**BEFORE THE NATIONAL GREEN TRIBUNAL
PRINCIPAL BENCH, NEW DELHI**

ORIGINAL APPLICATION NO. 694 OF 2023

IN THE MATTER OF:

IN RE: News item appearing in Hindustan Times dated 26.10.2023 titled
“UN predicts groundwater level in India will reduce to ‘low’ by 2025”

**STATUS REPORT ON BEHALF OF RESPONDENT NO. 10, THE
STATE OF JHARKHAND**

MOST RESPECTFULLY SHOWETH

1. That the above captioned Original Application is registered *suo motu* on the basis of the news item published in ‘Hindustan Times’ dated 26.10.2023 titled “UN predicts groundwater level in India will reduce to ‘low’ by 2025”.
2. That on advance notice, the report from the Central Ground Water Authority, New Delhi, was submitted on 22.11.2023. The report says that the Government has implemented all the recommended measures outlined in the UN University report to improve the country’s groundwater situation. However, the 2022 Annual Report, published by the Central Ground Water Board, Ministry of Water Resources, Government of India presents a contrasting picture from what has been submitted before the Tribunal.
3. In view of the seriousness of the issue, the Hon’ble Tribunal has impleaded 24 Respondents including the Respondent herein, as Respondent No. 10 and directed to file their response.

4. That, it is humbly stated and submitted that the present reply is filed on behalf of the Respondent No. 10 in compliance of the order dated 26.07.2024 passed by this Hon'ble Tribunal.
5. It is respectfully submitted that, in the state of Jharkhand, out of a total recharge-worthy area of 60,646.73 sq. km, approximately 463.92 sq. km falls under the category of "over-exploited" zones. Furthermore, 1,068.48 sq. km is classified as "critical" while 2,169.13 sq. km is categorized as "semi-critical." The State's annual water extraction has risen due to increased urbanization and industrialization.

A true copy of the assessment unit areas categorized under different classifications in Jharkhand (2023) is annexed herewith and marked as **ANNEXURE 1**.

6. It is respectfully submitted that the total annual groundwater recharge in the state has been estimated at 6.25 billion cubic meters (bcm), with the annual extractable groundwater resources assessed at 5.73 bcm. The current annual groundwater extraction stands at 1.8 bcm, resulting in a stage of extraction of 31.38%.

A true copy of the Dynamic Ground Water Estimation Report is annexed herewith and marked as **ANNEXURE 2**.

7. It is stated and submitted that out of 263 assessment units (block-259, Urban area-04), 5 units (1.90%) have been categorized as Over-exploited, 6 units (2.28%) as Critical, 11 units (4.18%) as Semi-Critical and rest 241 unit (91.63%) are under Safe category.

A true copy of the Dynamic Ground Water Estimation Report, 2023 is annexed herewith and marked as **ANNEXURE 3**.

8. The Respondent State respectfully submits its status report, organized under the following distinct heads for clarity and comprehensive understanding:

I. Geographical Information:

- a. It is humbly submitted that the state of Jharkhand can be considered as having two major hydrological provinces. The first one is Archaean Cratonic Mass of Singhbhum, with large sedimentary basins along with number of volcano-sedimentary sequences. The second one is the Chhotanagpur Gneissic Complex represented dominantly by gneissic country with older vestiges of Granulities, large number of intra-cratonic sedimentary basins including Gondwana sedimentation and episodic, magmatism of diverse nature.
- b. It is humbly submitted that the Precambrian igneous and metamorphic rocks occupy nearly 84% of the total geographical area. Volcanic rocks, which are basic type and belong to Rajmahal volcanics of Upper Jurassic to Lower Cretaceous age and Dalma volcanics of Precambrian age, cumulatively covers about 7% of the total geographical area. The sedimentary rocks belong to Gondwana Super group and Vindhyan System also covers about 6%.
36 area of the state. Alluvium and Tertiary sediments cover only about 2% area. Fissured formations are hard and compact rocks where ground water occurs only within secondary porosities or in overlying weathered mantle.

II. Ground Water Level Observed in 2022

- a. Pre Monsoon (May, 2022) :** Water levels during May, 2022 were monitored from 324 wells. Depth to water level contouring were prepared based on the range of water level data viz. 0-2, 2-5, 5-10,>10m bgl. The minimum and the maximum depth to water levels have been recorded as 0.45 m bgl in Gumla district and 33 m bgl in Ranchi district. In general, the water level throughout the State varies in the range of 5 - 10 m bgl and has been observed in the 203 wells (63%) out of 324 analysed wells. Water level 2 - 5 m bgl has been observed in the 77 wells (24%). The water level in the range of 10- 20 m bgl has been observed in the 34 wells (10%) whereas the water level in 0-2 m bgl has been observed in 09 wells (3%) and water level >20mbgl observed in 1 well.
- b. Post Monsoon (November, 2022):** A total of 366 GWMW has been monitored during post-monsoon period in November 2022. Depth to water level contouring were prepared based on the range of water level data viz. 0-2, 2-5, 5-10, >10m bgl. Minimum and the maximum depth to water levels have been recorded as 0.4 m bgl and 16.10 m bgl in Gumla and East Singhbhum district respectively. Out of 366 wells, 226 (62%) of GWMW, water level ranges 2 - 5 m bgl which covers almost entire Jharkhand State. The water level in the range of 5-10 m bgl has been observed in the 90 wells (25%). Ground water level of 0 - 2 m bgl depth range has been observed only in 45 wells (12%) at different locations. Only 5wells (1%) have shown water level more than 10 m bgl.

A true copy of the Dynamic Ground Water Estimation Report is annexed herewith and marked as **ANNEXURE 4**.

III. Dynamic Ground Water Resource Estimation

It is humbly submitted that Dynamic Ground Water Resources Estimation report is prepared by CGWB and State Ground Water Directorate using GEC 2015 methodology.

The Ground Water Resources as on 2022 and 2023 is presented in the below table.

Assessment	Total Recharge worthy area of the State	Area under Overexploited	Area under Critical	Area under Semi Critical	Stage of Ground water extraction (%)
2022	60646.73	497.30	1006.74	2074.12	31.35
2023	60646.73	463.92	1068.48	2169.13	31.38

(Area in sq. km)

Area of assessment units under different categories in Jharkhand(2023)

Categorization of Block/ Mandals/Talikas in Jharkhand (2023)										
Sl no	States/ Union Territories	Total No. of Assessed Units	Safe		Semi		Critical		Over Exploited	
			No.	%	No.	%	No.	%	No.	%
1	Jharkhand	263	241	91.63	11	4.18	6	2.28	5	1.90

The above data reflects increase in Stage of Ground Water extraction in 2023 due to urbanization, Industrial, Mining activities etc.

IV. Ground Water Management Plans being adopted in the State:-

- a. Construction of Roof Top Rain Water Harvesting Structure (RWHS)

The prime objective of implementation of RWHS include:

- i. To reduce depletion of ground water levels by recharging the aquifers.
- ii. To enhance availability of ground water and utilize rainwater for sustainable development.
- iii. To increase groundwater Quality by Dilution.
- iv. To improve ecology of the area by increase in vegetative cover.

Under this component 357 nos. of Roof Top Rain Water Harvesting Structure have been constructed till now and further 398 Roof Top Rain Water Harvesting Structures are being constructed by Ground Water Directorate, WRD, Jharkhand in FY 2024-25.

A true copy of the list of 398 roof top rain water harvesting structures being implemented in FY 2024-25 is annexed herewith and marked as **ANNEXURE 5**.

b. Construction of Check Dams in small River/Drains: -

Under this component, Check Dams are being constructed in water harvesting area. Its main objective is to store excess rain water so that it can be used in future. The stored water can be used in fishing and other activities. It is also a useful and Powerful mean of recharging ground water. So far, a total of 3679 nos. of Check Dams have been constructed during 2000-23 and construction work of 677 nos. of Check Dams are in progress in FY 2024-25.

A true copy of the Details of schemes completed under Minor Irrigation Sector from 2000-01 to 2022-23 and 2024-25 is annexed herewith and marked as **ANNEXURE 6 (Colly)**.

- c. **Construction of Tank / Pond to store Rain Water :-** Under this component State constructed 61715 nos. Tank/ Pond by Minor Irrigation Dept. WRD, Jharkhand as per 6th MI Census to store rain Water for recharge ground water and for other purpose and 85838 nos. of Farm Ponds have been constructed under MANREGA.

A Chart disclosing Number of Farm Ponds is annexed herewith and marked as **ANNEXURE 7**.

- d. **Construction of Reservoir/ Dams to store rain water:-** Under this component state constructed 56 nos. of Reservoir/ Dams till now by Major Irrigation Dept. WRD, Jharkhand to store rain Water for recharging ground water and other purposes.

A Chart containing list of Constructed Dams is annexed herewith and marked as **ANNEXURE 8**.

- e. **Construction of Ongoing Major & Medium Irrigation Scheme:-** Under this component state has constructing 11 nos. of Major Irrigation Scheme and 15 nos. of Medium Irrigation Scheme to enhance ground water level in the state beside Irrigation scheme.

A Chart containing list of Ongoing Minor/Major Irrigation Schemes is annexed herewith and marked as **ANNEXURE 9**.

f. **Construction of Piezometer/ DWLR under National Hydrology Project (NHP):-** To establish a precise and scientific database on the ground water table across all 112 Blocks of Jharkhand, 112 equipped piezometers with Digital Water Level Recorder (hereinafter referred as "DWLR") were installed. These DWLR are seamlessly system (hereinafter referred ad "WIMS") Server of the Government of India, offering real- time 6-hourly water level data. The acquired data serves the purpose of monitoring historical declines in ground water resources, aiding in the formulation of remedial measures.

V. Regarding Ground Water extraction w.r.t. observation No. 19

It is humbly submitted that the Ground Water Directorate Ranchi is not giving any permission of Ground Water Extraction for any commercial and industrial activity purposes. At present CGWB is issuing NOC for Ground Water extraction for industrial and commercial purposes.

9. That in view of the submissions mase above, it is humbly submitted that the Respondent State shall abide all the directions/orders passed by this Hon'ble Tribunal.
10. The answering Respondent, further seeks the liberty to urge any other additional grounds at the time of the argument, if so required.
11. That the present report is made *bona-fide* and in the interest of justice.

Place: Kolkata
Date: 10.09.2024

5.3 SPATIAL VARIATION OF THE GROUND WATER RECHARGE, EXTRACTION AND DEVELOPMENT

Depending upon underlying geological formation, hydrogeological characteristics, rainfall scenario and land-use pattern the State shows a high degree of variation in groundwater recharge, extraction and development among the assessment units / sub-units. Even when aggregated to district level, the variations are significant.

5.3.1. Variation in Ground Water Recharge

Total Annual Ground Water Recharge in the State is **6.25 BCM**. Considering the natural discharge as **0.52 BCM**, Annual Extractable Ground Water Resource for the state of Jharkhand is **5.73 BCM**. Volumetrically ground water recharge is highest in West Singhbhum district and lowest in Koderma district. Deviation of unit-area monsoon rainfall recharge from unit-area total recharge among districts shows recharge is mostly dominated by storage parameters of the aquifer, rainfall infiltration factor and fluctuation of water level. District-wise details of various components of Recharge is tabulated in **Table 5.2** and graphically represented in **Fig. 5.2**.

Table 5.2 District-wise details of various components of GW Recharge (in BCM)

District	Rainfall Recharge - Monsoon	Rainfall Recharge - Non-Monsoon	Recharge from Other Sources	Total Annual GW Recharge	Total Extractable Ground Water Recharge
Bokaro	0.180036	0.01994	0.025232	0.225208	0.207646

Latehar	0.187014	0.014938	0.044134	0.246085	0.224867

5. In the present exercise 2023, only Dynamic Ground Water Resources of Jharkhand has been assessed.

SUM UP

- The re-estimation of ground water resources of Jharkhand as on March-2023 has been jointly made by Central Ground Water Board, State Unit office, Ranchi/Mid-Eastern Region, Patna with State Ground Water Directorate, Water Resources Dept. Govt. of Jharkhand
- In present estimation a total numbers of 263 assessment units (259 blocks and 4 urban centres- Ranchi urban, Dhanbad urban, Medininagar urban and Jamshedpur urban) have been assessed.
- The estimation is based on Ground Water Estimation methodologies as per GEC-2015. The most of the blocks has been assessed using RIF (Rainfall Infiltration Factor) method in comparison to WLF (Water Level Fluctuation) method
- Total Replenishable Ground Water Resource as on March 2023 has been assessed as **6.25 BCM**. Considering natural discharge of **0.52 BCM**, Annual extractable Ground Water Resources for the state of Jharkhand has been assessed as **5.73 BCM**.
- Current Annual Ground Water draft in the state of the Jharkhand has been assessed as **1.79 BCM** with Irrigation draft of **0.94 BCM**, industrial draft of **0.21 BCM** and **0.65 BCM** is drawn to meet up the drinking water demand. The average Stage of Ground Water Extraction as on March 2020 is **31.38 %**.
- The net ground water availability for future use is **3.95 BCM**. Annual GW Allocation for Domestic Use as on 2025 is **0.65 BCM**. Monsoon has got an overwhelming control over recharge of Jharkhand state.
- Based on categorization of the assessment units, 241 units have been categorized as safe while other 22 units fall into different categories. Five units namely Bermo (140.14 %) of Bokaro district, Baliapur (110.03%) of Dhanbad district, Chitarpur (110.32%) of Ramgarh District & Golmuri-cum-Jugasalai (128.07%) and Jamshedpur Urban (135.07 %) of East Singhbhum district fall into over-exploited category with stage of ground water extraction more than 100 %. Dhanbad Urban and Topchanchi block in Dhanbad district, Ramgarh block of Ramgarh District, Ranchi Urban and Silli block in Ranchi district, Jainagar block in Koderma dsitric fall into critical category while other 11 blocks namely Karon, Sarwan & Sonaraitthadi (Deoghar district), Dhanbad and

HG. Fm.	Age Group	Lithology	Hydrogeological condition	Ground Water Potential
			widely, up to 25 m bgl.	
		VOLCANO SEDIMENTARY SEQUENCE – schists, phyllites, basic and acidic intrusive	Ground Water restricted to weathered zone under unconfined condition and within deeper fractures/ joints down to 140 m under semi – confined condition. Water level varies between 5 and 20 m bgl in general.	Very limited yield potential. Generally within 15 m ³ /hr, subject to proper well designing.

2.4 GROUND WATER LEVEL CONDITIONS

Ground Water level in the state of Jharkhand varies considerably depending upon the terrain, hydrogeological conditions. Central Ground Water Board is monitoring 515 hydrograph network stations four times in a year viz., January 1st to 10th, May 20th to 30th, August 20th to 30th and November 1st to 10th. All the monitoring stations are open dug wells and piezometers. The depth to water level map for Pre and post-monsoon (2022) has been shown in **Plate -3**.

Pre-monsoon season (May, 2022)

Water levels during May, 2022 were monitored from 324 wells. Depth to water level contouring were prepared based on the range of water level data viz. 0-2, 2-5, 5-10, >10m bgl.

The minimum and the maximum depth to water levels have been recorded as 0.45 m bgl in Gumla district and 33 m bgl in Ranch district. In general, the water level throughout the State varies in the range of 5 – 10 m bgl and has been observed in the 203 wells (63%) out of 324 analysed wells. Water level 2 - 5 m bgl has been observed in the 77 wells (24%). The water level in the range of 10- 20 m bgl has been observed in the 34 wells (10%) whereas the water level in 0-2 m bgl has been observed in 09 wells (3%) and water level >20mbgl observed in 1 well

Post-monsoon season (November, 2022)

A total of 366 GWMW has been monitored during post-monsoon period in November 2022. Depth to water level contouring were prepared based on the range of water level data viz. 0-2, 2-5, 5-10, >10m bgl.

Minimum and the maximum depth to water levels have been recorded as 0.4 m bgl and 16.10 m bgl in Gumla and East Singhbhum district respectively. Out of 366 wells, 226 (62%) of GWMW, water level ranges 2 - 5 m bgl which covers almost entire Jharkhand State. The water level in the range of 5-10 m bgl has been observed in the 90 wells (25%). Ground water level of 0 – 2 m bgl depth range has been observed only in 45 wells (12%) at different locations. Only 5wells (1%) have shown water level more than 10 m bgl

ANNEXURE: 7

40

झारखण्ड सरकार
ग्रामीण विकास विभाग

पत्रांक - 13-080/MIS/2016/ग्रा.वि. (11) 660 (213) राँची, दिनांक 3-6-2024

प्रश्न

प्रमोद कुमार,
सरकार के संयुक्त सचिव।

संबंध में

निदेशक,
भूगर्भ जल निदेशालय, (जल संसाधन)
अभियंत्रण भवन, तीसरा तल्ला,
कचहरी चौक, राँची - 834001।

विषय :-

झारखण्ड राज्य के गतिशील भूजल संसाधनों के (Dynamic Ground Water Resources Estimation) आकलन के लिए आवश्यक प्रखण्डवार डेटा उपलब्ध कराने के सम्बन्ध में।

प्रसंग :-

आपका पत्रांक - 119 दिनांक 12.04.2024

महाराज

उपर्युक्त विषयक प्रासंगिक पत्र के संदर्भ में मनरेगा अन्तर्गत निर्मित तालाब एवं डोना से संबंधित प्रखण्डवार प्रतिवेदन सूचनार्थ एवं आवश्यक कार्रवाई हेतु संलग्न कर भेजी जा रही है।

अनुलग्नक - यथोक्त।

विश्वासभाजन,

Y.K.C.
03.6.24

सरकार के संयुक्त सचिव।

राँची, दिनांक 3-6-2024

आपका

13-080/MIS/2016/ग्रा.वि. (11) 660

प्रतिक्रिया

मनरेगा आयुक्त कार्यालय, ग्रामीण विकास विभाग, झारखण्ड, राँची को सूचनार्थ प्रेषित।

Y.K.C.
03.6.24

सरकार के संयुक्त सचिव।

2180
