

**Compliance report w.r.t. order dated 21.09.2020 passed in O.A. No. 593/2017
with 673/2018 with 148/2016**

The current status related to points relevant to U.T. Chandigarh is as follows:

- Total volume of wastewater generated in the city is 54 MGD whereas treatment capacity of the operational STPs is 55.1 MGD. **This indicates more than 100 % treatment capacity.**
- In order to comply with the standard norms, work of upgradation /rehabilitation of existing 5 STPs has been started by Chandigarh Smart City Limited. The status of the same has been already submitted **in O.A. No. 138/139 of 2016.**
- Industries are being monitored as per available infrastructure and no unit is allowed to operate without proper Effluent Treatment Plant. In case of any violation, unit is sealed with disconnection of electricity and water supply. Reports are being regularly provided to CPCB as per the order.
- Rejuvenation of polluted river stretches is not applicable in case of Chandigarh as no river is passing through the city.
