**IN THE HON'BLE NATIONAL GREEN TRIBUNAL
PRINCIPAL BENCH, NEW DELHI**

ORIGINAL APPLICATION NO. 177 OF 2022

(I.A. No. 263/2022)

IN THE MATTER OF:

ABHISHT KUSUM GUPTA

...Applicant

Versus

STATE OF UTTAR PRADESH & ORS.

...Respondent

**COMPLIANCE REPORT ON BEHALF OF THE DISTRICT MAGISTRATE
UTTAR PRADESH ALONGWITH SUPPORTING AFFIDAVIT.**

MOST RESPECTFULLY SHOWETH

1. The Hon'ble Tribunal has directed the answering respondent to submit a detailed report specifying the names and geo-coordinates of each of the *1018 wetlands* situated across the three tehsils of District Gautam Buddha Nagar, along with an account of encroachments identified, encroachments removed, the extent of reclaimed land, the total wetland area as per revenue records, and the pending encroachments requiring further action. Additionally, the Hon'ble Tribunal has mandated that the report consider wetlands listed in the *Wetland Atlas* that are not included in the 1018 identified wetlands and assess their existence. The report is further required to disclose the water quality of these wetlands, sources of inflow and waste discharge, and details regarding meetings of the *District Wetland Authority*, including records of discussions, reports prepared, and their online

publication status. Accordingly, the present report outlines the compliance actions undertaken, judicial proceedings initiated, and the restoration efforts implemented within the tehsils of Sadar, Dadri, and Jewar. The relevant excerpts of the order are as follows:

“....9. In order to ascertain current status and further details of the encroachments that have been removed and existing condition of the wetlands in the district, we direct the District Magistrate, Gautam Budh Nagar to file a fresh report disclosing the names and details along with geo-coordinate of each of 1018 wetlands existing in three tehsils of District Gautam Budh Nagar, encroachments which were existing on those wetlands, encroachments which have been removed from the wetlands, area which has been regained, area of the wetland as per the revenue record, area which remains to be regained after removing the encroachment. While preparing the said chart, District Magistrate Gautam Budh Nagar will also take into account the wetlands that are disclosed in the wetland Atlas, which are not included in the list of 1018 and which are found to be non-existent. The report will also disclose the extent of the area of the wetland, which is filled with water sources of any waste discharges and the water quality. District Magistrate, Gautam Budh Nagar will also collect the information relating to the meetings of the District Wetland Authority held at regular intervals, reports, if any, prepared in those meetings and uploaded on the website.

10. Let the fresh report by District Magistrate, Gautam Budh Nagar keeping in view the observations made above be filed within a period of eight weeks.

11. List on 19.03.2025.

2. This compliance report is respectfully submitted in strict adherence to the directions issued by the **Hon'ble National Green Tribunal (NGT)** in **Original Application No. 177/2022 (Abhishtha Kusum Gupta vs. State of Uttar Pradesh & Ors.)**. Pursuant to the Tribunal's orders, the District Magistrate, Gautam Buddha Nagar, has carried out comprehensive surveys, initiated rigorous legal proceedings, and executed detailed administrative and environmental restoration measures to reclaim, restore, and protect the wetlands in the three tehsils—**Sadar, Dadri, and Jewar**. Each tehsil has been separately surveyed, documented, and subjected to structured enforcement actions as detailed herein.

TEHSIL SADAR

3. That in compliance with the NGT's directives, a thorough survey identified **245 ponds** within Tehsil Sadar. Of these, **48 ponds (approximately 20%)** are encroached upon through unauthorized activities, including illegal road construction, establishment of religious structures, community centers, private dwellings, and boundary walls. The administration has initiated a total of **353 legal actions under Section 67 of the U.P. Revenue Code, 2006** to reclaim encroached ponds. Eviction and demolition orders have been issued and executed systematically, especially targeting structures such as permanent houses, temples, and commercial establishments. Despite these rigorous measures, some encroachment cases remain sub judice in Revenue Courts and before the Hon'ble High Court of Allahabad.

4. That a detailed and comprehensive record of all ponds—including their unique Gata Numbers, total land area ('Rakwa'), precise geotagging coordinates, the nature and specifics of encroachments, and current status of legal proceedings and actions—has been meticulously prepared and is annexed herein as **Annexure-1**.
5. That the restoration initiatives undertaken include extensive desilting, fencing, groundwater recharge measures, and afforestation along pond boundaries. Public awareness campaigns have been intensified to educate the community about ecological and legal repercussions of encroachment. Quarterly monitoring inspections are being conducted by designated officers to ensure long-term compliance.

TEHSIL DADRI

6. That in Tehsil Dadri, a comprehensive administrative survey identified a total of **480 ponds**, of which **453 have been successfully restored**, while **27 ponds remain encroached**. The encroachments include unauthorized residential constructions, illegal religious structures, unauthorized commercial establishments, boundary walls, and illegal roads. These encroachments have substantially impacted the ecological functions of the ponds, reducing their capacity for groundwater recharge, harming local biodiversity, and impeding natural flood mitigation.
7. That the legal proceedings have been robustly pursued under **Section 67 of the Uttar Pradesh Revenue Code, 2006** and **Section 122B of the U.P. Zamindari Abolition and Land Reforms Act, 1950**. Eviction and demolition notices have been effectively executed in most cases. However, several long-standing encroachments exceeding **30 years** persist, particularly in villages like **Rithori, Kailashpur, Ghodi**

Beheda, Karanvas, and Pali. These areas primarily exhibit extensive residential and religious structure encroachments and unauthorized public roads and railway expansions, necessitating phased enforcement strategies and detailed legal scrutiny.

8. That a Special Legal Cell has been established to expedite legal procedures and ensure swift action. Drone imaging and satellite monitoring technologies are actively utilized to prevent re-encroachments. The detailed documentation of ponds, pending litigation, administrative measures, and current status is compiled in **Annexure-2**.
9. That the restoration measures have been accelerated through desilting, secure fencing, afforestation, and comprehensive groundwater recharge initiatives, funded jointly by Gram Panchayat, Development Authorities, and the Greater Noida Development Authority.

TEHSIL JEWAR

10. The Tehsil Jewar administration conducted a thorough survey, documenting a total of **293 ponds**, of which **264 have been successfully restored** while **29 ponds remain encroached**. These encroachments involve significant agricultural expansions, unauthorized residential areas, religious structures, and infrastructure developments. The impact of these encroachments includes significant disruptions in natural drainage, reduction of groundwater recharge capacity, and severe adverse effects on local biodiversity.
11. The legal proceedings have been initiated rigorously under **Section 67 of the Uttar Pradesh Revenue Code, 2006**, and **Section 122B of the U.P. Zamindari Abolition and Land Reforms Act, 1950**. Several eviction and demolition operations have

successfully reclaimed substantial pond areas, though certain complex cases continue to remain under judicial consideration, delaying full execution.

12. That the villages notably affected include **Bhunnata, Maya, Aliyabad, Mangroli, Neemka Shahjahanpur, and Dhanauri**, where extensive agricultural activities, unauthorized religious constructions, and unauthorized residential structures significantly hinder restoration efforts.
13. That a dedicated task force comprising Revenue Officials, Police Authorities, and Yamuna Expressway Industrial Development Authority (YEIDA) has been formed to ensure rigorous enforcement. As of now, numerous eviction operations have successfully reclaimed **5.8 hectares** of encroached land. Drone surveys and satellite imaging are regularly employed to monitor restoration progress and prevent re-encroachment. The complete and detailed documentation of all ponds, including their geolocations, encroachment nature, legal statuses, and detailed administrative actions taken, is provided in **Annexure-3**.
14. That the significant restoration efforts involving systematic desilting, afforestation, fencing, and groundwater recharge measures have been initiated, backed by public education and environmental awareness campaigns to foster local compliance.

CONCLUSION

15. The District Administration of Gautam Buddha Nagar reiterates its unwavering commitment to the timely and comprehensive execution of directives issued by the Hon'ble National Green Tribunal. The administration continues to enforce rigorous eviction operations, facilitate accelerated judicial processes, undertake sustainable ecological restoration, and foster community participation and compliance through

targeted awareness programs. Continuous surveillance, monitoring, and compliance reporting mechanisms are in place to ensure complete restoration of encroached wetlands and prevent further violations.

16. That additionally Regular bi-monthly compliance updates will be duly submitted before the Hon'ble Tribunal, ensuring ongoing transparency and adherence to judicial mandates.
