

REPORT OF JOINT COMMITTEE

Hon'ble NGT passed the following directions in order dated 19.10.2023 in OA NO. 50 of 2023, Jitender Singh Vs Union of India & Ors.

“ 1. The issue involved in this original application is in respect of violation of environmental norms by 138 brick kilns impleaded as Respondent Nos. 5 to 142 in this OA and operating in Hisar District of Haryana.

2. On the direction of the Tribunal contained in the proceedings dated 03.02.2023, the reports were submitted and, thereafter, on 19.07.2023, the State PCB and Members of the joint Committee had sought short adjournment to file the comprehensive report in compliance of the earlier order.

3. A request letter for extension of time to complete the action taken report in compliance of the order of the Tribunal dated 03.02.2023 has been circulated by the Regional Office, Hisar Region, Haryana State Pollution Control Board (HSPCB)

4. Learned Counsel appearing for the HSPCB has submitted that the comprehensive report in terms of the earlier order will be positively filed within eight weeks by e-mail at [judicial-ngt@gov.in](mailto:judicial-ngt@gov.in) preferably in the form of searchable PDF/OCR Support PDF and not in the form of Image PDF.

.....

.....

7. List on 11.01.2024”

1. In the district of Hisar, 195 brick kilns are established with zig-zag technology and have been granted consents by HSPCB.

AS  
02/01/2024

2. In compliance with the order, dated 03.02.2023, during operational phase of Brick Kilns in question, 19 brick kilns were inspected randomly by the Committee to verify the compliance with regard to zig-zag technology, standards & norms, monitoring provisions, pollution control measures and type of fuel used in bricks manufacturing. Out of 19 units, 17 were found complying with regards to the points aforesaid mentioned and only two units were not complying where HSPCB issued the notices. Status of inspected 19 brick kilns with respect to Consent to operate status, siting criteria, compliance with directions on zig-zag technology, compliance with the standards including provisions for monitoring and type of fuel used etc. & action taken against non-complying units are tabulated & annexed as **Annexure R-1**.
3. It is further submitted that during operational phase of Brick Kilns, the source emission monitoring of 51 brick kilns was also carried out by laboratory recognized under the Environment Protection Act, 1986. The analysis results of Air emission were found to be within the prescribed limits. The Analysis results Air emission monitoring are tabulated and annexed as **Annexure R -2**.
4. After June 2023, brick kilns have not come into operational phase with fire. However, details of all brick kilns with respect to Consent to operate status, siting criteria, compliance with directions on zig-zag technology, compliance with the standards including provisions for monitoring and type of fuel used etc. is tabulated & annexed as **Annexure R-3**.
5. The Committee is to verify the operational and the compliance status of environmental parameters of the remaining 176 brick kilns (after being operational) besides other air polluting units operating in the region.

The following 5 units are among the large scale (1. Jindal Stainless Limited, (Cold Rolling Division), O P Jindal Marg, Hisar 2.

*Handwritten signature*  
08/10/2024

Laxmi Pipes Limited, Bhiwani Road, Hansi, Hisar 3. Jindal Stainless Limited (Hot Rolling Division), O P Jindal Marg, Hisar, 4. Rajiv Gandhi Thermal Power Plant, Village Khedar, Barwala, Hisar, 5. Broga Bath Fitting Private Limited, Plot. No. 98, Sector 27-28, Industrial Area, Hisar. There are 03 of medium scale units and 65 units are of small scale.

6. In compliance with the order, dated 03.02.2023 the carrying capacity of the region is to be assessed by the Committee, which requires extensive monitoring of both ambient air quality and source emission from above listed industries including brick kilns.

The reference is invited on the study conducted earlier jointly by CPCB and SPCB, and the same was considered by the Hon'ble Tribunal in its order dated 10.03.2022 in the matter of OA 1088 of 2018 titled as Dinesh Chahal & Ors. Vs Union of India & Ors., where ambient air mixing height for the month of November (0.323 km), December (0.292 km), January (0.269 km) and February (0.297 km) mentioned and found minimum in a calendar year. Thus, to estimate the carrying capacity of the district of Hisar, measuring an area of about 3,983 square kilometers (say 4,000 sq.km.), the Committee has proposed to undertake the monitoring of ambient air during the above critical months when minimum dispersion of the air pollutants is expected and at the same time maximum number of brick kilns are in functional with the firing in progress.

7. The Committee has identified five clusters of industries and the brick kilns, where intensive ambient air quality monitoring is to be undertaken by a laboratory duly recognized under Environment Protection Act, 1986. The source emission monitoring of the remaining 144 brick kilns and other major air polluting industries (mentioned in Para 3 above) is to be conducted by the laboratory under the supervision of HSPCB.

  
02/01/2024

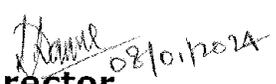

8. Since, brick kilns' operation and their firing are weather dependent which went unusually non-suitable during the current season and therefore the most kilns are yet to start their operation. Given the other major air polluting industries operating in the region, the Committee considered it appropriate to let maximum brick kilns (out of 195) start functioning for fetching critical monitoring data to be used in arriving the carrying capacity of the region, which is greatly influenced by brick kilns operation during winter and for those months considered above.
  
9. It is humbly prayed to allow more time for filing the Committee report up to 31.03.2024.

Place: Hisar
