M.A. NO. 87/2024

In

Original Application No.327/2023

In the matter of Suo Moto Cognizance

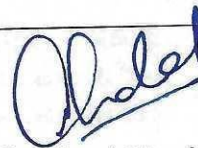

**In Re: News item published in India Today dated 30.04.2023 titled "3 minors among 11 dead in Ludhiana Gas Leak Punjab Govt. announce Rs 2 lakh ex - gratia"**

Short reply by way of affidavit of Er. Amritpal Singh Chahal, Environmental Engineer, Regional Office-4, Ludhiana on behalf of Punjab Pollution Control Board in compliance of order dated 04.12.2025.

I, the above-named deponent, do hereby solemnly affirm and state as under:

**RESPECTFULLY SHOWETH**

1) That the above-mentioned case is pending for adjudication before this Hon'ble Tribunal and is now listed for hearing on 03.07.2026. The respondent Punjab Pollution Control Board is filing replies / status reports from time to time in compliance to the orders and directions of this Hon'ble Tribunal.

2) That after consideration of the matter and the affidavit dated 28.04.2025 filed by the Punjab Pollution Control Board, this Hon'ble Tribunal was pleased to pass an order dated 04.12.2025, thereby directing the Punjab Pollution Control Board to disclose the quantity received by the CETP from each of the 1291 units in the previous month with monthly production of that unit, electricity consumption bill of that unit of the previous month including the quantity of acid and raw material used by that unit. On the request of the Punjab Pollution Control Board, this Hon'ble Tribunal was pleased to extend the time for submitting the report vide order dated 23.02.2026.

3) That in order to make compliance of the orders dated 04.12.2025 of this Hon'ble Tribunal and to gather the relevant information, the Offices of the Punjab Pollution Control Board at Ludhiana has written letters to the Chief Engineer, Punjab State Power Corporation Limited, Ludhiana for providing the information relating to electricity consumption of the electroplating units and to the Commissioner, Goods and Service Tax Commissionerate, Ludhiana to

*OL*

1236

provide detail regarding acid consumption, production and raw material used by the units. The detail of the correspondence made in the case is given below:

- a) Letter no. 01 dated 01.01.2026 to the Chief Engineer, Punjab State Power Corporation Ltd, Ludhiana for providing information to the Board with regard to the electricity consumption of the electroplating units of Ludhiana. A copy of letter no. 01 dated 01.01.2026 is enclosed as **Annexure-A**.
- b) Letter no. 469 dated 16.04.2026 to the Chief Engineer, Punjab State Power Corporation Ltd, Ludhiana as the reminder for providing information to the Board with regard to the electricity consumption of the electroplating units of Ludhiana. A copy of letter no. 469 dated 16.04.2026 is enclosed as **Annexure-B**.
- c) Letter no. 3644 dated 24.04.2026 was received from the office of the Chief Engineer, Punjab State Power Corporation Ltd, Ludhiana stating that the information with regard to the electricity consumption of the units can only be provided if PPCB provide PSPCL electric account numbers of the units or an official should be deputed to personally visit each sub division office and assist their field staff in tracing the units. A copy of letter no. 3644 dated 24.04.2026 is enclosed as **Annexure-C**.
- d) Letter no. 532 dated 15.05.2026 to the Chief Engineer, Punjab State Power Corporation Ltd, Ludhiana informing his office that no record of PSPCL electricity account numbers is maintained by the Board and that the contact information of the nodal officer has already been provided to PSPCL for further coordination in the matter. A copy of letter no. 532 dated 15.05.2026 is enclosed as **Annexure-D**.
- e) Letter bearing no. 219 dated 11.02.2026 to the Commissioner, Goods & Service Tax Commissionerate, Ludhiana to provide the details of acid consumption, raw material used and production of the units. A copy of letter no. 219 of 11.02.2026 is enclosed as **Annexure-E**.
- f) Letter no. 531 dated 13.05.2026 to the Commissioner, Goods & Service Tax Commissionerate, Ludhiana as a reminder to provide the details of acid consumption, raw material used and production of the units. A copy of letter no. 531 dated 13.05.2026. is enclosed as **Annexure-F**.

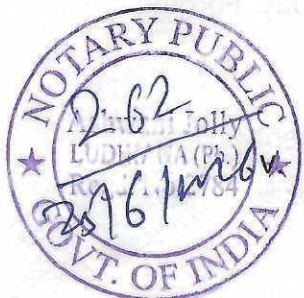

That neither the Punjab State Power Corporation Limited nor the Commissionerate of Goods and Service Tax, Ludhiana have provided the relevant information to the Board. However, in order to gather the relevant

information, the officers of the Board had visited the electroplating units from time to time. After gathering the information, the same was compiled and the compiled information of 1291 units with regard to the quantity of effluent (in Litres) received by the CETP in the month of November 2025, production of the unit in November 2025, amount of acid consumed in November 2025, quantity of raw material used by the units in November 2025 and consumption of electricity by the units in November 2025 is tabulated and enclosed as **Annexure-G** for kind perusal of this Hon'ble Tribunal.

5) That certain facts of the case relating to the mechanism for the collection and transportation of effluent from the premises of the individual industries to the premises of the Common Effluent Treatment Plant for treatment are required to be clarified and the same may kindly be read as under:

- i. That the tiny and small electroplating units which are situated in scattered areas of Ludhiana and other districts have been given the facility to get their trade effluent treated through a Common Effluent Treatment Plant situated at Ludhiana.
  - ii. Due to scattered nature of the units, there is no dedicated conveyance system like sewer lines or pipelines for the discharge of trade effluent of tiny and small units engaged in the electroplating process, which directly leads to the premises of the Common Effluent Treatment Plant.
  - iii. The units are thus required to collect and store their trade effluent in an underground collection tank(s) (which are lined with PVC or Acid proof tiles) installed within their premises. Once the tank reaches its 70-80% capacity, the individual unit places an order for the lifting of trade effluent with the CETP operator.
  - iv. Upon receiving the request form the units, the CETP operator registers the order and dispatches a vehicle (equipped with GPS) fitted with a tanker for lifting of effluent.
- The effluent is then collected, and a receipt/manifest is issued to the concerned unit. The manifest details the quantity of effluent collected from the premises of the unit and bears a unique manifest number. The units are required to present this manifest during the PPCB inspection as proof of compliance (treatment and disposal

OL

of effluent).

- vi. To regulate and monitor the usage of water, the individual units are required to install water meters in their process areas. The units are required to record their daily water consumption, and the water meter readings are maintained in a register. The Punjab Pollution Control Board verify these records during inspections to ensure proper fresh water usage and dispatch and lifting of effluent by the CETP.
- vii. The CETP operator maintains comprehensive logs of all effluent collected from member units, which are regularly reviewed by PPCB officials.
- viii. The vehicles used by the CETP operator for the collection of trade effluent are fitted with GPS tracking systems to monitor the movement of the vehicle(s) thereby ensuring transparency in effluent transportation.
- ix. After the trade effluent is lifted by the GPS fitted vehicle and is transported to the premises to the Common Effluent Treatment Plant, the unloading point in the CETP is also covered by the CCTV camera which is accessible to the office of Punjab Pollution Control Board.
- x. Thereafter, the trade effluent received by the CETP is treated by the CETP operator to achieve the parameter prescribed by the CPCB/MoEFCC.
- xi. The CETP has provided 55 vehicles for lifting of effluent from electroplating & allied industries and all the vehicles are fitted with GPS.
- xii. The treated water is being supplied to National Highway Authority of India (NHAI) for irrigation, Municipal Corporation Ludhiana (MCL), Construction Projects as well as Parks maintained by some large-scale industrial units such as M/s Vardhman Group and M/s Kay Jay Forging besides its own cooling tower.
- xiii. The CETP is based on physico-chemical treatment process followed by reverse osmosis and evaporator for treatment of effluent generated from electroplating units.
- xiv. The CETP has provided Online Continuous Effluent Monitoring System (OCEMS) at the final outlet which is

connected to the Board's server.

- xv. Majority of the industries involved in electroplating process are small and cottage type of units. Many of the units were either operating in rental property or have shifted to new address or have closed down the business.
- xvi. Many of these units have a singular electric connection for combined activities of the whole industry and the electroplating section only covers a small part of the overall electric consumption and as such bifurcation of electricity cannot be obtained.
- xvii. Raw material consumption and overall production of an industrial unit is available. However, electroplating process of many of these industries covers a small part of the overall production and as such the raw material consumption and production for only electroplating process cannot be ascertained.
- xviii. Many of these electroplating industries / units are engaged in the business on job basis as such these unit do not have a fixed amount of raw material consumption and production and carry out the job work according to the number of pieces/pairs received at a given time.
- xix. Majority of these industries / units do not have proper record with regard to raw material, acid consumption and production.
- xx. The capacity of the Common Effluent Treatment Plant is 800 KLD meaning that the CETP can treat 800 Kilo Litres / units of trade effluent each day and the agreements made by the industries are for the whole month meaning that if an industry has made an agreement of 18 Kilo Litres, then that amount of trade effluent can be lifted in a month.

6) That the deponent herein has also filed replies and status reports earlier in the present case on the directions of this Hon'ble Tribunal. The said replies and status reports may kindly be read as part of the present reply.

7) That the deponent may kindly be allowed to place on record the present short reply by way of affidavit on behalf of Punjab Pollution Control Board in compliance to order dated 04.12.2025.

**Subject: Seeking information regarding electricity consumption of electroplating industries in the matter of M.A. No. 87 of 2024 of Hon'ble NGT.**

It is submitted that the Hon'ble National Green Tribunal (NGT) in M.A. No. 87 of 2024 order dated 04.12.2025, has directed PPCB to disclose the quantity received by CETP from each of 1291 units in the previous month, monthly production of that unit, electricity consumption bill of that unit of the previous month including quantity of acid and raw material used by that unit.

In this regard, the information regarding electricity consumption sought by the Hon'ble NGT has to be provided by your respected office, as electricity usage is an important indicator for assessing operational status, scale of activity, and environmental compliance.

It is therefore requested that the information may kindly be provided at the earliest so that compiled report may be submitted before the Hon'ble National Green Tribunal. If any query kindly contact Er. Amritpal Singh Chahal, Environmental Engineer, Regional Office-4, Ludhiana (email Id: [eero4ldh@gmail.com](mailto:eero4ldh@gmail.com) and M.no. 8146662553). It is also requested that all the information regarding electricity consumption may be filled in excel sheet forwarded to your respected office via email.

## Annexure-C

**Punjab State Power Corporation Ltd.**

O/o Chief Engineer, Central Zone, Ludhiana

To

The Environmental Engineer,  
Regional Office-IV,  
Punjab Pollution Control Board (PPCB),  
3rd Floor, Savitri Complex-1 (Dada Motors),  
Dholewal Chowk, G.T. Road, Ludhiana.

Memo No. 3644

Dated: 24/04/2026

**Sub: Reply regarding information of electricity consumption of electroplating industries in the matter of M.A. No. 87 of 2024 of Hon'ble NGT.**

**Reference:** PPCB Zonal Office-II letter No. PPCB/SEE/ZO-2/LDH/2025/01 dated 01.01.2026 and PPCB Regional Office-IV letter No. 469 dated 16.04.2026.

With reference to the subject cited and the letters referenced above, it is submitted that your office had requested data regarding the electricity consumption of 1291 electroplating units as per the directions of the Hon'ble National Green Tribunal (NGT) in M.A. No. 87 of 2024.

Upon reviewing the list of industries provided by your office (Annexure-B), it has been observed that the list contains only the names and addresses of the industries. The PSPCL electricity account numbers for these premises have not been provided.

Please note that PSPCL records and billing systems are indexed primarily based on electricity account numbers. Due to the high density of industrial units and similarities in addresses, it is highly difficult and impractical for our field offices to accurately trace the specific locations and retrieve the corresponding account numbers based solely on the names and addresses provided in the annexure.

Therefore, to ensure accurate compilation of the requested electricity consumption data for the Hon'ble NGT, you are requested to kindly facilitate either of the following:

**Provide the complete list of the 1291 units updated with their respective PSPCL electricity account numbers.**

OR

**Depute an official from your department to personally visit the respective PSPCL Sub-Divisions and assist our field staff in physically tracing the premises to identify the correct PSPCL account numbers, after which the electricity consumption data can be extracted and provided.**

We assure you of our full cooperation in this matter once the requisite account details are identified. An early action is requested so that the compliance report can be submitted before the Hon'ble NGT within the stipulated timeframe.

**Sub:- Seeking information regarding electricity consumption of electroplating industries in the matter of M.A. No. 87 of 2024 of Hon'ble NGT.**

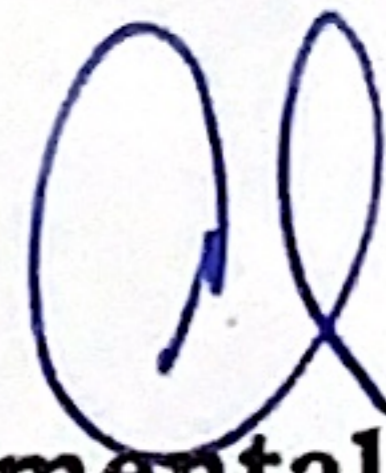

**Ref:- PPCB letter no. 01 dated 01.01.2026, PPCB letter no. 469 dated 16.04.2026 and PSPCL memo no. 3644 dated 24.04.2026.**

It is submitted that the Hon'ble National Green Tribunal (NGT) in M.A. No. 87 of 2024 order dated 04.12.2025, has directed PPCB to disclose the quantity received by CETP from each of 1291 units in the previous month, monthly production of that unit, electricity consumption bill of that unit of the previous month including quantity of acid and raw material used by that unit.

In this regard, a letter has been received from your respected Office that the electricity consumption by the industries cannot be provided without their PSPCL electricity account numbers. It is respectfully submitted that the Punjab Pollution Control Board does not maintain records of PSPCL electricity account numbers and only maintains the record of name and address of the industry. Even in earlier interaction with PSPCL the Board provides name and address only.

In regard to the to the deputation of an officer to respect PSPCL sub-divisions the contact details of the nodal officer in this matter has already been provided to your respected office vide this Board's letter no. 01 dated 01.01.2026 for further coordination in this matter, please.

It is therefore requested that the information may kindly be provided at the earliest, so that compiled report may be submitted before the Hon'ble National Green Tribunal.
