

**BEFORE THE NATIONAL GREEN TRIBUNAL  
PRINCIPAL BENCH NEW DELHI**

**OA NO. 50/2023 (Jitender Singh Vs Union of India  
& Ors)**

**Action Taken Report in compliance with Hon'ble National Green Tribunal, Principal Bench, New Delhi order, dated 11.01.2024 in the matter of OA NO. 50/2023**

**Jitender Singh Vs Union of India & Ors**

Hon'ble NGT in this order dated 11.01.2024 in OA NO. 50/2023 (Jitender Singh Vs Union of India & Ors) *has passed the following directions:-*

*"1. In terms of the earlier directions, inspection report by the joint Committee dated 08.01.2024 has been filed stating that during the inspection brick kilns were not operating and seeking further time to file the fresh report. The stand of the Committee in this joint inspection report is as under:-*

***"8. Since, brick kilns' operation and their firing are weather dependent which went unusually non-suitable during the current season and therefore the most kilns are yet to start their operation. Given the other major air polluting industries operating in the region, the Committee considered it appropriate to let maximum brick kilns (out of 195) start functioning for fetching critical monitoring data to be used in arriving the carrying capacity of the region, which is greatly influenced by brick kilns operation during winter and for those months considered above.***

***9. It is humbly prayed to allow more time for filing the Committee report up to 31.03.2024."***

*2. In view of above, learned Counsel appearing for the HSPCB has prayed for time to file fresh report by submitting that in the fresh report, the Committee will also disclose the initial CTO issued to the unit and also the details of fresh CTO. Let the fresh report be filed by the joint Committee after carrying out the inspection when the brick kilns are operating.*

*3. Since, Respondent Nos. 5 to 142 are represented through the Counsel, therefore, Notice to the these private respondents is not necessary.*

*4. List this matter on 03.04.2024."*

**A. Status of Brick Kiln in District Hisar:-**

1. There are total 207 Brick Kilns operating across the jurisdiction of Hisar District as per record available with HSPCB. The Committee in its earlier report mention the total No. of Brick Kiln as 195. The discrepancy in number of brick kilns occurred inadvertently, and 207 is the actual updated figure.

The 12 brick kilns that were inadvertently left are highlighted in the **Table No. 01**.

2. In compliance with the earlier Order dated 03.02.2023 of the Hon'ble NGT, all the brick kilns have been inspected by the teams of CPCB & HSPCB, Hisar officers from March 2023 to February 2024, for compliance verification with regard to siting criteria, Zig-Zag technology, monitoring provisions, and type of fuel etc. The Status is as follows:-

A.	Units found complying as per provision, terms & condition of CTO	190
B.	Units found non-complying as per provision, terms & condition of CTO	6
C.	Unit found closed (on its own)	8
D.	Unit found dismantled	3

3. In compliance with the latest order, dated 11.01.2024 of the Hon'ble NGT, the status of 207 units is tabulated as **Table No. 01**, describing details about initial consent to operate, latest consent to operate, siting criteria, compliance of Zig-Zag technology, compliance with the standards including provisions for monitoring i.e. permanent facility (port hole and platform), utilization of ash generated, and type of fuel used.
4. Further, source emission monitoring of 51 units were conducted in the month of May 2023 & 49 units were conducted in the month of February 2024. The analytical results of Particulate Matters in stack emission are placed at **Table No.2**. The units were found to have complied the notified standard of 250 mg/Nm<sup>3</sup>.
5. The closure order has been issued against M/s Mor Bhatta Co.,Vill.-.- Dharam Kheri,Hisar which was found non-complying as operating without consent, using illegal fuel & not provided adequate sampling facility. An environment compensation of Rs. 4,12,500.00/- ( Rs. Four Lakh Twelve Thousand and Five Hundred only) has been levied & prosecution action initiated against the unit. Further, revocations of consent and closure action have been recommended against five units found with inadequate monitoring facility.

## B. Carrying Capacity Assessment of Hisar Ambient Air Environment :-

Based on the geographical location of brick kiln units in Hisar, the Committee had identified **five** clusters for ambient air quality assessment and selected **three** locations for monitoring in each cluster. The ambient Air quality monitoring was conducted for all **twelve** notified parameters as per National Ambient Air Quality Standards. It is to mention here that the source monitoring of brick kilns & Ambient Air quality monitoring at five clusters were carried out by a laboratory recognized under the Environment Protection Act, 1986, due to limited manpower and infrastructure with HSPCB. The result of 12 parameters namely Sulphur Dioxide, Nitrogen Dioxide, Particulate matter(PM<sub>10</sub>),Particulate matter(PM<sub>2.5</sub>), Ozone, Lead, Carbon Monoxide, Ammonia, Benzene, Benzo (a) Pyrene, Arsenic, Nickel are tabulated below.

In order to estimate the carrying capacity PM<sub>10</sub> is considered to be a critical parameter being the prime contributor in Air Quality Index and greatly emitted by those large numbers of brick kilns through uncontrolled mechanism. It is also recommended statistically to consider the most prevailing value by determining the 90 percentile when such data of Ambient Air Quality which are spatial in nature with regard to time and space and therefore used for assessment of carrying capacity of Air Environment. The Committee has also felt the need of estimating the carrying capacity considering the average value of PM<sub>10</sub> monitored through manual & continuous monitoring system.

*Handwritten signatures in blue ink.*

The 90 percentile value of PM<sub>10</sub> of ambient air of 05 clusters (each having 03 locations) is found to be 91.126 µg/m<sup>3</sup> while the average PM<sub>10</sub> concentration is 83.0 µg/m<sup>3</sup>.

Considering the CAAQMS Data the Average PM<sub>10</sub> Concentration is 103.78 µg/m<sup>3</sup>.

Thus, pollution load with regard to PM<sub>10</sub> concentration of manual monitoring stations taking into account most prevailing 90 percentile concentrations is 107071.683Kg while with average PM<sub>10</sub> concentration is estimated to be 97523.755 Kg.

Thus, pollution load with regard to PM<sub>10</sub> concentration of continuous monitoring stations taking into account average PM<sub>10</sub> concentration is estimated to be 121939.943 Kg.

The above estimates are based on the average mixing height is 0.295Km for winter season (2022), as referred in the order OA No. 1088 of 2018, as the recent data was not available with India Meteorological Department.

Maximum Air Mixing Height of Hisar District in Km	
November	0.323
December	0.292
January	0.269
February	0.297
Average for winter season	0.295

Total area of the Hisar district is taken as 3,983 Km<sup>2</sup>. (Reference : District Atlas of Haryana)

Basis	Pollution Load ( Kg of PM <sub>10</sub> )	Assimilative Capacity ( Kg of PM <sub>10</sub> )	Supportive Capacity ( Kg of PM <sub>10</sub> )
90 percentile of PM <sub>10</sub> concentration manual clusters	1,07,071.683	1,17,498.5	10,426.817
Average of PM <sub>10</sub> concentration manual clusters	97,523.755	1,17,498.5	19,974.745
Average of PM <sub>10</sub> concentration continuous monitoring system	1,21,939.943	1,17,498.5	<b>-4,441.443</b>

**C. Recommendations:-**

Given the above observations, the following recommendations are drawn:

**1.** Since, the carrying capacity of the region (Hisar District) is close to attaining saturation with respect to PM<sub>10</sub>, thus the Air Environment demands a moratorium to be in place on establishing any industry having potential to pollute the air.

**2.** HSPCB shall develop and establish a mechanism to regulate the operation of all air polluting industries especially those of large number of brick kilns through its consent mechanism to ensure that no further deterioration in air quality takes place. A system for limiting the number of brick kilns with regulated quantity of production is required to be properly worked out so that at any given time not more than determined number of Brick Kilns are allowed to operate. The SPCB is required to determine the number of the Brick Kilns which can be allowed to operate during the winter considering the report taken into account by the Hon'ble NGT in its order dated 10.03.2022 in OA No. 1088/2018 (Dinesh Chahal & Ors. vs Union of India & Ors.). Since the brick kiln operation is seasonal and lasting for about five months time therefore the SPCB may workout the number of Brick Kilns that can be allowed to operate for a given season.

It is pertinent to mention here that the carrying capacity estimate is near about saturation when only 100 Brick Kilns were found in operation out of 207.

**3.** Since, all the brick kilns monitored were found complying with the standards and the Particulate Matter concentration was well below the standards, it is therefore recommended that the HSPCB may review and notify itself the area specific standards under the Air Act, 1981 for better compliance and for improving air quality.

**4.** In order to have mitigation of pollution from the large number of brick kilns, it would be appropriately considered to direct the brick kilns to establish green belts in and around their operation. Therefore, the number of brick kilns that shall be allowed to be operated in the district Hisar is to be regulated so as to ensure healthy ambient air quality. Therefore, a policy mechanism has to be formulated by State Pollution Control Board to restrict the brick kiln operations as per the supportive carrying capacity.
