3. Post - mortem report of Deer dated 24.06.2025 (A-3)

Dr D Shanmuganathan
Standing Counsel
Government Of Tamil Nadu

POST MORTEM CERTIFICATE

Notes of a Post-mortem Examination on the body of an adult female spotted deer belonging to Reserve Forest area Tambora performed at the request of Forest Dept Letter ROC No-01/2025 dated 17.02.25

No.

Post-mortem Case No.:

(if Police requisition, give the number and date of letter)

Result of examination of blood taken after death

Precise of the Case

1. Date of admission : 17.02.25
2. Date of Death : 17.02.25
3. Place where the animal died : Forest check post near Vandalur RF
4. Time of making the Post-mortem examination : 17.02.25 12.45pm
5. History : Reported to have found the deceased animal near the forest check post adjacent to garbage dumping area on 17.02.25 at 7.30am
6. Descriptive marks :
7. Diagnosis :

A. External Examination:

1. Condition of the body
2. Rigor Mortis
3. Eyelids
4. Mouth and Nostrils
5. Other Natural orifices
6. Presence of wounds, if any
7. Any other abnormalities

~~Animal~~ Emaciated carcass noticed
 Noticed.
 Lacerated wound noticed in
 NAD (2) lower eye lid
 Haemorrhagic exudate noted
 in the rectal orifice
 Lacerated wounds noticed in the
 (2) lateral aspect of neck,
 left lower eye lid and
 (2) base of the ear

B. Internal Examination:**I. Abdominal Cavity**

1. Subcutaneous fat
2. Peritoneum
3. Position of organs (organs to be merely inspected and none removed at this stage)

Not found
 Rupture of rumen noticed
 with ruminal contents
 in the peritoneal cavity

II. Thoracic Cavity

1. Pleura
2. Adhesion
3. Pericardium
4. Position of organs

Congestion noticed

III. Heart

1. External appearance
2. Right auricle
3. Right ventricle
4. Left auricle
5. Left ventricle
6. Weight of Heart
7. Valves
8. Endo-cardium
9. Blood vessels

Pericardial effusion
 noticed

IV. Lungs

1. Weight
2. Colour
3. Consistence
4. Section

Congestion noticed

V. Trachea**VI. Larynx****VII. Glottis**

VIII. Liver

- 1. Weight
- 2. Edges
- 3. Colour
- 4. Consistency
- 5. Section
- 6. Capsules
- 7. Gall Bladder

Congestion induced

IX. Spleen

- 1. Weight
- 2. Capsules
- 3. Colour
- 4. Consistency
- 5. Section

Congestion noticed

X. Kidneys

- 1. Weights
- 2. Colour, Consistency and Capsules
- 3. Section

Congestion induced

XI. Oesophagus

XII. Stomach

- 1. Outer surfaces
- 2. Interior and contents

Congestion and haemorrhages noticed in the mucosa of rumen.

Bunch of plastic bags weighing around 1.5kg was found in the rumen.

XIII. Intestines

- 1. Outer surfaces
- 2. Pyloric surface
- 3. Ileocaecal valve
- 4. Parasites and contents
- 5. Mucous membranes

The plastic bags were impregnated with other ruminal contents and partial occlusion of the ruminoreticular opening noticed.

- XIV. Lymphatic glands
 XV. Bladder
 XVI. Generative organs
 XVII. Brain and Spinal cord

§ NAD

Appearances found

1. Emaciated Ox can be noted
2. Rigor mortis noted
3. Lacerated wound noted in (A) lower eyelid
4. Haemorrhagic exudate noted in rectal orifice
5. Lacerated wound noted in the (A) lateral aspect of neck and ear
6. Absence of subcutaneous fat
7. Rupture of rumen noted with ruminal contents in peritoneum
8. Congestion noted in thoracic cavity
9. Pericardial effusion noted
10. Congestion noted in lungs, liver, spleen and kidneys
11. Congestion and haemorrhage noted in the mucosa of rumen
12. Bunch of plastic bags weighing around 1.5kg was found in the rumen
13. The plastic bags were impregnated with other ruminal contents and partial occlusion of the rumino-reticular opening noted.

Cause of death

Portion preserved if any

Post mortem conducted by.

Remarks

Indigestion, impaction and tympany due to plastic bezoars resulted in complete/partial obstruction of rumen - death due to acute peritonitis and shock
