On behalf of Punjab Pollution Control Board

BEFORE THE HON'BLE NATIONAL GREEN TRIBUNAL, NEW DELHI

M.A. No. 87/2024

In

Original Application No. 327 of 2023

In the matter of Suo Moto Cognizance

In Re: News item Published in India Today dated 30.4.2023 titled "3 minors among 11 dead in Ludhiana Gas leak", Punjab Govt. announces 2 Lakh Ex-Gratia

Additional Reply / status report of Environmental Engineer, Regional Office-4, Ludhiana on behalf of Punjab Pollution Control Board in compliance to order dated 20.12.2024.

RESPECTFULLY SHOWETH

- 
- 1) That the above-mentioned case is pending before the Hon'ble National Green Tribunal. After consideration of the matter the Hon'ble National Green Tribunal was pleased to pass an order dated 20.12.2024 thereby directing the Punjab Pollution Control Board to give further information with regard to the Common Effluent Treatment Plant as clarified in the order. The relevant extract of order dated 20.12.2024 is reproduced below for kind perusal and reference.

"Pursuant to order dated 06.09.2024, a report has been filed by Punjab Pollution Control Board (hereinafter referred to as "PPCB"), but report is cursory and does not give entire information, namely,

whether all units are connected with Common Effluent Treatment Plant (hereinafter referred to as "CETP") and what is individual and collective discharge of these units in CETP and further whether after treatment, treated effluent is meeting prescribed standards or not.

Learned Counsel appearing for PPCB prays for and allowed two weeks' time to file a supplementary reply. It shall also provide a copy of agreement entered with service provider who is operating CETP in question."

- 2) That in compliance to order dated 20.12.2024, it is submitted that there are several tiny and small-scale electroplating and allied units operating in the State of Punjab. Earlier these tiny units had installed their individual captive treatment plants, but they do not have the skilled manpower to operate the captive treatment plants. In order to facilitate these small scale and tiny units for treatment of the effluent at the single point source, it was proposed to install a Common Effluent Treatment Plant in 2007. The CETP has been installed by the Punjab Small Industries and Export Corporation (PSIEC), a subsidiary of the Government of Punjab, Department of Industries and Commerce, Punjab at Plot No. D-260-61, Phase-VIII, Focal Point, Ludhiana for the treatment of trade effluent being generated by the electroplating and allied industries in the State of Punjab. The PSIEC has handed over the CETP to Special Purpose Vehicle (SPV) Ludhiana Effluent Treatment Society (LETS), for its operation and functioning. The LETS has further appointed M/s JBR Technologies Pvt. Ltd., Ludhiana as the operator of the CETP for electroplating units. A copy of agreement executed between the parties is enclosed as **Annexure-A**.

- 3) That the CETP is having consented capacity for treatment of 500 KLD of effluent of electroplating and allied industries and the operator is lifting effluent from around 1603 small & medium scale electroplating & allied industries of Punjab State. The CETP has been granted consent to operate under the Water (Prevention & Control of Pollution) Act, 1974 vide no. CTOW/Varied/LDH4/2024/24762829 dated 01/03/2024 upto 30/06/2027 for treatment of trade effluent @ 500 KLD. These facts have already been explained in the status report dated 06.09.2024 earlier filed by the Board. The status report earlier filed by the Board in compliance to order dated 06.09.2024 may kindly be read as part of reply to the contents of the present additional reply / status report.
- 4) That it is relevant to mention here that the Common Effluent Treatment Plant (CETP) operator currently has 1603 member units for the treatment of their trade effluent. It is a mandatory requirement for every small-scale industry to enter into a formal agreement with the CETP operator before commencing its operations. This agreement is pre-requisite for the tiny and small units for obtaining the Consent to Operate under the Water (Prevention and Control of Pollution) Act, 1974 from the Punjab Pollution Control Board (PPCB). The list of industries with their individual discharge agreement quantities in litres per month is enclosed as **Annexure-B**.
- 5) That the mechanism for the collection and transportation of effluent from individual industries to the premises of the CETP for treatment is briefly mentioned and described below:
- i. That the tiny and small electroplating units which are situated in scattered areas of Ludhiana and other Districts have been given the facility to get their trade effluent treated through a Common Effluent Treatment Plant situated at Ludhiana.

- ii. Due to scattered nature of the units, there is no dedicated conveyance system like sewer lines or pipelines for the discharge of trade effluent of tiny and small units engaged in the electroplating process, which directly leads to the premises of the Common Effluent Treatment Plant.
- iii. The units are thus required to collect and store their trade effluent in an underground collection tank(s) (which are lined with PVC or Acid proof tiles) installed within their premises. Once the tank reaches its 70-80% capacity, the individual unit places an order for the lifting of trade effluent with the CETP operator.
- iv. Upon receiving the request from the units, the CETP operator registers the order and dispatches a vehicle (equipped with GPS) fitted with a tanker for lifting of effluent.
- v. The effluent is then collected, and a receipt/manifest is issued to the concerned unit. The manifest details the quantity of effluent collected from the premises of the unit and bears a unique manifest number. The units are required to present this manifest during the PPCB inspection as proof of compliance (treatment and disposal of effluent).
- vi. To regulate and monitor the usage of water, the individual units are required to install water meters in their process areas. The units are required to record their daily water consumption, and the water meter readings are maintained in a register. The Punjab Pollution Control Board verify these records during

inspections to ensure proper fresh water usage and dispatch and lifting of effluent by the CETP.

- vii. Additionally, the CETP operator maintains comprehensive logs of all effluent collected from member units, which are regularly reviewed by PPCB officials.
- viii. The vehicles used by the CETP operator for the collection of trade effluent are fitted with GPS tracking systems to monitor the movement of the vehicle thereby ensuring transparency in effluent transportation.
- ix. After the trade effluent is lifted by the GPS fitted vehicle and is transported to the premises to the Common Effluent Treatment Plant, the unloading point in the CETP is also covered by the CCTV camera which is accessible to the office of Punjab Pollution Control Board.
- x. Thereafter, the trade effluent received by the CETP is treated by the CETP operator to achieve the parameter prescribed by the CPCB/MoEFCC.
- xi. The CETP has provided 55 vehicles for lifting of effluent from electroplating & allied industries and all the vehicles are fitted with GPS.
- xii. The treated water is being supplied to National Highway Authority of India (NHAI) for irrigation, Municipal Corporation Ludhiana (MCL), Construction Projects as well as Parks maintained by some large-scale industrial units such as M/s Vardhman Group and M/s Kay Jay Forging besides its own cooling

tower. The details of treated water i.e. RO permeate over the past six months is tabulated below.

Sr. No.	Month	Total Quantity of treated water i.e. RO permeate discharged by CETP Operator in kiloliters per day (KLD).
a)	July, 2024	331 KLD
b)	August, 2024	287 KLD
c)	September, 2024	325 KLD
d)	October, 2024	302 KLD
e)	November, 2024	288 KLD
f)	December, 2024	293 KLD

xiii. It is relevant to mention here that the CETP is based on physico-chemical treatment process followed by reverse osmosis and evaporator for treatment of effluent generated from electroplating units.

xiv. The CETP has provided Online Continuous Effluent Monitoring System (OCEMS) at the final outlet which is connected to the Board's server.

6) That in the above background of the case, the average collective discharge of effluent from these industries into the CETP over the past six months is tabulated below:

Sr. No.	Month	Total Quantity of effluent lifted by CETP Operator in kiloliters per day (KLD).
g)	July, 2024	446 KLD
h)	August, 2024	423 KLD
i)	September, 2024	420 KLD
j)	October, 2024	406 KLD
k)	November, 2024	399 KLD
l)	December, 2024	399 KLD

7) That the treated effluent discharged from the CETP as explained in paragraph 5 (xii) is being regularly tested by the Punjab Pollution Control Board every month. The effluent analysis results of the sampling conducted over the last 12 months are enclosed in tabulated form in **Annexure-C**. It is relevant to mention here that the analysis results are found to be within the prescribed standards.

8) That it is pertinent to mention here that the Central Pollution Control Board has also surveyed and inspected the Common Effluent Treatment Plant on surprise basis in the month of April 2024 on 24.04.2024. The CETP was found complying with stipulated norms, as per observations made by inspection team and analysis results of samples. A copy of the inspection report of the Central Pollution Control Board as conveyed vide letter dated 20.06.2024 is enclosed as **Annexure-D** for kind perusal.

9) That the additional reply / status report is hereby submitted in compliance to order dated 20.12.2024 for kind consideration of the Hon'ble Tribunal.

SUPPLEMENTAL AGREEMENT

This supplemental agreement is made on this 21<sup>st</sup> day of April, 2021 between Ludhiana Effluent Treatment Society, Registered Office at D-261-62, Phase VIII, Focal Point, Ludhiana (hereinafter called the Society/LETS/First Party) through Sh. S.P. Singh, Officer on Special Duty who is duly authorized by Director of Industries & Commerce-cum-Chairman, LETS vide letter No. DIC/Tech/T4/CETP-LETS/2021/2198-B dated 19.04.2021 which expression shall include its successors, executors, administrators and assigns of the ONE PART

And

M/s JBR Technologies Limited, registered office at 2680, Jain Colony, Moti Nagar, Ludhiana (Punjab) through Sh. Rajinder Singh, Managing Director (hereinafter called JBR/Second Party) which expression shall include its successors, executors, administrators and assigns of the SECOND PART

**NOW THIS SUPPLEMENTAL AGREEMENT IS WITNESSETH AS UNDER:-**

- (i) That as per the Detailed Project Report, the work of up-gradation of CETP with ZLD from 500 KLD to 800 KLD will be completed by the JBR (operator) within a period of four months i.e. by 20<sup>th</sup> August, 2021.
- (ii) That required consent to operate will be obtained by the JBR (operator) from Punjab Pollution Control Board in due course of time.
- (iii) That outlet parameters will be achieved by JBR as per the prescribed norms of PPCB and CPCB from time to time.
- (iv) That in lieu of the investment made by the JBR (operator) for up-gradation of the CETP, ZLD Plant, an extension for time period of seven years is hereby accorded from the date of expiry of the previous period of operation of the CETP. In this regard this Supplemental Agreement is executed between the Society/LETS and operator-M/s JBR Technologies Ltd., Ludhiana.
- (v) That no special increase in treatment charges are allowed in lieu of the investment made by the JBR (operator).
- (vi) That JBR (operator) shall be responsible to obtain all the mandatory and regulatory clearances from the concerned Departments.

ਧੰਨਾ ਬ ਪੰਜਾਬ PUNJAB

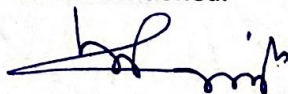

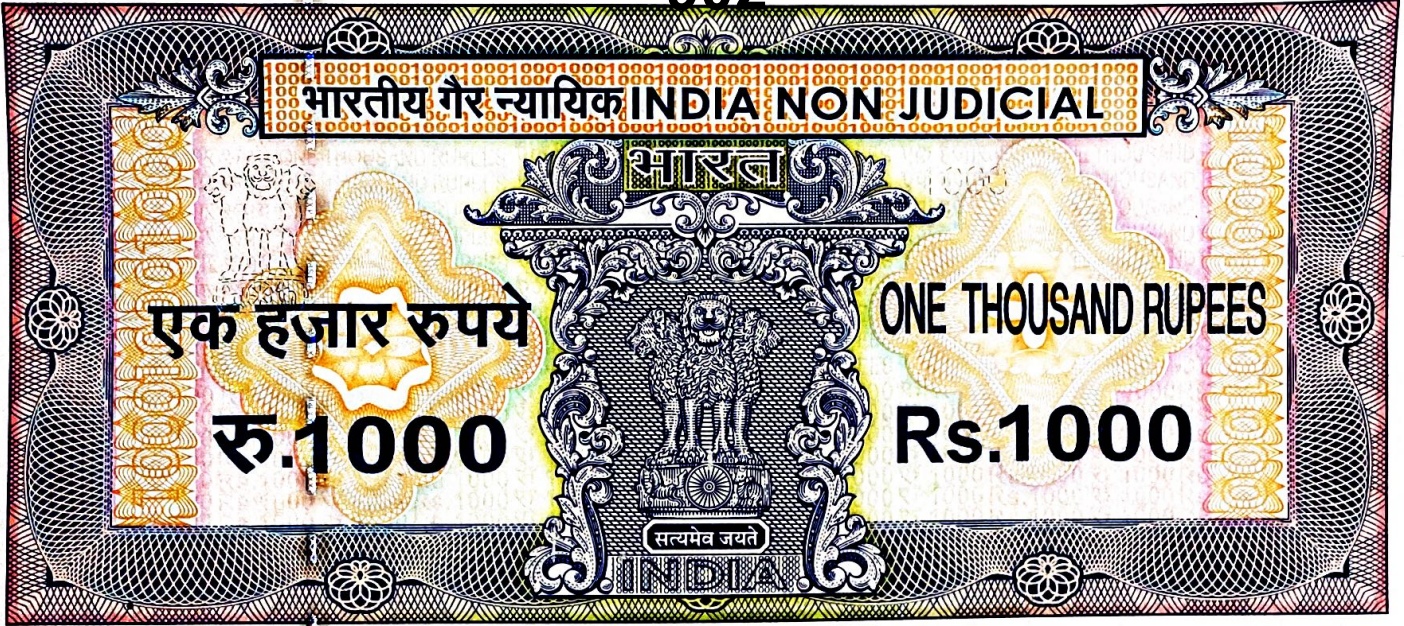

L 478618

- vii) That this Supplemental Agreement will become part of Tripartite Agreement dated 25.06.2007 and other previous agreements executed between LETS and JBR (operator).
- viii) That other terms and conditions of the Tripartite Agreement dated 25.06.2007 and other previous agreements shall remain unaltered and JBR will abide by them.
- ix) That in case of any violation of conditions of approval, accorded vide letter No. DIC/Tech/T4/CETP-LETS/2021/1499-A Dated 17.03.2021 for Up-gradation of treatment capacity of CETP with ZLD from 500 KLD to 800 KLD, the agreement will be cancelled by giving one month notice.

In witness whereof, both the parties hereto have executed this supplemental agreement on the date, month and year first above mentioned.

  
(Rajinder Singh)  
Managing Director  
JBR Technologies Ltd.

## Water Analysis Report

1. Laboratory Sample no.: E/ 359 /Zonal Lab/2023
2. Name of Industry : M/s JBR Technologies Ltd.,  
Phase 8, Focal Point, Ludhiana
3. Name of Sample Collecting Officer : Er. Bachanpal Singh, Assistant Environment Engineer
4. Type of Sample : Grab
5. Date of Sample Collection : 09.01.2024
6. Date of Receiving: 09.01.2024
7. Method Followed IS 3025/ methods of APHA

### Results:

Sr. No.	Parameters	Inlet	Outlet
1.	pH	<2	7.0
2.	Total Suspended Solids (mg/l)	112	BDL
3.	Total Dissolved Solids (mg/l)	13,515	1144
4.	Chemical Oxygen demand (mg/l)	-	20
5.	Oil & Grease (mg/l)	58	BDL
6.	Sulphates (mg/l)	1720	36
7.	Phosphate (mg/l)	8.0	BDL
8.	Ammonical Nitrogen (mg/l)	28	BDL
9.	Sulphides (mg/l)	BDL	BDL
10.	Nickel (mg/l)	54	BDL
11.	Total Chrome (mg/l)	56	BDL
12.	Hexa Chrome (mg/l)	12	BDL
13.	Zinc (mg/l)	211	BDL
14.	Lead (mg/l)	1.9	BDL
15.	Iron (mg/l)	951	BDL
16.	Cadmium (mg/l)	BDL	BDL
17.	Copper (mg/l)	3.3	BDL

### Remarks :-

1. BDL means Below Method Detection Limit.
2. No specific standards are prescribed as per EPA, However if any stringent/other standards have been imposed by the board, the same shall prevail.

Subject: Submission of Inspection Reports of CETPs Located at Ludhiana (Punjab)–Regarding

Sir,

This has reference to CPCB H.O Delhi Concerned E-office Note Communication dated 08/04/2024 & also in compliance of directions of the Central Monitoring Committee (CMC) regarding CPCB, RD Chandigarh was carried out inspection of CETPs in Ludhiana during April, 22-23,2024. Enclosed please find inspection reports of the following four Common Effluent Treatment Plants located at Ludhiana Punjab.

S.No	Name and Address of CETPs
1.	CETP 40 MLD Near Central Jail, Tajpur Road (Focal Point Module), Ludhiana District (Punjab).
2.	CETP 50 MLD, Near Central Jail, Tajpur Road (Focal Point Module), Ludhiana District (Punjab)
3.	CETP 15 MLD, Bahadur Ke Road, District Ludhiana (Punjab).
4.	CETP 500 KLD (for Electroplating industries), Plot D-260-261, Phase-VIII, Focal Point Ludhiana

This is for your kind perusal &amp; necessary action please

भवदीय,

  
(गुरनाम सिंह)  
क्षेत्रीय निदेशक

Encl: As above

**Central Pollution Control Board**  
**Regional Directorate,**  
**Chandigarh**

**Inspection Report of CETP of 500 KLD Capacity Plot No D-260-261, Phase-VIII, Focal Point, Ludhiana (Punjab)**

**Background**

The Common Effluent Treatment Plant (CETP) Ludhiana (hereafter referred as 'The CETP') is located at Plot No.D-260-261, Phase-VIII, Focal Point Ludhiana, Punjab. In pursuance of the communication received from NRCD and CPCB H.O Delhi concerned Division E-office note dated 08/04/2024 regarding CPCB, RD Chandigarh to conduct monitoring of CETPs in Ludhiana, in compliance of directions of the Central Monitoring Committee (CMC).

The CETP jointly inspected by officials of CPCB RD, Chandigarh along with PPCB concerned Regional Office, Ludhiana on April 23, 2024 to verify the compliance status w.r.t. prescribed effluent discharge standards.

The CETP is based on Physico-chemical treatment process followed by Reverse Osmosis and Evaporator vessels for treatment of effluent generated from electroplating / metal finishing industries and allied industries. The CETP was found in operation, on the day of visit. Team interacted with CETP operator that the CETP of designed capacity 500 KLD was operated by the M/s J.B.R Technologies Private Limited Ludhiana under control of SPV (M/s Ludhiana Effluent Treatment Society (LETS)).

The team had carried out inspection of different sections of the CETP and collected secondary information from the CETP operator. During inspection team had observed that the CETP is receiving the effluent without pre-treatment from the member units by tankers. The overall details covering observations & recommendations are mentioned in the ensuing sections:

1.	Name / address of CETP	CETP, (for Electroplating industries), Plot D-260-261, Phase-VIII, Focal Point Ludhiana, Punjab
2.	Year of establishment/commissioning of CETP	2007
3.	Area occupied by CETP (plot area)	5000 Sq. Yards approx
4.	Total no. of staff (including operational & skilled persons):	Total 18 staff (Skilled-05, Un-skilled and helpers-11) plus transportation staff for lifting and transportation of electroplating effluent.
5.	Contact person (Name, Designation, and Contact No., FAX, E-mail):	Sh.Pardeep Singh, Director Technical, +91-7837794144, <a href="mailto:directortechical@jbrtechnologies.org">directortechical@jbrtechnologies.org</a> .
6.	Status of CETP: operational or closed (if closed since when):	Operational
7.	Consents & Authorization: Status of Consents under Water &	The Water consent valid upto 30/06/2027 Air Consent valid upto 30.06.2028

*Tagar*

	Air Act The Status of Authorization under the Hazardous and Other wastes (Management, Transboundary & Movement) Rules, 2016 • Applied (date of application):	The authorization under the Hazardous and Other wastes (M T&M) Rules, 2016 valid upto 16/06/2021, However same was applied to PPCB Applied to PPCB on 22.04.2024 for renewal of Authorization.	
8.	Industrial area/estate (s) connected to CETP:	All over Punjab electroplating industries and allied Industries (Metal Surface Treatment) Except Mohali, Distt. Fatehgarh, Patiala, Khanna, Rupnagar.	
9.	Type of industries in the connected industrial areas:		
	<b>Industrial area/estate</b>	<b>Type of industries</b>	<b>Number of industries</b>
	All over Punjab electroplating industries and allied Industries (Metal Surface Treatment) except Mohali, Distt. Fatehgarh, Patiala, Khanna, Roopnagar.	Electroplating industries / Metal Surface Treatment	1613
	Total number of member industries of CETP:		1613
10.	Method of collection of effluent (pipeline/tanker): • If collection is by tankers, average no. of tankers/day: • Capacity of tankers, m <sup>3</sup> :	By Tankers (56 no's) different capacities About 100-110 Rounds of tankers. 1000, 1500, 2000, 4000, 9000, 20000, 25000 litres.	
11.	Details of flow meters (Type, location and operational status):	Electromagnetic flow meters were installed at out let of Tube settler R.O Feed, R.O permeate R.O reject	
12.	Installed treatment capacity (KLD)	500.0 KLD with ZLD system	
	Present treatment Capacity (KLD)	450-470 KLD with ZLD system	
13.	Wastewater if bypassed from CETP: • Flow/volume of wastewater bypassing treatment units in CETP:	Not observed	
14.	Treatment units and process flow diagram of CETP (Attach flow chart /description of process): Please see in observations		
15.	Details of chemicals used: As per log book records		
	<b>S.No.</b>	<b>Name of chemical</b>	<b>Quantity, kg/day</b>
	1	Lime	3200-3300 kg/day
	2	Sodium Metabisulphite	300-350 kg/day
	3	Polyelectrolyte	0.9-1.25 kg/day

16.	<p>Type of fuel used in boiler and quantity (TPA &amp; TPD): The CETP has installed a one Thermic Fluid Heater of 10000 Kcal/hr capacity for producing steam using wood as fuel. This steam is used in the evaporator vessels for concentrate the R.O reject.</p> <table border="1"> <thead> <tr> <th rowspan="2">Sl.</th> <th rowspan="2">Type of Fuel</th> <th colspan="3">Fuel Consumption (MT/Year)</th> </tr> <tr> <th>2020-21</th> <th>2021-22</th> <th>2022-23</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>Wood</td> <td>2070</td> <td>2220</td> <td>1934.9</td> </tr> </tbody> </table>				Sl. 		2020-21	2021-22	2022-23															
1	Wood	2070	2220	1934.9															
17.	<p>Details of stacks with APCDs: The CETP has installed one Thermopac of 1000 U capacity used wood @ 03 TPD for producing steam as fuel</p> <table border="1"> <thead> <tr> <th>Sl. No.</th> <th>Stack attached to</th> <th>Stack Height (m)</th> <th>Stack Diameter</th> <th>APCD</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>Thermopac of 1000 U capacity</td> <td>30m</td> <td>0.04m bottom and dia of top 0.03m</td> <td>Cyclone collector</td> </tr> <tr> <td>2</td> <td>DG set 125 KVA</td> <td>Adequate stack as per norms</td> <td></td> <td>Canopy</td> </tr> </tbody> </table> <p>Adequacy of the APCDs:</p>				Sl. No.	Stack attached to	Stack Height (m)	Stack Diameter	APCD	1	Thermopac of 1000 U capacity	30m	0.04m bottom and dia of top 0.03m	Cyclone collector	2	DG set 125 KVA	Adequate stack as per norms		Canopy
Sl. No.	Stack attached to	Stack Height (m)	Stack Diameter	APCD															
1	Thermopac of 1000 U capacity	30m	0.04m bottom and dia of top 0.03m	Cyclone collector															
2	DG set 125 KVA	Adequate stack as per norms		Canopy															
18.	Sludge Management:	<p>Quantity of sludge generation /day: 2-2.5 TPD (55 Ton/Month)</p> <p>Mode of sludge disposal: As reported, the Sludge is stored in temporary shed and sent to TSDf, Nimbua Derabbasi operated by M/s Re-sustainability Limited (Formerly known as Ramkay Enviro Engineers Limited) for final disposal</p> <p>Total sludge 738.875 MT lifted (1/04/2023 to 31/03/2024)</p>																	
19.	Conveyance system for disposal of treated wastewater: (Drains/ Pipeline)	<p>The treated water is supplied to National Highway 95, (New N.H. 05), Kay Jay Forging, Construction, D.C. Office Park .Vardhman Special Steels Ltd through tankers.</p>																	
20.	Method of treated wastewater disposal: (River/ Land/ Marine/ Others (Specify))	<p>As per consent the treated water is supplied to National Highway 95, (New N.H. 05), Kay Jay Forging, Construction, D.C. Office Park .Vardhman Special Steels Ltd through tankers.</p>																	

21.	Design / consented parameters and monitoring results : Please in Observations							
	Sl. No.	Inlet parameters	Standard	% of deviations	Outlet parameters	Standard	% of deviations	OCEMS value
22.	OCEMS Details: The CETP is achieving ZLD, hence only installed PTZ camera at final outlet of R.O							
	Status of installation at Inlet and Outlet				Not applicable			
	Parameters for which OCEMS is installed				Achieving ZLD norms, installed PTZ camera			
	Observed values during the visit				The CETP operator has installed 360° PTZ camera (make H.K.Vision,10x Zoom, Night vision IP camera 360°) Online data corresponding to last one month/day of inspection:			
	Availability of flow meters, connectivity & readings during visit:				Yes, installed, Electromagnetic flow meter final out let of it is connected to PPCB/CPCB server			
	Status of connectivity of OCEMS with CPCB & SPCB				Yes			
23.	Capital cost with break-up of sources of funds:			10 Crore. Upto 500 KLD (installation of new equipments for increase of capacity from 500KLD-800KLD is in progress. NOC from PPCB has been obtained which is valid upto 01.08.2024)				
24.	Operational Cost:			Rs. 1.28 including operation and transportation charges.				
25.	Cost sharing basis among member units:			Treatment cost Rs 0.80/Litr and Transportation cost 0.48 Rs/Litr to Rs 1.0/litr				
26.	Date of Inspection:			23/04/2024				

**Observations:**

1. The CETP is designed to treat 500 KLD of effluent however, it receives about 450 KLD effluents from the member units. At the time of visit, the CETP was found in operation.
2. The CETP effluent is carried by the dedicated takers from member units. The CETP has 56 No's vehicles for carrying effluent. These vehicles are equipped with GPS system for tracking Vehicles location.

*Tap*

3. The CETP operator reported that the CETP receives effluent without any pre-treatment from the member units.
4. The CETP is based on physico-chemical followed by filtration, two stage Reverse Osmosis (RO) followed by Evaporator. The CETP comprised of the following sub-units - Raw effluent collection Tank- (162.5m<sup>3</sup>) > Oil & Grease removal System > Equalization Tank (02 each 750 KL x 2) > Reaction Tank (04 No's, 26.3 m<sup>3</sup> x 2 + 18.64 m<sup>3</sup> x 1 + 35.65 m<sup>3</sup> x 1) (adding lime + Sodium metabisulfite + poly electrolyte) > Primary Tube Settler (6 No's, 20.62 m<sup>3</sup> x 5 + 15 m<sup>3</sup> x 1) > Secondary Tube Settler (6 No's, 12.83 m<sup>3</sup>) > Clarifier (235.5 m<sup>3</sup>) > Sand Filter > Activated Carbon Filter ( 1.58 m<sup>3</sup> x 1 + 1.727 m<sup>3</sup> x 2) > Anion Ion exchange Unit ( 5.46 m<sup>3</sup>) > Cation Ion Exchange Unit ( 5.46 m<sup>3</sup>) > Reverse Osmosis (500 m<sup>3</sup>/day) > Evaporator Vessels ( 04, each 7.84 m<sup>3</sup>) > Sludge Thickener > Dryer > Centrifuge > Sludge Drying Beds (04 No's).
5. The CETP operator has install 01 decanter , 01 paddle dryer and sludge drying beds for dewatering of the CETP Sludge
6. During visit, team had taken effluent sample from inlet and final outlet ( R.O outlet) of CETP to verify the prescribed stipulated norms. The sample analysis results of the same are presented below:

Parameters	Sampling Locations		Standards Lastly amended vide notification S.O. 4(E), dated 1/1/2016
	Inlet of CETP (D2)	Final outlet of CETP (D1)	
pH	7.6	8.0	6-9
TSS	609	10	100
TDS	3856	916	--
Chloride	1485	295	1000
Fluoride	3.7	0.3	2
Sulphate	489	35	1000
Sulphide	--	BDL	2
Phosphate as P	0.2	BDL	5
Ammonical Nitrogen	34	BDL	50
Nitrate-N	6.6	02	10
Phenol as ( C <sub>6</sub> H <sub>5</sub> OH)	--	BDL	1
Oil& Grease	--	BDL	10
BOD	623	05	30
COD	2110	20	250
Chromium-VI	0.1	BDL	0.1
Cadmium (Cd)	0.037	BDL	0.05
Chromium(T-Cr)	189.3	BDL	02
Copper (Cu)	14.89	BDL	03
Iron (Fe)	7975	0.036	03
Manganese (Mn)	55.65	BDL	02
Nickel (Ni)	182.8	BDL	3
Lead (Pb)	11.2	BDL	0.1
Zinc (Zn)	998	BDL	5

All values are in mg/l except pH

7. It is evident from the above analysis results that the CETP is complying with stipulated norms and achieving ZLD norms. During visit, team observed that no effluent is being discharged from the CETP premise.
8. As per consent, Treated water is used for cooling tower, plantation, gardening, watering to MC parks, DC office, NH-95, const. Work .
9. The CETP operator has maintained the records of the treated effluent taken by the users for gardening construction activities and industrial use and others. As reported, The CETP has made agreement with M/s Vardhman Special Steels Limited C-58, Focal point Phase-3, Ludhiana) 100 KLD treated water is taken through tankers it is used in cooling tower make up other use as per requirement.
10. New inlet of CETP Standards is not yet prescribed by Punjab Pollution Control Board.
11. The CETP operator has installed OCEMS (flow meter, IP camera make H.K Vision with PAN' PTZ , 10 x Zoom, or above focal length, with night vision IP camera 360°) at final outlet/ RO permeate, in compliance of CPCB directions and its connected to CPCB/PPCB portal.
12. The CETP has installed flow meters at RO Feed, RO Reject and Evaporators Vessels feed, Evaporator concentrate. A record of the same was maintained.
13. The CETP operator has not installed differential pressure gauge system at Cation-Anion and Carbon filter systems.
14. The CETP has installed Electromagnetic flow meter at RO Permeate (final outlet) however records of the same was maintained.
15. The CETP possesses valid consents upto 30/06/2027 under the Water Act, 1974 and the Air Act, 1984 valid up to 30/06/2028 whereas Authorization under the Hazardous and Other Wastes (Management & Transboundary Movement) Rules, 2016 from PPCB has been expired on 16/06/2021. As reported, the CETP operator has applied to PPCB on 01.10.2021 for renewal of the same.
16. The CETP has installed 05 KLD STP for treatment of the in house domestic waste water. The STP is comprised of Collection Tank > MBBR reactor > Tube Settler > treated water. As per consent, domestic treated water is used in house plantation.
17. The CETP operator has made separate rooms of (24 ft x 15 ft. 10 ft) size for storage of the CETP sludge also separate rooms for storage of dosing chemicals.
18. Over all housekeeping of the plant was found satisfactory.
19. The CETP has established an Environmental laboratory for analyzing consented parameters.

*T. G. G. G.*

**Recommendations:**

1. The CETP operator should obtain valid authorization under the Hazardous and Other Wastes (Management & Transboundary Movement) Rules, 2016 from PPCB.
2. The CETP operator shall ensure comply all terms and conditions of the consents issued by PPCB.
3. Punjab pollution Control Board should prescribe inlet standard for CETP in light of MoEF&CC notification under E (P) Act, Rules, 1986 vide dated 01/01/2016.
4. The CETP operator shall install pressure gauge device at filter system for monitoring the filtration/circulation to detect the inside scale build up / avoid clogging.

**Inspecting Team:**

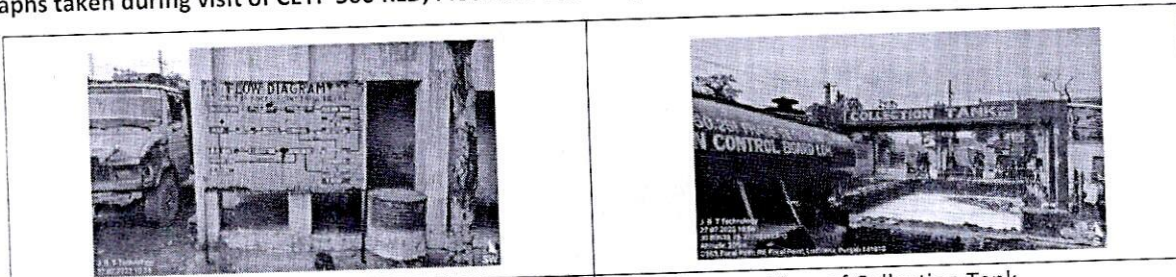

1. Sh. J. P. Meena, Scientist-'D' CPCB RD, Chandigarh *Jogdish*  
20/6/24
2. Sh. Bachanpal, AEE, PPCB -RO-IV, Ludhiana
3. Sh. Aakash Mishra, Sc-B, D'CPCB RD, Chandigarh *AK*  
20/06/24
4. Sh. Gokul Kanan, Scientist-'B' IPC-VI 'CPCB H.O. Delhi
5. Ms Chitrakshi SC-B, CPCB, H.O Delhi (IPC-VI)
6. Sh. Shahid Khan, SSA, CPCB RD, Chandigarh *Shahid Khan*  
20-6-24
7. Sh. Pankaj Saini, SA, CPCB RD, Chandigarh *Pankaj*  
20-06-24

**Concluding Remark /Action Suggested by Regional Director:**

The CETP is complying with stipulated norms, as per observations made by inspection team and analysis results of samples. The recommendations made by the inspection team may be communicated to PPCB and CETP Operator.

*Gurnam Singh*
