**AFFIDAVIT IN REPLY ON BEHALF OF RESPONDENT**

**NO 2**

I, Ajay Dinkar Suryawanshi aged 56 yrs adult having office at Pimpri Chinchwad Municipal Corporation, Mumbai Pune Road, Pimpri Pune-411018, the Authorized Representative for Respondent No 2 do hereby state and affirm as under.

1. I say that I am the Joint City Engineer, Water Supply Dept. in the Respondent no 2 Corporation and hence I am competent to swear this Affidavit in Reply. I hereby deny all the contents of the said Original Application, save to the

extent specifically admitted. Nothing herein may be deemed to be admitted for lack of a specific traverse.

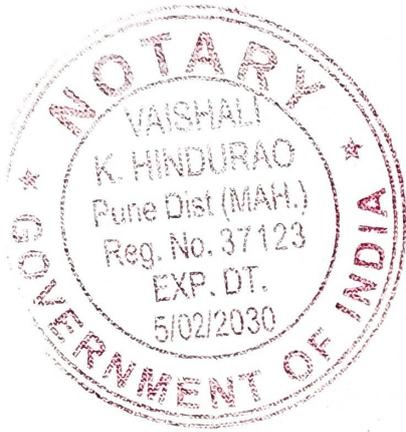

2. The Answering Respondent states that GBS Guillain-Barré Syndrome was reported in certain parts of the area within their jurisdiction, thereafter the Answering Respondent increased the testing and started to aggressively trace the origin. The Answering Respondent carries out periodic testing of the water samples and about 3,500 samples of water are tested per month, but during the time when there were reports of GBS i.e. during the month of February 2025 in the city the testing was increased to over 10,000 a month. A copy of the Test Reports are hereto Annexed and marked as Annexure R2-1 ( Colly).

3. From the test sampling it was revealed that the water that was supplied from the Answering Respondent was safe and potable and none of the samples showed any trace of bacteria. The Answering Respondent submits that the water which is supplied by them goes through thorough filtration process, the water which is sourced from dams such as Pavana and .. is used to supply water throughout the limits of the Answering Respondent. The water goes through various stages of purification such as, Physical, chemical and bacteriological stages of testing. In the physical stage the turbidity of the water is tested chemical stage, the PH of the water is tested and in the bacteriological stage the water is tested for bacteria.

4. The water that is supplied by the Answering Respondent goes through a 5 stage process 1. The water goes through pre-chlorination 2. Coagulants + Flocculants 3. Sedimentation 4. Filtration 5. Post Chlorination. Thus the water goes through a thorough filtration and cleaning process and does not have any scope of carrying bacteria which causes any diseases let alone GBS.
5. The Answering Respondent says and submits that none of the samples of the water supplies by them had any presence of any bacteria. The Answering Respondent states that water that are sourced from tankers etc by public of their own record, wherein the source of the water is not known and is probably stored in an unhygienic manner may be the cause of the disease and is no way attributable to the Answering Respondent.
6. Further the Answering Respondent also temporarily barred all private water suppliers who supply R.O. water from supplying water as a precautionary measure.
7. The Answering Respondent further states that as a precaution near the affected areas citizens were given filtration kits which were used to purify water before it was consumed. Further the outbreak was GBS was contained and no cases of GBS were reported after the 1<sup>st</sup> week of March 2025. Thus it is very well established that none of the samples that were tested within the Answering Respondent's jurisdiction were contaminated and further there were no

reports of any further cases since March 2025 and it is safe to say that it has been contained and thus there is no evidence to the contrary that the Answering Respondent's water was the source of the outbreak and thus the present Original Application deserves to be dismissed.
