REPLY ON BEHALF OF CENTRAL POLLUTION CONTROL BOARD

I, A. K. Vidyarthi s/o Late. Vikrama Singh, aged about 52 years, working as Scientist-'F' in Central Pollution Control Board, Parivesh Bhawan, East Arjun Nagar, Delhi, do hereby solemnly affirm and declare as under:

1. That, I am fully conversant with the facts of the case and hence, competent and authorized to depose and swear the present affidavit as under:

2. That, this Hon'ble Tribunal vide order dated 28.08.2023 in present OA No. 515/2023 (Ganga Pollution Vs. State of U.P. and others). Relevant para of order dated 27.07.2022 is reproduced below for ready reference and kind perusal of this Hon'ble tribunal:

> *"The petition has been received on transfer from the High Court of Allahabad in pursuance to the order dated 21.07.2023 passed in Writ Petition (PIL) No. 4003/2006, Re Ganga Pollution v. State of U.P. & Ors."*

Copy of order dated 28.08.2023 passed by Hon'ble NGT is annexed herewith as **Annexure-1.**

3. That, earlier the same matter was being considered by Hon'ble High Court of Judicature at Allahabad, Allahabad Bench as WPIL No. 4003 of 2006 (Re–Ganga Pollution Vs. State of U.P. and others) wherein Hon'ble Court passed order, dated 27.07.2022 directing the following:

> *"12. In the aforesaid factual matrix, we are constrained to direct Central Pollution Control Board to collect samples from all the industries as mentioned in affidavit dated December 23, 2016 and the STPs set up in the cities on the embankment of river Ganga and submit a report to this Court as to whether these meet the prescribed standards. Needful may be done in due course. However, test reports of samples collected and reports prepared before the next date of hearing be submitted in Court."*

Relevant extract of para of subsequent judgement dated 31.08.2022 is reproduced herein below:

> *"12 (ii). Central Pollution Control Board shall furnish the test reports of the samples collected and available up to the next date of hearing in terms of directions issued in paragraph no. 12 of the order passed on July 27, 2022;"*

Copy of orders dated 27.07.2022 and 31.08.2022 passed by the Hon'ble High Court of Allahabad are annexed herewith as **Annexure-2 & 3 respectively.**

4. That, in compliance of orders passed by Hon'ble High Court, the deponent i.e. CPCB constituted about 40 teams consisting of CPCB officials to undertake surprise and random inspection of 1370 Grossly Polluting Industries (GPIs), 36 Sewage Treatment Plants (STPs) and eight (08) Common Effluent Treatment Plants (CETPs)/Common Chrome Recovery Unit (CCRU) located in the State of Uttar Pradesh.

5. That, to ensure timely and efficient completion of the inspection of these GPIs, STPs and CETPs, a Standard Operating Protocol (SOP) as given below was followed:

(i) Allotment of districts and industries to the inspection teams on random basis through a mobile application developed by the IT Division, CPCB.

(ii) District is allotted a day before the inspection while the industries to be inspected are allotted on the day of the inspection itself to the team leaders of the inspection team to ensure random selection of industries and surprise inspection

(iii) A general inspection format designed to ensure inclusion of all essential data irrespective of the industrial sector

(iv) Coding and sealing of samples collected during inspection

(v) Time-line for submission of inspection report

(vi) sampling as per mandate of statutory provisions , serving of notice under Form-I under the Environment (Protection) Act, 1986 to the occupier of the industry as well as handing over sealed, signed duplicate samples to the industry representative

(vii) Provision of geotagging of inspection sites and photographic documentation during inspection

(viii) Forwarding inspection reports of GPIs, CETPs and STPs through a dedicated portal, to UPPCB for necessary action

Copy of the SOP mentioned above, is annexed herewith at **Annexure-4.**

6. That, the inspections by CPCB teams commenced on 26.08.2022 and till 20.09.2023, a total of 1006 inspections have been completed including 962 GPIs located in 27 districts of Uttar Pradesh, 36 STPs in ten (10) districts and eight (08) CETPs/ CCRU in five (05) districts.

7. That, CPCB has filed operational and compliance status of 276 GPIs, 36 STPs & 08 CETPs before the Hon'ble High Court through following affidavits:

i. Compliance affidavit dated 23.09.2022 including compliance status of 61 GPIs, 13 STPs (excluding STPs for which lab results were awaited) & 06 CETPs

ii. Compliance affidavit dated 31.10.2022 including compliance status of 154 GPIs (including 61 filed earlier), 17 STPs (excluding STPs for which lab results were awaited) & 2 CETP

iii. Compliance affidavit dated 30.11.2022 including compliance status of 276 (including 154 filed earlier) GPIs & 03 STPs

Copies of the abovementioned affidavits dated 23.09.2022, 31.10.2022 and 30.11.2022 are annexed herewith at **Annexure- 5(a), 5(b) and 5(c) respectively.**

8. That, CPCB also prepared affidavits including compliance status of 110 GPIs & 02 STPs (reports of which were forwarded to UPPCB for taking actions) to be filed in February, 2023 and 253 GPIs & 01 STP to be filed in July, 2023. However, it was informed by the Ld. Counsel that the said affidavits could not be filed before the Hon'ble High Court as the matter was under consideration for transferring the same to Hon'ble NGT. Copies of the aforementioned affidavits are annexed collectively at **Annexure-6.**

9. That, in furtherance to the compliance affidavits filed before the Hon'ble High Court as mentioned in para 7 and status as mentioned in para 8 above, operational & compliance status of remaining 323 GPIs, out of the total 962 reports received, is being presented in this affidavit.

Grossly Polluting Industries

10. That, as on 20.09.2023, total 962 inspection reports of GPIs (including 602 operational units and 360 non-operational units) have been received. Out of the 602 operational GPIs; 272 GPIs have been found complying and 298 are non-complying.

Re-inspection has been recommended for 60 GPIs which were either found non-operational in view of roster issued by UPPCB or found operating dry process during inspection.

Compliance of the operational units have been verified with respect to industry specific effluent discharge norms as prescribed under the Environment (Protection) Rules, 1986 Schedule-I. The analysis results of grab samples taken from ETP outlet of the industrial units are compared with notified standards for compliance verification.

11. That, the details of operational and compliance status of 276 GPIs, have already been filed by CPCB before Hon'ble High Court of Allahabad as mentioned in para 7 above. Compliance status of 363 GPIs (110+253) as mentioned in Para 8 above is already annexed at Annexure-6 as stated above.

In continuation of the status of 639 GPIs (276+363) mentioned above, operational and compliance status of 323 GPIs is being presented in this affidavit as below.

As per the 323 inspection reports, 176 GPIs were found operational and 147 were found non-operational. Out of the 176 operational GPIs, 69 GPIs have been found complying and 95 non-complying.

Re-inspection has been recommended for 40 GPIs which were either found non-operational in view of roster issued by UPPCB (28 GPIs) or found operating dry process (12 GPIs) during inspection. Operational and compliance status of the 323 GPIs is presented in tabular form in Table 1 as following: -.

ORDER

1. In terms of the earlier order passed by this Court on July 7, 2022, explanation of the official concerned has been received. Let the same be placed on the administrative side.

2. Order dated 29.10.2021 records the stand of U.P. Pollution Control Board that samples drawn by it were found meeting general standard

prescribed for discharge of pollutants in the river. The order also records that Sri A.K. Gupta, learned Amicus Curiae and Sri V.C. Srivastava, learned counsel had disputed the correctness of statement made by learned counsel appearing for U.P. Pollution Control Board. In order to assess the ground situation, as agreed between the parties, a Committee was constituted for drawing samples to be got tested from independent agencies apart from U.P. Pollution Control Board. Regional Officer, U.P. Pollution Control Board along with his team of technicians were required to be present when the samples were to be drawn.

3. Four number of samples were drawn from each point. One sample was sent to U.P. Pollution Control Board. Two sets of each sample were sent for testing to I.I.T., Kanpur and I.I.T., B.H.U. The Director, I.I.T., Kanpur and Director, I.I.T., B.H.U. were requested to send their reports in sealed cover. The reports have been submitted in sealed cover. The sealed covers were opened today in Court. The reports are taken on record.

4. The samples taken from seven different places were not found to be meeting the required parameters. The reports of I.I.Ts are to the same effect. Even as per testing report received from the U.P. Pollution Control Board, the sample was not meeting the required standards. However, there was variation in results as compared to the reports of I.I.Ts.

5. Learned counsel appearing for U.P. Pollution Control Board seeks time to respond to the aforesaid reports and apprise the Court as to what action is proposed to be taken against the agencies entrusted with the work of treatment of the effluents. He will also apprise the Court as to how many samples were taken by different authorities from industries who have set up their ETPs and

were not found to be meeting the required parameters and what action is to be taken against them.

6. As regards discharge of treated water from the STPs set up in Allahabad, the stand taken by learned counsel for the State is that in case, the effluent which comes in STP is more than the capacity, the parameters of discharge of treated water are relaxed.

7. It was further pointed out that the functioning of the effluent treatment plants set up by different authorities in the State is being supervised by the Jal Nigam, which apparently does not have any expert team for water treatment, especially the sewerage effluent.

8. Due to lack of planning, it is evident that the STPs set up in different cities, as we see from the example at Allahabad, are not of required capacity. Meaning thereby, chance is given to violate the parameters required for the treatment of effluent. May be, some other agency is required, having the experts, for supervising the working of STPs in the State which may properly monitor STPs.

9. From the planning of the U.P. Jal Nigam, it is evident that major factor for increase and discharge in these drains has not been taken into consideration i.e, transit population in the city, which runs in crores.

10. Learned Amicus Curiae has pointed out that in the counter affidavit filed by P.K. Mishra, Scientist 'E' & Incharge CPCB, Zonal Office (North), Lucknow dated December 23, 2016, details of various polluting industries which are causing pollution in river Ganga, have been furnished. In Uttar Pradesh, there are 687 units which are generating 269 MLD of waste water. Besides that, there

are number of STPs set up by the local bodies to prevent discharge of sewage effluent from different cities. The U.P. Pollution Control Board had not been taking any action against any of the persons or authorities who are violating the provisions of various statutes dealing with pollution.

11. We had asked the U.P. Pollution Control Board to draw samples from the STPs set up in the State of Uttar Pradesh which may be discharging water in river Ganga and the STPs in different cities on the bank of river Ganga. The report should also suggest the ways and means to local authorities to ensure that untreated, polluted sewage water is not discharged in river Ganga. We all know that thousands of crores of rupees have already been spent to clean river Ganga under Namami Gange Project but with hardly any result.

12. In the aforesaid factual matrix, we are constrained to direct Central Pollution Control Board to collect samples from all the industries as mentioned in affidavit dated December 23, 2016 and the STPs set up in the cities on the embankment of river Ganga and submit a report to this Court as to whether these meet the prescribed standards. Needful may be done in due course. However, test reports of samples collected and reports prepared before the next date of hearing be submitted in Court.

13. At the time of hearing, it was pointed out that Namami Gange project is being monitored by the Director General, National Commission for Clean Ganga under Ministry of Jal Shakti, Central Government.

14. We direct the Director General, National Commission for Clean Ganga, under Ministry of Jal Shakti, Central Government to apprise the Court as to how much amount has been spent on cleaning river Ganga and how much has

been allocated and disbursed to State of Uttar Pradesh, the purpose therefor and as to whether the amount was spent for the purpose assigned.

15. From the affidavit of P.K. Mishra, Incharge, Central Pollution Control Board dated December 23, 2016, it is evident that certain developments have taken place for shifting of tanneries in Kanpur and Unnao. As to whether it has served the purpose of collection and treatment of effluent, the Court need to be apprised.

16. A copy of this order be sent to the Chairman, Central Pollution Control Board, Delhi to ensure compliance thereof.

17. Let copies of reports of I.I.T., Kanpur and I.I.T., BHU be given to Sri V. C. Srivastava learned counsel, learned Amicus Curiae and learned counsel for the State.

18. Adjourned to August 31, 2022. To be taken up at 2:00 p.m. along with all connected matters.

19. Copy of this order be placed on record of connected cases.

HON'BLE AJIT KUMAR, JUDGE

ORDER

1. In paragraph no. 14 of the order passed by this Court on July 27, 2022, Director General, National Commission for Clean Ganga,

under Ministry of Jal Shakti, Central Government, was directed to apprise the Court as to how much amount has been spent on cleaning river Ganga and how much has been allocated and disbursed to the State of Uttar Pradesh. Details were also required to be furnished regarding purpose therefor and as to whether the amount has been spent for the purpose assigned or not.

2. No information has been furnished.

3. Learned Additional Solicitor General of India appearing for Union of India prayed for short adjournment to furnish the information.

4. In paragraph no. 12 of the aforesaid order, Central Pollution Control Board was directed to collect samples from all the industries as mentioned in affidavit dated December 23, 2016 and the STPs set up in the cities on the embankment of the river Ganga and submit a report to this Court.

5. Learned counsel appearing for Central Pollution Control Board prayed for more time stating that 28 teams were constituted and some samples have been collected. However, the test reports thereof earlier received have not been placed as reports are still awaited.

6. In the last order, we had made certain observations regarding working of the Uttar Pradesh Pollution Control Board. Even today, learned counsel does not have any information with reference to the complaints filed for violation of the environmental laws or the action taken against any of the industrial unit. He further submitted that the Board is in process of seeking sanction for prosecution of the officers who are the Heads of Departments.

7. Learned counsel for the Uttar Pradesh Jal Nigam (Rural/ Urban) fairly submitted that there is no Environment Engineer in service in the U.P. Jal Nigam (Rural/ Urban) throughout the State though they are supervising the functioning of all the STPs. At Prayagraj, though operation of six STPs is being done by private agencies but that are all being supervised by U.P. Jal Nigam (Rural). He further submitted that

there is one STP operated by a private contractor and supervised by U.P. Jal Nigam (Urban).

8. We could find out from the argument of learned counsel for U.P. Jal Nigam (Rural/ Urban) that there is no proper method for calculation of the discharge from various drains and affluent being generated in the city so as to facilitate setting up of plants to treat the same as per requirement. It was submitted that to take care of migratory population of city at Prayagraj, temporary collection and treatment units are set up by the U.P. Jal Nigam (Rural/ Urban). Learned counsel for the U.P. Jal Nigam (Rural/ Urban) submitted that in the Namami Gange project, the responsibility of collection and treatment of entire sewerage has been put on the U.P. Jal Nigam (Rural/ Urban).

9. It further transpired at the time of hearing that the storm water in the city which is channelized through various open drains is managed by Nagar Nigam and before these drains fall in river Ganga, the water is treated by bio remediation methods.

10. Mr. Gupta, learned Senior Counsel who was requested to assist the Court, submitted that a site plan has been produced by U.P. Jal Nigam (Rural/ Urban) along with the supplementary affidavit dated February 15, 2022 filed by Principal Secretary, Namami Gange and Rural Water Supply Department, Government of U.P., Lucknow, which shows that total number of cities/ districts through which river Ganga passes in the State of Uttar Pradesh, is 15 and there are only 32 STPs. Some of the cities such as Unnao, Shuklaganj, Raibareily, Pratapgarh, Chandauli, Ghazipur and Ballia do not have even a single STP, whereas, some cities have more than one, which may not be to the extent of capacity required to treat the entire affluent of sewerage water.

11. Learned counsel for Central Pollution Control Board also pointed out that the tanneries in city of Kanpur have not been shifted anywhere, as per the information available with him.

12. In view of the above, we direct:

(i) The Director General, National Commission for Clean Ganga, under Ministry of Jal Shakti, Central Government to furnish the information as noticed in paragraph no. 14 of the order dated July 27, 2022;

(ii) Central Pollution Control Board shall furnish the test reports of the samples collected and available up to the next date of hearing in terms of directions issued in paragraph no. 12 of the order passed on July 27, 2022;

(iii) Uttar Pradesh State Pollution Control Board is directed to furnish information with reference to the testing of various samples and the complaints filed where the test reports were not as per the parameters. The status report of the sanction sought for the prosecution of officers who are responsible for violating various provisions of environmental laws be also submitted to the Court;

(iv) Uttar Pradesh Jal Nigam (Rural/ Urban) is directed to furnish information and apprise the Court about the fact as to how operation of various STPs is being supervised by it without even a single Environment Engineer on their roll;

(v) Nagar Nigams of Prayagraj, Varanasi and Kanpur to place on record the site plans of the cities depicting the sewerage lines laid down and with which STP the same is connected. The plan should also depict the open drains passing through the city before these fall into river Ganga or Yamuna; and

(vi) Nagar Nigams of Prayagraj, Varanasi and Kanpur are directed to furnish information regarding treatment of untapped drains in the city by using Bio Remediation methods and the quantity of discharge treated and the amount spent thereon. As to whether final discharge from these drains before it falls into river Ganga and Yamuna is tested, may also be pointed out.

13. Adjourned to September 26, 2022. To be taken up at 2.00 p.m. along with all the connected matters.

14 Let a copy of this order be placed on record of connected cases.

Sub: Forwarding of inspection reports of Grossly Polluting Industries, Common Effluent Treatment Plants & Sewage Treatment Plants located in state of Uttar Pradesh carried out by CPCB teams in compliance to the Hon'ble High Court of Allahabad order dated 27.07.2022 in PIL No.4003 of 2006 -reg

Sir,

In compliance with the Hon'ble High Court of Allahabad order dated 27.07.2022 in the matter of Public Interest Litigation (PIL) no. 4003 of 2006 (Re- Ganga Pollution vs. State of U.P. and Others), Central Pollution Control Board (CPCB) constituted inspection teams which have been carrying out inspections of Grossly Polluting Industries (GPIs), Sewage Treatment Plants (STPs) and Common Effluent Treatment Plants (CETPs) located in the state of Uttar Pradesh, w.e.f. 26.08.2022. As on October 12, 2022, inspection of 210 GPIs, 35 STPs and 8 CETPs have been completed.

Further, the Hon'ble High Court of Allahabad, vide order dated 26.09.2022, has also directed the following:

> *".....10. Learned counsel for the U.P. Pollution Control Board shall also apprise the Court about the contents of the affidavit filed by the Central Pollution Control Board whereby number of GPIs were not found to be meeting the parameters laid down for treatment of discharge of effluents."*

In accordance with the aforementioned order of the Hon'ble High Court and proceedings held on 26.09.2022 in the Court, action against the non-complying, non-operational GPIs, STPs & CETPs based on the inspection reports shall be taken by UPPCB.

In view of the above, CPCB has made arrangement for forwarding of these inspection reports to UPPCB through a dedicated portal (http://cpcbinspection.co.in/cpcbinspection)/e-mail. Access to the portal has been made available to UPPCB to download these reports. UPPCB shall also be able to upload the action taken status of these GPIs, STPs & CETPs on the same portal.

Inspection reports of 37 GPIs have been uploaded on portal for perusal and necessary action as per the Hon'ble Court orders. Action taken reports may also be shared/ uploaded through the portal.

Yours faithfully,

> ***"12 (ii). Central Pollution Control Board shall furnish the test reports of the samples collected and available up to the next date of hearing in terms of directions issued in paragraph no. 12 of the order passed on July 27, 2022;"***

3. That, in compliance to the above orders CPCB constituted 28 teams of CPCB officials and subsequently increased the number of teams to 33 to undertake surprise and random inspection of 1370 Grossly Polluting Industries (GPIs), 35 Sewage Treatment Plants (STPs) and eight (08) Common Effluent Treatment Plants (CETPs)/Common Chrome Recovery Unit (CCRU) located in the State of Uttar Pradesh.

4. That, to ensure timely and efficient completion of the inspection of these GPIs, STPs and CETPs, a Standard Operating Protocol (SOP) as given below was followed:

(i) Allotment of districts and industries to the inspection teams is on random basis through a mobile application developed by the IT Division, CPCB. District is allotted a day before the inspection while the industries to be inspected are allotted on the day of the inspection itself to the team leaders of the inspection team to ensure random selection of industries and surprise inspection.

(ii) A general inspection format designed to ensure inclusion of all essential data irrespective of the industrial sector.

(iii) Coding and sealing of samples collected during inspection.

(iv) Time-line for submission of inspection report.

(v) Legal sampling, serving of notice under Form-I under the Environment (Protection) Act, 1986, to the occupier of the industry as well as handing over sealed, signed duplicate samples to the industry representative.

(vi) Provision of geotagging of inspection sites and photographic documentation during inspection.

5. That, the inspections by CPCB teams commenced on 26.08.2022 and till 19.09.2022, a total of 170 inspections i.e 143 GPIs located in 24 districts, 19 STPs in six (06) districts and eight (08) CETPs in five (05) districts of Uttar Pradesh have been have been inspected.

6. That, samples collected by CPCB teams during inspection are analysed in NABL (National Accreditation Board for Testing and Calibration Laboratories) accredited CPCB laboratories at Head Office Delhi and CPCB Regional Directorate Lucknow; parameters analysed include those prescribed in unit's Consolidated Consent to operate and Authorization (CCA) and industry specific effluent discharge standards as notified under the Environment (Protection) Rules, 1986.

7. That, of the total 170 inspections completed, 120 were found operational (95 GPIs, 17 STPs and 8 CETPs/CCRU) and samples from these units were submitted for laboratory analysis. As on 19.09.2022, laboratory analysis reports have been received for 51 operational GPIs, 11 STPs and six (06) CETPs and accordingly inspection reports have been prepared for 61 GPIs (including 10 non-operational), 11STPs and six (06) CETPs.

Grossly Polluting Industries

8. That, as per the inventory provided by Uttar Pradesh Pollution Control Board (UPPCB) for the year 2021, 1370 GPIs along with 8 CETPs/CCRU are located in Uttar Pradesh, out of which 868 GPIs have potential to discharge into river Ganga mains stem and 510 GPIs have potential to discharge into river Yamuna main stem.

9. That, as on 19.09.2022, 61 inspection reports of GPIs (including 10 non-operational units) have been made available on the CPCB inspection portal by the inspection teams. The operational and compliance status of 61 GPIs is presented in tabular form in Table 1.

10. That, out of 61 GPIs; 30 were found complying, 21 were non-complying and 10 GPIs were found non-operational during inspection. Compliance of the operational

units have been verified with respect to industry specific effluent discharge norms as prescribed under the Environment (Protection) Act, 1986 Schedule-I. The analysis results of grab samples taken from ETP outlet of the industrial units are compared with notified standards for compliance verification.

17. That it is humbly submitted before this Hon'ble Court that shifting of tanneries in Kanpur and Unnao did not take place. There are about 320 tannery units are located in Jajmau, 27 tannery units in Banthar and 15 tannery units in Unnao which are connected to Common Effluent Treatment Plants (hereinafter "CETPs") at Jajmau, Banthar and Unnao respectively. Further, there are 12 stand alone tannery units operating in Kanpur and Unnao region. A new CETP of 20 MLD capacity and a Common Chrome Recovery Unit (hereinafter referred to as "CCRU") of 900 KLD have been approved by National Mission for Clean Ganga (hereinafter referred to as NMCG) and the same are under construction stage near existing CETP in Jajmau, Kanpur. NMCG has also sanctioned the upgradation of existing CETP treatment schemes at Banthar and Site-II, Unnao.

Prayer

18. That, it is, most respectfully prayed that this Hon'ble Court may graciously be pleased to allow the Central Pollution Control Board an additional minimum time of about five (05) months, to undertake inspections, sample analysis and report preparation of all GPIs and STPs located in state of Uttar Pradesh by CPCB teams.

19.That, in view of the facts indicated herein above, it is respectfully submitted that this Answering Respondent No. 10 shall abide by any order or directions, that may be passed by this Hon'ble Court.

I, the deponent named above, do hereby solemnly affirm and verify that the contents of paragraphs No.1, 18., 19 of the affidavit are true to my personal knowledge; those of paragraphs no. 2 To 17 are based on perusal of records; and those of paragraph no. MINISTRY OF ENVIRONMENT, FOREST AND CLIMATE CHANGE

NOTIFICATION

New Delhi, the 13th October, 2017

G.S.R. 1265(E).—In exercise of the powers conferred by sections 6 and 25 of the Environment (Protection) Act, 1986 (29 of 1986), the Central Government hereby makes the following rules further to amend the Environment (Protection) Rules, 1986, namely:-

1. **Short title and commencement.**—(1) These rules may be called the Environment (Protection) Amendment Rules, 2017.

(2) They shall come into force on the date of their publication in the Official Gazette.

2. In the Environment (Protection) Rules, 1986, in Schedule – I, after serial number 104 and the entries relating thereto, the following serial number and entries shall be inserted, namely:—

Sl. No.	Industry	Parameters	Standards	
1	2	3	4	
		Effluent discharge standards (applicable to all mode of disposal)		
"105	Sewage Treatment Plants (STPs)		Location	Concentration not to exceed
			(a)	(b)
		pH	Anywhere in the country	6.5-9.0
		Bio-Chemical Oxygen Demand (BOD)	Metro Cities*, all State Capitals except in the State of Arunachal Pradesh, Assam, Manipur, Meghalaya Mizoram, Nagaland, Tripura Sikkim, Himachal Pradesh, Uttarakhand, Jammu and Kashmir, and Union territory of	20

			Andaman and Nicobar Islands, Dadar and Nagar Haveli Daman and Diu and Lakshadweep	
			Areas/regions other than mentioned above	30
		Total Suspended Solids (TSS)	Metro Cities*, all State Capitals except in the State of Arunachal Pradesh, Assam, Manipur, Meghalaya Mizoram, Nagaland, Tripura Sikkim, Himachal Pradesh, Uttarakhand, Jammu and Kashmir and Union territory of Andaman and Nicobar Islands, Dadar and Nagar Haveli Daman and Diu and Lakshadweep	<50
			Areas/regions other than mentioned above	<100
		Fecal Coliform (FC) (Most Probable Number per 100 milliliter, MPN/100ml	Anywhere in the country	<1000

*Metro Cities are Mumbai, Delhi, Kolkata, Chennai, Bengaluru, Hyderabad, Ahmedabad and Pune.

Note :

(i) All values in mg/l except for pH and Fecal Coliform.

(ii) These standards shall be applicable for discharge into water bodies as well as for land disposal/applications.

(iii) The standards for Fecal Coliform shall not apply in respect of use of treated effluent for industrial purposes.

(iv) These Standards shall apply to all STPs to be commissioned on or after the 1st June, 2019 and the old/existing STPs shall achieve these standards within a period of five years from date of publication of this notification in the Official Gazette.

(v) In case of discharge of treated effluent into sea, it shall be through proper marine outfall and the existing shore discharge shall be converted to marine outfalls, and in cases where the marine outfall provides a minimum initial dilution of 150 times at the point of discharge and a minimum dilution of 1500 times at a point 100 meters away from discharge point, then, the existing norms shall apply as specified in the general discharge standards.

(vi) Reuse/Recycling of treated effluent shall be encouraged and in cases where part of the treated effluent is reused and recycled involving possibility of human contact, standards as specified above shall apply.

(vii) Central Pollution Control Board/State Pollution Control Boards/Pollution Control Committees may issue more stringent norms taking account to local condition under section 5 of the Environment (Protection) Act, 1986".

ORDER

1. The issue for consideration is effluent discharge standards for STPs as laid down vide Notification dated 13.10.2017 by way of Environment (Protection) Amendment Rules, 2017 against Serial No. 105 of Schedule-I to the Environment (Protection) Rules, 1986.

2. Vide order dated 21.12.2018, this Tribunal noted that untreated or partially treated sewage is a major source of pollution in the country.

The Hon'ble Supreme Court in the case of *Paryavaran Suraksha Samiti & Anr. Vs. Union of India & Ors.*[1] directed taking of steps so that huge gap in sewage generated and treated is bridged.

3. The Tribunal also noted that the proposed standards as per Draft Notification dated 24.11.2015 issued by Ministry of Environment, Forest & Climate Change (MoEF & CC) are sought to be diluted by the impugned Notification as follows:

Sr. No.	Parameters	Old Norms 1986	Draft Norms Nov., 15	MoEF& CC Notification October 2017
1.	Biochemical Oxygen Demand (BOD) (mg/l)	<30	<10	<30 and <20 (metro cities)
2.	Chemical Oxygen Demand (COD) (mg/l)	<250	50	No limit
3.	Total Suspended Solids (TSS) (mg/l)	<100	<20	<100 and <50 (metro cities)
4.	Total Nitrogen (mg/l)	<100	<10	No limit
5.	Ammonical Nitrogen (mg/l)	<50	<5	No limit
6.	Total Phosphorus (mg/l)	No limit	No limit	No limit
7.	Fecal Coliform MPN/100 ml	No limit	<100	<1000

4. The Tribunal also noted that the relaxed standards will deteriorate the water quality and degrade the environment and be a retrograde

[1](2017) 5 SCC 326

step. The dilution will also affect the human life and the water quality of the rivers.

5. Accordingly, the Tribunal constituted an Expert Committee comprising the nominees from IIT Kanpur, IIT Roorkee, NEERI and CPCB which was to give its report after examining the best available technologies and best practices and after referring to the Experts study on the subject particularly CPCB Report on "River Stretches for Restoration of Water Quality, 2014-15" and the order of this Tribunal on the subject of polluted river stretches dated 20.09.2018 in Original Application No. 673/2018 in the matter of News item published in *"The Hindu" authored by Shri Jacob Koshy titled "More river stretches are now critically polluted : CPCB"*. The Tribunal also directed stay of operation of the impugned Notification and application of pre-revised standards till further orders.

6. Accordingly, report has been received from CPCB vide e-mail dated 30.04.2019 forwarding the Expert Committee report. The report noted the current status of water quality of rivers which flows in India and the fact that 351 river stretches out of 323 rivers were polluted. There was need for revised standards for BOD and COD with a view to protect the water quality of the rivers/streams. There was also a need for revised standards for TSS, for Nitrogen (Ammonia & Nitrates) and Phosphorus and for Fecal Coliform.

7. The Committee while discussing the need for revised the Standards for BOD and COD observed that:

"Inclusion of COD in sewage discharge certainly offers advantages in terms of early diagnosis on functioning of STPs and thus helps in resorting immediate measures/corrective actions. This is because analysis of COD is completed within 5 Hours as against 5 days at 20°c or 3 days at 27°C for BOD (Sawyer & Mccarty, V. Edition). Moreover, if Government wishes to regulate STPs across the county through online monitoring system in future, inclusion of COD in Discharge Standards will prove beneficial for the reason that COD sensors are quite reliable and readily available in Indian market, however the same is not the case with BOD sensors. Thus, from regulatory point of view also, COD is an important parameter and needs to be included in sewage Discharge Standards."

While discussing the need for revised standards for TSS the Committee has observed that:

" The Microbial quality of wastewater could be linked with the TSS concentration. The larger the Suspended solids, the larger shall be the presence of bacteria, protozoa and viruses. High TSS wastewater cannot be easily disinfected, as the suspended particles "hide" these microorganisms and also react with chemical disinfectants."

Further the committee observed:

"A well designed and operated conventional sewage treatment system such as activated sludge process can meet 20 mg/L effluent TSS discharge standards. Many STPs bases on secondary wastewater treatment all over the globe are able to achieve 10-20mg/L. TSS without any tertiary treatment."

50.

Further with regard to the need for revised standard for Nitrogen (Ammonia & Nitrates) and Phosphorus it has been elaborated by Committee that:

"Nitrogen and phosphorus in all forms are major rate limiting elements essential for the growth of alage and other vegetation in water bodies leading to a state called eutorphication. The greenish color water with large vegetation growth is common sight for not only lakes and ponds but also slow moving rivers.

Eutrophication arises from the oversupply of nutrients (N & P), which leads to overgrowth of plants and alage. Degradation of dead alage and plants by microbes consumes dissoloved oxygen in the water, thereby creating the state of hypoxie.

Eutrophication leads to many problems related to water quality:

- *Large Dissolved oxygen variation leads to fish kills*
- *Filling the water body with dead algae and other vegetation.*
- *Decomposition of dead algae and vegetation at the bottom causing oxygen depletion and further release of nutrient.*
- *Release of algal toxins and odors causing substances make the water unsuitable for human and animal consumption."*

The Committee has also observed that:

Due to the absence of dilution and worsening of our rivers and lakes, it is necessary to move towards nutrients (nitrogen and phosphorus) regulations in water bodies.

51.

The Committee while discussing the revised standards for Fecal Coliforms observed:

"As per "Houses and Household Amenities, Latrine Facility, Census of India - 2011, Registrar General and Commissioner, India" available at http://censusindia.gov.in/ 2011census/hlo/ Data sheet/ India / Latrine. Pdf; Out of 7.9 Crores Urban Households (UHH), nearly 1.7 Crores UHH (i.e. 20 %) lacks adequate sanitation. At the same time more than 5 lakhs villages in the country are now open defecation free (ODF) (https:// sbm.gov.in/ sbmdashboard / ODF.aspx.) Although rural parts are covered through sanitary toilets, effluent from septic tanks from newly built 9.2 crores toilets across the country is unavoidable. This may pose very high health risk owing to the fact that "Sanitation" including collection, conveyance and treatment is either absent or inadequate in such areas. ***Relaxing FC pose risk to downstream cities/town/villages that rely on drinking water source on same water body in case of rivers. It appears quite reasonable to say that FC Standards be prescribed to 100 MPN/100 ml. considering its impact on human health in general and readiness of Indian wastewater sector to handle the same (Recommended value of FC in CPHEEO Manual, 2013 is MPS230/100 ml.).*** *(emphasis added)*

Hence, CPHEEO 2013 recommended the following guidelines for treated sewage discharge into surface water which after some travel may join a ***drinking water source to be used as source of supply for drinking water as given in following Table 5.20***

Table 5.20 Recommended Guidelines for Treated Sewage if Discharged into Surface Water to be used as source of Drinking Water.

52.

Parameter	MoEF Standards (A)	Recommended Values
BOD, mg/L	30	Less than 10
SS, mg/L	100	Less than 10
TN, mg/L	100	Less than 10
Dissolved P, mg/L	5	Less than 2
Faecal Coliforms, MPN/100 mL	Not specified	Less than 230

(A) General Standards, Environmental Protection Rule, 1986 & as authorized by PCB

• In order to achieve the above values, the treatment process would need to be designed for nutrient removal in addition to the conventional BOD and SS removal. It has also been reported that if the nutrients were removed to the levels mentioned in Table 3.20, then the amount of chlorine required for disinfection would be less at about 5 mg/ l.

Considering aforementioned analysis, the Chairman CPCB directed all State Pollution Control Boards to make it mandatory for local bodies to set up sewerage systems for treatment and disposal of sewage to meet the prescribed standards ie., pH 6.5-9, BOD (mg/L): Not more than 10, COD (mg/L): Not more than 50, TSS (mg/L) : Not more than 20, NH_4-N (mg/L): Not more than 5, N-total (mg/L) Not more than 10 ,Fecal Coliforms (MPN/100 ml) Less than 230. The details are provided in Annexure 1."

8. The report further mentions that the stringent standards in terms of Draft Notification dated 24.11.2015 are not only economically viable

53.

and technically feasible, the cost will not be significantly high. In this regard, it was observed:

"7.0 ECONOMIC VIABILITY & RESOURCE POSITION

1. For Nitrification (Conversion of ammonia to nitrate), 20-30% larger aeration tanks are required with additional 40-50 % aeration demand. The Total capital and O&M cost of the system increases by 10-20 & 5-10 % respectively.

2. For further removal of nitrate from wastewater, denitrification (conversion of nitrate to Nitrogen gas) is needed by additional anoxic tank in the system. The capital cost further increases by 5-10 %. Nevertheless, denitrification gives 25 % oxygen credit which reduces 25 % aeration requirement.

3. Finally, overall capital and operational cost implications for achieving standards for metropolitan and class-I cities shall be 20-30 %.

4. Typical total unit costs for wastewater treatment based on experience gained in Western Europe and the USA is presented in Figure XX (WHO/ UNEP 1997), The total unit cost for secondary treatment (BOD < 20-30 mg/L, & TSS < 50-100 mg/L) varies between 1.5-2.0 US$/m3, while for tertiary treatment (BOD, TSS & TN < 10 mg/L) it is 2.0-2.5 US$/m3. The additional burden is approximately 25-33 % which matches with Indian experience as well.

5. In recent years, many STPs are constructed based on effluent BOD, TSS & TN < 10 mg/L) and all the well operated and maintained STPs are providing the desired effluent quality. Some of these STPs are monitored by IIT Roorkee in recent years under several research projects and NGT reports. The performance evaluation results for 20 MGD Nilothi STP, 20 MLD Pappan Kalan STP, 15 MLD Delhi Gate STP and 5 MGD Kapashera STP of Delhi submitted to NGT alongwith 3.0 MID

STP, Rishikesh, 1 MGD STP, Delhi, 27 MGD STP, Haridwar etc., monitored under various research projects is attached as Annexure 3.

6. CPCB has also conducted study on technological achievability of proposed standards. Delhi Jal Board has installed and commissioned 04 STPs on advanced treatment technology along with coliform reduction facilities.

7. In addition, the following STPs all over India are producing the desired quality: 1.5 MLD STP, Cubbon Park, Bangalore, 2.0 MLD STP, Pahalgam, 3.5 MLD STP, Tapovan, Rishikesh, 4.0 MLD STP, IIT' Madras, 12.5 MLD STP, Tonca, Goa, 15.0 MLD STP, Gorakhpur, 17.3 MLD STP, Zirakpur, Punjab, 18 MLD STP, Sarai, Haridwar, 20.0 MLD STP, Hyderabad, 20.0 MLD Sangvi, Pune, 30 MLD STP, Hyderabad, 37.5 MLD STP, UP Housing Board, Lucknow, 40.0 MLD Kharadi, Pune, 40.0 MLD STP, Hubbali, Karnataka, 45 MLD STP, Mundhwa, Pune, 50 MLD STP Kalamboli, Navi Mumbai, 54 MLD STP, Noida, 55.0 MLD, Singanpure, Surat, 56 MLD STP, Indirapuram, Ghaziabad, 68.0 MLD STP, Dehradun, 100 MLD STP, Vashi Navi Mumbai, 130 MLD STP, Nagpur, 137 MLD STP, Greater Noida, 245 MLD STP Indore, etc.

8. In practical experience with actual tendered cost, the experience has been quite differing. Many tenders based on old and less stringent quality standards have been awarded at much higher per MLD cost as compared to STPs having more stringent standards. Plus on a long term basis, new technologies have lower life cycle costs. Other factors which are encouraging most corporations and contractors to adopt new technologies are more compact designs, less land requirement, less construction time, better material of construction, less maintenance cost, automation and less dependency on expensive trained manpower to operate plants in remote locations."

9. Accordingly, the Committee further observed that:

"• *The new stringent standards are devised considering the deterioration condition of water bodies and unavailability of adequate dilution water in our water bodies. If not stringent quality standards are not implemented then in the coming future with more population burden on rivers, situation will further deteriorate.*

- *The greatest benefit of these standards is to achieve all purpose non-portable reuse quality effluent. Each STP is to be treated as a source of water for reuse and recycling, helping in mitigating drought/climate change in the country. It will also reduce exploitation of groundwater reserves and dependency on rainfall which has become quite unpredictable in the past few years. Climate change is a reality that should be addressed and adopted for in the coming future. It will go a long way in reducing agricultural dependency on bore well water.*
- *If treatment of wastewater is not carried out with intention of reuse and recycle expenditure on conveyance/long distance transport of water/sewage will be much higher. Even as on toady in many cities cost of conveyance of water is much higher than the treatment of sewage to make it fit for most uses including domestic uses. For example the cost of transporting water from Narmada to fulfil water supply needs of Indore city (approximately @ Rs. 20/cum) is much higher than the cost of treating sewage to tertiary level."*

In view of above and severity of depletion of aquatic resources vis-a-vis the financial aspects related to conveyance and treatment of water/sewage the committee recommended that the effluent discharge for STPs to be as follows:

56.

Sl. No.	Industry	Parameters	Standards (Applicable to all mode of disposal)			
1	2	3	4			
	Sewage Treat-ment Plants (STPs)		Mega and Metropolitan Cities	Class I Cities	Others	Deep Marine Outfall

(ii) *All value in mg/l except for pH and Fecal Coliform.*

(iii) *These standards will be applicable for discharge into water bodies as well as for land disposal/applications.*

(iv) *These Standards shall apply to all new STPs for which construction is yet to be initiated.*

(v) *The existing/under construction STPs shall achieve these standards within 07 years from the date of notification.*

(vi) *In case where the marine outfall provides a minimum initial dilution of 150 times at the point of discharge and a minimum dilution of 1500 times at a point 100m away from discharge point, then norms for deep sea marine discharge shall be applied.*

(vii) *Reuse/Recycling of treated effluent shall be encouraged.*

(viii) *State Pollution Control Boards/Pollution Control Committees may make these norms more stringent taking into account the local conditions.*

"

10. We have heard Learned Counsel for the parties.

11. Learned Counsel for the applicant submits that while the Expert Committee is fully justified in suggesting parameters as per its report for Mega-Metropolitan Cities, there is no justification for different and diluted standards for Class-I cities, Other cities or Deep Marine Outfall and to that extent the report of the Expert Committee fall short of the required scientific logic and database. While

recommending the diluted standards for Class-I cities, Other cities or Deep Marine Outfall the Committee has not given any explanation with regard to the existing pollution load in these areas, the available systems in place, the efficacy of the systems in terms of meeting of norms, the population impacted by deteriorating water quality and likely consequences on health of people if these diluted norms are permitted. There is no scientific justification offered for diluting the norms for these areas in which the majority of country's population resides. Also such standards we feel must apply not only to new STPs but also to the existing ones. Further, there is no justification for non-application of such standards for seven years for existing STPs.

12. Learned Counsel for CPCB and interveners are unable to justify dilution of standards for areas other than Mega Metropolitan Cities or for existing STPs.

13. We find that there is no justification for diluted standards for areas other than Mega and Metropolitan Cities. The water quality standards are required to be same for the population of major cities or other cities. No justification has been shown for different standards for persons living in cities other than Mega and Metropolitan Cities. Major population of this country will be affected by diluted standards and only persons in Mega and Metropolitan Cities will have comparatively better standards without any valid reason or distinction. We may note that filters, UV filters etc. are facilities

mainly available in major cities and not in smaller cities or villages where the standards are proposed to be diluted.

14. Accordingly, we accept the report of the Expert Committee with the modification that the standards recommended for Mega and Metropolitan Cities will also apply to rest of the country. We also direct that the standards will apply not only for new STPs but also for existing/under construction STPs without any delay and giving of seven years time stands disapproved.

MoEF & CC may issue an appropriate Notification in the matter within one month from today.

The Application is disposed of.

(DEPONENT)

I, the deponent named above solemnly affirm and state on oath as under: -

1. That the deponent is Scientist 'E' & Regional Director at Regional Directorate, Lucknow, Central Pollution Control Board, PICUP Bhawan, Vibhuti Khand, Gomti Nagar, Lucknow, Uttar Pradesh, and is competent and authorized to file the present compliance affidavit on behalf of the respondent no.10, *i.e.*, Chairman, Central Pollution Control Board, Ministry of Environment Forest and Climate Change, Government of India, New Delhi (hereinafter "CPCB"), in pursuance to order dated 27.07.2022, 31-08-

2022 and 26.09.2022 passed by this Hon'ble Court in the above noted PIL No.4003 of 2006 Re- Ganga Pollution v. State of U.P. and others and as such he is fully conversant with the facts of the case in his official capacity deposed to below.

2. That, this Hon'ble High Court, Allahabad passed order, dated 27.07.2022 in present WPIL No. 4003 of 2006 (Re–Ganga Pollution Vs. State of U.P. and others). Verbatim of relevant para of order dated 27.07.2022 is reproduced below:

> *"12. In the aforesaid factual matrix, we are constrained to direct Central Pollution Control Board to collect samples from all the industries as mentioned in affidavit dated December 23, 2016 and the STPs set up in the cities on the embankment of river Ganga and submit a report to this Court as to whether these meet the prescribed standards. Needful may be done in due course. However, test reports of samples collected and reports prepared before the next date of hearing be submitted in Court."*

Verbatim of relevant para of subsequent judgement dated 31.08.2022 is reproduced below:

> ***"12 (ii).** Central Pollution Control Board shall furnish the test reports of the samples collected and available up to the next date of hearing in terms of directions issued in paragraph no. 12 of the order passed on July 27, 2022;"*

3. That, in compliance to the above orders CPCB constituted **33 teams** of CPCB officials to undertake surprise and random inspection of 1370 Grossly Polluting Industries (GPIs), 36 Sewage Treatment Plants (STPs) [one (01) STP at Vindyachal in district Mirzapur has been operationalized recently after filing of the previous compliance affidavit dated 23-09-2022] and eight (08) Common Effluent Treatment Plants (CETPs)/Common Chrome Recovery Unit (CCRU) located in the State of Uttar Pradesh.

4. That, to ensure timely and efficient completion of the inspection of these GPIs, STPs and CETPs, a Standard Operating Protocol (SOP) as given below was followed:

(i) Allotment of districts and industries to the inspection teams is on random basis through a mobile application developed by the IT Division, CPCB. District is allotted a day before the inspection while the industries to be inspected are allotted on the day of the inspection itself to the team leaders of the inspection team to ensure random selection of industries and surprise inspection.

(ii) A general inspection format designed to ensure inclusion of all essential data irrespective of the industrial sector.

(iii) Coding and sealing of samples collected during inspection.

(iv) Time-line for submission of inspection report.

(v) Legal sampling, serving of notice under Form-I under the Environment (Protection) Act, 1986, to the occupier of the industry as well as handing over sealed, signed duplicate samples to the industry representative.

(vi) Provision of geotagging of inspection sites and photographic documentation during inspection.

5. That, the inspections by CPCB teams commenced on 26.08.2022 and till 12.10.2022, a total of 250 inspections have been completed including 210 GPIs located in 24 districts of Uttar Pradesh, 32 STPs in ten (10) districts and eight (08) CETPs/ CCRU in five (05) districts.

6. That, samples collected by CPCB teams during inspection are analysed in NABL (National Accreditation Board for Testing and Calibration Laboratories) accredited CPCB laboratories at Head Office Delhi and CPCB Regional Directorate Lucknow; parameters analysed include those prescribed in unit's Consolidated Consent to operate and Authorization (CCA) and industry specific effluent discharge standards as notified under the Environment (Protection) Rules, 1986.

7. That, of the total 250 inspections completed, 185 units were found operational (149 GPIs, 28 STPs and 8 CETPs/CCRU) and samples from these units were submitted for laboratory analysis. **As on 12.10.2022**, laboratory analysis reports have been received for 140 of the operational units [106 GPIs, 26 STPs and eight (08) CETPs].

Grossly Polluting Industries

8. That, as per the inventory provided by Uttar Pradesh Pollution Control Board (UPPCB) for the year 2021, 1370 GPIs along with 8 CETPs/CCRU are located in

Uttar Pradesh, out of which 868 GPIs have potential to discharge into river Ganga mains stem and 510 GPIs have potential to discharge into river Yamuna main stem.

9. That, as on 12.10.2022, 154 inspection reports of GPIs (including 106 operational units whose laboratory analysis report were received and 48 non-operational units) have been made available on the CPCB inspection portal by the inspection teams. That, out of 154 GPIs; 64 were found complying, 42 non-complying and 48 GPIs were found non-operational during inspection. Compliance of the operational units have been verified with respect to industry specific effluent discharge norms as prescribed under the Environment (Protection) Act, 1986 Schedule-I. The analysis results of grab samples taken from ETP outlet of the industrial units are compared with notified standards for compliance verification.

10. The operational and compliance status of 154 GPIs is presented in tabular form in Table 1(A) & (B) as following: -.

*Number of GPIs as per inventory of 2021 received from Uttar Pradesh Pollution Control Board

17. That, the Hon'ble High Court of Allahabad, vide order dated 26.09.2022, also directed the following:

"*.....10. Learned counsel for the U.P. Pollution Control Board shall also apprise the Court about the contents of the affidavit filed by the Central Pollution Control Board whereby number of GPIs were not found to be meeting the parameters laid down for treatment of discharge of effluents.*"

Pursuant to the above, CPCB has made arrangements for forwarding the inspection reports to UPPCB(Uttar Pradesh Pollution Control Board) through a dedicated portal (http://cpcbinspection.co.in/cpcbinspection)/e-mail so as to take necessary action against the non-complying, non-operational GPIs, STPs & CETPs based on the inspection reports with effect from 13.10.2022. Access to the portal has been made available to UPPCB to download these reports. UPPCB shall also be able to

upload the action taken status of these GPIs, STPs & CETPs on the same portal. Action taken reports may also be shared/ uploaded through the portal. CPCB communicated the above to UPPCB vide CPCB letter dated 13.10.2022. A true copy of the **CPCB letter dated 13-10-2022** forwarding inspection reports to UPPCB is annexed herewith as **Annexure No. 6.**

CPCB has also developed a **Standard Operating Protocol (SOP)** for follow-up action by UPPCB which is as under:

1. *UPPCB shall take appropriate action within 15 days of receipt of inspection report and upload action on CPCB portal.*
2. *In case of non-compliance, UPPCB shall issue directions (Show-cause notice or closure directions) within 15 days of receipt of inspection reports. Further in case of Show Cause Notices, the unit shall be re-inspected and closure directions shall be issued in case of non-compliance within 30 days. Follow up inspections of Show Cause Notices shall be carried out by UPPCB officials.*
3. *Closure directions shall be issued by UPPCB to temporary closed units except seasonal and to those who have already informed SPCB about self-closure. After consideration of re-opening request, unit shall be re-inspected by UPPCB officials and compliance shall be verified.*
4. *If inspecting team is not allowed to enter in industries, SPCBs shall issue closure direction and random inspection of such units shall be carried out by UPPCB.*

5. *In case of by-pass of effluent/non-operational ETP/Non-Co-operation by Industries, closure direction including levying environmental compensation shall be issued within one week of receipt of report.*
6. *CPCB prepared "Guidelines for issuance of directions and revocation of closure directions issued under section 5 of E(P)A, 1986" vide office order dated 06.11.2018 for initiating action against non-complying units including issuance of show-cause notices/closure directions and revocation thereof based on levels of violation. UPPCB shall follow these guidelines.*

The above SOP has been forwarded to UPPCB vide CPCB letter dated 18.10.2022. A true copy of the CPCB's **SOP-letter** dated 18-10-2022 forwarded to UPPCB for follow-up action of inspection reports is annexed herewith as **Annexure-7.**

As on 17.10.2022, inspection reports of 55 GPIs were forwarded to UPPCB for perusal and necessary action. Subsequently, reports are being forwarded on daily basis.

अधिसूचना

नई दिल्ली, 13 अक्तूबर, 2017

सा.का.नि. 1265(अ).—केन्द्रीय सरकार, पर्यावरण (संरक्षण) अधिनियम, 1986 (1986 का 29) की धारा 6 और धारा 25 द्वारा प्रदत्त शक्तियों का प्रयोग करते हुए, पर्यावरण (संरक्षण) नियम, 1986 का और संशोधन करने के लिए निम्नलिखित नियम बनाती है, अर्थात् :—

1. **संक्षिप्त नाम और प्रारम्भ :**—(1) इन नियमों का संक्षिप्त नाम पर्यावरण (संरक्षण) संशोधन नियम, 2017 है।

(2) ये राजपत्र में उनके प्रकाशन की तारीख को प्रवृत्त होंगे।

2. पर्यावरण (संरक्षण) नियम, 1986 की अनुसूची-1 में, क्रम संख्यांक 104 और उससे सम्बन्धित प्रविष्टियों के पश्चात्, निम्नलिखित क्रम संख्यांक और प्रविष्टियां अन्तःस्थापित की जाएंगी, अर्थात् :—

क्र. सं.	उद्योग	मानदंड	मानक

(ii) ये, मानक जलाशयों में निस्सारण और भूमि निपटान/अनुप्रयोगों के लिए लागू होंगे।

(iii) फैकल कौलीफॉर्म के लिए मानक औद्योगिक प्रयोजनों के लिए उपचारित बहिर्स्राव के उपयोग के सम्बन्ध में लागू नहीं होंगे।

(iv) ये मानक 1 जून, 2019 को या उसके पश्चात् कमीशन किए जाने वाले सभी मल उपचार संयंत्रों (एसटीपी) को लागू होंगे और पुराने/विद्यमान मल उपचार संयंत्र (एसटीपी) राजपत्र में इस अधिसूचना के प्रकाशन की तारीख से पांच वर्ष की अवधि के भीतर इन मानकों को प्राप्त करेंगे।

(v) समुद्र में उपचारित बहिर्स्राव के निस्सारण के मामले में, इसे उचित समुद्री मुहाने के माध्यम से किया जाएगा और विद्यमान तट निस्सारण को समुद्री मुहानों में संपरिवर्तित किया जाएगा और उन मामलों में, जहां समुद्री मुहाना निस्सारण के बिन्दु पर 150 गुणा न्यूनतम आरम्भिक तनुकरण और निस्सारण बिन्दु से दूर 100 मीटर के किसी बिन्दु पर 1500 गुणा न्यूनतम तनुकरण प्रदान करता है, तब विद्यमान सन्नियम साधारण निस्सारण मानकों में विनिर्दिष्ट किए गए अनुसार लागू होंगे।

(vi) उपचारित बहिर्स्राव का पुनःउपयोग/पुनःचक्रण तथा उन मामलों में, जहां उपचारित बहिर्स्राव के भाग का पुनःउपयोग और पुनःचक्रण किया जाता है जिसमें मानवीय सम्पर्क की सम्भावना अन्तर्वलित है, ऊपर यथा विनिर्दिष्ट मानक लागू होंगे।

(vii) केन्द्रीय प्रदूषण नियंत्रण बोर्ड/राज्य प्रदूषण नियंत्रण बोर्ड/प्रदूषण नियंत्रण समितियां, पर्यावरण (संरक्षण) अधिनियम, 1986 की धारा 5 के अधीन स्थानीय परिवेश को ध्यान में रखते हुए, अधिक कठोर सन्नियम जारी कर सकेगा/कर सकेंगी।

NOTIFICATION

New Delhi, the 13th October, 2017

G.S.R. 1265(E).—In exercise of the powers conferred by sections 6 and 25 of the Environment (Protection) Act, 1986 (29 of 1986), the Central Government hereby makes the following rules further to amend the Environment (Protection) Rules, 1986, namely:-

1. **Short title and commencement.**—(1) These rules may be called the Environment (Protection) Amendment Rules, 2017.

(2) They shall come into force on the date of their publication in the Official Gazette.

2. In the Environment (Protection) Rules, 1986, in Schedule – I, after serial number 104 and the entries relating thereto, the following serial number and entries shall be inserted, namely:—

Sl. No.	Industry	Parameters	Standards	
1	2	3	4	
		Effluent discharge standards (applicable to all mode of disposal)		
"105	Sewage Treatment Plants (STPs)		Location	Concentration not to exceed
			(a)	(b)
		pH	Anywhere in the country	6.5-9.0
		Bio-Chemical Oxygen Demand (BOD)	Metro Cities*, all State Capitals except in the State of Arunachal Pradesh, Assam, Manipur, Meghalaya Mizoram, Nagaland, Tripura Sikkim, Himachal Pradesh, Uttarakhand, Jammu and Kashmir, and Union territory of	20

			Andaman and Nicobar Islands, Dadar and Nagar Haveli Daman and Diu and Lakshadweep	
			Areas/regions other than mentioned above	30
		Total Suspended Solids (TSS)	Metro Cities*, all State Capitals except in the State of Arunachal Pradesh, Assam, Manipur, Meghalaya Mizoram, Nagaland, Tripura Sikkim, Himachal Pradesh, Uttarakhand, Jammu and Kashmir and Union territory of Andaman and Nicobar Islands, Dadar and Nagar Haveli Daman and Diu and Lakshadweep	<50
			Areas/regions other than mentioned above	<100
		Fecal Coliform (FC) (Most Probable Number per 100 milliliter, MPN/100ml	Anywhere in the country	<1000

*Metro Cities are Mumbai, Delhi, Kolkata, Chennai, Bengaluru, Hyderabad, Ahmedabad and Pune.

Note :

(i) All values in mg/l except for pH and Fecal Coliform.

(ii) These standards shall be applicable for discharge into water bodies as well as for land disposal/applications.

(iii) The standards for Fecal Coliform shall not apply in respect of use of treated effluent for industrial purposes.

(iv) These Standards shall apply to all STPs to be commissioned on or after the 1st June, 2019 and the old/existing STPs shall achieve these standards within a period of five years from date of publication of this notification in the Official Gazette.

(v) In case of discharge of treated effluent into sea, it shall be through proper marine outfall and the existing shore discharge shall be converted to marine outfalls, and in cases where the marine outfall provides a minimum initial dilution of 150 times at the point of discharge and a minimum dilution of 1500 times at a point 100 meters away from discharge point, then, the existing norms shall apply as specified in the general discharge standards.

(vi) Reuse/Recycling of treated effluent shall be encouraged and in cases where part of the treated effluent is reused and recycled involving possibility of human contact, standards as specified above shall apply.

(vii) Central Pollution Control Board/State Pollution Control Boards/Pollution Control Committees may issue more stringent norms taking account to local condition under section 5 of the Environment (Protection) Act, 1986".

ORDER

1. The issue for consideration is effluent discharge standards for STPs as laid down vide Notification dated 13.10.2017 by way of Environment (Protection) Amendment Rules, 2017 against Serial No. 105 of Schedule-I to the Environment (Protection) Rules, 1986.

2. Vide order dated 21.12.2018, this Tribunal noted that untreated or partially treated sewage is a major source of pollution in the country.

The Hon'ble Supreme Court in the case of *Paryavaran Suraksha Samiti & Anr. Vs. Union of India & Ors.*[1] directed taking of steps so that huge gap in sewage generated and treated is bridged.

3. The Tribunal also noted that the proposed standards as per Draft Notification dated 24.11.2015 issued by Ministry of Environment, Forest & Climate Change (MoEF & CC) are sought to be diluted by the impugned Notification as follows:

Sr. No.	Parameters	Old Norms 1986	Draft Norms Nov., 15	MoEF& CC Notification October 2017
1.	Biochemical Oxygen Demand (BOD) (mg/l)	<30	<10	<30 and <20 (metro cities)
2.	Chemical Oxygen Demand (COD) (mg/l)	<250	50	No limit
3.	Total Suspended Solids (TSS) (mg/l)	<100	<20	<100 and <50 (metro cities)
4.	Total Nitrogen (mg/l)	<100	<10	No limit
5.	Ammonical Nitrogen (mg/l)	<50	<5	No limit
6.	Total Phosphorus (mg/l)	No limit	No limit	No limit
7.	Fecal Coliform MPN/100 ml	No limit	<100	<1000

4. The Tribunal also noted that the relaxed standards will deteriorate the water quality and degrade the environment and be a retrograde

[1](2017) 5 SCC 326

step. The dilution will also affect the human life and the water quality of the rivers.

5. Accordingly, the Tribunal constituted an Expert Committee comprising the nominees from IIT Kanpur, IIT Roorkee, NEERI and CPCB which was to give its report after examining the best available technologies and best practices and after referring to the Experts study on the subject particularly CPCB Report on "River Stretches for Restoration of Water Quality, 2014-15" and the order of this Tribunal on the subject of polluted river stretches dated 20.09.2018 in Original Application No. 673/2018 in the matter of News item published in *"The Hindu" authored by Shri Jacob Koshy titled "More river stretches are now critically polluted : CPCB"*. The Tribunal also directed stay of operation of the impugned Notification and application of pre-revised standards till further orders.

6. Accordingly, report has been received from CPCB vide e-mail dated 30.04.2019 forwarding the Expert Committee report. The report noted the current status of water quality of rivers which flows in India and the fact that 351 river stretches out of 323 rivers were polluted. There was need for revised standards for BOD and COD with a view to protect the water quality of the rivers/streams. There was also a need for revised standards for TSS, for Nitrogen (Ammonia & Nitrates) and Phosphorus and for Fecal Coliform.

NATIONAL GREEN TRIBUNAL NEW DELHI

7. The Committee while discussing the need for revised the Standards for BOD and COD observed that:

"Inclusion of COD in sewage discharge certainly offers advantages in terms of early diagnosis on functioning of STPs and thus helps in resorting immediate measures/corrective actions. This is because analysis of COD is completed within 5 Hours as against 5 days at 20°c or 3 days at 27°C for BOD (Sawyer & Mccarty, V. Edition). Moreover, if Government wishes to regulate STPs across the county through online monitoring system in future, inclusion of COD in Discharge Standards will prove beneficial for the reason that COD sensors are quite reliable and readily available in Indian market, however the same is not the case with BOD sensors. Thus, from regulatory point of view also, COD is an important parameter and needs to be included in sewage Discharge Standards."

While discussing the need for revised standards for TSS the Committee has observed that:

" The Microbial quality of wastewater could be linked with the TSS concentration. The larger the Suspended solids, the larger shall be the presence of bacteria, protozoa and viruses. High TSS wastewater cannot be easily disinfected, as the suspended particles "hide" these microorganisms and also react with chemical disinfectants."

Further the committee observed:-

"A well designed and operated conventional sewage treatment system such as activated sludge process can meet 20 mg/L effluent TSS discharge standards. Many STPs bases on secondary wastewater treatment all over the globe are able to achieve 10-20mg/L. TSS without any tertiary treatment."

Further with regard to the need for revised standard for Nitrogen (Ammonia & Nitrates) and Phosphorus it has been elaborated by Committee that:

"Nitrogen and phosphorus in all forms are major rate limiting elements essential for the growth of alage and other vegetation in water bodies leading to a state called eutorphication. The greenish color water with large vegetation growth is common sight for not only lakes and ponds but also slow moving rivers.

Eutrophication arises from the oversupply of nutrients (N & P), which leads to overgrowth of plants and alage. Degradation of dead alage and plants by microbes consumes dissoloved oxygen in the water, thereby creating the state of hypoxie.

Eutrophication leads to many problems related to water quality:

- *Large Dissolved oxygen variation leads to fish kills*
- *Filling the water body with dead algae and other vegetation.*
- *Decomposition of dead algae and vegetation at the bottom causing oxygen depletion and further release of nutrient.*
- *Release of algal toxins and odors causing substances make the water unsuitable for human and animal consumption."*

The Committee has also observed that:

Due to the absence of dilution and worsening of our rivers and lakes, it is necessary to move towards nutrients (nitrogen and phosphorus) regulations in water bodies.

GREEN TRIBUNAL NEW DELHI

The Committee while discussing the revised standards for Fecal Coliforms observed:

"As per "Houses and Household Amenities, Latrine Facility, Census of India - 2011, Registrar General and Commissioner, India" available at http://censusindia.gov.in/ 2011census/hlo/ Data sheet/ India / Latrine. Pdf; Out of 7.9 Crores Urban Households (UHH), nearly 1.7 Crores UHH (i.e. 20 %) lacks adequate sanitation. At the same time more than 5 lakhs villages in the country are now open defecation free (ODF) (https:// sbm.gov.in/sbmdashboard / ODF.aspx.) Although rural parts are covered through sanitary toilets, effluent from septic tanks from newly built 9.2 crores toilets across the country is unavoidable. This may pose very high health risk owing to the fact that "Sanitation" including collection, conveyance and treatment is either absent or inadequate in such areas. ***Relaxing FC pose risk to downstream cities/town/villages that rely on drinking water source on same water body in case of rivers. It appears quite reasonable to say that FC Standards be prescribed to 100 MPN/100 ml. considering its impact on human health in general and readiness of Indian wastewater sector to handle the same (Recommended value of FC in CPHEEO Manual, 2013 is MPS230/100 ml.).*** *(emphasis added)*

Hence, CPHEEO 2013 recommended the following guidelines for treated sewage discharge into surface water which after some travel may join a ***drinking water source to be used as source of supply for drinking water as given in following Table 5.20***

Table 5.20 Recommended Guidelines for Treated Sewage if Discharged into Surface Water to be used as source of Drinking Water.

Parameter	MoEF Standards (A)	Recommended Values
BOD, mg/L	30	Less than 10
SS, mg/L	100	Less than 10
TN, mg/L	100	Less than 10
Dissolved P, mg/L	5	Less than 2
Faecal Coliforms, MPN/100 mL	Not specified	Less than 230

(A) General Standards, Environmental Protection Rule, 1986 & as authorized by PCB

- *In order to achieve the above values, the treatment process would need to be designed for nutrient removal in addition to the conventional BOD and SS removal. It has also been reported that if the nutrients were removed to the levels mentioned in Table 3.20, then the amount of chlorine required for disinfection would be less at about 5 mg/ l.*

Considering aforementioned analysis, the Chairman CPCB directed all State Pollution Control Boards to make it mandatory for local bodies to set up sewerage systems for treatment and disposal of sewage to meet the prescribed standards ie., pH 6.5-9, BOD (mg/L): Not more than 10, COD (mg/L): Not more than 50, TSS (mg/L) : Not more than 20, NH_4-N (mg/L): Not more than 5, N-total (mg/L) Not more than 10 ,Fecal Coliforms (MPN/100 ml) Less than 230. The details are provided in Annexure 1."

8. The report further mentions that the stringent standards in terms of Draft Notification dated 24.11.2015 are not only economically viable

and technically feasible, the cost will not be significantly high. In this regard, it was observed:

"7.0 ECONOMIC VIABILITY & RESOURCE POSITION

1. For Nitrification (Conversion of ammonia to nitrate), 20-30% larger aeration tanks are required with additional 40-50 % aeration demand. The Total capital and O&M cost of the system increases by 10-20 & 5-10 % respectively.

2. For further removal of nitrate from wastewater, denitrification (conversion of nitrate to Nitrogen gas) is needed by additional anoxic tank in the system. The capital cost further increases by 5-10 %. Nevertheless, denitrification gives 25 % oxygen credit which reduces 25 % aeration requirement.

3. Finally, overall capital and operational cost implications for achieving standards for metropolitan and class-I cities shall be 20-30 %.

4. Typical total unit costs for wastewater treatment based on experience gained in Western Europe and the USA is presented in Figure XX (WHO/ UNEP 1997), The total unit cost for secondary treatment (BOD < 20-30 mg/L & TSS < 50-100 mg/L) varies between 1.5-2.0 US$/m3, while for tertiary treatment (BOD, TSS & TN < 10 mg/L) it is 2.0-2.5 US$/m3. The additional burden is approximately 25-33 % which matches with Indian experience as well.

5. In recent years, many STPs are constructed based on effluent BOD, TSS & TN < 10 mg/L) and all the well operated and maintained STPs are providing the desired effluent quality. Some of these STPs are monitored by IIT Roorkee in recent years under several research projects and NGT reports. The performance evaluation results for 20 MGD Nilothi STP, 20 MLD Pappan Kalan STP, 15 MLD Delhi Gate STP and 5 MGD Kapashera STP of Delhi submitted to NGT alongwith 3.0 MID

STP, Rishikesh, 1 MGD STP, Delhi, 27 MGD STP, Haridwar etc., monitored under various research projects is attached as Annexure 3.

6. CPCB has also conducted study on technological achievability of proposed standards. Delhi Jal Board has installed and commissioned 04 STPs on advanced treatment technology along with coliform reduction facilities.

7. In addition, the following STPs all over India are producing the desired quality: 1.5 MLD STP, Cubbon Park, Bangalore, 2.0 MLD STP, Pahalgam, 3.5 MLD STP, Tapovan, Rishikesh, 4.0 MLD STP, IIT Madras, 12.5 MLD STP, Tonca, Goa, 15.0 MLD STP, Gorakhpur, 17.3 MLD STP, Zirakpur, Punjab, 18 MLD STP, Sarai, Haridwar, 20.0 MLD STP, Hyderabad, 20.0 MLD Sangvi, Pune, 30 MLD STP, Hyderabad, 37.5 MLD STP, UP Housing Board, Lucknow, 40.0 MLD Kharadi, Pune, 40.0 MLD STP, Hubbali, Karnataka, 45 MLD STP, Mundhwa, Pune, 50 MLD STP Kalamboli, Navi Mumbai, 54 MLD STP, Noida, 55.0 MLD, Singanpure, Surat, 56 MLD STP, Indirapuram, Ghaziabad, 68.0 MLD STP, Dehradun, 100 MLD STP, Vashi Navi Mumbai, 130 MLD STP, Nagpur, 137 MLD STP, Greater Noida, 245 MLD STP Indore, etc.

8. In practical experience with actual tendered cost, the experience has been quite differing. Many tenders based on old and less stringent quality standards have been awarded at much higher per MLD cost as compared to STPs having more stringent standards. Plus on a long term basis, new technologies have lower life cycle costs. Other factors which are encouraging most corporations and contractors to adopt new technologies are more compact designs, less land requirement, less construction time, better material of construction, less maintenance cost, automation and less dependency on expensive trained manpower to operate plants in remote locations."

9. Accordingly, the Committee further observed that:

"• *The new stringent standards are devised considering the deterioration condition of water bodies and unavailability of adequate dilution water in our water bodies. If not stringent quality standards are not implemented then in the coming future with more population burden on rivers, situation will further deteriorate.*

- *The greatest benefit of these standards is to achieve all purpose non-portable reuse quality effluent. Each STP is to be treated as a source of water for reuse and recycling, helping in mitigating drought/climate change in the country. It will also reduce exploitation of groundwater reserves and dependency on rainfall which has become quite unpredictable in the past few years. Climate change is a reality that should be addressed and adopted for in the coming future. It will go a long way in reducing agricultural dependency on bore well water.*
- *If treatment of wastewater is not carried out with intention of reuse and recycle expenditure on conveyance/long distance transport of water/sewage will be much higher. Even as on toady in many cities cost of conveyance of water is much higher than the treatment of sewage to make it fit for most uses including domestic uses. For example the cost of transporting water from Narmada to fulfil water supply needs of Indore city (approximately @ Rs. 20/cum) is much higher than the cost of treating sewage to tertiary level."*

In view of above and severity of depletion of aquatic resources vis-a-vis the financial aspects related to conveyance and treatment of water/sewage the committee recommended that the effluent discharge for STPs to be as follows:

Sl. No.	Industry	Parameters	Standards (Applicable to all mode of disposal)

(vi)	*In case where the marine outfall provides a minimum initial dilution of 150 times at the point of discharge and a minimum dilution of 1500 times at a point 100m away from discharge point, then norms for deep sea marine discharge shall be applied.*
(vii)	*Reuse/Recycling of treated effluent shall be encouraged.*
(viii)	*State Pollution Control Boards/Pollution Control Committees may make these norms more stringent taking into account the local conditions.*

10. We have heard Learned Counsel for the parties.

11. Learned Counsel for the applicant submits that while the Expert Committee is fully justified in suggesting parameters as per its report for Mega-Metropolitan Cities, there is no justification for different and diluted standards for Class-I cities, Other cities or Deep Marine Outfall and to that extent the report of the Expert Committee fall short of the required scientific logic and database. While

NATIONAL GREEN TRIBUNAL, NEW DELHI

recommending the diluted standards for Class-I cities, Other cities or Deep Marine Outfall the Committee has not given any explanation with regard to the existing pollution load in these areas, the available systems in place, the efficacy of the systems in terms of meeting of norms, the population impacted by deteriorating water quality and likely consequences on health of people if these diluted norms are permitted. There is no scientific justification offered for diluting the norms for these areas in which the majority of country's population resides. Also such standards we feel must apply not only to new STPs but also to the existing ones. Further, there is no justification for non-application of such standards for seven years for existing STPs.

12. Learned Counsel for CPCB and interveners are unable to justify dilution of standards for areas other than Mega Metropolitan Cities or for existing STPs.

13. We find that there is no justification for diluted standards for areas other than Mega and Metropolitan Cities. The water quality standards are required to be same for the population of major cities or other cities. No justification has been shown for different standards for persons living in cities other than Mega and Metropolitan Cities. Major population of this country will be affected by diluted standards and only persons in Mega and Metropolitan Cities will have comparatively better standards without any valid reason or distinction. We may note that filters, UV filters etc. are facilities

NATIONAL GREEN TRIBUNAL NEW DELHI

mainly available in major cities and not in smaller cities or villages where the standards are proposed to be diluted.

14. Accordingly, we accept the report of the Expert Committee with the modification that the standards recommended for Mega and Metropolitan Cities will also apply to rest of the country. We also direct that the standards will apply not only for new STPs but also for existing/under construction STPs without any delay and giving of seven years time stands disapproved.

MoEF & CC may issue an appropriate Notification in the matter within one month from today.

The Application is disposed of.

Sub: Forwarding of inspection reports of Grossly Polluting Industries, Common Effluent Treatment Plants & Sewage Treatment Plants located in state of Uttar Pradesh carried out by CPCB teams in compliance to the Hon'ble High Court of Allahabad order dated 27.07.2022 in PIL No.4003 of 2006 -reg

Sir,

In compliance with the Hon'ble High Court of Allahabad order dated 27.07.2022 in the matter of Public Interest Litigation (PIL) no. 4003 of 2006 (Re- Ganga Pollution vs. State of U.P. and Others), Central Pollution Control Board (CPCB) constituted inspection teams which have been carrying out inspections of Grossly Polluting Industries (GPIs), Sewage Treatment Plants (STPs) and Common Effluent Treatment Plants (CETPs) located in the state of Uttar Pradesh, w.e.f. 26.08.2022. As on October 12, 2022, inspection of 210 GPIs, 35 STPs and 8 CETPs have been completed.

Further, the Hon'ble High Court of Allahabad, vide order dated 26.09.2022, has also directed the following:

> *".....10. Learned counsel for the U.P. Pollution Control Board shall also apprise the Court about the contents of the affidavit filed by the Central Pollution Control Board whereby number of GPIs were not found to be meeting the parameters laid down for treatment of discharge of effluents."*

In accordance with the aforementioned order of the Hon'ble High Court and proceedings held on 26.09.2022 in the Court, action against the non-complying, non-operational GPIs, STPs & CETPs based on the inspection reports shall be taken by UPPCB.

In view of the above, CPCB has made arrangement for forwarding of these inspection reports to UPPCB through a dedicated portal (http://cpcbinspection.co.in/cpcbinspection)/e-mail. Access to the portal has been made available to UPPCB to download these reports. UPPCB shall also be able to upload the action taken status of these GPIs, STPs & CETPs on the same portal.

Inspection reports of 37 GPIs have been uploaded on portal for perusal and necessary action as per the Hon'ble Court orders. Action taken reports may also be shared/ uploaded through the portal.

Sir,

With reference to CPCB letter dated 13.10.2022, on the above mentioned subject, I am directed to forward herewith the Standard Operating Protocol (SOP) for follow-up action of inspection reports by UPPCB as under:

1. UPPCB shall take appropriate action within 15 days of receipt of inspection report and upload action on CPCB portal.
2. In case of non-compliance, UPPCB shall issue directions (Show-cause notice or closure directions) within 15 days of receipt of inspection reports. Further in case of Show Cause Notices, the unit shall be re-inspected and closure directions shall be issued in case of non-compliance within 30 days. Follow up inspections of Show Cause Notices shall be carried out by UPPCB officials.
3. Closure directions shall be issued by UPPCB to temporary closed units except seasonal and to those who have already informed SPCB about self-closure. After consideration of re-opening request, unit shall be re-inspected by UPPCB officials and compliance shall be verified.
4. If inspecting team is not allowed to enter in industries, SPCBs shall issue closure direction and random inspection of such units shall be carried out by UPPCB.
5. In case of by-pass of effluent/non-operational ETP/Non-Co-operation by Industries, closure direction including levying environmental compensation shall be issued within one week of receipt of report.
6. CPCB prepared "Guidelines for issuance of directions and revocation of closure directions issued under section 5 of E(P)A, 1986" vide office order dated 06.11.2018 for initiating action against non-complying units including issuance of show-cause notices/closure directions and revocation thereof based on levels of violation. UPPCB shall follow these guidelines. Copy of guidelines attached.

Inspection reports of GPIs have been uploaded on portal for perusal and necessary action as per the Hon'ble Court orders. Action taken reports may also be shared/ uploaded through the portal.

Yours faithfully,

Office Order

Subject: Guidelines for Issuance of directions and Revocation of Closure directions issued u/s 5 of E(P)A 1986.

In suppression of earlier office order no. B-29012/IPC-IV/2017-18 dated 21.07.2017 and partial modification of the office order no. B-29012/2014-15/ESS of various dates the Guidelines on Issuance of Directions on the basis of Industrial Inspections and Revocation of Closure Directions & Show Cause Notices issued u/s 5 of E (P) Act, 1986 are modified. The modified guidelines are enclosed herewith.

These guidelines are prepared to provide uniformity and homogeneity in the actions taken on the basis of industrial inspection. These guidelines shall be followed for proposing actions and revocation of directions on the basis of inspection reports and reply submitted by the industries, respectively.

This issues with the approval of Chairman, CPCB.

Guidelines/Policy for Taking Action (Industrial Inspection)

Background

CPCB carries out inspection of industries to verify the compliance status to ensure safety of environment in general and compliance of standards notified under the Environment (Protection) Rules, 1986 in particular. The inspection may includes physical verification of the unit premises for overall assessment of environmental management, manual sampling of the effluent and emission discharged (including sampling from the bypass point/s if any), collection of documents/records relating to production, energy consumption, fresh water consumption, waste water generation & discharge and chemical consumption in treatment facilities, consent to operate, authorization certificates etc. Samples collected during inspection are subjected to analysis of specific parameters in CPCB or EPA recognised labs. The outcome of the general observations, verification of the documents/records and the result of the laboratory analysis of the samples is compiled in the form of 'inspection report'. The inspection report is processed and further actions are proposed based on the observations and analysis results of samples collected during inspection.

Need for Guidelines

The inspection reports having observations and recommendations are processed by Concerned divisions. Evaluation of observations and consideration of recommendations are followed by proposal of 'action' by the concerned officer. It is observed that there is disparity in the proposed action depending on the processing officer's discretion. Therefore, it is imperative to have documented guidelines, to be referred upon, for proposing and taking actions on the basis of inspection reports.

Actions to Be Taken

CPCB is empowered under the Environment (Protection) Act, 1986 to take action against industrial units/authorities to ensure compliance of notified environmental standards. Also, CPCB is empowered under the Water (Prevention and Control of Pollution) Act, 1974 and Air (Prevention and Control of Pollution) Act,1981 to issue directions to the State Boards.

Directions u/s 5 E(P) Act, 1986

I. Directions for corrective measures:

Directions are issued to the units to carry out certain task for improvement of general operational and environmental conditions, to ensure continuous compliance. In this regard a list of observations in case of which such directions may be issued has been mentioned in Level I category (explained on page 3).

II. Show cause notice for closure direction:

When the Industrial units are found non-complying w.r.t. notified discharge/emission standards, and other shortcomings considered as non-complying without causing grave injury to the environment Show Cause Notice for closure direction may be issued. In this regard a list of observations in case of which such directions may be issued has been mentioned in Level II category (explained on page 3).

III. Closure Direction:

When the Industrial units are found non-complying w.r.t. notified discharge standards and other shortcomings and considered as causing grave injury* (* based on mode of discharge/receiving environment, effluent load, critical parameters, history of violations) to the environment, closure directions after recording the same as per section 4 sub-section 5 of E (P) Rules,1986 may be

issued. In this regard, a list of observations in case of which such directions may be issued has been mentioned in Level III category (explained on page 4).

IV. Directions to Authorities: Municipalities, Electricity Board, Jal Board etc. for ensuring compliance of the CPCB directions and for management of Environmental issues.

Directions u/s 18 (1) (b) Water Act, 1974 & Air Act,1981

V. Direction to SPCB

Special cases **or** pandemic issues/problems - Directions u/s 18 (1) (b) Water (Prevention and Control of Pollution) Act, 1974 and Air (Prevention and Control of Pollution) Act, 1981 may be issued to the SPCB, aiming for making policies, towards improvement in overall environment in certain areas/sectors etc., issues related to Consent to Operate (CTO) conditions.

List of Level I, Level II & Level III Category Observations/Non-compliance

Level I category

Action to be taken: ***General Direction for Corrective Action***

1. Name & address of unit not displayed at the entrance.
2. No display of environmental data and the validity of CTO, Hazardous Waste (HW) and Solid Waste Authorization at the main gate of premises.
3. Improper housekeeping, improper Solid waste management (Improper in-house dumping/stacking of solid waste).
4. Lacking or mismanaged log/record book for water extraction, Wastewater discharged, production, energy and chemical consumption in ETP/APCD etc.
5. No flow meter at borewells, ETP inlet and recycle point; no energy meter at ETP as well as APCD.
6. Any exceedance in discharge standard within uncertainty limit of analysis.
7. Any other specific observations of the inspection report on representativeness of sample/doubtful compliance.

Level II category

(considered to be non-complying unit not causing grave injury to the environment)

Action to be taken: ***Show cause notice for closure direction***

1. Invalid CTO, HW authorization (wherever applicable) & not applied for fresh/renewal.
2. OCEMS found disconnected /partial OCEMS/tampered (In GPIs of Ganga basin, air polluting industries in NCR and 17 category industries to which earlier directions were not issued).
3. Dilution or addition of fresh water at any stage of ETP.
4. Waste water discharged beyond consented quantity.
5. Poor Operation & Maintenance of ETP (eg. MLSS below designed level in Aeration tank of ASP) and APCD including non-functional aerator/pump/standby provision(s).

6. Improper monitoring facilities (such as location of Port hole/ monitoring platform) in the stack, Stack Height not as per Consent and Not having easy accessibility to ETP/APCD for effluent/emission sampling & observation.
7. Exceedance of notified discharge general parameters beyond its uncertainty limit (Exceedance in any one of notified discharge parameters will be considered as non-compliance, however the action taken will be in accordance with number of parameters and degree of exceedance.)
8. Unauthorised disposal of Hazardous waste or inadequate Hazardous waste storage capacity or violations of conditions of authorization not leading to grave injury to the environment.
9. DG set operating without acoustic enclosures.
10. Non-complying with the conditions imposed during revocation of earlier closure direction.
11. Continuous or non-compliance of observations in Level I category.

Level III category

(Considered to be non-complying unit causing grave injury to the environment)

Action to be taken: ***Closure Direction***

1. Non-Installation and Non-Connectivity of OCEMS as per CPCB direction.
2. Provision for more than consented outlet(s) and/or any bypass arrangement for discharge of Partially treated or untreated effluent/emission and/or provision for flow diversion through flexible pipelines in the ETP for effluent transfer/bypass.
3. Operating unit having Defunct /Non-operational ETP/APCD which could not be made operational at the time of inspection and/or without installation of ETP/APCD.
4. Non-compliance of ZLD norms or dry unit found operating wet process.
5. Exceedance of the notified parameters likely to cause grave injury to the environment.
6. Any exceedance of industry specific critical parameters, for effluent discharge like Cr, CN-, Phenol, Sulphide, Hg etc. and for emission/discharge like HCl, Fluoride, Dioxins & furans etc.
7. Unauthorised disposal of Hazardous waste or inadequate Hazardous waste storage capacity likely to cause grave injury to environment.
8. Significant Pollution in recipient drain/water body due to episodal discharge (sample from the discharge recipient source having similar characteristic as the trade effluent from the industry).
9. Injection of treated or untreated water or both into ground water (Reverse Boring).
10. Any other observations likely to cause grave injury and recommendation as per inspection report.
11. Continuous non-compliance of observations in Level II category.

Guidelines for Revocation of Closure Directions issued u/s 5 of Environment (Protection) Act, 1986

The following guidelines, including prerequisite from the industry before requesting to CPCB for revocation of closure directions and processing practice to be adhered by CPCB, are proposed:

Sl. No.	Cause of issuing closure direction	Prerequisite to ensure compliance (to be provided/submitted by industry to CPCB)	Compliance status (to be processed by CPCB)	Revocation of directions with following conditions*
1	Non-Installation and Non-connectivity of OCEMS as per CPCB direction	•Self certificate for closure of unit in compliance of CPCB direction. •Installation of OCEMS and connectivity with CPCB server with evidence	• Verification of connectivity status from IT Division, CPCB, Delhi	• Ensure uninterrupted connectivity with CPCB server
2	Provision for more than consented outlet(s) **And/or** Any bypass arrangement for discharge of Partially treated or untreated effluent/emission **And/or** Provision for flow diversion through flexible pipelines in the ETP for effluent transfer/bypass.	•Self certificate for closure of unit in compliance of CPCB direction. •Dismantling of the structures and photographic evidence	• Verification of the documents and photographs • Physical verification by CPCB.	-
3	Operating unit have Defunct / Non-operational ETP/ APCD which could not be made operational at the time of inspection and/or without installation of ETP/ APCD.	•Self certificate for closure of unit in compliance of CPCB direction. •Adequacy assessment of treatment facility by reputed government institute; followed by implementation of the recommendations of the adequacy report and validation by the same government institute.	• Document verification and examination and evaluation of adequacy report and implementation status.	Performance assessment of the treatment system including analysis of treated effluent/emission by the same reputed government institute within 60 days
4	Non-compliance of ZLD norms or dry unit operating wet process.	• Self certificate for closure of unit in compliance of CPCB direction **For Non-compliance of ZLD norms:** • Adequacy assessment of treatment facility by	Document, photographs verification and examination and evaluation of reports	Verification and water audit report within 60 days by govt. institutes

(DEPONENT)

I, the deponent named above solemnly affirm and state on oath as under: -

1. That the deponent is Regional Director, Regional Directorate, Lucknow, Central Pollution Control Board, PICUP Bhawan, Vibhuti Khand, Gomti Nagar, Lucknow, Uttar Pradesh, and is competent and authorized to file the present compliance affidavit on behalf of the respondent no.10, *i.e.*, Chairman, Central

Pollution Control Board, Ministry of Environment Forest and Climate Change, Government of India, New Delhi (hereinafter "CPCB"), in pursuance to order dated 27.07.2022, 31.08.2022, 26.09.2022 and 01.11.2022 passed by this Hon'ble Court in the above noted PIL No.4003 of 2006 Re- Ganga Pollution v. State of U.P. and others and as such he is fully conversant with the facts of the case in his official capacity deposed to below.

2. That, this Hon'ble High Court, Allahabad passed order, dated 27.07.2022 in present WPIL No. 4003 of 2006 (Re–Ganga Pollution Vs. State of U.P. and others). Verbatim of relevant para of order dated 27.02.2022 is reproduced below:

> *"12. In the aforesaid factual matrix, we are constrained to direct Central Pollution Control Board to collect samples from all the industries as mentioned in affidavit dated December 23, 2016 and the STPs set up in the cities on the embankment of river Ganga and submit a report to this Court as to whether these meet the prescribed standards. Needful may be done in due course. However, test reports of samples collected and reports prepared before the next date of hearing be submitted in Court."*

Verbatim of relevant para of subsequent judgement dated 31.08.2022 is reproduced below:

> ***"12 (ii).** Central Pollution Control Board shall furnish the test reports of the samples collected and available up to the next date of hearing in terms of directions issued in paragraph no. 12 of the order passed on July 27, 2022;"*

3. That, in compliance to the above orders CPCB constituted 33 teams of CPCB officials to undertake surprise and random inspection of 1370 Grossly Polluting Industries (GPIs), 36 Sewage Treatment Plants (STPs) [one (01) STP at Vindyachal in district Mirzapur has been operationalized recently after filing of the compliance affidavit dated 23-09-2022] and eight (08) Common Effluent Treatment Plants (CETPs)/Common Chrome Recovery Unit (CCRU) located in the State of Uttar Pradesh.

4. That, to ensure timely and efficient completion of the inspection of these GPIs, STPs and CETPs, a Standard Operating Protocol (SOP) as given below was followed:

(i) Allotment of districts and industries to the inspection teams is on random basis through a mobile application developed by the IT Division, CPCB. District is allotted a day before the inspection while the industries to be inspected are allotted on the day of the inspection itself to the team leaders of the inspection team to ensure random selection of industries and surprise inspection.

(ii) A general inspection format designed to ensure inclusion of all essential data irrespective of the industrial sector.

(iii) Coding and sealing of samples collected during inspection.

(iv) Time-line for submission of inspection report.

(v) Legal sampling, serving of notice under Form-I under the Environment (Protection) Act, 1986, to the occupier of the industry as well as handing over sealed, signed duplicate samples to the industry representative.

(vi) Provision of geotagging of inspection sites and photographic documentation during inspection.

5. That, samples collected by CPCB teams during inspection are analysed in NABL (National Accreditation Board for Testing and Calibration Laboratories) accredited CPCB laboratories at Head Office Delhi and CPCB Regional Directorate Lucknow; parameters analysed include those prescribed in unit's Consolidated Consent to operate and Authorization (CCA) and industry specific effluent discharge standards as notified under the Environment (Protection) Rules, 1986.

6. That, the inspections by CPCB teams commenced on 26.08.2022 and till 15.11.2022, a total of 384 inspections have been completed including 343 GPIs located in 27 districts of Uttar Pradesh, 33 STPs in ten (10) districts and eight (08) CETPs/ CCRU in five (05) districts .

7. That, of the total 384 inspections completed, 255 units were found operational (218 GPIs, 29 STPs and 8 CETPs/CCRU) and samples from these units were submitted for laboratory analysis. **As on 15.11.2022**, laboratory analysis reports have been received for 188 of the operational units [151 GPIs, 29 STPs and eight (08) CETPs].

GROSSLY POLLUTING INDUSTRIES

8. That, as per the inventory provided by Uttar Pradesh Pollution Control Board (UPPCB) for the year 2021, 1370 GPIs along with 8 CETPs/CCRU are located in Uttar Pradesh, out of which **868** GPIs have potential to discharge into river **Ganga** mains stem and **510** GPIs have potential to discharge into river **Yamuna** main stem.

9. That, as on 15.11.2022, 276 inspection reports of GPIs (including 151 operational units for which laboratory analysis report were received and 125 non-operational units) have been uploaded on CPCB portal. Out of the 151 operational GPIs; 89 were found complying and **62 non-complying**. Compliance of the operational units have been verified with respect to industry specific effluent discharge norms as prescribed under the Environment (Protection) Act, 1986 Schedule-I. The analysis results of grab samples taken from ETP outlet of the industrial units are compared with notified standards for compliance verification.

10. The operational and compliance status of 276 GPIs is presented in tabular form in Table 1(A), (B) and (C) as following: -.

Table 1(A): Summarized compliance status of 61 GPIs inspected from 26.08.2022 to 19.09.2022

SEWAGE TREATMENT PLANTS (STPS)

12. That, Ministry of Environment, Forest and Climate Change (hereinafter referred to as "MoEF&CC"), Government of India has notified the rules namely "Environment (Protection) Amendment Rules, 2017" regarding **effluent discharge standard for sewage treatment plants (STPs)** vide *notification G.S.R. 1265 (E), dated – 13.10.2017 where in the Environment (Protection) Rules. 1986, in Schedule-I.*

A true copy of the **notification G.S.R. 1265 (E), dated 13.10.2017** is annexed herewith and marked as **Annexure No. 2** to this affidavit.

13. That, while considering the issue of effluent discharge standards for STPs as laid down vide Notification dated 13.10.2017 by way of Environment (Protection) Amendment Rules, 2017, in the matter of Original Application No. 1069/2018 (**Nitin Shankar Deshpande Vs Union of India & Ors.**), the Hon'ble National Green Tribunal *(hereinafter referred to as "NGT")* vide its order dated 21.12.2018 granted **stay** on aforesaid MOEF & CC notification dated 13.10.2017 and **constituted an expert committee** for preparing a report within 2 months.

14. That, the Hon'ble NGT vide **order 30.04.2019,** has accepted the standards for treated sewage as recommended for Mega-Metropolitan by Expert Committee

which has values for different parameters recommended as follows - pH: 5.5- 9.0; BOD: 10 mg/l; TSS: 20 mg/L; COD: 50 mg/L; Nitrogen-Total: 10 mg/L; Phosphorus - Total (for discharge into ponds and lakes): 1.0 mg/L; Faecal Coliform: Desirable limit 100 MPN/100 ml, Permissible limit 230 MPN/100ml.

15. That, the Hon'ble NGT has also directed vide **order dated 30.04.2019** in O.A. No. 1069/2018 that *"we accept the report of the Expert Committee with the modification that the standards recommended for Mega and Metropolitan Cities will also apply to rest of the country. We also direct that the standards will apply not only for new STPs but also for existing/under construction STPs without any delay and giving of seven years' time stands disapproved.*

MoEF & CC may issue an appropriate Notification in the matter within one month from today."

A true copy of the **order dated 30.04.2019 passed by the Hon'ble NGT** in *O.A. No. 1069/2018* is annexed herewith and marked as **Annexure No. 3** to this affidavit

16. That, against the aforesaid Hon'ble NGT order dated 30.04.2019, Municipal Corporation of Greater Mumbai filed a Civil Appeal to set aside the impugned order dated 30.04.2019. The **Hon'ble Supreme Court of India passed order dated 13.08.2021** in the matter of Civil Appeal No.5036/2019 (MUNICIPAL CORPORATION OF GREATER MUMBAI Vs NITIN SHANKAR DESHPANDE & ORS.) and its related matters as following:

*"……4. The issue which has been raised in the proceedings before the NGT is indeed serious since it relates to the discharge of untreated waste into the sea, creek and river bodies. The Municipal Corporation must, in our view, **make every effort to comply with the directions of the NGT by setting up the required facilities and upgrading existing facilities."***

A true copy of the **order dated 13.08.2021 passed by the Hon'ble Supreme Court** in *Civil Appeal No.5036/2019* is annexed herewith and marked as **Annexure No. 4** to this affidavit.

Beside the aforesaid petition filed by Municipal Corporation of Greater Mumbai before the the Hon'ble Supreme Court , MoEF&CC has also filed the CIVIL APPEAL Diary No.11356/2020 before the Hon'ble Supreme Court of India against the aforesaid order of NGT dated 30.4.2019 in the matter of Original Application No. 1069/2018 (Nitin Shankar Deshpande Vs Union of India & Ors.). The appeal of MoEF &CC was heard by the Hon'ble court and tagged with Civil Appeal 5036 of 2019 which is still pending. **Standards** referred for compliance of treated sewage from STPs are presented below in Table 2.

*Number of GPIs as per inventory of 2021 received from Uttar Pradesh Pollution Control Board

21. That, the Hon'ble High Court of Allahabad, vide order dated 26.09.2022, also directed the following:

".....10. Learned counsel for the U.P. Pollution Control Board shall also apprise the Court about the contents of the affidavit filed by the Central Pollution Control Board whereby number of GPIs were not found to be meeting the parameters laid down for treatment of discharge of effluents."

Pursuant to the above, CPCB has made arrangements for forwarding the inspection reports to UPPCB(Uttar Pradesh Pollution Control Board) through a dedicated portal (http://cpcbinspection.co.in/cpcbinspection)/e-mail so as to take necessary action against the non-complying, non-operational GPIs, STPs & CETPs based on the inspection reports with effect from 13.10.2022. Access to the portal has

been made available to UPPCB to download these reports. CPCB communicated the same to UPPCB vide CPCB letter dated 13.10.2022.

A true copy of the **letter dated 13.10.2022 forwarded by CPCB to UPCB** is annexed herewith as **Annexure No. 7.**

It is hereby further submitted that the CPCB has also developed a **Standard Operating Protocol (SOP) for follow-up action by UPPCB** which is as under:-

1. UPPCB shall take appropriate action within 15 days of receipt of inspection report and upload action on CPCB portal.
2. In case of non-compliance, UPPCB shall issue directions (Show-cause notice or closure directions) within 15 days of receipt of inspection reports. Further in case of Show Cause Notices, the unit shall be re-inspected and closure directions shall be issued in case of non-compliance within 30 days. Follow up inspections of Show Cause Notices shall be carried out by UPPCB officials.
3. Closure directions shall be issued by UPPCB to temporary closed units except seasonal and to those who have already informed SPCB about self-closure. After consideration of re-opening request, unit shall be re-inspected by UPPCB officials and compliance shall be verified.
4. If inspecting team is not allowed to enter in industries, SPCBs shall issue closure direction and random inspection of such units shall be carried out by UPPCB.
5. In case of by-pass of effluent/non-operational ETP/Non-Co-operation by Industries, closure direction including levying environmental compensation shall be issued within one week of receipt of report.

6. CPCB prepared "Guidelines for issuance of directions and revocation of closure directions issued under section 5 of E(P)A, 1986" vide office order dated 06.11.2018 for initiating action against non-complying units including issuance of show-cause notices/closure directions and revocation thereof based on levels of violation. UPPCB shall follow these guidelines.

The above SOP has been forwarded to UPPCB vide CPCB letter dated 18.10.2022. A true copy of letter dated 18.10.2022 is annexed herewith and marked as **Annexure No-8.**

As on 22.11.2022, 162 inspection reports (136 GPIs, 19 STPs and 7 CETPs) were forwarded to UPPCB for perusal and necessary action. A true copy of **List of reports forwarded to UPPCB** is annexed herewith and marked as **Annexure- 9**. Subsequently, reports are being forwarded on daily basis.

22. That, the order dated 01.11.2022 passed by the Hon'ble Court also mentions the arguments raised by learned counsel appearing for **U.P. Jal Nigam, (Rural).** Verbatim of the relevant para is produced below:

"7....., we deem it appropriate to record the arguments raised by learned counsel appearing for U.P. Jal Nigam, (Rural) that these reports submitted by CPCB, cannot be relied as there are inherent discrepancies which needs to be clarified. In fact as per the test reports by IIT Kanpur, the STPs are meeting the parameters. He referred to the test report dated 02.08.2022 of 130 MLD Jajmau STP Kanpur wherein as per test report of the affluent at the stage of inlet into STP, PH factor is shown as 6.92 which at the time of outlet is shown as 7.44. In case of total nitrogen at inlet stage, the same is shown as 20.8 whereas at outlet

stage, it is 30.2. He further referred to test report dated 14.09.2022 of 130 MLD Jajmau STP Kanpur wherein as per test report of the affluent at the stage of inlet into STP, PH factor is shown as 6.71 and at the time of outlet stage, it is shown as 7.74. In case of total nitrogen at inlet stage it is shown as 10.3 and at outlet stage, the same is shown as 9.26."

Regarding the above alleged discrepancies, CPCB -respondent no.10 respectfully submits the following **explanation** on the arguments advanced by learned counsel appearing for U.P. Jal Nigam, (Rural) on 01.11.2022 in below Table No.8:

Table 8: Submission from CPCB on arguments raised by U.P. Jal Nigam (Rural)

S. No.	***Observation** on test report dated 02.08.2022 and 14.09.2022 of 130 MLD Jajmau STP Kanpur*	**Submission from CPCB** **Note**: CPHEEO is Central Public Health and Environmental Engineering Organisation under Ministry of Housing and Urban Affairs, Government of India.
1	**(a)** As per test report dated **02.08.2022** at the stage of inlet **pH factor** is shown as **6.92** which at the time of outlet is shown as **7.44.** **(b)** As per test report dated **14.09.2022** at the stage of inlet into STP, **pH factor** is shown as **6.71** and at the time of outlet stage, it is shown as **7.74.**	Data on Performance evaluation of STPs in Delhi (Table A 2.1.6: of Part A: Engineering-Appendix of **CPHEEO Manual on Sewerage and Sewage Treatment Systems**, internal **Page 1 of Annexure-10**) indicates that ***pH of STP effluent has increased (0.1 to 0.6) w.r.t. influent pH in 24 STPs, out of 26 STPs studied.*** The possible reason is that during treatment process under aerobic conditions (Activated sludge process), some nitrification-denitrification also occurs, producing alkalinity and hence the pH improves at outlet. [Chapter 7-11, Pg.no. 623 of **Book on Wastewater Engineering**: by Metcalf & Eddy, internal **page 2 of Annexure-10**].

2	As per test report dated 02.08.2022 total **nitrogen** at **inlet** stage, the same is shown as **20.8** whereas at **outlet** stage, it is **30.2.**	**MLSS** (Mixed Liquor Suspended solids) values in Aeration tanks (AT1) and AT2 of said STP are 10795 and 12824 mg/l respectively, which are higher than desired level of 3000 to 5000 mg/l (Table 5.9: Part CPHEEO Manual on Sewerage and Sewage Treatment Systems, internal **Page 3 of Annexure-10**). Since oxygen supply is done for the desired MLSS value of 3000 to 5000 mg/L, at high MLSS value, endogenous respiration cannot be ruled out. During endogenous respiration of bacterial cell mass, some soluble non-degradable organic nitrogen may be produced. (Chapter 8, Pg.no. 670 of Book on Wastewater Engineering; by Metcalf & Eddy, internal **Page 4 of Annexure-10**). This may be the reason for increase in Total nitrogen at outlet, w.r.t. inlet of STP. It is pertinent to mention that bacterial cell mass, contain 12% Nitrogen. (Last para of Pg.No.5-61 of CPHEEO Manual on Sewerage and Sewage Treatment Systems, internal **Page 5 of Annexure-10**); and Table 7-4, (**Pg.no. 558** of Book on Wastewater Engineering; by Metcalf & Eddy, internal **Page 6 of Annexure-10**.
3	As per test report dated ***14.09.2022*** total **nitrogen** at inlet stage it is shown as **10.3** and at outlet stage, the same is shown as **9.26**.	**Total nitrogen in raw sewage is 50mg/l**, as per Table 5.4 of Chapter 5 of Design and Construction of Sewage Treatment Facilities of aforesaid CPHEEO Manual on Sewerage and Sewage Treatment Systems, **Page 7 of Annexure-10**. Total nitrogen 10.3mg/l at inlet indicates incoming (raw) sewage was of **low strength**, which is indicated by low BOD 68mg/l, against normal BOD 250mg/l. **Hence nitrogen removal is also negligible.**

True copies of the **supporting documents referred above in the Table No. 9** are collectively annexed herewith and marked as **Annexure No-10.**

23. That, furthermore, it is respectfully submitted that the Central Laboratory of CPCB, Delhi was established in the premises of CPCB. CPCB Central Laboratory is working in the environmental field and producing quality data since **1974**. The Central Laboratory, CPCB is also **recognized** as "Environmental Laboratory" and **notified** under Environment (Protection) Act, 1986 with a set of criteria laid down in the Guidelines for the recognition of environmental laboratories under Environment (Protection) Act, 1986 (LATS/9/2008-09) under which **eleven senior analysts are also notified in the official Gazette** (Gazette of India notification dated 28.03.2022) as Government Analysts Under Section 13, established or recognized under sub-Section (1) of Section 12 of The Environment (Protection) Act, 1986. Section 14 of The Environment (Protection) Act, 1986 also states, "Any document purporting to be a report signed by a Government analyst may be used as evidence of the facts stated therein in any proceeding under this act."

A true copy of Gazette of India **notification dated 28.03.2022** is annexed herewith and marked as **Annexure No. 11.**

It is further submitted with profound respect that the CPCB laboratory has adopted following ***quality assurance practices*** **to produce data** which is trusted and acceptance globally:-

(i) NABL Accreditation: CPCB Laboratory is accredited by the National Accreditation Board for Testing and Calibration Laboratories. NABL maintains linkages with the international bodies like International Laboratory Accreditation Co-operation (**ILAC**) and Asia Pacific Accreditation Co-operation (APAC).

NABL is a full member and a signatory to ILAC since 2000 as well as APAC Mutual Recognition Arrangements (MRA), which is based on peer evaluation. Such international arrangements facilitate acceptance of test/ calibration results between countries with MRA partners represent.

A true copy of **NABL Accreditation Certificate to CPCB** is annexed herewith and marked as **Annexure No. 12.**

(ii) **Participation in Proficiency Testing Programme:** As per the mandatory requirement of NABL the CPCB laboratories are regularly participating in National and International Proficiency testing programme under the four year programme submitted to NABL. The performance of laboratory is grossly satisfactory all the time.

Prayer

24. That, it is, most respectfully prayed that this Hon'ble Court may graciously be pleased to allow the Central Pollution Control Board, to undertake inspections, sample analysis and report preparation of all GPIs and STPs located in the state of Uttar Pradesh by CPCB teams, in due course of time; and forward the inspection reports to Uttar Pradesh Pollution Control Board, through the dedicated portal, for necessary action on all non-complying GPIs, STPs and CETPs in Uttar Pradesh.

25. That, in view of the facts indicated herein above, it is respectfully submitted that this Answering Respondent No. 10-CPCB shall abide by any orders or directions, which may be passed by this Hon'ble Court.

I, the deponent named above, do hereby solemnly affirm and verify that the contents of paragraphs **No.**1, 24 & 25 of the affidavit are true to my personal knowledge; those of paragraphs no. 2 to 23 are based on perusal of records; and those of paragraph no. 15 is based on legal advice, which all I believe to be correct; that no part of it is false and nothing materials has been concealed herein.

MINISTRY OF ENVIRONMENT, FOREST AND CLIMATE CHANGE

NOTIFICATION

New Delhi, the 13th October, 2017

G.S.R. 1265(E).—In exercise of the powers conferred by sections 6 and 25 of the Environment (Protection) Act, 1986 (29 of 1986), the Central Government hereby makes the following rules further to amend the Environment (Protection) Rules, 1986, namely:-

1. **Short title and commencement.**—(1) These rules may be called the Environment (Protection) Amendment Rules, 2017.

(2) They shall come into force on the date of their publication in the Official Gazette.

2. In the Environment (Protection) Rules, 1986, in Schedule – I, after serial number 104 and the entries relating thereto, the following serial number and entries shall be inserted, namely:—

Sl. No.	Industry	Parameters	Standards	
1	2	3	4	
		Effluent discharge standards (applicable to all mode of disposal)		
"105	Sewage Treatment Plants (STPs)		Location	Concentration not to exceed
			(a)	(b)
		pH	Anywhere in the country	6.5-9.0
		Bio-Chemical Oxygen Demand (BOD)	Metro Cities*, all State Capitals except in the State of Arunachal Pradesh, Assam, Manipur, Meghalaya Mizoram, Nagaland, Tripura Sikkim, Himachal Pradesh, Uttarakhand, Jammu and Kashmir, and Union territory of	20

			Andaman and Nicobar Islands, Dadar and Nagar Haveli Daman and Diu and Lakshadweep	
			Areas/regions other than mentioned above	30
		Total Suspended Solids (TSS)	Metro Cities*, all State Capitals except in the State of Arunachal Pradesh, Assam, Manipur, Meghalaya Mizoram, Nagaland, Tripura Sikkim, Himachal Pradesh, Uttarakhand, Jammu and Kashmir and Union territory of Andaman and Nicobar Islands, Dadar and Nagar Haveli Daman and Diu and Lakshadweep	<50
			Areas/regions other than mentioned above	<100
		Fecal Coliform (FC) (Most Probable Number per 100 milliliter, MPN/100ml	Anywhere in the country	<1000

*Metro Cities are Mumbai, Delhi, Kolkata, Chennai, Bengaluru, Hyderabad, Ahmedabad and Pune.

Note :

(i) All values in mg/l except for pH and Fecal Coliform.

(ii) These standards shall be applicable for discharge into water bodies as well as for land disposal/applications.

(iii) The standards for Fecal Coliform shall not apply in respect of use of treated effluent for industrial purposes.

(iv) These Standards shall apply to all STPs to be commissioned on or after the 1st June, 2019 and the old/existing STPs shall achieve these standards within a period of five years from date of publication of this notification in the Official Gazette.

(v) In case of discharge of treated effluent into sea, it shall be through proper marine outfall and the existing shore discharge shall be converted to marine outfalls, and in cases where the marine outfall provides a minimum initial dilution of 150 times at the point of discharge and a minimum dilution of 1500 times at a point 100 meters away from discharge point, then, the existing norms shall apply as specified in the general discharge standards.

(vi) Reuse/Recycling of treated effluent shall be encouraged and in cases where part of the treated effluent is reused and recycled involving possibility of human contact, standards as specified above shall apply.

(vii) Central Pollution Control Board/State Pollution Control Boards/Pollution Control Committees may issue more stringent norms taking account to local condition under section 5 of the Environment (Protection) Act, 1986".

ORDER

1. The issue for consideration is effluent discharge standards for STPs as laid down vide Notification dated 13.10.2017 by way of Environment (Protection) Amendment Rules, 2017 against Serial No. 105 of Schedule-I to the Environment (Protection) Rules, 1986.

2. Vide order dated 21.12.2018, this Tribunal noted that untreated or partially treated sewage is a major source of pollution in the country.

The Hon'ble Supreme Court in the case of *Paryavaran Suraksha Samiti & Anr. Vs. Union of India & Ors.*[1] directed taking of steps so that huge gap in sewage generated and treated is bridged.

3. The Tribunal also noted that the proposed standards as per Draft Notification dated 24.11.2015 issued by Ministry of Environment, Forest & Climate Change (MoEF & CC) are sought to be diluted by the impugned Notification as follows:

Sr. No.	Parameters	Old Norms 1986	Draft Norms Nov., 15	MoEF& CC Notification October 2017
1.	Biochemical Oxygen Demand (BOD) (mg/l)	<30	<10	<30 and <20 (metro cities)
2.	Chemical Oxygen Demand (COD) (mg/l)	<250	50	No limit
3.	Total Suspended Solids (TSS) (mg/l)	<100	<20	<100 and <50 (metro cities)
4.	Total Nitrogen (mg/l)	<100	<10	No limit
5.	Ammonical Nitrogen (mg/l)	<50	<5	No limit
6.	Total Phosphorus (mg/l)	No limit	No limit	No limit
7.	Fecal Coliform MPN/100 ml	No limit	<100	<1000

4. The Tribunal also noted that the relaxed standards will deteriorate the water quality and degrade the environment and be a retrograde

[1](2017) 5 SCC 326

step. The dilution will also affect the human life and the water quality of the rivers.

5. Accordingly, the Tribunal constituted an Expert Committee comprising the nominees from IIT Kanpur, IIT Roorkee, NEERI and CPCB which was to give its report after examining the best available technologies and best practices and after referring to the Experts study on the subject particularly CPCB Report on "River Stretches for Restoration of Water Quality, 2014-15" and the order of this Tribunal on the subject of polluted river stretches dated 20.09.2018 in Original Application No. 673/2018 in the matter of News item published in *"The Hindu" authored by Shri Jacob Koshy titled "More river stretches are now critically polluted : CPCB"*. The Tribunal also directed stay of operation of the impugned Notification and application of pre-revised standards till further orders.

6. Accordingly, report has been received from CPCB vide e-mail dated 30.04.2019 forwarding the Expert Committee report. The report noted the current status of water quality of rivers which flows in India and the fact that 351 river stretches out of 323 rivers were polluted. There was need for revised standards for BOD and COD with a view to protect the water quality of the rivers/streams. There was also a need for revised standards for TSS, for Nitrogen (Ammonia & Nitrates) and Phosphorus and for Fecal Coliform.

7. The Committee while discussing the need for revised the Standards for BOD and COD observed that:

"Inclusion of COD in sewage discharge certainly offers advantages in terms of early diagnosis on functioning of STPs and thus helps in resorting immediate measures/corrective actions. This is because analysis of COD is completed within 5 Hours as against 5 days at 20°c or 3 days at 27°C for BOD (Sawyer & Mccarty, V. Edition). Moreover, if Government wishes to regulate STPs across the county through online monitoring system in future, inclusion of COD in Discharge Standards will prove beneficial for the reason that COD sensors are quite reliable and readily available in Indian market, however the same is not the case with BOD sensors. Thus, from regulatory point of view also, COD is an important parameter and needs to be included in sewage Discharge Standards."

While discussing the need for revised standards for TSS the Committee has observed that:

" The Microbial quality of wastewater could be linked with the TSS concentration. The larger the Suspended solids, the larger shall be the presence of bacteria, protozoa and viruses. High TSS wastewater cannot be easily disinfected, as the suspended particles "hide" these microorganisms and also react with chemical disinfectants."

Further the committee observed:

"A well designed and operated conventional sewage treatment system such as activated sludge process can meet 20 mg/L effluent TSS discharge standards. Many STPs bases on secondary wastewater treatment all over the globe are able to achieve 10-20mg/L. TSS without any tertiary treatment."

Further with regard to the need for revised standard for Nitrogen (Ammonia & Nitrates) and Phosphorus it has been elaborated by Committee that:

"Nitrogen and phosphorus in all forms are major rate limiting elements essential for the growth of alage and other vegetation in water bodies leading to a state called eutorphication. The greenish color water with large vegetation growth is common sight for not only lakes and ponds but also slow moving rivers.

Eutrophication arises from the oversupply of nutrients (N & P), which leads to overgrowth of plants and alage. Degradation of dead alage and plants by microbes consumes dissoloved oxygen in the water, thereby creating the state of hypoxie.

Eutrophication leads to many problems related to water quality:

- *Large Dissolved oxygen variation leads to fish kills*
- *Filling the water body with dead algae and other vegetation.*
- *Decomposition of dead algae and vegetation at the bottom causing oxygen depletion and further release of nutrient.*
- *Release of algal toxins and odors causing substances make the water unsuitable for human and animal consumption."*

The Committee has also observed that:

Due to the absence of dilution and worsening of our rivers and lakes, it is necessary to move towards nutrients (nitrogen and phosphorus) regulations in water bodies.

The Committee while discussing the revised standards for Fecal Coliforms observed:

"As per "Houses and Household Amenities, Latrine Facility, Census of India - 2011, Registrar General and Commissioner, India" available at http://censusindia.gov.in/ 2011census/hlo/ Data sheet/ India / Latrine. Pdf; Out of 7.9 Crores Urban Households (UHH), nearly 1.7 Crores UHH (i.e. 20 %) lacks adequate sanitation. At the same time more than 5 lakhs villages in the country are now open defecation free (ODF) (https:// sbm.gov.in/sbmdashboard / ODF.aspx.) Although rural parts are covered through sanitary toilets, effluent from septic tanks from newly built 9.2 crores toilets across the country is unavoidable. This may pose very high health risk owing to the fact that "Sanitation" including collection, conveyance and treatment is either absent or inadequate in such areas. ***Relaxing FC pose risk to downstream cities/town/villages that rely on drinking water source on same water body in case of rivers. It appears quite reasonable to say that FC Standards be prescribed to 100 MPN/100 ml. considering its impact on human health in general and readiness of Indian wastewater sector to handle the same (Recommended value of FC in CPHEE0 Manual, 2013 is MPS230/100 ml.).*** *(emphasis added)*

Hence, CPHEE0 2013 recommended the following guidelines for treated sewage discharge into surface water which after some travel may join a ***drinking water source to be used as source of supply for drinking water as given in following Table 5.20***

Table 5.20 Recommended Guidelines for Treated Sewage if Discharged into Surface Water to be used as source of Drinking Water.

Parameter	*MoEF Standards (A)*	*Recommended Values*
BOD, mg/L	*30*	*Less than 10*
SS, mg/L	*100*	*Less than 10*
TN, mg/L	*100*	*Less than 10*
Dissolved P, mg/L	*5*	*Less than 2*
Faecal Coliforms, MPN/100 mL	*Not specified*	*Less than 230*

(A) General Standards, Environmental Protection Rule, 1986 & as authorized by PCB

• In order to achieve the above values, the treatment process would need to be designed for nutrient removal in addition to the conventional BOD and SS removal. It has also been reported that if the nutrients were removed to the levels mentioned in Table 3.20, then the amount of chlorine required for disinfection would be less at about 5 mg/ l.

Considering aforementioned analysis, the Chairman CPCB directed all State Pollution Control Boards to make it mandatory for local bodies to set up sewerage systems for treatment and disposal of sewage to meet the prescribed standards ie., pH 6.5-9, BOD (mg/L): Not more than 10, COD (mg/L): Not more than 50, TSS (mg/L) : Not more than 20, NH_4-N (mg/L): Not more than 5, N-total (mg/L) Not more than 10 ,Fecal Coliforms (MPN/100 ml) Less than 230. The details are provided in Annexure 1."

8. The report further mentions that the stringent standards in terms of Draft Notification dated 24.11.2015 are not only economically viable

and technically feasible, the cost will not be significantly high. In this regard, it was observed:

"7.0 ECONOMIC VIABILITY & RESOURCE POSITION

1. For Nitrification (Conversion of ammonia to nitrate), 20-30% larger aeration tanks are required with additional 40-50 % aeration demand. The Total capital and O&M cost of the system increases by 10-20 & 5-10 % respectively.

2. For further removal of nitrate from wastewater, denitrification (conversion of nitrate to Nitrogen gas) is needed by additional anoxic tank in the system. The capital cost further increases by 5-10 %. Nevertheless, denitrification gives 25 % oxygen credit which reduces 25 % aeration requirement.

3. Finally, overall capital and operational cost implications for achieving standards for metropolitan and class-I cities shall be 20-30 %.

4. Typical total unit costs for wastewater treatment based on experience gained in Western Europe and the USA is presented in Figure XX (WHO/ UNEP 1997), The total unit cost for secondary treatment (BOD < 20-30 mg/L, & TSS < 50-100 mg/L) varies between 1.5-2.0 US$/m3, while for tertiary treatment (BOD, TSS & TN < 10 mg/L) it is 2.0-2.5 US$/m3. The additional burden is approximately 25-33 % which matches with Indian experience as well.

5. In recent years, many STPs are constructed based on effluent BOD, TSS & TN < 10 mg/L) and all the well operated and maintained STPs are providing the desired effluent quality. Some of these STPs are monitored by IIT Roorkee in recent years under several research projects and NGT reports. The performance evaluation results for 20 MGD Nilothi STP, 20 MLD Pappan Kalan STP, 15 MLD Delhi Gate STP and 5 MGD Kapashera STP of Delhi submitted to NGT alongwith 3.0 MID

STP, Rishikesh, 1 MGD STP, Delhi, 27 MGD STP, Haridwar etc., monitored under various research projects is attached as Annexure 3.

6. CPCB has also conducted study on technological achievability of proposed standards. Delhi Jal Board has installed and commissioned 04 STPs on advanced treatment technology along with coliform reduction facilities.

7. In addition, the following STPs all over India are producing the desired quality: 1.5 MLD STP, Cubbon Park, Bangalore, 2.0 MLD STP, Pahalgam, 3.5 MLD STP, Tapovan, Rishikesh, 4.0 MLD STP, IIT' Madras, 12.5 MLD STP, Tonca, Goa, 15.0 MLD STP, Gorakhpur, 17.3 MLD STP, Zirakpur, Punjab, 18 MLD STP, Sarai, Haridwar, 20.0 MLD STP, Hyderabad, 20.0 MLD Sangvi, Pune, 30 MLD STP, Hyderabad, 37.5 MLD STP, UP Housing Board, Lucknow, 40.0 MLD Kharadi, Pune, 40.0 MLD STP, Hubbali, Karnataka, 45 MLD STP, Mundhwa, Pune, 50 MLD STP Kalamboli, Navi Mumbai, 54 MLD STP, Noida, 55.0 MLD, Singanpure, Surat, 56 MLD STP, Indirapuram, Ghaziabad, 68.0 MLD STP, Dehradun, 100 MLD STP, Vashi Navi Mumbai, 130 MLD STP, Nagpur, 137 MLD STP, Greater Noida, 245 MLD STP Indore, etc.

8. In practical experience with actual tendered cost, the experience has been quite differing. Many tenders based on old and less stringent quality standards have been awarded at much higher per MLD cost as compared to STPs having more stringent standards. Plus on a long term basis, new technologies have lower life cycle costs. Other factors which are encouraging most corporations and contractors to adopt new technologies are more compact designs, less land requirement, less construction time, better material of construction, less maintenance cost, automation and less dependency on expensive trained manpower to operate plants in remote locations."

9. Accordingly, the Committee further observed that:

"• *The new stringent standards are devised considering the deterioration condition of water bodies and unavailability of adequate dilution water in our water bodies. If not stringent quality standards are not implemented then in the coming future with more population burden on rivers, situation will further deteriorate.*

- *The greatest benefit of these standards is to achieve all purpose non-portable reuse quality effluent. Each STP is to be treated as a source of water for reuse and recycling, helping in mitigating drought/climate change in the country. It will also reduce exploitation of groundwater reserves and dependency on rainfall which has become quite unpredictable in the past few years. Climate change is a reality that should be addressed and adopted for in the coming future. It will go a long way in reducing agricultural dependency on bore well water.*
- *If treatment of wastewater is not carried out with intention of reuse and recycle expenditure on conveyance/long distance transport of water/sewage will be much higher. Even as on toady in many cities cost of conveyance of water is much higher than the treatment of sewage to make it fit for most uses including domestic uses. For example the cost of transporting water from Narmada to fulfil water supply needs of Indore city (approximately @ Rs. 20/cum) is much higher than the cost of treating sewage to tertiary level."*

In view of above and severity of depletion of aquatic resources vis-a-vis the financial aspects related to conveyance and treatment of water/sewage the committee recommended that the effluent discharge for STPs to be as follows:

Sl. No.	Industry	Parameters	Standards (Applicable to all mode of disposal)			
1	2	3	4			
	Sewage Treatment Plants (STPs)		Mega and Metropolitan Cities	Class I Cities	Others	Deep Marine Outfall
		pH	5.5-9.0	5.5-9.0	5.5-9.0	5.5-9.0
		Bio-Chemical Oxygen Demand (BOD)	10	20	30	30
		Total Suspended Solids (TSS)	20	30	50	50
		Chemical Oxygen Demand (COD)	50	100	150	150
		Nitrogen-Total	10	15	-	-
		Phosphorus-Total(For Discharge into Ponds, Lakes)	1.0	1.0	1.0	
		Fecal Coliform (FC) (Most Probable	Desireable-100 Permissible-	Desireable-230 Permissi	Desireable-1000 Permissible-	Desirable-1000 Permissibl

		Number per 100 milliliter, MPN/100 ml	*230*	*ble-1000*	*10,000*	*e-10,000*

Note:

(i) *Mega-Metropolitan Cities have population more than 1 crore, Metropolitan Cities-Population more than 10 Lakhs and Class-1 Population more than 1 Lakh.*

(ii) *All value in mg/l except for pH and Fecal Coliform.*

(iii) *These standards will be applicable for discharge into water bodies as well as for land disposal/applications.*

(iv) *These Standards shall apply to all new STPs for which construction is yet to be initiated.*

(v) *The existing/under construction STPs shall achieve these standards within 07 years from the date of notification.*

(vi) *In case where the marine outfall provides a minimum initial dilution of 150 times at the point of discharge and a minimum dilution of 1500 times at a point 100m away from discharge point, then norms for deep sea marine discharge shall be applied.*

(vii) *Reuse/Recycling of treated effluent shall be encouraged.*

(viii) *State Pollution Control Boards/Pollution Control Committees may make these norms more stringent taking into account the local conditions.*

"

10. We have heard Learned Counsel for the parties.

11. Learned Counsel for the applicant submits that while the Expert Committee is fully justified in suggesting parameters as per its report for Mega-Metropolitan Cities, there is no justification for different and diluted standards for Class-I cities, Other cities or Deep Marine Outfall and to that extent the report of the Expert Committee fall short of the required scientific logic and database. While

recommending the diluted standards for Class-I cities, Other cities or Deep Marine Outfall the Committee has not given any explanation with regard to the existing pollution load in these areas, the available systems in place, the efficacy of the systems in terms of meeting of norms, the population impacted by deteriorating water quality and likely consequences on health of people if these diluted norms are permitted. There is no scientific justification offered for diluting the norms for these areas in which the majority of country's population resides. Also such standards we feel must apply not only to new STPs but also to the existing ones. Further, there is no justification for non-application of such standards for seven years for existing STPs.

12. Learned Counsel for CPCB and interveners are unable to justify dilution of standards for areas other than Mega Metropolitan Cities or for existing STPs.

13. We find that there is no justification for diluted standards for areas other than Mega and Metropolitan Cities. The water quality standards are required to be same for the population of major cities or other cities. No justification has been shown for different standards for persons living in cities other than Mega and Metropolitan Cities. Major population of this country will be affected by diluted standards and only persons in Mega and Metropolitan Cities will have comparatively better standards without any valid reason or distinction. We may note that filters, UV filters etc. are facilities

mainly available in major cities and not in smaller cities or villages where the standards are proposed to be diluted.

14. Accordingly, we accept the report of the Expert Committee with the modification that the standards recommended for Mega and Metropolitan Cities will also apply to rest of the country. We also direct that the standards will apply not only for new STPs but also for existing/under construction STPs without any delay and giving of seven years time stands disapproved.

MoEF & CC may issue an appropriate Notification in the matter within one month from today.

The Application is disposed of.

UPON hearing the counsel the Court made the following

O R D E R

IA No 93118 of 2021 in Civil Appeal Nos 923-924 of 2021.

1 An order has been passed by the National Green Tribunal on 16 July 2021 directing the Municipal Commissioner of the Municipal Corporation of Greater Mumbai to appear in person along with his response and a compliance status in respect of each of the directions which have been issued by the Tribunal in its order dated 14 October 2020. The Municipal Commissioner has been directed to explain why coercive measures under Section 25 of the National Green Tribunal Act 2010 read with Section 51 of the CPC may not be taken to ensure compliance of the order of the Tribunal.

2 The NGT was apprised of the fact that notice has been issued by this court on 28 June 2021 in Civil Appeal Nos 923-924 of 2021. However, the Tribunal has taken the view that since there was no stay of its decision, the execution proceedings filed by the first respondent may proceed and hence, the above order has been passed.

3 Mr Mukul Rohatgi, learned senior counsel appearing on behalf of the Municipal Corporation submits that though the execution application was filed on 22 June 2021 before this Court issued notice, this court was not apprised of the fact by the first respondent, and on 16 July 2021, an order was passed by the Tribunal without notice to the Municipal Corporation. That apart, it has been submitted that even in the counter affidavit which was filed on 19 July 2021 in these proceedings, there has been no reference to the execution proceedings.

4 The issue which has been raised in the proceedings before the NGT is indeed serious since it relates to the discharge of untreated waste into the sea, creek and river bodies. The Municipal Corporation must, in our view, make every effort to comply with the directions of the NGT by setting up the required facilities and upgrading existing facilities. Humanity can ill afford the luxury of using water bodies as dumping grounds of municipal waste. It is absolutely no valid answer to say that the directions which have been issued by the NGT would pose budgetary implications for the Municipal Corporation, particularly when the report of the expert committee indicates quite to the contrary. The discharge of untreated sewage and waste from Mumbai is a matter of serious concern and needs to be attended to with the highest priority. The protection of the environment is a matter of universal concern. The Municipal Corporation and the Municipal Commissioner must respond to the notice which has been issued by the NGT. At the same time, recourse to coercive steps against the Municipal Commissioner is not appropriate, particularly when the official is engaged in a herculean effort to respond to the Covid 19 pandemic for protecting the residents of the metropolis. Reasonable time should be given to MCGM and the Municipal Commissioner to apprise the Tribunal of the steps taken.

5 We accordingly direct that within a period of two weeks from today, the Municipal Commissioner shall file an affidavit before the NGT categorically indicating the steps which have been taken to comply with the directions of the NGT, particularly in regard to ensuring compliance with the requisite standards for the discharge of effluents including municipal waste and sewage. The affidavit shall set down a concrete plan of action for the future. NGT may consider the affidavit and the steps which have been taken to ensure compliance.

6 Pending further orders, however, no coercive steps shall be taken against the Municipal Commissioner or the Municipal Corporation in pursuance of

paragraph 7 of the order dated 16 July 2021. In the event that the Municipal Corporation does not make a good faith effort to place before the NGT a full schedule of steps taken and those which are proposed to be taken, we may be constrained to vacate the stay on the direction in paragraph 7 on the next date of listing.

7 The above directions should not be interpreted as a carte blanche to the Municipal Corporation to continue to violate the prescribed pollution control norms in the interregnum and all steps shall be taken in the meantime to ensure compliance.

Sub: Forwarding of inspection reports of Grossly Polluting Industries, Common Effluent Treatment Plants & Sewage Treatment Plants located in state of Uttar Pradesh carried out by CPCB teams in compliance to the Hon'ble High Court of Allahabad order dated 27.07.2022 in PIL No.4003 of 2006 -reg

Sir,

In compliance with the Hon'ble High Court of Allahabad order dated 27.07.2022 in the matter of Public Interest Litigation (PIL) no. 4003 of 2006 (Re- Ganga Pollution vs. State of U.P. and Others), Central Pollution Control Board (CPCB) constituted inspection teams which have been carrying out inspections of Grossly Polluting Industries (GPIs), Sewage Treatment Plants (STPs) and Common Effluent Treatment Plants (CETPs) located in the state of Uttar Pradesh, w.e.f. 26.08.2022. As on October 12, 2022, inspection of 210 GPIs, 35 STPs and 8 CETPs have been completed.

Further, the Hon'ble High Court of Allahabad, vide order dated 26.09.2022, has also directed the following:

> *"... (ii) Learned counsel for the U.P. Pollution Control Board shall also apprise the Court about the contents of the affidavit filed by the Central Pollution Control Board whereby number of GPIs were not found to be meeting the parameters laid down for treatment of discharge of effluents."*

In accordance with the aforementioned order of the Hon'ble High Court and proceedings held on 26.09.2022 in the Court, action against the non-complying, non-operational GPIs, STPs & CETPs based on the inspection reports shall be taken by UPPCB.

In view of the above, CPCB has made arrangement for forwarding of these inspection reports to UPPCB through a dedicated portal (http://epcbinspection.co.in/epcbinspection) e-mail. Access to the portal has been made available to UPPCB to download these reports. UPPCB shall also be able to upload the action taken status of these GPIs, STPs & CETPs on the same portal.

Inspection reports of 37 GPIs have been uploaded on portal for perusal and necessary action as per the Hon'ble Court orders. Action taken reports may also be shared/ uploaded through the portal.

Yours faithfully,

Sir,

With reference to CPCB letter dated 13.10.2022, on the above mentioned subject, I am directed to forward herewith the Standard Operating Protocol (SOP) for follow-up action of inspection reports by UPPCB as under:

1. UPPCB shall take appropriate action within 15 days of receipt of inspection report and upload action on CPCB portal.
2. In case of non-compliance. UPPCB shall issue directions (Show-cause notice or closure directions) within 15 days of receipt of inspection reports. Further in case of Show Cause Notices, the unit shall be re-inspected and closure directions shall be issued in case of non-compliance within 30 days. Follow up inspections of Show Cause Notices shall be carried out by UPPCB officials.
3. Closure directions shall be issued by UPPCB to temporary closed units except seasonal and to those who have already informed SPCB about self-closure. After consideration of re-opening request, unit shall be re-inspected by UPPCB officials and compliance shall be verified.
4. If inspecting team is not allowed to enter in industries, SPCBs shall issue closure direction and random inspection of such units shall be carried out by UPPCB.
5. In case of by-pass of effluent/non-operational ETP/Non-Co-operation by Industries, closure direction including levying environmental compensation shall be issued within one week of receipt of report.
6. CPCB prepared "Guidelines for issuance of directions and revocation of closure directions issued under section 5 of E(P)A, 1986" vide office order dated 06.11.2018 for initiating action against non-complying units including issuance of show-cause notices/closure directions and revocation thereof based on levels of violation. UPPCB shall follow these guidelines. Copy of guidelines attached.

Inspection reports of GPIs have been uploaded on portal for perusal and necessary action as per the Hon'ble Court orders. Action taken reports may also be shared/ uploaded through the portal.

Guidelines for Issuance of Directions u/s 5 of Environment (Protection) Act, 1986 on basis of Industrial Inspections

Central Pollution Control Board

Parivesh Bhawan, East Arjun Nagar, Delhi-110032

156.

Guidelines/Policy for Taking Action (Industrial Inspection)

Background

CPCB carries out inspection of industries to verify the compliance status to ensure safety of environment in general and compliance of standards notified under the Environment (Protection) Rules, 1986 in particular. The inspection may includes physical verification of the unit premises for overall assessment of environmental management, manual sampling of the effluent and emission discharged (including sampling from the bypass point/s if any), collection of documents/records relating to production, energy consumption, fresh water consumption, waste water generation & discharge and chemical consumption in treatment facilities, consent to operate, authorization certificates etc. Samples collected during inspection are subjected to analysis of specific parameters in CPCB or EPA recognised labs. The outcome of the general observations, verification of the documents/records and the result of the laboratory analysis of the samples is compiled in the form of 'inspection report'. The inspection report is processed and further actions are proposed based on the observations and analysis results of samples collected during inspection.

Need for Guidelines

The inspection reports having observations and recommendations are processed by Concerned divisions. Evaluation of observations and consideration of recommendations are followed by proposal of 'action' by the concerned officer. It is observed that there is disparity in the proposed action depending on the processing officer's discretion. Therefore, it is imperative to have documented guidelines, to be referred upon, for proposing and taking actions on the basis of inspection reports.

Actions to Be Taken

CPCB is empowered under the Environment (Protection) Act, 1986 to take action against industrial units/authorities to ensure compliance of notified environmental standards. Also, CPCB is empowered under the Water (Prevention and Control of Pollution) Act, 1974 and Air (Prevention and Control of Pollution) Act,1981 to issue directions to the State Boards.

Directions u/s 5 E(P) Act, 1986

I. Directions for corrective measures:

Directions are issued to the units to carry out certain task for improvement of general operational and environmental conditions, to ensure continuous compliance. In this regard a list of observations in case of which such directions may be issued has been mentioned in Level I category (explained on page 3).

II. Show cause notice for closure direction:

When the Industrial units are found non-complying w.r.t. notified discharge/emission standards, and other shortcomings considered as non-complying without causing grave injury to the environment Show Cause Notice for closure direction may be issued. In this regard a list of observations in case of which such directions may be issued has been mentioned in Level II category (explained on page 3).

III. Closure Direction:

When the Industrial units are found non-complying w.r.t. notified discharge standards and other shortcomings and considered as causing grave injury* (* based on mode of discharge/receiving environment, effluent load, critical parameters, history of violations) to the environment, closure directions after recording the same as per section 4 sub-section 5 of E (P) Rules,1986 may be

issued. In this regard, a list of observations in case of which such directions may be issued has been mentioned in Level III category (explained on page 4).

IV. Directions to Authorities: Municipalities, Electricity Board, Jal Board etc. for ensuring compliance of the CPCB directions and for management of Environmental issues.

Directions u/s 18 (1) (b) Water Act, 1974 & Air Act,1981

V. Direction to SPCB

Special cases **or** pandemic issues/problems - Directions u/s 18 (1) (b) Water (Prevention and Control of Pollution) Act, 1974 and Air (Prevention and Control of Pollution) Act, 1981 may be issued to the SPCB, aiming for making policies, towards improvement in overall environment in certain areas/sectors etc., issues related to Consent to Operate (CTO) conditions.

List of Level I, Level II & Level III Category Observations/Non-compliance

Level I category

Action to be taken: ***General Direction for Corrective Action***

1. Name & address of unit not displayed at the entrance.
2. No display of environmental data and the validity of CTO, Hazardous Waste (HW) and Solid Waste Authorization at the main gate of premises.
3. Improper housekeeping, improper Solid waste management (Improper in-house dumping/stacking of solid waste).
4. Lacking or mismanaged log/record book for water extraction, Wastewater discharged, production, energy and chemical consumption in ETP/APCD etc.
5. No flow meter at borewells, ETP inlet and recycle point; no energy meter at ETP as well as APCD.
6. Any exceedance in discharge standard within uncertainty limit of analysis.
7. Any other specific observations of the inspection report on representativeness of sample/doubtful compliance.

Level II category

(considered to be non-complying unit not causing grave injury to the environment)

Action to be taken: ***Show cause notice for closure direction***

1. Invalid CTO, HW authorization (wherever applicable) & not applied for fresh/renewal.
2. OCEMS found disconnected /partial OCEMS/tampered (in GPIs of Ganga basin, air polluting industries in NCR and 17 category industries to which earlier directions were not issued).
3. Dilution or addition of fresh water at any stage of ETP.
4. Waste water discharged beyond consented quantity.
5. Poor Operation & Maintenance of ETP (eg. MLSS below designed level in Aeration tank of ASP) and APCD including non-functional aerator/pump/standby provision(s).

6. Improper monitoring facilities (such as location of Port hole/ monitoring platform) in the stack, Stack Height not as per Consent and Not having easy accessibility to ETP/APCD for effluent/emission sampling & observation.
7. Exceedance of notified discharge general parameters beyond its uncertainty limit (Exceedance in any one of notified discharge parameters will be considered as non-compliance, however the action taken will be in accordance with number of parameters and degree of exceedance.)
8. Unauthorised disposal of Hazardous waste or inadequate Hazardous waste storage capacity or violations of conditions of authorization not leading to grave injury to the environment.
9. DG set operating without acoustic enclosures.
10. Non-complying with the conditions imposed during revocation of earlier closure direction.
11. Continuous or non-compliance of observations in Level I category.

Level III category

(Considered to be non-complying unit causing grave injury to the environment)

Action to be taken: ***Closure Direction***

1. Non-Installation and Non-Connectivity of OCEMS as per CPCB direction.
2. Provision for more than consented outlet(s) and/or any bypass arrangement for discharge of Partially treated or untreated effluent/emission and/or provision for flow diversion through flexible pipelines in the ETP for effluent transfer/bypass.
3. Operating unit having Defunct /Non-operational ETP/APCD which could not be made operational at the time of inspection and/or without installation of ETP/APCD.
4. Non-compliance of ZLD norms or dry unit found operating wet process.
5. Exceedance of the notified parameters likely to cause grave injury to the environment.
6. Any exceedance of industry specific critical parameters, for effluent discharge like Cr, CN-, Phenol, Sulphide, Hg etc. and for emission/discharge like HCl, Fluoride, Dioxins & furans etc.
7. Unauthorised disposal of Hazardous waste or inadequate Hazardous waste storage capacity likely to cause grave injury to environment.
8. Significant Pollution in recipient drain/water body due to episodal discharge (sample from the discharge recipient source having similar characteristic as the trade effluent from the industry).
9. Injection of treated or untreated water or both into ground water (Reverse Boring).
10. Any other observations likely to cause grave injury and recommendation as per inspection report.
11. Continuous non-compliance of observations in Level II category.

Guidelines for Revocation of Closure Directions issued u/s 5 of Environment (Protection) Act, 1986

The following guidelines, including prerequisite from the industry before requesting to CPCB for revocation of closure directions and processing practice to be adhered by CPCB, are proposed:

Sl. No.	Cause of issuing closure direction	Prerequisite to ensure compliance (to be provided/submitted by industry to CPCB)	Compliance status (to be processed by CPCB)	Revocation of directions with following conditions*
1	Non-Installation and Non-connectivity of OCEMS as per CPCB direction	•Self certificate for closure of unit in compliance of CPCB direction. •Installation of OCEMS and connectivity with CPCB server with evidence	• Verification of connectivity status from IT Division, CPCB, Delhi	• Ensure uninterrupted connectivity with CPCB server
2	Provision for more than consented outlet(s) **And/or** Any bypass arrangement for discharge of Partially treated or untreated effluent/emission **And/or** Provision for flow diversion through flexible pipelines in the ETP for effluent transfer/bypass.	•Self certificate for closure of unit in compliance of CPCB direction. •Dismantling of the structures and photographic evidence	• Verification of the documents and photographs • Physical verification by CPCB.	-
3	Operating unit have Defunct / Non-operational ETP/ APCD which could not be made operational at the time of inspection and/or without installation of ETP/ APCD.	•Self certificate for closure of unit in compliance of CPCB direction. •Adequacy assessment of treatment facility by reputed government institute; followed by implementation of the recommendations of the adequacy report and validation by the same government institute.	• Document verification and examination and evaluation of adequacy report and implementation status.	Performance assessment of the treatment system including analysis of treated effluent/emission by the same reputed government institute within 60 days
4	Non-compliance of ZLD norms or dry unit operating wet process.	• Self certificate for closure of unit in compliance of CPCB direction **For Non-compliance of ZLD norms:** • Adequacy assessment of treatment facility by	Document, photographs verification and examination and evaluation of reports	Verification and water audit report within 60 days by govt. institutes

Format of Self-certificate for closure of unit in compliance of CPCB direction is attached as **Annexure-I**

Guidelines for Revocation of Show Cause Notices issued u/s 5 of E (P) Act, 1986

- The reply/representation of the unit, shall be processed, based on the show cause notice/observations and if found satisfactory, unit will be issued compliance direction with following conditions:
  1. Provide performance assessment of the treatment system through analysis of treated effluent/emission by reputed government institute/ EPA recognised lab within 60 days to CPCB.
  2. Directed to maintain complying status and if found non complying at any stage closure direction will be issued without any further notice.

OR

Unit shall be issued confirm closure direction based on observations of SCN.

centrations. A dissolved oxygen concentration of 0.2 mg/L and above has been reported to inhibit denitrification for a *Pseudomonas* culture (Skerman and MacRae, 1957; Terui and Mori, 1975) and by Dawson and Murphy (1972) for activated-sludge treating domestic wastewater. Nelson and Knowles (1978) reported that denitrification ceased in a highly dispersed growth at a DO concentration of 0.13 mg/L. The effect of nitrate and DO concentration on the biokinetics is accounted for by two correction factors to Eq. (7–109) expressed in the form of two saturation terms as follows:

$$r_{su} = -\left(\frac{kXS}{K_s + S}\right)\left(\frac{NO_3}{K_{s,NO_3} + NO_3}\right)\left(\frac{K_o'}{K_o' + DO}\right)(\eta) \qquad (7\text{–}110)$$

where K_o' = DO inhibition coefficient for nitrate reduction, mg/L
K_{s,NO_3} = half velocity coefficient for nitrate limited reaction, mg/L
Other terms are as defined previously.

The value of K_o' is system-specific. Values in the range from 0.1 to 0.2 mg/L have been proposed for K_o' and 0.1 mg/L for K_{s,NO_3} (Barker and Dold, 1997). Assuming a K_o value of 0.1 mg/L the rate of substrate utilization with nitrate as the electron acceptor at DO concentrations of 0.10, 0.20, and 0.50 mg/L would be at 50, 33, and 17 percent of the maximum rate, respectively.

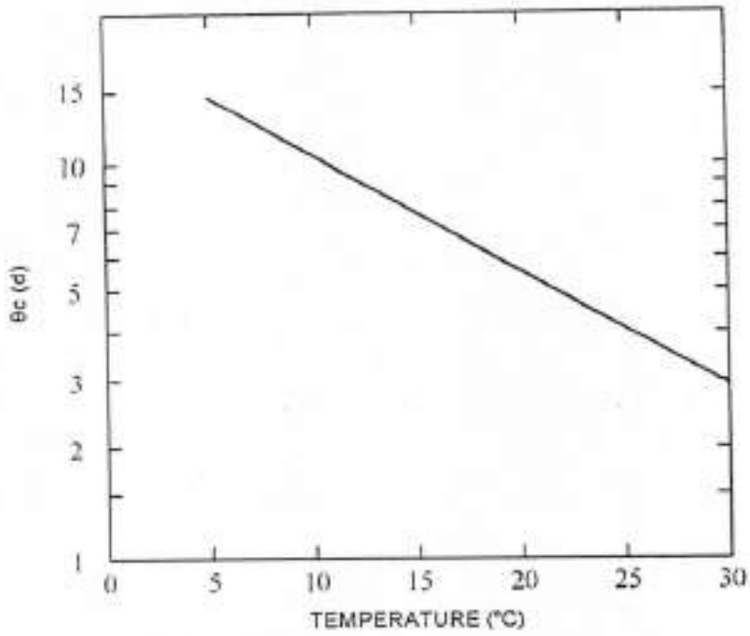

Effect of Simultaneous Nitrification-Denitrification. In activated-sludge systems, the issue of DO concentration is confounded by the fact that the measured bulk liquid DO concentration does not represent the actual DO concentration within the activated-sludge floc. Under low DO concentration conditions, denitrification can occur in the floc interior, while nitrification is occurring at the floc exterior. Also in activated-sludge tanks operated at low DO concentrations, both aerobic and anaerobic zones exist depending on mixing conditions and distance from the aeration point, so that nitrification and denitrification can be occurring in the same tank. Under these conditions, nitrogen removal that occurs in a single aeration tank is referred to as simultaneous nitrification and denitrification. Although both nitrification and denitrification are occurring at reduced rates as indicated by the DO effects described for both processes, if a sufficient SRT and τ exist, the overall nitrogen removal can be significant. Rittman and Langeland (1985) reported greater than 90 percent nitrogen removal by nitrification and denitrification in an activated-sludge system used to treat municipal wastewater at DO concentrations below 0.50 mg/L and with values of τ greater than 25 hours.

Environmental Factors

Alkalinity is produced in denitrification reactions and the pH is generally elevated, instead of being depressed as in nitrification reactions. In contrast to nitrifying organisms, there has been less concern about pH influences on denitrification rates. No significant effect on the denitrification rate has been reported for pH between 7.0 and 8.0, while Dawson and Murphy (1972) showed a decrease in the denitrification rate as the pH was decreased from 7.0 to 6.0 in batch unacclimated tests.

7–11 BIOLOGICAL PHOSPHORUS REMOVAL

The removal of phosphorus by biological means is known as *biological phosphorus removal*. Phosphorus removal is generally done to control eutrophication because

5.8.1.5 Mixing Regime

The mixing regime employed in the aeration tank may be plug flow or completely mixed flow. Plug-flow implies that the sewage moves down progressively along the aeration tank essentially unmixed with the rest of the tank contents. Completely mixed flow involves rapid dispersal of the incoming sewage throughout the tank. In the plug flow system, the F/M and the oxygen demand will be highest at the inlet end of the aeration tank and will then progressively decrease. In the completely mixed system, the F/M and the oxygen demand will be uniform throughout the tank.

may be 1.6 to 1.7 depending on the biomass yield and cell debris fraction. The bCOD/BOD can be estimated using the following equation, which is based on the fact that the bCOD consumed in the BOD test equals the oxygen consumed (UBOD) plus the oxygen equivalent of the remaining cell debris [bCOD = UBOD + $1.42f_d(Y_H)$bCOD] after long-term incubation:

$$\frac{\text{bCOD}}{\text{BOD}} = \frac{\text{UBOD/BOD}}{1.0 - 1.42f_d(Y_H)} \quad (8\text{–}1)$$

where f_d = fraction of cell mass remaining as cell debris, g/g
Y_H = synthesis yield coefficient for heterotrophic bacteria, g VSS/g COD used

For example, using values typical of domestic wastewater (UBOD/BOD = 1.5, f_d = 0.15, Y_H = 0.4), the bCOD/BOD ratio is 1.64.

Nitrogenous Constituents. The composition of nitrogen in wastewater is illustrated on Fig. 8–5. The total Kjeldahl nitrogen (TKN) is a measure of the sum of the ammonia and organic nitrogen. About 60 to 70 percent of the influent TKN concentration will be as NH_4-N, which is readily available for bacterial synthesis and nitrification. Organic nitrogen is present in both soluble and particulate forms, and some portion of each of these is nonbiodegradable. The particulate degradable organic nitrogen will be removed more slowly than the soluble degradable organic nitrogen because a hydrolysis reaction is necessary first. The nondegradable organic nitrogen is assumed to be about 6 percent of the nondegradable VSS as COD in the influent wastewater (Grady et al., 1999). The particulate nondegradable nitrogen will be captured in the activated-sludge floc and exit in the waste sludge, but the soluble nondegradable nitrogen will be found in the secondary clarifier effluent. The soluble nondegradable nitrogen contributes to the effluent total nitrogen concentration and is a small fraction of the influent wastewater TKN concentration (<3 percent). The soluble nondegradable organic nitrogen concentration in domestic wastewater typically ranges from 1 to 2 mg/L as N (Parkin and McCarty, 1981). There is also a possibility that some soluble nondegradable organic nitrogen may be produced from endogenous respiration. Further research

5.7.6.1.3 Sedimentation

The flocculated sewage solids are settled out in a subsequent sedimentation tank. Refer Appendix 7.2 to 7.6 of CPHEEO Manual on Water Supply & Treatment 1999.

5.8 SEWAGE TREATMENT

Sewage Treatment detailed here will be on biological treatment technology only. It covers such of those technologies for which validated design guidelines are available in India over the past many decades. There are more recent technologies with each of them having their own design guidelines by the respective equipment vendors and for which obviously there are proprietary issues in procurement out of public funds. No doubt, unless these are tried out at some point in time, there is no way of inheriting these forever, but at the same time, the proprietary issue has to be got over. Hence, these technologies will be addressed later in this chapter under the title "Recent Technologies". Accordingly, the technologies to be considered in this chapter will be the Activated Sludge Processes, Attached Growth Systems, Treatment Methods Using Immobilization Carrier, Stabilization Ponds and Anaerobic Treatment. It is decided to phase out the stone media trickling filter technology considering the difficulties of upkeep of its rotary distributor, Psychoda flies nuisance and the recent light weight media which give much more surface area for unit volume of the media as compared to the stone media.

5.8.1 Activated Sludge Process

5.8.1.1 Introduction

Aerobic suspended growth systems are of two basic types, those which employ sludge recirculation, viz., conventional activated sludge process and its modifications and those which do not have sludge recycle, viz., aerated lagoons. In both cases sewage containing organic matter is aerated in an aeration basin in which micro-organisms metabolize the soluble and suspended organic matter. Part of the organic matter is synthesized into new cells and part is oxidized to carbon dioxide and water to derive energy. In activated sludge systems the new cells formed in the reaction are removed from the liquid stream in the form of a flocculent sludge in clarifiers. A part of this activated sludge is recycled to the aeration basin and the remaining form waste or excess sludge. In aerated lagoons the microbial mass leaves with the effluent stream or may settle down in areas of the aeration basin where mixing is not sufficient.

The suspended solids concentration in the aeration tank liquor, also called mixed liquor suspended solids (MLSS), is generally taken as an index of the mass of active micro-organisms in the aeration tank. However, the MLSS will contain not only active micro-organisms but also dead cells as well as inert organic matter derived from the raw sewage. The mixed liquor volatile suspended solids (MLVSS) value is also used and is preferable to MLSS as it eliminates the effect of inorganic matter. Aerobic and facultative bacteria are the predominant micro-organisms which carry out the above reactions of organic matter i.e. oxidation and synthesis. Their cellular mass contains about 12% Nitrogen and 2% Phosphorous. These nutrients should be present in sufficient quantity in the waste or they may be added, as required, for the reactions to proceed satisfactorily. A generally recommended ratio of BOD:N:P is 100:5:1. Domestic sewage is generally balanced with respect to these nutrients.

is inorganic. Typical values for the composition of prokaryote cells are reported in Table 7–4. The most widely used empirical formula for the organic fraction of cells is $C_5H_7O_2N$ first proposed by Hoover and Porges (1952). About 53 percent by weight of the organic fraction is carbon. The formulation $C_{60}H_{87}O_{23}N_{12}P$ can be used when phosphorus is also considered. It should be noted that both formulations are approximations and may vary with time and species, but they are used for practical purposes. Nitrogen and phosphorus are considered macronutrients because they are required in comparatively large amounts. Prokaryotes also require trace amounts of metallic ions, or micronutrients, such as zinc, manganese, copper, molybdenum, iron, and cobalt. Because all of these elements and compounds must be derived from the environment, a shortage of any of these substances would limit and, in some cases, alter growth.

Environmental Factors

Environmental conditions of temperature and pH have an important effect on the selection, survival, and growth of microorganisms. In general, optimal growth for a particu-

The raw sewage characteristics are a function of level of water supply and per capita pollution load. Thus, the level of water supply plays a major role in deciding the concentration of pollutants. Other significant factors are settlement and decomposition in sewers under warm weather conditions, partially decomposed sewage from septic tanks, lifestyle of the population, etc. The best way to ascertain the sewage characteristics is to conduct the composite sampling once a week for diurnal variation on hourly basis from the nearby existing sewage outfall or drain.

Considering a four-week month, three samples are to be taken on weekdays, whereas the fourth sample is to be taken on an off day i.e. Sunday.

Sampling for water quality should be conducted for at least one month during dry weather to assess pollution load quantitatively and qualitatively.

The samples should be analyzed for the following parameters;

pH, Temperature, Colour, Odour, Alkalinity, TSS, Volatile SS, BOD (Total & Filtered), COD (Total and Filtered), Nitrogen (NH3, TKN, NO3), Phosphorus (Ortho-P & T-P), Total Coliforms and Faecal Coliforms, TDS, Chloride, Sulphates, Heavy Metals (if there is a chance of industrial contamination)

The results arising from these analyses shall be adopted with the approval of the competent authority. In the absence of drain or outfall, the Table 5.4 can be referred for new developments for 135 L/cap /day rate of water supply. Depending on the rate of water supply the concentrations can be forecast. Based on the raw sewage quality monitoring experiences, the following typical concentrations can be taken for design purpose for 135 L/Cap /day water supply.

Religion-Hindu, Occupation- Service

(DEPONENT)

I, the deponent named above solemnly affirm and state on oath as under: -

1. That the deponent is Regional Director, Regional Directorate, Lucknow, Central Pollution Control Board, PICUP Bhawan, Vibhuti Khand, Gomti Nagar, Lucknow, Uttar Pradesh, and is competent and authorized to file the present compliance affidavit on behalf of the respondent no.10, *i.e.*, Chairman, Central Pollution Control Board, Ministry of Environment Forest and Climate Change, Government

of India, New Delhi (hereinafter "CPCB"), in pursuance to order dated 27.07.2022, and 31.08.2022 passed by this Hon'ble Court in the above noted PIL No.4003 of 2006 Re- Ganga Pollution v. State of U.P. and others and as such he is fully conversant with the facts of the case in his official capacity deposed to below..

2. That, this compliance affidavit is in continuation of earlier Compliance Affidavits dated 29.11.2022 filed on behalf of the respondent no.10 before this Hon'ble Court in compliance of order dated 27.07.2022 passed in present WPIL No. 4003 of 2006 (Re - Ganga Pollution Vs. State of U.P. and others).

3. That, this Hon'ble High Court, Allahabad passed order, dated 27.07.2022 in present WPIL No. 4003 of 2006 (Re–Ganga Pollution Vs. State of U.P. and others). Verbatim of relevant para of order dated 27.07.2022 is reproduced below:

> *"12. In the aforesaid factual matrix, we are constrained to direct Central Pollution Control Board to collect samples from all the industries as mentioned in affidavit dated December 23, 2016 and the STPs set up in the cities on the embankment of river Ganga and submit a report to this Court as to whether these meet the prescribed standards. Needful may be done in due course. However, test reports of samples collected and reports prepared before the next date of hearing be submitted in Court."*

Verbatim of relevant para of subsequent judgement dated 31.08.2022 is reproduced below:

> ***"12 (ii).*** *Central Pollution Control Board shall furnish the test reports of the samples collected and available up to the next date of hearing in terms of directions issued in paragraph no. 12 of the order passed on July 27, 2022;"*

4. That, in compliance to the above orders CPCB has constituted 33 teams of CPCB officials to undertake surprise and random inspection of 1370 Grossly Polluting Industries (GPIs), 36 Sewage Treatment Plants (STPs) [one (01) STP at Vindyachal in district Mirzapur has been operationalized recently after filing of the compliance affidavit dated 23-09-2022] and eight (08) Common Effluent Treatment Plants (CETPs)/Common Chrome Recovery Unit (CCRU) located in the State of Uttar Pradesh.

5. That, the inspections by CPCB teams commenced on 26.08.2022 and till 31.01.2023, a total of 550 inspections have been completed including 507 GPIs located in 27 districts of Uttar Pradesh, 35 STPs in ten (10) districts and eight (08) CETPs/ CCRU in five (05) districts.

6. That, of the total 550 inspections, 384 inspections were completed as on 15.11.2022 and accordingly Compliance & operational status of 317 units (276 GPIs, 33 STPs and 08 CETPs) was submitted vide Compliance Affidavit dated 29.11.2022 before this Hon'ble Court.

7. That, 166 inspections have been carried out from 16.11.2022 to 31.01.2023 and accordingly 112 new inspection reports (110 GPIs and 02 STPs) have been received.

8. That, cumulatively, inspection reports for 429 units (386 GPIs, 35 STPs and 8 CETPs/CCRU) have been received and uploaded on CPCB as on 31.01.2023.

9. That, as per 429 inspection reports received, 270 units were found operational including 231 GPIs, 31 STPs and eight (08) CETPs and samples from these units were submitted for laboratory analysis. Also, 159 units (155 GPIs and 04 STPs) were found non-operational .

10. That, of the 429 inspection reports received, operational and compliance status of 112 units (110 GPIs and 02 STPs) is presented in this affidavit as operational and compliance status of 317 units has already been submitted vide compliance affidavit dated 29.11.2022.

Grossly Polluting Industries

11. That, as on 31.01.2023, total 386 inspection reports of GPIs (including 231 operational units and 155 non-operational units) have been uploaded on CPCB portal. Out of the 231 operational GPIs; 128 GPIs were found complying and 103 non-complying. Compliance of the operational units have been verified with respect to industry specific effluent discharge norms as prescribed under the Environment (Protection) Act, 1986 Schedule-I. The analysis results of grab samples taken from ETP outlet of the industrial units are compared with notified standards for compliance verification. Re-inspection may be carried out for 10 industries.

12. That, the operational and compliance status of 276 GPIs units out of 386, has already been filed before this Hon'ble Court vide Compliance Affidavit dated 29.11.2022. In continuation of the affidavit dated 29.11.2022, operational and compliance status of 110 GPIs is presented in this affidavit.

13. As per the 110 inspection reports, 71 GPIs were found operational and 39 were found non-operational. Compliance status of 110 GPIs is presented in tabular form in Table 1 as following: -.

Table 1: Summarized compliance status of 110 GPIs inspected from 16.11.2022 to 31.01.2023

18. That, details of the 02 STPs inspected along with inlet and outlet parameters presented in tabular form are annexed herewith and marked as **Annexure No. 2.**

Common Effluent Treatment Plant (CETP)

19. That, there are eight (08) CETPs located in Uttar Pradesh including one Common Chrome Recovery Unit (CCRU) at Jajmau.

20. That, this respondent has submitted compliance status of 08 CETPs before this Hon'ble Court vide compliance affidavit dated 29.11.2022. The summarized compliance status of CETPs in presented below:

*Number of GPIs as per inventory of 2021 received from Uttar Pradesh Pollution Control Board

17. That, the Hon'ble High Court of Allahabad, vide order dated 26.09.2022, also directed the following:

"…..*10. Learned counsel for the U.P. Pollution Control Board shall also apprise the Court about the contents of the affidavit filed by the Central Pollution Control Board whereby number of GPIs were not found to be meeting the parameters laid down for treatment of discharge of effluents."*

Pursuant to the above, CPCB is constantly forwarding the inspection reports to UPPCB for taking necessary action. As on 16.02.2022, 429 inspection reports (386 GPIs, 35 STPs and 8 CETPs) were forwarded to UPPCB for perusal and necessary action.

18. That, it is most respectfully submitted that from the inspection reports of tanneries located in Jajmau, Unnao and Kanpur, it has been observed that many of the tanneries were found non-operational due to the implementation of roster dated 30.09.2020 issued to 265 tanneries by UPPCB in view of Magh Mela, however, due to random selection of GPIs through the portal, these units were also selected. Thus, the compliance status of these units could not be verified during visit, hence re-inspection of these units may be carried out.

Also, some textile industries having consent & infrastructure for wet process, were found engaged in dry process only during the day of the visit. These units shall be re-inspected for compliance verification.

In addition to above, it is most respectfully submitted that as per CPCB directions, distilleries are required to achieve zero liquid discharge (ZLD) through bio-composting or through concentration & incineration of spent wash or combination of both. Distilleries performing bio-composting in covered yards can operate

throughout the year can whereas others may operate for 270 days (excluding rainy season). During inspection, the distilleries opting for bio-composting routes were found non-operational during monsoon period (July-September) due to which the compliance verification of the distilleries could not be carried out. However, these inspection reports have been forwarded to UPPCB via portal for necessary action.

Prayer

19. That, it is, most respectfully prayed that this Hon'ble Court may graciously be pleased to allow the Central Pollution Control Board, to undertake inspections, sample analysis and report preparation of all GPIs and STPs located in the state of Uttar Pradesh by CPCB teams, in due course of time; and forward the inspection reports to Uttar Pradesh Pollution Control Board, through the dedicated portal, for necessary action on all non-complying GPIs, STPs and CETPs in Uttar Pradesh.

I, the deponent named above, do hereby solemnly affirm and verify that the contents of paragraphs **No.1,19** of the affidavit are true to my personal knowledge; those of paragraphs no. 2 to 18 are based on perusal of records; and those of paragraph no. NIl is based on legal advice, which all I believe to be correct; that no part of it is false and nothing materials has been concealed herein.

So help me God

(DEPONENT)

I, the deponent named above solemnly affirm and state on oath as under: -

1. That the deponent is Regional Director, Regional Directorate, Lucknow, Central Pollution Control Board, PICUP Bhawan, Vibhuti Khand, Gomti Nagar, Lucknow, Uttar Pradesh, and is competent and authorized to file the present compliance affidavit on behalf of the respondent no.10, *i.e.*, Chairman, Central Pollution Control Board, Ministry of Environment Forest and Climate Change, Government

of India, New Delhi (hereinafter "CPCB"), in pursuance to order dated 27.07.2022, and 31.08.2022 passed by this Hon'ble Court in the above noted PIL No.4003 of 2006 Re- Ganga Pollution v. State of U.P. and others and as such he is fully conversant with the facts of the case in his official capacity deposed to below..

2. That, this compliance affidavit is in continuation of earlier Compliance Affidavits filed on behalf of the respondent no.10 before this Hon'ble Court in compliance of order dated 27.07.2022 passed in present WPIL No. 4003 of 2006 (Re - Ganga Pollution Vs. State of U.P. and others).

3. That, this Hon'ble High Court, Allahabad passed order, dated 27.07.2022 in present WPIL No. 4003 of 2006 (Re–Ganga Pollution Vs. State of U.P. and others). Verbatim of relevant para of order dated 27.07.2022 is reproduced below:

> *"12. In the aforesaid factual matrix, we are constrained to direct Central Pollution Control Board to collect samples from all the industries as mentioned in affidavit dated December 23, 2016 and the STPs set up in the cities on the embankment of river Ganga and submit a report to this Court as to whether these meet the prescribed standards. Needful may be done in due course. However, test reports of samples collected and reports prepared before the next date of hearing be submitted in Court."*

Verbatim of relevant para of subsequent judgement dated 31.08.2022 is reproduced below:

> ***"12 (ii).*** *Central Pollution Control Board shall furnish the test reports of the samples collected and available up to the next date of hearing in terms of directions issued in paragraph no. 12 of the order passed on July 27, 2022;"*

4. That, in compliance to the above orders CPCB has constituted 33 teams of CPCB officials to undertake surprise and random inspection of 1370 Grossly Polluting Industries (GPIs), 36 Sewage Treatment Plants (STPs) [one (01) STP at Vindyachal in district Mirzapur has been operationalized recently after filing of the compliance affidavit dated 23-09-2022] and eight (08) Common Effluent Treatment Plants (CETPs)/Common Chrome Recovery Unit (CCRU) located in the State of Uttar Pradesh.

5. That, the inspections by CPCB teams commenced on 26.08.2022 and till 31.05.2023, a total of 763 inspections have been completed including 719 GPIs located in 27 districts of Uttar Pradesh, 35 STPs in ten (10) districts and eight (08) CETPs/ CCRU in five (05) districts.

6. That, of the total 763 inspections done, reports have been received for 683 units (639 GPIs, 36 STPs and 8 CETPs and uploaded on CPCB as on 31.05.2023.

7. That, as per 763 inspection reports received, 466 units were found operational including 426 GPIs, 32 STPs and eight (08) CETPs and samples from these units were submitted for laboratory analysis. Also, 217 units (213 GPIs and 04 STPs) were found non-operational.

8. That, of the total 683 reports received, operational and compliance status of 429 units including 386 GPIs, 35 STPs and 8 CETPs, has already been filed before this Hon'ble Court vide affidavits dated……

9. That, operational and compliance status of 254 units (253 GPIs and 01 STP) is presented in this affidavit.

Grossly Polluting Industries

10. That, as on 31.05.2023, total 639 inspection reports of GPIs (including 426 operational units and 213 non-operational units) have been uploaded on CPCB portal. Out of the 426 operational GPIs; 203 GPIs have been found complying and 203 non-complying and re-inspection has been recommended for 20 GPIs. Compliance of the operational units have been verified with respect to industry specific effluent discharge norms as prescribed under the Environment (Protection) Act, 1986 Schedule-I. The analysis results of grab samples taken from ETP outlet of the industrial units are compared with notified standards for compliance verification.

11. That, the operational and compliance status of 386 GPIs units out of 639, has already been filed before this Hon'ble Court vide Compliance Affidavit dated….. In continuation of the affidavit dated 31.01.2023, operational and compliance status of 253 GPIs is presented in this affidavit.
