Subject: Precautionary measures taken by us for slope protection in muck dumped areas

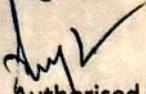

Dear Sir,

With reference to your letter no. PCB/ROS/Shivalik Buildtech/2022-1678 dated: 13/12/2022, we would like to inform you that we have already planted a good volume of bamboos at site and doing geocell and hydroseeding and most of the grass is visible photos are attached for your reference.

We are attaching site photographs for your immediate reference which shows Brest walls, retaining walls, gabion walls are In progress in muck dumping areas for slope protection. Walls are being made both mountain side as well as valley side.

We are making all efforts for slope protection. We further request you to kindly withdraw the letter stating the proposed action against us.

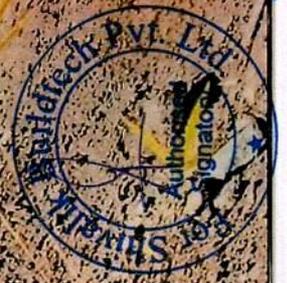

Regards

Project: Rehabilitation & Up-gradation to Intermediate -lane configuration of Gumma-Fediz Section (Km 94.900 to km 103.550) of NH-707 in the State of Himachal Pradesh under Green National Highway Corridor Project (GNHCP) with the loan assistance of World Bank on EPC mode.

Subject - Regarding damages between Gumma-Fediz section of NH-707

Dear Sir,

We have been awarded the aforesaid project by Ministry of Roads Transport & Highways, GoI and working between Gumma-Fediz since April 22, 2022.

Keeping in view the urgency of this project, we have tirelessly worked to deliver the project before time to the government. We had almost completed the project and were in process of handover to department. We were given a time of 18 months for completion of the project, but because of sense of responsibility towards convenience of road users, we made it possible to deliver the project within 15 months.

Due to the excessive heavy rainfall in the month of July 2023, we were hit by several landslides at various locations which caused damages to the newly constructed road. Attached with this letter, is the pictorial representation for better understanding of the road damages that have taken place during the period of heavy rainfall and the condition of road before the damages. Due to landslides in almost complete length of the road, big boulders along with muck in a very huge volume came down blocking the road completely and sliding into the valley side causing damage to road and the valley side area. Not only this the damage was so huge that our 150 mtr road was also washed away completely and around 200 mtr road was partially washed away due to incessant rainfall. We cleared all debris from the road and shifted the same to our crusher area and approved dumping zones. We have attached all pictures for your reference.

The purpose of this letter is for your information only.
