Joint Committee Report in compliance of NGT order dt. 22.12.2021 in O.A. No.

23/2017(EZ) with O.A. No 776/2018 with O.A. No. 373/2019

in the matter of

**Syed Arshad Nasar Vs Union of India with Ramchandra Chaurasia Vs State of
Jharkhand with Pradeep Kumar Singh Vs State of Jharkhand**

1.0 Background

- 1.1 With reference to the matter of Syed Arshad Nasar (Applicant) Vs Union of India (Respondent) (O.A. No. 23/2017 EZ), Ramchandra Chaurasia (Applicant) Vs State of Jharkhand (Respondent) (O.A. No. 776/2018) and Pradeep Kumar Singh (Applicant) Vs State of Jharkhand (Respondent) (O.A. No. 373/2019), Hon'ble NGT passed several orders relating to enforcement of environmental norms w.r.t in the operation of quarrying and crushing units in Rajmahal hills of the Vindhya Mountains, District Sahebganj, Jharkhand.
- 1.2 Hon'ble NGT vide its order dated 22.12.2021 directed as under(*Annexure-I*):

“We also direct the State PCB to close the illegally operating stone crushers/mines - those not having valid consents, those not following valid siting criteria and those not maintaining laid down safeguards noted in paragraphs 5.3.1 and 5.3.3 in the above report. This may be ensured by a joint Committee of CPCB, State PCB and the District Magistrate and compliance report filed before the next date.”
- 1.3 In compliance to the above direction, a Joint Committee was constituted vide CPCB letter even number dated 04.02.2022, with approval from the competent authority (*Annexure II*). The members of the Joint Committee are as follows:
 - a. District Magistrate, Sahebganj
 - b. Dr. G.P Singh, Sc. D, CPCB, RD Kolkata
 - c. Member Secretary, Jharkhand State Pollution Control Board (JSPCB) or his representative. (K.K. Pathak, Regional Officer, Jharkhand State Pollution Control Board (JSPCB), Regional Office –Cum-Laboratory, Dumka, authorized vide Board's letter No. B-79, dated 07.01.2022 representative of Member Secretary, Jharkhand State Pollution Control Board (JSPCB)
- 1.4 The roles and responsibility fixed for the committee to comply the Hon'ble NGT order are as follow:
 - a. The Committee shall ensure compliance to the aforesaid directions of Hon'ble NGT.
 - b. The committee shall ensure and verify that the closure directions issued by JSPCB are enforced.
 - c. The committee may adopt suitable mechanism including conducting surveys, to identify the illegally operating crushers/mines not having valid consents,

without following valid siting criteria, and without implementing environmental safeguards.

- d. The committee may also verify the crushers/mines operating with valid consent.

2.0 Field Visit

2.0.1 In compliance to Hon'ble NGT Order dated 22.12.2021 & CPCB Order dated 04.02.2022 a field inspection at Sahebganj was carried out during 14th – 15th March 2022, with the following members:

- a. Dr. G.P. Singh, Sc D, CPCB, RD Kolkata
- b. Sh. K. K. Pathak, Regional Officer, JSPCB, Dumka

2.1. Field Monitoring

2.1.1 Ambient Air Quality Monitoring was carried out by the team covering all the significant points for PM_{2.5}& PM₁₀.

2.1.2 The strategic locations for measurement of the PM_{2.5}& PM₁₀ are tabulated below (Table 1)

Table 1. Ambient Air Quality Monitoring Location carried out during the field visit

Sl No	Strategic Location	No of Sampling location
1	Industry/ Clusters	2
2	Railway Sidings& Residential	2
3	Village	1
4	Township	2

2.1.3 The analysis of the particulate matter is as follows in (Table 2), the analysis results are enclosed as **Annexure III**.

Field monitoring was carried out at following 7 locations covering all the points as directed.

Table 2 Analysis Result of the ambient air quality carried out (for 8 hours based on prevailing situation and feasibility) during the field visit

Sl no.	Location	Lat & long	Monitoring results for Parameters (Stipulated norm in bracket)		Remarks
			PM10 (100 mg/Nm ³)	PM 2.5 (60 mg/Nm ³)	
1	Jokmari, Mahadeoganj	N - 25.237361 E-87.574636	135.70	91.75	Not meeting
2	Mahadeobaran, Mirzachowki	N- 25°14'56.40288'' E-87°29'36.7242''	217	55	PM 10 Not meeting

3	Sahibganj Railway Siding	N- 25°14'24.58392'' E- 87°38'29.485232''	137.75	95.80	Not meeting
4	Mirzachowki Village	N- 25°15'39.74436'' E-87°29'37.77036''	120.90	70.25	Not meeting
5	Talbanna, Sahibganj	N- 25°14'42.21132'' E-87°37'37.48512''	1133	50	PM 10 Not meeting
6	Ratanpur, Barharwa Town	N- 24°51'24.76152'' E-87°46'13.05912''	112.80	65.75	Not meeting
7	Hathigarha, Sakrigali	N- 25°14'26.5308'' E-87°42'16.97328''	148.75	99.80	Not meeting

Remarks: Ambient air qualities are not meeting the stipulated norms for all the locations for PM₁₀ and PM_{2.5} except Mahadeobaran, Mirzachowki & Talbanna where it is meeting for only PM_{2.5} as above.

2.2 Field inspection

- 2.2.1. When the site was visited many of the crushers were in operation. It was found that a huge quantity of dust is generated in the area.
- 2.2.2. Majority of the crushers were running without properly operating the existing emission control system as reported in the Monitoring status report submitted by the District Mining Task Force (DMTF) from 11.12.2020 to 16.02.2021.
- 2.2.3. There is no display board/name plate specifying a particular stone crusher (running without proper ECS) so it could not be specified which specific crushers it were. When the team tried to get the basic information about the crushers (i.e. Name of the crushers, capacity of the crushers, Status of validity of CTE/CTO, Name of the proprietor, since how long it has been in operation). Nobody was there to reply even the operator of the Crushers, JCB operator and other labour involved in stone breaking using hammers did not reply. In reply they stopped the operation of the running crushers and ran away.
- 2.2.4. Most of the crushers are running without proper display board in the area (i.e. Name of the crushers, capacity of the crushers, Status of validity of CTE/CTO, Name of the proprietor, since how long it has been in operation).
- 2.2.5. Many of the stone crusher operators do not show the legal document at the time of site inspection.
- 2.2.6. Jharkhand State pollution control board has issued valid CTO for only 192 no of stone crushers (list enclosed as **Annexure IV**), 118 no of stone mines (List enclosed as **Annexure V**), 20 no. of Stone Crusher with mines (list enclosed as **Annexure VI**). However following are observed:
 - a. A list provided from the District Mining Office enlists that there are 161 crushers which have been demolished since 2017 but many of the stone crushers

mentioned in the list are repeated twice or thrice(**Annexure-VII**).As reported such stone crushers were demolished by the District Administration by demolishing the conveyor system and the hopper but such units start their operation after some days.

- b. From close verification of the list of 161 stone crushers(**Annexure VII**) status of many of the stone crushers are as follow:

Particulars	Status of running and non-running crushers as observed by the team				
	Status of running Stone crushers			Not Running crushers	
	Running with Valid CTO	Running without valid CTO	Running /existing crusher without name	Still Existing but not running	Existing but sealed
	30, (116, 64), 87, 90,148	0	0	26,31,39,40, (112,61)83, 103,105,110,112, 147,149,151,160	161 96
No of crushers	05	0	0	14	2

- c. Present Status of Stone Crusher/ Stone Mine for which request have been made for cancellation of CTO by District Level Task Force, (Mining) Sahibganjas reported in the meeting with CPCB team dated 3-4th March 2022(*List annexed as Annexure VIII*)
- d. Present Status of stone crushers which have been relocated from their existing location by District Level Task Force, (Mining) Sahibganj as reported in the meeting with CPCB team dated 3-4th March 2022(*List annexed as Annexure IX*)
- e. 33 crushers running without CTE have been dismantled. 24 crusher not having valid CTO have been sealed by District Taskforce committee (DTC) during April 22-June 22. Renewal of consents are being issued with conditions of compliance of conditions mentioned in point 5.3.1 & 5.3.3 of the order dated 22.12.2021.

Overall finding:

- i. The certain dismantling of stone crushers by simply dismantling the conveyor belt has not all resulted into any effective action to prevent illegal stone crushing in the area. As the operators/owners of the units have stated operating the same unit by repairing the dismantled part of the crushers operational.
- ii. When the units are running as benami units it is very difficult to fix the responsibility of the illegal operation of crushers to someone unless the specific persons are identified.

- iii. Ambient air qualities are not meeting the stipulated norms at any of the monitored locations for PM₁₀ and PM_{2.5} except Mahadeobaran, Mirzachowki & Talbanna where it is meeting for only PM_{2.5}.

3.0 Recommendations:

Based on the above field observations and finding it is proposed as follows:

- 3.1 All stone crushers / stone mines must be provided with display board of adequate size (preferably not less than 1 m × 1 m), mentioning the following details:
 - a) Name of the crusher / Mines with Capacity
 - b) Address and exact location of area with latitude and longitude of all corner points.
 - c) Name of the proprietor with contact no.
 - d) Status of regulatory compliance status with Validity (CTE, CTO, HWA)
 - e) Status of Electricity Power Supply.
- 3.2 All the crushers in the area running without valid CTE/ CTO to be treated as illegal and be demolished. Taking lesson from earlier demolition by dismantling the conveyer system & disconnection of power supply that such crusher start operating after sometime as reported, it is proposed that whenever any crusher is demolished for running without CTE, the whole foundation to be demolished & all the major machineries of the crushers (i.e. primary crusher, secondary crusher, screen, hopper, loader, DG set, etc) should be seized.
- 3.3 The crusher having valid CTE, but running without valid CTO should be sealed with ensuring disconnection of power supply/seize of DG set.
- 3.4 All the units using DG sets as power source must have valid authorization as per rule (Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016).
- 3.5 Taking into account the scarcity of water in the area (where villagers use *Zaria Nallah* water for drinking, bathing and other domestic purpose) poor conditions effective emission control system, it is proposed that stone crushers with capacity greater than 100 TPH must be provided with bag filters as emission control system for primary crusher, secondary crusher & screen in a time bound manner (preferably in 6 month).
- 3.6 Proposed railway siding near the school should be developed keeping safe distance from the school to prevent the children from getting affected by silicosis/respiratory problem.
- 3.7 All stone crushers operating using DG set must get valid authorization from Jharkhand State Pollution Control Board as per Rule.
- 3.8 Overloading in loaded vehicle carrying stone/fines should be avoided to prevent spillage on the road. The crushing of these spillage under the wheels results in high load of PM 10/PM 2.5. Minimum free board of minimum 6 inch should be left keeping in mind the undulating road

condition. The materials should be properly covered to prevent escape of fines under negative draft.

- 3.9 Haul roads should be properly maintained. Sprinklers should be installed to suppress the dust.
- 3.10 Plantation should be done in both side of the road. Green belt should also be implemented in each cluster as well.

HON'BLE MR. JUSTICE SUDHIR AGARWAL, JUDICIAL MEMBER
HON'BLE DR. NAGIN NANDA, EXPERT MEMBER**

Applicant: None

Respondent(s): Mr. Mukesh Kumar, Advocate for CPCB

ORDER

1. These three matters relate to enforcement of environmental norms in the operation of quarrying and crushing units in Rajmahal hills of the Vindhya Mountains, District Sahebganj, Jharkhand. In earlier orders, the Tribunal noted that the area is rich in mineral resources. The mining companies or other entities are indulging in indiscriminate mining and operating stone crushers without due regard to the environmental norms. In this process, the hills are blown up. To remedy the problem, the Tribunal passed several orders in the last three years, including prohibiting illegal mining and non-compliant stone crushing activities vide order dated 06.07.2017, followed by order dated 17.04.2018.

2. Finally, a Committee was constituted comprising (a) Senior Scientist/ Engineer from CPCB; (b) Regional Office, EZ, MoEF&CC, Bhubneswar and, (c) Experts from SEIAA and Jharkhand State PCB to undertake study and give a report as follows: -

- “i) Undertake Carrying Capacity Assessment of the area viz-a-viz stone mines and stone crushing units.*
- ii) Undertake Ambient Air Quality Assessment in atleast 10 representative locations of the area.*
- iii) Assess (a) the pollution control devices of the stone mining and stone crushing units in the area and the environmental damage caused and (b) the cost of restoration of such damage.*
- iv) Any other relevant studies cognate to the above.*

In undertaking the task, the Committee may co-opt expert/experts from any institution identified by it.”

3. The Tribunal noted vide order dated 07.05.2019 that the State PCB had failed to take adequate remedial action against illegal mining and crusher units and also failed to realize Environmental Compensation on ‘Polluter Pays’ principle. The Committee constituted by the Tribunal filed its report in O.A. 23/2017 (EZ) finding wide scale flouting of norms and

also recommended that only compliant mining should be allowed purported the Bio-diversity of the area. On 11.09.2019, the Member Secretary, State PCB appeared in person and made a statement that there are 407 stone crushers and 300 stone mines. The specific detail of non-conforming stone crushers and mines were directed to be complied. Further, as per information given by the Member Secretary, 508 units had applied for Consent to Operate out of which 445 had been granted and the case of 24 had been rejected, while in the case of 39, applications for grant of Consent to Operate were under consideration. 293 stone crusher units and stone mining units had been found to be non-compliant during the inspections between 11.11.2019 to 17.11.2019 and, therefore, show cause notices had been issued. 106 units had been imposed with interim environmental compensations. Total environmental compensation of ₹6,33,57,000/- had been imposed by the State PCB cumulatively on the stone mines and stone crusher units out of which ₹2,36,25,000/- was upon 55 stone mines and ₹3,97,32,000/- against 141 stone crushing units. The District Task Force had demolished 34 illegal crusher units and sealed and demolished another 107 where illegal storage, processing and dispatch of minerals were being indulged in. 70 such illegal processing units (stone crushers) had been sealed and demolished. Apart from lodging FIRs, further 47 numbers of illegal stone crushers were also sealed and demolished as observed during the inspection undertaken on January, 2019.

4. Vide order dated 05.12.2019, the Tribunal observed:-

“18. Upon consideration of the entire facts and circumstances borne out of the record of O.A. No. 23/2017/EZ and O.A. No. 776/2018, it is more than evident that the State machinery and the regulatory authorities had allowed a free run to the operation of mines and crusher units resulting in the present sordid condition. Even after the present cases were filed, they had been reluctant in dealing with the matters as directed by the Tribunal.

*They had to be perforce made to discharge their responsibilities and perform the duties. The actions taken by them are as a result of repeated orders passed by the Tribunal from time to time. **The reports filed by the regulatory authorities are found to be far from satisfactory, mutually conflicting, bereft of clarity and inconsistent. The Member Secretary, State PCB who had appeared before the Tribunal was unable to answer questions put by the Tribunal and chose to be adamant in not furnishing the requisite information with clarity. As would be quite apparent from what had been noted earlier, the State PCB and the District authorities including the District Mining Officer did not appear to be clear as to how many stone mines and stone crusher units are in operation. The Member Secretary was also unable to answer on the distance maintained between the stone crusher units as well as the individual leases granted for stone mines. Taking the figure provided by the Member Secretary on 11.09.2019, there are more than 407 stone crushers and 300 stone mines operating in the area notwithstanding the fact that actual figures have not been provided as admittedly detailed inventORIZATION of all such units have not been undertaken thus far.***

19. *The photographs placed before us by the Applicant demonstrate an alarming situation where hills had been found to have been flattened due to mining out of the stones. The terms of reference which had been referred to the Committee vide order dated 19.01.2019 have also not been considered by the Committee so far except to give general recommendations in the report filed through the CPCB on 30.04.2019.*

20. *As regards undertaking carrying capacity assessment, ambient air quality assessment and effectiveness of pollution control devices, it has been stated in a note of the Committee as follows:*

“Regarding Carrying Capacity Assessment, Ambient Air Quality Assessment and effectiveness of Pollution Control Devices is a study of one year to arrive at a certain conclusion. This in-depth study requires ‘Secondary Data Base’ of at least last five years and one ‘Primary Data Base’ to arrive at a meaningful conclusion through ‘Time Series’ analysis. Already in the World Bank project-National Ganga River Basin Authority (NGRBA) a project on industrial monitoring and assessment is given to Jadavpur University. Considering the gravity, similar study may be awarded to Department of Environmental Engineering, Jadavpur University or any other reputed Institute.”

We find the observation of the Committee to be unreasonable and an attempt to delay the entire process.

21. *The Member Secretary instead of answering the questions upfront chose to hedge around to deflect the questions posed to him. Considering the obvious ineptitude of the Member Secretary, option before this Tribunal is either to take coercive measures for failure and negligence of the Member*

Secretary or to require the Chief Secretary to look into the matter and take decision whether such important office as Member Secretary, State PCB should be headed by any other suitable, technically sound person with the ability of effective environmental governance. Such decision may be taken at the earliest so that public service functions assigned to such high office are discharged in a responsible manner.”

5. Finally, the Tribunal directed as follows:-

“26. We direct the Committee constituted vide order dated 22.01.2019 to place before us a table giving the details of the stone mines and the stone crushers separately containing the following particulars:

- a) Name of the mines and crusher units and its locational depiction on the map of appropriate scale.*
- b) Dates of grant of Consent to Establish, Consent to Operate and, also Environmental Clearance (EC) in respect of stone mines. The area of stone mines and distance with adjoining mine(s) may clearly be stated.*
- c) Adequacy of pollution control devices of stone crushing units.*
- d) Details of individual violations of conditions of EC/Consent to Operate w.r.t. mining units and details of violation of Consent to Operate w.r.t. Stone Crushing units.*
- e) Action taken against those which do not have EC and Consent to Operate and against those which have violated the conditions of EC/Consent to Operate w.r.t. mining units.*
- f) The amount of environmental compensation assessed and recovered along with the individual computation sheets indicating period of default.”*

6. The matter was then considered on 23.09.2020 in light of report of the joint Committee filed on 21.09.2020 and also report of the Member Secretary. The Tribunal, on consideration, found that situation was deteriorating on account of failure of the statutory regulator in taking adequate action. Possibility of concerned officers colluding with the law violators was not ruled out. Compensation assessed was inadequate and was not being recovered. Further, there was a need for a scientific action plan being prepared after relevant study by an Expert Committee which

was accordingly constituted. The extracts from the said order are as follows:-

“7. xxxxxx.....xxx

8. *Apart from the above report, the State PCB has filed an undated report under the heading ‘Additional information for the Hon’ble Tribunal w.r.t. the measures taken by the Jharkhand State Pollution Control Board for curbing the air pollution caused by the stone mines/crushers in Sahebganj district’ which states that Source Apportionment Study, Carrying Capacity Assessment and preparation of Clean Air Action Plan for Sahebganj district has been awarded to Centre for Environment and Energy Development (CEED), New Delhi. The preliminary Clean Air Action Plan for Sahebganj district has been submitted by them and the final report is expected by January 2021. It is further stated that total Environmental Compensation of INR 6,33,57,000/- had been imposed by JSPCB cumulatively on the stone mines and stone crusher units out of which INR 2,36,25,000/- was upon 55 stone mines and INR 3,97,32,000/- against 141 stone crushing units. An Environmental Compensation amounting to INR 1,66,71,000/- has been collected by JSPCB cumulatively from the stone mines and stone crusher units. Due to Covid-19 pandemic the Occupiers have requested for some extra time to deposit the Environmental Compensation. Accordingly, time has been granted till December, 2020 with a clause that interest as per the guidelines of CPCB will be charged on the Units till the deposition of the Compensation to the Board.*

9. *From the above, it is patent that **the violation of environmental norms is rampant and in spite of orders passed by the Tribunal in the last three years, the situation has only deteriorated on account of failure of the statutory regulator in taking adequate action. The State PCB appears either to be in collusion or incompetent in performing its duties of taking stringent action against rampant violation of law. The damage to the environment and public health cannot be brushed aside and effective measures are required to be taken for realizing the guaranteed Fundamental Right to clean environment which is part of Right to life.** The Tribunal has to enforce the principle of “Sustainable Development”, the “Precautionary Principle” and the “Polluter Pays” principle under Section 20 read with Section 15 of the National Green Tribunal Act, 2010. The environmental compensation assessed is highly inadequate, in spite of the parameters being clearly laid down, the State PCB has chosen to assess compensation equal to violation on or before 30 days though violation is more than three years in flagrant violation of the mandate of ‘Polluter Pays’ principle, to the benefit of the law violators. Thus, there is patent incompetence and /or collusion which needs to be looked into at appropriate level. If situation is not remedied, the State itself may have to be held accountable for causing huge loss to the environment. The loss apparently is to the extent of hundreds of crores. The agency hired is not shown to be having requisite credentials. The exercise falls short of the requirements. Such exercise must be done with the involvement of CPCB*

10. *In view of above, to enforce the rule of law and for protection of environment and public health, we are of the view that a scientific action plan is required to be prepared after in-depth study of the problem with a clear road map. For this purpose, **we constitute a four-member Committee to be headed by an officer of the rank of Joint Secretary in the MoEF&CC, Government of India. The other three members will be the nominees of Indian Institute of Technology (IIT), Dhanbad, a Senior Officer of CPCB and Secretary Environment, Government of Jharkhand.** The State PCB and the District Magistrate, Sahebganj will provide all logistic support to the Committee to undertake their task. It will be open to the Committee to co-opt any other Expert or Institution and to conduct the proceedings in such manner as may be found viable. CPCB will be the nodal agency for compliance. First meeting of the Committee may be held within one month. Restoration plan and mode of execution may also be proposed. The report may be furnished within three months by e-mail at judicial-ngt@gov.in preferably in the form of searchable PDF/ OCR Support PDF and not in the form of Image PDF.*

11. *There is a need to examine as to how many stone crushers and mining units can be allowed and subject to what special conditions, having regard to the existing scenario already noted and to what extent the existing activities need to be regulated. It is made clear that in the light of joint Committee and observations of the Tribunal, with a view to protect environment, the State PCB must perform its duties of maintaining necessary vigil and close polluting activities not complying with the norms and permit them only when norms are achieved. The 'Polluter Pays' principle should be implemented effectively having regard to the cost of restoration, extent of damage and the deterrent element. The Chief Secretary may in light of the above observation to take steps to revamp the State PCB and file his own affidavit of compliance, failing which this Tribunal may have to take stringent action for enforcing the law."*

7. The matter was last considered on 12.03.2021 in the light of report of the State PCB dated 29.01.2021 and report of the CPCB dated 10.03.2021 seeking time to file a comprehensive joint Committee report. The Tribunal granted the time sought and also directed that the joint Committee may consider the pattern in report dated 06.07.2020 in O.A. No. 1016/2019, *Utkarsh Panwar vs. Central Pollution Control Board & Ors.*, about the carrying capacity of the NCR to sustain the number of brick kilns and siting criteria including *inter-se* distance. The operative part of the order is reproduced below:

"7. Accordingly, report dated 29.01.2021 has been filed by the State PCB inter-alia as follows:

- “3. In the meanwhile, after the last order of the Hon'ble Tribunal, 170 Units (Mines/Crusher) has been inspected by the Board. A Third and final show cause has been issued to the non-complying Units with a condition that if they don't comply with the conditions of the CTO/EC(as applicable) then a closure direction will be issued to them with immediate effect and Environmental Compensation will be levied.
4. To curb down the pollution and to ensure the compliances of the directions issued by Hon'ble NGT, a Monitoring Committee has been notified vide Notification no. 3001 dated 30.09.2020 by the Forest Environment & Climate Change Dept., Govt. of Jharkhand under the chairmanship of the Secretary, Urban Development & Housing Department. (The copy of Notification no. 3001 dated 30.09.2020 is enclosed as Annexure - 2).
5. A total of Seventeen stone crushing units has been issued a show cause notice in light of the report of the Deputy Commissioner, Sahebganj and if found non complaint then closure direction would be issued.
6. The District Mining Task Force, Sahebganj including Regional Officer, Dumka, JSPCB as a member, have conducted rigorous inspections against all the units involved in illegal mining, storage and transportation. However, RR against 125 defaulters have been lodged by the Task Force from Jan-19 till Dec-2020.
7. The Deputy Commissioner, Sahebganj has directed the Executive Engineer, Electric Supply Circle, Sahebganj not to provide electrical connectivity to the Stone Crushers which are not having valid CTO and Dealers Licence (Mining). Moreover he has also provided a list of Sixty Nine such Units which were illegal and has directed to disconnect their electric supply.”
8. A report has also been filed by the CPCB dated 10.03.2021 on behalf of the joint Committee mentioning the steps taken so far and seeking three months' time for filing comprehensive report. The concluding part of the report reads as follows:

“The final comprehensive joint committee report, which is to be submitted to Hon'ble NGT is proposed to consist of the restoration plan and minimum infrastructural requirements for control and abatement of pollution at sources along with compliance of regulatory provisions. A comprehensive clean air action plan, inventory of the activities along with compliance verification of individual units w.r.t. EC & CTO will also be submitted after compilation of all such information. It will also include action taken against the individual stone mines/crushers with invalid EC and CTO, amount of environmental compensation imposed, environmental management status and field visit report of the committee members.

The study carried out by CEED, Delhi as well as inspection of the stone mines and crushers by DMTF Sahebganj for

*verification of environmental management status got delayed due to the CoVID-19 situation. The outcomes of these reports are required to prepare the final comprehensive joint committee report. Therefore, **the committee requests Hon'ble NGT to grant three months time for submission of the comprehensive joint committee report** considering the quantum of field.”*

9. *While we propose to give time sought by the Committee, we find that the action taken by the State PCB continues to be inadequate. Preventive measures to control pollution are not being taken inspite of repeated show cause notices remaining uncomplied. We note that CPCB submitted report dated 06.07.2020 in O.A. No. 1016/2019, Utkarsh Panwar vs. Central Pollution Control Board & Ors., about the carrying capacity of the NCR to sustain the number of brick kilns and siting criteria including inter-se distance. **The joint Committee may take into account the pattern followed in the said report, while preparing the report in the present case. The joint Committee may also make recommendations on the subject of assessment of compensation taking into account the cost of restoration for the damage caused and its apportionment among the violators.***

10. *The report may be furnished on or before 30.06.2021 by e-mail at judicial-ngt@gov.in preferably in the form of searchable PDF/ OCR Support PDF and not in the form of Image PDF. A copy of the report be placed on the website of the CPCB simultaneously for response, if any, of the stake holders on or before 15.07.2021.”*

8. In pursuance of above, report dated 09.12.2021 has been filed by CPCB mentioning the steps taken for compiling information and annexing an interim report of the joint Committee. The report has been prepared jointly by:

- a) Joint Secretary, MoEF&CC, GoI. (Chairman of the Committee)
- b) Nominees of Indian Institute of Technology (IIT), Dhanbad
(Committee Member)
- c) Senior officer of CPCB (Nodal Agency & Committee Member)
- d) Secretary Environment, Government of Jharkhand (Committee Member)
- e) Principle Investigator (P.I.) of the study “Source Apportionment Study, Carrying Capacity Assessment and Clean Air Action

Plan” from Centre for Environment and Energy Development (CEED), Delhi and

- f) Sri. Sundeep, Scientist F, Ministry of Environment Forest & Climate Change

9. It is further stated that the study completed is not adequate and requires further study as data of critical months of December, January has not been taken into account.

10. We have carefully considered the interim report of the joint Committee. At the outset we express our disappointment with the report which lacks in legal as well as scientific basis, vitiating the conclusions. As found by the Tribunal in earlier orders, there is indiscriminate illegal mining and stone operations in the area, resulting in damage to Rajmahal Hills of the Vindhya Mountains, District Sahebganj, Jharkhand. The Tribunal has passed several orders including orders prohibiting illegal mining and non-compliant stone crushers. The Tribunal expected meaningful assistance to protect the environment against such widespread flouting of norms and continued deterioration of environment in the area. The Tribunal has noted the failure of the State PCB either due to collusion or incompetence resulting in failure to protect environment and public health by taking effective measures. Assessment of compensation was farcical. The Tribunal also observed the need to revamp the State PCB. This undesirable situation is to be remedied by application of ‘Precautionary’ and ‘Polluter Pays’ principles. Far from this, the interim report, if accepted, will lead to undesirable consequences. The report has thus to be rejected. Reasons follow.

11. As per assessment given in Table 7, air quality is continuously critical from the year 2000 to 2019. The Table is reproduced for ready reference:

“Table 7. Assessment of Exceedance Factor for the year 2000-2019

Year	EF	CATEGORY		Year	EF	CATEGORY
2000	1.6	Critical		2010	2.0	Critical
2001	1.9	Critical		2011	2.1	Critical
2002	1.8	Critical		2012	2.3	Critical
2003	1.9	Critical		2013	2.1	Critical
2004	1.9	Critical		2014	2.3	Critical
2005	1.9	Critical		2015	2.1	Critical
2006	2.0	Critical		2016	2.0	Critical
2007	1.9	Critical		2017	2.0	Critical
2008	1.9	Critical		2018	2.3	Critical
2009	2.1	Critical		2019	2.0	Critical

12. However, surprisingly, the Committee has relied upon data of 2020 during which period there was a lockdown and observed that the 24-hour concentrations of PM10 at all monitoring stations in year 2020 were recorded within the national standard (100 ug/m³). Based on the data monitored in these stations, it is concluded **“the annual average concentration of PM10 is noted as 42 mcg/m³, which is below the national standard of 60 mcg/m³”**. Such conclusion is clearly perverse. It is elementary that data for one year due to lock down, in conflict with data for long period, cannot be mechanically accepted unless there are reasons for improved air quality shown by such data. No reasonable person can make such data basis for further action.

13. Status of management of individual stone crushers has been noted to be inadequate on all aspects in table 8, which is reproduced below for ready reference:-

“5.3.1 Stone Crushers

- I. *The assessment of environmental management for the stone crusher units was done by CPCB, ERD Kolkata*

on the basis of inspection reports of all the individual units provided by JSPCB (Table 8) is tabulated as below:

Table 8. Environmental Status of the Stone Crushers in the Sahebganj District

Sl No	Process	Recommended Emission Control System	Existing Emission Control System Status		Adequacy *(w.r.t. recommended emission control system)
			Type	Implementation Status	
1	Hauling from Mines to Crushers	1. Water Sprinkling 2. Treatment with Surface Agents 3. Soil Stabilization 4. Paving 5. Traffic Control 6. Covered HEMM	Tanker	16%	Inadequate
2	Feeding to Crusher	1. Enclosed hopper 2. Sprinklers	Single Water Tap	<1%	Inadequate
			Tanker	10%	
3	Primary Crusher	1. Enclosed 1. Wet Dust Suppression (Series of Scientifically designed Sprinklers) 2. Capturing and venting emission to a control device as: i. Fabric Filter ii. Bag House	Single Water Tap	38%	Inadequate
			Single Water Tap with Covered Conveyer	2%	
			Three Water Tap	<1%	
4	Secondary Crusher	1. Wet Dust Suppression (Series of Scientifically designed Sprinklers) 2. Capturing and venting emission to a control device as: i. Fabric Filter ii. Bag House	Single Water Tap	16%	Inadequate
5	Tertiary Crusher	1. Wet Dust Suppression (Series of Scientifically designed Sprinklers) 2. Capturing and venting emission to a control device as: i. Fabric Filter ii. Bag House	Single Water Tap	14%	Inadequate
6	Screening after Primary Crushing	1. Covered Screens 2. Wet Dust Suppression (Series of Scientifically designed Sprinklers)	Single Water Tap	20%	Inadequate
			Covered Screen	3%	

		3. Capturing and venting emission to a control device as: i. Fabric Filter ii. Bag House	Single Water Tap with Screen Covered	16%	
7	Screening after Secondary Crushing	1. Covered Screens 2. Wet Dust Suppression (Series of Scientifically designed Sprinklers) 3. Capturing and venting emission to a control device as: i. Fabric Filter ii. Bag House	Single Water Tap	13%	Inadequate
			Covered Screen	<1%	
8	Screening after Tertiary Crushing	1. Covered Screens 2. Wet Dust Suppression (Series of Scientifically designed Sprinklers) 3. Capturing and venting emission to a control device as: i. Fabric Filter ii. Bag House	Single Water Tap	13%	Inadequate
			Covered Screen	<1%	
9	Conveyer Belt (Screen to Product Stock Pile)	1. Covered 2. Wet-dust suppression (Series of Scientifically designed Sprinklers)	Single Water Tap	34%	Inadequate
			Covered Screen	<1%	
			Covered with Single Water Tap	3%	
10	Conveyer Belt (Screen to Fine Stock Pile)	1. Covered 2. Wet-dust suppression (Series of Scientifically designed Sprinklers)	Single Water Tap	29%	Inadequate
			Covered	<1%	
			Covered with Single Water Tap	2%	
11	Transfer Points	1. Wet Dust Suppression System (Series of Scientifically designed Sprinklers)	Single Water Tap	29%	Inadequate
			Mist Canon Gun	<1%	
12	Storage (Products)	1. Water Wetting 2. Surface active agents 3. Covering 4. Wind-breaks	Covered	<1%	Inadequate
13	Storage (Fines)	1. Water Wetting 2. Surface active agents 3. Covering 4. Wind-breaks	Covered	<1%	Inadequate
14	Others	1. Wind Breaking Wall (Altitude should be greater than the crusher units)	Four Sided	2%	Inadequate
			Three Sided	20%	
			Two Sided	17%	
			One Sided	11%	
			No Boundary Wall	50%	
		2. Green Belt	-	-	Inadequate

*The recommended emission control system are referred from Comprehensive Industry Document, Stone Crusher by CPCB (Series: COINDS/78/2007-08)

5.3.2 Major findings of the field survey on Stone crushers:

I. The crushers are situated at a distance of approximately or greater than 100 m from the nearby village or highway. Major findings of the field survey are as follows:

1. The crusher units are not equipped with proper emission control system such as bag house or fabric filter combat the air pollution.
2. The crusher units which have installed the basic pollution control system but the systems installed to control the pollution are inadequate and need to be improved.
3. Out of the crusher units inspected, very few units (<2% of the units) have enclosed crushers, <3% of units have covered conveyer belt with single water tap as sprinklers, <16% of units have primary screen covered with single water tap as sprinklers.
4. Less than 38% of the total units has installed single water tap as the sprinkler system, which are ineffective to control the pollution.
5. The product and fine pile are kept uncovered, which will lead to dust emission. Even, less than 1% of the units out of the crushers unit inspected have covered product and fine stock piles.
6. The height of the wind braking wall constructed across the crushing units are less than the height of the crushers. Therefore, these wind breaking wall are not effective against the control of dust emission. Even, the green belt has very scare number of plantation.

II. Therefore, the emission control devices implemented in the crushing units are inadequate to control the pollution. A systematic time bound control measures needs to be implemented for effective results.

5.3.3 Stone Mines

I. The District Task Force Committee (DTC) members, Sahebganj visited all mines to access the environmental status during 11.02.2020 to 16.02.2021. The mines were at a distance of approximately 500 m from the nearby village. The Environmental Status of the Stone Mines in the Sahebganj District based on the report are tabulated below (Table 9):

Table 9. Environmental Status of the Stone Mines in the Sahebganj District

Sl No	Process	Recommended Emission Control System	Existing Emission Control System	Adequacy
1	Drilling	1. Liquid Injection (Water/ wetting agent)	No Facilities	Inadequate

2	Blasting	1. Controlled Basting (use of millisecond delay detonators) 2. at a specific time 3. optimization of use of explosive energy 4. use of 'water ampoules' during blasting 5. Over charging of blast holes should be avoided	No Facilities	Inadequate
3	Excavation	1. Water Sprinkling	No Facilities	Inadequate
4	Hauling	1. Water Sprinkling 2. Treatment with Surface Agents 3. Soil Stabilization 4. Paving 5. Traffic Control 6. Covered HEMM	No Facilities	Inadequate
5	Product Storage	1. Water Wetting 2. Surface active agents 3. Covering	Uncovered	Inadequate
6	OB/Waste Storage	4. Water Wetting 5. Surface active agents 6. Covering	Unscientific & Uncovered	Inadequate
7	Transportation of Stone	1. Water Sprinkling 2. Treatment with Surface Agents 3. Soil Stabilization 4. Paving 5. Traffic Control 6. Covered HEMM	Uncovered Vehicles	Inadequate
8	Others	1. Green Belt	-	Inadequate

*The recommended emission control system are referred from Comprehensive Industry Document, Stone Crusher by CPCB (Series: COINDS/78/2007-08)

5.3.4 Major findings of the field survey on mines

I. Major findings of the field survey of the stone quarry are as follows:

1. Almost all the mines bench height and width were found not proper.
2. Unscientific and unsystematic mining were being done in all mines.
3. Environmental & pollution control measures were found inadequate or not followed such as: No Sump/rainwater storage arrangement, however, few the mines has very small capacity of sump where water would finish within 1-3 months after the rainy season.
4. Haul roads were found Kutcha and inadequate arrangement for water spraying on haul roads were observed.
5. Overburden / waste materials were also dumped improperly. Mine plan/drawing sections were not made available so it was difficult to ascertain whether the O/B dump is within the lease area or outside.
6. O/B was dumped without any catch drain, siltation ponds & retaining wall in its periphery.
7. No grassing and vegetation on O/B dump were done.
8. There was no separate dump for top soil storage.
9. No future plan for mine reclamation/ closure.”

14. In spite of above unsatisfactory state of affairs noted by the Committee, it has recorded its findings of supportive carrying capacity, merely on th basis of lockdown data. Further, ignoring serious violations,

no effective remedial measures have been suggested before recommending permission to continue such errant units. Tables 11 and 13 of the report are as follows:-

“Table 11 Total Estimation Load, Assimilative Capacity and Supportive Carrying Capacity in Sahebganj

Month	Total Estimated load (kg)	Assimilative Capacity (kg)	Supportive Capacity (kg)	% Supportive Capacity
January	31,503	42,901	11,398	26.57
February	30,945	70,937	39,991	56.38
March	33,725	96,094	62,369	64.90
April	38,000	1,25,929	87,928	69.82
May	40,143	1,33,391	93,249	69.91
June	25,688	1,40,162	1,14,475	81.67
July	14,981	1,01,499	86,518	85.24
August	12,211	86,576	74,366	85.90
September	11,825	80,113	68,288	85.24
October	18,577	62,584	44,006	70.32
November	27,453	49,895	22,442	44.98
December	25,419	45,253	19,834	43.83

*Based on the PM Value required to keep ambient air quality as ‘Good’ Level

Table 13 Total Estimation Load, Assimilative Capacity and Supportive Carrying Capacity in Sahebganj

Month	Total Estimated Load (kg)	Assimilative Capacity (kg)	Supportive Capacity (kg)
January	31,503	25,741	-5,762
February	30,945	42,562	11,617
March	33,725	57,657	23,932
April	38,000	75,557	37,557
May	40,143	80,035	39,892
June	25,688	84,097	58,409
July	14,981	60,899	45,918
August	12,211	51,946	39,735
September	11,825	48,068	36,243
October	18,577	37,550	18,973
November	27,453	29,937	2,484
December	45,253	27,152	-18,101

*Based on the PM Value required to keep ambient air quality as ‘Good’ Level”

15. Further, compensation assessment formula of the Committee is patently unscientific, wrongly styled as “NGT recommended”. The formula

suggests that 80% compliance will be enough which is against settled precautionary principle that in environmental issues compliance has to be absolute and not even substantial. Table 15 suggesting allocation of weightage under different heads is as follows:-

“Table 15 Maximum Weightage assigned to Control Techniques proposed by CEED, Delhi

Sl No	Pollution Control Technique	Weightage
1	Meeting all the sting criteria specified by JSPCB	8
2	SPM concentration should be less than 600 µg/m ³ at a distance of 3-10 m	18
3	Dust control techniques (Only one can be assigned)	
3.1	Combination of wet and dry dust suppression system, OR	28
3.2	Enclosure of crusher, screen and conveyor belts and then venting it to a control device (Dry dust collection system), OR	15
3.3.	Sprinkling at all the crusher feed and transfer points as per model crusher plan (Wet dust suppression system), OR	5
3.4	Only enclosure structures (without control devices)	5
4	Emission control technique from Haul roads (Only one can be assigned)	
4.1	Paving, OR	8
4.2	Water sprinkling at regular intervals/ Soil stabilisation	5
5	Green Belt development around the periphery (@100 trees per acre of land)	9
6	Height of Wind breaking structures must be greater than height of stockpiles	8
7	Regular Cleaning of equipment	4
8	Boundary Wall height of at least 10 m all around the site periphery	5
9	Loaded trucks should be covered with tarpaulin while transportation	3
10	Rainwater Harvesting system cum ground water recharge unit	9

The maximum score that can be awarded is 100.

- v. **In order to avoid the environmental compensation, the occupier must comply with 80 percent of the above-listed control techniques i.e., an aggregate score of 80.**
- vi. The inspecting official is allowed to deduct scores on the basis of incomplete or ineffective or insufficient application of control technique.
- vii. **Therefore, the complying score is calculated by the difference between minimum score required (i.e. 80)**

and the score obtained. *The higher value of complying score implies the lesser compliance with control measures as listed in the Table 15.”*

16. The formula suggested will enable even non-compliant stone crushers to be treated as compliant against the object of the environmental law, particularly, the ‘precautionary’ principle. This is so inspite of degradation of environment in the area and continuous past violations which will require any reasonable person to tread with caution.

17. The recommendations in the report are as follows:-

“11.0 Recommendations

Based on the above observations, findings and key issues of the area it is recommended as follows:

- I. *142 stone mines and 299 stone crushers with valid CTO are only allowed to operate in the district as per the list provided by JSPCB via letter Ref No. B-1949, dated 9.11.2021 (Annexure 2). Other stone mines and crushers, which are not listed by JSPCB should be allowed to operate only after obtaining consent from JSPCB.*
- II. *The stone mines and crushers which have valid CTE, but do not comply to the stipulated condition in CTO issued by JSPCB or mining authority as the case may be, shall not be allowed to operate unless they are found complying with the conditions as per rule.*
- III. *A district level monitoring committee (DMC) headed by District Commissioner, may be constituted to ensure that the measures, as per the conditions imposed by JSPCB through consent to operate for stone crushers and mines are in operation/complied on sustainable basis. DMC should review the progress every six month*
- IV. *Hotspot Cluster to be identified and based on the scientific studies, and accordingly, micro level time bound environment management action plan shall be prepared and implemented. This should be monitored by District Monitoring Committee.*
- V. *A cluster management committee comprising of all the industrial units in the cluster shall be constituted and held responsible for implementation of cluster specific action plan in time bound manner. Failure to comply will result in combined failure and all units will be closed till cluster / individual corrective measures as per the cluster action plan is not complied.*
- VI. *The impact of stone crushers and mines are zone specific or area specific. These zones should be contoured as cluster or individual basis and cluster specific action plan should be prepared in*

agreement with the finding of carrying capacity and activities should be control or regulated as per the assimilating capacity of the cluster/zone.

- VII. *The sitting of the stone mines and crushers with respect to the nearby human settlement, highways etc. should comply the criteria specified by JSPCB (**Annexure A**).*
- VIII. *The crushing units in case on stone crushers should be placed in a covered section with proper pollution control equipment.*
- IX. *Conveyor belts should be covered /enclosed to avoid fugitive emission, without side gaps, in enclosure and belts.*
- X. *The crushed stones or finished products should be stored in silo or the height of finished goods should be kept lower than the height of wind breaking walls. Strong structural base and framing should be provided for wind breaking wall to withstand in strong wind conditions. The height of the stockpile should always be kept lower than the height of the wind breaking wall. The wall can be erected radially with a screen as center point. In addition, proper sprinkling arrangement should be provided all around the stock piles.*
- XI. *The dusts collected in bag house, which are of more than 5 um size have market value. The dust should be collected in bags and should be sold. The unit should not be allowed to dispose the collected materials as solid waste. In case, disposal of such waste is necessary, adequate facility for disposal with earmarked area and proper designed disposal pit duly approved by SPCB should be made by the unit.*
- XII. *Proper house-keeping should be maintained for the crushing units placed in the covered section. Layers of dust should not be allowed to accumulate on floor of the crusher premises. Scrapers could be utilized for dust accumulation at a place which can be disposed subsequently.*
- XIII. *JSPCB to ensure compliance of its order as mandate to all stone crushers having capacity above 500 TPD or more than 10000 CFT/Day to install the certified PM 10 analyzer with on-site display and online connectivity to JSPCB server (**Annexure 12**).*
- XIV. **General Guidelines for Abatement of Pollution (enclosed as Annexure A)** shall be adopted and implemented as preventive measure to control the pollution in the area.
- XV. *In order to have real time data of pollutants mainly PM10, PM2.5 and meteorological variation, it is recommended to have continuous monitoring of air quality. CAAQMS be installed as per the guidelines and the data so generated shall be managed and disseminated to Public, by JSPCB. Funding may be generated through Environmental compensation fund collected by JSPCB as per the guidelines approved by Hon'ble NGT or any other means.*

- XVI. *JSPCB should develop an online dashboard and an app to properly observe and disseminate the levels of pollution in real time for general awareness and take informed decision by the local administration and or JSPCB.*
- XVII. *There has to be a new policy to allow stone dust generated from the mines and crusher activities to be used as sand in the building and construction material which will resolve its proper disposal and will also prevent it from merging with the water of the Ganges and other water bodies.*
- XVIII. *There should be specific measures to reclaim the land of closed and abandoned mines. A proper plan to regain greenery and vegetation should be in place to reduce further land degradation.*
- XIX. *The haul roads within the mines/industry premises as well as city and district roads which cater to the transportation of the products from the stone crushers or mines shall be appropriately managed to ensure that resuspension of dust is minimize and also the carrying capacity of these roads as per the traffic in the region.*
- XX. *Separate action plan should be prepared by the Divisional Railway Manager (DRM), Sahebganj for the railway sliding to mitigate the environmental pollution in the area and submitted to district administration and JSPCB with 6 months times for its effective implementation after approval.*
- XXI. *The local administration shall work out for development of by-pass road to avoid the movement of Heavy vehicles /stone loaded vehicles etc. through city area/densely habitats in the region.*
- XXII. *Movement of heavy vehicles or stone carrying vehicles shall continued to be monitored trucks by District transport authority for compliance of covering of truck and movement through city area/dense Habitats during peak traffic periods and preferable allowed to be move during 10.00 PM TO 6 AM.*
- XXIII. *JSPCB and CEED should carryout the grid-based monitoring of the study area to estimate the carrying and supporting capacity of the region. Based on the findings, a protocol may be derived to regulate the emission sources.*
- XXIV. *EC as proposed at section 8 of this report may be imposed to the non-complying units by JSPCB*
- XXV. *As the carrying capacity study carried out by CEED, Delhi is based on formulae recommended by Hon'ble NGT in its order dated 12.03.2021 for Delhi, which is a land locked area. However, Sahebganj has different topography, it's a hilly area and is bounded by river Ganga in one of its boundaries., which is different from the topography of Delhi. The studies reveal that there is only 3 months of concern and the prediction is based on satellite-based data. Therefore, in absences of any ground-*

based monitoring data during the predicted critical season, it is proposed that a detail ground-based air quality data for the period Nov – Feb be carried out to establish the factual status and assess the scientific study based supporting cum carrying capacity of the region and work out the requirement to comply with the order of Hon'ble NGT dt. 12.03.2021.

XXVI. It is humbly submitted that an extension of time period for submission of final report by the committee to comply with the requirement arising from the Hon'ble NGT order dated 12.03.2021 may be given. During this period, field level study for primary data collection (DEC – FEB), and based on the same, carrying capacity-based outcome will be prepared and submitted to Hon'ble NGT, by 1st week of April 2022.”

18. The Committee failed to extrapolate PM_{2.5} data to PM₁₀ data as was done in matter of OA 1016/2019 by CPCB. PM_{2.5} data shows clearly that there is no supportive carrying capacity and this data needs to be used for carrying capacity computations. NCF (Non-Compliance Factor) in formula has been designed in such a way that the units with most serious non-compliance will have to pay no or least environmental compensation e.g. unit found to be set up without meeting siting criteria will have to pay no environmental compensation or unit consistently not complying with prescribed norms can escape the environmental compensation by using the proposed formula. Further, units complying with 80% of listed pollution control techniques will have to pay no EC as 20% rebate is with any logic.

19. For the reasons already given, the recommendations are unacceptable being based against law and science and is unprofessional and hence rejected. However, to the extent stone crushers and mines are non-compliant even according to the Committee need to be forthwith closed, if not already closed.

20. In view of failure of the joint Committee to provide sound basis for assistance of the Tribunal, we have no option except to reject the report of the Committee CPCB may assign the task to the Committee which

undertook study and submitted report dated 6.10.2020 in OA No. 1016/2019, *Utkarsh Panwar vs. Central Pollution Control Board & Ors.* The Committee may be steered by Member Secretary, CPCB, who will be free to take assistance from any other expert. The Committee may give its report within three months by e-mail at judicial-ngt@gov.in preferably in the form of searchable PDF/ OCR Support PDF and not in the form of Image PDF. The report may also be uploaded on the website of CPCB for any response by any stakeholder before the next date.

21. We also direct the State PCB to close the illegally operating stone crushers/mines - those not having valid consents, those not following valid siting criteria and those not maintaining laid down safeguards noted in paragraphs 5.3.1 and 5.3.3 in the above report. This may be ensured by a joint Committee of CPCB, State PCB and the District Magistrate and compliance report filed before the next date. The affected parties are at liberty to move this Tribunal, if they are aggrieved.

List for further consideration on 20.04.2022.

A copy of this order be forwarded to CPCB, State PCB and District Magistrate, Sahebganj by e-mail for compliance.

CENTRAL POLLUTION CONTROL BOARD

(Ministry of Environment, Forests & Climate Change, Government of India)

Eastern Regional Directorate

502, Southend Conclave, 1582, Rajdanga Main Road, Kolkata - 700 107

Date: 4th February, 2022**OFFICE MEMORANDUM**

Subject: Constitution of Joint Committee to ensure compliance of Hon'ble NGT Order dated 22 December 2021 in the matter of O.A. No. 23 of 2017 titled Syed Arshad Nasar V. Union of India & Other concerned matters. Reg.

The Hon'ble NGT in its order dated 22nd December 2021 in OA No. 23 of 2017 in matter of Syed Arshad Nasar V. Union of India & Other, relating to enforcement of environmental norms in the operation of quarrying and crushing units in Rajmahal hills of the Vindhya Mountains, District Sahebganj, Jharkhand, has directed that;

"21. We also direct the State PCB to close the illegally operating stone crushers/mines - those not having valid consents, those not following valid siting criteria and those not maintaining laid down safeguards noted in paragraphs 5.3.1 and 5.3.3 in the above report. This may be ensured by a joint Committee of CPCB, State PCB and the District Magistrate and compliance report filed before the next date. The affected parties are at liberty to move this Tribunal, if they are aggrieved." (A Copy of the order dated 22nd December 2021 is enclosed)

In compliance to the above direction, following joint committee is constituted for ensuring closure of the illegally operating stone crushers/mines:

1. District Magistrate, Sahebganj
2. Dr. G.P Singh, Sc. D, CPCB, RD Kolkata
3. Member Secretary, Jharkhand State Pollution Control Board (JSPCB) or his representative

Terms of Reference (TOR) of the committee:

1. The Committee shall ensure compliance to the aforesaid directions of Hon'ble NGT.
2. The committee shall ensure and verify that the closure directions issued by JSPCB are enforced.
3. The committee may adopt suitable mechanism including conducting surveys, to identify the illegally operating crushers/mines not having valid consents, without following valid siting criteria, and without implementing environmental safeguards.
4. The committee may also verify the crushers/mines operating with valid consent and following the siting criteria & safeguards.
5. The JSPCB and the District Magistrate, Sahebganj shall provide necessary logistic support to the Committee to undertake their tasks.
6. The Committee will submit its report latest by 10.03.2022 to CPCB.
7. Expenditure towards the work carried out by the Committee will be met by JSPCB.

This is issued with the approval of Competent Authority, Central Pollution Control Board.

(M.K Biswas)
Regional Director

To,
All the committee members

Copy for kind information to:
