ORDER

1. In this original application, Tribunal is examining the issue of improper performance of Sewage Treatment Plants (STPs) installed by Delhi Jal Board (DJB) along the river Yamuna.
2. Central Pollution Control Board (CPCB) has filed the report dated 21.11.2024 disclosing the status of generation and utilization of sewage in Delhi as under:

“ a. Regarding treatment of entire sewage generated in Delhi

- *The estimated sewage generation in Delhi is 792 MGD. The current installed capacity of STPs in Delhi is 712 MGD whereas the actual utilisation of sewage treatment installed capacity is 604.18 MGD in Delhi.*
- *The installed capacity of STPs in Delhi is expected to be 814 MGD by December, 2024.*
- *18 Nos. of STPs having total capacity of 375.4 MGD are working on designed parameters of BOD (10mg/L) & TSS (10 mg/L).*
- *22 Nos. of STPs having total capacity of 497.16 MGD are being upgraded/new constructed on designed parameters of BOD (10mg/L) & TSS (10 mg/L). 375.4 MGD expected to be upgraded by December, 2024 and remaining STPs having capacity of 62.66 MGD is under proposal stage.*

- 40 Nos. of Decentralised STPs having capacity of 92 MGD are also proposed in catchment of Najafgarh drain.

b. Regarding treatment of entire sewage generated in Delhi

- The existing utilization of the treated sewage is 92.32 MGD. Currently, the treated sewage is used for the following purposes:

Horticulture & Irrigation = 81 MGD
 Power Production (cooling= 10 MGD
 towers)
 Others = 01 MGD

- Further, DJB has proposed action plan for the utilization of 114.5 MGD of treated sewage in the following purposes:
 Lake ~ 95.5 MGD
 Farm Houses ~ 15 MGD
 Others ~ 4 MGD”

3. We have simultaneously examined the reports filed on 05.08.2024 by CPCB disclosing the performance of 38 STPs and the action taken report filed by CPCB on 21.11.2024 and found the following deficiencies, which should be rectified expeditiously by DJB or the executing agency operating it and CPCB to clarify the following observations/ deficiencies:

- (i) Out of 38 monitored STPs, only two (Coronation Pillar New and Kondli- Phase-I) are complying with the standards of fecal coliform counts, hence, it needs to be considered why disinfection systems cannot be either upgraded or installed urgently.
- (ii) Some of the STPs are under-utilised (Coronation Pillar Phase I & II, Coronation Pillar Phase III, Coronation Pillar New, Ghitorni, Keshopur, Kondili Phase-IV, Najafgarh, Narela, Nilothi Phase-I, Pappan Kalan Phase-I, Rohni and Yamuna Vihar Phase-II and others are over utilized (Delhi Gate Phase-I, Delhi Gate Phase II, Kapashera, Kondli Phase-I, Mehrauli, Pappan Kalan

Phase-II and Yamuna Vihar Phase III) therefore CPCB should comment on how such STPs can function as per designed standards.

(iii) We find that treated waste water from STPs are discharged into drains which is about 2,483.98 MLD. Emphasis should be given to utilising treated waste water for non-contract purposes rather than discharging them into drains or river. An action regarding for utilization of treated water be provided.

4. DJB has also filed a very short status report dated 21.11.2024 stating that all the 38 STPs of DJB are functioning on the designed parameter.

5. The report of the DJB also does not disclose the analysis report of the treated effluents of STP in reference to the fecal coliform.

6. Hence, we direct CPCB and DJB to file further reports within two weeks keeping in view the observations made above. In the report they will also explain the reason for under utilization of STP.

7. List on 19.12.2024.
