retained based on girth and age regulations as may be prescribed by the Forest Department. Plantations to be ensured species (cut) to species (planted).
1.	A minimum of 1 tree for every 80 sqm of land should be planted and maintained. The existing trees will be counted for this purpose. The landscape planning should include plantation of native species. The species with heavy foliage, broad leaves and wide canopy cover are desirable. Water intensive and/or invasive species should not be used for landscaping.
1.	Where the trees need to be cut with prior permission from the concerned local Authority, compensatory plantation in the ratio of 1:10 (i.e. planting of 10 trees for every 1 tree that is cut) shall be done and maintained. Plantations to be ensured species (cut) to species (planted). Area for green belt development shall be provided as per the details provided in the project document.
1.	Topsoil should be stripped to a depth of 20 cm from the areas proposed for buildings, roads, paved areas, and external services. It should be stockpiled appropriately in designated areas and reapplied during plantation of the proposed vegetation on site.
Transport	
1.	A comprehensive mobility plan, as per MoUD best practices guidelines (URDPFI), shall be prepared to include motorized, non-motorized, public, and private networks. Road should be designed with due consideration for environment, and safety of users. The road system can be designed with these basic criteria. a. Hierarchy of roads with proper segregation of vehicular and pedestrian traffic. b. Traffic calming measures. c. Proper design of entry and exit points. d. Parking norms as per local regulation.
1.	Vehicles hired for bringing construction material to the site should be in good condition and should have a pollution check certificate and should conform to applicable air and noise emission standards be operated only during non-peak hours.
null	
1.	A detailed traffic management and traffic decongestion plan shall be drawn up to ensure that the current level of service of the roads within a 05 kms radius of the project is maintained and improved upon after the implementation of the project. This plan should be based on cumulative impact of all development and increased

	habitation being carried out or proposed to be carried out by the project or other agencies in this 05 Kms radius of the site in different scenarios of space and time and the traffic management plan shall be duly validated and certified by the State Urban Development department and the P.W.D./ competent authority for road augmentation and shall also have their consent to the implementation of components of the plan which involve the participation of these departments.
Human health issues	
1.	All workers working at the construction site and involved in loading, unloading, carriage of construction material and construction debris or working in any area with dust pollution shall be provided with dust mask.
1.	For indoor air quality the ventilation provisions as per National Building Code of India.
1.	Emergency preparedness plan based on the Hazard identification and Risk Assessment (HIRA) and Disaster Management Plan shall be implemented.
1.	Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, crèche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.
1.	Occupational health surveillance of the workers shall be done on a regular basis.
1.	A First Aid Room shall be provided in the project both during construction and operations of the project.
Miscellaneous	
1.	The project proponent shall prominently advertise it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days indicating that the project has been accorded environment clearance and the details of MoEFCC/SEIAA website where it is displayed.
1.	ii. environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
1.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	The company shall have a well laid down environmental policy duly approved by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest/wildlife norms/conditions. The company shall have defined system of reporting infringements/deviation/violation of the environmental/forest/wildlife norms/conditions and/or shareholders/stake holders. The copy of the board resolution in this regard shall be submitted to the MoEF&CC as a part of six-monthly report.
1.	A separate Environmental Cell both at the project and company head quarter level, with qualified personnel shall be set up under the control of senior Executive, who will directly report to the head of the organization.
1.	Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the Six Monthly Compliance Report

1.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
1.	The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	The project proponent shall abide by all the commitments and recommendations made in the EIA/EMP reportand also that during their presentation to the Expert Appraisal Committee.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forest and Climate Change (MoEF&CC).
1.	Concealing factual data or submission of false/fabricated data may result in revocation of this environmental clearance and attract action under the provisions of Environment (Protection) Act, 1986.
1.	The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
1.	The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
1.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
1.	The above conditions shall be enforced, inter-alia under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986, Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016, and the Public Liability Insurance Act, 1991 along with their amendments and Rules and any other orders passed by the Hon'ble Supreme Court of India / High Courts and any other Court of Law relating to the subject matter.
1.	Any appeal against this EC shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.
Specific Conditions	
1.	Recommendations of mitigation measures from possible accident shall be implemented based on Risk Assessment studies conducted for worst case scenarios using latest techniques.

3.3. Agenda Item No 3:

3.3.1. Details of the proposal

Environment Clearance for onshore Exploration of Oil and Gas 02 wells (KHBD & NRAD) in forest area in 3 M L blocks, Golaghat district, Assam. by **OIL AND NATURAL GAS CORPORATION LIMITED** located at **GOLA GHAT,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**

SIA/AS/IND2/490458/2024	SEAC/SEIAA.3861/2024	21/08/2024	Off-shore and onshore oil and gas exploration, development and production (1(b))

3.3.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :09/09/2024

Deliberations of SEAC 1 :

Necessary applications / documents have duly been uploaded, Pre- Feasibility Report (PFR) are submitted by the proponent. Records are placed before the Committee for deliberation and appraisal. Presentation was made by the ONGCL and the proposal was thoroughly discussed in the SEAC Meeting. The PP has explained the reasons adequately before the Committee as applied for amendment of the EC for inclusion of the Well **KHBQ** in the existing EC owing to the fact that these Geo-coordinates are falling within the area for which the **Stage-II (Final) Forest Clearance** (**2.08 Ha)** under the FC Act, 1980 have been granted by the competent authority in the MoEF & CC, GoI.

The Geo Coordinates for the Well **KHBQ** is **26 °06'24.5487"-N 93°54'21.9693"-E**.
In-principle Forest Clearance under Section 2 of the FCA, 1980 was accorded on **07.09.2022** for drilling location KHBD in Doyang Reserve Forest. In the aforesaid clearance some of the relevant conditions stipulate certain restrictions which require consideration to the effect that:
"Condition no A(12) : *Any change in the diameter of borehole and number of bore holes will be reported to the concerned Integrated Regional Office in advance for consideration and recommendations to the Central Government"* and
"Condition no B(10) : *The layout plan of the mining plan/proposal shall not be changed without the prior approval of the Central Government"*.
Final Forest Clearance under section 2 of the FCA, 1980 was accorded on **01.03.2024** for drilling location **KHBD** in Doyang Reserve Forest. In the aforesaid Clearance too similar restraining conditions have been invoked specifically under **Condition no B(10)** : "*The layout plan of the mining plan/proposal shall not be changed without the prior approval of the Central Government*".
Accordingly, it can be ascertained that inclusion of drilling location **KHBQ**, even though falling within the diverted area for drilling location **KHBD**, will need prior approval from the Central Government.
Decision: The proponent ONGCL shall come up with the due approval / clarification from the competent authority for further consideration of the case at hand.

Date of SEAC 2 :25/10/2024

Deliberations of SEAC 2 :
Deliberations:

Necessary applications / documents have duly been uploaded, Pre- Feasibility Report (PFR) are submitted by the proponent. Records are placed before the Committee for deliberation and appraisal. Presentation was made by the ONGCL and the proposal was thoroughly discussed in the SEAC Meeting. The PP has explained the reasons adequately before the Committee as applied for amendment of the EC for inclusion of the Well **KHBQ** in the existing EC owing to the fact that these Geo-coordinates are falling within the area for which the **Stage-II (Final) Forest Clearance** (**2.08 Ha)** under the FC Act, 1980 have been granted by the competent authority in the MoEF& CC, GoI.

The Geo Coordinates for the Well **KHBQ** is **26 °06'24.5487"-N 93°54'21.9693"-E**.
In-principle Forest Clearance under Section 2 of the FCA, 1980 was accorded on **07.09.2022** for drilling location KHBD in Doyang Reserve Forest. In the aforesaid clearance some of the relevant conditions stipulate certain restrictions which require consideration to the effect that:
"Condition no A(12) : *Any change in the diameter of borehole and number of bore holes will be reported to the concerned Integrated Regional Office in advance for consideration and recommendations to the Central Government"* and
"Condition no B (10) : *The layout plan of the mining plan/proposal shall not be changed without the prior approval of the Central Government"*.
Final Forest Clearance under section 2 of the FCA, 1980 was accorded on **01.03.2024** for drilling location **KHBD** in Doyang Reserve Forest. In the aforesaid Clearance too similar restraining conditions have been invoked specifically under **Condition no B (10)**: "*The layout plan of the mining plan/proposal shall not be changed without the prior approval of the Central Government"*.
Accordingly, it can be ascertained that inclusion of drilling location **KHBQ**, even though falling within the diverted area for drilling location **KHBD**, will need prior approval from the Central Government.**"**
Pursuant to the above deliberations by the SEAC, the Proponent was asked to furnish the clearance from the competent authority in the Ministry for the additional drilling location in question adjacent to the **Well KHBD** within the diverted area. The Proponent has furnished a copy of the letter dated 10.10.2024 addressed to the DGF (Central), MoEF & CC, Regional Office, Shillong whereby approval of the same has accordingly been sought. The Proponent further has furnished an undertaking for the purposes in the light of the already granted EC on 27.04.2021 while request for the **Well KHBQ** is made to the SEIAA vide **proposal no. SIA/AS/IND2/490458/2024.**
Curent Deliberations:
Due diligence is made by the SEAC keeping in view the priority asserted by the Proponent for the instant proposal while no cogent reasons were placed as to the delay in its inclusion through the regular process of FC under the FC Act,1980 in as much as the ***In-Principle*** approval according Forest Clearance was granted on **07.09.2022** while final FC was granted on **01.03.2024**.
It is appreciated that the **conditions imposed** by the MoEF & CC while grant of the FC are mandatory in nature and could not be **altered without the approval of the competent authority** as envisaged therein, already highlighted in the previous meeting.
In view of the above proposition the Committee is of the considered opinion to recommend amendment of the EC in favour of the Proponent for inclusion of the **Well KHBQ** ***subject to the condition that the competent authority in the Ministry of Environment, Forest & Climate Change accords prior approval for the purpose.***
Decisions: Recommended

3.3.3. Deliberations by the SEIAA in current meetings

ADS Required-
1. Stage-I FC is required for proposed well KHBQ.

3.3.4. Recommendation of SEIAA

Deferred for ADS

3.4. Agenda Item No 4:

3.4.1. Details of the proposal

Boulagog P.P. Land Stone Mining Permit Area by **JITU AMSI** located at **WEST KARBI ANGLONG,ASSAM**			
Proposal For		Application for Validity Extension of EC- Form-6	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/496198/2024	SEIAA3584/2023	11/09/2024	Mining of minerals (1(a))

3.4.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :25/10/2024

Deliberations of SEAC 1 :

The Project Area as allotted is measuring **1.1 ha** and quantity of **20,000 Cu M** of Stone in 2(two) years as per the approved Mining Plan @ **10,000 Cu M,** annually while the DFO had recommended for the same quantity. The Mining Plan was prepared by the Registered Qualified Person (RQP) Dr Abhijit Bora and the proposed mining area was visited by the RQP while the same was approved by the Director, Geology and Mining, Govt of Assam vide letter dated **28.08.2024.** The DFO, Hamren Division has requested for the granting extension of the EC for the proposal allowing extraction vide letter dated **03.9.2024.**

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. Due deliberations and discussions are held.

After due diligence the Committee is of the considered opinion to urge the concerned DFO for taking requisite steps to complete the preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} and place the same for appraisal and final approval by the competent authority.

It is found expedient that the requirement of minor mineral is essential to meet up the demand for the development of infrastructure in progress specially to strengthen the road network connectivity and other developmental works in the district which is a *sine qua non* for overall development and economic growth of the state while the impact on environment also require due diligence and consideration with proper safeguards. It is further appreciated that the important stakeholders like the Registered Qualified Person (RQP), Geologist from the Department of Geology and Mining, the Forest official are actively involved in the process for recommending mining in the area by way of consultation including site inspection for appraisal by the SEAC.

The Committee deem it appropriate to recommend the grant of extension of the EC by the SEIAA (as had already been granted by the SEIAA just before expiry of the Mining Plan for which the proponent could not undertake any mining) allowing extraction of minor mineral for 1 (one) year as recommended in the mining plan, with the quantity of **10,000 Cu M** of **Stone** in **1(one) year** with an observation that the DFO, Hamren Division shall submit the approved DSR from the competent authority for further consideration of the balance quantity of the project allowing mining by the proponent within a period of 1 (one) year and that the area in question is duly reflected in the DSR.

Decision: Recommended for grant extension of EC for **1 (one)** year only for **10,000 Cu M** of **Stone.**

3.4.3. Deliberations by the SEIAA in current meetings

The proposal is refer-back to SEAC for review the proposal based on the public complain received on 21/11/2024 to the SEIAA.

3.4.4. Recommendation of SEIAA

Refer-Back to SEAC for Reconsideration

3.5. Agenda Item No 5:

3.5.1. Details of the proposal

BHOGDOI RIVER DULIA GAON SAND MPA by **BHOBEN GOGOI** located at **JORHAT,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/500223/2024	SEAC/SEIAA.3924/2024	08/10/2024	Mining of minerals (1(a))

3.5.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :25/10/2024

Deliberations of SEAC 1 :

Due deliberations and discussions are held.

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized.

The Committee is of the considered opinion to urge the DFO for taking requisite steps to complete the preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG'2016 and EMGSM'2020} and place the same for appraisal and final approval by the competent authority.

It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the development of infrastructure in progress specially to strengthen the road network connectivity which is a *sine qua non* for overall development and economic growth of the state while the impact on environment also require due diligence and consideration with proper safeguards. It is further appreciated that the important stakeholders like the Registered Qualified Person (RQP), Geologist from the Department of Geology and Mining, the Forest official, the official from the Water Resource Department are actively involved in the process for recommending mining in the area by way of consultation including site inspection before appraisal by the SEAC.

The Committee deem it appropriate to recommend the grant of EC by the SEIAA allowing extraction and harvesting of minor mineral for 1 (one) year, as recommended in the mining plan, with the quantity of **10,000 Cu M** of Sand with an observation that the DFO, Jorhat shall submit the approved DSR from the competent authority for further consideration of the balance quantity of the project allowing mining by the proponent within a period of 1 (one) year and that the area in question is reflected in the DSR. This is necessitated in view of the process of development works being undertaken by the NHIDCL, a Govt of India undertaking as has been communicated by the concerned competent authority.

Decision: Recommended for grant of EC for **1 (one)** year only for **10,000** Cu M of Sand.

3.5.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 1.90Ha with a quantity of 10,000 Cu M of Sand in 1 (one) year subject to the terms and conditions laid down by SEAC and that the area in question is to be reflected in the DSR.

3.5.4. Recommendation of SEIAA

Approved

3.5.5. Details of Environment Conditions

3.5.5.1. Specific

SPECIFIC CONDITIONS BY SEAC

1.	Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO.
2.	The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period.
3.	The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan before allowing mining.
4.	CSR activities shall be carried out / undertaken by the Proponent and minimum 2% of the total project cost Rs 2.00 Lakh (Two Lakh) only shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the near by village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st year of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report.
5.	Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands involving local NGOs, School / College students and an amount of Rs 2.00 (two) Lakh shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students.
6.	The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Agor(*Aquillaria malaccensis*), Amlokhi (*Phyllantus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*), Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*), Mohaneem (*Azedirachta indica*), Jamun (*Syzygium cuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpus integrifolia*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*) etc etc.
7.	Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.
GENERAL CONDITIONS BY SEAC	
1.	This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan;
2.	This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates ; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials;(c) the Proponent shall extract / harvest the approved quantity of minerals indicated herein with maximum mining depth of up to 2 (two) meters only from the non-mined surface and (d) the DFO shall place the DSR for evaluation and appraisal by the SEAC for further approval by the SEIAA and on the basis of the approved DSR the proponent may come forward for the balance quantity remaining if found permissible for mining.

3.5.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
1.	This Environmental Clearance (EC) is subject to orders/ judgment of Honble Supreme Court of India, Honble High Court, Honble NGT and any other Court of Law, Common Cause Conditions as may be applicable.
1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State Pollution Control Board/ Committee.
Statutory compliance	
1.	The Project Proponent shall inform the MoEF&CC for any change in ownership of the mining lease. In case there is any change in ownership or mining lease is transferred. PP needs to apply for transfer of EC as per provisions of the para 11 of EIA Notification, 2006 as amended from time to time.
1.	The Project proponent complies with all the statutory requirements and judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India &Ors before commencing the mining operations.
1.	State Pollution Control Board/Committee shall be responsible for display of this EC letter at its Regional office, District Industries Centre and Collector's office/ Tehsildar's Office for 30 days.
1.	The Project Proponent shall follow the mitigation measures provided in MoEFCC's Office Memorandum No. Z-11013/57/2014-IA.II (M), dated 29th October, 2014, titled "Impact of mining activities on Habitations-Issues related to the mining Projects wherein Habitations and villages are the part of mine lease areas or Habitations and villages are surrounded by the mine lease area."
1.	The State Government concerned shall ensure that mining operation shall not be commenced till the entire compensation levied, if any, for illegal mining paid by the Project Proponent through their respective Department of Mining & Geology in strict compliance of Judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India & Ors.
1.	A copy of EC letter will be marked to concerned Panchayat / local NGO etc. if any, from whom suggestion / representation has been received while processing the proposal.
Air quality monitoring and preservation	
1.	Design the ventilation system for adequate air changes as per ACGIH document for all tunnels, motor houses, Oil Cellars.
1.	The project proponent use leak proof trucks/dumpers carrying ore and other raw materials and cover them with tarpaulin.
1.	The project proponent shall submit monthly summary report of continuous stack emission and air quality monitoring and results of manual stack monitoring and manual monitoring of air quality /fugitive emissions to Regional Office of MoEF&CC, Zonal office of CPCB and Regional Office of SPCB along with six-monthly monitoring report.
Air quality monitoring and preservation	

1.	Appropriate Air Pollution Control (APC) system shall be provided for all the dust generating points including fugitive dust from all vulnerable sources, so as to comply prescribed stack emission and fugitive emission standards.
Air quality monitoring and preservation	
1.	Effective safeguard measures for prevention of dust generation and subsequent suppression (like regular water sprinkling, metalled road construction etc.) shall be carried out in areas prone to air pollution wherein high levels of PM10 and PM2.5 are evident such as haul road, loading and unloading point and transfer points. The Fugitive dust emissions from all sources shall be regularly controlled by installation of required equipments/ machineries and preventive maintenance. Use of suitable water-soluble chemical dust suppressing agents may be explored for better effectiveness of dust control system. It shall be ensured that air pollution level conform to the standards prescribed by the MoEFCC/ Central Pollution Control Board.
Water quality monitoring and preservation	
1.	Project Proponent shall regularly monitor and maintain records w.r.t. ground water level and quality in and around the mine lease by establishing a network of existing wells as well as new piezo-meter installations during the mining operation in consultation with Central Ground Water Authority/ State Ground Water Department. The Report on changes in Ground water level and quality shall be submitted on six-monthly basis to the Regional Office of the Ministry, CGWA and State Groundwater Department / State Pollution Control Board.
Water quality monitoring and preservation	
1.	In case, immediate mining scheme envisages intersection of ground water table, then Environmental Clearance shall become operational only after receiving formal clearance from CGWA. In case, mining operation involves intersection of ground water table at a later stage, then PP shall ensure that prior approval from CGWA and MoEFCC is in place before such mining operations. The permission for intersection of ground water table shall essentially be based on detailed hydro-geological study of the area.
1.	The Project Proponent shall undertake regular monitoring of natural water course/ water resources/ springs and perennial nallahs existing/ flowing in and around the mine lease including upstream and downstream. Sufficient number of gullies shall be provided at appropriate places within the lease for management of water. The parameters to be monitored shall include their water quality vis-à-vis suitability for usage as per CPCB criteria and flow rate. It shall be ensured that no obstruction and/ or alteration be made to water bodies during mining operations without justification and prior approval of MoEFCC. The monitoring of water courses/ bodies existing in lease area shall be carried out four times in a year viz. pre- monsoon (April May), monsoon (August), post-monsoon (November) and winter (January) and the record of monitored data may be sent regularly to Ministry of Environment, Forest and Climate Change and its Regional Office, Central Ground Water Authority and Regional Director, Central Ground Water Board, State Pollution Control Board and Central Pollution Control Board. Clearly showing the trend analysis on six-monthly basis.
Noise and vibration monitoring and prevention	
1.	The Project Proponent shall take measures for control of noise levels below 85 dBA in the work environment. The workers engaged in operations of HEMM, etc. should be provided with ear plugs /muffs. All personnel including laborers working in dusty areas shall be provided with protective respiratory devices along with adequate training, awareness and information on safety and health aspects. The PP shall be held responsible in case it has been found that workers/ personals/ laborers are working without personal protective equipment.
Noise monitoring and prevention	
1.	Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six-monthly compliance report.
Noise and vibration monitoring and prevention	
1.	The peak particle velocity at 500m distance or within the nearest habitation, whichever is closer shall be

	monitored periodically as per applicable DGMS guidelines.
Mining plan	
1.	The land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life shall be governed as per the approved Mining Plan. The excavation vis-à-vis backfilling in the mine lease area and corresponding afforestation to be raised in the reclaimed area shall be governed as per approved mining plan. PP shall ensure the monitoring and management of rehabilitated areas until the vegetation becomes self-sustaining. The compliance status shall be submitted half-yearly to the MoEFCC and its concerned Regional Office.
Mining plan	
1.	The Project Proponent shall adhere to approved mining plan, inter alia, including, total excavation (quantum of mineral, waste, over burden, inter burden and top soil etc.); mining technology; lease area; scope of working (method of mining, overburden & dump management, O.B& dump mining, mineral transportation mode, ultimate depth of mining, concurrent reclamation and reclamation at mine closure; land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life; etc.).
Waste management	
1.	Kitchen waste shall be composted or converted to biogas for further use.(to be decided on case to case basis depending on type and size of plant)
1.	The waste oil, grease and other hazardous waste shall be disposed of as per the Hazardous & Other waste (Management & Transboundary Movement) Rules, 2016.
Land reclamation	
1.	The slope of dumps shall be vegetated in scientific manner with suitable native species to maintain the slope stability, prevent erosion and surface run off. The selection of local species regulates local climatic parameters and help in adaptation of plant species to the microclimate. The gullies formed on slopes should be adequately taken care of as it impacts the overall stability of dumps. The dump mass should be consolidated with the help of dozer/ compactors thereby ensuring proper filling/ leveling of dump mass. In critical areas, use of geo textiles/ geo-membranes / clay liners / Bentonite etc. shall be undertaken for stabilization of the dump.
1.	The Overburden (O.B.), waste and topsoil generated during the mining operations shall be stacked at earmarked OB dump site(s) only and it should not be kept active for a long period of time. The physical parameters of the OB / waste dumps / topsoil dump like height, width and angle of slope shall be governed as per the approved Mining Plan and the guidelines/circulars issued by D.G.M.S. The topsoil shall be used for land reclamation and plantation.
Land reclamation	
1.	Check dams of appropriate size, gradient and length shall be constructed around mine pit and OB dumps to prevent storm run-off and sediment flow into adjoining water bodies. A safety margin of 50% shall be kept for designing of sump structures over and above peak rainfall (based on 50 years data) and maximum discharge in the mine and its adjoining area which shall also help in providing adequate retention time period thereby allowing proper settling of sediments/ silt material. The sedimentation pits/ sumps shall be constructed at the corners of the garland drains.
Green Belt and EMP	
1.	The project proponent shall prepare GHG emissions inventory for the plant and shall submit the programme for reduction of the same including carbon sequestration including plantation.
Transportation	

1.	No Transportation of the minerals shall be allowed in case of roads passing through villages/ habitations. In such cases, PP shall construct a 'bypass' road for the purpose of transportation of the minerals leaving an adequate gap (say at least 200 meters) so that the adverse impact of sound and dust along with chances of accidents could be mitigated. All costs resulting from widening and strengthening of existing public road network shall be borne by the PP in consultation with nodal State Govt. Department. Transportation of minerals through road movement in case of existing village/ rural roads shall be allowed in consultation with nodal State Govt. Department only after required strengthening such that the carrying capacity of roads is increased to handle the traffic load. The pollution due to transportation load on the environment will be effectively controlled and water sprinkling will also be done regularly. Vehicular emissions shall be kept under control and regularly monitored. Project should obtain Pollution Under Control (PUC) certificate for all the vehicles from authorized pollution testing centers. [If applicable in case of road transport].
Green Belt	
1.	The Project Proponent shall develop greenbelt in 7.5m wide safety zone all along the mine lease boundary as per the guidelines of CPCB in order to arrest pollution emanating from mining operations within the lease. The whole Green belt shall be developed within first 5 years starting from windward side of the active mining area. The development of greenbelt shall be governed as per the EC granted by the Ministry irrespective of the stipulation made in approved mine plan.
Public hearing and Human health issues	
1.	Occupational health surveillance of the workers shall be done on a regular basis and records maintained as per the Factories Act.
1.	The project proponent shall carry out heat stress analysis for the workmen who work in high temperature work zone and provide Personal Protection Equipment (PPE) as per the norms of Factory Act.
Public hearing and Human health issues	
1.	Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, creche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.
Corporate Environment Responsibility	
1.	Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the Six Monthly Compliance Report.
1.	The Project Proponent shall submit the time- bound action plan to the concerned regional office of the Ministry within 6 months from the date of issuance of environmental clearance for undertaking the activities committed during public consultation by the project proponent and as discussed by the EAC, in terms of the provisions of the MoEF&CC Office Memorandum No.22-65/2017-IA.III dated 30 September, 2020. The action plan shall be implemented within three years of commencement of the project.
Corporate Environment Responsibility	
1.	All the recommendations made in the Charter on Corporate Responsibility for Environment Protection (CREP) for the Mineral Beneficiation plants shall be implemented.
Corporate Environment Responsibility	
1.	Self-environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.

Miscellaneous	
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	Concealing factual data failure to comply with any or submission of false/ fabricated data and of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act, 1986.
1.	The above conditions will be enforced inter-alia, under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986 and the Public Liability Insurance Act, 1991 along with their amendments and rules made there under and also any other orders passed by the Hon'ble Supreme Court of India/High Court and any other Court of Law relating to the subject matter.
1.	The Ministry or any other competent authority may alter/modify the above conditions or stipulate any further condition in the interest of environment protection.
1.	The Project Authorities should inform to the Regional Office regarding date of financial closures and final approval of the project by the concerned authorities and the date of start of land development work.
Miscellaneous	
1.	44) The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	The project proponent shall abide by all the commitments and recommendations made in the EIA/EMP report, commitment made during Public Hearing and also that during their presentation to the Expert Appraisal Committee.
1.	Any appeal against this environmental clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.
1.	Any appeal against this environmental clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.
1.	The concerned Regional Office of the MoEF&CC shall randomly monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the MoEF&CC officer(s) by furnishing the requisite data / information / monitoring reports.
1.	The Project Proponent shall prepare digital map (land use & land cover) of the entire lease area once in five years purpose of monitoring land use pattern and submit a report to concerned Regional Office of the MoEF&CC.
1.	In pursuant to Ministrys O.M No 22-34/2018-IA.III dated 16.01.2020 to comply with the direction made by Honble Supreme Court on 8.01.2020 in W.P. (Civil) No 114/2014 in the matter Common Cause vs Union of India, the mining lease holder shall after ceasing mining operations, undertake regrassing the mining area and any other area which may have been disturbed due to other mining activities and restore the land to a condition which is fit for growth of fodder, flora, fauna etc.
Corporate Environment Responsibility (CER)	

1.	The Project Proponent shall submit the time- bound action plan to the concerned regional office of the Ministry within 6 months from the date of issuance of environmental clearance for undertaking the activities committed during public consultation by the project proponent and as discussed by the EAC, in terms of the provisions of the MoEF&CC Office Memorandum No.22-65/2017-IA.III dated 30 September, 2020. The action plan shall be implemented within three years of commencement of the project.
Miscellaneous	
1.	The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.
1.	The project proponent shall monitor the criteria pollutants level namely; PM10, S02, NOx (ambient levels as well as stack emissions) or critical sectoral parameters, indicated for the projects and display the same at a convenient location for disclosure to the public and put on the website of the company.
1.	The above conditions will be enforced inter-alia, under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986 and the Public Liability Insurance Act, 1991 along with their amendments and rules made there under and also any other orders passed by the Hon'ble Supreme Court of India/High Court and any other Court of Law relating to the subject matter.

3.6. Agenda Item No 6:

3.6.1. Details of the proposal

BHOGDOI RIVER DA-GAYAN GAON SAND MPA by **BHOBEN GOGOI** located at **JORHAT,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/500314/2024	SEAC/SEIAA.3923/2024	08/10/2024	Mining of minerals (1(a))

3.6.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :25/10/2024

Deliberations of SEAC 1 :

Due deliberations and discussions are held.

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized.

The Committee is of the opinion to urge the DFO for taking requisite steps to complete the preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} and place the same for appraisal and final approval by the competent authority.

It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the development of infrastructure in progress specially to strengthen the road network connectivity and other developmental works after the ravages of flood in the whole state which is a *sine qua non* for overall development and economic growth of the state while the impact on environment also require due diligence and consideration with proper safeguards. It is further appreciated that the important stakeholders like the Registered Qualified Person (RQP), Geologist from the Department of Geology and Mining, the Forest official, the official from the Water Resource Department are actively involved in the process for recommending mining in the area by way of consultation including site inspection before appraisal by the SEAC.

The Committee deem it appropriate to recommend the grant of EC by the SEIAA allowing extraction and harvesting of minor mineral for 1 (one) year, as recommended in the Mining Plan, with the quantity of quantity of **13,000 Cu M** of Sand in 1(one) year with an observation that the DFO, Jorhat shall submit the approved DSR from the competent authority for further consideration of the balance quantity of the project allowing mining by the Proponent within a period of 1 (one) year and that the area in question is reflected in the DSR. This is necessitated in view of the process of development works being undertaken by the NHIDCL, a Govt of India undertaking as has been communicated by the concerned competent authority.

Decision: Recommended for grant of EC for **1 (one)** year only for **13,000 Cu M** of Sand.

3.6.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 2.35Ha and mining area 1.76 Ha with a quantity of 13,000 Cu M of Sand in 1 (one) year subject to the terms and conditions laid down by SEAC and that the area in question is to be reflected in the DSR.

3.6.4. Recommendation of SEIAA

Approved

3.6.5. Details of Environment Conditions

3.6.5.1. Specific

General conditions by SEAC	
1.	This is also subject to the conditions that: (a) mining shall be confined and limited to the area falling within the GPS coordinates ; (b) the active bank of the river is not disturbed / damaged because of mining operation and transportation of mining materials ; (c) the Proponent shall extract / harvest the approved quantity of minerals indicated herein with maximum mining depth of up to 2 (two) meters only from the non-mined surface and (d) the DFO shall place the DSR for evaluation and appraisal by the SEAC for further approval by the SEIAA and on the basis of the approved DSR the proponent may come forward for the balance quantity remaining if found permissible for mining.

2.	This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan.
Specific Conditions by SEAC	
1.	Consent to Establish (CTE) and Consent to Operate (CTO) are to be obtained from the PCBA in terms of the guidelines circulated by the CPCB / MoEF & CC for non manual extraction which need to be adhered to by the concerned DFO.
2.	The Divisional Forest Officer shall ensure due vigilance in the mining area to avert any kind of irregularities / illegalities during the mining period.
3.	The DFO shall also ensure marking the boundary of the mining site on the ground fixing permanent concrete pillars, painted yellow with the Geo-coordinates depicted there in on the pillars / posts, following the GPS coordinates mentioned in the approved mining plan before allowing mining.
4.	ECR activities shall be carried out / undertaken by the Proponent and minimum 2% of the total project cost Rs 1.00 Lakh (One Lakh) only shall be earmarked for the purposes. Necessary drinking water facilities, toilets and provision for solar lights shall be made in the nearby village under due consultation of the DFO concerned. The DFO shall identify the activities adequately, prepare a budget for the purposes and get the same executed / implemented within 1st year of allowing mining in the area and shall upload the reports in PARIVESH portal which shall form part of the Half Yearly Compliance Report.
5.	Plantation activities shall be carried out / undertaken in any Educational institution or Govt lands involving local NGOs, School / College students and an amount of Rs 1.00 (One) Lakh shall be earmarked for the purposes. Efforts shall be made to selectively use the saplings of aesthetic, medicinal value, evergreen nature with the consultation of the DFO and label the plant species for the benefits of the villagers, common people and specially the school students.
6.	The recommended species of plants in the locality could be of species like Bakul (*Mimosups elengi*), Agor (*Aquillaria malaccensis*), Amlokhi (*Phyllanthus emblica*), Hilikha (*Terminalia chebula*), Asoca (*Saraca asoca*), Bael (*Aegle marmelos*), Bokphul *(Sesbania grandiflora*), Mohaneem (*Azedirachta indica*), Jamun (*Syzygium cuminii*), Kordoi (*Averrhoa carambola*), Arjun (*Terminalia arjuna*), Jack fruit (*Artocarpus integrifolia*), Ow Tenga (*Dillenia indica*), Thekera (*Garcinia spp*) etc etc.
7.	Compliance of the same shall duly be uploaded by the Proponent in the PARIVESH portal.

3.6.5.2. Standard

1(a)	**Mining of minerals**
Statutory compliance	
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
1.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.

1.	The project proponent shall obtain Consent to Establish / Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State Pollution Control Board/ Committee.
1.	This Environmental Clearance (EC) is subject to orders/ judgment of Honble Supreme Court of India, Honble High Court, Honble NGT and any other Court of Law, Common Cause Conditions as may be applicable.
Statutory compliance	
1.	The Project proponent complies with all the statutory requirements and judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India &Ors before commencing the mining operations.
1.	State Pollution Control Board/Committee shall be responsible for display of this EC letter at its Regional office, District Industries Centre and Collector's office/ Tehsildar's Office for 30 days.
1.	A copy of EC letter will be marked to concerned Panchayat / local NGO etc. if any, from whom suggestion / representation has been received while processing the proposal.
1.	The Project Proponent shall follow the mitigation measures provided in MoEFCC's Office Memorandum No. Z-11013/57/2014-IA.II (M), dated 29th October, 2014, titled "Impact of mining activities on Habitations-Issues related to the mining Projects wherein Habitations and villages are the part of mine lease areas or Habitations and villages are surrounded by the mine lease area."
1.	The Project Proponent shall inform the MoEF&CC for any change in ownership of the mining lease. In case there is any change in ownership or mining lease is transferred. PP needs to apply for transfer of EC as per provisions of the para 11 of EIA Notification, 2006 as amended from time to time.
1.	The State Government concerned shall ensure that mining operation shall not be commenced till the entire compensation levied, if any, for illegal mining paid by the Project Proponent through their respective Department of Mining & Geology in strict compliance of Judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India & Ors.
Air quality monitoring and preservation	
1.	Design the ventilation system for adequate air changes as per ACGIH document for all tunnels, motor houses, Oil Cellars.
1.	The project proponent shall submit monthly summary report of continuous stack emission and air quality monitoring and results of manual stack monitoring and manual monitoring of air quality /fugitive emissions to Regional Office of MoEF&CC, Zonal office of CPCB and Regional Office of SPCB along with six-monthly monitoring report.
1.	The project proponent use leak proof trucks/dumpers carrying ore and other raw materials and cover them with tarpaulin.
Air quality monitoring and preservation	
1.	Appropriate Air Pollution Control (APC) system shall be provided for all the dust generating points including fugitive dust from all vulnerable sources, so as to comply prescribed stack emission and fugitive emission standards.
Air quality monitoring and preservation	
1.	Effective safeguard measures for prevention of dust generation and subsequent suppression (like regular water sprinkling, metalled road construction etc.) shall be carried out in areas prone to air pollution wherein high levels of PM10 and PM2.5 are evident such as haul road, loading and unloading point and transfer points. The Fugitive

	dust emissions from all sources shall be regularly controlled by installation of required equipments/ machineries and preventive maintenance. Use of suitable water-soluble chemical dust suppressing agents may be explored for better effectiveness of dust control system. It shall be ensured that air pollution level conform to the standards prescribed by the MoEFCC/ Central Pollution Control Board.
Water quality monitoring and preservation	
1.	Project Proponent shall regularly monitor and maintain records w.r.t. ground water level and quality in and around the mine lease by establishing a network of existing wells as well as new piezo-meter installations during the mining operation in consultation with Central Ground Water Authority/ State Ground Water Department. The Report on changes in Ground water level and quality shall be submitted on six-monthly basis to the Regional Office of the Ministry, CGWA and State Groundwater Department / State Pollution Control Board.
Water quality monitoring and preservation	
1.	In case, immediate mining scheme envisages intersection of ground water table, then Environmental Clearance shall become operational only after receiving formal clearance from CGWA. In case, mining operation involves intersection of ground water table at a later stage, then PP shall ensure that prior approval from CGWA and MoEFCC is in place before such mining operations. The permission for intersection of ground water table shall essentially be based on detailed hydro-geological study of the area.
1.	The Project Proponent shall undertake regular monitoring of natural water course/ water resources/ springs and perennial nallahs existing/ flowing in and around the mine lease including upstream and downstream. Sufficient number of gullies shall be provided at appropriate places within the lease for management of water. The parameters to be monitored shall include their water quality vis-à-vis suitability for usage as per CPCB criteria and flow rate. It shall be ensured that no obstruction and/ or alteration be made to water bodies during mining operations without justification and prior approval of MoEFCC. The monitoring of water courses/ bodies existing in lease area shall be carried out four times in a year viz. pre- monsoon (April May), monsoon (August), post-monsoon (November) and winter (January) and the record of monitored data may be sent regularly to Ministry of Environment, Forest and Climate Change and its Regional Office, Central Ground Water Authority and Regional Director, Central Ground Water Board, State Pollution Control Board and Central Pollution Control Board. Clearly showing the trend analysis on six-monthly basis.
Noise and vibration monitoring and prevention	
1.	The Project Proponent shall take measures for control of noise levels below 85 dBA in the work environment. The workers engaged in operations of HEMM, etc. should be provided with ear plugs /muffs. All personnel including laborers working in dusty areas shall be provided with protective respiratory devices along with adequate training, awareness and information on safety and health aspects. The PP shall be held responsible in case it has been found that workers/ personals/ laborers are working without personal protective equipment.
Noise monitoring and prevention	
1.	Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six-monthly compliance report.
Noise and vibration monitoring and prevention	
1.	The peak particle velocity at 500m distance or within the nearest habitation, whichever is closer shall be monitored periodically as per applicable DGMS guidelines.
Mining plan	
1.	The land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life shall be governed as per the approved Mining Plan. The excavation vis-à-vis backfilling in the mine lease area and corresponding afforestation to be raised in the reclaimed area shall be governed as per approved mining plan. PP shall ensure the monitoring and management of rehabilitated areas until the vegetation becomes self-sustaining. The compliance status shall be submitted half-yearly to the MoEFCC and its concerned Regional Office.

Mining plan	
1.	The Project Proponent shall adhere to approved mining plan, inter alia, including, total excavation (quantum of mineral, waste, over burden, inter burden and top soil etc.); mining technology; lease area; scope of working (method of mining, overburden & dump management, O.B& dump mining, mineral transportation mode, ultimate depth of mining, concurrent reclamation and reclamation at mine closure; land-use of the mine lease area at various stages of mining scheme as well as at the end-of-life; etc.).
Waste management	
1.	The waste oil, grease and other hazardous waste shall be disposed of as per the Hazardous & Other waste (Management & Transboundary Movement) Rules, 2016.
1.	Kitchen waste shall be composted or converted to biogas for further use.(to be decided on case to case basis depending on type and size of plant)
Land reclamation	
1.	The slope of dumps shall be vegetated in scientific manner with suitable native species to maintain the slope stability, prevent erosion and surface run off. The selection of local species regulates local climatic parameters and help in adaptation of plant species to the microclimate. The gullies formed on slopes should be adequately taken care of as it impacts the overall stability of dumps. The dump mass should be consolidated with the help of dozer/ compactors thereby ensuring proper filling/ leveling of dump mass. In critical areas, use of geo textiles/ geo-membranes / clay liners / Bentonite etc. shall be undertaken for stabilization of the dump.
1.	The Overburden (O.B.), waste and topsoil generated during the mining operations shall be stacked at earmarked OB dump site(s) only and it should not be kept active for a long period of time. The physical parameters of the OB / waste dumps / topsoil dump like height, width and angle of slope shall be governed as per the approved Mining Plan and the guidelines/circulars issued by D.G.M.S. The topsoil shall be used for land reclamation and plantation.
Land reclamation	
1.	Check dams of appropriate size, gradient and length shall be constructed around mine pit and OB dumps to prevent storm run-off and sediment flow into adjoining water bodies. A safety margin of 50% shall be kept for designing of sump structures over and above peak rainfall (based on 50 years data) and maximum discharge in the mine and its adjoining area which shall also help in providing adequate retention time period thereby allowing proper settling of sediments/ silt material. The sedimentation pits/ sumps shall be constructed at the corners of the garland drains.
Green Belt and EMP	
1.	The project proponent shall prepare GHG emissions inventory for the plant and shall submit the programme for reduction of the same including carbon sequestration including plantation.
Transportation	
1.	No Transportation of the minerals shall be allowed in case of roads passing through villages/ habitations. In such cases, PP shall construct a ‘bypass’ road for the purpose of transportation of the minerals leaving an adequate gap (say at least 200 meters) so that the adverse impact of sound and dust along with chances of accidents could be mitigated. All costs resulting from widening and strengthening of existing public road network shall be borne by the PP in consultation with nodal State Govt. Department. Transportation of minerals through road movement in case of existing village/ rural roads shall be allowed in consultation with nodal State Govt. Department only after required strengthening such that the carrying capacity of roads is increased to handle the traffic load. The pollution due to transportation load on the environment will be effectively controlled and water sprinkling will also be done regularly. Vehicular emissions shall be kept under control and regularly monitored. Project should obtain Pollution Under Control (PUC) certificate for all the vehicles from authorized pollution testing centers. [If applicable in case of road transport].

Green Belt	
1.	The Project Proponent shall develop greenbelt in 7.5m wide safety zone all along the mine lease boundary as per the guidelines of CPCB in order to arrest pollution emanating from mining operations within the lease. The whole Green belt shall be developed within first 5 years starting from windward side of the active mining area. The development of greenbelt shall be governed as per the EC granted by the Ministry irrespective of the stipulation made in approved mine plan.
Public hearing and Human health issues	
1.	The project proponent shall carry out heat stress analysis for the workmen who work in high temperature work zone and provide Personal Protection Equipment (PPE) as per the norms of Factory Act.
1.	Occupational health surveillance of the workers shall be done on a regular basis and records maintained as per the Factories Act.
Public hearing and Human health issues	
1.	Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, creche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.
Corporate Environment Responsibility	
1.	Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the Six Monthly Compliance Report.
1.	The Project Proponent shall submit the time- bound action plan to the concerned regional office of the Ministry within 6 months from the date of issuance of environmental clearance for undertaking the activities committed during public consultation by the project proponent and as discussed by the EAC, in terms of the provisions of the MoEF&CC Office Memorandum No.22-65/2017-IA.III dated 30 September, 2020. The action plan shall be implemented within three years of commencement of the project.
Corporate Environment Responsibility	
1.	All the recommendations made in the Charter on Corporate Responsibility for Environment Protection (CREP) for the Mineral Beneficiation plants shall be implemented.
Corporate Environment Responsibility	
1.	Self-environmental audit shall be conducted annually. Every three years third party environmental audit shall be carried out.
Miscellaneous	
1.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
1.	Concealing factual data failure to comply with any or submission of false/ fabricated data and of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act, 1986.
1.	The Project Authorities should inform to the Regional Office regarding date of financial closures and final approval of the project by the concerned authorities and the date of start of land development work.

1.	The Ministry or any other competent authority may alter/modify the above conditions or stipulate any further condition in the interest of environment protection.
1.	The above conditions will be enforced inter-alia, under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986 and the Public Liability Insurance Act, 1991 along with their amendments and rules made there under and also any other orders passed by the Hon'ble Supreme Court of India/High Court and any other Court of Law relating to the subject matter.
Miscellaneous	
1.	44) The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
1.	The project proponent shall abide by all the commitments and recommendations made in the EIA/EMP report, commitment made during Public Hearing and also that during their presentation to the Expert Appraisal Committee.
1.	Any appeal against this environmental clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.
1.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
1.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
1.	In pursuant to Ministrys O.M No 22-34/2018-IA.III dated 16.01.2020 to comply with the direction made by Honble Supreme Court on 8.01.2020 in W.P. (Civil) No 114/2014 in the matter Common Cause vs Union of India, the mining lease holder shall after ceasing mining operations, undertake regrassing the mining area and any other area which may have been disturbed due to other mining activities and restore the land to a condition which is fit for growth of fodder, flora, fauna etc.
1.	The Project Proponent shall prepare digital map (land use & land cover) of the entire lease area once in five years purpose of monitoring land use pattern and submit a report to concerned Regional Office of the MoEF&CC.
1.	The concerned Regional Office of the MoEF&CC shall randomly monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the MoEF&CC officer(s) by furnishing the requisite data / information / monitoring reports.
1.	Any appeal against this environmental clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.
Corporate Environment Responsibility (CER)	
1.	The Project Proponent shall submit the time- bound action plan to the concerned regional office of the Ministry within 6 months from the date of issuance of environmental clearance for undertaking the activities committed during public consultation by the project proponent and as discussed by the EAC, in terms of the provisions of the MoEF&CC Office Memorandum No.22-65/2017-IA.III dated 30 September, 2020. The action plan shall be implemented within three years of commencement of the project.
Miscellaneous	
1.	The project proponent shall monitor the criteria pollutants level namely; PM10, S02, NOx (ambient levels as well as stack emissions) or critical sectoral parameters, indicated for the projects and display the same at a convenient location for disclosure to the public and put on the website of the company.

1.	The above conditions will be enforced inter-alia, under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986 and the Public Liability Insurance Act, 1991 along with their amendments and rules made there under and also any other orders passed by the Hon'ble Supreme Court of India/High Court and any other Court of Law relating to the subject matter.
1.	The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.

3.7. Agenda Item No 7:

3.7.1. Details of the proposal

JHANJI RIVER SELENG TEA BAGISA (LAWJAN) MPA by **BHOBEN GOGOI** located at **JORHAT,ASSAM**			
Proposal For		Fresh EC	
Proposal No	**File No**	**Submission Date**	**Activity (Schedule Item)**
SIA/AS/MIN/500317/2024	SEAC/SEIAA.3925/2024	09/10/2024	Mining of minerals (1(a))

3.7.2. Deliberations by the committee in previous meetings

Date of SEAC 1 :25/10/2024

Deliberations of SEAC 1 :

Due deliberations and discussions are held.

Necessary documents submitted in support of the proposal is placed before the Committee for examination and appraisal. The KML file of the proposed mining area is scrutinized.

The Committee is of the considered opinion to urge the DFO for taking requisite steps to complete the preparation of the District Survey Report (DSR) for the District in terms of the orders of the Hon'ble Apex Court, the Principal Bench of the NGT for the Sustainable Sand Mining or River Bed Mining and Mining of other Minor Minerals following the guidelines issued by the MoEF & CC in 2016 and 2020 {SSMMG' 2016 and EMGSM' 2020} and place the same for appraisal and final approval by the competent authority.

It is found expedient that the requirement of minor mineral in question is essential to meet up the demand for the development of infrastructure in progress specially to strengthen the road network connectivity which is a *sine qua non* for overall development and economic growth of the state while the impact on environment also require due diligence and consideration with proper safeguards. It is further appreciated that the important stakeholders like the Registered Qualified Person (RQP), Geologist from the Department of Geology and Mining, the Forest official, the official from the Water Resource Department are actively involved in the process for recommending mining in the area by way of consultation including site inspection before appraisal by the SEAC.

The Committee deem it appropriate to recommend the grant of EC by the SEIAA allowing extraction and harvesting of minor mineral for 6 (Six) months, as recommended in the mining plan, with the quantity of **6,000** Cu M of Sand with an observation that the DFO, Jorhat shall submit the approved DSR from the competent authority for further consideration of the balance quantity of the project allowing mining by the proponent within a period of 6 (Six) months and that the area in question is reflected in the DSR. This is necessitated in view of the process of development works being undertaken by the NHIDCL, a Govt of India undertaking as has been communicated by the concerned competent authority.

Decision: Recommended for grant of EC for **6 (Six) months** only for **6,000 Cu M** of Sand.

3.7.3. Deliberations by the SEIAA in current meetings

EC is approved for project area allotted 1.15Ha and mining area 0.86Ha with a quantity of 6,000 Cu M of Sand in 6 (Six) months subject to the terms and conditions laid down by SEAC and that the area in question is to be

reflected in the DSR.

3.7.4. Recommendation of SEIAA

Approved

3.7.5. Details of Environment Conditions

3.7.5.1. Specific

GENERAL CONDITIONS BY SEAC	
1.	This is subject to the conditions that the proponent shall have to strictly follow all terms and conditions laid down in the approved mining plan;
