OA No.50/2024

IN THE MATTER OF:

Amandeep Kamboj

.... Applicant

Versus

State of Haryana and others

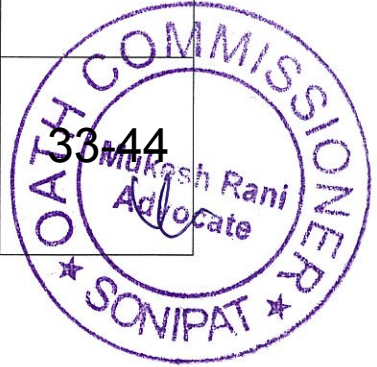

.... Respondents

**REPLY ON BEHALF OF RESPONDENT NO. 6 I.E. M/S POOJA WASTE  
MANAGEMENT COMPANY PVT. LTD. THROUGH ITS DIRECTOR SH.  
MAYANK MALHOTRA IN COMPLAINE OF THE ORDER DATED  
02.09.2024 OF THIS HON'BLE TRIBUNAL.**

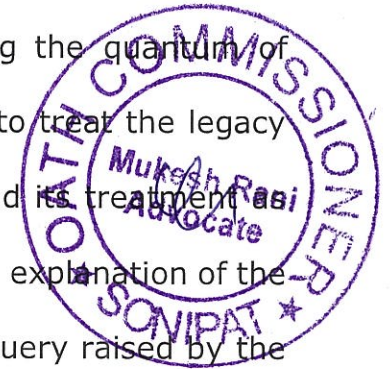

**MOST RESPECTFULLY SHOWETH:**

1. That the present petition has been filed by the applicant is utterly mis-conceived, misconstrued, misunderstood and filed with the intent to harass the answering respondent.
2. The Hon'ble NGT vide orders dated 02.09.2024 passed the following order:

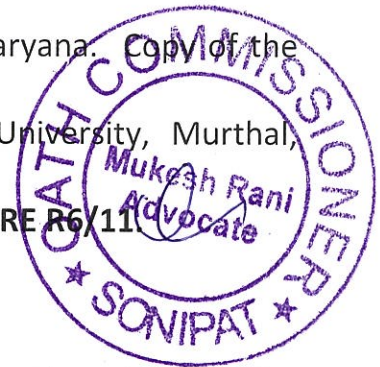

*"Learned Counsel for Respondent No. 6 seeks limited indulgence to grant four weeks to place on record the facts and figures relating to the quantum of legacy waste, extent of facilities available to treat the legacy waste, quantum of daily generated solid waste and its treatment as also the gap and details of final disposal."*

3. The respondent had in person filed a detailed reply dated 30.08.2024 before this Hon'ble Tribunal. However regarding the issue involved same certain crucial facts were missed out which ought to be brought to light before this Hon'ble Tribunal. The Hon'ble Court vide order dated 02.09.2024 Raised specific query regarding the quantum of legacy waste on site, extent of facilities available to treat the legacy waste, quantum of daily generated solid waste and its treatment as also the gap and details of final disposal. A detailed explanation of the working of the respondent No.2 qua the specific query raised by the Hon'ble Tribunal is stated herein below:

- a) The Respondent No.6 i.e. M/s Pooja Waste Management Pvt. Limited is diligently working towards the waste management as per the rules of 2016 passed by the National Green Tribunal.
- b) It is stated that Bakerinyawali Plant is spread over the area of around 13 Acre of land. It is further submitted that the Legacy Waste Present on site is spread in approximately around 8 Acre of land and approximate area available for treatment of Fresh Waste is around 5

Acres. It is submitted that the Legacy Waste on Bakerinyawali site has been lying since 2006. It is submitted that the answering respondent i.e. Pooja Waste Management has taken over the site from the previous agency and has started the work in Sirsa from 10 August 2023. It is stated that the estimated Quantum Legacy waste on site as on date is around 2.12 lac Ton (approx) the same can be substantiated from an independent report submitted by the Department of Civil Engineering, Deen Bandhu Chotu Ram University, Murthal, Haryana. Copy of the relevant report of Deen Bandhu Chotu Ram University, Murthal, Haryana dated 10.02.2023 is attached as ANNEXURE R6/11.

- c) It is stated that the aforementioned legacy waste had been lying on site from the starting of this plant i.e. since 2006.
- d) It is stated that in order to process the legacy waste on site and Environmental clearance is required however the answering respondent has also duly completed the Process of application of Environmental Clearance on 22.11.2024 and same is under consideration with the Ministry of Environmental and Forest Change (MOEF). It is further submitted that the proposal of the answering respondent has been accepted and the environmental clearance is

likely to be issued in favor of the answering Respondent shortly. A Copy of list of Agenda to be taken in SEIAA (Haryana) dated 22.11.2024 is attached as **ANNEXURE R6/12**.

e) It is stated that the answering respondent is well equipped to handle the waste management process and in the present case is planning to install 2 plants of 500 TPD each for processing the above legacy waste immediately after receiving the Environment Clearance from the Government.

f) It is stated that as regards the Quantum of daily generated solid waste and its treatment is concerned overall plant processing capacity is 500 TPD. The daily waste Generated in Sirsa is approximately 120 TPD to 125 TPD. It is stated that the total waste per day is approximately 120 TPD out of which Dry Waste is approximately 66 TPD, Wet Waste is approximately 54 TPD. It is stated that the byproducts of dry Waste such as paper, cardboard, plastic, cloth, glass, metal, wood etc are segregated from the overall Waste through Ragpickers and workers available at processing plant and are transported to MRF facility through JCB's and Tractor Trolley available at site Finally it is disposed off or sell out at the level of rag pickers to scrap dealers.

g) It is stated that the answering respondent also has agreements with

agencies as follows:

- Wet Soil/Manure agreement with MD BIOCOALS PVT.LTD
- RDF Agreement with M/s Earth Enviro Wastocare.
- Inert is storing at site currently however as soon as the

Environmental clearance is issued the same will be disposed off.

h. It is respectfully submitted that the answering respondent has an existing arrangement with Ambuja Cement for the disposal of RDF and is in the process of formalizing a comprehensive agreement for the same. A copy of the delivery challans, evidencing the dispatch of RDF material to the Ambuja Cement Ltd. plant for disposal, is annexed herewith as **Annexure-R6/13**.

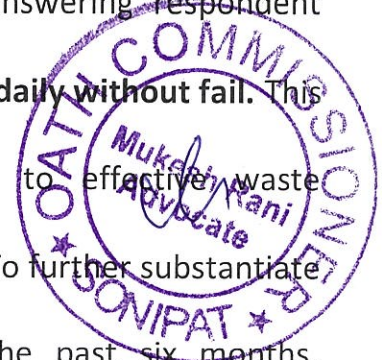

i. It is respectfully submitted that **any complaints received from residents of the city, whether through the toll-free number or by physical submission, are addressed promptly and resolved with 100% efficiency.** A proper record of all complaints is meticulously maintained and verified by the sanitation officials to ensure

transparency and accountability. Furthermore, a detailed record of the past six months, demonstrating our consistent efforts in complaint resolution, is annexed herewith as **Annexure-R6/14**. This clearly establishes that the allegations raised in the complainant's application are **completely baseless and devoid of factual merit**.

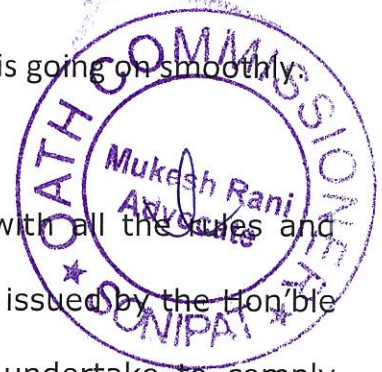

- j. It is respectfully submitted that, with regard to the alleged gap in facilities and details of final disposal, the answering respondent ensures that **100% of fresh waste is processed daily without fail**. This demonstrates our unwavering commitment to effective waste management and environmental compliance. To further substantiate our diligent efforts, a detailed record of the past six months, showcasing consistent and efficient waste processing, is annexed herewith as **Annexure-R6/15**.

- k. It is stated that if the data of door to door complaints are looked into they are continuously decreasing month by month and in the November 2024 month there are only 10 complaints for a city of population of approximately 2.10 lac. which clearly speaks in favor of

the answering respondent and shows that the agency is doing their work in efficient mode and door to door work is going on smoothly.

- 4. That the answering respondent is complying with all the rules and regulations imposed including SWM Rules 2016 issued by the Hon'ble Tribunal, However the answering respondent undertake to comply with the directions given to the respondent no.6 by The Hon'ble Tribunal.

The heights of windrows as given below –

1. Zone -1: The heights of windrows vary from 0.50 m to 3m. Average height is 2.5m.
2. Zone -2: The heights of windrows vary from 3 m to 8m. Average height is 7.4 m.
3. Zone -3: The heights of windrows vary from 8 m to 13m. Average height is 11.5m.

Underground depth varies from 0 to 6m. Average depth is 3.5m.

Table 2: - Assessment of Legacy waste at Bakariyawala, Municipal Council, Sirsa

S.No.	Area (Sqm)	Height (m)	Volume (m <sup>3</sup> )	Density (ton/m <sup>3</sup> )	Amount of waste (metric ton)
Below Ground	21,196.66	3.5	89,025.98	0.995	73817.37
Above Ground					
Zone - 1	5,047.0	2.5	12,617.50	0.495	6,245.66
Zone - 2	16,150.0	7.4	1,19,510.00	0.750	89,632.50
Zone - 3	4,037.5	11.5	46,430.78	0.925	42,948.47
Total	25,234.45				2,12,644.01

The total amount of legacy waste at Bakariyawala, Sirsa, was 2,12,644.01 metric ton (approx).

## 2. Density of legacy work.

The density of legacy work was carried out at various area locations. A density test was carried out at the waste windrows' Top, Middle, and Bottom. The following procedure was adopted for density measurement as MSWM Manual (2016).

The density of the waste – Composite waste was collected from various parts of the heaps in a small box and weighted with a weighing machine. After weighing, the smaller box's content was emptied into a bigger 1m<sup>3</sup> box. The process was repeated until the larger box was filled up to the top. Once the larger box was filled, the weight of the waste was noted. The waste was not compacted by pressure. Repeated the entire procedure five times; the average value of weights is the waste's density (weight per cubic meter).

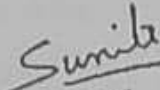

The density of windrows as given below –

1. Zone -1: The heights of windrows vary from 0.380 ton/m<sup>3</sup> to 0.550 ton/m<sup>3</sup>. The average height was taken as 0.495 ton/ m<sup>3</sup>.
2. Zone -2: The heights of windrows vary from 0.650 ton/m<sup>3</sup> to 0.890 ton/m<sup>3</sup>. The average height was taken as 0.750 ton/ m<sup>3</sup>.
3. Zone -3: The heights of windrows vary from 0.900 ton/m<sup>3</sup> to 1.120 ton/m<sup>3</sup>. The average height was taken as 0.925 ton/ m<sup>3</sup>.

Underground -The heights of windrows vary from 0.970 ton/m<sup>3</sup> to 1.410 ton/m<sup>3</sup>. The average height was taken as 0.995 ton/ m<sup>3</sup>.

## 3. Disposal of fractions coming out after processing of waste.

The waste was not processed.
