IN THE HON'BLE NATIONAL GREEN TRIBUNAL, NEW DELHI**IN THE MATTER OF:****O.A. No. 627 of 2022****I.A. No. 858/2023****Prakash Yadav****...Petitioner****Vs****State of Haryana and Others****...Respondents****REPLY ON BEHALF OF RESPONDENT NO.6
i.e. PUBLIC HEALTH ENGINEERING
DEPARTMENT IN COMPLIANCE OF ORDER
DATED 21.10.2024.**

1. That in compliance of the order dated 21.10.2024 of this Hon'ble Tribunal, present reply is being filed by Sh. Vinay Prakash Chauhan, Executive Engineer, Public Health Engineering Division No. 1, Rewari for Rewari Town and Sh. Ravinder Kumar, Executive Engineer, Public Health Engineering Division, Bawal, for Bawal & Dharuhera Town, Distt. Rewari. Previously four reply had already been filed by Public Health Engineering Department on behalf of respondent No. 6 on dated 28.03.2023, 23.04.2023, 18.09.2023 & 09.05.2024 in compliance of the order dated 18.01.2023, 29.03.2023, 24.04.2023 & 07.02.2024 of Hon'ble Tribunal respectively.

2. The Hon'ble NGT vide order dated 21.10.2024 directed that:-

"As learned Counsel appearing for Public Health Engineering Department, Rewari, Haryana requested that he may be allowed two weeks time to file objections on report submit by Central Pollution Control Board on dated 18.10.2024".

3. That the Respondent No. 6 had already pointed out in previously reply filed on dated **23.04.2023** that some **industrial activities were found** & their untreated effluents are un-authorizedly released in domestic sewerage network. The un-authorized released industrial effluents are coming to STP's & affecting the functionalities of STP's alongwith the standard parameters of treatment. As per direction issued by **Hon'ble NGT** vide **order** dated **24.04.2023** in "**point no. 22 (ii) That the untreated industrial effluents are not discharge in municipal sewer and action taken report in this regard be filed by respondent no. 2 HSPCB after obtaining and compiling the requisite information**". After that Regional Officer, Haryana State Pollution Control Board, Dharuhera, Distt. Rewari had taken action on 21 No. Industrial Units in Rewari Town (**The Detail of Industries & Action Taken on each Unit are annexed as Annexure R-1**) because it is sole duty of enforcement department i.e. HSPCB to ensure to dispose off industrial effluent in legal manner without any concerned of answering respondent.
4. **That in compliance of direction issued by Hon'ble NGT vide order 21.10.2024:-**
The Central Pollution Control Board on dated 18.10.2024 submitted status report regarding discharging of sewage from STP's in Distt. Rewari in Court of Hon'ble NGT. The analysis report of Central Pollution Control Board clearly indicates that some industrial effluents are being mixed into domestic sewer. Regarding this Public Health Engineering Department Rewari enquire the matter by deputing a team of PHED officials at local level and various departments relating to industrial units were contacted and after that submitted the **list of 147 Industrial Units** (116 Units in Rewari Town & 31 Units in Dharuhera Town) vide memo no. 8809 dated 28.10.2024

(Annexure R-2), list of 15 Industrial Units vide memo no. 8904 dated 30.10.2024 **(Annexure R-3)** and **list of 07 Industrial Units** vide memo no. 8908 dated 02.11.2024 **(Annexure R-4)** to Regional Officer, Haryana State Pollution Control Board, Dharuhera, District Rewari for inspecting, checking & stopping the unauthorized industrial waste water to the domestic sewage. Due to mixing of untreated industrial effluent into domestic sewage, the alarming situation occur at STP's because STP's of PHED Distt. Rewari are designed only for treatment of domestic sewage. The enforcement department i.e. HSPCB has to ensure to dispose off industrial effluent in legal manner without any concerned of answering respondent. As per knowledge of PHED, Rewari no action taken by HSPCB to till date on the industrial units details recently provide by PHED, Rewari.

5. That in compliance of direction issued by Hon'ble NGT, The Public Health Engineering Department Rewari requested to The Jamia Millia Islamia University (The Central Government University), New Delhi vide memo no. 8406-07 dated 21.10.2024 **(Annexure R-5)** for submission of comprehensive report of various STP's under the jurisdiction of Public Health Engineering Department, Distt. Rewari. The University officials visited all 05 no. STP's and collected composite samples for inlet & outlet of STP's and 05 no. locations where the industries are working in both side of domestic sewerage network in presence of PHED officials on dated 24.10.2024 and conducted the 24 hour sampling on October 24-25, 2024. The Sample collected from inlet & outlet of 05 no. STP's and 05 no. suspected points of un-identified source which would be mixing industrial effluent in domestic sewage were analyzed **(analysis report, Observation of various STP's based on the**

analysis of samples and findings submitted by Jamia Millia Islamia University, New Delhi email dated 07.11.2024 are annexed as Annexure R-6). The Report is as under:-

(A) Summary of various parameters of STP's (05 no.) located in Rewari District under the jurisdiction of PHED

STP Name & Sampling Location/ Parameters	pH value	COD (mg/L)	BOD (3 days at 27°C mg/l)	TSS (mg/L)	Total Nitrogen (mg/L)	Total Phosphorous (mg/L)	Total Coliform (MPN/100 ml)
Prescribed Limit for Outlet	5.5- 9	50	10	20	10	1	Less than 100
(1) 8 MLD STP at Nasiaji Road on MBBR With Anoxic Tank for Rewari Town

(A) Observation given by University as per analysis result of various STP's as under:-

- (1) During the sampling it was found that Kaluwas STP of Rewari is under upgradation from 6.5 MLD STP on MBBR Technology to 10 MLD STP on SBR Technology.
- (2) During the sampling it was found that the chlorination of treated effluent is being done just before pumping station. Now additional chlorination unit installed just after final treatment of treatment unit of plant to ensure killing of harmful bacteria before final disposal.
- (3) The BOD & COD of raw sewage from 16 MLD & 8 MLD STP of Rewari Town & 3.0 MLD STP of Bawal Town are **much higher than typical concentration defined value into CPHEEO Manual.**

- (4) The result parameters of raw sewage are clearly indicate that the **industrial effluents is being mixed** into domestic sewage of 16 MLD, 8 MLD of Rewari Town & 3 MLD of Bawal Town.
- (5) The sewage sample was also collected from 04 point of Rewari Town and 01 point of Bawal Town by University official which are suspected point to un-identified source of mixing of industrial effluent. The analysis result of all 04 point of Rewari Town and 01 point of Bawal Town are as under:-
- (a) Rewari Town
 - COD is **6 times higher** than CPHEEO manual value.
 - BOD is **5 times higher** than CPHEEO manual value.
 - (b) Bawal Town
 - COD is **3 times higher** than CPHEEO manual value.
 - BOD is **2 times higher** than CPHEEO manual value.
- (6) Recently the CPCB official team collected sample from Inlet & outlet of all STP's and same were analyzed and the various parameter i.e. BOD & COD are found much higher side as under:-
- (i) 16 MLD STP, Rewari – COD is **9 times higher** than CPHEEO manual value.
 - BOD is **8 times higher** than CPHEEO manual value.
 - (ii) 8 MLD STP, Rewari – COD is **9 times higher** than CPHEEO manual value.
 - BOD is **8 times higher** than CPHEEO manual value.
 - (iii) 3 MLD STP, Bawal – COD is **3 times higher** than CPHEEO manual value.
 - BOD is **2 times higher** than CPHEEO manual value.

(B) Findings

- (1) The Kaluwas STP of Rewari Town is under upgaradtion from 6.5 MLD STP on MBBR Technology to 10 MLD STP on SBR Technology.

- (2) Now additional chlorination unit has been also installed just after final treatment of treatment unit of 05 no. STP's to ensure killing of harmful bacteria before final disposal. In addition to already installed chlorination system.
- (3) The Rewari District having 03 Towns i.e. Rewari Town, Bawal Town & Dharuhera Town, the industrial units are established which are very close to domestic sewage network.
- (4) The analysis report of University as well as CPCB which clearly shows that industrial effluent is being mixed into domestic sewerage network.
- (5) All the 5 no. STP's of PHED Rewari are designed only for treatment of domestic sewerage not for industrial effluent.
- (6) It is advised to PHED that the matter of **mixing of industrial effluent into domestic sewage should be taken up with Enforcement Department** and requested to take appropriate action to avoid mixing of industrial effluent into domestic sewage in future for proper working of STPs as per their respective design standards.

6. The reply on findings given in status report by CPCB on dated 18.10.2024:-

- (1) All 05 STP's under the jurisdiction of PHED are operational. It is further intimated that the Kaluwas STP of Rewari Town is under up-gradation/ re-habilitation from 6.5 MLD STP on MBBR Technology to 10 MLD STP on SBR Technology.
- (2) Out of 05 inspected STP's under the jurisdiction of PHED, The treated effluent of 3 MLD STP Bawal is being discharged into Gram Panchayat Land of village Pawti not in Massani Barrage and remaining 04 no. STP's (8 MLD & 16 MLD STP Nasia Ji, 6.5 MLD STP at Kaluwas of Rewari Town and 9.5 MLD STP of Dharuhera Town) treated effluent are discharging into Massani Barrage.

(3) It is also clarified that CPCB team took samples just after the outlet of SBR/clarifier of MBBR to check the sample test results of individual STP and thus functioning of STP accordingly. The same pattern was followed in collecting the sample in other STP also whereas chlorination system is installed on all the STP's **(photo attached)** just before pumping station of treated effluent. Further, Additional chlorination unit has also been installed now just after final outlet of the treatment unit of all 05 no. STP's to ensure proper functioning of individual STP by killing of harmful bacteria before final disposal.

(4) Based on the analysis report submitted by Jamia Millia Islamia University, New Delhi email dated 07.11.2024 all 04 no. STP's (8 MLD & 16 MLD STP Nasia Ji of Rewari Town, 3 MLD STP for Bawal Town and 9.5 MLD STP of Dharuhera Town) are found complying with prescribed standard fixed by HSPCB vide letter dated 02.07.2020 and 01 no. STP (6.5 MLD STP at Kaluwas of Rewari Town) is found complying with prescribed limit as per design standard as applicable before 02.07.2020. **Even after receiving higher value of BOD & COD in outlet of all the STP's PHE Department, Rewari is making every sincere efforts to achieve the parameters as fixed by the HSPCB before its disposal.**

7. Submission of PHE Department:-

Public Health Engineering Department Rewari already intimated to Hon'ble NGT on 23.04.2023 regarding Industrial activity were found & their effluents are unauthorizedly released in Domestic Sewer. Further on the Analysis result submitted by CPCB on dated 18.10.2024, Public Health Engineering Department Rewari provided the list of 169 No. Industrial Units to Regional Officer, HSPCB, Dharuhera, District-

Rewari for inspecting, checking & stopping the unauthorized industrial waste water to the domestic sewage. Some of the facts and submissions to take cognizance on the findings report submitted by CPCB on dated 18.10.2024 are as under:-

- (i) The Rewari District having 03 Towns i.e. Rewari, Bawal & Dharuhera Town, the industrial units are established which are very close to domestic sewage network.
- (ii) All the 5 no. STP's of PHED Rewari are designed only for **treatment of domestic sewerage not for industrial effluent.**
- (iii) The CPCB taken the single sample of sewage on dated 10.09.2024 around 09:00 AM and analysis result of raw sewage **COD (3906)** and **BOD (2090)** of 16 MLD & 8 MLD STP of Rewari Town clearly indicates that untreated industrial effluents coming to STP's which may be released by industries in early morning or it may be in late night which is evident from the higher concentration of COD & BOD (9 times & 8 times respectively).
- (iv) The Jamia Milia Islamia University, New Delhi taken the composite sample of sewage on dated 24.10.2024 & 25.10.2024 and analysis result of raw sewage COD and BOD of 8 MLD & 16 MLD STP of Rewari Town and 3 MLD STP of Bawal Town are much higher than typical concentration (**analysis report submitted by Jamia Millia Islamia University, New Delhi email dated 07.11.2024 are annexed as Annexure R-6**) defined value of domestic raw sewage in CPHEEO manual and results clearly indicates that untreated industrial effluents are released by industries in domestic sewage. **In presence of untreated industrial effluent mixed in domestic sewage, so the existing STP's cannot be sustainable to meet out the prescribed standard fixed by HSPCB in long term.**

- (v) **The Hon'ble NGT may consider issue notice to 169 no. erring industrial units as more potentially mentioned in letter/ complaint dated 28.10.2024, 30.10.2024 & 02.11.2024 sent to RO, HSPCB Dharuhera, District Rewari for effective implementation of the norm of industrial effluent. Further HSPCB may also be directed to ensure that industrial waste is properly handled by industries concerned and industrial waste should not get mixed into sewerage network, which as of now is being get in mixed without any checks at the end of HSPCB resulting high value of BOD & COD at inlet of STP's causing obstruction in smooth functioning of the STP's.**

In view of the submissions made herein above, it is humbly prayed that present reply may kindly be taken on record and kindly issue the direction to Regional Officer, Haryana State Pollution Control Board, Dharuhera, District Rewari to take the legal action for stopping the un authorized and illegal disposal of industrial effluent into the sewerage network of Rewari, Bawal & Dharuhera Town and ensure to dispose off industrial effluent in legal manner.

Memo No. 8809 Dated 28.10.2024

Subject:- Inspect the Industrial Units and to stop the mixing of industrial effluent into domestic sewage under Rewari Town.

On the above noted subject, it is intimated that Hon'ble NGT had passed the order on dated 14.08.2024 in OA No. 627/2022 titled Parkash Yadav Vs State of Haryana and give direction to CPCB to inspect the functionality of the 05 nos. STP's. In compliance to directions of Hon'ble NGT, a team of CPCB officials visited to all 5 STP's on dated 10.09.2024 and collected and all sealed samples from inlet and outlet of all above STP's in presence of Public Health Engineering Department (PHED) officials.

The analysis report of submitted by CPCB in Hon'ble NGT on dated 18.10.2024. It shows that BOD (2090) & COD (3909) which are abnormally much higher side (Analysis Report of CPCB attached) than inlet design parameter of STP for domestic sewerage. The analysis report are clearly shows that industrial effluents are receiving at various STP's from un-identified source through existing sewerage network and industrial effluents are badly affected the treatment process as well as damaging the civil structure, mechanical and electrical component of all STP's.

The Public Health Engineering Department is found out **147 nos.** industrial unit are working in Rewari District (Copy Attached) and industrial effluents of various industries are reaching at various STP's. Due to this, functionality of STP's got hampered by these industries unit in all the towns for which the STP were originally designed.

So, it is requested that kindly inspect the all the industrial area to search out the industries discharging industrial waste in the sewerage network in all town area of Rewari District and stop the mixing of industrial effluent into domestic sewage to avoid any further consequences and submit the action taken report so that further reply can be file in Hon'ble NGT.

Please treat it Most Urgent.

Memo No. 8904 Dated 30.10.2024

Subject:- Inspect the Industrial Units and to stop the mixing of industrial effluent into domestic sewage under Rewari Town.

On the above noted subject, it is intimated that Hon'ble NGT had passed the order on dated 14.08.2024 in OA No. 627/2022 titled Parkash Yadav Vs State of Haryana and give direction to CPCB to inspect the functionality of the 05 no. STP's. In compliance to directions of Hon'ble NGT, a team of CPCB officials visited to all 5 STP's on dated 10.09.2024 and collected and all sealed samples from inlet and outlet of all above STP's in presence of Public Health Engineering Department (PHED) officials.

The analysis report of submitted by CPCB in Hon'ble NGT on dated 18.10.2024. It shows that BOD (2090) & COD (3909) which are abnormally much higher side (Analysis Report of CPCB attached) than inlet design parameter of STP for domestic sewerage. The analysis report are clearly shows that industrial effluents are receiving at various STP's from un-identified source through existing sewerage network and industrial effluents are badly affected the treatment process as well as damaging the civil structure, mechanical and electrical component of all STP's.

In continuation of this office memo no. 8809-8812 dated 28.10.2024, now again Public Health Engineering Department is found out **15 nos.** industrial unit are working in Rewari District (Copy Attached with photos) and industrial effluents of various industries are reaching at various STP's. Due to this, functionality of STP's got hampered by these industries unit in all the towns for which the STP were originally designed.

So, it is requested that kindly inspect the all the industrial area to search out the industries discharging industrial waste in the sewerage network in all town area of Rewari District and stop the mixing of industrial effluent into domestic sewage to avoid any further consequences and submit the action taken report so that further reply can be file in Hon'ble NGT.

Please treat it Most Urgent.

Memo No. 8406 Dated 21.10.2024

Subject:- Submission of Comprehensive report of various STP's under the jurisdiction of PHED Rewari District.

On the above cited subject, it is intimated that Rewari District having 05 No. STP's under the jurisdiction of Public Health Engineering Department i.e. 03 nos. STP in Rewari Town, 01 no. STP in Dharuhera Town & 01 no. STP in Bawal Town. The all STP's are designed for treatment of Domestic sewage as per CPHEEO Manual and characteristics of raw sewage designed for the following Inlet parameter as under:-

1	pH	6 to 8.5	
2	BOD5	250	mg/l
3	COD	425	mg/l
4	TSS	375	mg/l
5	Total Coliform	1*10 ⁷	MPN/ 100 ml
6	Fecal Coliform	1*10 ⁶	MPN/ 100 ml
7	TKN (as N)	50	mg/l
8	Total Phosphorous (as TP)	7.1	mg/l

Now the analysis report submitted by CPCB in Hon'ble NGT on dated 18.10.2024. It shows that BOD (2090) & COD (3909) which is abnormally much higher side (Analysis Report attached). The analysis report are clearly shows that industrial effluents are receiving at various STP's from un-identified source.

So it is requested that kindly submit the comprehensive report after composite sampling and kindly quote your prices same of all 05 no. STP's under the jurisdiction of PHED Rewari District within 10 days positively alongwith action plan regarding up gradation if required to improve the treatment process of various STP's. Department is ready to pay visit fee, testing fee as admissible asper guideline of institution.

This is for your kind information and necessary action please.

1. Uttam Nagar Near Ford Agency (Pipe Industry, Metal Industry & Chemical Industry are working)	9.3	3270	1815	3042	42.2	8	-
2. Uttam Nagar Delhi Road (Pipe Industry, Automobile Industry & Metal Industry are working)	9.1	3420	1830	3240	43.50	9	-
3. Gali No.1 Shanti Vihar (Copper & Metal Industry are working)	8.8	3442	1420	5687	28.20	11	-
4. Gali No.2 Shanti Vihar (Copper & Metal Industry are working)	8.1	3386	1398	5598	27.93	8	-
5. On Pranpura Road, Bawal (Unidentified Industry are working)	8.28	1586	700	1769	36.24	7	-

(A) Observation on various STP's based on analysis of samples:

1. During the sampling it was found that Kaluwas STP of Rewari is under upgradation from 6.5 MLD STP on MBBR Technology to 10 MLD STP on SBR Technology.
2. During the sampling it was found that the chlorination of treated effluent is being done just before pumping station. Now additional chlorination unit installed just after final treatment of treatment unit of plant to ensure killing of harmful bacteria before final disposal.
3. The BOD & COD of raw sewage from 16 MLD & 8 MLD STP of Rewari Town & 3.0 MLD STP of Bawal Town are much higher than typical concentration defined value into CPHEEO Manual.
4. The result parameters of raw sewage are clearly indicate that the industrial effluents is being mixed into domestic sewage of 16 MLD, 8 MLD of Rewari Town & 3 MLD of Bawal Town.

5. The sewage sample was also collected from 04 point of Rewari Town and 01 point of Bawal Town by University official which are suspected point to un-identified source of mixing of industrial effluent.

The analysis result of all 04 point of Rewari Town and 01 point of Bawal Town are as under:-

- (a) Rewari Town - COD is 6 times higher than CPHEEO manual value.
 - BOD is 5 times higher than CPHEEO manual value.
- (b) Bawal Town - COD is 3 times higher than CPHEEO manual value.
 - BOD is 2 times higher than CPHEEO manual value.
6. Recently the CPCB official team collected sample from Inlet & outlet of all STP's and same were analyzed and the various parameter i.e. BOD & COD are found much higher side as under:-
- (i) 16 MLD STP, Rewari – COD is 9 times higher than CPHEEO manual value.
 - BOD is 8 times higher than CPHEEO manual value.
- (ii) 8 MLD STP, Rewari – COD is 9 times higher than CPHEEO manual value.
 - BOD is 8 times higher than CPHEEO manual value.
- (iii) 3 MLD STP, Bawal – COD is 3 times higher than CPHEEO manual value.
 - BOD is 2 times higher than CPHEEO manual value.

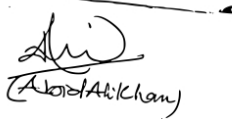

(B) Findings

1. The Kaluwas STP of Rewari Town is under upgradation from 6.5 MLD STP on MBBR Technology to 10 MLD STP on SBR Technology.
2. Now additional chlorination unit has been also installed just after final treatment of treatment unit of 05 no. STP's to ensure killing of harmful bacteria before final disposal. In addition to already installed chlorination system.
3. The Rewari District having 03 Towns i.e. Rewari Town, Bawal Town & Dharuhera Town, the industrial units are established which are very close to domestic sewage network.
4. The analysis report of University as well as CPCB which clearly shows that industrial effluent is being mixed into domestic sewerage network.
5. All the 5 no. STP's of PHED Rewari are designed only for treatment of domestic sewerage not for industrial effluent.
6. It is advised to PHED that the matter of mixing of industrial effluent into domestic sewage should be taken up with Enforcement Department and requested to take appropriate action to avoid mixing

of industrial effluent into domestic sewage in future for proper working of STPs as per their respective design standards.

Following were the researchers who collected the samples and brought to the LabMiTE, Department of Civil Engineering, JMI.
