3. That, this affidavit is being filed pursuant to the order dated 28.08.2025 of this Hon'ble Tribunal, wherein it was directed to file Report of the Odisha Remote Sensing Application Centre (ORSAC) and also deposit Rs.10,000/- with the Secretary, Bar Association, National Green Tribunal, Principal Bench, New Delhi.

4. That, it is humbly submitted that pursuant to the aforesaid order, Drone and DGPS Survey was conducted by the ORSAC around Nishchinta Hill in Nihalprasad Mouza under Gondia Tahasil in Dhenkanal district on 11.09.2025 and accordingly volume assessment report was submitted vide letter No.3823, dated 26.09.2025 by the ORSAC.

Copy of the letter No.3823, dated 26.09.2025 by the ORSAC is annexed herewith as **Annexure-B/10**.

5. That, it is further humbly submitted that pursuant to the kind order dated 28.08.2025 of this Hon'ble Tribunal, an amount of Rs.10,000/- has been deposited in favour of the the Secretary, Bar Association, National Green Tribunal, Principal Bench, New Delhi vide Demand Draft No.1095, dated 22.09.2025 which has also been communicated vide letter No.2257, dated 22.09.2025 by the Deputy Director of Mines (I/c), Talcher Circle, Talcher.

Copy of the letter No.2257, dated 22.09.2025 by the Deputy Director of Mines (I/c), Talcher Circle, Talcher along with Demand Draft is annexed herewith as **Annexure-C/10**.

VOLUME ASSESSMENT REPORT OF NISCHINTA HILL

Office of The Deputy Director Mines, Talcher Circle, Talcher, District – Angul, issued a letter to ORSAC vide Letter No. 2127/Mines, dated 04.09.2025, for volume assessment of minor mineral illegally excavated in and around Nischinta Hill in Nihal Prasad Mouza Under Gondia Tahasil of Dhenkanal District.

Drone Survey was carried out around Nischinta Hill on 11.09.2025 and 12.09.2025 by ORSAC empanelled Survey Agency M/s Areal Constructions & Geoindia Services in the presence of Revenue Inspector, Range Officer, ORSAC and Junior Mining Officer of Dhenkanal.

The area was surveyed using drone and DGPS to carry out a detailed volume assessment.

**Data & Methodology:**

Drone mapping, also known as aerial mapping or photogrammetry, is a method of creating accurate maps, models, and surveys using unmanned aerial vehicles (UAVs) equipped with cameras or sensors.

Ground Control Points (GCPs) were established to ensure precise horizontal and vertical positioning for accurate geospatial mapping. These GCPs were strategically placed and linked to a reference network to enhance the accuracy of drone imagery processing.

Data transfer & Backup- Download image and sensor data from the drone & back up data securely.

Data Processing & Analysis- Using Agisoft Metashape software data was processed with referenced to the GCP and generated True Ortho, DTM, DSM & Point Clouds.

**Methodology for Estimating Resource:**

The top most contour value of the lease area is 227mtr, & bottom RL of the lease area is 55 M RL. The fill volume has been calculated based on the actual material excavated from the lease area as of the date of the drone.

From Ortho Image it is marked that about 14 patches Excavated around Nischinta hills, volume was computed for these areas by taking undistrubed surface height from Digital Terrain Model using Global Mapper PRO software. The volume report of patches is given below:
