ANNEXURE 1
ANNUAL REPORT
(FORM IV)

**Form- IV
(Seerule13)**

ANNUAL REPORT

To be submitted to the prescribed authority on or before **30th June** every year for the period from January to December of the preceding year, by the occupier of healthcare facility (HCF) or common bio-medical waste treatment facility (CBMWTF)

S.No	Particulars	
	Particulars of the Occupier	:
	(i) Name of the authorised person (occupier or Operator of facility)	: MIOT HOSPITALS PRIVATE LIMITED MRS. MALLIKA MOHANDAS
	(ii) Name of HCF or CBMWTF	: MIOT HOSPITALS PRIVATE LIMITED
	(iii) Address for Correspondence	: 4/112 ,Mount Poonamalle Road, Manapakkam, Chennai -89
	(iv) Address of Facility	: 4/112 ,Mount Poonamalle Road, Manapakkam, Chennai -89
	(v) Tel. No, Fax. No	: (91)044-22492288 (91)044-22491188
	(vi) E-mail ID	: liaison@miotinternational.com
	(vii) URL of Website	: www.miotinternational.com
	(viii) GPS coordinates of HCF or CBMWTF	: HCF – Latitude: 13.021144 N Decimal Degrees Longitude: 80.185791 E Decimal Degrees
	(ix) Ownership of HCF or CBMWTF	: Private
	(x) Status of Authorisation under the Bio-Medical Waste (Management and Handling) Rules	: Authorization No 21BAC6708194 valid upto 31-3-2023.
	(xi) Status of Consents under Water Act and Air Act	: Valid up to 31/03/2025 (Active)
	Type of Health Care Facility	:
	(i) Bedded Hospital	: 920 Bedded Hospital
	(ii) Non-bedded hospital (Clinic or Blood Bank or Clinical Laboratory or Research Institute or Veterinary Hospital or any other)	:
	(iii) License number and its date of expiry	: Air and Water Act Consent order No: 2308149768696 valid up to 31-03-2025 and Hospital Registration No: 63/Z-12/2022-23 valid up to 19/03/2024
	Details of CBMWTF	: M/S GJ Multiclave Pvt Ltd
	(i) Number healthcare facilities covered by CBMWTF	: N/A
	(ii) No of beds covered by CBMWTF	: N/A
	(iii) Installed treatment and disposal capacity of CBMWTF:	: N/A

(iv)Quantity of biomedical waste treated or disposed By CBMWTF	:	N/A			
Quantity of waste generated or disposed in Kg per annum(on monthly average basis)	:	Yellow category : 4978kg			
	:	Red category : 5620kg			
	:	White :208kg			
	:	Blue : 619kg			
	:	General solid waste : 800kg			
(i) Details of the on-site storage facility	:	Size :700sqft			
	:	Capacity :2000kg/Day			
	:	Provision on on-site storage: (cold storage or any other provision)			
(ii) Details of the treatment or disposal facilities		Type of treatment equipment	No. of Units	Capacity Kg/day	Quantity treated or disposed in kg per annum
		Incinerators Plasma Pyrolysis Autoclaves Microwave Hydroclave Shredder Needle tip cutter or destroyer Sharps encapsulation or concrete pit Deep burial pits: Chemical disinfection: Any other treatment equipment:	-	-	N/A
			-	-	N/A
			-	-	N/A
(iii) Quantity of recyclable wastes Sold to authorize recyclers after treatment in kg per annum.	:	Red category (like plastic) 5620 KG Per Month			
(iv)No of vehicles used for collection and transportation of biomedical waste	:	1 (One)			
(v) Details of incineration ash and ETP sludge generated and disposed during the treatment of wastes in Kg per annum	:	incineration Quantity where Ash generated disposed: NA ETP Sludge: Disposed to Government facility - Nesapakkam			

(vi) Name of the Common Bio-Medical Waste Treatment Facility Operator through which wastes are disposed of	: G.J MULTICLAVE PRIVATE LIMITED
Do you have bio-medical waste Management committee? If yes, attach minutes of the meetings held during the reporting period	: YES, Attached Annexure 1A
Details trainings conducted on BMW	: Annexure 2 &2A
(i) Number of trainings conducted on BMW Management.	: List attached – Annexure -2
(ii) Number of personnel trained	: List attached – Annexure - 2
(iii) Number of personnel trained at The time of induction	: Yes Attached – Annexure -2
(iv) number of personnel not undergone any training so far	: NIL
(v) whether standard manual for Training is available?	: Yes Available – Annexure 2A
(vi) any other information)	NIL
Details of the accident occurred During the year	: List attached – Annexure -3
(i) Number of Accidents occurred	: Details enclosed
(ii) Number of the persons affected	: Details enclosed
(iii) Remedial Action taken (Please attach details if any)	: Details enclosed
(iv) Any Fatality occurred, details.	: Nil
Are you meeting the standards of air Pollution from the incinerator? How many times in last year could not meet the standards?	: YES
Details of Continuous online mission Monitoring systems installed	: N/A
Liquid waste generated and treatment methods in place. How many times you have not met the standards in a year?	: Standards have been followed as per the TNPCB norms
Is the disinfection method or Sterilization meeting the log 4 standards? How many times you have not met the standards in a year?	: Standards have been followed as per the TNPCB norms
Any other relevant information	: N/A

Certified that the above report is for the period from

JANUARY 2022 to DECEMBER 2022

HIC-BIOMEDICAL WASTE MANAGEMENT COMMITTEE MEETING

AGENDA & CIRCULAR

28th NOVEMBER 2022

- The Bio medical waste management committee meeting shall be held on 30-11-2022 (Wednesday) at 3.30 pm in main building Quality Department.
- All the committee members are requested to attend without fail.
- The Agenda of the meeting shall be as follows.

S. No	Item	Remarks/Responsibility
1.	Calling of meeting to order	Chair person
2.	Quorum confirmation	
3.	Minutes of the previous meeting	
4.	Approval of the minutes of previous meeting	
5.	Review of pending action	
6.	New matters <ul style="list-style-type: none"> • Renovation • Training • Vaccination. 	
7.	Any point from the floor	
8.	Closure of meeting	

Regards,

Dr.Preethii

HIC Chair person

	ISSUE DATE: 05/09/2019	DATE OF LAST AMD/REVIEW:20/01/2023

POLICY

All Biomedical waste shall be treated destroyed or disposed of as per the provisions of Bio Medical Waste (Management and Handling) Rule 2016 .It is a statutory requirement and compliance is must.

PURPOSE

To define and document the instructions and methodology of Waste Management Process with the aim to

- Ensure the compliance to Statutory Requirements
- Prevent Infection to staff, patient and attendants objective
- Safety of the Environment

RESPONSIBILITY FOR IMPLEMENTATION

- The responsibility for implementation of this policy is with the Chairperson HIC Committee, MIOT Hospitals Limited. He along with his committee members and Infection control team and nurse are responsible for educating and training all patient care staff at MIOT Hospitals Limited in proper hand hygiene procedures.
- All HODs of patient care services and support services are directly responsible for this policy and its associated procedures in their work areas.

PARAMETERS FOR QUALITY ASSURANCE

- Report on availability of the logistics for waste handling and management- Waste bins, waste segregation trolleys, disinfecting materials, separate covered wheeled barrows, non-chlorinated plastic bags for all bins, gloves, masks, caps, workers gloves, gum boots, pictorials, reading material etc. in all patient care areas. This is done on quarterly basis by HK manager and reported to the Chairperson HIC Committee, MIOT Hospitals Limited.
- Surprise checks for the awareness of the procedures amongst patient care staff. This is done on monthly basis by the members of HICC MIOT Hospitals Limited under its Chairperson.
- Following aspects are additionally monitored and reported:-
- Completion of mandatory training and periodic re-training on Waste Handling and management by all Doctors, Nurses, Paramedical staff, Technical Staff, Support staff, House-keeping staff and supervisory staff
- Monitor and record adherence to proper waste handling by ward or service
- Provide feedback to healthcare workers about their performance.

	HOSPITAL INFECTION CONTROL MANUAL	MIOT / HIC / SOP/25
	INFECTION CONTROL IN BIO MEDICAL WASTE	VERSION:02
	ISSUE DATE: 05/09/2019	DATE OF LAST AMD/REVIEW:20/01/2023

- This is done by the unit chief/ HOD/ Supervisor and reported to the Chairperson, HIC Committee, MIOT Hospitals Limited on monthly basis.
- Employees survey on awareness of the proper waste handling procedure. This activity is carried by the HIC Committee, MIOT Hospitals Limited under its Chairperson, on continuous basis and is reported on monthly basis to the M.S. MIOT Hospitals Limited. Please refer ANNEXURE-1 for the survey Performance.

❖ COMPONENTS OF BIOMEDICAL WASTE MANAGEMENT POLICY AT MIOT HOSPITALS LIMITED

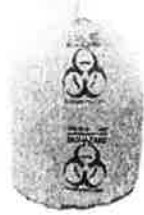

MIOT Hospitals Limited has been authorized by TNPCB for the management and handling of biomedical waste.

- Requisite fees and documents are submitted to outsource waste disposal company – G.J. Multiclave (India) Pvt. Ltd.
- Pre-induction training is imparted to appropriate categories of staff.
- In service training is imparted to all concerned staff once in a year.
- Appropriate pre and post exposure prophylaxis is provided to all concerned staff members.
- Proper segregation and collection of biomedical waste from all patient care areas of the hospital is implemented and monitored.
- MIOT Hospitals Limited ensures that biomedical waste is stored in a central facility every day in a secured manner and from there it is taken for disposal by– G.J. Multiclave (India) Pvt. Ltd.in covered vehicle.
- Appropriate personal protective measures are used by all categories of staff handling biomedical waste.
- Monthly report is sent to TNPCB and annual report is submitted to TNPCB on stipulated dates.

<p>Blue</p> 	<p>Puncture proof and leak proof boxed or containers with blue coloured marking</p>	<p>Glassware Broken or discarded and contaminated glass including medicine vials and ampoules except those contaminated with cytotoxic wastes Glass syrup bottles without liquid Microscope slides Metallic body implants Dental implants, other bodyimplants and plates.</p>	<p>Autoclaving/Microwaving/Hydroclaving and then sent for recycling NOTE; The residual chemical in glass bottle should be collected as chemical waste in yellow bag as yellow waste. Glass vials with positive controls (e.g. In Widal test kit) should be pre-treated and disposed as yellowwaste.</p>
--	---	---	---

Note :-

Biomedical rule does not specify any specific colour coded bag for general waste segregation in hospital. Depending up on local policy, hospitals choose any colour coded bag for general waste (for e.g. MIOT uses green bag for general waste)

Chemical treatment; Hypochlorite should be used at 1-2% concentration, having 30% residual chlorine for 20 minutes or any other equivalent chemical reagent that should demonstrate log₁₀ 4 reduction efficiency for microorganisms

In situ pre-treatment can be done as per WHO Blue book 2014, by non-chlorinated chemicals or autoclave etc.

Non chlorinated chemical disinfection include 5% phenol, 5% Lysol, 5% cresol, 70% Ethyl alcohol, lime milk, 3% Hydrogen peroxide or quaternary ammonium compounds.

CAUTION: Always use gloves while handling the above waste materials

Ref: <https://www.tnpcb.gov.in/bio-medical-waste-rules-2016>

Fig: Biomedical waste disposal poster

Specification of Waste Receptacle

- Plastic bags must be labeled with biohazard logos and should be non-inflammable, autoclave stable, and non-chlorinated with a thickness of $\leq 50\mu\text{m}$ ($70\mu\text{m}$, according to WHO)
- Containers should have well-fitting lids, either removable by hand or preferably foot operated pedal.
- Sharp box should be a puncture proof and leak proof and tamper proof impermeable container that is difficult to break or open after closure.

	HOSPITAL INFECTION CONTROL MANUAL	MIOT / HIC / SOP/25
	INFECTION CONTROL IN BIO MEDICAL WASTE	VERSION:02
	ISSUE DATE: 05/09/2019	DATE OF LAST AMD/REVIEW:20/01/2023

5.2.1 Onsite Collection and transport to central storage area

- ↓ Onsite transport should take place during less busy hours, whenever possible.
- ↓ Set routes should be used to prevent exposure to staff and patients and also to minimize the passage of loaded carts through patient care and other clean areas.
- ↓ Depending on the design of HCF, the internal transport of waste should use separated dedicated floors, stairways, or elevators as far as possible.
- ↓ **Dedicated trolley:** General and hazardous waste should always be transported by separate trolley, painted with appropriate colors (yellow, red and blue, etc.) and having biohazard logo.
- ↓ The use of **waste chutes** in HCF is not recommended, because they can increase the risk of transmitting airborne infections.
- ↓ **Routing:** Regular transport routes (from wards to area) and collection timings should be fixed.
- ↓ In general, a waste route should follow the principle "from clean to dirty".
- ↓ Collection should start from the most hygienically sensitive medical areas (e.g. Intensive care units, dialysis and theatres) and follow a fixed route around other medical areas and interim storage locations.
- ↓ **Interim storage** of BMW is strongly discouraged in the wards. If waste is needed to be stored in interim basis, it must be stored in the dirty utility area; not in patient care and procedure areas. In absence of dirty utility area, BMW must be stored in designated place away from patient and visitor traffic or low traffic area.
- ↓ The frequency of collection should be at least once in daily or more frequently if needed, ensuring no overflowing waste containers at any time.
- ↓ Should avoid transport through high traffic of patients and visitors.
- ↓ PPE: HCWs handling BMW during transport or in the storage area should wear appropriate personal protective equipment such as heavy duty gloves, face masks, gowns, and gum boots.
- ↓ Trolley should be washed, disinfected, and adequately dried up after each transportation cycle.

5.2.2 Central Storage Area

Central storage area is placed within a HCF, where different types of waste are brought for safe retention until it is treated or collected for transport to CBMWTF. The storage area should be appropriate to the volumes of waste generated from each HCF and should have the following properties;

- ↓ Have an impermeable, hard standing floor with good drainage

	HOSPITAL INFECTION CONTROL MANUAL	MIOT / HIC / SOP/25
	INFECTION CONTROL IN BIO MEDICAL WASTE	VERSION:02
	ISSUE DATE: 05/09/2019	DATE OF LAST AMD/REVIEW:20/01/2023

- ✚ Have facility to keep general waste separated from infectious and other hazardous waste
- ✚ Have facility such as water supply for cleaning purposes, easy access for waste collection vehicles, inaccessible to animals, insects, and birds
- ✚ Have good lighting and at least passive ventilation
- ✚ Not be situated near food areas
- ✚ Should be cleaned regularly.
- ✚ Have spillage containment equipment
- ✚ Should be labeled in accordance with the hazard level of the stored waste.

Storage Time

According to WHO's blue book, storage times for infectious waste (e.g. the time gap between generation and treatment) should not exceed the following periods:

Warm climate (India)

- ✚ 48 hours during the cool season
- ✚ 24 hours during the hot season. Temperature climate
- ✚ 72 hours in winter
- ✚ 48 hours in summer

Sharps can be stored without problems.

According to BMW 2016, India has recommended all segregated waste must be sent for final disposal within 48 hours of collection.

Transport to CBMWTF

Transport is carried out on daily basis. There is a uniformly maintained scheduled pick up time based on the convenience of the occupier, operator and traffic. A dedicated closed type transport vehicle is engaged for this purpose. The driver is trained on basic handling of BMW.

Treatment and disposal methods.

As per the mandate of the BMW rules 2016, only segregation (for all kinds of BMW) and pre-treatment (for few articles such as microbiology waste) is required at the HCF level. The final disposal and recycling must be performed at CBMWTF.

	HOSPITAL INFECTION CONTROL MANUAL	MIOT / HIC / SOP/25
	INFECTION CONTROL IN BIO MEDICAL WASTE	VERSION:02
	ISSUE DATE: 05/09/2019	DATE OF LAST AMD/REVIEW:20/01/2023

Metal Sharp Management

Metal sharps like blades, scalpels, needles and syringes with fixed needles are included under the white category of BMW rules 2016 and 2018 (Amendment)

The sharp containers should be handed over to the CBMWTF or sharps can be disposed of in sharp pits.

Glassware Management

All the glasses generated from the hospital including broken glasses, medicine vials, contaminated glass, ampules (except that of attenuated vaccines), are included under the blue category of BMW waste as per BMW rules, 2016 and 2018 (Amendment). The blue category also includes all the metallic body implants being used in the hospital.

- ✚ All the glassware needs to be collected and stored in puncture –proof and leak-proof boxes or containers with blue colored marking
- ✚ These boxes are handed over to the CBMWTF for final treatment and disposal.

Cytotoxic Drug Waste Management

Cytotoxic waste is highly hazardous and should never be landfilled or directly discharged into sewage system. Therefore, safe handling of cytotoxic drugs is of paramount importance. The various recommendations of safe handling include;

- ✚ **Cytotoxic committee** can be constituted separately or can be a part under BMWM committee to oversee the safe handling of cytotoxic drug.
- ✚ **Education and Training Program** should be conducted regularly to reinforce the staff on safe practices while handling cytotoxic drug.

PPE: Staff should wear appropriate PPE while handling of cytotoxic drug

- ✚ Gloves and gowns should be donned throughout the handling of drug
- ✚ Gloves should be nitrile or latex type, and should be powder free. Vinyl gloves should not be used.
- ✚ Gowns should be disposable; made of lint free, low –permeability fabric; should have long sleeves with tight fitting cuffs; and should be fastened in the back.
- ✚ Goggles, face protector, respirators, caps, shoe cover should be donned in the medication preparation room, packing and unpacking of delivery container or while handling a spillage
- ✚ Change the PPE if torn, punctured, or visibly contaminated with a cytotoxic drug or routinely at the middle of a shift.

	HOSPITAL INFECTION CONTROL MANUAL	MIOT / HIC / SOP/25
	INFECTION CONTROL IN BIO MEDICAL WASTE	VERSION:02
	ISSUE DATE: 05/09/2019	DATE OF LAST AMD/REVIEW:20/01/2023

- ✦ **Receiving and transport policies:** Workers should be adequately trained. Delivery containers should be taken immediately to the pharmacy up on receipt should be opened carefully by trained staff.
- ✦ **Cytotoxic Drug Preparation** must be carried out in class 2 type B biological safety cabinet with high efficiency particulate air (HEPA) filter. Room should have an exhaust fan and ventilation systems, emergency eye wash station, and limited furniture.
- ✦ **Drug Administration:** Safe administration techniques should be used to minimize possible exposure to individuals and the environment.
 - Appropriate PPE should be donned by HCWs.
 - Lue-lock connectors, safety engineered needles and needleless administration systems should be used to administer intravenous medications.
 - Disposable plastic backed absorbent pads should be used over work surfaces and must be placed under tubing or bag connections and ports attached to any tubing, bag, or syringe that has been exposed to a cytotoxic drug.
 - Discard the bag with its attached tubing into an appropriate waste container as a single unit.
 - Do not purge air from the needle before administration.
- ✦ **Collection:** Cytotoxic drugs should be collected in yellow bags which should be labelled with cytotoxic symbol.
- ✦ Appropriate disposal of cytotoxic waste disposal should be done (described below) **cytotoxic spill kit:** a spill management kit should be available in all areas of HCIs where cytotoxic drugs are stored, transported, handled, and administered.
- ✦ **Cytotoxic Waste Disposal Techniques:**

Return to the original supplier directly or through take-back program.

RADIOACTIVE WASTE MANAGEMENT

Disposal of radioactive waste in public domain is undertaken in accordance with the atomic energy (safe disposal of radioactive waste) rule of 1987; promulgated by the Indian Central Government Atomic Energy Act 1962)

ELECTRONIC WASTE MANAGEMENT

"E-waste" means electrical and electronic equipment, whole, or in part discarded as waste by the consumer. This also includes the rejects from manufacturing, refurbishment, and repair processes. Several reasons including rapid changes in technology, changes in media, introduction of cell phones, and falling prices have resulted in a fast-growing surplus of

	HOSPITAL INFECTION CONTROL MANUAL	MIOT / HIC / SOP/25
	INFECTION CONTROL IN BIO MEDICAL WASTE	VERSION:02
	ISSUE DATE: 05/09/2019	DATE OF LAST AMD/REVIEW:20/01/2023

electronic waste around the globe.

- ✦ Common examples of e-waste include computers, laptops, mobile phones, chargers, televisions, etc.
- ✦ Components of electrical and electronic equipment such as batteries, circuit boards, plastic castings, cathode-ray tubes, activated glass, and lead capacitors are also classified as e-waste.

Procedure for storage of e-waste

E-waste can be stored for a period not exceeding for than a year.

SOLID GENERAL WASTE MANAGEMENT:

Hospitals need to ensure that the solid general waste generated from the facility is handled as per the solid waste management rules, 2016. The solid general waste generated from the health facilities needs to be segregated into biodegradable and non-biodegradable waste (recyclable waste).

Biodegradable waste is defined as the waste of any organic natural that can be degraded by microorganisms into simpler stable compound for example: paper waste, food waste, kitchen waste, etc.

Non-biodegradable waste defined as the waste that cannot be degraded into the simpler stable compounds with use of microorganisms; such kind of waste is classified as recyclable waste, for example plastic bottles, aluminium cans, diapers.

	HOSPITAL INFECTION CONTROL MANUAL	MIOT / HIC / SOP/25
	INFECTION CONTROL IN BIO MEDICAL WASTE	VERSION:02
	ISSUE DATE: 05/09/2019	DATE OF LAST AMD/REVIEW:20/01/2023

General requirements for Management of Solid General Waste:

- ✦ Hospitals need to ensure that visitors and patients of the hospitals are educated on identification and proper segregation of the solid general waste.
- ✦ Posters indicating the classifications of the solid general waste should be displayed at the point of collection.
- ✦ Hospitals need to ensure that all the staffs is trained on proper segregation of the general solid waste.
- ✦ The solid waste generated from the health facility needs to be handed over to the municipal corporations.

LIQUID WASTE:

Hospital effluent (liquid waste) may contain large variety of potentially hazardous components including, microorganisms, radioactive isotopes, disinfectants, drugs and their metabolites, chemical components, heavy metals, and pharmaceuticals etc.

Pre-treatment: Therefore, liquid waste generated from hospital needs to be appropriately disinfected by the use of 1-2% hypochlorite solution with a minimum contact time of 30 minutes before discharging in to drain.

Effluent Treatment Plant:

The main objective ETP is to remove the suspended solids and organic matter before the waste water is discharged back to the environment or reuse for various hospital purposes)

MONITORING OF BIOMEDICAL WASTE MANAGEMENT:

Monitoring of BMW management practices is carried out through the following ways:

- ✦ Biomedical waste segregation audit by direct observation.
- ✦ Onsite inspection of BMW segregation at common storage area
- ✦ Barcoding based tracking of BMWM starting from segregation to disposal.

HIC - BIOMEDICAL WASTE MANAGEMENT AUDIT FORM

Dear Sir,

Greetings from MIOT INTERNATIONAL!

Sub:Submission of Form IV- Annual Report

We are herewith submitting the Bio Medical Waste Annual Report - Form IV for the year 2023. We have also enclosed the supporting documents as prescribed by the Tamil Nadu Pollution Control Board. We request you to kindly acknowledge the receipt of the submission of Annual Report.

Thank you

With Regards

ANNEXURE A
ANNUAL REPORT
(FORM IV)

**Form- IV
(Seerule13)**

ANNUAL REPORT

[To be submitted to the prescribed authority on or before 30th June every year for the period from January to December of the preceding year, by the occupier of healthcare facility (HCF) or common bio-medical waste treatment facility (CBWTF)]

S.No	Particulars	
1.	Particulars of the Occupier	:
	(i) Name of the authorised person (occupier or Operator of facility)	: MIOT HOSPITALS PRIVATE LIMITED MRS. MALLIKA MOHANDAS
	(ii) Name of HCF or CBMWTF	: MIOT HOSPITALS PRIVATE LIMITED
	(iii) Address for Correspondence	: 4/112 ,Mount Poonamalle Road, Manapakkam, Chennai -89
	(iv) Address of Facility	: 4/112 ,Mount Poonamalle Road, Manapakkam, Chennai -89
	(v) Tel. No, Fax. No	: (91)044-22492288 (91)044-22491188
	(vi) E-mail ID	: liaison@miotinternational.com
	(vii) URL of Website	: www.miotinternational.com
	(viii) GPS coordinates of HCF or CBMWTF	: HCF – Latitude: 13.02228 N Decimal Degrees Longitude: 80.18596 E Decimal Degrees
	(ix) Ownership of HCF or CBMWTF	: Private
	(x) Status of Authorisation under the Bio-Medical Waste(Management and Handling)Rules	: Authorization No 23BAC48242836 valid until 31-03-2025.
	(xi) Status of Consents under Water Act and Air Act	: Valid until 31/03/2025 (Active)
2.	Type of Health Care Facility	:
	(i) Bedded Hospital	: 920 Bedded Hospital
	(ii) Non-bedded hospital (Clinic or Blood Bank or Clinical Laboratory or Research Institute or Veterinary Hospital or any other)	:
	(iii) License number and its date of expiry	: Air Act Consent Order No: 2308249768698 and Water Act Consent Order No: 2308149768696 valid until 31-03-2025
3.	Details of CBMWTF	: M/S GJ Multiclave Pvt Ltd
	(i) Number healthcare facilities covered by CBMWTF	: 4300 No's. As per CBMWTF Authorisation No. 23BAZ51339033 Dated 03/05/2023
	(ii) No of beds covered by CBMWTF	: NA
	(iii) Installed treatment and disposal capacity of CBMWTF:	: 18800 Kg/ day As per CBMWTF Authorisation No. 23BAZ51339033 Dated 03/05/2023

	(iv)Quantity of biomedical waste treated or disposed By CBMWTF	: Available with CBMWTF												
4.	Quantity of waste generated or disposed in Kg per annum(on monthly average basis)	Yellow category : 5621kg Red category : 6753kg Sharp : 242kg Blue : 738kg General solid waste : 800kg												
5.	(i) Details of the on-site storage facility	Size :700sqft Capacity :2000kg/Day Provision on on-site storage: (cold storage or any other provision)												
	(ii) Details of the treatment or disposal facilities	<table border="1"> <thead> <tr> <th>Type of treatment equipment</th> <th>No. of Units</th> <th>Capacity Kg/day</th> <th>Quantity treated or disposed in kg per annum</th> </tr> </thead> <tbody> <tr> <td>Incinerators Plasma Pyrolysis Autoclaves Microwave Hydroclave Shredder Needle tip cutter or destroyer Sharps encapsulation or concrete pit Deep burial pits: Chemical disinfection:</td> <td>5</td> <td></td> <td>NA</td> </tr> <tr> <td>Any other treatment equipment:</td> <td></td> <td></td> <td>NA</td> </tr> </tbody> </table>	Type of treatment equipment	No. of Units	Capacity Kg/day	Quantity treated or disposed in kg per annum	Incinerators Plasma Pyrolysis Autoclaves Microwave Hydroclave Shredder Needle tip cutter or destroyer Sharps encapsulation or concrete pit Deep burial pits: Chemical disinfection:	5		NA	Any other treatment equipment:			NA
Type of treatment equipment	No. of Units	Capacity Kg/day	Quantity treated or disposed in kg per annum											
Incinerators Plasma Pyrolysis Autoclaves Microwave Hydroclave Shredder Needle tip cutter or destroyer Sharps encapsulation or concrete pit Deep burial pits: Chemical disinfection:	5		NA											
Any other treatment equipment:			NA											
	(iii) Quantity of recyclable wastes Sold to authorize recyclers after treatment in kg per annum.	: NA												
	(iv)No of vehicles used for collection and transportation of biomedical waste	1 (One). By Closed vehicle/ GPS attached												
	(v) Details of incineration ash and ETP sludge generated and disposed during the treatment of wastes in Kg per annum	Incineration Quantity where Ash generated disposed: NA ETP Sludge: Disposed to Government facility - Nesapakkam												

	(vi) Name of the Common Bio-Medical Waste Treatment Facility Operator through which wastes are disposed of	: G.J MULTICLAVE PRIVATE LIMITED
6	Do you have bio-medical waste Management committee? If yes, attach minutes of the meetings held during the reporting period	: YES, Attached Annexure A1
7	Details trainings conducted on BMW	: Annexure B
	(i) Number of trainings conducted on BMW Management.	: 58 Training Sessions. List attached in Annexure - B1
	(ii) Number of personnel trained	: 727 Personnel. List attached in Annexure - B2
	(iii) Number of personnel trained at The time of induction	: 290 personnel. List Attached in Annexure - B3
	(iv) number of personnel not undergone any training so far	: NIL
	(v) whether standard manual for Training is available?	: Yes Available - Annexure C
	(vi) any other information)	: NIL
8	Details of the accident occurred During the year	: List attached - Annexure -D
	(i) Number of Accidents occurred	: 28 Incidents. Attached details in Annexure -D
	(ii) Number of the persons affected	: NIL
	(iii) Remedial Action taken (Please attach details if any)	: Annexure -D
	(iv) Any Fatality occurred, details.	: No
9.	Are you meeting the standards of air Pollution from the incinerator? How many times in last year could not meet the standards?	: No Incinerator available at HCF
	Details of Continuous online mission Monitoring systems installed	: NA
10	Liquid waste generated and treatment methods in place. How many times you have not met the standards in a year?	: Nil and the standards have been followed as per the TNPCB norms
11	Is the disinfection method or Sterilization meeting the log 4 standards? How many times you have not met the standards in a year?	: Yes and the standards have been followed as per the TNPCB norms
12	Any other relevant information	: NA

Certified that the above report is for the period from

JANUARY 2023 to DECEMBER 2023

ANNEXURE C

STANDARD BMW MANUAL

	HOSPITAL INFECTION CONTROL MANUAL	MIOT / HIC / SOP/25
	INFECTION CONTROL IN BIO MEDICAL WASTE	VERSION:02
	ISSUE DATE: 05/09/2019	DATE OF LAST AMD/REVIEW:20/01/2024

❏ POLICY

All Biomedical waste shall be treated destroyed or disposed of as per the provisions of Bio Medical Waste (Management and Handling) Rule 2016 .It is a statutory requirement and compliance is must.

❏ PURPOSE

To define and document the instructions and methodology of Waste Management Process with the aim to

- Ensure the compliance to Statutory Requirements
- Prevent Infection to staff, patient and attendants objective
- Safety of the Environment

❏ RESPONSIBILITY FOR IMPLEMENTATION

- The responsibility for implementation of this policy is with the Chairperson HIC Committee, MIOT Hospitals Limited. He along with his committee members and Infection control team and nurse are responsible for educating and training all patient care staff at MIOT Hospitals Limited in proper hand hygiene procedures.
- All HODs of patient care services and support services are directly responsible for this policy and its associated procedures in their work areas.

❏ PARAMETERS FOR QUALITY ASSURANCE

- Report on availability of the logistics for waste handling and management- Waste bins, waste segregation trolleys, disinfecting materials, separate covered wheeled barrows, non-chlorinated plastic bags for all bins, gloves, masks, caps, workers gloves, gum boots, pictorials, reading material etc. in all patient care areas. This is done on quarterly basis by HK manager and reported to the Chairperson HIC Committee, MIOT Hospitals Limited.
- Surprise checks for the awareness of the procedures amongst patient care staff. This is done on monthly basis by the members of HICC MIOT Hospitals Limited under its Chairperson.
- Following aspects are additionally monitored and reported:-
- Completion of mandatory training and periodic re-training on Waste Handling and management by all Doctors, Nurses, Paramedical staff, Technical Staff, Support staff, House-keeping staff and supervisory staff
- Monitor and record adherence to proper waste handling by ward or service
- Provide feedback to healthcare workers about their performance.

	HOSPITAL INFECTION CONTROL MANUAL	MIOT / HIC / SOP/25
	INFECTION CONTROL IN BIO MEDICAL WASTE	VERSION:02
	ISSUE DATE: 05/09/2019	DATE OF LAST AMD/REVIEW:20/01/2024

- This is done by the unit chief/ HOD/ Supervisor and reported to the Chairperson, HIC Committee, MIOT Hospitals Limited on monthly basis.
- Employees survey on awareness of the proper waste handling procedure. This activity is carried by the HIC Committee, MIOT Hospitals Limited under its Chairperson, on continuous basis and is reported on monthly basis to the M.S. MIOT Hospitals Limited. Please refer ANNEXURE-1 for the survey Performance.

■ COMPONENTS OF BIOMEDICAL WASTE MANAGEMENT POLICY AT MIOT HOSPITALS LIMITED

MIOT Hospitals Limited has been authorized by TNPCB for the management and handling of biomedical waste.

- Requisite fees and documents are submitted to outsource waste disposal company – G.J. Multiclave (India) Pvt. Ltd.
- Pre-induction training is imparted to appropriate categories of staff.
- In service training is imparted to all concerned staff once in a year.
- Appropriate pre and post exposure prophylaxis is provided to all concerned staff members.
- Proper segregation and collection of biomedical waste from all patient care areas of the hospital is implemented and monitored.
- MIOT Hospitals Limited ensures that biomedical waste is stored in a central facility every day in a secured manner and from there it is taken for disposal by– G.J. Multiclave (India) Pvt. Ltd.in covered vehicle.
- Appropriate personal protective measures are used by all categories of staff handling biomedical waste.
- Monthly report is sent to TNPCB and annual report is submitted to TNPCB on stipulated dates.

	HOSPITAL INFECTION CONTROL MANUAL	MIOT / HIC / SOP/25
	INFECTION CONTROL IN BIO MEDICAL WASTE	VERSION:02
	ISSUE DATE: 05/09/2019	DATE OF LAST AMD/REVIEW:20/01/2024

<p>Blue</p> 	<p>Puncture proof and leak proof boxed or containers with blue coloured marking</p>	<p>Glassware Broken or discarded and contaminated glass including medicine vials and ampoules except those contaminated with cytotoxic wastes Glass syrup bottles without liquid Microscope slides Metallic body implants Dental implants, other bodyimplants and plates.</p>	<p>Autoclaving/Microwaving/Hydroclaving and then sent for recycling NOTE; The residual chemical in glass bottle should be collected as chemical waste in yellow bag as yellow waste. Glass vials with positive controls (e.g. In Widal test kit) should be pre-treated and disposed as yellowwaste.</p>
---	---	---	---

Note :-

Biomedical rule does not specify any specific colour coded bag for general waste segregation in hospital. Depending up on local policy, hospitals choose any colour coded bag for general waste (for e.g. MIOT uses green bag for general waste)

Chemical treatment; Hypochlorite should be used at 1-2% concentration, having 30% residual chlorine for 20 minutes or any other equivalent chemical reagent that should demonstrate log₁₀ 4 reduction efficiency for microorganisms

In situ pre-treatment can be done as per WHO Blue book 2014, by non-chlorinated chemicals or autoclave etc.

Non chlorinated chemical disinfection include 5% phenol, 5% Lysol, 5% cresol, 70% Ethyl alcohol, lime milk, 3% Hydrogen peroxide or quaternary ammonium compounds.

Fig: Biomedical waste disposal poster

Specification of Waste Receptacle

- ✦ Plastic bags must be labeled with biohazard logos and should be non-inflammable, autoclave stable, and non-chlorinated with a thickness of ≤50µm (70µm, according to WHO)
- ✦ Containers should have well-fitting lids, either removable by hand or preferably foot operated pedal.
- ✦ Sharp box should be a puncture proof and leak proof and tamper proof impermeable container that is difficult to break or open after closure.

	HOSPITAL INFECTION CONTROL MANUAL	MIOT / HIC / SOP/25
	INFECTION CONTROL IN BIO MEDICAL WASTE	VERSION:02
	ISSUE DATE: 05/09/2019	DATE OF LAST AMD/REVIEW:20/01/2024

Onsite Collection and transport to central storage area

- ✦ Onsite transport should take place during less busy hours, whenever possible.
- ✦ Set routes should be used to prevent exposure to staff and patients and also to minimize the passage of loaded carts through patient care and other clean areas.
- ✦ Depending on the design of HCF, the internal transport of waste should use separatededicated floors, stairways, or elevators as far as possible.
- ✦ **Dedicated trolley:** General and hazardous waste should always be transported by separate trolley, painted with appropriate colors (yellow, red and blue, etc.) andhaving biohazard logo.
- ✦ The use of **waste chutes** in HCF is not recommended, because they can increase therisk of transmitting airborne infections.
- ✦ **Routing:** Regular transport routes (from wards to area) and collection timings shouldbe fixed.
- ✦ In general, a waste route should follow the principle "from clean to dirty".
- ✦ Collection should start from the most hygienically sensitive medical areas (e.g. Intensive care units, dialysis and theatres) and follow a fixed route around othermedical areas and interim storage locations.
- ✦ **Interim storage** of BMW is strongly discouraged in the wards. If waste is needed to bestored in interim basis, it must be stored in the dirty utility area; not in patient care and procedure areas. In absence of dirty utility area, BMW must be stored in designated place away from patient and visitor traffic or low traffic area.
- ✦ The frequency of collection should be at least once in daily or more frequently ifneeded, ensuring no overflowing waste containers at any time.
- ✦ Should avoid transport through high traffic of patients and visitors.
- ✦ PPE: HCWs handling BMW during transport or in the storage area should wear appropriate personal productive equipment such as heavy duty gloves, face masks,gowns, and gum boots.
- ✦ Trolley should be washed, disinfected, and adequately dried up after eachtransportation cycle.

Central Storage Area

Central storage area is placed within a HCF , where different types of waste are brought for safe retention until it is treated or collected for transport to CBMWTF. The storage area should be appropriate to the volumes of waste generated from each HCF and should have thefollowing properties;

- ✦ Have an impermeable ,hard standing floor with good drainage

	HOSPITAL INFECTION CONTROL MANUAL	MIOT / HIC / SOP/25
	INFECTION CONTROL IN BIO MEDICAL WASTE	VERSION:02
	ISSUE DATE: 05/09/2019	DATE OF LAST AMD/REVIEW:20/01/2024

- ✦ Have facility to keep general waste separated from infectious and other hazardous waste
- ✦ Have facility such as water supply for cleaning purposes, easy access for waste collection vehicles, inaccessible to animals, insects, and birds
- ✦ Have good lighting and at least passive ventilation
- ✦ Not be situated near food areas
- ✦ Should be cleaned regularly.
- ✦ Have spillage containment equipment
- ✦ Should be labeled in accordance with the hazard level of the stored waste.

✦ Storage Time

According to WHO's blue book, storage times for infectious waste (e.g. the time gap between generation and treatment) should not exceed the following periods:

Warm climate (India)

- ✦ 48 hours during the cool season
- ✦ 24 hours during the hot season. Temperature climate
- ✦ 72 hours in winter
- ✦ 48 hours in summer

Sharps can be stored without problems.

According to BMW 2016, India has recommended all segregated waste must be sent for final disposal within 48 hours of collection.

✦ Transport to CBMWTF

Transport is carried out on daily basis. There is a uniformly maintained scheduled pick up time based on the convenience of the occupier, operator and traffic. A dedicated closed type transport vehicle is engaged for this purpose. The driver is trained on basic handling of BMW.

✦ Treatment and disposal methods.

As per the mandate of the BMWM rules 2016, only segregation (for all kinds of BMW) and pre-treatment (for few articles such as microbiology waste) is required at the HCF level. The final disposal and recycling must be performed at CBMWTF.

	HOSPITAL INFECTION CONTROL MANUAL	MIOT / HIC / SOP/25
	INFECTION CONTROL IN BIO MEDICAL WASTE	VERSION:02
	ISSUE DATE: 05/09/2019	DATE OF LAST AMD/REVIEW:20/01/2024

✦ Metal Sharp Management

Metal sharps like blades, scalpels, needles and syringes with fixed needles are included under the white category of BMW rules 2016 and 2018 (Amendment)

The sharp containers should be handed over to the CBMWTF or sharps can be disposed of in sharp pits.

✦ Glassware Management

All the glasses generated from the hospital including broken glasses, medicine vials, contaminated glass, ampules (except that of attenuated vaccines), are included under the blue category of BMW waste as per BMW rules, 2016 and 2018 (Amendment). The blue category also includes all the metallic body implants being used in the hospital.

✦ All the glassware needs to be collected and stored in puncture –proof and leak-proof boxes or containers with blue colored marking

✦ These boxes are handed over to the CBMWTF for final treatment and disposal.

✦ Cytotoxic Drug Waste Management

Cytotoxic waste is highly hazardous and should never be landfilled or directly discharged into sewage system. Therefore, safe handling of cytotoxic drugs is of paramount importance. The various recommendations of safe handling include;

✦ **Cytotoxic committee** can be constituted separately or can be a part under BMWM committee to oversee the safe handling of cytotoxic drug.

✦ **Education and Training Program** should be conducted regularly to reinforce the staff on safe practices while handling cytotoxic drug.

PPE: Staff should wear appropriate PPE while handling of cytotoxic drug

✦ Gloves and gowns should be donned throughout the handling of drug

✦ Gloves should be nitrile or latex type, and should be powder free. Vinyl gloves should not be used.

✦ Gowns should be disposable; made of lint free, low –permeability fabric; should have long sleeves with tight fitting cuffs; and should be fastened in the back.

✦ Goggles, face protector, respirators, caps, shoe cover should be donned in the medication preparation room, packing and unpacking of delivery container or while handling a spillage

✦ Change the PPE if torn, punctured, or visibly contaminated with a cytotoxic drug or routinely at the middle of a shift.

	HOSPITAL INFECTION CONTROL MANUAL	MIOT / HIC / SOP/25
	INFECTION CONTROL IN BIO MEDICAL WASTE	VERSION:02
	ISSUE DATE: 05/09/2019	DATE OF LAST AMD/REVIEW:20/01/2024

- ✦ **Receiving and transport policies:** Workers should be adequately trained. Delivery containers should be taken immediately to the pharmacy up on receipt should be opened carefully by trained staff.
- ✦ **Cytotoxic Drug Preparation** must be carried out in class 2 type B biological safety cabinet with high efficiency particulate air (HEPA) filter. Room should have an exhaust fan and ventilation systems, emergency eye wash station, and limited furniture.
- ✦ **Drug Administration:** Safe administration techniques should be used to minimize possible exposure to individuals and the environment.

- Appropriate PPE should be donned by HCWs.
- Luer-lock connectors, safety engineered needles and needleless administration systems should be used to administer intravenous medications.
- Disposable plastic backed absorbent pads should be used over work surfaces and must be placed under tubing or bag connections and ports attached to any tubing, bag, or syringe that has been exposed to a cytotoxic drug.
- Discard the bag with its attached tubing into an appropriate waste container as a single unit.
- Do not purge air from the needle before administration.

- ✦ **Collection:** Cytotoxic drugs should be collected in yellow bags which should be labelled with cytotoxic symbol.

- ✦ Appropriate disposal of cytotoxic waste disposal should be done (described below)
cytotoxic spill kit: a spill management kit should be available in all areas of HCIs where cytotoxic drugs are stored, transported, handled, and administered.

- ✦ **Cytotoxic Waste Disposal Techniques:**

Return to the original supplier directly or through take-back program.

☒ RADIOACTIVE WASTE MANAGEMENT

Disposal of radioactive waste in public domain is undertaken in accordance with the atomic energy (safe disposal of radioactive waste) rule of 1987; promulgated by the Indian Central Government Atomic Energy Act 1962)

☒ ELECTRONIC WASTE MANAGEMENT

"E-waste" means electrical and electronic equipment, whole, or in part discarded as waste by the consumer. This also includes the rejects from manufacturing, refurbishment, and repair processes. Several reasons including rapid changes in technology, changes in media, introduction of cell phones, and falling prices have resulted in a fast-growing surplus of

	HOSPITAL INFECTION CONTROL MANUAL	MIOT / HIC / SOP/25
	INFECTION CONTROL IN BIO MEDICAL WASTE	VERSION:02
	ISSUE DATE: 05/09/2019	DATE OF LAST AMD/REVIEW:20/01/2024

electronic waste around the globe.

- ✦ Common examples of e-waste include computers, laptops, mobile phones, chargers, televisions, etc.
- ✦ Components of electrical and electronic equipment such as batteries, circuit boards, plastic castings, cathode-ray tubes, activated glass, and lead capacitors are also classified as e-waste.

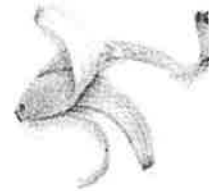

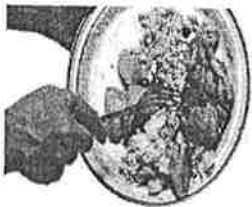

✦ Procedure for storage of e-waste

E-waste can be stored for a period not exceeding for than a year.

✦ SOLID GENERAL WASTE MANAGEMENT:

Hospitals need to ensure that the solid general waste generated from the facility is handled as per the solid waste management rules, 2016. The solid general waste generated from the health facilities needs to be segregated into biodegradable and non-biodegradable waste (recyclable waste).

Biodegradable waste is defined as the waste of any organic natural that can be degraded by microorganisms into simpler stable compound for example: paper waste, food waste, kitchen waste, etc.

Non-biodegradable waste defined as the waste that cannot be degraded into the simpler stable compounds with use of microorganisms; such kind of waste is classified as recyclable waste, for example plastic bottles, aluminum cans, diapers.

	HOSPITAL INFECTION CONTROL MANUAL	MIOT / HIC / SOP/25
	INFECTION CONTROL IN BIO MEDICAL WASTE	VERSION:02
	ISSUE DATE: 05/09/2019	DATE OF LAST AMD/REVIEW:20/01/2024

General requirements for Management of Solid General Waste:

- ✦ Hospitals need to ensure that visitors and patients of the hospitals are educated on identification and proper segregation of the solid general waste.
- ✦ Posters indicating the classifications of the solid general waste should be displayed at the point of collection.
- ✦ Hospitals need to ensure that all the staffs is trained on proper segregation of the general solid waste.
- ✦ The solid waste generated from the health facility needs to be handed over to the municipal corporations.

LIQUID WASTE:

Hospital effluent (liquid waste) may contain large variety of potentially hazardous components including, microorganisms, radioactive isotopes, disinfectants, drugs and their metabolites, chemical components, heavy metals, and pharmaceuticals etc.

Pre-treatment: Therefore, liquid waste generated from hospital needs to be appropriately disinfected by the use of 1-2% hypochlorite solution with a minimum contact time of 30 minutes before discharging in to drain.

Effluent Treatment Plant:

The main objective ETP is to remove the suspended solids and organic matter before the waste water is discharged back to the environment or reuse for various hospital purposes)

MONITORING OF BIOMEDICAL WASTE MANAGEMENT:

Monitoring of BMW management practices is carried out through the following ways:

- ✦ Biomedical waste segregation audit by direct observation.
- ✦ Onsite inspection of BMW segregation at common storage area
- ✦ Barcoding based tracking of BMW starting from segregation to disposal.

	HOSPITAL INFECTION CONTROL MANUAL	MIOT / HIC / SOP/25
	INFECTION CONTROL IN BIO MEDICAL WASTE	VERSION:02

HIC - BIOMEDICAL WASTE MANAGEMENT AUDIT FORM

Area:

Date:

S.No	Check Point	Yes / No	Corrective Action	Preventive Action
1.	Using PPEs while segregating the waste by staff			
2.	Adequacy of Waste Bins			
3.	Segregation as per color code of BMW			
4.	Sharps Disposal In Puncture Proof Container			
5.	Glass disposal in Blue lined puncture /leak proof container.			
6.	Plastic Disposal in red color covered bin			
7.	Stationary and Food waste Disposal in green color covered bin			
8.	Infections waste disposal in yellow color covered bin			
9.	Labeling the BMW while collecting from the particular area.			
10.	Soiled linen in separate yellow bag			
11.	Proper disposing of Cytotoxic and discarded medicine in Yellow color covered bin			
12.	Knowledge on segregation of BMW by staff and housekeeping			
13.	Knowledge of Preparing of sod. Hypo. Chl Solution among staff and House Keeping			
14.	Aware of Disposal of blood & body fluid (including suction & drainages)			
15.	Knowledge on needle stick injury by the staff and housekeeping			
16.	Knowledge on spillage management among the staff and Housekeeping			
17.	Weighing the Bio Medical waste while sending			
18.	Doing Hand washing after BMW segregation

M.D. General Medicine

Consultant Physician, Dept. of General Medicine

Name : Mrs.R RANI

M.R.No : 578652

Age/Gender :49 Y 0 M 8 D/Female

Date : 20/04/2022

EMPLOYEE ANNUAL HEALTH CHECK UP

Employee ID : 13769

I have reviewed the investigations submitted of Mrs.R RANI Age/Gender :49 Y 0 M 8 D/Female on 20.04.2022 and the findings are as follows:-

Clinical Examination of all systems : PR: 82 /min, BP: 130/80 mm of Hg

SPO 2 - 98 % in room air

CVS - S1S2+

Lungs-clear

P/A-soft

CNS - NFND

ECG : Normal

Blood Sugar ® : 84 mg/dl

HbA1C : 5.7 %

H.B % : 11.3 gm/dl

Serum Creatinine : 0.7 mg/dl

ANTI HBs ANTIBODY : 1000 mIU/L

HBS AG & HCV : Non - Reactive

All tests are satisfactory and within normal limits. The employee can continue to provide patient care.

Care Plan:

Diet enrichment of iron and folate as explained

EMPLOYEE ANNUAL HEALTH CHECK UP

Employee ID : 5625

I have reviewed the investigations submitted of Mrs. RANI D Age/Gender :31 Y 0 M 13 D/Female on 21.04.2022 and the findings are as follows:-

Clinical Examination of all systems : PR: 75 /min, BP: 180/90 mm of Hg
SPO2 - 100% in room air, at rest
CVS - S1S2+
Lungs-clear
P/A-soft
CNS - NFND

ECG	: Normal sinus rythm
Blood Sugar ®	: 137 mg/dl
HbA1C	: 5.8 %
H.B %	: 12.8 gm/dl
Serum Creatinine	: 0.7 mg/dl
ANTI HBs ANTIBODY	: 253 mIU/L
HBS AG & HCV	: Non - Reactive

Diagnosis:

- K/C/O Systemic hypertension- Poor compliance to medication
- Obesity

CARE PLAN:

1. Low salt diet/Low fat,High fibre diet/Regular physical exercise- 45minutes to 1hour brisk walking or jogging/Weight reduction advised
2. Periodic BP monitoring/adequate sleep of 8hours every night
3. Review after 2 hours of initiating BP medication for repeat BP checkup

EMPLOYEE ANNUAL HEALTH CHECK UP

Employee ID : 5262

I have reviewed the investigations submitted of Mrs.SHANTHI D Age/Gender : 51 Y 3 M 19 D/Female on 20.04.2022 and the findings are as follows:-

Clinical Examination of all systems : PR: 88 /min, BP: 170/86 mm of Hg
SPO 2 - 98 % in room air
CVS - S1S2+
Lungs-clear
P/A-soft
CNS - NFND

ECG : Normal
Blood Sugar ® : 197 mg/dl
HbA1C : 8.1 %
H.B % : 11.1 gm/dl
Serum Creatinine : 0.5 mg/dl
ANTI HBs ANTIBODY : 125 mIU/L
HBS AG & HCV : Non - Reactive

Diagnosis:

- Systemic Hypertension
- Type II Diabetes Mellitus-uncontrolled
- Borderline-low heamoglobin level/Nutritional
- Obesity

Care Plan:

1. Review in 2 hours after initiating BP medication for repeat BP check up
2. Diet enrichment of iron and folate as explained

The HCF has obtained Authorization under Biomedical Waste Management Rules, 2016 vide proceeding.no. T1/TNPCB/F.2353MMN/BMWA/RL/MMN/2021 dated 24/08/2021 valid upto 31.03.2023. Now the HCF has applied for renewal of authorization vide OCMMS Application no. 48242836 and resubmitted on 06.05.2023.</p> <p>The hospital has made an agreement with M/s.G.J Multiclave, Chennai for the Collection, Transport and Treatment of Biomedical wastes valid up to 31/03/2028.</p> <p>In this regard the HCF was inspected and following were observed</p> <ol style="list-style-type: none"> 1. The HCF was functioning. 2. The HCF has valid agreement with the CBMWTF for the disposal of biomedical waste and submitted the copy of the MoU with M/s.G.J.Multiclave (India) Pvt Ltd., Chennai 3. The HCF has colour coded bag containers and bar coding system for collecting the Bio Medical Wastes. 4. The HCF has been instructed to dispose the Biomedical Waste properly without any accumulation in the premises to the CBMWT facilitator. 5. The HCF has been instructed to maintain the log books for the collection of the biomedical waste by the CBMWT facility 6. The HCF vide letter dated 01.06.2023 has stated that due to various prick injuries to the healthcare staff during destruction of needles by needle cutters, the HCF is disposing the needles directly to the puncture proof closed white containers. 7. The HCF vide letter dated 10.07.2023 has stated that the installation of OCEMS is in progress and stated that the work will be completed in 3 months time.
30	<p>Specific recommendations on the issue of issue of authorization under the Bio-Medical Waste (Management and Handling) Rules, 1998 as amended:</p>

It is submitted and recommended that Bio Medical waste Authorization may be issued to the health care facility M/s MIOT HOSPITALS PRIVATE LIMITED under the provisions of the Bio Medical Waste Management Rules, 2016 subject to the following conditions that

1. All the provisions of the Bio-Medical Waste Management Rules, 2016 must be complied with.
2. The HCF shall take all necessary steps to ensure that bio-medical waste is handled without any adverse effect to human health and the environment and in accordance with the Bio-Medical Waste (BMW) Management Rules, 2016.
3. The HCF shall make a provision within the premises for a safe, ventilated and secured location for storage of segregated biomedical waste in colored bags or containers in the manner as specified in Schedule I of the BMW Rules, 2016. It shall be ensured that there shall be no secondary handling, pilferage of recyclables or inadvertent scattering or spillage by animals and the bio-medical waste from such place or premises shall be directly transported in the manner as prescribed in these rules to the common bio-medical waste treatment facility or for the appropriate treatment and disposal, as the case may be, in the manner as prescribed in Schedule I of the BMW Management Rules, 2016.
4. The HCF shall pre-treat the laboratory waste, microbiological waste, blood samples and blood bags through disinfection or sterilization on-site in the manner as prescribed by the World Health Organization (WHO) or National AIDS Control Organization (NACO) guidelines and sent to the common bio-medical waste treatment facility for final disposal.
5. The HCF shall phase out use of chlorinated plastic bags, gloves and blood bags within two years from the date of Notification of the BMW Management Rules, 2016.
6. The HCF shall dispose of solid waste other than bio-medical waste in accordance with the provisions of respective waste management rules made under the relevant laws and amended from time to time.
7. The HCF shall not give treated bio-medical waste with municipal solid waste.
8. The HCF shall establish a Bar-Code System for bags or containers containing bio-medical waste to be sent out of the premises or place for any purpose within one year from the date of the Notification of the BMW Management Rules, 2016.
9. The HCF shall ensure segregation of liquid chemical waste at source and also ensure pretreatment or neutralization prior to mixing with other effluent generated from health care facilities
10. The HCF shall ensure treatment and disposal of liquid waste in accordance with the Water (Prevention and Control of Pollution) Act, 1974(6 of 1974).
11. The HCF shall maintain and update on day to day basis the bio-medical waste management register and display the monthly record on its website according to the bio-medical waste generated in terms of category and colour coding as specified in Schedule I of the BMW Management Rules, 2016.
12. The HCF shall inform to TNPCB immediately in case the operator of a CBMWTF does not collect the bio-medical waste within the intended time or as per the agreed time.
13. The HCF shall establish a system to review and monitor the activities related to bio-medical waste management by forming a new committee and the Committee shall meet once in every six months and the record of the minutes of the meetings of the committee shall be submitted along with the annual report to the prescribed authority.
14. It is the responsibility of the occupier of the HCF that the only segregated bio-medical waste as per the Schedule-I of the BMW Management Rules, 2016 shall be handed over to common biomedical waste treatment facility for treatment, processing and final disposal.
15. It shall be ensured that no untreated bio-medical waste shall be mixed with other wastes.
16. The bio-medical waste shall be segregated into containers or bags at the point of generation in accordance with Schedule I of the BMW Management Rules, 2016 prior to its storage, transportation, treatment and disposal.
17. The containers or bags referred to in sub-rule (2) shall be labeled as specified in Schedule IV of the BMW Management Rules, 2016. The bar code and global positioning system shall be added by the Occupier and common bio-medical waste treatment facility in one year time.
18. Untreated human anatomical waste, animal anatomical waste, soiled waste and biotechnology waste shall not be stored beyond a period of forty-eight hours: Provided that in case for any reason it becomes necessary to store such waste beyond such a period, the occupier shall take appropriate measures to ensure that the waste does not adversely affect human health and the environment and inform the prescribed authority along with the reasons for doing so.
19. Dead Fetus below the viability period (as per the Medical Termination of Pregnancy Act 1971, amended from time to time) can be considered as human anatomical waste. Such waste should be handed over to the operator of common biomedical waste treatment and disposal facility in yellow bag with a copy of the official Medical Termination of Pregnancy certificate from the Obstetrician or the Medical Superintendent of hospital or healthcare establishment.
20. Cytotoxic drug vials shall not be handed over to unauthorized person under any circumstances. These shall be sent back to the manufactures for necessary disposal at a single point. As a second option, these may be sent for incineration at common bio-medical waste treatment and disposal facility or TSDI's or plasma pyrolysis at temperature >1200C.
21. Residual or discarded chemical wastes, used or discarded disinfectants and chemical sludge can be disposed at hazardous waste treatment, storage and disposal facility. In such case, the waste should be sent to hazardous waste treatment, storage and disposal facility through operator of common bio-medical waste treatment and disposal facility only.
22. On-site pre-treatment of laboratory waste, microbiological waste, blood samples, blood bags should be disinfected or sterilized as per the Guidelines of World Health Organization or National AIDS Control Organization and then given to the common bio-medical waste treatment and disposal facility.
23. Syringes should be either mutilated or needles should be cut and or stored in tamper proof, leak proof and puncture proof containers for sharps storage.
24. The HCF shall maintain records related to the generation, collection, storage, transportation, treatment, disposal or any other form of handling of bio-medical waste.
25. The HCF shall submit an Annual Report to the prescribed authority (TNPCB) in Form-IV, on or before the 30th June of every year for the period from January to December of the preceding year.
26. The HCF shall make available the annual report on its web-site and all the health care facilities shall make own website within two years from the date of Notification of the BMW Management Rules, 2016.
27. In case of any change in the bio-medical waste generation, handling, treatment and disposal for which authorization was earlier granted, the occupier or operator of HCF shall intimate to the prescribed authority about the change or variation in the activity and shall submit a fresh application in Form II for modification of the conditions of Authorization.
28. In case of any major accident at any institution of HCF facility or any other site while handling biomedical waste, the

	<p>authorized person shall intimate immediately to the prescribed authority about such accident and forward a report within twenty-four hours in writing regarding the remedial steps taken in Form I.</p> <p>29. The HCF shall ensure occupational safety of all its health care workers and others involved in handling of bio-medical waste by providing appropriate and adequate personal protective equipments.</p> <p>30. The occupier of the HCF or an operator of a common bio-medical waste treatment facility shall be liable for all the damages caused to the environment or the public due to improper handling of bio- medical wastes. The occupier or operator of common bio-medical waste treatment facility shall be liable for action under section 5 and section 15 of the Act, in case of any violation.</p> <p>31. The HCF shall adopt the following treatment and disposal methods as described in the BMW Management Rules, 2016</p> <p>i. Chemical treatment using at least 10% Sodium Hypochlorite having 30% residual chlorine for twenty minutes or any other equivalent chemical reagent that should demonstrate Log104 reduction efficiency for microorganisms as given in Schedule- III. ii. Mutilation or shredding must be to an extent to prevent unauthorized reuse</p>
	<p>Jennifer Ruth J,AE (Name and Designation)</p>

For Member Secretary
Tamil Nadu Pollution Control Board
Chennai

TERMS AND CONDITIONS OF AUTHORIZATION

1. The authorization shall comply with the provisions of the Environment (Protection) Act, 1986 and the rules made there under.
2. The authorization or its renewal shall be produced for inspection at the request of an officer authorized by the Tamil Nadu State Pollution Control Board.
3. The person authorized shall not rent, lend, sell, transfer or otherwise transport the Bio-Medical wastes without obtaining prior permission of Tamil Nadu State Pollution Control Board.

4. Any unauthorized change in personnel, equipment or working conditions as mentioned in the application by the person authorized shall constitute a breach of this authorization.
5. It is the duty of the authorized person to take prior permission of the Tamil Nadu Pollution Control Board to close down the facility and such other terms and conditions may be stipulated by Tamil Nadu Pollution Control Board.
6. Any other conditions for compliance as per the Guidelines issued by the MoEF&CC or CPCB from time to time.

ADDITIONAL CONDITIONS

1. The HCF shall renew and have valid agreements with Biomedical waste facilitator at all times.
2. The HCF shall possess valid consents of the Board under water and Air Acts at all times.
3. The HCF shall comply with the Biomedical Waste Management Rules, 2016 as amended at all times.
4. The HCF shall comply with the revised guidelines dt.18.07.2020 issued by CPCB for handling, treatment and disposal of COVID-19 waste at HCFs.
5. The HCF shall strictly follow the steps recommended above said guidelines to ensure safe handling and disposal of BMW generated during treatment from COVID-19 isolation wards.

SPECIAL CONDITIONS - HCF

1	All the provisions of the Bio-Medical Waste Management Rules, 2016 must be complied with.
2	The HCF shall take all necessary steps to ensure that bio-medical waste is handled without any adverse effect to human health and the environment and in accordance with the Bio-Medical Waste (BMW) Management Rules, 2016.
3	The HCF shall make a provision within the premises for a safe, ventilated and secured location for storage of segregated biomedical waste in colored bags or containers in the manner as specified in Schedule I of the BMW Rules, 2016. It shall be ensured that there shall be no secondary handling, pilferage of recyclables or inadvertent scattering or spillage by animals and the bio-medical waste from such place or premises shall be directly transported in the manner as prescribed in these rules to the common bio-medical waste treatment facility or for the appropriate treatment and disposal, as the case may be, in the manner as prescribed in Schedule I of the BMW Management Rules, 2016.
4	The HCF shall pre-treat the laboratory waste, microbiological waste, blood samples and blood bags through disinfection or sterilization on-site in the manner as prescribed by the World Health Organization (WHO) guidelines on safe management of wastes from health care activities and WHO Blue Book, 2014 and then sent to the Common bio-medical waste treatment facility for final disposal
5	The HCF shall phase out use of chlorinated plastic bags(excluding blood bags) and gloves by 27 th March, 2019
6	The HCF shall dispose of solid waste other than bio-medical waste in accordance with the provisions of respective waste management rules made under the relevant laws and amended from time to time.
7	The HCF shall not give treated bio-medical waste with municipal solid waste.
8	The HCF shall establish a Bar-Code System for bags or containers containing bio-medical waste to be sent out of the premises or for the further treatment and disposal in accordance with the guidelines issued by the Central Pollution Control Board by 27 th March, 2019
9	The HCF shall ensure segregation of liquid chemical waste at source and also ensure pre-treatment or neutralization prior to mixing with other effluent generated from health care facilities

10	The HCF shall ensure treatment and disposal of liquid waste in accordance with the Water (Prevention and Control of Pollution) Act, 1974(6 of 1974).
11	The HCF shall maintain and update on day to day basis the bio-medical waste management register and display the monthly record on its website according to the bio-medical waste generated in terms of category and colour coding as specified in Schedule I of the BMW Management Rules, 2016.
12	The HCF shall inform to TNPCB immediately in case the operator of a CBMWTF does not collect the bio-medical waste within the intended time or as per the agreed time.
13	The HCF shall establish a system to review and monitor the activities related to bio-medical waste management by forming a new committee and the Committee shall meet once in every six months and the record of the minutes of the meetings of the committee shall be submitted along with the annual report to the prescribed authority.
14	It is the responsibility of the occupier of the HCF that the only segregated bio-medical waste as per the Schedule-I of the BMW Management Rules, 2016 shall be handed over to common bio-medical waste treatment facility for treatment, processing and final disposal.
15	It shall be ensured that no untreated bio-medical waste shall be mixed with other wastes.
16	The bio-medical waste shall be segregated into containers or bags at the point of generation in accordance with Schedule I of the BMW Management Rules, 2016 prior to its storage, transportation, treatment and disposal.
17	The containers or bags referred to in sub-rule (2) shall be labeled as specified in Schedule IV of the BMW Management Rules, 2016. The bar code and global positioning system shall be added by the Occupier and common bio-medical waste treatment facility in one year time.
18	Untreated human anatomical waste, animal anatomical waste, soiled waste and biotechnology waste shall not be stored beyond a period of forty-eight hours:Provided that in case for any reason it becomes necessary to store such waste beyond such a period, the occupier shall take appropriate measures to ensure that the waste does not adversely affect human health and the environment and inform the prescribed authority along with the reasons for doing so.
19	Dead Fetus below the viability period (as per the Medical Termination of Pregnancy Act 1971, amended from time to time) can be considered as human anatomical waste. Such waste should be handed over to the operator of common bio-medical waste treatment and disposal facility in yellow bag with a copy of the official Medical Termination of Pregnancy certificate from the Obstetrician or the Medical Superintendent of hospital or healthcare establishment.
20	Cytotoxic drug vials shall not be handed over to unauthorized person under any circumstances. These shall be sent back to the manufactures for necessary disposal at a single point. As a second option, these may be sent for incineration at common bio-medical waste treatment and disposal facility or TSDFs or plasma pyrolysis at temperature >1200°C.
21	Residual or discarded chemical wastes, used or discarded disinfectants and chemical sludge can be disposed at hazardous waste treatment, storage and disposal facility. In such case, the waste should be sent to hazardous waste treatment, storage and disposal facility through operator of common bio-medical waste treatment and disposal facility only.
22	On-site pre-treatment of laboratory waste, microbiological waste, blood samples, blood bags should be disinfected or sterilized as per the Guidelines of World Health Organization or National AIDS Control Organization and then given to the common bio-medical waste treatment and disposal facility.
23	Syringes should be either mutilated or needles should be cut and or stored in tamper proof, leak proof and puncture proof containers for sharps storage.
24	The HCF shall maintain records related to the generation, collection, storage, transportation, treatment, disposal or any other form of handling of bio-medical waste.
25	The HCF shall submit an Annual Report to the prescribed authority (TNPCB) in Form-IV, on or before the 30th June of every year for the period from January to December of the preceding year.

26	The HCF shall make available the annual report on its web-site within a period of two years from the date of publication of Bio-Medical Waste management (Amendment) Rules, 2018
27	In case of any change in the bio-medical waste generation, handling, treatment and disposal for which authorization was earlier granted, the occupier or operator of HCF shall intimate to the prescribed authority about the change or variation in the activity and shall submit a fresh application in Form II for modification of the conditions of Authorization.
28	In case of any major accident at any institution of HCF facility or any other site while handling bio-medical waste, the authorized person shall intimate immediately to the prescribed authority about such accident and forward a report within twenty-four hours in writing regarding the remedial steps taken in Form I.
29	The HCF shall ensure occupational safety of all its health care workers and others involved in handling of bio-medical waste by providing appropriate and adequate personal protective equipments.
30	The occupier of the HCF or an operator of a common bio-medical waste treatment facility shall be liable for all the damages caused to the environment or the public due to improper handling of bio- medical wastes. The occupier or operator of common bio-medical waste treatment facility shall be liable for action under section 5 and section 15 of the Act, in case of any violation.

31	The HCF shall adopt the following treatment and disposal methods as described in the BMW Management Rules, 2016 i. Chemical treatment using at least 1% to 2% Sodium Hypochlorite having 30% residual chlorine for twenty minutes or any other equivalent chemical reagent that should demonstrate Log104 reduction efficiency for microorganisms as given in Schedule- III. ii. Mutilation or shredding must be to an extent to prevent unauthorized reuse.

Respected Sir,

GREETINGS FROM MIOT HOSPITALS!

SUB: Reply to the Queries called for the renewal of Bio-Medical Waste Authorisation for the year 2025 - 2027 (Two Years) regarding..

**REF: 1. Our Authorization No: 23BAC48242836, dated 03-09-23 Proceedings
No: T1/TNPCB/F.2353MMN/BWA/RL/MMN/2023 Dated 03/09/2023
2. Ref: Our application for the renewal of Bio Medical Waste Authorization
dated 30-12-2024**

We are herewith submitting the reply to the queries called for the renewal of our Bio-Medical Waste Authorization

SL NO	QUERY	EXPLANATION
1	Earlier, the unit has mentioned that the number of total number of inpatients & outpatients treated per month in the HCF is 5000, whereas, now it is reported that 36480 Nos. Hence same shall be clarified.	The In patients and Out patients treated per month was not updated in the BMW portal, it was wrongly entered as 36480 now the actual data is updated. The average number of outpatient treated is 13157 per month and 1200 In patients are treated per month. The average number of IP and OP are now entered in the portal. We have enclosed the month wise breakup for your kind perusal.
2	The unit shall enclose the compliance of the direction issued under Section 5 of E (P) Act, 1986 vide Board Proc.No.T3/TNPCB/F.022499/BMW/2024 dated 18/12/2024 for the Non-compliance of the Provision of the Bio Medical Waste Management Rules 2016.	As per the directions of Hon'ble National Green Tribunal we have obtain an interim Stay of the impugned order dated 18.12.2024. We have complied to Hon'ble National Green Tribunal's compliance and we enclosed the Stay Order dated 10.01.2025 and the payment made as per NGT we have also enclosed the acknowledgement of the payment made based on NGT order

We request you to kindly accept our explanation letter, acknowledge the receipt of the query reply and provide us with the renewal of the Bio Medical Waste Authorization for the year 2025-2026 and 2026 - 2027.

Thank you
With Regards
