

Inspection Report
Original Application No.56/2022(WZ)

Date:01.08.2022

In compliance of the order dated 05.07.2022 passed by Hon'ble NGT Western Zone Bench, Pune in the matter Original Application No. 56/2022(WZ) Stolen Heaven Resorts Pvt Ltd Versus Central Pollution Control Board & Ors, undersigned along with Board Officials of Board have carried out the site visit on today dated 01/08/2022 of the M/s Venkateshwara Hatcheries Pvt. Ltd. (Respondent No.4 i.e. M/s Venky's India Ltd, Karla VH) ,Gat No.39, 43 and 45, Village- Karla, Tal-Maval, Dist-Pune to check the compliance of Environmental guidelines of Poultry Farms issued by CPCB in Jan-2022. I) **During the site visit following observations are made:-**

- A) The said Poultry Farm is established in 1988 over approximately 74 Acres land.
- B) Respondent No.4- Industry is engaged in Poultry Farming activity consists of Broilers (34 sheds) and Layer Farm (04 sheds) unit operations.
- C) PP has not obtained consent from the MPC Board for Poultry activity .
- D) Poultry Farm is having total 38 nos of sheds having cumulative capacity of 124000 nos of birds.
- E) At present there are about 70000 nos of birds in the poultry farm.
- F) The poultry farm is located away from
 - more than 500 mtrs away from nearest village Karla.
 - 250 mtrs away from nearest highway.
 - 10 to 20 mtrs away from river Indrayani.
- G) During visit the sheds near to Indrayani river were not found in operation.

II) Compliance of Environmental Guidelines for Poultry Farm-

1) Gaseous emission and Feed mill dust-

1.1 Minimization of odour/gaseous pollution-

- For minimization of gaseous emission of NH₃ and H₂S proper ventilation system has been provided.
- Litter/droppings is being not stored on site. In case of Broiler operation, the excreta left over the on land within shed is kept dry spreading of rice husk and carrying racking (mixing)operation on daily basis. The droppings/excreta is being transported and lifted by the manure user on

completion of poultry cycle. The Broiler cycle is completed within 40 to 45 days.

- In case of Layer farms, the left-over excreta/droppings below the cage is being kept as it is till the batch end & after completion of batch the excreta/droppings are lifted by contractor. The Layer batch is completed in 14-15 months.
- Carcasses/dead birds are being regularly buried in the concrete burial pit having depth of 5 feet (2 feet below GL and 3 feet above GL) with two openings to drop dead birds and same was kept closed.
- The abnormal / objectionable smell was not noticed during visit within poultry premises.

1.2 Dust from Feed Mill:-

PP is not having Feed Mill at site & ready poultry feed is being received at site.

III) Solid Waste Management-

A) Manure Handling and disposal: -

- Litter/Dropping/Manure is being not stored.
- Proper ventilation is being maintained for free flow of air, dissipate heat & prevent gases generation within poultry premise.
- In case of Broiler operation excreta is being kept dried by mixing of rice husk & carrying racking operation with special tools (mixing of rice husk & excreta).
- In case of Layer Farms, the left-over excreta/droppings below the cage is being kept as it is till the batch end & after completion of batch the excreta/droppings are lifted by contractor as a manure.
- The Litter/waste from Broiler Farm is being used as a composting as well as manure in agricultural feed by third party. The Litter Waste from Layer Farm is being used as manure by third party.
- Vaccination/ medication is done through drinking water.

B) Hatchery waste: -

No Hatchery activity is carried out.

2.3 Dead Birds disposal: -

- The dead birds are disposed through deep burial pit with anaerobic method having two openings with lids. Lime powder and Sodium Hypochlorite is also used in a burial pit.
- Burial pit is with concrete cover with two openings for day to day dropping of carcasses.

IV) Waste Water Management: -

Poultry cleaning activity is carried out after completion of batch and same is used for gardening in the premises.

V) Other issues: -

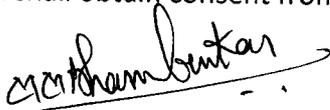

Control Flies:-

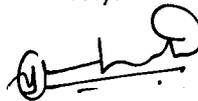

- PP is spraying cleaner solution (insecticide) in the poultry during development of birds.
- The Speedy powder is spread outside the shed and adjacent to feed to prevent flies.
- Actara spray is being spread on the Droppings of Layer Farm on 15 days interval. Also after completion of batch Actara spray is spread into the shed for fly and Rodents control.
- During visit no objectionable fly nuisance was noticed.
- Antibiotic growth promoter is not used in this poultry feed or the farm.

Suggestions: -

As there is objection from the nearby M/s Stolen Heaven Resorts Pvt Ltd regarding fly nuisance, you are directed to attain the same on priority and spray of insecticides and fly arrest chemical shall be increase to minimize the nuisance. The separate register shall be maintained for the same. Report the compliance on monthly basis . The layer farming shed shall be shifted from entry point to backside of plot and away from the complainant. The shed near the Indrayani river shall not be in operation in future /closed down.

You shall obtain consent from Board immediately.
