

OFFICE OF THE CHIEF SECRETARY
Government of Chhattisgarh

No. 589 /CS/20 23

Nava Raipur Atal Nagar, Date

To

10 OCT 2023

The Registrar General
National Green Tribunal
Faridkot House, Copernicus Marg
New Delhi – 110001

Sub: Action taken report in compliance of Hon'ble NGT's Order dated 31.03.2023 in OA No. 606 of 2018

Sir/Madam,

In compliance to the directions given by Hon'ble NGT in OA 606 of 2018 (order dated 01.12.2022), please find enclosed herewith the six monthly progress report with regard to solid and liquid waste management in Chhattisgarh state.

Enclosure – As above

(Amitabh Jain)
Chief Secretary,
Government of Chhattisgarh

Copy to:

1. Secretary, Ministry of Jal Shakti, Government of India, 1st Floor, Major Dhyan Chand National Stadium, India Gate, New Delhi – 110002
2. Secretary, Ministry of Housing & Urban Affairs, Nirman Bhawan, New Delhi – 110001.
3. Member Secretary, Central Pollution Control Board, Parivesh Bhawan, East Arjun Nagar, Delhi – 110032
4. Director General, National Mission for Clean Ganga, Department of Water Resources, River Development & Ganga Rejuvenation, Ministry of Jal Shakti, Government of India, New Delhi – 110002
5. Adviser, PHEE, CPHEEO, Ministry of Housing & Urban Affairs, Nirman Bhawan, New Delhi – 110001

Chief Secretary,
Government of Chhattisgarh

**Six Monthly Compliance Report of the direction of Hon'ble NGT
in the matter of O.A. No. 606/2018 dated 31.03.2023 for the state of Chhattisgarh**

Sr No.	NGT's Analysis, Findings and Direction	Compliance/ Action taken																											
1	Para 26: It is seen that still a gap of 1115 TPD in generation and processing of solid waste.	<ul style="list-style-type: none"> In compliance with the directives of the Hon'ble National Green Tribunal (NGT), we are pleased to report our Solid waste management efforts. Out of the 3,871 tons per day (TPD) of solid waste generated, a substantial 2,169 TPD is efficiently processed at the 175 Compost Shed in urban areas, 73,066 Community Compost pit in rural areas and through home composting initiatives, while an additional 1,662 TPD is effectively managed at the 360 Solid and Liquid Resource Management (SLRM) Centres in urban areas and 9,309 Segregation Sheds in rural areas with a gap of 09 TPD. In Urban areas 31 TPD of residual waste is disposed of at the sanitary landfill, showcasing our dedication to minimizing the environmental impact of waste. This remarkable synergy in our waste management system signifies that there is no gap between solid waste generation and its responsible processing, as we continually strive to adhere to Solid Waste Management, Rules, 2016. 	<table border="1"> <thead> <tr> <th></th> <th>Urban Area</th> <th>Rural Area</th> <th>TOTAL</th> </tr> </thead> <tbody> <tr> <td>Waste Generated (TPD)</td> <td align="center">1820</td> <td align="center">2051</td> <td align="center">3871</td> </tr> <tr> <td>Waste Processed at Compost Shed / Home Composting (TPD)</td> <td align="center">1063</td> <td align="center">1106</td> <td align="center">2169</td> </tr> <tr> <td>Waste Processed at SLRM Centre (TPD)</td> <td align="center">726</td> <td align="center">936</td> <td align="center">1662</td> </tr> <tr> <td>Waste/Inerts disposed at scientific landfill (TPD)</td> <td align="center">31</td> <td align="center">0</td> <td align="center">31</td> </tr> <tr> <td>Gap</td> <td align="center">0</td> <td align="center">9</td> <td align="center">9</td> </tr> </tbody> </table>				Urban Area	Rural Area	TOTAL	Waste Generated (TPD)	1820	2051	3871	Waste Processed at Compost Shed / Home Composting (TPD)	1063	1106	2169	Waste Processed at SLRM Centre (TPD)	726	936	1662	Waste/Inerts disposed at scientific landfill (TPD)	31	0	31	Gap	0	9	9
	Urban Area	Rural Area	TOTAL																										
Waste Generated (TPD)	1820	2051	3871																										
Waste Processed at Compost Shed / Home Composting (TPD)	1063	1106	2169																										
Waste Processed at SLRM Centre (TPD)	726	936	1662																										
Waste/Inerts disposed at scientific landfill (TPD)	31	0	31																										
Gap	0	9	9																										
2	Para 26: There is no categorical information about legacy waste in remaining 162 ULBs out of total 169 though it is stated that 470 acres of land stands reclaimed in 162 ULBs and is being utilized for developing infrastructure in form of SLRM centres and compost sheds.	<ul style="list-style-type: none"> We are pleased to present a comprehensive update on our waste management initiatives. Out of 162 ULBs, most of them are with populations under one lakh. Under the mission aptly named "Mission Clean City," we have successfully processed the accumulated legacy waste at dumpsites throughout these 162 ULBs, drawing inspiration from the proven and effective Ambikapur model. Which included steps such as Segregation of waste at dump sites and formation of garbage heap followed by sprinkling of water and bacterial inoculum and finally scientifically remediation of the dumpsite. One of the most noteworthy accomplishments of this mission has been the reclamation of a remarkable 470 acres of land across 162 ULBs. This land reclamation has not only served as an environmental restoration endeavour but has also provided us with a unique opportunity for community development. These reclaimed lands have been thoughtfully repurposed to create vital infrastructure in the form of SLRM Centers, Compost Sheds, Gauthan, fostering the sustainable management of waste and proper utilization of reclaimed land. 																											

Sr No.	NGT's Analysis, Findings and Direction	Compliance/ Action taken
		<ul style="list-style-type: none"> • Thanks to the implementation of the “Ambikapur old dumpsite remediation model”, we can confidently report that there are currently no existing dumpsites in these 162 ULBs. • This remarkable achievement is indicative of our commitment to environmentally responsible waste management practices. The successful remediation of old dumpsites has not only eliminated the potential environmental hazards associated with these sites but has also paved the way for land reclamation. In total, a significant 470 acres of land within these ULBs have been thoughtfully reclaimed and repurposed to benefit the community. • <i>The detailed information about the status of legacy waste in 162 ULBs is attached in Annexure A.</i>
3	Para 26: there is gap in utilization of the installed capacity of STPs	<ul style="list-style-type: none"> • We are delighted to provide a positive update in response to the tribunal’s directive regarding ensuring connectivity with installed Sewage Treatment Plants (STPs) and proposed STPs. • In recent months, notable progress has been made in this context, due to a series of constructive initiatives and regular meetings conducted by the Chief Secretary of state and comprehensive review session chaired by the Secretary, Urban Administration & Development Department with Municipal Commissioners, and officers. • The capacity utilization of constructed STPs has notably increased from 178.6 MLD in March 2023 to 222.2 MLD in September 2023. • Additionally, Municipal Corporation Raipur has identified 09 industrial units which can utilize the treated wastewater from the STPs at Nimora, Kara and Chandandih. The industries are in the process of demand assessment and preparing Pre-feasibility report. Thereafter the MoU signing process will be initiated for utilizing treated wastewater from STPs. • <i>Details of the Utilization capacity of all the operational STPs is attached in Annexure B.</i>
4	Para 27: Directions for strict adherence of timelines for SWM Rules, 2016	<ul style="list-style-type: none"> • The State has successfully implemented 10 out of 11 activities outlined in SWM Rules, 2016 within the specified timelines. These tasks encompassed critical components such as identifying suitable sites for waste processing and landfill facilities, enforcing waste segregation at source, ensure door to door collection and implementing efficient waste collection and transportation systems. • While all other activities were completed within timelines, we acknowledge that the final activity i.e., the bioremediation or capping of old and abandoned dump sites is in progress. • We are delighted to inform that significant progress has been made in the remediation work of existing legacy waste across 07 Urban Local Bodies (ULBs). The legacy waste at 05 ULBs namely Raigarh, Dhamtari, Korba, Durg and Jagdalpur have been remediated successfully and remediation work in 02 remaining ULBs namely Rajnandgaon, and Raipur is in progress. • Rajnandgaon has remediated 64% of the legacy waste. Raipur has started the windrow formation work and installed the waste screening equipment. • <i>Details of the current status with timeline of 07 Legacy waste Dumpsites is attached in Annexure C.</i>

Sr No.	NGT's Analysis, Findings and Direction	Compliance/ Action taken
5	Para 27: Supreme court judgement in paryavaran sureksha for installation of sewage treatment plant within time limit	<ul style="list-style-type: none"> • In response to the tribunal's direction regarding the Supreme Court's judgment on ensuring the timely installation of sewage treatment plants (STPs), our state has undertaken significant measures in this regard. We have made substantial progress by developing a total wastewater treatment capacity of 772 MLD) dedicated to treating urban household wastewater. This substantial capacity is distributed across a network of 14 operational STPs with a combined capacity of 360.5 MLD, 11 STPs under construction with a cumulative capacity of 87.8 MLD, and an additional 9 STPs at the planning stage with a total capacity of 323.7 MLD. • The State has successfully installed 14 STPs across state within the prescribed time limits and has secured approval from the Hon'ble Supreme Court vide civil appeal no 7662/2021 dated 18.04.2023 (<i>attached as Annexure D</i>) to ensure the timely completion of the remaining 06 STPs before 30.06.2024. • State has made substantial progress by developing a total wastewater treatment capacity of 772 MLD to treat wastewater generated from urban areas. This substantial capacity is distributed across a network of 14 operational STPs with a combined capacity of 360.5 MLD, 11 STPs under construction with a cumulative capacity of 87.8 MLD, and additional 09 STPs at the planning stage with a total capacity of 323.7 MLD.
6	Para 28: Ring-fenced amount of atleast Rs. 1000/- crores be set apart in terms of statement of the Chief Secretary, Chhattisgarh which has been taken on record and such funds be kept as "non-lapsable".	<ul style="list-style-type: none"> • In adherence to the directive, the state has taken all necessary steps to ring-fence an amount Rs. 812.60 crores (non-lapsable) by opening separate bank account for Urban Administration and Development Department (UADD) and Panchayat and rural development department. (P&RD) Furthermore, ULBs have also opened separate bank account and ring-fenced the required amount for solid & liquid waste management. • <i>Details of the status of ring-fenced amounts is attached in Annexure E.</i>
7	Para 29: Development for mechanism for raising funds example user charges by households/contribution of corporate, business sectors, commercial establishments and the tourists who contribute to waste.	<ul style="list-style-type: none"> • The state has established the mechanism for raising funds to support waste management initiatives. Notably, the Municipal User Charge Bylaws, designed to collect user charges from waste generators, have been notified in the Chhattisgarh Gazette on 27.07.2017 for Municipal Council and Municipal Panchayats and on 07.12.2017 for Municipal Corporations. It's important to highlight that these bylaws are now in effect and being diligently enforced across all Municipal Bodies within the state. This proactive step is instrumental in securing sustainable funding for waste management efforts, encompassing contributions of households, corporate entities, businesses, and commercial establishments, who make a substantial impact on waste generation. • As of September 2023, total amount of Rs 165 Crore till September 2023 from urban areas and Rs 13.53 Lakhs from rural areas has been collected through user charges, affirming the concrete influence of this initiative in bolstering the waste management services offered by the ULBs. • <i>The Chhattisgarh Gazette notification of Municipal User Charge Bylaws is attached in Annexure F.</i>

Sr No.	NGT's Analysis, Findings and Direction	Compliance/ Action taken
8	Para 30: Direction for scientifically handling the waste (processing and disposal) as per SWM Rules 2016.	<ul style="list-style-type: none"> • We have undertaken a holistic and comprehensive approach to ensure the scientific handling of waste, fully adhering to the Solid Waste Management Rules, 2016. All the ULBs of the State follows Mission Clean City Model of Ambikapur which incorporates maximum utilization of waste by recycling of the dry fraction and composting of wet fraction and eliminates the need of landfills for disposing rejects. The Mission Clean City Guidebook (Plan and Strategy) for all ULBs has been approved and issued for implementation on 07.09.2016. <ul style="list-style-type: none"> • Source Segregation: At the very foundation of our waste management strategy is the promotion of source segregation through the distribution of green and blue bins to each household and shops. These bins serve as visible reminders to households and businesses, encouraging them to segregate their waste at its origin. This simple yet effective step significantly enhances the efficiency of the waste management process. • Door-to-Door Collection: We have made it a priority to implement a 100 % door-to-door collection system, ensuring that segregated waste is systematically collected from households and commercial establishments through tricycles, E-rickshaws and mini-tippers through SHG women. This approach not only minimizes litter and unsegregated waste in public areas but also reinforces the importance of responsible waste disposal within the community. • Covered Transportation: The journey from source to processing or disposal facilities is equally critical. About 6,963 covered tricycles in rural areas and 3378 Covered vehicles (tricycle, E-rickshaw, mini tipper, and tractor) are engaged to transport waste, preventing the spillage, and scattering of waste materials along transportation routes. This measure safeguards against environmental contamination and upholds the integrity of segregated waste. • Establishing Waste Processing Facilities: To further facilitate scientific waste management, we have set up essential facilities including 360 SLRM centers, 175 Compost sheds, 2 Integrated Solid Waste Management (ISWM) facilities in urban areas and 9,309 segregation sheds, 73,066 community compost pits in rural areas. These facilities are integral in ensuring that waste is processed and managed effectively and in accordance with SWM rules, 2016. • PPE Kits for Workers: The well-being and safety of workers engaged in waste management activities are of utmost importance. We ensure their protection by supplying Personal Protective Equipment (PPE) kits every six months, with additional provisions made as needed ensuring their well-being and safeguarding them against potential health hazards. These measures include safety gear such as gloves, masks, and protective clothing.

Sr No.	NGT's Analysis, Findings and Direction	Compliance/ Action taken
		<ul style="list-style-type: none"> • Recyclables and Resource Recovery: A crucial component of our waste management strategy is the recovery of valuable resources. Recyclables are sold to authorized recyclers, while Segregated Combustible Fraction (SCF) and Refuse Derived Fuel (RDF) are provided to cement plants and other similar industries for use as an alternative fuel source. These practices contribute to resource conservation and environmental sustainability. • Training and Capacity Building: Our proactive approach to skill enhancement and capacity development is pivotal in ensuring the effective execution of waste management projects. We regularly conduct training programs for individuals involved in these projects, equipping them with the necessary skills and knowledge to adhere to scientific practices. Through the "Swachhata Diksha" training center in Ambikapur, we extend our expertise to multiple states, conducting training sessions and capacity-building workshops focused on sustainable waste management solutions. Furthermore, our commitment to knowledge sharing goes beyond national borders, as exemplified by our collaboration with Nepal, where we've provided training to approximately 70 officials, underscoring our dedication to promoting responsible waste management practices internationally. • Zero Landfill Model: Our unwavering commitment to minimizing landfill use for waste disposal is strongly supported by our dedicated focus on essential facilities such as SLRM centers, segregation sheds, compost sheds, and the community compost pit. These facilities play a critical role in efficiently converting both wet and dry waste into valuable compost and recyclable materials, including SCF and RDF, leading to a substantial reduction in waste sent to landfills. Consequently, we are making steady progress towards our ultimate objective of establishing a zero-landfill model, significantly mitigating the environmental impact of our waste management practices. • As a testament to the effectiveness of these practices, we are proud to share that Chhattisgarh has been awarded the distinction of being recognized as the Cleanest State (2019, 2020 and 2021) in India on three separate occasions. These accolades have been bestowed upon us by the Ministry of Housing and Urban Affairs (MoHUA), India, under their Swachh Sarvekshan initiative. These honours serve as a testament to our unwavering commitment to excellence in the field of waste management and our consistent dedication to maintaining the highest standards of cleanliness and sustainability within our state.
9	Para 31: End users of the compost and rejects from Integrated MSW facilities with composting facilities and material recovery facilities are not given.	<ul style="list-style-type: none"> • The compost generated from these compost pits of rural and urban areas are being utilized in community parks, gardens and distributed to local farmers for agricultural purposes. • The Segregated Combustible Fractions and Refused Derived Fuels generated from ISWM facilities are being sent to nearby Cement Industries for final disposal.
10	Para 32: Data shows that out of 2051 TPD of waste generated in rural areas, 936 TPD waste is	<ul style="list-style-type: none"> • Among the 3,871 tons per day (TPD) of waste generated in the state, a substantial portion of 2,051 TPD is generated in rural areas. Out of which, 1,106 TPD wet waste is efficiently

Sr No.	NGT's Analysis, Findings and Direction	Compliance/ Action taken
	collected and segregated. However, this does not match with waste processed at SLRM and compost shed/home composting.	processed at the 73,066 Community compost pits and through home composting initiatives, while 936 TPD dry waste is effectively managed at the 9,309 Segregation Sheds. A minimal amount of 09 TPD solid waste remains unattended which will be managed by establishing processing centres in remaining rural areas. This well-coordinated waste management system reflects our unwavering commitment to bridging the gap between waste generation and its responsible processing, in strict accordance with our continuous dedication to comply with the Solid Waste Management, Rules, 2016.
11	Para 32: Community compost pits be properly maintained, ensuring that compost produced is fully utilized and standardized designs be executed at town and village level.	<ul style="list-style-type: none"> • We wish to affirm our commitment to this crucial aspect of sustainable waste management and are pleased to report that all the compost pits within the 168 ULBs across our state have been meticulously constructed and are currently operational. These compost pits have been established in strict adherence to the standardized designs provided by the State Urban Development Agency, Chhattisgarh. Furthermore, we are proactively engaged in taking regular maintenance practices to ensure the strengthening of Compost pits and their continued functionality. • Moreover, standardized compost pits have constructed based on the Nadep technology at the Gram panchayats for efficient waste management practices. • The compost generated from these compost pits of rural and urban areas are being utilized in community parks, gardens and distributed to local farmers for agricultural purposes. All the ULBs had started distributing compost free of cost initially to the nearby farmers in the name of Sonah Khatu. Then citizens had shown interest to use this Sonah Khatu and the sale/use of compost gradually increased.
12	<p>Legacy waste at 7 ULBs be remediated without further delay and quantify remediated legacy waste indicating that no legacy waste is remaining and reported in the next compliance report. (Para 33, 34 & 35)</p> <p>a. Para 33: Legacy waste sites at 7 ULBs must be</p> <ol style="list-style-type: none"> i. maintained free from fires and other hazards till remediation. Safety of workers engaged should be ensured. ii. Such sites may be fenced with row of trees or wall, as may be viable, for aesthetics, preventing foul smell and safety. iii. Provisions of Schedule-I of the SWM Rules, 2016 may be strictly followed. iv. Water quality in the vicinity of legacy waste dump sites may be periodically monitored. 	<ul style="list-style-type: none"> • We are delighted to inform that significant progress has been made in the remediation work of existing legacy waste across 07 ULBs. The legacy waste at 05 ULBs namely Raigarh, Dhamtari, Korba, Durg and Jagdalpur have been remediated successfully and remediation work in 02 remaining ULBs namely Rajnandgaon, and Raipur is in progress. <ul style="list-style-type: none"> • In Rajnandgaon, the progress stands at 64%. • For Raipur, substantial groundwork has been accomplished, including a baseline survey, submission of an action plan, and windrow forming for approximately 10,000 cum of waste. However, due to rainy season, the screening process has been delayed, and it will be commenced in October 2023. As per our established milestones, 40% of the legacy waste will be remediated by December 2023 and 100% by December 2024. • The legacy waste sites are being diligently maintained, free from fires and other hazards, with particular attention to ensuring the safety of workers engaged in the process. We have initiated the beautification and safety measures as recommended, which include Concrete Measures for Leachate Collection and Treatment, fencing of these sites with rows of trees or walls for enhanced aesthetics, prevention of foul odors, and safety. The provisions of Schedule-I of the Solid Waste Management (SWM) Rules, 2016 are being meticulously

Sr No.	NGT's Analysis, Findings and Direction	Compliance/ Action taken
	<p><i>If any contamination is found, remedial action may be taken.</i></p> <p>v. <i>Environmental safety aspects associated with legacy waste dump sites be complied with as specified in Schedule I of MSW Rules, 2016.)</i></p> <p>b. <i>Para 34: Concrete measures for leachate collection and treatment needs to be taken.</i></p> <p>i. <i>Source apportionment studies are required to assess the actual impact of air pollution sources at dumpsite on air quality in the region.</i></p> <p>ii. <i>Detailed hydrogeological investigations and containment transport modelling is required to assess the impact of dumpsites on surface / ground water."</i></p> <p>c. <i>Para 35: 7 ULBs may remediate legacy waste expeditiously,</i></p> <p>i. <i>preponing proposed schedule upto December 2024.</i></p> <p>ii. <i>Use for land to be reclaimed be declared in advance so that further steps can be taken in that direction.</i></p>	<p>followed. Regular monitoring of water quality in the vicinity of legacy waste dump sites is being conducted, and any identified contamination is promptly addressed through appropriate remedial actions.</p> <ul style="list-style-type: none"> • The ULBs have proactively declared the intended use for the reclaimed land in Riverfront development projects, Livelihood, Gouthan, Compost center, Oxyzone, Amusement Park and Swachhatta Chetna Sanitation Park, thus facilitating the necessary steps in the direction of sustainable land reclamation. These efforts reflect our unwavering commitment to addressing legacy waste without further delay, ensuring that no legacy waste remains un-remediated. • <i>Details of the status, timeline and intended use of reclaimed land of all the 7 Legacy waste is attached in Annexure C.</i>
13	<p>Para 35: CPCB in consultation with some of the States PCBs and Municipal Corporations may work out environmentally safe methods/options for their use as directed in respect of State of UP.</p>	<ul style="list-style-type: none"> • As directed, we have directed the ULBs to reserve one-third of the reclaimed land for the purpose of establishing dense forests. This initiative contributes to the enhancement of green cover and biodiversity. Another one-third of the reclaimed land from the legacy dump sites has been dedicated to the establishment of integrated waste management facilities. This decision is pivotal in advancing our waste management capabilities and promoting sustainable practices. The remaining one-third of the reclaimed land is available for diverse purposes, in alignment with the overarching goals mentioned above. This flexibility allows for a balanced approach, including the potential for monetization if necessary for addressing the legacy waste. This prudent approach ensures that the land is used in a manner that best serves the community and environmental objectives. • Bioremediation, followed by bio-mining, is executed as per the Guidelines and Standard Operating Procedures (SoP) outlined by the CPCB. These procedures are rigorously followed to ensure effective and environmentally sound waste treatment. The residues and rejects

Sr No.	NGT's Analysis, Findings and Direction	Compliance/ Action taken
		<p>arising from these processes are managed with well-defined destinations, reducing environmental impact, and supporting the sustainable reuse of waste by-products.</p> <ul style="list-style-type: none"> • Details of the intended use of reclaimed land of all the 7 Legacy waste is attached in Annexure C.
14	<p>Para 36: Plastic waste and construction and demolition waste processing plants be set up ensuring that bio-medical, hazardous and E-waste are not co-mingled and treated with solid waste</p> <ol style="list-style-type: none"> <i>Further, instead of creating more dumping sites for waste generated on day-to-day basis, waste processing plants already set up be fully utilized so that no further legacy waste is generated.</i> <i>Simultaneously, plastic waste and construction and demolition waste processing plants be also set up ensuring that bio-medical, hazardous and E-waste are not co-mingled and treated with solid waste.</i> <i>It may be worthwhile to take into consideration guidelines on the subject issued by the Ministry of Housing and Urban Affairs (MoH&UA), GoI titled "Waste to Wealth" on 2.10.2017 under Swachh Bharat Mission.10</i> 	<ul style="list-style-type: none"> • We are pleased to report that significant progress has been made in line with the NGT's directive outlined in Para 36. Currently, we have established SLRM Centers in 167 ULBs and have implemented Integrated Solid Waste Management (ISWM) Facilities in 2 ULBs. These initiatives are primarily focused on effective plastic waste management, with a stringent assurance that no bio-medical, hazardous, or E-waste is co-mingled or treated alongside solid waste. • Moreover, we have achieved a significant milestone by establishing a state-of-the-art plastic granule plant with a commendable capacity of 15 TPD in Raipur Municipal Corporation. This plant has successfully recycled approximately 345 tons of plastic waste, transforming it into granules and generating a remarkable revenue of One crore since February 2023. • Furthermore, we have successfully set up Construction and Demolition (C&D) waste processing plant with a capacity of 65 TPD in Raipur Municipal Corporation and of 1.5 TPD in Korba Municipal Corporation. These facilities have effectively repurposed around 5,000 tons of C&D waste, utilizing it to fill low-lying areas and craft durable paver blocks, drain covers, concrete bench for garden and road-block structures. • The practicality and viability of these plastic granule and C&D plants are continuously monitored, and we are actively working towards replicating this model in other Municipal Corporations throughout the state. We are committed towards sustainable waste management practices while strictly adhering to the NGT's guidelines. • The images of the SLRM Centre, Compost Shed, Plastic Granule plant and C&D waste processing plant are attached in Annexure G.
15	<p>Para 37: Immediate efforts be made for ensuring connectivity with STPs and proposed STPs</p> <ol style="list-style-type: none"> <i>Gap in generation and treatment of sewage which is 421.4 MLD be addressed at the earliest as observed earlier.</i> <i>Appropriate treatment of such waste has to be undertaken ensuring that no fecal contaminants are discharged into water streams/ponds/rivers.</i> 	<ul style="list-style-type: none"> • To address the gap between sewage generation and treatment capacity, our state is dedicated to promptly tackling this challenge. We have implemented a series of comprehensive measures aimed at enhancing the utilization of existing Sewage Treatment Plants (STPs). Notably, our efforts have yielded significant progress, with the treatment capacity increasing from 178.6 MLD in March 2023 to 222.2 MLD in July 2023. Additionally, we are actively expediting the establishment of proposed STPs, ensuring that all the generated sewage is meticulously treated to prevent any untreated waste from being discharged into water bodies. • In Chhattisgarh, most of the urban households are relied on on-site sanitation systems such as Septic Tanks, Pit latrines and twin pits. So, all ULBs have established Faecal sludge treatment facility for the treatment of fecal contaminants/ septage generated from the households of the ULBs. A total number of 160 ULBs have Faecal Sludge Treatment Plants (FSTP) based on Low-cost gravity based Planted Drying Beds for the treatment of black

Sr No.	NGT's Analysis, Findings and Direction	Compliance/ Action taken
	<p>c. <i>The STPs set up so far need to be properly operated and to remain compliant with the standards.</i></p> <p>d. <i>Treated sewage needs to be utilized for secondary purposes.</i></p> <p>e. <i>Immediate efforts need to be made for ensuring connectivity with STPs so to operate with their fully designed and installed capacity.</i></p>	<p>water generated in these ULBs. The ULBs namely Raipur, Bilaspur, Durg, Bhilai, Kawardha, Korba, Raigarh, Kirodimal Nagar and Badibacheli are using nearby STPs for co-treatment of septage.</p> <ul style="list-style-type: none"> • The existing STPs are rigorously maintained, operated, and upgraded as necessary to ensure compliance with the prescribed standards. This entails regular maintenance, performance monitoring, and the use of state-of-the-art technologies to meet and exceed the required treatment standards. • ULBs are utilizing the treated wastewater from STPs in various activities such as irrigation, road washing, dust suppression, industrial processes, and non-potable uses etc. Furthermore, Municipal Corporation Raipur has identified 09 industrial units which can utilize the treated wastewater from the STPs at Nimora, Kara and Chandandih. The industries are in the process of demand assessment and preparing Pre-feasibility report. Thereafter the MoU signing process will be initiated for utilizing treated wastewater from STPs. • Details of the under construction STPs and STPs under planning stage is attached in Annexure H.
16	<p>The issues relating to compliance of STPs with standards and utilization of treated sewage be monitored and looked into by centralised mechanism at State level. Instead of high costed STPs in small population towns/villages, oxidation ponds and other low-cost options be preferred</p> <p>a. <i>(para 48): Available treatment capacity should be fully utilised.</i></p> <p>b. <i>STPs be made compliant with the prescribed standards.</i></p> <p>c. <i>There is urgent need that entire installed capacity of 360.5 MLD is utilised.</i></p> <p>d. <i>Glaring gaps existing at locations like Domuhani (Bilaspur), Chandandih (Raipur), Nimora (Raipur), Balikota (Jagdalpur) and other places be looked into on continuous basis by a centralised mechanism which may be set up within a month.</i></p>	<ul style="list-style-type: none"> • We are pleased to inform the tribunal that we have taken proactive measures to address the concerns mentioned in Para 48. To ensure compliance with STP standards and promote the efficient use of treated sewage, we have established a centralized mechanism at the State level. This mechanism has enabled us to conduct regular meetings, closely monitor the performance of STPs, engage in discussions with relevant stakeholders, and take necessary actions to rectify any discrepancies. • In line with the directive to explore cost-effective options for small population towns and villages, we have also initiated the construction of FSTPs (planted gravel Beds), oxidation ponds and low-cost waste stabilization pond, constructed wetland, phytoid decentralized wastewater treatment units for the treatment of fecal sludge/ wastewater generated from households. In current FY, 1537 number of such structures are targeted, out of which 09 are constructed and 226 are in DPR stage. • These solutions not only align with our commitment to environmental sustainability but also offer financially viable options for wastewater treatment. We remain dedicated to the effective management of sewage and wastewater treatment for the benefit of our communities and the environment. • We are delighted to provide a positive update in response to the tribunal's directive regarding ensuring connectivity with installed Sewage Treatment Plants (STPs) and proposed STPs. • Due to a series of constructive initiatives and regular meetings conducted by the Chief Secretary of state and comprehensive review session chaired by the Secretary, Urban Administration & Development Department with Municipal Commissioners and officers, the

		<p>capacity utilization of constructed STPs of capacity 360.5 MLD has notably increased from 178.6 MLD in March 2023 to 222.2 MLD in September 2023.</p> <ul style="list-style-type: none"> • <i>Details of the low-cost option for treatment of wastewater such as FSTP (planted gravel bed) and oxidation ponds is attached in Annexure I.</i>
17	<p>Chief Secretary may immediately set up orientation programme on regular basis at appropriate institutional level to deal with environmental issues at district level</p> <p><i>a. (para 56). In order to facilitate expeditious execution of sewage and solid waste management projects, the Chief Secretary may consider suitable orientation/interaction programmes for District Magistrates or other concerned officers to improve environmental governance. The plans grounded for sewage and solid waste management be monitored rigorously at district and Tehsil level.</i></p>	<ul style="list-style-type: none"> • In our continuous efforts to promote education and expertise within the waste management sector, we have established the "Swachhta Diksha Centre" in Ambikapur. Our overarching goal is to equip professionals with the knowledge and tools needed to craft effective waste management solutions tailored to their specific communities. Simultaneously, we are dedicated to fostering public awareness of the paramount significance of responsible waste management in shaping a cleaner and more sustainable future. The "Swachhta Diksha Centre" has cutting-edge infrastructure and an extensive array of resources that facilitate in-depth learning and skill development. Moreover, we offer a flexible training approach, accommodating the diverse needs of individuals, organizations, and communities by providing both online and offline training options. Our comprehensive curriculum covers every aspects of environmental issues on air, water pollution and waste management, including waste reduction, recycling, composting, and landfill management, ensuring a well-rounded understanding of this critical field. Through the "Swachhata Diksha" training center, we have shared our expertise with multiple states, conducting training sessions and capacity-building workshops for the District Magistrates and other concerned officers which improves sustainable waste management in the state. Our state has assisted multiple states by offering training and capacity building workshops regarding sustainable waste management. 80 officials from Maharashtra, 50 from Uttar Pradesh, 28 from Tamil Nādu, 25 from Rajasthan, 10 from Andhra Pradesh, 40 from Tripura, 25 from Ladakh and 04 from J&K have been offered training from the training centre. Additionally, our reach extends beyond national borders, exemplified by our collaboration with Nepal, where we have provided training to approximately 70 officials. This international collaboration underscores our commitment to promoting responsible waste management practices on a global scale. • Under Swachh Bharat Mission Gramin, the Rural Departments has organized several training programs on solid and liquid waste management, plastic waste management, fecal sludge management for Panchayati Raj Institution members, concerned stakeholders at development blocks and district levels. A total of 452 trainings were organized in the financial year 2022-23 in which a total of 39427 people were trained. These training programs is continuously enhancing the skills and knowledge of individuals engaged in the execution of waste management projects, ensuring effective and informed implementation. • <i>Details of the training session conducted is attached in Annexure J.</i>
18	<p>Para 58: Status of sewage and solid waste management with respect to each city, town and</p>	<ul style="list-style-type: none"> • The comprehensive data on solid and liquid waste management of ULBs of the state has been uploaded in the State's Urban Administration and Development (UADD) website and

	village be placed on State's portal and be made part of District environment Plan.	<p>Swachh Bharat Mission portal every month for public dissemination. By enhancing data accessibility, we contribute to improved waste management planning and environmental sustainability at the local and regional levels.</p> <ul style="list-style-type: none"> • This endeavour aligns with our commitment to transparency, accountability, and the active involvement of the public in matters related to sewage and solid waste management, as outlined in the directives of the National Green Tribunal (NGT). We will continue to work towards strengthening these data dissemination mechanisms and promoting a culture of shared responsibility for waste management practices. • Screenshot of the reports published on the web portal is attached as Annexure K.
19	<p>Chief Secretary may set up a centralized single window mechanism for planning, capacity building and monitoring of waste management at the State level and District level</p> <p>a. (para 59): First change required is to set up a centralized single window mechanism for planning, capacity building and monitoring of waste management at the State level. Of course, local authorities have to do their duty and stocktaking at the district levels may continue but subject to supervision and control of such mechanism.</p> <p>b. It should be headed by an officer of the rank of Additional Chief Secretary with representation from concerned departments – Urban Development, Rural Development, Environment and Forest, Agriculture, Water Resources, Fisheries and Industries.</p> <p>c. The mechanism should be working on fulltime basis. Its functions should include preparing a comprehensive blue print, periodic review of progress in bridging the gaps in sewage and solid waste management and establishing, continuous interaction with the stakeholders, including experts and</p>	<ul style="list-style-type: none"> • The State has established a centralized single window mechanism headed by Additional Chief Secretary of the State to review the progress of under construction/proposed STPs, increasing connectivity of the existing STPs, interact with various stakeholders to utilize the treated wastewater from STPs and to discuss with the experts in the field of waste management to strengthen the solid waste management in the state. This mechanism will serve as the guiding authority for coordinating waste management efforts within the State, while local authorities continue to carry out their responsibilities at the district level, under the supervision and guidance of this centralized mechanism. • The first meeting of this committee was held on 27.09.2023 to review the progress in STP connectivity, utilizing the treated water from STPs in nearby industries and also reviewed the steps taken by departments with regards to the direction of Hon'ble NGT. • Notification of the formation of centralized single window mechanism, Letter to call the first meeting and minutes of the first meeting of this committee is attached as Annexure L. • Consistent training initiative for personnel involved in waste management projects is actively in motion. Training sessions are independently orchestrated by both the Urban and Rural Departments, catering to individuals deeply involved in the execution of waste management projects. The core purpose of this program is to elevate the proficiency and expertise of those engaged in the practical implementation of waste management projects, guaranteeing that the procedures are not just effective but also well-informed. This proactive strategy is geared toward the enhancement of waste management practices, with a fundamental commitment to environmental preservation. Simultaneously, it reinforces robust collaboration among all stakeholders involved in these endeavours.

	<p>institutions, concerned departments, community members and all other stakeholders.</p> <p>d. There must be a continuous training programme for those involved in execution of waste management projects.</p> <p>e. It was held that training must be planned for probationers and in service officers, particularly those who have to serve as District Magistrates to implement DEPs including sewage and solid waste management.</p>	
20	<p>State level Monitoring Mechanism be set up under Chief Secretary and District level Monitoring Mechanism under District Magistrate for monthly review starting from 1st May 2023 (para 59 & 65).</p> <p>a. Restoration plans need to be executed at the earliest simultaneously in all districts/cities/ towns/ villages in a time bound manner without further delay with well laid monitoring mechanism at State and District level.</p> <p>b. District Magistrates must take ownership for monitoring of sewage and solid waste management and regularly providing report to Chief Secretary on monthly basis and overall compliance be ensured by Chief Secretary for which regular meetings be conducted.</p>	<ul style="list-style-type: none"> • The state has directed all the district collectors vide letter dated 23.05.2023 to set up District level Monitoring Mechanism to review the progress of solid and liquid waste management of the districts in every month. In this context, a resilient Monitoring Mechanism has been firmly established, operating effectively at every District levels. Its primary objective is to ensure the efficient execution of restoration plans within predetermined timelines, spanning across all districts, cities, towns, and villages. This steadfast commitment to progress is fortified by an intricate monitoring framework, strategically designed to expedite the restoration process and eliminate any potential delays. • District Magistrates have wholeheartedly embraced the responsibility of overseeing sewage and solid waste management within their respective domains. To guarantee transparency and accountability, monthly meetings are diligently convened to assess the overall status and advancement in waste and sewage management. The District Magistrates provide comprehensive monthly reports on the progress of these crucial initiatives to the Secretary of the Urban Development Department. • In parallel, the Chief Secretary, as the central figure in ensuring state-wide compliance, actively conducts regular meetings with all involved departments Secretaries. These meetings serve the purpose of not only tracking the progress of ongoing initiatives but also addressing any obstacles that may arise, all the while maintaining a high standard of accountability. This proactive approach stands as a testament to our resolute commitment to advancing waste management practices and safeguarding our environment. • The active engagement of the Chief Secretary and District Magistrates in monitoring and compliance ensures that these critical initiatives are progressing as planned, and any obstacles are promptly addressed to facilitate a cleaner and more sustainable future for our state. • <i>Letter directing all the district collectors to set up District level Monitoring Mechanism is attached as Annexure M</i>

Note*: **STP at Domuhani:** Following a meticulous examination of the connectivity between the STP, it has been discerned that a substantial disparity in elevation exists between the STP and the associated drainage system. To rectify this situation effectively, extensive excavation and related engineering works are imperative. These tasks have been strategically scheduled to commence after the conclusion of the ongoing monsoon season. Rest assured, we are dedicated to addressing this challenge with utmost diligence and technical precision to optimize the performance of these vital STPs.

STPs at Nawa Raipur: Currently, the STPs are in operational mode. However, they are not operating at their full capacity due to the relatively low population density in the area they serve.

Details of the status timeline and intended use of reclaimed land of the 7 Legacy waste Dumpsites

Total		10,17,440	2,84,619	3771.91	Approx. 2,46,375 Tonne of Legacy waste was remediated.	Approx. 5,57,898 Tonne of Legacy waste have been remediated till now.		-

Note*: **Raipur:** Kindly be informed that the Legacy Waste remediation work at Raipur has experienced a somewhat delayed commencement due to the ongoing monsoon season. However, we want to assure you that we are confident that the pace of this essential work will significantly pick up moving forward.

Rajnandgaon: Kindly note that previously, Legacy Waste remediation at Rajnandgaon was managed by the ULB itself, with 53% completion. However, after the pivotal intervention by the NGT aimed at expediting the process, The ULB has appointed a contractor, and work will finish by March 2024

OFFICE OF THE MUNICIPAL CORPORATION, RAIGARH(C.G.)

VERSUS

CENTRAL POLLUTION CONTROL BOARD

RESPONDENT(S)

(IA No.163587/2021-EXEMPTION FROM FILING C/C OF THE IMPUGNED JUDGMENT and IA No.163585/2021-STAY APPLICATION and IA No.163584/2021-PERMISSION TO FILE ADDITIONAL DOCUMENTS/FACTS/ANNEXURES)

Date : 18-04-2023 This appeal was called on for hearing today.

CORAM : HON'BLE MR. JUSTICE V. RAMASUBRAMANIAN
HON'BLE MR. JUSTICE PANKAJ MITHAL

For Appellant(s)

Ms. Prachi Mishra, A.A.G.
Mr. Sumeer Sodhi, AOR
Mr. Prannoy Joe Sebastian, Adv.
Mr. Chaitanya, Adv.

For Respondent(s)

UPON hearing the counsel the Court made the following
O R D E R

The State of Chhattisgarh has come up with the above statutory appeal, aggrieved by order passed by the National Green Tribunal rejecting their application for extension of time to formulate an action plan.

On 29.03.2023, when the appeal came up for hearing, we passed

Signature Not Verified
Digitally signed by
POOJA SHARMA
Date: 29.03.2023
18:04:58
Reason:

the following order:

“Learned counsel for the State only seeks extension of

time to formulate the action plan and put the necessary infrastructure in place. The State shall file a status report of the action taken so far, the remaining part of the action to be completed and the time required for completion, within two weeks."

In compliance of the said order, the State has filed an affidavit. In the affidavit the State has pointed out that the State wants time for completion of six STP projects located in Raipur and Raigarh on rivers Kharoon and Khelo and extension of time for completion of six other STP projects located in Kanker, Dhamtari, Nawpara, Rajim, Simga and Korba on rivers Mahanadi, Seonath and Hasdeo.

Paragraphs 9 to 12 of the affidavit may be usefully extracted as follows:

"9. It is submitted that 6 STPs at Bhatagaon (Kanpur), Chandandih (Raipur), Kara (Raipur), Nimora (Raipur) wherein the polluted river stretch is (Bhatagaon to Bendri) P - IV and Banjipali (Raigarh) and Bade Atarmoda (Raigarh) wherein the polluted river stretch exists in Kelo river (Raigarh to Kanaktora) P - V is completed and are currently 100% operational. Tabular chart depicting progress of 100% operational STPs in the river stretches Bhatagaon to Bendri and Keio River (Raigarh to Kanaktora) of the Appellant State is annexed herewith and marked as ANNEXURE A (Page-6).

10. Further, construction of other 6 STPs at Kanker, Dhamtari, Nawapara, Simga, Rajim and Korba were started by the Appellant which will be completed on or before 30.06.2024 as has

been submitted in the appeal itself. Tabular chart depicting the status of under construction STPs in the Polluted rivers stretches of the State is annexed herewith and marked as ANNEXURE B (Page 7).

11. It is further submitted that the Appellant State being committed in following the model of good governance, in addition to construction of STPs under consideration in the present Appeal, the Appellant State has taken proactive measures to prevent water pollution by undertaking installation of various additional STPs. Tabular chart depicting the status of under construction STPs in various river stretches River Mahanadi (Sihawa to Aarang), River Seonath (Bemta to Simga} and River Hasdeo (Korba to Urga) of the Appellant State are annexed herewith and marked as ANNEXURE C (Page 8).

12. It is pertinent to highlight that the recent monthly progress report of February 2023 prepared in compliance of order dated 24.09.2020 in O.A. No. 673 of 2018 before Hon'ble Tribunal further demonstrates significant efforts made and initiatives taken by the Appellant State in compliance of applicable laws especially Water (Prevention and Control of Pollution) Act, 1974 and Air (Prevention and Control of Pollution) Act 1981. The recent monthly progress report of February 2023 prepared by the Appellant State in compliance of order dated 24.09.2020 in O.A. No. 673 of 2018 before Hon'ble Tribunal is annexed herewith and marked as ANNEXURE D (Pages 9-24)."

From what is extracted above, it is clear that six STPs in Raipur and Raigarh have already been completed and they are currently 100% operational. Insofar as other six STPs are

concerned, the State has given an undertaking to complete the same on or before 30.06.2024.

In view of the above, we are of the view that the State should be granted extension of time to complete the construction of six STPs also. However, to ensure that the State complies with the time limit as indicated in the affidavit of compliance, the appeal is adjourned to August, 2023, for filing a further progress report.

In the meantime, out of the bank guarantee of Rs.10 Crores, deposited by the State, 50% amount shall be released to the State in view of the fact that six STPs have been completed and have been made operational.

DO No. B. 13030/2 (IEC)/2023 (SBM)-DTE (UD&PA)
Dated Aizawl, the 15th March, 2023

Dear,

I am writing to confirm the travel plans of delegates from Mizoram for Swachhotsav 2023 in connection with Swachhata Yatra where we are assigned to visit Amibikapur, Chattisgarh to be our Host City.

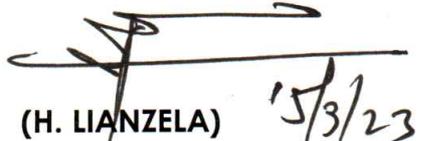

The Team-Mizoram will be of 9 members out of which 7 members are selected from SHGs/ALFs as Swachhata Doots and the other 2 members are from DAY-NULM State Mission Management Unit and SBM(U) Project Management Unit. Flights have been booked for the tour on 20th March, 2023 and the Swachhata Doots are expected to arrive at Ambikapur on 21st March, 2023.

I sincerely hope that your good self and the State Mission Directorate will extend your kind support and assistance to the team for their food, lodging and local programmes during their stay.

with warm regards,

Yours sincerely,

Dear Sir/Madam,

Subject: Exposure Visit to SLRM Centre

We would like to congratulate you on your successful application of the SLRM Model Waste Management System in Ambikapur, Chhattisgarh.

We in Nepal are looking at improving our Waste Management System and had invited Mr. Srinivasan to visit Nepal. His awareness programme was well received and we would like to make an attempt to apply it in Birendranagar Municipality as a pilot project.

Therefore, we plan to be in Ambikapur from 10 to 11 January 2020. I have attached the tentative itinerary for your information. We hope that your esteemed office will extend their cooperation in showing us around and sharing the lessons learned. There might be a team of 10 personnel from different line Ministries, the Mayors of two municipalities and ED of LEAD Nepal.

I am looking forward to your positive response.

Yours Sincerely

Rishi Raj Acharya

No. SMD/SMMU/Exposure Visit/1990/21-22

Dated: 23/11/2021

To,
Mr. Prabhakar Pandey,
Municipal Commissioner,
Ambikapur Municipal Corporation.

Subject: Requesting support for organizing “Exposure cum Learning Visit” for UDD & ULB officials from Maharashtra.

Dear Sir,

Heartiest Congratulations to you and the team for the great achievements in Swachh Survekshan 2021!

Urban Development Department, Maharashtra is taking various initiatives around solid waste management.

To take this activity one step forward, the state intends to conduct an exposure cum learning visit for administrative heads of 35 Urban Local Bodies and selected officials from UDD to Ambikapur city to get the insights on various methods of segregation & composting, governance mechanism and engagement models with farmers, etc in two batches. The visit for first batch is being organized on 26th & 27th November 2021. The state team will reach Ambikapur post evening on 26th November as discussed earlier and the field visit can be organized on 27th November 2021

We request you to kindly guide the team for this learning visit and demonstrate the models established by the Ambikapur Municipal Corporation for effective segregation of waste, decentralized processing, engagement of farmers for compost consumption and overall SWM.

Looking forward for your support and a fruitful exposure cum learning visit.

Thanking you,

2314

(Anil Muley)
State Mission Director

Dated: Agartala The 23rd May, 2022

To
The Municipal Commissioner,
Ambikapur Municipal Corporation,
Chattishgarh -497001.
nagarnigamambikapur@gmail.com

Sub: Information regarding, exposure visit of newly elected representative of Urban Local Bodies, Tripura, under SBM-U Scheme.

Sir,

I would like to inform you that for proper implementation and monitoring of the Swachh Bharat Mission-Urban scheme across 20 ULBs of Tripura, a deep understanding of the scheme is required for which exposure visit on successful implementation of SBM-U project to the best performing city like Ambikapur, Chattishgarh is required.

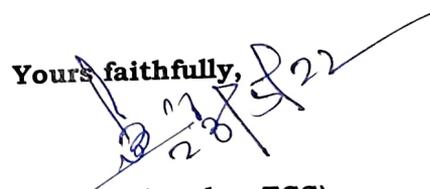

Urban Development Department, Tripura, intends to send 22-24 newly elected members & officials of ULBs for 4 days (2 days for to and fro journey and 2 days for exclusive field visit) exposure visit to Ambikapur, Chattishgarh, tentatively on 6th to 10th June, 2022.

In connection to the above, I would like to request you to kindly support us in logistic (preferably Govt. Guest House/ Circuit House) and for travel, entire cost will be borne by this Directorate.

Additionally, a liaison officer from your end may be requested to guide our team on the various projects/sites/ SLRM centers/door to door waste collection mechanism/source segregation/ Legacy waste dumpsite remediation activities / waste water management initiative & waste to wealth concept as successfully implemented in Ambikapur under your leadership.

Anticipating wholehearted cooperation from your kind end.

Yours faithfully,

(Dr. Tamal Majumder, TCS)
Mission Director, SBM-U
Additional Secretary & Director
Urban Development Department,

Exposure Visit to Ambikapur Inbox x

ishey namgyal <namgyalg8@gmail.com>
to me

Ms. Pratishtha Mangain, IAS
Commissioner, Municipal Corporation,
Ambikapur
Madam,

First of all I would like to congratulate you and Ambikapur Municipal Corporation for all the successful projects and unique waste management practices.

Leh as an urbanizing city is still in the early stage of development in the Waste Management section and it would be negligent of us if we don't take this very enthusiastic to visit Ambikapur for an exposure tour tentatively around 21st November 2022. The tentative agenda/ interested areas for the same are:

- MRF facilities
- Primary-secondary segregation units
- Composting
- FSTP- co-composting
- SWM-related projects
- Wastewater related projects

A total of ten ward members of Municipal Committee Leh and Kargil are planning to visit Ambikapur. In this regard I would appreciate if a line of confirmation is received from your end.

With Regards
Dr. Ishey Namgyal,
President of Municipal Committee

Ambikapur Nagar Nigam
Welcome confirmed by the commissioner. Thanks

ishey namgyal <namgyalg8@gmail.com>
to me

Thank you for the confirmation.
Regards,
President,
Municipal Committee

दिनांक 27.09.2023 को माननीय NGT OA 606/2018 मे पारित आदेश के परिप्रेक्ष्य में विशेष सचिव, आवास एवं पर्यावरण विभाग की अध्यक्षता में Centralised Single Window Mechanism समिति की प्रथम बैठक का कार्यवाही विवरण
-----00-----

शासन के आदेश क्रमांक एफ 9-17/2023/1/5 दिनांक 20.07.2023 के अनुक्रम में दिनांक 27.09.2023 को माननीय NGT OA 606/2018 में पारित आदेश के परिप्रेक्ष्य में विशेष सचिव, आवास एवं पर्यावरण विभाग की अध्यक्षता में Centralised Single Window Mechanism समिति की प्रथम बैठक का आयोजन किया गया, जिसमें निम्नानुसार अधिकारी उपस्थित थे :-

विशेष सचिव – आवास एवं पर्यावरण विभाग

विशेष सचिव – नगरीय प्रशासन एवं विकास विभाग

सदस्य सचिव –छ.ग. पर्यावरण संरक्षण मंडल

उपसचिव –आवास एवं पर्यावरण विभाग

प्रथम बैठक हेतु जारी एजेण्डों पर निम्नानुसार निर्णय लिये गये :-

एजेण्डा क्र-1 : नगरीय निकायों/ग्राम पंचायतों मे ठोस अपशिष्ट प्रबंधन नियम 2016 के प्रावधानों के परिपालन की समीक्षा, अद्यतन स्थिति का आकलन तथा गैप को समाप्त करने पर चर्चा।

उपरोक्त सम्बंध में विशेष सचिव, नगरीय प्रशासन एवं विकास विभाग द्वारा नगरीय निकायों में ठोस अपशिष्ट प्रबंधन के गतिविधियों की प्रगति एवं Legacy waste remediation के अद्यतन प्रगति के बारे में समिति को अवगत कराया गया। साथ ही नगर निगम रायपुर में संचालित Plastic Granular Recycling Unit एवं CND प्लांट के बारे में चर्चा की गई। जिस पर समिति द्वारा राज्य के सभी नगर निगमों में भी इसी प्रकार के Plastic Granular Recycling Unit एवं CND प्लांट की स्थापना हेतु सुझाव दिया गया।

एजेण्डा क्र.- 2 : नगरीय निकायों/ग्राम पंचायतों मे दूषित जल के प्रबंधन की अद्यतन स्थिति, STP का पूर्ण क्षमता पर संचालन तथा उपचारित जल के समुचित पुर्नउपयोग हेतु सम्भावित विकल्पों पर चर्चा।

निरंतर...

उपरोक्त सम्बंध में विशेष सचिव, नगरीय प्रशासन एवं विकास विभाग द्वारा राज्य मे संचालित STP की प्रगति पर चर्चा की गई। समिति को अवगत कराया गया कि STP के capacity utilisation 178 MLD से बढ़कर 222 MLD हो गई है। जिस पर समिति द्वारा capacity utilisation और बढ़ाने का सुझाव दिया गया है। साथ ही नगर निगम बिलासपुर में वर्षा ऋतु की वजह से sewerage connectivity से संबंधित निर्माण कार्यो मे विलंब होने की जानकारी समिति को दी गई। इस सम्बंध में समिति द्वारा वर्षा ऋतु उपरांत निर्माण कार्य शीघ्र प्रारंभ करने के निर्देश दिए गए।

नगर निगम रायपुर में उपचारित दूषित जल को पॉवर प्लांटों में उपयोग करने के संबंध में चर्चा की गई। इस पर समिति द्वारा पृथक से आयुक्त, नगर पालिक निगम रायपुर, बिलासपुर, सदस्य सचिव -CECB तथा उद्योग विभाग के प्रतिनिधियों के साथ बैठक आयोजित करने के निर्देश दिए गए।

एजेण्डा : 3 अध्यक्ष महोदय की अनुमति से अन्य विषय।

अंत में धन्यवाद ज्ञापन उपरांत बैठक संपन्न हुई।
