**BEFORE THE HONBLE NATIONAL GREEN TRIBUNAL  
PRINCIPAL BENCH, NEW DELHI  
ORIGINAL APPLICATION NO: 1034 OF 2024**

**IN THE MATTER OF**

K SANJEEV DOGRA

..... APPLICANT

-VERSUS-

STATE OF HIMACHAL PRADESH AND ORS.

.....RESPONDENT

**REPLY IN COMPLIANCE OF ORDER DATED 20.03.2025 ON BEHALF  
OF RESPONDENT NO. 25 IN THE MATTER OF K. SANJEEV DOGRA  
V. STATE OF HIMACHAL PRADESH AND ORS. (O.A NO. 1034/2024)**

1. The present Affidavit is being filed in terms of the order dated 20.03.2025 passed by this Hon'ble Tribunal in captioned O.A No. 1034 of 2024, wherein the Hon'ble Tribunal held: *“In view of averments made in the original application and the observations made in the reports of the Joint Committee, following 11 mining lease holders and 14 stone crushers are impleaded as respondents no. 5 to 29”*
2. That the Respondent is a licensed Mining leaseholder, who is undertaking mining operations in adherence with all the applicable rules and regulations made by regulating authorities.
3. That the Respondent is not undertaking conventional riverbed sand mining wherein natural sand is extracted directly from the banks of the river. They are instead, extracting stone and bajra from the river bed and producing M-SAND (Manufactured Sand) which is a by-product of crushed stone.
4. That the Joint Committee in its Final report dated 18.03.2025, made observations in response to the illegal and unscientific mining alleged by the

Applicants. Majority of the Illegal mining cases detected by mode of illegal extraction/storage and transportation have nothing to do with the Respondent.

5. That the Joint Committee raised the following issues pertaining to the activities of the Respondent:

- A. Non-demarcation of 6 Mining leases.**
- B. Discharge of waste water containing silt.**
- C. Installation of Dry extraction cum bag filter followed by cyclone in stone crushing units.**
- D. Absence of retaining Structures.**

6. **Para wise reply to each of the issues pointed out by the Joint Committee in respect of the activities of the Respondent are as follows:**

**A. Non-demarcation of 6 Mining leases.**

That the subject of Demarcation of mining leases comes under the purview of mining department. The Mining leases in question are river bed mining leases and therefore demarcation of river bed mining lease is an annual exercise conducted by the Mining Department. The annual demarcation reports of previous years are annexed in the individual replies of the Respondents.

**B. Discharge of waste water containing silt**

That the Respondent has installed a desilt water treatment plant for waste water discharge and the same has been verified by the Joint Committee in its Final report on page no.10.

**2.3.2.** “8. *It was observed during 1<sup>st</sup> inspection that stone crusher were discharging waste water containing silt directly and/or indirectly into the river. However, it was observed during 2<sup>nd</sup> and 3<sup>rd</sup> site inspection that out of 14 stone crushers, 13 stone crushers have made arrangements to desilt the waste water and also for storage for recycling by constructing earthen*

*ponds. Whereas, one crusher namely M/s Bhandral Stone Crusher is using channels for settling the silt followed by pond to store and recycle the clear water. ”*

**C. Installation of Dry extraction cum bag filter followed by cyclone in stone crushing units.**

The dry extraction cum bag filter and cyclones are installed in dry-stone crushers to control/reduce dust emissions generated from dry-stone crusher. It is pertinent to mention, that the Respondent is undertaking stone crushing by way of wet stone crusher plants and not dry-stone crusher plants. Wet stone crusher plants produce stone aggregate and coarse sand through a water-based system that does not lead to emission of dust and air pollutants. The installation of dry extraction cum bag filter followed by cyclone in a wet stone crusher plant is unnecessary and redundant. The Respondent has also provided water sprinkling systems on the periphery of the stone crusher units to curb dust emissions. The same is an inevitable and integral part of the wet stone crusher plant.

**D. Absence of retaining Structures.**

That the Respondent is undertaking mining of stones accumulated on the river bed. Such operations do not involve any activity that may result in unintended ejection of rock fragments/ rock projectiles, potentially causing damage to property or injury to people and therefore do not require retaining structures. That the requirement/ need of construction of retaining structures is specific to the location of the mining lease. The construction of retaining structures where it is not imperative, may disturb the river ecology. It is need based and thus the same has not been constructed when there is no specific direction.

**REPLY ON BEHALF OF RESPONDENT NO. 25**

1. That the **Respondent No 25: M/s Gold Mine Stone Crusher Village & P.O. Lodhwan Tehsil Indora Distt Kangra H.P** is operating a Wet Stone Crusher that produces Stone Aggregate and Coarse Sand using building stones/ Bajra from the licensed mining leases.
  
2. That the **Respondent No. 10, Sudhir Singh/ Gold Mine Crusher Mining lease Area** was granted mining lease for an area of **Hectares** situated at **Khasra no 346/1 Village/Mohal/Mauza Tipri/Lodhwan, Tehsil Nurpur, District Kangra H.P.** for excavation of building stone by way of the duly registered lease **dated 5.04.2022** executed by the government of the state of Himachal Pradesh **valid up to 4.04.2027**. The lease deed of the Respondent No.10 is hereby annexed as **ANNEXURE R-10/1**.
  
3. The said lease dated **5.04.2022** was executed in favour of the Respondent after due approval of the mining plan approved by the Govt. of Himachal Pradesh .  
The **mining plan** of the Respondent No.10 is hereby annexed as **ANNEXURE R-10/2**.
  
4. The Respondent obtained **Environment Clearance** from the State level impact assessment authority (SEIAA) issued on **15.01.25** under EC File No/ Identification No: **HPSEIAA/2013/212/M/s Goldmine Stone Crusher-3595**.  
The EC of the Respondent No. 10 is hereby annexed as **ANNEXURE R-10/3**.

5. That the Respondent obtained the Consent to Operate (C.T.O) dated **2.10.24** from the Himachal Pradesh Pollution Control Board which was valid till **18.10.24**.

The CTO and fresh application of the Respondent No.25 is hereby annexed as **ANNEXURE R-25/1**.

6. That the aforementioned facts with respect to the permissions obtained by the Respondent also stand duly confirmed by the report of the Joint Committee constituted by this Hon'ble Tribunal in the present O.A vide order dated 07.11.2024.

7. That the Respondent is carrying out operations of mining /excavation at the allotted mining lease site as per the terms and conditions listed in the required permissions and clearances.

The annual demarcation reports of the Respondent No.10 is hereby annexed as **ANNEXURE R-10/4**.

8. That the Respondent does not indulge in any illegal, unscientific mining/Crushing or transportation of illegally excavated mining material. The Respondent is undertaking mining/stone crushing operations in compliance with requisite standards provided by the regulating authorities.

9. That the Respondent is carrying out operations of Stone crushing using excavated stones from the allotted mining lease site as per the terms and conditions listed in the required permissions and clearances.

10. That the Respondent has installed a desilt treatment plant for waste water discharge and the same has been verified by the Joint Committee in its Final report on page 10.
11. That the Respondent is not undertaking any action resulting in diversion of river flow or causing any harm to the environment.
12. That the Respondent is undertaking stone crushing by way of wet stone crusher plants and not dry-stone crusher plants. Wet stone crusher plants produce stone aggregate and coarse sand through a water-based system that does not involve emission of dust and air pollutants. The unnecessary installation of dry extraction cum bag filter followed by cyclone in a wet stone crusher plant will choke the filter and result in improper functioning.
13. That the Respondent has provided water sprinkling systems on the periphery of the stone crusher units and is using a wet process for the production of Stone Aggregate and Coarse Sand due to which no dust emission is caused.
14. That it is humbly submitted on the issue of construction of retaining structures that the Mining plan of the Respondent No. 9, specifically mentions on Page 58 of Annexure R10/2 that the same is not required to be constructed, thus the same has not been done.

**‘1.4. Check dams**

*There is no mining lease area where bank protection measure can be undertaken. However, with the consent of landowners some check dam, as*

*proposed at vulnerable locations shown in the working map shall be undertaken."*
